IMPORTANT: Most seafarers are not aware of the fact that Somaliland is a separate entity, an independent State and no more a part of Somalia. The Port Authorities would rather you do not fly any courtesy flag, but certainly *not* a Somalian one. As this vessel (8,178 d.w.t. tonnes, MOGAS and gas oil, as part cargo only) was calling for the first time, the Agents were only too pleased to present the vessel with a flag.

Port Limits: As per report in "Guide to Port Entry".

Documents:

4 copies Crew List.
2 copies Crew Personal Effects Declaration.
1 copy Vaccination List.
Last Port Clearance.
Health Declaration.

All Port Officials were very courteous and promptly completed their formalities and departed.

Pilotage: Since no telecommunication was possible with Agent, all information regarding ETA, vessel's particulars, etc., was sent through the Charterers at Dubai and constantly updated all other information as per "Guide".

Anchorage: As per "Guide". Approach anchorage with extreme caution as all navigational marks unlit. The buoys were not existant. Vessels at anchor, even though manned, were not exhibiting any lights. In the months from June to September (South West Monsoons), wind picks-up from a S.W.'ly direction from about 2100 hrs. in the evening until about 1100 hrs. the following morning.

Max. Size: Up to about 40,000 d.w.t. and 28 ft. draft.

Health: Usual Health Declaration form completed on arrival.

Radio: No working radio station.

VHF: Channel 16 watch maintained. Operator responded promptly. Usual information is requested many times.

Radar: No service available.

Tugs: No tugs available. All berthing undertaken without assistance. Two mooring boats assist in running lines to the buoys. One boat is a wooden boat and the other is an enclosed lifeboat, which is also used for Pilot boarding and disembarking.

Berthing: Berthing is restricted to daylight hours only.

During monsoons, vessels berth only after wind has died down. No unberthing operations after sunset at tanker terminal. We observed small cargo vessels leaving port at about 2200 hrs.

Bulk of the cargo shipped out of this port is livestock. Some general cargo is also imported. Most vessels observed were rather small cargo vessels. All gear used was ship's gear.

A dilapitated terminal exists. None of the gear is used anymore. The vessel makes fast to 7 buoys just off the terminal. The 8th buoy, which is ideally placed to make fast the breast line on the starboard bow, has sunk with no clue as to clearance over it. Two mooring boats assist in making fast to the buoys.

The Pilot gives all orders to the boats. These boats also serve as pilot boats, routine launches, etc.

Density: 1025 – 1026.

Fresh Water: Fresh water is only available at the general cargo berths. However, only limited quantity of fresh water is available.

Fuel: No fuel available.

Consuls: None.

Repairs/Dry Docks: No facilities exist.

Surveyors: Terminal engineer acts as surveyor.

Watchmen: Two watchmen compulsory (both men slept from the time they boarded until the next evening when vessel was ready to sail, only waking up for their meals).

Customs Allowances: 200 cigarettes and 1 litre of alcohol.

Repatriation: Possible, but suggested only in cases of extreme emergency.

Airport: One airport with very limited services.

Agent: M/S Modaria served the vessel and found to be very co-operative.

General: All other information as described by other Shipmasters. Services such as telephone, banking, Seamen's Club, Waste Disposal, etc., are not available.

AUTHORITY: Somali Ports Authority, Berbera.

CHISIMAIO (Kismayu): 00.22 S. 42.34 E.

DOCUMENTS:

6 Lists of Crew.
2 Stores Lists.
2 Lists of articles owned by Crew, i.e., tobacco, wine/spirits, camera, wrist-watch, radios, binoculars, firearms/swords, etc.
1 Cargo Manifest (must be made out in accordance with original Bill of Lading issued. In the column "Consignees" the name of the party to be notified must be mentioned complete with full postal address. Should specify weight in kilos and measurement in cu.m.). 6 copies to be sent in advance unfreighted; 2 copies to be sent in advance (freighted). 2 copies to be sent by ship's box.
1 copy non-negotiable B/L for each B/L issued.
2 Transit Cargo (total number of packages and total weight for each destination).
6 Lists of Passengers to be Disembarked.
2 Lists of Passengers in Transit.
1 Health Document will be prepared on the arrival of the vessel in port, on special local form.

PILOTAGE: Compulsory for vessels over 200 n.r.t. Vessel picks up Pilot at approximate position Lat. 0° 24' S., Long. 42° 34' E., 2 miles S.E. of Fairway Buoy.

ANCHORAGES: In the port basin, from 27 ft. to 30 ft. deep, excellent holding ground.

RESTRICTIONS: Entrance channel about 200 m. wide, marked by buoys. Entrance effected during daylight hours only. Port closed for vessels from 1800 hrs. to 0600 hrs.

MAX. SIZE: Max. draft 28 ft. at LLT.

HEALTH: Pratique granted after Port Authorities, including doctor, board vessel. Any suspected contagious illness aboard to be reported immediately to the doctor on arrival. Vessels calling from other Somali ports subject to same procedure.
RADIO: No local coastal radio operating at present. Cables to Agent could be sent through normal postal R/T and W/T services.
TUGS: Two tugs of 800 h.p. each are available to assist ships in berthing and unberthing. Ship's lines used.
BERTHING: Port consists of 2 L-shaped quays, one 340 m. length, the other 280 m. No specific requirement to berth in the port. Vessels entering port basin after 1745 hrs. will berth next day at 0630 hrs. Vessel must sail before 1730 hrs. otherwise sailing will be postponed to next day at 0630 hrs.
STEVEDORES: Vessel must give accurate ETA at least 24 hours in advance to enable Agent order necessary gangs.

No shore facilities, all cargo to be loaded and unloaded with ship's gear.
Working Hours: Normally 0700 hrs. – 1400 hrs. but loading to and discharging from vessels is performed day and night.
MEDICAL: Hospital facilities available, but specialised treatment and surgery is not. Yellow fever and cholera vaccination certificates inspected on arrival.
TANKERS: See "Shipmaster's Report".
FRESH WATER: Available at wharf through hoses, rate 15/16 t.p.h.
FUEL: Not available.
CONSULS: Italian Consul only.
REPAIRS: No facilities available.
GANGWAY/DECK WATCHMEN: Gangway watchmen service carried out by the Customs Police. Food on vessel's account; ships are also supplied with local watchmen through Agent.
OPENING/CLOSING HATCHES: Normally carried out by stevedores with the help of the crew. Vessel's crew may, if required by the vessel, do so. Crew may close the hatches prior to sailing.
CUSTOMS ALLOWANCES: 200 cigarettes, 2 packets of cigars and 5 bottles of wine. Cigarettes and spirits trafficking alongside and between vessels and shore strictly prohibited.
REPATRIATION: Air communication via Mogadiscio.
AIRPORT: About 6 km. N.W. of the port.
TIME: GMT plus 3 hours all year round.
HOLIDAYS: See "Mogadiscio".
TELEPHONES: No possibility for placing telephones on board.
IDENTIFICATION CARDS: Crew to carry Passport or Seaman's Book whilst ashore.
SHORE LEAVE: Permitted.
REGULATIONS: Banana and livestock vessels are given priority.
GENERAL: Vessels should not dispose any waste into harbour or on to quays, lower lifeboats or use radio station without prior permission.
DEVELOPMENTS: Facilities to be improved to enable port to handle liquids, livestock and general cargo.

SHIPMASTER'S REPORT: September 1985.
Vessel: 19,000 d.w.t. Discharged gas oil.
General Remarks: ETA messages and Notice of Readiness to be sent via Djibouti Radio, using telex to Agents at Mogadiscio. (Mogadiscio Radio not working). Port of Kismayu not fitted with VHF. The port was constructed in 1967 with approach channels dredged to 8.0 m. chart datum. (Learned from Pilot that no dredging was performed in the channels after 1967).
Approaches: Safe approach is only possible by using Passo Nord, using the leading line N.E. Serpenti-Collina Rotonda Beacon (see Chart 1052 Baia di Chisimaio), which are clearly visible by daylight. All navigational lights are extinguished by night. Sailing from Kismayu also through Passo Nord. Passo Levante is very dangerous and strongly afffected by cross currents.
Anchorage: Safe anchorage can be obtained 1 mile S.E. of Serpenti Lighthouse in 9 – 10 fathoms of water with good holding ground. The anchorage however is exposed to swell causing the vessel to roll during the anchoring period. During the S.W. monsoon this anchorage can be unsafe.
Pilotage: The Pilot boards in a position 0.7 miles S.E. from Serpenti Lighthouse.
Harbour and Approaches: The harbour of Kismayu is artificial, constructed by rocks seawards and concrete jetties inwards, enabling to receive vessels up to 210 m. long with a maximum draft of 28 ft. Berthing daylight only. From the pilot area to the port entrance the route is via Passo Interno steering to a buoyed channel using the leading line Scoglio Pilone-Collina del Segnole (Chart No. 1052). The outer channel is effected by swell, however after passing I. Favatu the swell will cease when entering the inner channel.

As the approaches are effected by swell and the charts are not very accurate, it is not advised to enter or leave the port at LW even with drafts less than 24 ft.

We arrived with a max. draft of 24 ft. 01 in. and entered the channel approximately 2 hours after LW with a moderate swell from S.E. running into the bay. The echosounder was switched on during the whole operation. On entering the channel the reading fell to zero and a huge amount of mud was observed.

After entering the port the vessel is stopped and swung around by using 1 tug of 350 h.p., approaching the berth head on. Starboard anchor is used to swing the vessel again by using the tug to berth portside alongside with 4 head and stern lines and 2 springs fore and aft.
Documents: Papers required on arrival:
6 Crew Lists.
3 Stores Lists.
3 Personal Effects Lists.
International Declaration of Health.
Vaccination List.
Copy of Bills of Lading.
Discharge Facilities: One long flexible hose of 8 in. connected to 8 i pipeline. Distance to shore tanks approximately 3,200 m. Max. allowe back pressure 4 kg. – 6 kg. depending on Loading Master.
Port Facilities: Drinking water can be obtained from the jetty, but is n recommended, as this water is pure river water. Other facilities nil.
Remarks: The tug is fitted with VHF and the Pilot will use this VHF t contact ships only if the tug is manned. Vessels are warned immediatel after berthing that permission to sail is not given until all bills and dutie have been paid by the Agents, indicating that some vessels have bee delayed for 4 days.

AUTHORITY: Somali Ports Authority, Chisimaio.

MOGADISCIO: 02.02 N. 45.20 E. (See Plan

DOCUMENTS:
2 Lists of Crew.
2 Stores Lists.
2 Lists or Declarations of Crew's Baggage, i.e. tobacco, wine/spirits camera, wrist-watch, radio, binoculars, firearms/swords, etc

Vessels calling from other Somali ports subject same procedure.

Cargo Manifest (must be made out in accordance with original B/L issued. In the column "Consignees" the name of the party to be notifie must be mentioned complete with full postal address. Should specif weight in kilos and measurement in cubic metres). 6 copies to be sen in advance unfreighted; 2 copies to be sent in advance freighted an 2 copies to be sent by ship's box.
2 Lists Transit Cargo (total number of packages and total weight fo each destination).
6 Lists of Passengers to be Disembarked.
2 Lists of Passengers in Transit.
1 Health Document will be prepared on the arrival of the vessel i port, on special local form.
PILOTAGE: Compulsory for vessels over 200 n.r.t. Pilot joins vessel a anchorage about 0.5 miles offshore. Pilot can be requested b International Code signals or through VHF using Channels 12, 14 or 16
ANCHORAGES: About 0.5 miles offshore in depths up to 45 ft., in ope roadstead. Because of occasional heavy swell maximum recommende draft 31 ft.
RESTRICTIONS: Berthing/unberthing of vessels is restricted to dayligh hours. Max. draft permissible is 10 m. at general cargo berths and 12 m at tanker berths.
HEALTH: Pratique granted after Port Authorities including doctor, boar vessel. Any suspected contagious illness aboard to be reporte immediately to the doctor on arrival. Vessels calling from other Somal ports, subject to same procedure.
RADIO: No local coastal radio operating at present. Cables to Agen could be sent through normal postal R/T and W/T services.
TUGS: Tugs join vessels at anchorage or as directed by the attendin Pilot. Vessel's lines normally used. No extra charge for tug's lines.

Two tugs of 1,400 h.p. each available and 1 tug of 4,000 h.p. availab for salvage and rescue operations.
BERTHING: Incoming vessels are assigned berths on a turn bas subject to operational requirements.
Harbour: Alongside deepwater port protected by 820 m. stron breakwater.
Berths: 5 berths. Berth lengths vary from 170 m. – 200 m. with depth alongside 8 m. – 12 m.
BULK CARGO FACILITIES: None.
STEVEDORES: Vessel to give accurate ETA at least 24 hours i advance to enable Agent order necessary gangs. No shore facilities, a cargo to be loaded and unloaded with ship's gear.
Working Hours: Normally 0700 hrs. – 1400 hrs., but loading to an discharging from vessels is performed day and night.
CRANES: Only ships' derricks are used. No portal cranes at quay b a number of mobile cranes are available for handling and stacking carg with maximum lifting capacity of 50 tons. No floating cranes availabl
MEDICAL: No advance notice for medical attention required. Hospit facilities available but specialised treatment and surgery is not. Yello fever and cholera certificates inspected on arrival.
TANKERS: One berth available for crude oil tankers with a draft of 32 *Ras Sif:* See "Shipmaster's Report" dated June 1981 and "Report" dat June 1995.
DENSITY: Salt water at all times.
FRESH WATER: Available alongside through hoses at a rate 15 – 20 t.p.h.
FUEL: Fuel oil only may be available, check with Agent.
FIRE PRECAUTIONS: Fire engines situated within easy reach of doc 24 hours per day. The tugboats are also equipped with fire fighti appliances.
CONSULS: Algeria, Belgium, Peoples' Republic of China, Egyp France, Germany, India, Iran, Iraq, Italy, Kenya, People's Democra Republic of Korea, Kuwait, Libya, Netherlands, Nigeria, Pakistan, Qat Romania, Russia, Saudi Arabia, Sudan, Syria, U.A.E., U.K., U.S. Yemen, Yugoslavia.
REPAIRS: No facilities available.
DRY DOCK: None available.
GANGWAY/DECK WATCHMEN: Gangway watchmen services carr out by the Customs Police, food on vessel's account. Ships are al supplied with local watchmen through Agent.
OPENING/CLOSING HATCHES: Normally carried out by stevedo with the help of the crew. Vessel's crew may, if required by the vess do so. Crew may close the hatches prior to sailing.

CUSTOMS ALLOWANCES: 200 cigarettes, 2 packets of cigars and 5 bottles of wine. Cigarettes and spirits trafficking alongside and between vessels and shore strictly prohibited.
REPATRIATION: Facilities available.
AIRPORT: About 5 km. to the West.
TIME: GMT plus 3 hours all year round.
HOLIDAYS: Idul Fitr, (1st & 2nd Shawaal); Idul Adha, (9th & 10th Dilhija); Prophet Mohammed Birthday, (12th Rabiul Awal); International Labour Day, (1st May); Independence Day N. Region, (26th June); ndependence & Union Day, (1st July); Revolution Festivals, (21st and 22nd October).
POLICE/AMBULANCE/FIRE: Police 28088; Ambulance 30000; Fire 35055.
TELEPHONES: Arrangement for placing telephones on board is not available.
DENTIFICATION CARDS: Crew to carry Passport or Seaman's Book whilst ashore.
SHORE LEAVE: Permitted.
DELAYS: Nil, except when other ships are working alongside.
GENERAL: Vessels should not dispose of any waste into harbour or on o quays, lower lifeboats, or use radio station without prior permission.
Tidal Range: 2.5 m.
Shipchandling: Available.
Major Exports: Fresh bananas, livestock, hides and skins and rankincense.
mports: General cargo, crude oil, etc.
DEVELOPMENTS: New wharf with Ro/Ro terminal recently completed. Container yard and freight station to be constructed.

SHIPMASTER'S REPORT: March 1981.
Documents:
1 Declaration of Health (Local Form).
1 Set Vaccination Lists.
5 Crew Lists.
6 Landing Passenger Lists.
In-Transit Passenger Lists.
Ship's Record and Master's Report (Form A).
Arrival Report (NSL Form).
Application for Temporary Use of New Harbour (Local Form).
1 Set Cargo Manifests.
2 Sets Discharging Cargo Plans.
Stores List (Company Form).
Crew Declarations.
Notes: Application for use of Harbour Form contains highly objectional iability clause 4(c).
No mail or telex service, no Agency assistance.
Health: Radio Pratique not available.

SHIPMASTER'S REPORT: June 1981.
Documents:
2 Crew Lists.
2 Stores Lists.
2 Personal Effects Lists.
Cargo Manifest.
Copy Non-Negotiable Bill of Lading for each consignee.
2 Transit Cargo Lists.
2 Passenger Lists. "Nil" declaration required.
1 Health Document filled in on berthing on special local form.
2 Copies Declaration of Ship's Details and Cargo Carried for Port Harbour Master on special local form.
4 Copies Pilotage Declaration on special local form.
Pilotage: Pilots listen 0600 hrs. to 1200 hrs. on VHF Channels 16 and 12. At other times the Pilot Station is usually manned. Pilot boards from a large pilot cutter at the vessel's anchorage position. Pilot cutter has black hull, white upperworks with "Pilot" in black letters. Manropes are essential for use on the pilot ladder due to the normal heavy swell running.
Anchorage: Good anchorage in sandy bottom in 10 – 11 fathoms (approx.), 4 cables South of New Port Breakwater. Monsoon causes currents of up to 4 – 5 knots during S.W. monsoon. (Ref: Admiralty Publication, Africa Pilot Volume III, and latest supplement.
The whole bottom area is foul due to cargo lost during time port was operated as a surf port. An anchor and cable is reported to lie close to the intersection of the 311° and 278.42° leading lines.
Somali Harbour Regulations forbid anchoring in such a position as to obscure leading and other lights.
Health: Local doctors available.
Radio: Normal 72, 48 and 24 hour notice to Agents via Aden or Mombasa Radio. Mogadiscio Radio not heard during vessel's stay in Mogadiscio.
Fresh Water: Available from Berth Nos. 1, 2, 3, 4 and 5 at approximately 20 t.p.h.
Stevedores: Rigging of derricks and opening/closing hatches are the responsibility of ship's crew.
Gangway/Deck Watchmen: Two watchmen per vessel. Ship has to provide accommodation and food.
Customs Allowances: 200 cigarettes, or 0.5 lb. tobacco or 0.5 lb. cigars. Spirits 1 bottle. Bond sealed on arrival but Customs very good and will come down to give issue whenever required.
Airport: Regular international flights from airport situated 8 km. from port. No problems with repatriation. Crew members joining are issued with entry visas at Mogadiscio Airport providing Agents are informed in sufficient time. Mogadiscio is the only international airport of entry. There are local flights approximately 3 times a week to Kisimayu and Berbera.
Time: GMT plus 3 hours all year round.
Berths: Ras Sif Oil Terminal, Lat. 2° 01.05' N., Long. 45° 20.05' E.
This is a sea berth 1 cable S.W. of Ras Sif. (See "Plan"). During the S.W. monsoon, vessel secures with both anchors down on a heading approximately 210° (true) about 1 cable offshore. On this vessel's call 10 shackles were put out on each cable position "A" shown on plan. On vessel's approach to the berth no tugs were available for assisting in berthing as fuel for tugs had run out and our vessel had the new supplies on board. Three attempts were made to secure at the Discharge Berth. Final position was that shown in position "A". In this position vessel was heading 185° (true), 10 shackles out on each cable, 3 ship's lines to shore and 2 shore lines to ship. The vessel at this time rode to the wind at 180° – 185° and did not take up a heading into the S.W. monsoon at any time. The effects of the Somali current during vessel's stay was negligible at the berth. The normal berth off Ras Sif is that shown in position "B". I consider this position dangerous at this time of the year as the wind being mainly Southwesterly swings the vessel's stern up towards the shore, far closer than in position "A".
Lines: 2×4 in. floating hoses provided for connection to stern discharge manifold from red painted structure close South of the B & W truncated pyramid on Ras Sif. Maximum discharge pressure 3 kg./sq.cm. (approx. 150 t.p.h.). Height of tanks 24 m., distance to tanks 350 m. 1×6 in. line is available for midships manifold but this is only suitable for small ships. Shore requires water plug prior to commencement of discharge, on completion of each grade and on completion of final grade. Shore staff connect pipelines.
Maximum draft on berth 40 ft.
On the evening of 12th June the S.W. monsoon blew very strongly accompanied by a very heavy 15 ft. – 20 ft. swell. Vessel being light was moving a great deal and was eventually forced to carry out an emergency departure after jettisoning pipelines following a water plug through and cutting all ship's lines. This berth is wide open to the effect of the S.W. monsoon and when the monsoon is blowing strongly the weather conditions combined with the very poor unmooring facilities render the berth untenable. For these reasons this berth was declared by the Master to not be a "Safe Berth" within the meaning of the relevant Charter Party.
Mogadiscio New Port: Following Ras Sif being declared an unsafe berth arrangements were made for all floating hoses in possession of the Oil Terminal to be led via storm drains to Berth No. 5 following suggestions made by the ship. Vessels berthed stern up to Berth No. 4 or Berth No. 5 and cargo discharged via stern manifold to Ras Sif Oil Terminal.
Berth No. 5: Maximum draft 27 ft. Berth is well fendered with old tyres. Due to length of berth vessel berthed with starboard anchor down, 6 shackles on same, as maximum vessel length on berth 180 m. This berth is at present being extended by a further 200 m. Maximum discharge pressure 3 kg./sq.cm., maximum discharge rate 150 t.p.h. for products.
Berths No. 1, 2, 3: Maximum draft 32 ft. All cargo discharged by ship's gear. On Berth No. 3 there is one 8 in. pipeline to the refinery 10 miles South of Mogadiscio for crude oil only. Booster pumps for this line are provided at the Ras Sif Oil Terminal.
Berth No. 4: Drafts alongside from 27 ft. – 32 ft. and is provided with a bridge for landing of livestock although to date this bridge has not been used. This berth is normally used by fishing vessels and smaller ships as a lay-by berth.
Tugs: Two tugs available. "Xamar 1" and "Xamar 2". Both fitted with VHF, 1,500 b.h.p. No tug lines. Ship's lines used for all operations.
Bunkers: Not available.
Repairs: Not available.
Somali Port Regulations: Notice to all ships, Mogadiscio Port. Abstracts from Somali Ports Authority Regulation No. 67 of 15-4-1978.

1. All ships must keep their VHF open and standby when approaching the Port and while remaining berthed alongside, on Channel 16.
2. All ships having on board persons suffering from contagious diseases must hoist the quarantine flag when anchoring and keep it hoisted until inspected and instructions given by the Port Health Officer.
3. While anchored in the roads, ships must keep clear from bearing directly obstructing leading lights and beacons on shore.
4. Ships having an n.r.t. exceeding 200 must engage harbour Pilots and tugs while berthing or unberthing at the deep water berths.
5. Ships are not allowed to throw any kind of refuse, dirt or oil spillage into the harbour waters.
6. Ships are not allowed to carry out engine repairs without permission from the Port Manager, while at berth.
7. Ships anchored in the roads or berthed alongside must keep the Somali national flag hoisted at a height clearly visible for a reasonable distance.
8. All ships lying alongside berths must engage the garbage service provided by the authorised garbage group of the harbour.
9. Oil tankers must have on board their own facilities for the retention of oil drainage and sludge, dirty ballast and tank washings.
10. It is prohibited to discharge oil, oily mixtures and any chemical residues at any distance less than 50 nautical miles from the shore line.
11. Officers of the Port Management are authorised to inspect the efficiency of facilities provided on board vessels for the retention of dirty substances, solid or liquid.
12. All ships at anchor or berthed alongside must take sufficient precautionary measures to fight fire outbreaks.
13. All ships berthed alongside must provide ratguards for their mooring lines.
14. Rigging of ship derricks and opening and closing of hatches are the responsibility of the ship's Master and crew.
15. Crew members of all vessels berthed alongside or anchored in the roads are not allowed to go ashore later than 2300 hrs.
16. Crew members going ashore and wishing to return to their ships are not allowed to enter the Port later than 2300 hrs.

Signed – Port Manager

REPORT: June 1995.
The following Report was prepared by a Master who was a Pilot at the port from 1978 until 1985. During this period, he trained others as Pilots and advises that only very experienced Pilots should handle vessels during the Monsoon season.
Mooring at Ras Sif: Ships must keep the stern out from shore by at least 30 m. (in a depth of over 10.0 m.). The zone is clear from obstructions and rocks.

Ships must have a good angle between the anchors and 6-7 shackles out during the good season (April and September), and 9-10 shackles out during other periods, especially June-July-August (S.W. Monsoon) and December-January-February (N.E. Monsoon).

The manifold (6 in.) is old and very short: 80 m. – 100 m. Port tugs are of very little help as it is difficult for them to manoeuvre due to the continuous swell.

Ships can stay with reasonably safety for the loading/discharging operations with 6-7-8 shackles on both anchors as shown in Position "A" in the "Guide" and Position "A" in this Report's plan.

Unfortunately this situation only persists for a short period between the two Monsoons (April/May and September-November).

June-August is the period of S.W. Monsoon with a wind blowing from S.W. at Force 7/8 with Sea State 6/7.

January and February is the period of N.E. Monsoon with winds blowing from the East at Force 6/7 with Sea State 5/6.

During the two Monsoon periods, the ship cannot moor in the normal position as wind and waves/swell would be beam on and would cause breakage of the stern ropes and manifold.

Accordingly, from my experience of 7 years, I think that for an eventual reopening and for a call during June-August, the berth should be declared unsafe and dangerous. During the period of S.W. Monsoon, ships must keep to position "B" of this Report (heading 200°/210°), thereby receiving the wind/sea on vessel's starboard bow. Engine to be on stand-by at all times and contiuous watches to be maintained ready to let go manifold and ropes quickly if there is a sudden change in wind. The vessel should then move to the anchorage 5-6 cables off the breakwater. It is too dangerous to anchor one mile off as it is deep and the anchor will drag.

December-March is the period of N.E. Monsoon (really from East), but not as strong as S.W. Monsoon as winds only reach Force 6/7.

The position is safe if well and properly anchored (always 2 anchors, with the port anchor dropped about 80 m. – 100 m. off the breakwater and starboard anchor in open sea with 9/10 shackles of chain) heading 110°/120° and receiving the wind/sea about 20° on the port bow. This position "C" is not shown in the "Guide".

My recommendations would be that the pipeline should be extended and experienced European Pilots should be available. Also the pipeline should end with a well anchored manifold buoy for vessel to moor to.

AUTHORITY: Somali Ports Authority, P.O.Box 935, Mogadiscio, Somalia. *Tel:* 30081/3. *Telex:* 708. *Cables:* Somport, Mogadiscio.

NOTES

Please also advise Shipping Guides Ltd.

South Africa

GENERAL:

NOTICES: Following is an extract of British Notices to Mariners No. 1647(1979).

Routeing of Laden tankers off the coasts of South Africa (West):

Laden tankers in the Summer months should pass not less than 10 miles South of Alphard Banks (Lat. 35° 02' S., Long. 20° 50' E.)(See *Africa Pilot Vol. III)* and then keep 25 miles off the following points:

Cape Agulhas	(Lat. 34° 50' S., Long. 20° 01' E.).
Quoin Point	(Lat. 34° 47' S., Long. 19° 39' E.).
Cape Point	(Lat. 34° 21' S., Long. 18° 30' E.).
Slangkop Point	(Lat. 34° 09' S., Long. 18° 19' E.).
Cape Columbine	(Lat. 34° 50' S., Long. 17° 51' E.).

During the Winter, laden tankers should maintain the recommended distance offshore until the Winter Load Line Zone is reached and then keep as close to that line as possible. This will entail passing North of Alphard Banks and then about 12 miles off Quoin Point and Cape Point.

Vessels proceeding to the Replenishment Area (Lat. 33° 55' S., Long. 18° 15' E.). off Cape Town should maintain the above distances off shore until in a position where course can be safely altered to approach the Replenishment Area crossing the main traffic flow as nearly at right angles as possible.

Routeing of Laden tankers off the coasts of South Africa (East):

Laden tankers in the Summer months should pass 25 miles off the following points:

South Sand Bluff	(Lat. 31° 20' S., Long. 29° 58' E.).
Bashee River	(Lat. 32° 14' S., Long. 28° 55' E.).
Hood Point	(Lat. 33° 02' S., Long. 27° 54' E.).
Cape Recife	(Lat. 34° 02' S., Long. 25° 42' E.).

and then steer to pass 10 miles South of Alphard Banks (Lat. 35° 02' S., Long. 20° 50' E.).

During the Winter, laden tankers should maintain the recommended distances off shore until the Winter Load Line Zone is reached and then keep as close to that line as is possible. Between Cape Recife and Cape Agulhas this will entail passing North of Alphard Banks. It is recommended to pass about 6 miles North of these banks.

HOLIDAYS: *Public Holidays:*

January 1st	New Year's Day.
March 21st	Human Rights Day.
April 5th	Good Friday.
April 8th	Family Day.
April 27th	Freedom Day.
May 1st	Worker's Day.
June 16th	Youth Day.
August 9th	Women's Day.
September 24th	Heritage Day.
December 16th	Day of Reconciliation.
December 25th	Christmas Day.
December 26th	Day of Goodwill.

CAPE TOWN (Table Bay): 33.56 S. 18.26 E. (See Plan)

PORT LIMITS: Westwards by a straight line between Green Point and Robben Island Lighthouses, and Northwards by a straight line from Robben Island Lighthouse East (true) to the Eastern shore of Table Bay, thence Southwards along high water mark, so as to include the foreshore to the Castle, thence back to Green Point Lighthouse.

DOCUMENTS:

Customs:

*Form DA.1, Report Inwards/Outwards for Ships.
*Form DA.3, Certificate of Clearance for Ships.
*Form DA.4, Transire – for a destination in the R.S.A.
*Form DA.5, List of Sealable Goods on board ship.
Ship's Crew List (Customs Department) 6 copies.

Post Office:

*P1/27, Certificate of Departure of Vessel.
P1/8, Post Office Certificate (Declaration).

Port Health:

Maritime Declaration of Health.
Crew List with last vaccination dates.
Derat Certificate.

Port Authority:

T908, Light Dues Certificate.
T942 Clearance Certificate
*T962, Departure/Shifting Notification.
Ship's Manifest.
*Completed by Agent.

Shipmaster's Report: March 1981.

Declaration of Health (Form GES-22)
Set Vaccination Lists. 1st port only; even with Radio Pratique.
Derat/Derat Exemption (if boarded).
2 Crew Lists.
2 In-transit Passenger Lists.
4 Landing Passenger Lists (Form D1-35).
Crew Sealable Goods (Form DA-5).
Crew Declarations (Company Form).
Inventory of Slop Chest (Company Form).
Register and Set of Ship's Certificates (used by Agent for clearing and returned).
Arrival/Departure Record (Form B1-55) (Disembarking passengers only).
Livestock Form (if nil, write on top of DA-5).
Ship's Mail Declaration (Form P1/149) (if nil, write on top of DA-5; if mail aboard, cable Postmaster details free message, and forms will be presented by Agent at boarding).
Certificate of Medical Officer, Master . . . (Form D1-67).
Report of Arrival (Form T958) (to Pilot).
Leaving Certificate (Form B1-86).

Notes: Fly "I" flag entering all ports; "B" if flammable cargo aboard. Include ship's entertainment TVs, radios, etc., cameras and walkie-talkies on DA-5. Although part of DA-5, addition of tobacco/spirits on Crew Declarations (Company Form) will allow same form to be used in Mozambique and Somalia.

PILOTAGE: Compulsory. One hour advance notice to be given to the Port Captain through VHF radio, call sign "Port Operations", on Channel 16, working Channel 12. Pilot boat fitted with multi-channel VHF. Two motor pilot boats, one with black hull and white upperworks and one with an orange hull and white upperworks. Pilot taken aboard at position: Main Breakwater bearing 155° (T) × 2.5 miles.

ANCHORAGE: Area to the N.E. and East of pilot boarding station (Fairway Buoy) in depth 20 m. – 25 m.

RESTRICTIONS: Vessels not permitted to enter unless Agents have been appointed. Oil tankers and ships carrying explosives or dangerous goods restricted to daylight hours.

Depths:

Depth at Entrance Channel – 15.9 m.
Entrance to Victoria Basin – 11.6 m.
Entrance to Duncan Dock – 13.4 m.
Entrance to Ben Schoeman Dock – 14.0 m.

MAX. SIZE: Max. LOA 370 m., max. beam 87.0 m. and max. draft 12.0 m. (Duncan Dock) and 12.8 m. (Ben Schoeman Dock).

HEALTH: Pratique granted at first port of entry in South Africa. Pratique message 24 hours prior to arrival to "Port Health" at port of entry. If Radio Pratique not granted "Q" flag to be flown until ship has been cleared. Valid certificates must be held for yellow fever. Ships from Eastern ports must also have valid certificates for cholera and typhoid.

RADIO: Cape Town Radio, call sign ZSC. VHF and R/T 2182 kHz.

VHF: Port Control on Channel 16 throughout 24 hours.

TUGS: Join vessel approximately 0.25 miles from harbour entrance.

4 diesel Voith Schneider tugs with a bollard pull of 43 tons. All tugs are fitted for firefighting and salvage. Tug's wires used at no extra charge.

Stand-by tugs compulsory for tankers discharging crude.

STEVEDORES: *Working Hours:* Conventional Quays: Monday to Friday (not public holidays) 0600 hrs. to 2200 hrs. Limited labour is available for working overtime on request beforehand.

Container Operations: 24 hour service, 7 days a week.

BERTHING: Chart datum is that referred to in the South African Tide Tables published by The Hydrographer of South African Navy.

Roll-on/Roll-off Facilities: Available at Berths 500 and 501, as well as at "L" and "M" Berths. Berths "A" and "J" for ships with slew ramps only.
Cold Store: Blue Continent Cold Storage Co. (Pty) Ltd. Tel: (021) 511-0620. Telex: 527232. Fax: (021) 511-9632. Operates cold store with capacity of 17,000 tonnes at −30°C.
Pre-Cooling Store: International Harbour Services. Tel: (021) 212461. Telex: 527718/526771. Fax: 212469. Operates 8 pre-cooling chambers with capacity of 10,000 cu.m. (approx.) at D-Shed.
Container Terminal: Area – 97 hectares; Ground slots – 4,858 TEU's; Reefer points – 190 plug points; Refrigerated holding store – 500 slots. Equipment: Container gantry cranes, straddle carriers, haulers and trailers.

CRANES: *Floating Cranes:* One floating crane lifts 200 tons at 21.5 m.

BULK HANDLING FACILITIES: *Grain Elevator:* 1 terminal grain elevator of 27,220 tons storage capacity, with loading conveyors to the Collier Jetty. Continuous intake capacity of elevator, 750 t.p.h.; shipping capacity, 1,000 t.p.h. (Leased for private use: Loading conveyors only now usable, subject to considerable mechanical overhaul).

Other bulk cargoes handled at general cargo berth with shore crane. No LPG facilities.

MEDICAL: Unrestricted hospital facilities. Medical assistance must be arranged through Agents.

TANKERS: Tanker Basin to accommodate two tankers simultaneously, one of max. overall length of 256.0 m. and one of 240.0 m. overall length. Max. permissible draft 13.1 m., subject to a minimum of 0.9 m. on tide gauge.

Slop tank: Capacity 1,500 tons, available for oily ballast from tankers back loading white oil.
Ballast Requirements: Vessels should be sufficiently ballasted to navigate safely within the harbour.

Vessels with certain categories of hazardous cargo on board may not enter or sail during hours of darkness.

Recommended draft for tankers over 240 m.: 8.00 m. forward and 10.0 m. aft.

DENSITY: 1025.

FRESH WATER: Delivery by hose ex-wharf hydrants. 50 t.p.h.

FUEL: 48 hours' notice required. MFO, IFO and Gas Oil available.
Shipmaster's Report: November 1987.

All grades of fuel are not available at all times.

DRY DOCKS:
Sturrock Graving Dock: Situated at S.E. end of Duncan Dock:

Dimensions:	Overall docking length	360.0 m.
	Length on keel blocks (first to last keel block)	338.3 m.
	Length on bottom (dock floor)	350.4 m.
	Width at coping	47.5 m.
	Width at entrance top	45.1 m.
	Maximum width at bottom	38.4 m.
	Depth on entrance sill, HWOST	13.7 m.
	Depth on inner sill, HWOST	15.1 m.

A docking length of 369.6 m. can be obtained by placing the caisson in the emergency stop at the entrance.

The dock can be divided into 2 compartments of either 132.5 m. and 216.1 m. or 205.7 m., and 142.9 m. respectively.

1×50 ton and 1×10 ton electric cranes on 7.6 m. gauge track and 6×4 ton electric cranes on 4.9 m. gauge track are available.

The dock can be emptied in 4 hours.

A landing wharf 548.6 m. in length is provided on the port side of the graving dock to facilitate the dry-docking of ships.

A repair pier 457.5 m. in length is provided off "M" Berth. 2×15 ton electric cranes on 9.1 m. gauge track is available.

Robinson Graving Dock: Situated in Alfred Basin:

Dimensions:	Overall docking length	161.2 m.
	Length on keel blocks (first to last keel block)	142.6 m.
	Length on bottom	152.4 m.
	Width at coping	27.4 m.
	Width at entrance top	20.7 m.
	Maximum width at bottom	17.2 m.
	Depth on entrance sill, HWOST	7.9 m.

3×4 ton electric cranes on 4.1 m. gauge track and 1×15 ton electric crane, on 4.1 m. gauge track are available.

The dock can be emptied in 3 hours.
Syncrolift: Situated in Alfred Basin:

Dimensions:	Lifting capacity	1,750 tons
	Maximum length of vessel	61 m.
	Maximum width of vessel	15 m.

REPAIRS: All types of repairs can be undertaken.
SURVEYORS: Lloyd's, BV, N.V., N.K.K. and ABS.
GANGWAY/DECK WATCHMEN: Ship's Agent makes necessar arrangements.
OPENING/CLOSING HATCHES: Mechanical hatches opened/closed by crew. Other types of hatches by stevedores.
CERTIFICATES:

Safety Certificates in respect of construction and gear.
Radio Certificate.
Load Line Certificate.
Derat Certificate.
Certificates of Competent Officers (passenger ships only).

CUSTOMS ALLOWANCES: The Master, officers and other members of the crew who remain on the ship during its stay in port may each be allowed to retain in his possession the following quantities (to cover 4 days) of the undermentioned sealable goods:

	Tobacco in any form grammes	*Potable spirits in any form* litre	*Wine* litres	*Beer or stout* litres
The Master/Pilot..................	230	1	3	3
Officers (including pursers, surgeons, chief stewards, wireless operators and serangs)..........................	175	1	3	3
Other members of the crew.......	115	nil	3	nil

Where the Master, officers or other members of the crew remain or board the ship for more than 4 days, the Controller of Customs and Excise may on request authorise the issue from under seal, fo consumption on board, of the following further quantities per day:

	Tobacco in any form grammes	*Potable spirits in any form* millilitres	*Wine* litres	*Beer or stout* litres
The Master/Pilot......................	30	100	1	1
Officers (including pursers, surgeons, chief stewards, wireless operators and serangs)..........................	25	100	1	1
Other members of the crew.......	15	nil	1	nil

CARGO GEAR: All cargo handling equipment must be in good conditio and certificates available for inspection.
REPATRIATION: All facilities available.

1. *Vessels Docking:*
   - *(a)* Any personnel arriving to join a vessel at Cape Town shoul possess a valid travel document and a brief letter of introductio Entry Permits can be extended if the vessel is late in arriving.
   - *(b)* Application to spend time (longer than 48 hours) in South Afric prior to repatriation should be made to the local Immigratio Authorities.
2. *Vessels Calling Off Port Limits:*
   - *(a)* The same requirements apply as for 1(a) with the exception c personnel who have entered the country from a vessel callin off Port Limits.
   - *(b)* The following applies to all personnel disembarking from vesse calling off Port Limits.
     (i) Repatriation must be made within 48 hours from time c signing off.
     (ii) In order to comply with local Immigration Authorities the Age requires the following details, for each individual, at leas 72 hours before disembarkation:
       - *(a)* Full name and nationality.
       - *(b)* Rank and, if Technician, name of employers.
       - *(c)* Passport number, place and date of issue.
       - *(d)* Place and date of birth.
       - *(e)* Destination and class of travel.
       - *(f)* If air ticket held on board, full details of routing.
       - *(g)* Reasons for disembarkation.

In the case of personnel transferring from one company vesse another, the same conditions apply except the maximum time permi for such transfer is 78 hours. If they have not joined the vessel wi this period, repatriation must be arranged forthwith.

There are no difficulties for any personnel disembarking for medi reasons.

AIRPORT: D.F. Malan Airport – 20 km. from harbour. Daily flights Johannesburg connecting with overseas flights by regular airlines.
TIME: GMT plus 2 hours.
HOLIDAYS: See "General" before first port.
POLICE/AMBULANCE/FIRE: Police, 419-4870; Ambulance, 51-51 Fire, 218-2805.
TELEPHONES: Telephones can be supplied at all berths. Arra through Agents.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Not required.
SEAMAN'S CLUBS: Missions to Seamen, Duncan Road, Port of C Town. Tel: 411-93117/8.

HIP SUPPLY SERVICES:
Helicopter Service: Available for mail and small items of stores for essels not wishing to enter harbour. Court Helicopters: Tel: 934-0560. ax: 934-0568.
aunch Service: For vessels not wishing to enter harbour, Agent may rrange launch service for mail, stores, etc. In this case service only ermissible in area North and West of position at least 5 miles due West f Robben Island.
upplied by:
Court Helicopters (Pty) Ltd., P.O.Box 2546, Cape Town 8000. el: 934-0560. Fax: 934-0568.
Ocean Ferries (Pty) Ltd., P.O.Box 6426, Roggebaai 8012. Tel: 7-7115.
Sealink Ltd., P.O.Box 4962, Cape Town 8000. Tel: 25-4480. Fax: 19-7072.
Also see "Shipmaster's Report".

EVELOPMENTS: *Chemical Tank Farm:* Approximately 50,000 sq.m. f land is to be reclaimed at the Eastern Mole for the purpose of a hemical Tank Farm.

The first phase is to be a joint venture between Portnet and Richards ay Bulk Storage (Pty) Ltd.

Styrene monomer will be stored in 3 tanks with a capacity of ,250 cu.m. each. For the storage of toluene, xylene and benzine, one ank of 1,000 cu.m. and two tanks of 500 cu.m. will be available.

Cold Store: The newly formed Duncan Dock Cold Storage (Pty) Limited s a partnership venture between Portnet and the Cold Storage Division f Oceana and ICS. The project involves the construction of a new 0,000 ton cold storage complex on the quayside at "K" Berth (Cold tore commissioned in 1992). Land is available for future expansion.

The total capacity of 10,000 tons will comprise 2,000 tons at −60°C nd 8,000 tons at −30°C.

The bulk of the capacity will be available for pre-export storage of fish, ruit and vegetables, eggs and other products at various temperature evels. The −60°C facilities will be used for sashimi, a traditional apanese delicacy, fish served raw. Acceptable quality of frozen product an only be maintained at an ultra low temperature of −60°C. The store vill also have an 80 ton blast freezing facility.

There will be docking space for 6 vessels at any one time with rovision to load and unload 3 vessels simultaneously, and 9 docking ays for road transport. The plant will incorporate the latest technology, nd handling and storage systems will be among the most modern in he world.

Duncan Dock Cold Storage will be licensed for handling and storing rozen product destined for EEC countries. With its strategic eographical location, the complex is geared to provide a sophisticated ervice to export customers. Furthermore, the store will have specialised acilities for fish processing and packing, whilst highly trained and skilled ersonnel have proven expertise in handling a wide range of perishable roducts and temperature chain maintenance of cargoes.

SHIPMASTER'S REPORT: *Off limits launch and helicopter service:*
Port, Immigration, Customs and Health Authorities have made it clear hat this service is a privilege and not a right. It is therefore of the utmost mportance that the regulations are strictly adhered to.

The Agent must apply to the Port Captain for permission to service he vessel and the following details must be submitted. Name of vessel, ime and date of arrival, draft, where from, where to, stores required and other reasons for call.

Launch is only allowed to be alongside vessel for 1 hour maximum otherwise vessel will have to enter port limits and incur port dues.

If personnel embarking, Immigration Authorities require name of vessel, tonnage, whether ballast or loaded and names of persons embarking. If persons disembarking then full names, dates and places of birth, nationality, Passport or Discharge Book number and expiry date, whether South African visa held and comprehensive reason for leaving vessel, arrangements made for departure from South Africa (usually 24/48 hours allowed), and flight number. This does not apply to medical cases. Guarantee from Agent accepting full responsibility and liability regarding maintenance and repatriation expenses. Persons disembarking must report immediately to Passport Control. Failure to report or leave South Africa on the booked flight is an offence and in addition to any fine or imprisonment the Owners will be refused any further off limits service for *any of their vessels.*

Port Health require application for Radio Pratique 48/24 hours before arrival. Customs require all bonded stores loaded to be signed for and ship's stamp applied. Stores or spares being landed must have prior notification to Agent and an accompanying letter giving full description and disposal instructions.

Agents require 168, 96, 48, 24, and 12 hours' notices followed by any amendment to ETA. Stores requirements should be sent at least 96 hours before arrival. Three copies of Crew List to be sent ashore with launch (or helicopter).

Services operate 24 hours per day and usual rendezvous position is 5 miles West of Green Point Lighthouse for launch (and 12 miles West for helicopter). Launch can carry up to 30 tons stores (and helicopter up to 2,000 kg.). Vessels should not anchor but provide a good lee and have derrick rigged. Contact should be made with the launch (or helicopter) 1 to 2 hours before arrival rendezvous point using Channel 16.

AUTHORITY: Portnet, P.O.Box 32696, Braamfontein 2017, Johannesburg, South Africa. *Tel:* (011) 7737299. *FAX:* (011) 7738304. *Contact:* The Chief Executive.

Cape Town: P.O.Box 4245, Cape Town 8000. *Telex:* 550178 Porcap. *Contact:* Port Manager Tel: (021) 218-3790. Fax: (021) 25-2656. Commercial Manager Tel: (021) 218-2405, or Port Captain Tel: (021) 218-3413.

AGENT: King & Sons (Pty.) Ltd., P.O.Box 220 (5th Floor, Foretrust Building, Martin Hammerschlag Way), Cape Town 8000. Tel: (021) 211830. Telex: 527417. Fax: (021) 4182415. Cables: Baronet Cape Town.

DURBAN (Port Natal): 29.53 S. 31.02 E. **(See Plan)**

PORT LIMITS: The area of sea bounded by:
(1) to the North, a line drawn from the coast in position: Lat. 29° 48' 42" S., Long. 31° 02' 32" E. in a 090° (True) direction to position Lat. 29° 48' 42" S., Long. 31° 07' 30" E.;
(2) to the South, a line drawn from the coast in position: Lat. 29° 54' 06" S., Long. 31° 02' 30" E. in a 090° (True) direction to position Lat. 29° 54' 06" S., Long. 31° 07° 30" E.;
(3) to the East, a line joining the seaward positions in (1) and (2).

DOCUMENTS: The following documents should be prepared and ready on berthing:
Immigration:
2 Crew Lists.
Customs:
2 Crew Lists.
List of Narcotics on board.
1 Ship's Stores List.
1 Crew Declaration of Crew's Personal Effects.
1 Customs Form D.A.5.
Port Health:
1 Maritime Declaration of Health.
1 Vaccination List.
1 Crew List.
Valid Derat Certificate.
Agent:
2 Crew Lists.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Note: The above documents are required at each South African port, regardless of vessels which are coasting.

PILOTAGE: Compulsory. As much advance notice as possible to be given to Port Captain through VHF radio – Port Operation – calling Channel 16, working Channel 12. Pilot boats fitted with multi-channel VHF.

Motor pilot boats – hulls painted black, white housing. "Pilot" painted in black on housing. Pilot taken aboard at Pilot Boarding Area situated approximately 2 miles N.N.E. of South breakwater light.

Vessels not to approach closer than 2 miles from entrance until contact has been made with pilot boat.

RESTRICTIONS: Vessels not permitted to enter unless Agents have been appointed. Oil tankers and ships carrying explosives or dangerous goods restricted to daytime hours. The depth of the inner and outer channels is 12.8 m. above chart datum.

Hazardous Cargoes: Details of all hazardous cargo for discharge or loading at Durban and hazardous cargo remaining on board during a vessel's stay, are to be made known to the authorities through the vessel's Agent, not less than 72 hours prior to vessel's arrival.

Information required: Commodity, packaging, weight and volume, IMO group and stowage on board.

Vessels having on board more than 10 tons of hazardous cargo, will require to maintain a fire watch manned by qualified shore firemen and in addition, have an emergency shore telephone on board.

MAX. SIZE: The draft permitted is 39 ft. (11.9 m.) The length of 245 m. is exceeded with the Port Captain's approval.

Size of vessels permitted to enter during the hours of darkness: Vessels exceeding 200 m. in length and 26 m. in beam may be brought into port at night provided weather conditions are suitable. Vessels whose beam exceeds 35 m. are brought into port only when weather conditions are suitable.

HEALTH: Radio advice to "Port Health Durban", direct through Durban Radio, to be given between 24 hours and 48 hours prior to arrival, advising ETA, last port, date sailed, number of crew, full innoculation and vaccination status, and state of health of crew, and requesting Radio Pratique. Port Health will cable vessel directly, either granting pratique or requesting further details.
Shipmaster's Report: Valid Yellow Fever Certificate not required.

RADIO: Radio advice to "Port Captain Durban", direct through Durban Radio, 48 hours prior to arrival, advising ETA, draft, freeboard and reason for calling at Durban.

VHF: Port Control office manned 24 hours, calling Channel 16, working Channel 12.

TUGS: 6×30 ton bollard pull tugs available. Join vessels in entrance channel. Tug's wires used at no extra charge.

Stand-by tugs compulsory for tankers discharging crude.

* All berths and channels are subject to shoaling from time to time. The depths shown are only available immediately after dredging to depth has been completed, and do not refer to the actual depths available at any time.

BULK HANDLING FACILITIES: *Bluff Mechanical Appliance:* Operators: Rennies Bulk Terminals. Berths No. 1 – 4 equipped with electrically driven appliances for the loading of coal. 1 belt loader with capability of loading at the rate of 6,000 t.p.d. and 2 bucket transporters with an aggregate capacity of 4,000 t.p.d. are available. Concrete bins are provided for ground storage with a capacity of 30,000 tons of anthracite. All exports are brought in by rail trucks. Overall productivity 4,000 tons per 24 hours. There is no work between 1100 hrs. Saturday and 0700 hrs. Sunday.

Coal Anthracite Storage Facilities: Concrete ground storage bins of 18,290 tons capacity at Causeway Road.

Island View 3: Operators: Durban Bulk Shipping Co. (Pty) Ltd. Max. draft 10.64 m., max. length 167.5 m., max. reach 9.4 m., dolphin max. height 13.1 m.

Products: Pelletised maize products, minerals, ores and vegetable oils.
Storage Capacity: Pelletised maize products (all silos dedicated) 50,000 tons; Andalusite 8,000 tons; Monocalcium phosphates 8,000 tons; Coal 33,500 tons; Chrome ore 24,000 tons; Vegetable oils 4,956 cu.m.
Handling Rate: Shipping up to 13,000 tons per day.

Maydon Wharf 2 – Sugar Terminal: Operators: S.A. Sugar Association. Exports of bulk and bagged sugar. Max. draft 9.84 m., max. reach 15 m., max. throw 15 m., max. height 14 m. Max. wharf length of continuous gantry: 131 m. Storage in 3 silos with 520,000 tons capacity and warehouse for 57,000 tons of bagged sugar.

Loading is facilitated over 2 appliances, but only one operated at a time with a rate of 1,000 t.p.h. 24 hour operation if required. Stowage Factor: 43.

Maydon Wharf 5 – Multi-Product Installation: Operators: Rennies Bulk Terminals. Max. length 189 m., max. draft 9.84 m.

Products: Wheat, maize, rice, barley, pelletised protein feeds, soda-ash, coal and fluorspar.
Storage Capacity: Agricultural products 30,500 tons; Mineral products 100,000 tons; Soda-ash 21,000 tons.
Handling Rates: Shipping 500 – 1,200 tons per hour; Discharge 250 – 330 tons per hour; Bagging 750 tons/day.

Hours of Operation: 24 hours per day, 7 days. Normal Monday – Friday 0600 – 1800 hrs. Balance at overtime rates.

Trimmer and Boom: Max. height of loading MSL +7.2 m., minimum depth of lowest bulkhead MSL + 1 m. Max. distance from quay 19 m. Minimum distance from quay 9.2 m. Max. throw 12 m. Rotation 360°.

Maydon Wharf 8 – Grain Terminal: Operators: Portnet. Loading of bulk grain. Max. draft 9.84 m. Vessels have loaded up to 10.6 m. on a rising tide but the Master must take full responsibility and prior permission must be obtained from the Port Captain. Loading through 4 spouts. Storage capacity 34,560 tons (maize) and 14,000 tons (sun flower seed). Loading rate (maize) 1,290 t.p.h. Bagging rate 3,000 bags per day.

Hours of Operation: Ordinary time Monday – Friday 0600 – 1400 hrs.

Max. length: Wharf 171.7 m. Gantry 133.56 m. between outermost shipping spouts. Max. beam with elevator spouts extended 27.43 m. Max. height from water level to top of coaming 14 m.

Average Stowage Factors	*Lower Hold*	*Tween Decks*
Conventional Vessels:		
Sorghum	49	51
Yellow Maize – Grade 1	46	47
Yellow Maize – Grade 2	47	48
Bulk Carriers:		
Sorghum	45.5	
Yellow Maize – Grade 1	46.5	
Yellow Maize – Grade 2	46.5	

Maydon Wharf 9 – Bulk Molasses: Operator: Pure Cane Molasses. Max. length 180 m., max. draft 9.84 m., storage capacity 48,000 tons, shipping rate up to 500 t.p.h. Piping and flanges available from operator. Shipping of Molasses in bulk.

Maydon Wharf 13 – Grindrod Forest Products Terminal:
Storage Capacity: 20,000 tons. Covered area 20,580 sq.m.
Handling Rate: Supply 16,000 tons per month.

Maydon Wharf 14 – Bulk Soda Ash Appliance: Operator: I.C.I. Max. draft 9.84 m., max. length 190 m., max. reach 17 m.

Discharge of bulk soda ash through 2 vacuum operated suckers simultaneously to shore storage facility of 28,000 tons. Hours of operation 24 hours – 7 days. Rate of discharge 80 t.p.h. – 90 t.p.h. Max. 2,000 tons per 24 hours.

Maydon Wharf 15 – Rennies Forest Products Terminal:
Storage Capacity: Pulp and paper 60,000 tons; Terminal "A" – 13,000 sq.m.; Terminal "B" 28,000 sq.m.
Handling Rate: Shipping and pulp – 10,000 tons per day. Paper – 3,000 tons per day.

Point, Berth A – Keeley Granite Terminal:
Storage Capacity: 50,000 tons.
Handling Rate: 3,600 tons per day.

CRANES: *Floating Cranes:* Two self-propelled floating cranes:
"Indlovu": 200 ton: 200 ton at 21 m. radius.
125 ton at 35 m. radius.
"Imvubu": 60 ton: 60.9 ton at 6.1 m. radius
40.6 ton at 16.2 m. radius.

Also see "Berthing".

Mechanical Appliances: For general cargo handling: 1×30 ton mobile crane. Forklift trucks: 108×3 ton, 87×4 ton, 15×7 ton, 18×12 ton, 5×15 ton and 10 forklift trucks with a capacity greater than 16 tons. Shunting tractors and haulers: 47.

CONTAINER HANDLING FACILITIES: A major container/Ro-Ro terminal comprising 6 deep sea berths (200-205) and 2 coaster berths (108-109) is equipped with 7×40 ton wharf container cranes at deep sea facility and 1×30.5 tonne unit at Berth 108/109.

The entire complex covers some 102 hectares and provides very substantial stacking areas backed up by a large terminal building with computer control, workshop complex and a road/rail transfer terminal to handle unit trains conveying 100 TEUs. This rail terminal is served by 2 rail/road transfer cranes of 35 ton capacity each, covering 3 rail tracks and 2 traffic lanes. The back-up system operates on a combined trailer/straddle carrier system comprising 25×30 ton, 8-wheeled straddle carriers and 66 terminal tractors augmented by a substantial fleet of 190 terminal haulers and trailers as well as a large cartage fleet operated for the local delivery of containers. A Ro-Ro shed with an under cover storage area of 8,500 sq.m., where cargo pre-assembly and container packing/unpacking is carried out, is situated behind Berths No. 108/109.

A very modern stuffing and re-stuffing depot located on a 13 hectare site immediately adjacent to the harbour terminal is operated by private enterprise (Messrs. S.A. Cargo Depots). The depot is fully equipped with re-stuffing sheds and container handling equipment to cater for LCL traffic.

The container terminal operates a 24 hour day, 7 days a week service.

PRE-COOLING FACILITIES: *Pre-cooling Stores:* South African Co-operative Citrus Exchange Limited: Tel. 012-282181. Telex: 321391. Storage facilities comprise 10 holding chambers of 7,776 pallets (176,204 cu.m.), 72 rapid cooling tunnels of 3,456 pallets (7,831 cu.m.), a container area of 1,040 pallets (2,356 cu.m.), a re-pack holding area of 888 pallets (2,012 cu.m.). Handling rate: Shipping rate of 2,000 pallets per day (average 2,600 tons per day).

STEVEDORES: Stevedoring undertaken by private enterprise stevedores appointed by ship's Agent.

Port Working Hours:

The port is a 7 day, 24 hour port as far as berthing and pilotage are concerned.

Cargo working hours at conventional berths are:
Monday – Friday (2 shifts) 0600 – 1400 hrs, 1400 – 2200 hrs.
Sunday 0715 – 1515 hrs.

Limited labour is available for overtime and Saturday and Sunday working, whilst 3 shift working consisting of 3×8 hour shifts is provided for at the Pier No. 1 area, albeit on a limited basis.

Container Terminal: Continuous work 7 days a week with shift changes at 0600 hrs., 1400 hrs. and 2200 hrs., except Christmas Day.

MEDICAL: Unrestricted hospital facilities. Medical assistance must be arranged through Agents.

TANKERS: *SBM:* An off-shore single buoy mooring, suitable for crude dischargers between 70,000 and 300,000 d.w.t., is situated in position 30° 00.5' S., 30° 58.5' E. A Mooring Master will board in position 2 miles Eastward of the SBM. A starboard derrick, capacity 10 tons should be ready and crew available to lift mooring equipment on board from launch. A good lee on the starboard side is desirable.

Mooring to the buoy is with 2 lines provided by the terminal but vessels are required to provide a rope messenger, available on the forecastle. The mooring operation is carried out by shore personnel, assisted when necessary by ship's crew.

Pipe-line manifold should be ready to connect two 16 in. discharge hoses ASA 150 flanges. Connection by terminal personnel. The hose connection team remain onboard throughout the discharger's stay at the SBM.

No bunkers, or water are available from the SBM. Vessels using the buoy and receiving water or stores ex-launch may only do so prior to berthing or after leaving the SBM and at a distance of more than 2 miles from the buoy.

Port Tanker Berths: There are 7 tanker berths for vessels of max. length 244 m., max. draft 12.3 m. at Island View.

Slop tank facilities with a capacity up to 4,000 tons are available. Requirements in excess of this volume should be made known to the vessel's Agents with as much prior notice as possible.

Crude oil discharge through 10 in. hoses, white oil 8 in. hoses and loading products through 8 in. hoses.

Bunkers and fresh water available ex-berth.

Chemical tankers, with double skin, up to 183 m. are permitted to berth at Island View during hours of darkness. Agent to advise Port Control in advance that SOLAS and Classification Certificates are valid.

2 tugs required for shifting and all tanks to be sealed.

DENSITY: 1025.

FRESH WATER: Delivery by hose ex-wharf hydrants. Rate of delivery 50 t.p.h.

FUEL: Fuel and diesel oil are available ex-pipeline at Pier No. 1, Container Terminal and Island View Berths. Gas oil ex-pipeline is only available at Island View Berths No. 4, 5, 6, 7 and 8, and blends are available at Island View Berths No. 2, 3, 4, 5, 6, Pier No. 1, Pier No. 2 and Container Terminal.

The Maydon Wharf Point and Bluff Berths are served with fuel oil, diesel oil, gas oil and blends from a bunker barge (see below). No bunkers are supplied outside the harbour.

There is a self-propelled bunkering barge called the "Durban Servicer" with a capacity of 140 tonnes of gas oil, 650 tonnes fuel oil and 280 tonnes diesel.

CONSULS:

Italy	301-4107/8		

REPAIRS: All types of repairs can be undertaken.

DRY DOCKS: *Prince Edward Graving Dock:*

Dimensions—	
Overall docking length	352.04 m.
Length on keel blocks	327.66 m.
Length on bottom	352.04 m.
Width at coping	42.21 m.
Width at entrance top	33.52 m.
Maximum width at bottom	33.52 m.
Depth on entrance sill at MHWS	12.56 m.
Depth on inner sill at MHWS	13.17 m.

A docking length of 364.44 m. can be obtained by placing the caisson in the emergency stop at the entrance.

The dock can be divided into 2 compartments:

Outer 206.90 m. and inner 138.68 m.

The dock can be emptied in 4 hours.

Electric Cranes:

No.	*Lifting Capacity* (tons)	*Radius* (m.)	*Rail Centres* (m.)
1	50/10	28.00/30.00	7.92
2	10	27.43	7.92
2	8	27.43	4.57

Floating Dock No. 3:

Dimensions—	
Extreme length	106.68 m.
Length on bottom	106.68 m.
Length on keel blocks	104.54 m.
Extreme width	26.82 m.
Width at entrance	19.48 m.
Height on keel blocks	1.21 m.
Draft on keel blocks at HWOST	5.40 m.
Lifting capacity	3,000 tons
Crane	3 tons

Durban Slipway: Overall length 19.81 m. Width 5.00 m. Displacement (max.) 50 tons.

CERTIFICATES:

Safety Certificates in respect of construction and gear.
Radio Certificate.
Load-line Certificate.
Derat Certificate.
Certificate of competent officers (passenger ships only).

OPENING/CLOSING HATCHES: Mechanical hatches opened/closed by crew. Other types of hatches by stevedores.

CUSTOMS ALLOWANCES: See "Cape Town".

CARGO GEAR: All cargo handling equipment must be in good condition and certificates available for inspection. Under normal conditions vessels are obliged to use shore cranes.

REPATRIATION: All facilities available. Also see "Cape Town".

AIRPORT: Louis Botha Airport – 15 miles from harbour. Daily flights to Johannesburg connecting with overseas flights by regular airlines.

TIME: GMT plus 2 hours.

HOLIDAYS: See "General" before first port.

POLICE/AMBULANCE/FIRE: Police, 310-2714; Ambulance, 62333; Fire, 62333 or 4502222.

TELEPHONES: Telephones can be supplied at all berths. Arrange through Agents. Also see "Restrictions" – Hazardous cargoes.

SERVICES: Tank-cleaning facilities, divers, compass adjustments and repairs to all electronic gear can be undertaken.

SHIP SUPPLY SERVICE: Crew changes are permitted by helicopter or launch at Durban and can be arranged with prior permission from Immigration and Customs Authorities provided vessel has been granted Radio Pratique.

Helicopter Services: A single engine Sikorsky S62 helicopter is available for crew changes and supply services to vessels passing off Durban. The above helicopter is available for daylight service only, except in emergencies.

Normal Service: Within 15 nautical miles of Cooper Light.

Note: Normal Rendezvous area is 10 nautical miles off the coast. Bearing (160°T) from Cooper Light. (For service where more than one flight is required the ship MUST route through the 10 nautical miles rendezvous position).

Launch Service: A Company operates launches suitable for servicing vessels off port limits. Up to 20 tons of stores and/or provisions and a maximum of 14 passengers can be carried. The condition of transport is that same is performed solely at Owner's risk.

The costs involved are R100 per half hour or part thereof and nominal charges are raised for the use of the launch's 1.5 ton hydraulic crane and steel cages to carry stores.

Communication can be established with the launch 1 hour prior to the ship's arrival at the Rendezvous position, on either VHF Channel 16 or 2182 kHz. The normal Rendezvous is five miles East of the Durban Harbour breakwater, but this can be easily varied.

The following two private companies have small craft licensed at this port to serve vessels off limits:

1. Messrs. Offshore and Ships Supplies (Pty) Ltd., P.O.Box 29139, Maydon Wharf 4057.

2. Messrs. Southern Offshore Supplies (Pty) Ltd., P.O.Box 38011, Point 4069.

Helicopter service provided by: Helicopter Services (Pty) Limited., P.O. Louis Botha Airport, Durban 4029. Tel: 426101/426192. Telex: 564246 SA.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Required, otherwise National Identity Cards, if available.

GARBAGE DISPOSAL: Collection service is available via agent. Drums are placed alongside. No charge for service. Collections daily.

SEAMAN'S CLUBS: Missions to Seamen. Tel: (031) 375328; Sailors Society. Tel: (031) 3014380.

CURRENCY: South African Rand (R). U.S.$ 1.00 = R 4.43 (18.7.96).

GENERAL: A copy of the Regulations for the Republic of South Africa supplied gratis to Masters on arrival.

DEVELOPMENTS: A new Ro-Ro shed to cater for deep sea and coastal Ro-Ro traffic.

The renewal of wharf cranes over a 4 year period. The current light weight fleet will be replaced by fewer higher capacity cranes, as and when the need arises.

Additional container gantries and replacement of the straddle carrier fleet with both stacking cranes and modern straddle carriers.

New specialised break-bulk terminals.

New offices at Ocean Terminal.

SHIPMASTER'S REPORT: September 1980 (Updated 1994).

Pilotage: Pilot ladders should be provided with manropes, uncovered manila, not less than 32 mm. diameter and without knots at the end.

Container Handling Facilities: The terminal has been completed. General cargo vessels with 10 containers or more have to handle these through the container terminal and shift berth later for handling of general cargo.

Bunkers: On Maydon Wharf and Point Berths, no bunker facilities, bunkers to be taken by barge. Sometimes vessels have to shift to bunker pier for bunkering.

SHIPMASTER'S REPORT: June 1979 (Updated 1994).

Approaches: Decca Chain 10C, can be erratic, especially at night. 'Bluff' shows up at 48 miles on radar. Cooper Point D/F continuous.

Pratique: Send message to "Porthealth" Durban 36 hours before arrival. If no complications free Pratique given quickly from Durban Radio.

Anchorage: Satisfactory if good weather, within about 4 miles N.E. of breakwaters, however if Southerly winds and swell build up it can be dangerous and it is often best to lie off.

Pilots: Send message to 'Port Captain Durban' 24 hours before arrival; ship's particulars, type, cargo, length, draft and Agent's name. Contact Durban Harbour Radio at least 1 hour before arrival. Pilot boards from large black fast cutter, nearly always on vessel's starboard side (landward side).

Must have fixed ladder with manropes, if vessel has large freeboard (in excess of 9.0 m.) gangway required at half height. Pilots dislike hoists.

Entry: Due to swell and cross currents around breakwater vessel has to be "driven" through breakwater entrance which requires full harbour speeds and sometimes more if heavy swell conditions, once well inside breakwaters speed is reduced.

VHF: Durban Harbour Radio and Pilots generally work Channel 12 but numerous other Channels available.

For public correspondence use Durban Radio which usually works Channel 26, but very busy in the morning.

Tugs: 6 large powerful tugs fitted with firefighting and salvage capabilities are on station. Tugs are all diesel powered and comprise Schottel,Z-Peller and Voith propulsion systems with bollard pull varying from 23 tons to 40 tons. Very manoeuvrable and excellent stopping power. For most ships two tugs used inward and one outward, tug's wires used. A 20,000 h.p. ocean going tug is usually on station at Durban.

Tugs join vessels just inside breakwaters. For large vessels will accompany vessel on either side from anchorage area and then connect up when swell slackens inside.

Berth: For bunkers, Island View, Starboard side to. Swing in turning basin. For oil transfer of any kind use gantry 'Sheepbridge' with flexible pipes. Shock absorbing fenders. For vessels of 207 m. in length at No. 7, 8 and 9 Berths the straight section of the ship's side lay along the quay. FW available from quay.
Lines: Three head and stern lines. Two backsprings either end to the jetty. Mooring boat used.
Bunkers: Meter pump. Stop on meter at quantity stemmed. Rate up to 200 t.p.h.
Stores: Have to be taken from roadway down to the jetty. Generally local labour has to assist.
General: D/F calibration can be easily undertaken off Cooper Light, good continuous beacon from red tower near water tower, generally little traffic.
Customs/Immigration: Papers as per 'Guide to Port Entry'. Immigration require 'I' flag flown until Immigration Clearance granted.

AUTHORITY: Portnet, P.O.Box 32696, Braamfontein 2017, Johannesburg, South Africa. *Tel:* (011) 7737299. *FAX:* (011) 7738304. *Contact:* The Chief Executive.

Portnet, P.O.Box 1027, Durban 4000, South Africa. *Tel:* (031) 361-8799 (Port Captain); (031) 361-8838 (Port Manager). *Telex:* 6-21567 SA. *FAX:* (031) 361-8851. *Contact:* Captain K. Shirley, Port Captain.

AGENT: King & Sons (Pty.) Ltd., P.O.Box (Grindrod House, 108 Victoria Embankment), Durban 4001. Tel: (031) 301-0711. Telex: 620211. Fax: (031) 306-0212. Cables: Baronet Durban.

EAST LONDON: 33.02 S. 27.55 E. (See Plan)

PORT LIMITS: The area of the sea bounded by a line drawn from the Nahoon Point in position: Lat. 32° 59' 50" S. Long. 27° 57' 07.5" E. in a 114° direction for 1,852 m. to a position: Lat. 33° 00' 13.9" S. Long. 27° 58' 12.8" E. thence in a 216.5° direction to a position: Lat. 33° 03' 14.46" S. Long. 27° 55' 37.18" E. and thence in a 295° direction to the coast in position Lat. 33° 02' 36" S., Long. 27° 53' 57" E. (All bearings are true.)

For Charter Party purposes: An "arrived ship" is when she enters the Port Limits.

For Harbour Revenue purposes, a vessel "arrives" when it passes into the harbour proper or upon first contact at anchorage whilst waiting for berth.

DOCUMENTS: See "Cape Town".
Immigration: Produce their own forms which are:
(a) Arrival and Departure forms.
(b) Prohibition Notice – which states all crew must sail with vessel unless officially signed off through Immigration.
(c) Medical Certificate.
(d) Advice letter from last South African port – if applicable.

They require Crew Lists and the "I" flag to be flown until vessel cleared by Immigration Officer.

Also see "Cape Town" – *Shipmaster's Report,* March 1981. Same Documentation except 3 Crew Lists and 1 copy "nil" Livestock Form.

PILOTAGE: Compulsory. One hour advance notice to be given to Port Captain through VHF radio – Port Operation – calling Channel 16, working Channel 12. Pilot boats fitted with multi-channel VHF. Motor pilot boat – yellow hull, white housing "Pilot-Loods" painted in black on housing. Pilot taken aboard at outer anchorage. Pilots prefer pilot ladder and manrope system for boarding and disembarking.

RESTRICTIONS: Vessels not permitted to enter unless Agents have been appointed.

Port operates from: Mondays to Fridays 0600 to 2200 hrs., Saturdays 0600 to 1200 hrs. and outside these hours at special request. Tankers are docked in daylight only and can sail during normal working hours of port.

MAX. SIZE: Tankers: Max. length 204 m. overall, draft 10.0 m.

Passenger and dry cargo vessels: Max. length 245 m. overall, draft 10.4 m. (Tidal).

HEALTH: Pratique granted at first port of entry in South Africa. Pratique message 24 hours prior to arrival to "Port Health" at port of entry. If Radio Pratique not granted "Q" flag to be flown until ship has been cleared. Valid certificates must be held for yellow fever. Ships from Eastern ports must also have valid certificates for cholera and typhoid.

Vessels will not be brought into harbour until Radio Pratique has been requested/granted, if this is first port of call on the South African range.

RADIO: East London Radio, call sign ZSA.

TUGS: 2 diesel Schottel tugs fitted with fire fighting and salvage capabilities with bollard pull of 34 tons each are available. Join vessel in entrance channel. Tug's wires used at no extra charge.

Stand-by tugs compulsory for tankers with hazardous cargo on board.

BERTHING:

Berth	*Length* (m.)	*Depth* (m.)	*Cranes* *No.*	*Cranes* *Capacity* (tonnes)
L	253	10.7	4	4
K (Ro/Ro)	253	10.7	1	15/4
I (Ro/Ro)	132	8.5	6	4
G	180	10.1	1	15/4
F	180	10.0		
C	200	10.0		
Repair Quay	110	8.5		
N	183	9.5	3	4
P	183	9.0		
R	183	9.0		
S	194	10.4		
T (Grain Elevator)	194	10.4		
OW (Tankers)	259	10.4		

Containers handled at "L" Berth. Stacking area designed for 312 TE ground slots and 38 reefer points.

Equipment: Straddle carriers, haulers and trailers.

Ro/Ro vessels handled at "I" and "K" Berths. Stacking ar 1.8 hectares (18,000 sq.m.).

CARGO HANDLING FACILITIES: One berth equipped for bulk loadi of maize. One berth equipped for discharging bulk petroleum produc and LPG. All other berths for general cargo. Grain elevator: Storag capacity 75,986 tons; loading rate 1,650 t.p.h. through 4 spouts.

STEVEDORES: No Saturday work except at Port Manager's discretio

MEDICAL: Unrestricted hospital facilities. Medical assistance must b arranged through Agents.

TANKERS: One tanker berth suitable for vessels of 204 m. length w maximum draft 9.9 m. Diameter of hoses, 300 mm. LPG Tanke accepted, hose diameter 150 mm.

DENSITY: 1025.

FRESH WATER: Delivery by hose ex-wharf hydrants. Rate of delive 60 t.p.h.

FUEL: 48 hours' notice required. Heavy Oil and Gas Oil available.

CONSULS:

Belgium	Germany	Portugal
Denmark	Italy	Transkei
France	Netherlands	United Kingdom

REPAIRS: All types of repairs can be undertaken.

DRY DOCKS: *Princess Elizabeth Graving Dock:*

Dimensions-Overall docking length	198.5
Length on keel blocks	193.1
Length on bottom	198.5
Width at coping	31.2
Width at entrance top	27.2
Maximum width at sill level	22.9
Depth on entrance sill, HWOST	10.2
Depth on inner sill, HWOST	10.2

A docking length of 209.2 m. can be obtained by placing the caisso in the emergency stop at the entrance. Maximum beam admitte depends upon draft.

Two 15 ton and one 5 ton electric cranes on 4.9 m. gauge track a available.

The dock can be emptied in 4 hours.

SURVEYORS: General cargo surveyors available.

Rennie Murray & Co. Ltd. Tel: 29612. Telex: 75–0711 as local Age for Lloyd's Register, B.V., U.S. Salvage and Salvage Association.

OPENING/CLOSING HATCHES: Mechanical hatches opened/close by crew. Other types of hatches by stevedores.

CUSTOMS ALLOWANCES: See "Cape Town".

CARGO GEAR: All cargo handling equipment must be in good conditio and certificates available for inspection.

CERTIFICATES:
Safety Certificates in respect of Life Saving Equipment and gear.
Radio Certificate.
Load-line Certificate.
Derat Certificate.
Certificate of Competent Officers (passenger ships only).

REPATRIATION: All facilities available.

AIRPORT: East London Airport – 8 km. from harbour. Daily flights t Johannesburg connecting with overseas flights by regular airlines.

TIME: GMT plus 2 hours.

HOLIDAYS: See "General" before first port.

POLICE/AMBULANCE/FIRE: Police 442223 or 51616; Ambulanc 53316; Fire 2-1212. National Sea Rescue 22555. Harbour Polic 442032.

EMERGENCY CO-ORDINATION CENTRE: Contact Port Captai Tel: 44-2300 or 44-2142. Telex: 250774.

TELEPHONES: Telephones can be supplied at all berths. Arrang through Agents.

STORING: See "Prelims".
1. Truck only.
2. Not applicable.
3. Truck may proceed alongside unless explosives being handled Vehicles not permitted at tanker berth. (Distance to gate – 200 m.)
4. Yes, except tanker berth.
5. Ship chandler places entries for bonded stores.
6. Ship chandler supplies labour.

SHORE LEAVE: Allowed. No shore pass required.

IDENTIFICATION CARDS: Required, otherwise National Identity Cards if available.

GARBAGE DISPOSAL: No collection service available, but agents ca arrange for either drums or skips to be placed alongside the vessel an the garbage removed. Contact Waste-Tech (Pty) Ltd. Tel: 45-1621.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: Flying Angel Seaman's Club, Harbour Main Ga East London. Tel: 24126. Facilities available include shop, internatio telephone service, church service, minibus collection, postage servi and games.

CURRENCY: South African Rand (R).

AUTHORITY: Portnet, P.O.Box 32696, Braamfontein 201 Johannesburg, South Africa. *Tel:* (011) 7737299. *FAX:* (011) 773830 *Contact:* The Chief Executive.

MOSSEL BAY: 34.10 S. 22.09 E. (See Plan)

PORT LIMITS: Within a line drawn from Cape St. Blaize Lighthouse to the mouth of the Little Brak River, thence along the high water mark so as to include the foreshore between these points, together with Seal Island, the estuary of the Little Brak River as far as the tide flows.

DOCUMENTS: Refer to "Cape Town".

PILOTAGE: Compulsory. 1 hour advance notice to be given to Harbour Master and Pilot through VHF radio. Port operation calling Channel 16, working Channel 12. Motor pilot boat – black hull, white housing. International pilotage signals used. Pilot boards about 1 mile North of Cape St. Blaize Light.

ANCHORAGE: Open anchorage with unlimited depth.

RESTRICTIONS: Vessels not permitted to enter unless Agents have been appointed. No night berthing or sailing for tankers. Tankers at SPM sail on completion.

MAX. SIZE: Anchorage: No restrictions.

Tanker mooring: Up to 32,000 d.w.t.

Harbour: Max. draft 6.5 m. Max. displacement 5,000 tons. Max. LOA 130 m.

HEALTH: Pratique granted at first port of entry in South Africa. Pratique message 24 hours prior to arrival to "Port Health" at port of entry. If Radio Pratique not granted "Q" flag to be flown until ship has been cleared.

Valid certificates must be held for yellow fever. Ships from Eastern ports must also have valid certificates for cholera and typhoid.

RADIO: Cape Town Radio, ZSC. Port Elizabeth Radio, ZSQ.

TUGS: 1 twin-screw workboat with a bollard pull of 10 tons available, equipped with VHF and R/T.

BERTHING:*Suitable for small fishing craft only.

Berth	*Length* (m.)	*Cope Level MSL* (m.)	*Depth at Chart Max.* (m.)	*Depth at Datum Min.* (m.)

No. 4 Quay	274	3.01	7.5	7.5
No. 5 Quay	170	2.30	4.0	4.0

MEDICAL: Cape St. Blaize lighthouse on 24-hour watch. Requests for medical assistance passed through lighthouse to Harbour Master and Pilot. Hospital facilities available. Vessels in port should arrange medical facilities through Agent.

TANKERS:

CBM: *Position:* Lat. 34° 08' 35.5" S., Long. 22° 07' 47" E.

Name: Mossgas Voorbaii Tank Farm.

Location: Mossel Bay Terminal for the export of alcohol is an open, unsheltered roadstead, approximately 1.5 nautical miles Northward of the Eastern end of the protection pier of Mossel Bay Harbour or alternatively Cape St.Blaize Lighthouse. From the berth, Cape St.Blaize bears 152° × 2.88 nautical miles.

Sound and sandy mooring bottom. Depth of water 18 m. – 21 m.

Charts: Refer to U.S. Hydrographic Office Charts, British Admiralty Chart No. 639 (Africa South Coast – Mossel Bay) and S.A.N. Chart No. 1020.

Navigation Aids: Prior to proceeding to the berth, ships should await the boarding of the Pilot approximately 1.2 nautical miles Eastwards of moorings in approximately 25 m. of water.

The position is Lat. 34° 09' S., Long. 22° 10' E., and from here the berth will bear 288° × 2.0 nautical miles and Cape St.Blaize 192° × 2.2 nautical miles.

Land Marks: Refer to Hydrographic Chart No.639, S.A.N. Chart No. 1020 and plan (See "Plan Section"). Cape St.Blaize Lighthouse is most prominent point and is also assisted with shore beacons.

Radio control is also available on international frequency.

Terminal Information/Requirements:

CBM: Max. draft 12.0 m. Max. size of vessel 32,000 d.w.t.

Bow: Both anchor winches capable of working independently of one another.

Stern: Sufficient winches capable to connect 6 ropes from the stern of the vessel (2 to each buoy astern of the vessel). Vessel must have winches forward of accommodation on each side to handle breast ropes.

Ropes required:

10 full coils (220 m.) 64 mm. diameter polyprop.

Minimum breaking strain 64 tons or comparable floating ropes.

Ballast condition: At all times a minimum of 25% of Summer deadweight must be on board in cargo or ballast.

Note: There is no deballasting arrangement to shore.

Manifold Connection: 8 in. universal flange. Hose lifting and hose connecting arrangements required at the manifold. Minimum derrick capacity 5 tons.

Accommodation: Required for Loading Master, tanker team, berthing gang and surveyor (total of 7 persons).

Berthing: Only daylight berthing/unberthing will be carried out.

Note: Tankers will not be berthed if arrival is later than 1400 hrs. (local time). However, the Portnet Pilot and Marine Operators will evaluate each arrival on the day to determine if conditions are suitable for later berthing.

SPM: *Marine Tanker Terminal Single Point Mooring Buoy (MTT):* The buoy facility is situated at Voorbaai, an open, unsheltered roadstead, in position Lat. 34° 08.6' S., Long. 22° 08.5' E., in a depth of about 21.0 m. of water at LAT. It is an IMODCO type Single Point Mooring buoy with a 3 hose system which may be used simultaneously. They consist of a ballast line and two product lines. One product line is dedicated to 93 and 97 octane petrol and the other product line to distillates, namely illuminating paraffin and automotive diesel oil.

Navigation Aids: The buoy is 8.5 m. in diameter, with a freeboard of about 1.6 m. and painted yellow in colour. It is fitted with the following:

Master Lantern:	Morse code 'U' every 15 seconds, amber lens, range 3.0 km.
Fog Signal:	2.0 km. range, omni-directional, 3 sec. blast every 30 seconds with an output of 55 phons.
Load Cell Warning:	Red lantern: 0.5 sec. flash every second if mooring line tension exceeds the permitted loading of 50 tonnes.

Personnel: A Loading Master and a tanker team which consists of 3 divers/deck watch will all remain on board for the whole loading operation and accommodation is requested for these personnel.

The Portnet Pilot will, at the specific request of the Shipmaster, remain onboard on the completion of the mooring operation, if this is required. The Harbour Master, at his discretion, may require the Portnet Pilot to remain on board for safety reasons. In this event, accommodation is requested for him.

The divers/deck watch will, with the assistance of the ship's crew, connect and disconnect the hoses. They will stand watches as instructed by the Loading Master, and have radio communication with the tank farm at all times. Weather and operational requirements permitting, they will carry out an underwater inspection of the system during the loading.

Mooring Launch and Buoy Tender Vessel (BTV): The mooring launch(es) "Strandloper" and/or "Houtkapper" will be used as the pilot vessel for the Pilot and other personnel to board from, and for passing the pick-up rope to the ship. The BTV "Pentow Isipingo" will attend to the hoses, and will remain on station in the vicinity of the buoy as the diving support and pollution control vessel. The BTV has a capability of towing, and is able to hold the ship off the buoy if required.

Loading Hoses: The hoses are 8 in. internal diameter, and the ends are fitted with Camlock couplings for the manifold connection and butterfly valves, which must be locked in the open position during the whole of the loading operation. The hoses will be suitably secured with hanging-off chains on the hoses, made fast to either bollards or pad eyes at the manifold. The hoses will be suitably suspended from the ship's derrick which must have a minimum SWL of 5 tons.

Mooring Hawser: The mooring hawser consists of a 45 m. × 144 mm. diameter braidline nylon with a 45 m. × 64 mm. polypropylene pick-up rope. Between the mooring hawser and the pick-up rope is a length of 54 mm. stud link chain designed to be accommodated in an OCIMF tongue type bow stopper, with which all tankers loading at this Terminal must be fitted.

Weather: The average maximum temperature during Summer months is 22°C (extreme maximum 34°C) and the average minimum temperature is 15°C (extreme 5°C). The average annual rainfall is 380 mm. The average relative humidity is 75%. The coastal climate is generally mild to temperate throughout the year.

Tides: The tidal range is about 2.0 m.

Currents: There are no significant currents at the Voorbaai MTT location.

Sea Temperature: Average 20°C.

Water Salinity: Density of 1020 – 1025 kg./cu.m.

Wind: Prevailing winds are S.W. (predominant throughout year), N.W. (Winter) and S.E. (Summer), but wind directions and velocities are subject to rapid change without warning. Average wind force is between 10 – 25 knots. Heaviest seas and swells are predominant S.E.'ly and accompany the S.E. winds. The S.W.'ly winds seldom cause swell problems.

Berthing Limitations: Berthing will be limited to wind speeds of less than 25 knots and/or sea and swell not exceeding 2.0 m. or in accordance with the advice of the Portnet Pilot. Note that berthing on to the buoy will only be performed in *daylight*.

Likewise, should the ship, whilst moored to the buoy, experience wind speeds in excess of 30 knots or swell in excess of 3.0 m. or mooring forces in excess of the stipulated force, which activates the red warning light on the buoy or any combination of these, the loading will be stopped and preparations made to leave the berth. Should these conditions persist or worsen, the hoses will be disconnected and the ship taken off the buoy until more suitable weather prevails. The advice of the Portnet Pilot and/or the Loading Master, with regard to these conditions, should be accepted in the interest of safety.

DENSITY: 1025.

FRESH WATER: Available along Nos. 3, 4 and 5 quays and Vincent Jetty.

FUEL: Available at No. 2 quay and No. 3 quay. Available by road tanker at No. 5 quay and Vincent jetty.

REPAIRS: Marine engineering firm available for all classes and types of onboard afloat repairs. Slipway of 375 tons capacity is available.

CUSTOMS ALLOWANCES: See "Cape Town".

CARGO GEAR: All cargo handling equipment must be in good condition and certificates available for inspection.

AIRPORT: George Airport, 40 km.

TIME: GMT plus 2 hours.

HOLIDAYS: See "General" before first port.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Required. Otherwise National Identity Cards, if available.

GARBAGE DISPOSAL: Drums provided alongside by Port Authority. Skips are available for alongside or on board (to be arranged by ship's agent).

WASTE OIL DISPOSAL: No collection service available.

SEAMAN'S CLUBS: None.

CURRENCY: South African Rand (R).

AUTHORITY: Portnet, P.O.Box 32696, Braamfontein 2017, Johannesburg, South Africa. *Tel:* (011) 7737299. *FAX:* (011) 7738304. *Contact:* The Chief Executive.

Mossel Bay: Portnet, P.O.Box 1942, Mossel Bay 6500, South Africa. *Tel:* (0444) 46271, 3404. *FAX:* 46232. *Contact:* Captain T. Bosker, Port Manager.

AGENT: King & Sons (Pty.) Ltd., (P.O.Box 17), 9 Church Street, Mossel Bay 6501, South Africa. Tel: (0444) 7117. Fax: (0444) 913311. Telex: 248123. Cables: Baronet, Mossel Bay.

PORT ELIZABETH: (Algoa Bay): 33.57 S. 25.39 E.

(See Plan)

PORT LIMITS: Bounded on the Southward by a line drawn from Cape Recife, East (true) to a point in the Indian Ocean, distant 1,609 m. on the Northward by a line drawn from the extreme point of the East bank of the Swartkops River, East (true) distant 1,609 m. on the Eastward by a line drawn between these 2 points, and shall embrace the foreshore between high and low water marks from Cape Recife lighthouse to the aforesaid line at East bank of the Swartkops River, including that portion of the said river which lies on the seaward side of the bridge carrying the railway line to Alicedale, together with the jetties, harbour works and all land vested in the Government of the Republic of South Africa.

DOCUMENTS:

Customs

Form DA.1 Report Inwards/Outwards for ships.
Form DA.3 Certificate of clearance for ships.
Form DA.4 Transire – for a destination in the R.S.A.
Form DA.5 List of sealable goods on board ship.
Ship's Crew List (Customs Department).
Livestock Form (Customs Department).

Post Office

P1/27 Notice of arrival and departure of vessel.
P1/8 Declaration and Post Office Certificate.

Port Health

Maritime Declaration of Health.
Crew List with last vaccination dates.
Derat or Derat Exemption Certificate.

Port Authority

T958 Report of Arrival.
T962 A Departure/Shifting Notification.
Ship's Manifest.
Also see "Cape Town" – Shipmaster's Report, March 1981.

PILOTAGE: Pilotage is compulsory. Messages addressed to Port Captain, Port Elizabeth. Initial ETA together with draft, 72 hours prior to arrival, updated 12 hours prior to arrival and confirmed with Port Control when within VHF range and when 16 miles East of the breakwater head for ships coming from Eastward and 3.5 miles South of Cape Recife for ships coming from Westward. VHF radio calling on Channel 16. Working frequency Channel 12.

Pilot boats fitted with multi-channelled VHF. Pilot boats black hull with white superstructure, "Pilot-Loods" painted black on white. Pilot boat stationed inside harbour and meets ship on arrival approximately 2.5 nautical miles North East of South breakwater head. Boarding requirements consist of pilot ladder together with 2-manropes or pilot hoist. Pilot ladder usually rigged on starboard side.

Algoa Bay is considered a safe anchorage for all sizes of ships, the bottom consisting mainly of sand. Usual anchorage for ships awaiting Pilot is 3.5 miles Eastward of breakwater, in the Outer Anchorage. Predominant winds are Westerly all the year, with East/South Easterly during the Summer months. The Westerly winds are the stronger of the two but are off land and cause little difficulty. Easterlies being from the sea are inclined to cause an uncomfortable sea.

ANCHORAGE: See "Pilotage".

RESTRICTIONS: Vessels not permitted to enter unless Agents have been appointed.

Vessels which are considered *not gas free* are restricted to daylight entry only.

MAX. SIZE:

	Max. length	*Draft*
Passenger, dry-cargo and container vessels	Subject to Port Captain's prior approval	12.0 m.
Tankers	203.3 m. overall	9.6 m.
Ore carriers	251.5 m.	12.0 m.

HEALTH: Pratique granted at first port of entry in South Africa. Pratique message 24 hours prior to arrival to "Port Health" at port of entry. If Radio Pratique not granted "Q" flag to be flown until ship has been cleared.

Valid certificates must be held for yellow fever. Ships from Eastern ports must also have valid certificates for cholera and typhoid.

PORT NOLLOTH: 29.15 S. 16.50 E.

(See Pla

PORT LIMITS: Northward by a line drawn 245° from North Point t point 4,827 m. from the shore; Westward by a line drawn 155° from t above point to the point where it meets a line drawn 245° from Gu Point, Southward by the latter line.

DOCUMENTS: Port Nolloth is not a port of entry for foreign go vessels. Any vessel arriving from outside South Africa must enter either Cape Town or other South African ports. Only document requi is 1 copy of the arrival form.

PILOTAGE: None. Harbour Master will give directions either from t shore, or will come on board a vessel if requested. 72 hours adva notice of ETA required. Harbour Master stands by on VHF Channel and R/T 2100 kHz from 0800 to 1630 hrs. Monday to Friday. Outs these hours only if a vessel is expected.

ANCHORAGES: Anywhere about 0.5 miles seaward of the Fair Buoy, usually just North or South of the transit line.

RESTRICTIONS: Daytime port only. Entry usually only possible about 2 to 3 hours either side of HW. Tide gauge on jetty and vessels only allowed to enter when 1 m. above chart datum shown on this gauge.
MAX. SIZE: Length 200 ft., draft 3.5 m.
HEALTH: Pratique automatic as vessel must have cleared at another South African port.
RADIO: Local radio station as under "Pilotage", or call Cape Town Radio.
VHF: VHF in Harbour Master's Office; (Multi-Channel). R/T 2182 kHz. Other VHF Channels available (i.e. 6, 10) on portable VHF sets.
RADAR: Not available.
TUGS: None. 40 ft. launch available if required.
BERTHING: 1 berth, 217 ft. long. Depth alongside 3.5 m. at Chart Datum.
CRANES: 1 electric travelling crane, 7.5 tons SWL (only 4 tons SWL under normal cargo working). 1×2 ton mobile crane available.
STEVEDORES: Stevedores supplied by Benguela Operations (Pty) Ltd. who operate the port. 2 gangs available, no advance notice required.
MEDICAL: Local hospital and resident doctor. Main hospital at Alexander Bay (80 km. distant).
TANKERS: Tankers discharge alongside main cargo jetty. Gas oil only. No slop discharge facilities and no loading of oil. Discharge by vessel's pumps, 2 discharge lines available (Shell and Caltex).
DENSITY: 1025.
FRESH WATER: Fresh water available. Delivery by small bore hose (garden tap size); pressure dependent on municipal mains.
FUEL: Marine diesel available on all 3 jetties (2 fishing jetties and main cargo jetty). Delivery from standard type pump nozzle.
FIRE PRECAUTIONS: Normal when discharging gas oil.
CONSULS: None.
REPAIRS: Small deck and engine repairs can be undertaken.
DRY DOCKS: None. 1 slipway for vessels up to 20 m. length and 60 g.r.t.
SURVEYORS: No cargo surveyors. South African Department of Transport represented by the Harbour Master.
GANGWAY/DECK WATCHMEN: Not required.
HATCHES: Opening/closing carried out by vessel's crew.
CUSTOMS ALLOWANCES: No Customs Officers available.
REPATRIATION: In emergency only.
AIRPORT: Alexander Bay 80 km.; Springbok 140 km. Daily flights from Springbok to Cape Town. 3 weekly flights from Alexander Bay to Cape Town and to Luderitz, Johannesburg, Walvis Bay and Windhoek.
TIME: GMT plus 2 hours throughout the year.
HOLIDAYS: See "General" before first port.
POLICE/AMBULANCE/FIRE: Police – Port Nolloth Tel: 8320. Ambulance – Port Nolloth Tel: 8229 (municipality) or Tel: 8411 (state). Fire – No fire brigade in the town – Marine West fire fighting facilities Tel: 8244 or 8733 after office hours.
EMERGENCY CO-ORDINATION CENTRE: Port Captain, Cape Town. Tel: Cape Town (021) 4053413. Fax: (021) 405-2091.
Port Captain, Walvis Bay, Tel: Walvis Bay (09264) 642-3631.
Port Captain, Saldanha Bay, Tel: (02281) 20452.
Any coast radio station, i.e. Cape Town Radio or Walvis Bay Radio.
TELEPHONES: No facilities exist for placing telephones on board.
BANKS: First National Bank, P.O.Box 72, Port Nolloth 8280. Tel: Port Nolloth 8216. Telex: 5–20471 SA.
STORING: See "Prelims".
1. By truck.
2. No barges available.
3. Trucks can proceed alongside the vessel.
4. Yes.
5. None.
6. Yes.

SHORE LEAVE: Permitted, no restrictions.
IDENTIFICATION CARDS: Not required.
DELAYS: Tidal, unless berth occupied.
GARBAGE DISPOSAL: Not available.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None. Hotel with pool tables, bar & restaurant, bank and post office, supermarket & shops and churches, all within 1000 metres of dock gates. No arranged football matches or dances.
CURRENCY: South African Rand (R).
AUTHORITY: Harbour leased to: Benguela Operations (Pty) Ltd., P.O.Box 101, Port Nolloth 8280, South Africa. *Tel:* (0255) 8244 and after hours 8038. *FAX:* (0255) 8629.

RICHARDS BAY: 28.48 S. 32.06 E. (See Plan)

LOCATION: The port is located some 200 km. North of Durban. Mid point of the bay is approximately Lat. 28° 48' S., Long. 32° 02' E.
DOCUMENTS: The following documents should be prepared and ready on berthing:
Port Health:
1 Maritime Declaration of Health.
1 Vaccination List.
1 Crew List.
1 Valid Derat Certificate.
Immigration:
1 Crew List ("I" flag International Code to be flown).
1 Passenger List (if applicable).
1 Stowaway List (if applicable).
Customs:
2 Crew Lists.
1 Ship's Stores List.
1 Crew Customs Declaration (local form only).
1 Narcotics List.
1 Personal Effects List signed by each crew member.
1 Passenger List.
1 Customs Form (D.A. 5).

All vessels using the port, will be subject to Customs Inspection and must obtain a Customs Clearance.
Agents:
2 Crew Lists.
Loading Certificate.
Safety Radio Certificate
Safety Equipment Certificate.
Register.
1 Transire from previous South African port.

PILOTAGE: Pilotage is compulsory and Pilots are provided by the Marine Department of Portnet. Pilots are transported by helicopter or a pilot tug.

Boarding points are determined by the Pilot, but generally speaking will be within an area approximately 3 nautical miles S.E. of South breakwater.

Pilot ladders to be clean and comply with Solas Regulations.

Vessels with freeboard in excess of 9.0 m. must have accommodation ladder rigged in conjunction with the pilot ladder, which must be 2.0 m. above sea level, manropes must be provided. Pilot hoists not accepted.

Also see "Restrictions".

Helicopter Pilotage Conveyance Service:
1. A 24 hour Helicopter Pilot/Conveyance Service has been introduced at the Port of Richards Bay.
2. Masters are to comply with "The International Chamber of Shipping" (ISBN 0906270 02 2) Guide to Helicopter/Ship Operations with special reference to the Safety Check List and night operations.
3. Masters are further to advise, in the 24 hour notice of ETA to the Port Captain, the availability and position of the following facilities.
   (a) A landing area, or
   (b) A winching area only.
   Forward information to: Telex No. 631119 or
   Fax No. 0351-905-3061.
4. Helicopter rendezvous areas are as follows:
   (a) For a light draft vessel – A circle with radius 0.4 miles centred on Lat. 28° 50' S., Long. 32° 08' E.
   (b) For a deep draft vessel – A circle with radius 0.5 miles centred on Lat. 28° 50' S., Long. 32° 09' E.

All vessels other than those engaged in helicopter operations are instructed to keep clear of these areas.

At night: Vessels engaged in helicopter operations are to exhibit the lights described in Rule 27 (a) of the International Regulations for Preventing Collisions at Sea.

ANCHORAGES: 3 to 5 nautical miles South East of the South Breakwater but not opposite Entrance or North of Entrance, which is a prohibited entry area.
Quality of Bottom: Sandy.
Note: Anchorage is similar to Durban and in high S.W. winds anchorage is not safe, and vessels are inclined to drag anchor. In high N.E. winds, caution should be exercised.
Shipmaster's Report: August 1995.

The ship's anchor became entangled with the chain of an anchor lost by another vessel. To free our ship, we had to cut our anchor chain and abandon our anchor with 2 shackles of chain attached in position Lat. 28° 52.89' S., Long. 32° 08.05' E.

Later, Port Control admitted verbally to our Pilot of knowing of 8 such anchors and chains lost in the port outer anchorages, but did not publicise it as they did not know their exact positions. While in port, we were also advised by a surveyor that there are now to public knowledge 45 lost anchors and chains littering this anchorage.

RESTRICTIONS: *Marine Traffic Hours:* 24 hours a day, except for vessels that do not meet the ballast draft requirements, which will only be handled at pilot's discretion.
MAX. SIZE: LOA Max. 314 m. Beam max. 47.25 m. Draft max. 17.5 m. D.W. Limit max. 170,000 d.w.t. Larger vessels may be accommodated on request to the Port Captain.
Minimum Ballasted Condition on Entry:

Length	*Draft – Fore*	*Draft – Aft*
Under 250 m.	2% of length	3% of length
over 250 m.	2.5% of length	3.5% of length

HEALTH: Radio Pratique must be obtained by cabling Port Health – Durban using the standard international procedure for working. See "Radio".

Derat Certificates valid for six months are issued by Port Health as are exemption certificates.

RADIO: *Arrival Advice:*

To "Port Health Richardsbay" – direct through Durban Radio – between 24 hours and 48 hours prior arrival – advising ETA, last port, date sailed, number of crew, full inoculation/vaccination status, and state of health of crew, and requesting Radio Pratique. Port Health will cable vessel directly, either granting Pratique or requesting further details.

To "Portcaptain Richardsbay" during normal port working hours, otherwise to Port Control Signal Station outside hours – direct through Durban Radio – 48 hours prior arrival, advising ETA, draft, freeboard and reason for call at Richards Bay.

Port Control: Fax: (0351) 9053061. Telex: 631119 SA.

VHF: Vessels can communicate with Port Control on Channel 16 VHF, watch is maintained continuously, working channels – 12, 9, 11, 13 and 14. When at anchor, listening watch must be kept to receive berthing instructions.

TUGS: Tug attendance is compulsory. Tugs will supply a working wire or wire-polyprop combination, with a messenger attached. Ship to send heaving line to tug. Tugs are owned and operated by Portnet and consist of the following:

Voith Schneider (4 tugs) 4,000 h.p. Bollard Pull 43 tons.

Tugs change crew at 0600 hrs., 1400 hrs. and 2200 hrs. on Monday to Friday, and 0600 hrs. and 1800 hrs. on Saturday and Sunday.

STEVEDORES: *Cargo Working Hours:*

Portnet: 24 hours, 7 days a week, except Good Friday, Christmas and New Years Day.
Richards Bay Coal Terminal: 24 hours, 7 days a week.

MEDICAL: Richards Bay: Bay Hospital (7 km. from port).
Empangeni: Empangeni Clinic (20 km. from port).
Contact ship's Agent if doctor/dentist services are required.

BERTHING: Harbour Authorities provide berthing gangs.

Berth No.	*Type*	*Length* (m.)	*Depth* (m.)	*Permissible Draft* (m.)	*Cope Level* (m.)
Die Duine:

Launch Jetty		170	−4.0	N/A	+3.0
Inner Anchorage		No limit	−19.0	17.5	N/A

Fendering: All commercial berths are fitted with rubber fendering. Berths No. 301 to 304 are fitted with cylindrical fenders with an outside diameter of 2.0 m. Similar fenders with an outside diameter of 1.6 m. are fitted to Berths No. 609 to 707.

Bridgestone type SM 800 H × 3.0 m. L are fitted to Berth No. 209.

General Cargo Berths: Berth No. 609 is served by rail tracks and has a surfaced back-up area. It is currently used for general and abnormal/heavy cargo working. The berth can also accommodate Ro/Ro vessels.

CARGO HANDLING FACILITIES: Dependent on availability, Berths No. 701 – No. 704 can also be used for general cargo working. No stacking area is available behind Berths No. 703 and No. 704. The repair berth at Small Craft Harbour can also be used by general cargo vessels with a limited draft. There is only limited rail access to this berth.

General Cargo:

(a) Combi Terminal (Portnet):

Covered storage: 24,700 sq.m.
Open storage: 240,000 sq.m.
Cargo includes: Aluminium ingots, bagged cargo, containers, copper cathodes, granite, logs, paper, pulp, steel and timber.

(b) *Bulk Metal Terminal (Portnet):*

Covered storage: 4,500 sq.m.
Open storage: 104,000 sq.m.
Cargo includes: Feros, lumpy chrome, pig iron and steel.

Bulk Cargo:

(a) Dry Bulk Terminal (Portnet): The Dry Bulk Terminal has developed into one of the world's largest and most sophisticated multi-purpose bulk handling facilities.

Export covered storage facilities:
GP 1 and 2: 13,500 sq.m. each (fitted with scraper reclaimers).
GP 3: 8,240 sq.m. (fitted with a scraper reclaimer).
GP 4: 3,670 sq.m.
Storage bins: 32 bins with a capacity of 3,300 cu.m. each.
Silos: 3 silos with a capacity of 5,000 cu.m. each.

Export wharfside equipment:
One pneumatic ship loader (exclusively for wood chips): Design load rate of 750 t.p.h.
Two general purpose loaders: Design load rate of 2,500 t.p.h.

Export commodities includes: Andalusite, chrome sand, clay, copper concentrates, ferro fines, fertiliser, rock phosphate, rutile, titanium slag, vanadium slag, vermiculite, wood chips and zircon.

Import covered storage facilities:
Coking coal shed: 11,900 sq.m.
Fertiliser shed: 6,036 sq.m. (operated by a private concern).

Import wharfside equipment:
One general purpose grab unloader: Free digging rate of 1,250 t.p.h.
One mobile harbour crane: 30 ton SWL (100 ton heavy lift).
Two pneumatic unloaders (Exclusively for alumina and petcoke): Free digging rate of 500 t.p.h. and 600 t.p.h. respectively.
Portable conveyor belts: 2 sets, 100 t.p.h. with ship's gear.

Import commodities includes: Alumina, coking coal, fertiliser, petcoke, potash, rock phosphate and sulphur.

(b) Richards Bay Coal Terminal (Private concern): Richards Bay is world renowned for the large-scale coal export operation owned and operated by the Richards Bay Coal Terminal Company.

Four berths (301-304): 300 m. each.
Depth: 19.0 m.
Permissible draft: 17.5 m.
Maximum beam: 47.25 m.
Maximum LOA: 314.0 m.
Quality of bottom: Sandy to hard.
Equipment: Loading rate:
Shiploaders 1 and 2: Nominal: 8,500 t.p.h.
Average: 5,000 t.p.h.
Shiploader 3: Nominal: 10,500 t.p.h.
Average: 6,500 t.p.h.
Working range of boom: 15° up to 15° down.
Height of boom above HWOST with loader at maximum working elevation: 21.6 m.

Other Private Operators:

(a) Richards Bay Bulk Storage: A terminal for the storage and shipping/receiving of liquid chemicals is operated by Richards Bay Bulk Storage (Pty) Ltd.

(b) Richards Bay Bunker Terminal: A terminal for the receiving and storage of heavy fuel oil and marine gas oil is operated by Richards Bay Bunker Terminal.

(b) FFS Bunkers: Bunker and slop service to vessels by bunker barge.

DENSITY: 1026.

FRESH WATER: Available at the berth. Rate approx. 25 t.p.h.

FUEL: Heavy and Medium Fuel Oil. Diesel Oil and Gasoil are available by pipeline at Berths 301, 302 and 209 only. Bunkering can take place concurrently with loading.

There is a bunker barge with capacity 800 tonnes H.F.O. and 120 tonnes B.G.D. Pumping rate 150 tonnes/hr. for H.F.O. (180 cst) and 40 tonnes/hr. for B.G.D.

Stems for bunkers should be placed with normal bunker suppliers who will arrange delivery through the bunker supply company at Richards Bay. All vessels calling for bunkers must either be gas free or inerted before they will be permitted to enter the port.

CONSULS: In Durban.

REPAIRS: Written approval must be obtained from the Port Authorities via the Agents for vessel to immobilise engines to carry out repairs. Repairs may be carried out at the berth. Radio/radar repairs are undertaken by technicians travelling from Durban.

SURVEYORS: Bureau Veritas, Captain G.A. Chettle, Inspectorate M&L P&I Association, Acme, S.G.S., Kirkmarine, Maritech Services, Lamberg & Ass.

GANGWAY/DECK WATCHMAN: Recommended.

OPENING/CLOSING HATCHES: By crew.

CUSTOMS ALLOWANCES: See "Cape Town".

REPATRIATION: Possible.

AIRPORT: There is an airport at Richards Bay 26 km. from the Coa Berth, 8 return flights a week to Johannesburg, where internationa connections can be made.

TIME: GMT plus 2 hours.

HOLIDAYS: See "General" before first port.

POLLUTION: The Port Authorities demand that no vessel using the por shall discharge any garbage, refuse, vegetable or food matter, dec cleanings, polluted bilge water, oil or rubbish of any description in th vicinity of or in the port of Richards Bay.

Heavy penalties will be imposed for breach of the regulations.

Vessels arriving in ballast must have clean ballast on board, a deballasting takes place alongside the berth. Dirty ballast pumped int the harbour will incur heavy penalties for pollution.

POLICE/AMBULANCE/FIRE: Police Tel: 0351-31608. Ambulance/Fi Tel: 0351-31991 or VHF Channel 16 (Port Control).

TELEPHONES: Telephones are not readily available at the bert Application for the service should be made through the Agents i advance.

All telephone calls made will be charged to the vessel's account.

Caution: With direct dialling available internationally it is strong recommended that telephones are placed in the custody of a responsi officer to avoid abuse.

SHIP SUPPLY SERVICE: A helicopter service through Court Repub Helicopters, P.O. Louis Botha Airport, Durban L, 4029. Tel: (031) 42610 Telex: 624246.

Rendevous position Port Dunford Lighthouse 090°T 23 nautical mile

Note: Aircraft can carry out approximately 100 mile round trip in 1 hou

A launch service is carried out by the Portnet via the Pilot launch. Th efficient operation is dependant on the work load of the Port at the tim service is required.

Prior to helicopter/launch being permitted to leave, signed author from Port Health, Customs and Immigration must be obtained.

SHORE LEAVE: There are no restrictions on shore leave for crew. Cr members proceeding to Durban require written permission fro Immigration Authorities.

IDENTIFICATION CARDS: Seaman's Book sufficient.

GARBAGE DISPOSAL: Richards Bay Municipality makes collectio twice a week. Drums and skips are provided alongside. Tel: 31111.

WASTE OIL DISPOSAL: FFS Refiners operate slop collections. Sho tanks are 160 tons capacity. Barges will be made available. Collect at any berth to be arranged by Agent.

SEAMAN'S CLUBS: Seafarers Club, P.O. Box 382, Richards Bay 39 Tel: 973491/2. Chapel services, snack bar, library, postage serv available. Bus service from ship. Football matches and safari tours be arranged, games room and curio shop available.

Also see "General".

CURRENCY: South African Rand (R).

Only restriction is that seamen cannot buy dollars unless they h cashed in dollars previously (proof or receipt required).

GENERAL: The harbour and the quays are owned by Portnet.

Provisions: Stores and provisions can be obtained through local Ship's Chandlers.

Game Parks: National Parks Board Game Reserves (Hluhluwe and Umfolosi) are within easy reach of Richards Bay by car.

Car Hire: Cars can be hired, through the Agents at reasonable cost to officers and responsible crew members only. An International Driving Licence is required to make use of this service.

Arrival Time at Richards Bay Harbour: The official arrival time of a vessel is taken to mean the time agreed upon with the Signal Station, when the vessel crosses into the proclaimed area of Richards Bay Harbour, as defined.

Draft Regulations: Very strict control is maintained at South African Ports, concerning the overloading of vessels, either on arrival, on sailing, whether calling for bunkers or loading cargo.

Attention is drawn to the fact that the Plimsoll Mark is the only standard by which the Authorities at South African Ports will determine a ship to be overloaded or correctly loaded. *No allowance whatsoever will be made for vessels sagging.* A corresponding mean draft where this occurs is unacceptable to the Authorities. It should be noted that Richards Bay is in the *Summer Zone throughout the year.*

Masters are liable to severe penalties for contravention of these regulations.

Also see "Shipmaster's Report".

Gas free Pre-requisite: Incoming vessels must be gas free, or inerted prior to entry and where applicable, certificates to be issued by qualified chemist who will check that aspect, prior to vessel's entry into Port.

OBO's, whose last cargo was oil, must report this to Port Control on arrival.

Swimming: Seamen are advised that it is dangerous to swim in the sea or the Harbour, due to the presence of sharks and dangerous tidal conditions.

Furthermore, the rivers and fresh water lakes in Zululand are infested with Bilharzia and crocodiles, and you are similarly advised not to swim in these places.

Walport Films: Films/Video tapes are available. One week's notice required if possible.

Foreign Currency: One week's notice required. Currency must have been received from abroad before being released by banks.

Laundry: Excellent service available. Contact ship's Agent.

Drugs: (Agent's Notice).

We feel it is important that we draw your attention to the very severe penalties which can be imposed in this country on any person selling, buying or even using any habit-forming drug such as heroin, marijuana, LSD, dagga, etc. We cannot impress on you strongly enough the need for you to advise all members of your crew, and passengers too, of these strict laws.

The following are some of the penalties laid down in the Act on the Abuse of Dependence Producing Substances and Rehabilitation Centres (No. 41 of 1971), which came into force on 1st December, 1971.

(a) Any person who deals in any *prohibited* dependence producing drug or any plant from which such dependence producing drug can be manufactured or who deals in any *dangerous* dependence producing drug or any plant from which such a drug can be manufactured can be on a first conviction sentenced to imprisonment of not less than 5 but not exceeding 15 years and in the case of a second or subsequent conviction to imprisonment of not less than 10 but not exceeding 25 years.

(b) Any person who has in his possession or uses any *prohibited* dependence producing drug or plant or who has in his possession or uses any dangerous dependence producing drug or plant from which such drug can be manufactured can on a first conviction be sentenced to imprisonment of not less than 5 but not exceeding 15 years.

(c) Any person who deals in any potentially dangerous dependence producing drug can be sentenced to imprisonment of up to 10 years.

(d) Any person who has in his possession or uses any *potentially dangerous* dependence producing drug can be sentenced to imprisonment of up to 5 years.

Any person who deals in:

(1) Prohibited or dangerous drugs or plants, can be sentenced to:
    (a) First conviction – 5 to 15 years' imprisonment.
    (b) Second or subsequent conviction – 10 to 25 years' imprisonment.
(2) Potentially dangerous drug can be sentenced to imprisonment of up to 10 years.

Any person who uses or possesses any:

(1) Prohibited or dangerous drug plant can be sentenced to:
    (a) First conviction – 2 to 10 years imprisonment.
    (b) Second or subsequent conviction – 5 to 15 years imprisonment.

Combined Seafarers Club (Missions to Seamen): This has been opened outside the Customs Gate near the Harbour Administration Building. Souvenirs, refreshments, etc. are available as well as a telephone for making overseas calls. The premises have a wine and malt licence (i.e. wine and beer are served).

Seaman's Club – Bus Service: Contact Agent for information.

Shopping and Business Centres: The shopping and business centres are at Meerensee and Arboretum, Richards Bay, also at Empangeni where the majority of personal needs are obtainable.

One hour film processing service available from Camera Vision, Kit's Photos and Photo First.

Vaccinations: Arrangements can be made for Health Authorities to attend on board for vaccinations.

Tides: Tidal change between HWOST and LWOST is approx. 2 m.

Prevailing Winds: South Westerly in Winter; North Easterly in Summer.

DEVELOPMENTS: Construction of new berths (No. 607 and No. 608) will be completed in October 1997.

SHIPMASTER'S REPORT: May 1987 (Updated 1992).

Pilot and tugs most competent. Berths good and well founded. No draft or air draft restriction for a Panamax at this port.

There was a full and efficient hatch inspection made. Loading was rather spasmodic, due to some very heavy rain, shore plant breakdown and the plant being used for other purposes. A small amount of grab damage was done but this was repaired promptly.

There was no time claimed against the vessel.

Quantity of cargo requested was 63,000 tonnes ±5%. We loaded 62,834 tonnes. There is a strict draft survey and a very heavy penalty for overloading.

Cargo completed	1010 hrs.
Pilot on board	1051 hrs.
Clear of Berth	1109 hrs.
Commenced Passage	1200 hrs.

Agent's Notices:

Rain Whilst Loading:

Following serious complaints from receivers, we have been requested by Principals to instruct Masters of all vessels loading coal at Richards Bay to ensure that all hatches are closed during periods of rain or threatening rain except for those hatches which are being loaded. Furthermore, we would request your written advice of any knowledge you have of foreign objects that may have been loaded with the cargo, giving details of the particular hatch and approximate position of such objects.

Loading Regulations:

May we courteously draw the following to your attention – We have already had numerous vessels loading at Richards Bay which have sailed from Port in an overloaded condition.

The Port Captain has advised that in future any vessels attempting to sail overloaded will be detained until the vessel is deemed to be correctly loaded. It is an offence to submerge a vessel's Load Line during any stage of loading, regardless of the amount of ballast still to be pumped out.

Your attention is drawn to the fact that the Plimsoll Mark is the only standard by which the South African Port Authorities will judge a ship to be correctly loaded. No allowance whatsoever will be made for a vessel's sag and the corresponding mean draft. Allowance for fresh water can be made provided the physical draft does not exceed 17.5 m. and that the Pilot will require proof from the Surveyor that the allowance is correct in terms of the density of water at the time of survey.

In view of the foregoing, we would ask that the Chief Officer and not the Surveyor completes the loading operation. The Surveyor will only calculate the cargo actually on board at the time of completion.

As the loading appliance is presently capable of a rate in excess of 6,000 tonnes per hour, extreme care should be taken by ship's personnel to ensure that the vessel is correctly loaded.

The Department of Transport have advised that in terms of International Convention on Loadlines 1966 Article 12 and fourth schedule of the Merchant Shipping Act No. 57 of 1951 (as amended) a vessel is permitted to submerge the Summer loadline when floating in water of density less than 1,025. The amount by which the loadline may be submerged is proportionate to the difference between the actual density of the water in which the vessel is floating and 1,025. This amount is commonly referred to as the Dock Water Allowance. The Master therefore has the legal right to make use of this provision when the density of the water in which his vessel is floating is other than 1,025. It is the duty of the Master or his appointed representative to calculate the Dock Water Allowance. Density used when determining Dock Water Allowance should be Density in Vacuo. When a draft survey hydrometer which is calibrated to read weight in air is used to determine the density, an added air buoyancy correction should be applied.

Kindly acknowledge receipt of the above by signature to copy attached hereto.

Maximum permissible draft in Richards Bay is 17.5 m.

AUTHORITY: Portnet, P.O.Box 32696, Braamfontein 2017, Johannesburg, South Africa. *Tel:* (011) 7737299. *FAX:* (011) 7738304. *Contact:* The Chief Executive.

Richards Bay: Portnet, P.O.Box 181, Richards Bay 3900. *Tel:* (0351) 905-3440. *Telex:* 631052. *FAX:* (0351) 905-3333. *Contact:* G. Martin, Port Manager. N. Govender, Manager – Combi Terminal. Captain D. W. Brink, Port Captain. C. King, Bulk Manager.

AGENT: King & Sons (Pty.) Ltd., P.O.Box 9 (Ventura Road), Richards Bay 3900. Tel: (0351) 973140. Telex: 631088. Fax: (0351) 973030. Cables: Baronet Richards Bay.

SALDANHA BAY: 33.02 S. 17.58 E. (See Plan)

LOCATION: Saldanha Bay is on the West coast of South Africa, about 60 miles North of Cape Town. It is a natural harbour, partly protected by an artificial breakwater.

FORMALITIES/DOCUMENTS: Vessels arriving at the port should fly the following flags:

Their own National Flag.
The South African National Flag.
"I" (India) flag until the ship is cleared by Immigration.
"Q" (Quebec) flag if Radio Pratique has not been granted.
"H" (Hotel) flag while the Pilot is on board.

A single officer will handle all the formalities for Customs, Immigration and Port Health. He will board the vessel immediately after docking.

The following documents and papers will be required:

5 copies Crew List.
1 copy Stores List.
1 copy Crew Effects List.
1 copy Animal List.
1 copy Narcotics List.
1 copy Passenger List.
1 copy Maritime Declaration of Health.
1 copy List of Sealable Goods (Form DA5).

The following certificates must be available for inspection:
Safety Radio Certificate.
Load Line Certificate.
General Safety Equipment Certificate.
International Oil Pollution Prevention Certificate.
Cargo Safety Construction Certificate.
Derat Certificate.
Passenger Safety Certificate (only if more than 12 passengers).

If the ship has come from a South African port, she will also require a Transire (Form DA4) and a Light Dues Certificate. Light dues are paid at the first South African port of call and are valid for one month.

Should a Derat Certificate be due to expire, the Customs Officer can extend it for one month. Should a new certificate be required, a Port Health Officer must travel up from Cape Town.

The bond will be inspected and sealed by the Customs Officer. A list of crew allowances for cigarettes, wine, etc., appears on Form DA5. Should the ship remain in port for longer than 4 days, arrangements can be made with the Customs for the Bond to be opened and an additional issue made.

Safety and Pollution Control: After docking, all ships will be boarded by the Pollution Control Officer, who will require a check list to be completed. Ballast will be inspected and bilge discharge valves sealed. In the case of tankers, the Pilot who docks the ship is required to inspect the TOVALOP Certificate and the Civil Liability Convention Certificate. A Safety Check List must be completed and handed to the Pilot, who will then, on behalf of the Port Authority, issue the ship with a permit to load or discharge crude oil.

APPROACH/PILOTAGE: Pilotage is compulsory. Masters should call Saldanha Bay Port Control on VHF Channel 16 when 12 miles from the Pilot Station for instructions. Pilots will board ballasted ships 4 miles off the coast and laden ships 6 miles off. When making an approach, ships should stay South of the 080° leading marks.

Pilot ladders must conform to IMPA standards. Hoists are not acceptable. Masters should anticipate having to manoeuvre to make a lee, particularly in Winter. The Saldanha pilot boat is a 20 m. launch with an orange hull and white wheelhouse. It can be contacted on Channel 12 or Channel 16.

A Cape Town based helicopter is occasionally used if conditions are severe.

Note: The 12 mile time is recorded and a ship is considered "arrived" when she crosses betweeen North and South Head.

ANCHORAGES: Ships awaiting a berth can be anchored near the jetty, but are subject to port dues from the time they pass the outer channel buoys. They are required to take a Pilot for this. The approaches to Saldanha Bay are not a recommended anchorage, and should a vessel be required to wait off the port, Masters are advised to remain underway. St. Helena Bay, 40 miles North of the port, is the nearest good anchorage, although it is exposed to Northerly winds in Winter. Permission must be obtained, through the Agent, from the authorities for a vessel to anchor there.

RESTRICTIONS: *Port Working Hours for Shipping Movements:* Iron ore ships, tankers and concentrate ships are handled at any time day or night with the following exceptions:

1. All loaded tankers and vessels berthing at the ore/oil jetty with a draft of more than 14.0 m. are docked during daylight only.
2. Concentrate vessels with a draft of more than 6.0 m., which must use the Turning Basin to turn, will be handled in daylight only.
3. Ore ships which load to 21.5 m. draft must, when sailing, have at least 1.0 m. on the tide gauge when passing down the channel.
4. Concentrate ships which load to more than 10.5 m. draft must have the equivalent of the excess over 10.5 m. on the tide gauge when sailing.
5. Incoming tankers with a draft of over 19.5 m. must have the equivalent of the excess over 19.5 m. on the tide gauge when turning in the Turning Basin. If the tide is ebbing, the Pilot will decide whether there is sufficient time to complete the operation safely.

Minimum Draft Requirements: Vessels arriving at the Port of Saldanha must pump adequate ballast while still in open water (the minimum depth of the water in the waiting area is 13.7 m. below Chart Datum). The Master of the vessel is responsible for presenting the ship for loading with the proper trim and draft, keeping in mind the loading rate and loader clearance. A clearance safety factor of 2.2 m. is required. Minimum draft requirements will be stipulated by the Port Captain and will be dependent upon existing weather conditions. The following table gives an indication of such minimum draft requirements:

Vessel's length overall	*Forward draft*	*Aft draft*
183 m. (600 ft.)	6.0 m. (20 ft.)	7.5 m. (24 ft.)
213 m. (700 ft.)	7.5 m. (25 ft.)	8.5 m. (28 ft.)
244 m. (800 ft.)	8.0 m. (26 ft.)	9.0 m. (30 ft.)
274 m. (900 ft.)	8.2 m. (27 ft.)	10.0 m. (32 ft.)
over 274 m. (over 900 ft.)	8.5 m. (28 ft.)	10.5 m. (34 ft.)

Tide: 1.50 m. between MLWS and MHWS. All navigation and other charts refer to Chart Datum which is MLWS minus 0.26 m.

Turning Basin: Between the navigation channel and the end of the jetty is situated the main turning basin of 580 m. in diameter and 23.2 m. depth (LWOST). The approach to this basin is marked by beacons on the breakwater and the Eastern and Western extremities are marked by a red buoy and a green buoy.

Vessels with a draft exceeding 14 m. will be handled in the turning basin during daylight hours only.

Weather conditions may prevent entry:

1. Fog, mist, and continuous rain which affects visibility, and heavy swell or sea conditions which affect range action at the berth, manoeuvrability in the turning basin, or tugs towing hawsers within the harbour, will prevent entry.

2. Where poor weather conditions, or a weather forecast, allows the Port Captain to consider it inadvisable for a vessel to enter, he may instruct that the vessel shall not make a closer approach than 12 miles, or such other distance, to the port limits or coastline.

Weather conditions or range action which may cause a vessel to proceed to sea:

1. The Port Captain, or his deputy, may instruct a vessel to stop loading at any time.

2. If, in the opinion of the Port Captain, or his deputy, the movement of the vessel alongside the jetty or berth is excessive he may direct loading operations to cease.

3. The Port Captain, or his deputy, may at any time require a vessel to be removed from her berth and go to an anchorage, or to a safe distance at sea.

MAX. SIZE: *Draft:* At the Ore/Oil Jetty: For ships entering 20.5 m., and for ships departing 21.5 m. Vessels may be restricted to a departure draft of 21.25 m. if a swell is running.
At the Concentrates Quay: 11.5 m.
Size: Ore Berths: No restriction at present.
Tanker Berth: Maximum displacement of 300,000 tonnes permitted.
Concentrates Quay: Maximum length permitted is 200 m.
Note: Exceptions are permitted by the Port Authority according to the merits of the case.

HEALTH: Pratique should be requested 48 hours before arrival. Message to be addressed to "Porthealth Saldanha", and sent through Cape Town Radio. The message should include the following:

1. Name and nationality of vessel.
2. Port of departure.
3. Destination.
4. Health conditions on board.
5. Number of crew and passengers.
6. Type of cargo or in ballast.
7. ETA

Vessels arriving at the Port of Saldanha in quarantine will be inspected by Health Officer at anchorage or on arrival at the berth. Should the Health Officer board the vessel at anchorage, a proper accommodation ladder must be provided. All expenses shall be for vessel's account.

Masters are requested to have Maritime Health Declaration (one copy) at hand and ready for inspection, also vessel's last Derat or Exemption Certificate. Any person who cannot produce a Yellow Fever Certificate, if called for, shall be vaccinated before being allowed ashore.

All persons requiring medical attention should be available upon vessel's arrival. Agents will provide form of application to be given to doctor for persons requiring medical attention.

No contact with shore is allowed until Free Pratique is granted.

RADIO: *Notice of Arrival:* Notice must be given at least 72 hours before arrival and confirmed 48 hours, 24 hours and 12 hours prior to arrival, and the Port Captain kept informed of any change to the ETA.
The message must include the following information:

1. Arrival and departure draft.
2. Gross tonnage, deadweight and length.
3. Type of vessel.
4. Nature of cargo to be landed/shipped.
5. If a tanker or OBO, whether gas free or inerted and whether there are slops on board.
6. Any other special requirements.

This message should be sent through the vessel's local Agent to Saldanha Port Control (Telex: 522225 or Fax: (02281) 357427). When within VHF range, Masters should call Saldanha Port Control direct on Channel 16 to confirm ETA.

VHF: Saldanha Port Control is equipped for MF, HF and VHF services. Transmissions and reception on Channels 6, 8, 10, 11, 12, 13, 14, 16, 26, 27, 67, 68, 69, 73 and 74.

R/T transmissions on 2182, 1700, 2049, 2716 and 3164 kHz.

Pre-tuned reception: 2182, 1700, 1765, 2002, 2009, 2016, 2023, 2049, 2056, 2716 and 3164 kHz.

Vessels must contact Port Control directly on Channel 16 when 12 miles from the pilot station and be prepared to change to Channel 1 or 12 thereafter.

Channels 9, 11, 13 and 14 should be avoided unless instructed to use them by Port Control or the Pilot.

Berthing Instructions: Vessels are to request instructions from Saldanha Port Control 6 hours before arrival.

The Port Captain is organised to receive VHF, telex and telephone messages on 24 hour basis. Radio traffic by vessels at anchor is permissible in the Port of Saldanha, provided this is not done on the selected Saldanha Bay Harbour VHF Channels (9, 10, 11, 13, 14, 6 68, 69, 73 and 74) and be in accordance with International Regulations.

Tugs: The tugs operate with VHF Channels 1 – 28 and 60 – 88, an radio telephone.

RADAR: The Port Control is equipped with Radar which can have th approach channels and anchorages marked on the screen.

Port Control Building: The Port Control, operated by Portnet is locat on the hill, Hoedjiespunt. This office houses the Port Communication equipment and surveillance radar and is located in position: Lat: 3 01.70' S., and Long: 17° 57.77' E. It is manned on a 24 hour basis b signalmen under the control of the Port Captain.

A radio direction finding system is installed to facilitate the location vessels calling Port Control. This system is designed to monitor calli frequencies as follows:
1.6 to 4.6 MHz in the marine bands.
0.52 to 1.6 MHz in the broadcast bands.
150 to 400 kHz in the beacon bands.
And all VHF marine calling Channels.

TUGS: Tug service is compulsory at the Port of Saldanha.
Tugs available are:

1. Tug "Marcus" 3,960 b.h.p. diesel, Voith Schneider.
2. Tug "Jutten" 3,960 b.h.p. diesel, Voith Schneider.
3. Tug "Meeuw" 3,960 b.h.p. diesel, Voith Schneider.

The Master, on advice of the Pilot, must decide what tug assistan is required and requests for such tug assistance to be made to the P Captain 2 hours before arrival.

4 tugs may be required when deep drafted vessels are to be hand Whenever the Port Captain, or his deputy, requires a fourth tug, i may be available from Cape Town. All expenses and costs to be bo by the vessel involved.

Vessel's Tug Requirements: Conditions at Saldanha can vary at short notice and cannot be predicted accurately prior to a vessel's arrival. Ship Masters must be prepared for high winds of up to 100 km./hr., and heavy swells which can produce swell conditions in the approach channel of up to 5 m.

The following guidelines may be used for programming tug services:
2 tugs: Vessels of less than 14 m. draft.
3 tugs: Vessels more than 14 m. draft but less than 18 m. draft.
4 tugs: Vessels of more than 18 m. draft.

All vessels are turned and berthed "heading out" on arrival. This is to ensure that when a vessel has to leave there will be no difficulty in unberthing and proceeding to sea. Normally only 2 tugs are required to undock vessels and, sometimes, only 1 tug is needed.

Should weather conditions become unduly bad, or swell conditions on the berth cause heavy ranging action, it may be necessary for vessels to either proceed to sea or to an anchorage. Thereafter, when conditions moderate, the vessel will be re-berthed and complete loading.

BERTHING: Ore/Oil Jetty: The ore loading and oil jetty is of the finger type and consists of 25 caissons in line, 17 of which support a re-inforced concrete superstructure for the ore loading jetty, 4 are for the oil jetty and 4 serve as mooring caissons. The superstructure serves as a roadway and access way for the shiploaders and ancillary services.

All caissons except the mooring caissons are fitted with floating Yokohama type pneumatic rubber fenders of 3.3 m. diameter, 6.5 m. or 10.6 m. long. These fenders are positioned on both sides of the caissons of the ore loading jetty spaced 39.52 m. apart and on both sides of the oil jetty spaced from 45.43 m. to 46.32 m. apart.

Vessels are moored by means of single and double quick releasing mooring hooks fitted with capstans or fairleads. These hooks have capacities of 100 tons and 200 tons respectively.

The total length of the jetty is 991.65 m. and the total mooring length available is approximately 500 m. for iron ore loading vessels and 450 m. for oil tankers at depths of 23.00 m. below Chart Datum. The depth of the navigation channel is 23.20 m. below Chart Datum seaward of the jetty and the exit of the navigation channel is 23.70 m. below Chart Datum. A turning circle with a diameter of 580 m. and a depth of 23.20 m. below Chart Datum is provided in the navigation channel seaward of the jetty.

Departure from Berth: Vessels which complete loading iron ore during the period 0600 hrs. to 2200 hrs. must sail immediately the draft survey and documentation is completed.

Vessels which complete loading and are ready to sail after 2200 hrs. may, without incurring any extra charges, remain at the jetty and sail at 0600 hrs. the next morning. This provision is optional. If a Master wishes to sail immediately cargo work is completed, he may do so.

General Cargo Quay: This quay is 250 m. in length with a least depth of 12 m. alongside (LWOST). A fixed green light marks each end of the quay and a buoyed channel leads to the quay, with a least depth of 12.5 m., from the vicinity of the Western side of the ore berths. Immediately adjacent to the quay is a turning basin (not to be confused with the main turning basin at the end of the ore jetty), with a radius of 142.5 m. (285 m. diameter), which is marked by 2 red can buoys on its Western side and with a least depth of 12 m. (LWOST). The quay was originally designed for the export of lead, zinc and copper concentrates which are stored in a long shed, conspicuous on the edge of the bay and due West of the ore tippler building at the root of the causeway. Storage for 30,000 tons of concentrates are leased to Black Mountain Mineral Corporation. The concentrates are loaded into vessels by 2×15 ton cranes using specially made skips, each capable of taking 12 tons of concentrate, and transported to the quay on trailers drawn by tractors.

North Western Side of Bay:

New Small Craft Harbour: Below the Port Control Building at Hoedjies Point, and due North of it, is situated the new small craft harbour. West of this harbour and lying in a W.N.W.'ly direction is a fishing vessel quay extending for some 500 m. and ending at the Government Jetty.

Government Jetty: The Government Jetty is located on the S.W. side of the Harbour in an area known as Smitswinkelbaai. The jetty is for use by the local fishing industry and coasters. The dredged depth is 6.7 m. below Chart Datum and the length of the jetty is 100 m. plus 160 m. mooring dolphins. Small vessels can moor on both sides of the jetty.

MOORING: *Mooring Arrangements:* All vessels shall be moored at the ore loading/oil jetty with a minimum of 16 ship's lines, that is to say 4 head lines, 2 breast lines, and 2 back springs forward, and 4 stern lines, 2 breast lines, and 2 springs aft.

All head and stern lines should be of suitable man-made fibre rope.

All springs must have suitable strops of at least 15 m. length.

All breast lines should be of suitable man-made fibre rope throughout, but if this cannot be provided, similar rope strops 15 m. in length must be fitted.

All lines to be as strong as possible, of a non-chafe type and preferably not less than 75 mm. in diameter.

Wires generally are not suitable, unless fitted with strops.

Shore ropes are available to supplement ship's lines, for vessel's account. Application to be made to Port Captain, Pilot, or Berthing Master. Ropes to be handled by vessel's crew.

LOADING: *Iron Ore:* The ore jetty has 2 shiploaders fed by a single conveyor belt running from the dump at the base of the causeway. Only one loader can work at a time. The average rate is about 6,000 t.p.h. The minimum safe clearance required under the loader chute differs on either side. On the Eastern side, 24.5 m. is needed, and on the Western side 25.8 m. These heights are from Chart Datum and include a 2.2 m. safety factor.

Lead, Zinc or Copper Concentrates: These are loaded at the General Concentrates Quay by 2×15 ton cranes. The cargo is stored under cover at the base of the causeway and brought to the ship in 12 ton skips towed by tractors. The rate is about 250 t.p.h.

BALLAST: No dumping of dirty ballast or any waste or oil from any vessel is allowed while vessel is within harbour limits or within the South African waters. (Refer to Regulation 39 of the Portnet Regulations for the Harbours of the Republic of South Africa).

Ballast pumped from vessels whilst deballasting shall be continuously checked and controlled by the Port Captain and ISCOR during loading. Vessels failing to comply with the Port Captain's requirements shall be requested to stop deballasting operations and may be instructed to leave the Port of Saldanha.

All vessels must secure bilge systems while in the Port of Saldanha, and complete the Pollution Control Officer's check list soon after arrival.

All vessels must ensure that ballast tanks and piping systems are free of oil contamination prior to arrival. No slop handling facilities are available and no slop or dirty or contaminated ballast can be handled.

STEVEDORES: *Working Hours:*

Ore Berths: 24 hours a day, 7 days a week, all year round, weather permitting.

General Cargo Quay: Monday to Friday, other than public holidays. 0700 to 1630 hrs. (a second shift will be worked from 1900 to 0430 hrs., but only by special agreement).

Black Mountain Concentrates: 24 hours a day from 0700 hrs. Monday to 0700 hrs. Saturday. On request from ship overtime can be worked Saturday 0700 – 1900 hrs., and Sunday can be worked 0700 – 1500 hrs. All cleaning operations to be completed by stopping time.

MEDICAL: *Hospitals:* There is a fully equipped hospital in Vredenberg, 13 km. from Saldanha. Serious medical cases, however, will normally be referred to one of the hospitals in Cape Town.

Doctors: There are several doctors available in Saldanha and nearby Vredenberg. To expedite appointments, however, and to arrange for attendance on board, Agents should be consulted.

Dentist: There are several dentists available in the area, and in order to expedite appointments, Agents should be consulted.

TANKERS: The tanker berth is equipped with 3×16 in. Chicksan hydraulic arms. Special spooling pieces, supplied by the Terminal, are bolted to the ship's manifold to enable the arms to be attached. The maximum manifold height allowed is 19 m. The arms have very limited ranging capacity and are fitted with audible alarms to warn of their limits. The storage tanks are about 8 km. from the berth. A discharge rate of 10,000 t.p.h. can be attained depending on the back pressure. Also see "Berthing".

FRESH WATER: Fresh water can be supplied at the approximate rate of 35 t.p.h. Hose is available on the jetty but vessel's crew are required for connecting and disconnecting. Expenses for vessel's account.

FUEL: Heavy oil is not available. Diesel can be supplied by road tankers or drums. Blended fuel is available for small vessels at the Fishing Harbour.

CONSULS: There are no Consulates established in Saldanha, but the following countries are represented at Cape Town:

Argentina
Australia
Austria
Belgium
Bolivia
Brazil
Canada
Chile
Denmark
Finland
France
Germany
Greece
Israel
Italy
Japan
Monaco
Netherlands
Norway
Panama
Peru
Portugal
Spain
Sweden
Switzerland
Taiwan
United Kingdom
U.S.A.
Uruguay

REPAIRS: A slipway (under control of Cape Provincial Administration) for the use of the fishing industry, is situated N.W. of the Government jetty with a jetty for vessels using the slipway. The maximum dimensions of vessels using the slipway are 1,200 tons, 70 m. in length, 11 m. in beam and 5 m. in draft. A crane on the jetty can handle loads of up to 10 tons.

Several large ship repair companies operate from Cape Town:

Dorbyl Marine Pty. Ltd. Tel: (021) 475170. Fax: (021) 476038.

Globe Engineering Works Pty. Ltd. Tel: (021) 4484640. Fax: (021) 4484652.

CERTIFICATES: See "Documents".

CUSTOMS ALLOWANCES: Master: 400 cigarettes, 1 litre spirits and 6 litres or 1 case of beer. Chief Officer: 200 cigarettes, 1 litre spirits, 6 litres beer. Other Officers: 200 cigarettes, 1 litre spirits, 3 litres beer. Crew: 200 cigarettes only.

All books, films, cards, calendars and arms and ammunition to be sealed in the bond.

See "Cape Town".

AIRPORT: International Airport near Cape Town, about 2 hours by road. Military airport locally but special landing rights have to be applied for.

HOLIDAYS: See "General" before first port.

EMERGENCY CO-ORDINATION CENTRE: Saldanha Bay is a sub-centre for the main South African Rescue Control Centre at Silvermine, Cape Town. It is responsible for the section of coast between Dassen Island and the Orange River mouth.

TELEPHONES: A telephone is compulsory for tankers and is available to any other ship at the Master's request.

Overseas communications can be made through Cape Town Radio, on VHF Channels 16, 26 and 27, when at anchor.

BANKS: First National Bank, P.O.Box 31, Saldanha 7395. Tel: (02281) 42251. Fax: (02281) 43096.

SHIP SUPPLY SERVICE: As the Port of Saldanha is situated only 60 nautical miles North of Cape Town the "Off Shore Services" based there are used in the normal course of events.

The harbour tugs or launches could be utilised from Saldanha in the case of medical emergency in the close proximity to Saldanha Bay.

SHORE LEAVE: Allowed.

GARBAGE DISPOSAL: The Port Authority can provide a truck for the disposal of refuse. The ship's crew are responsible for loading the rubbish, which must be in plastic bags.

WASTE OIL DISPOSAL: No waste oil disposal. Minimal amounts in 45 gallon drums accepted as part of garbage removal. Arranged through Agents.

SEAMAN'S CLUBS: The Biblia International Mission have a recreation room on the jetty with an international telephone. Tel: (02281) 32350.

The Anglican Mission to Seamen is situated in the town itself and operates a bus service to the jetty. Tel: (02281) 42913, 41650. International telephone service available, and sports can be arranged. The Mission is open daily from 0830 hrs. – 2230 hrs.

CURRENCY: South African Rand (R).

DELAYS: Congestion is infrequent. Most delays are caused by heavy swell which makes it necessary to remove vessels from the jetty. These conditions are most common in Winter, and in a typical year, the port will be so affected as to be closed for 2 or 3 days. In general, some movement can be expected on the berth and ships should be well secured. A buoy in the channel monitors the swell height continually. The swell is associated with depressions passing the Cape and is heralded by a strong N.W.'ly wind which later backs round to the South.

NOTICES: Letter to Ship's Agents from Port Captain.

Notification of Expected Arrival, Departure and Shifting of Vessels: In order to facilitate more efficient Marine services in the Port of Saldanha, in the future, Agents and Fishing Companies using these facilities are requested to please conform with the following requirements.

(a) Harbour Regulation No. 2. Notification of the Expected Arrival of Ships. See attached No. I.

(b) Harbour Regulation No. 18. Notice to leave a Harbour. See attached No. II.

The basic intention of these notices is to give sufficient warning of an intended shipping movement to my office so that work and staff may be schedule to conform with general requirements. It should be noted that a minimum of 3 hours notice should be given, with regard to (b) while moves required after 1700 hrs. should be advertised before that time.

In order to simplify the required notifications you are requested to please make use of our telex facilities as this is far more efficient than either telephone or letters. In this respect I attach No. III a telex format for a Docking Notice, and No. IV, a telex format for a Sailing/Shifting Notice.

It can be expected that an advertised Sailing/Shifting Time may be subject to alteration and in this respect telephone advice will be sufficient for two alterations but a further telex is required for a third alteration as well as for every third alteration thereafter.

Any alteration of Sailing/Shifting Time given within 30 minutes of advertised time will not be accepted and a charge will be raised against the vessel accordingly.

Please conform with these requirements.

Signed:
Port Captain.

No. I – Notification of Expected Arrival of Ships:

The Owner or Agent of a ship that intends to call at a harbour shall as early as possible, give notice in writing to the Port Captain and the Port Goods Superintendent at such harbour of the expected date and time of arrival of the ship, and shall give particulars in such notice as to the nature and quantity of cargo to be loaded or discharged, bunker or other requirements and other matters of importance.

No. II – Notice to Leave a Harbour:

The Master shall give at least 3 hours notice in the prescribed form to the Port Captain at his office of the time his ship will be ready to leave the harbour. If he intends that his ship should leave outside ordinary working hours, such notice must be handed in at the office of the Port Captain before 1700 hrs. on the day of departure, or before 1700 hrs. on the preceding day, as the case may be.

No. III – Notification of Arrival:

Telex No. (Port Control) 5 22225. Fax: (02281) 357427.
Telex No. (Agent, Fishing Co., etc.).
To: The Port Captain, Saldanha.
From: (Name of Agency, Fishing Co., etc.).
Time: Date: Pro. No.:
Name of Vessel: Type of Vessel:
ETA: (Date and Time).
Gross Tonnage: d.w.t.: Length:
Draft: Fwd.: Aft.:
Requirements: (Nature of service required. If FW required. Cargo to be landed/shipped. Is vessel gas free, inerted or clean and any other information which may be applicable).
Name of Person requesting service.
Telex No.: 5 22225
Telex No.:

No. IV – Notification of Sailing or Shifting:

Telex No. (Port Control) 5 22225. Fax: (02281) 357427.
Telex No. (Agent, Fishing Co., etc.).
To: The Port Captain, Saldanha.
From: (Name of Agency, Fishing Co., etc.).
Time: Date: Pro. No.
Name of Vessel:
ETD: Draft: Fwd. Aft.
Requirements:
Name of Person requiring service.
Telex No.: (Port Control) 5 22225.
Telex No.: (Agent, Fishing Co., etc.).

GENERAL: *Fresh Provisions and Stores:* This service is provided by ship chandlers who operate from Cape Town. If the quantity to be loaded is large, a lighter will be used to bring them to the ship.

Chandling International Limited, 53 Carisle Street, Paardeneiland, 7405 Cape Town. Tel: (021) 5112336.

Hanill Ship Chandlers, P.O.Box 303, Paardeneiland, 7420 Cape Town. Tel: (021) 5110347.

Removal of Rubbish: Arrangements are available for the removal of rubbish and can be made through the Agents.

Weather: The climate is temperate. Average high temperatures year round are 20°C (68°F) and average low temperatures are in the region of 11°C (52°F). Sea water temperatures average 16°C. Prevailing winds in Summer are S.S.E'ly and in Winter N.W'ly. Rainfall figures are approximately 300 mm. per annum. Saldanha Bay is a Winter rainfall area. Fog occurs generally in the March to August period. Currents – there are no sea or thermal currents in the harbour area. Tidal currents generally will not exceed 1 knot.

Electricity: Can be made available at the ore jetty and the general cargo quay.

Compressed Air: Available ex-quay on application to Portnet via the Agents.

Cranes: A mobile crane can be hired via the Agents.

Sporting Facilities: Can be arranged for all sports through the Missions to Seamen, Saldanha.

Fishing Vessels: Saldanha is an important fishing harbour and all types of fishing vessels, from ocean going trawlers to small motorised dinghies, can be encountered in the approaches and entrance. At certain times of the year, with the onset of different fishing seasons, congestion in the area due to fishing vessels will become noticeable.

Engines: Vessels are requested to have main engine(s) ready and watch maintained when alongside. Permission to deviate from this must be obtained from Port Captain in writing.

Gas Free Certificate: Tankers or OBO's which have carried petroleum products on a previous voyage, and have slops on board, must have a Gas Free Certificate issued by a qualified chemist before being allowed to dock. The ship's Agent will arrange for a chemist to board with the Pilot for this purpose. The ballast water will be inspected and must not have an oil content of more than 2 parts per million. Inert gas systems must be working satisfactorily.

SHIPMASTER'S REPORT: February 1995.
Vessel: VLCC (270,000 d.w.t.).
Documentation required:
10 copies Crew List.
1 copy Ship's Stores List.
1 copy Crew Declaration.
1 copy Stowaway Declaration.
1 copy Arms and Ammunition Declaration.
1 copy List of Live Animals.
1 copy Maritime Declaration of Health.
1 copy Vaccination List (Yellow Fever).
1 copy Derat or Exemption Certificate.

In addition, Pilot requires to sight valid TOVALOP and Civil Liabili Certificates before permission to discharge or load is permitted.

Large vessels, if arriving loaded, are not permitted within 12 miles o the coast until approaching to embark Pilot. As no safe anchorages outside that distance, vessels of this type, if required to wait for a berth or for daylight/high water, as in our case, must cruise or drift outside that distance until berthing time.

The pilot station has recently been moved, and there is now only one boarding point for vessels either arriving or leaving, with North Hea bearing about 058° at distance of 4.9 miles.

Moorings requested on this occasion were 5 head/stern, 2 breast an 3 springs, i.e. 10 lines each end, a total of 20 moorings. The moorin operation for a vessel of this type can take about 2 hours, and total tim from Pilot boarding to all fast can be 4-5 hours.

During stay alongside, Agent, Cargo Surveyor and Discharg Supervisor stay on board. A Duty Pilot stays on board nightly betwee 1800 hrs. and 0600 hrs., in case of weather problems, and durin discharge, firemen and anti-pollution personnel attend constantly on a shift system.

Stores/provisions were obtained from a chandler in Cape Town, an are brought to Saldanha Bay by road, transferred to a barge in the fishin harbour, then brought to vessels at the oil and ore quays.

An oil boom, for anti-pollution purposes, is now commonly used t surround vessel during cargo operations.

There are some fairly basic amenities in the nearby town (6.5 mile from quay), as Saldanha Bay is mainly concerned with fishing and fis processing. Specialist services are available from Cape Town, abo 1.5 hours by road. There is no public transport between Saldanha Ba and Cape Town, and ship's personnel wishing to visit Cape Town mu make private arrangements. The Customs Authorities are still a bit wa of persons doing so.

The Missions to Seamen provide a minibus service at nominal co to transport crew members to the Mission in the town.

Weather is very unpredictable. It is Summertime (at present), but du to an "unseasonal" storm, it became necessary for us to suspe operations, disconnect, and call for tugs to help prevent the vess breaking her moorings. A few lines did part, but tugs managed to ho vessel safely. Pilot came when requested, and remained until dang had passed, although at one point it seemed likely that we would ha to let go and put to sea, which we managed to avoid.

In Winter, vessels can on occasions have greater problems, and t have to unmoor and leave. It would be advisable to any vessel of t type coming to Saldanha Bay to have some spare moorings availa for such eventualities.

AGENT: See "Cape Town".

Spain

GENERAL:

TANKERS: The following free translation was received from a major oil company in 1991. Issued by Ministry of Transport, Tourism and Communications, Madrid.

Decree of 17th April 1991, which regulates the anchorage of tankers in the jurisdictional waters and/or exclusive Spanish Economic Zone.

The diversity of tankers of different nationalities, using the S.W. Spanish zone for anchorage purposes whilst awaiting definite orders in respect of discharge ports, requires the adoption of special measures to safeguard the maritime traffic, the natural and environmental resources of the corresponding maritime areas, or of those zones which in the future might be subject to similar operations.

Therefore, and in fulfilment of the dispositions of the International Convention regarding territorial waters and adjacent zones of 1958, and of the International Convention of Intervention of 1969, as well as the ruling National Legislation on Territorial Waters, constituted by Law 10/77 dated 4th January, Law 15/78 dated 20th February, on the Exclusive Economic Zone, and Law 22/88 dated 28th July, on Coasts, following the proposal by the General Directorate of the Merchant Marine, I Decree:

First: The following regulations will be applied to those tankers not having a destination for full or part cargo, for a port or terminal in Spain, and wishing to use the jurisdictional waters or the exclusive Spanish Economic Zone for anchoring, whilst awaiting orders, instructions, or due to any other circumstances other than the innocent passage as defined in Article 14 of the Convention of Geneva of 1958.

Second: The tanker, which in the above mentioned circumstances proposes to anchor, must previously apply for authorisation from the Spanish Maritime Administration, through the corresponding Harbour Office, or directly to the General Directorate of the Merchant Marine, including in the application, the following information:

(a) ETA at anchoring area at intervals of 72, 48, 24, 12 and 6 hours before arrival.
(b) Port of Origin and Destination.
(c) Type and quantity of cargo.
(d) Name, address, telephone, telex and fax numbers of the Owners, Charterers, P & I Club and representatives thereof in Spain.
(e) Number of crew, nationalities, professional qualifications of the Master, Officers and Engineers, and indicating the issuing Authority/Body of said qualifications/titles.
(f) Estimated stay at anchorage area.

Third: In the light of the information received, as previously referred to, the Spanish Maritime Authorities will confirm or deny permission. If permission is granted, the tanker must fully comply with the following conditions:

(a) Anchor in the geographic position indicated by the Marine Authorities.
(b) Upon arrival at the anchorage point, the tanker will be subjected to a safety inspection, the result of which may influence the anchoring authorisation.

Fourth: For the tanker to lie at anchorage, the following obligations must be complied with:

(a) Contract a tug with 6,000 h.p. minimum, fitted with means to combat contamination, which is to remain on "Stand-by" for the duration of the vessel's stay. The Master of the tanker to facilitate any information requested by the Master of the tug.
(b) To maintain at all times the propulsion equipment ready for immediate functioning, the fire extinguishing system lines pressurised, display regulation anchoring signals, and all deck and bridge lights illuminated during the hours of darkness.
(c) To check the geographical position every 15 minutes and record it in the Log Book every hour. The Master to communicate by radio every 4 hours with the Harbour Office, advising the exact anchoring position and of any incident which might affect the security of the vessel and/or of the crew, especially when the anchoring position has been changed due to external causes.
(d) To maintain the corresponding bridge and engine room watches, and verify starting system in both locations. At least one qualified officer and 2 lookouts must be present on the bridge at all times.
(e) Whilst at anchorage, no cargo transfers allowed, no tank cleaning or repairs to the engines, or on deck, without the corresponding authorisation.

Fifth: Any change or transfer of crew is strictly prohibited whilst the tanker is at anchor, unless there is a justified cause, and a previous authorisation from the Spanish Marine Authorities has been obtained.

Sixth: A vessel breaking any of the requisites and obligations stated in this Decree, cannot remain at anchor, and must depart immediately for the open sea, independently of any sanction which might be imposed in accordance with the legislation in force.

Transitory Disposition: Vessels (when this Decree becomes enforceable), which find themselves in the circumstances mentioned in the first paragraph, must apply immediately for the required authorisation, and comply with all the requirements of this Decree.

Final Disposition: This Decree will enter in force from the date on which it is published in the Official State Bulletin.

Madrid, 17th April 1991.
Minister of Public Works and Transports.

AGUILAS and HORNILLO: 37.24 N. 01.35 W. (See Plan)

DOCUMENTS: See "Almeria".
PILOTAGE: Hornillo port has no Pilot. The Pilot of Port of Aguilas which is less than a mile from Hornillo, does pilotage services of both. To enter both ports of Hornillo and Aguilas, anchor mile or a mile and half distance from entrance of Aguilas. Wait for Pilot with engine stopped. To call Pilot give three long blasts several times. Pilot's launch is small motor boat painted white, with letter "P" painted on both sides of boat. During night it carries white light on top of mast, and 8 ft. lower a red light, besides the usual lights.
RESTRICTIONS: It is not possible to enter Hornillo port during dark. Wait till dawn outside Aguilas.
MAX. SIZE: Length up to 160 m., draft about 29 ft.
HEALTH: See "Almeria".
TUGS: None in port and not necessary for either port. If necessary, tugs are available from nearby Port of Garrucha.
BERTHING: Aguilas port has a commercial quay with a berth area about 300 m. and depths of between 8 m. – 12 m. Hornillo port has a pier to handle minerals with berth area of 90 m. to 100 m. and depths between 6 m. – 10 m.
BULK HANDLING: 2 conveyor belts. 1×400 t.p.h. capacity and 1×100 t.p.h capacity for grain and other bulk cargoes.
STEVEDORES: Team of stevedores who belong to "Port Workers' Trade Unions" (Sindicato de Obreros Portuarios).
MEDICAL: Master can send cables to consignee requiring this kind of service. There are a number of doctors and a hospital.
FRESH WATER: Available by pipeline at berths.
FUEL: There are no supplies of fuel in either port.
REPAIRS: No facilities.
GANGWAY/DECK WATCHMEN: Not necessary, usually this is done by crew.
OPENING/CLOSING HATCHES: Usually this is done by crew.
REPATRIATION: Facilities for effecting crew changes exist. Repatriation can be done by train to Madrid and by plane from there.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: See "Almeria".
POLICE/AMBULANCE/FIRE: Ambulance and fire services can be requested from Port Authority. If the police services are required call to "Caseta de Vigilancia" of the Civil Guard in either port.
SHORE LEAVE: Crew members are allowed ashore.
GENERAL: Hornillo port is used only for loading and discharge of minerals, and for this purpose a pier is provided with a railway. The nearest port of Aguilas, less than a mile distant on the West, is the commercial port, with a quay for loading/discharging and a crane of 10 tons capacity.
AUTHORITY: Ayudante de Marina, Capitan del Puerto, Ayudantia de Marina, Aguilas, Murcia, Spain. *Tel:* 968 41 10 74.

ALCANAR: 40.34 N. 00.33 E. (See Plan)

GENERAL: Alcanar is a port owned and used by Cementos del Mar S.A., which has a cement factory very close to Alcanar port. Products normally loaded are cement and cement clinker. On the other hand, slag, pyrites, coal, pozzolana (volcanic sand) and gypsum are products generally unloaded for factory consumption.

Sant Carles de la Rapita is 4 miles away N.E. from Alcanar port.

DOCUMENTS:
3 copies Crew List.
3 copies Passenger List or negative.
3 copies Cargo Manifest or Master/Ballast Declaration.
1 copy Stores List.
1 copy Crew Manifest.

PILOTAGE: Pilotage is compulsory and service permanent. Pilot is informed by Agent of vessel's ETA, given 24 hours in advance. When vessels approach the Alcanar Fairway Buoy, Pilot will board. The pilot boat is white with a black "P" painted on the side. Contact Pilot Station on VHF Channel 14. Pilot Tel: (977) 74.05.01/74.08.04.
ENTRY/DEPARTURE CHANNEL: Channel is about 3 miles long and 250 ft. wide, maximum draft is 38 ft., straight and lies 328° from Fairway Buoy. There are 10 pair of buoys marking both channel sides.
ANCHORAGE: 0.5 miles S.E. from Fairway Buoy is the advisable anchorage.
Caution: North limit of a fishing seabed is located about 1.25 miles and bearing 215° from Fairway Buoy. Special care should be taken when approaching Fairway Buoy in order to keep clear of the seabed.
RESTRICTIONS: Draft only. Vessels carrying dangerous cargo should get permission to berth prior to arrival.
HEALTH: Pratique is obtained immediately after berthing. In case of suspected disease of fever on board, the Master must radio Agent in order to inform Health Office in time.
RADIO: Radio Costera of Barcelona and Tarragona.
VHF: See "Pilotage".
TUGS: Available to assist berthing. Tugs normally join vessel at breakwater entrance. The following tugs are available: 1×1,750 h.p., 1×1,200 h.p. and 1×800 h.p.
BERTHING: Maximum depth at berths and in channel is 38 ft. Contact Pilot for draft information.

There are 3 berths as follows: No. 1, 22 ft. depth. No. 2, 38 ft. depth, and No. 3, 38 ft. depth.

Conveyor Belt: At all berths, cement is loaded by means of conveyor belt, maximum loading rate is about 350 t.p.h.

CRANES: 2×15 ton cranes at Berth No. 2. 1×6 ton crane at Berth No. 3.
STEVEDORES: 24 hours notice required in order to arrange gangs. Unloading rates depend on type of cargo.
MEDICAL: Any kind of medical service can be arranged if information received in time.
FRESH WATER: Plentiful supply of water by means of hoses from the pier to vessel.
FUEL: Can be supplied by truck, but 24 hours notice required.
CONSULS: See "Tarragona".
REPAIRS: See "Sant Carles de la Rapita".
SURVEYORS: S.G.S., Vista Alegre N. 32-3, 43540 Sant Carles de la Rapita. Tel: (977) 74.22.24/54.22.28. Fax: (977) 54.11.00.
GANGWAY/DECK WATCHMEN: Not compulsory, but advisable at night.
OPENING/CLOSING HATCHES: Normally opened/closed by the crew, otherwise according to Charter Party. Lashing must be carried out by the crew.
CERTIFICATES: SOLAS, Load Lines, I.O.P.P., Derat, Register and Tonnage Certificates.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle wine/spirits per person. Any excess must be declared and locked/sealed. Any infringement of the regulations will subject the vessel to the immediate imposition of a heavy fine and confiscation of excess.
AIRPORT: Reus Airport situated 97 km. and 45 minutes by car, regular services to Madrid. Barcelona Airport situated 196 km. and 2 hours by car, worldwide destinations and arrivals.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer (Last Sunday in March – late September).
HOLIDAYS: September 11th.
POLICE/AMBULANCE/FIRE: Local Police Tel: 73.00.04. Guardia Civil Tel: 74.00.58. Ambulance/Red Cross Tel: 73.70.03. Firemen Tel: 70.00.80.
AUTHORITY: Capitania Maritima, 43540 Sant Carles de la Rapita, Tarragona, Spain. *Tel:* (977) 74.00.59. *Cables:* Capitania Maritima, Sant Carles de la Rapita.

Comissio de Ports de Cataluya, Zona Portuaria II-III, Ronda General Mitre No. 117, 08022 Barcelona, Spain. *Tel:* (93) 211.31.16. *FAX:* (93) 418.60.12. Branch office at Sant Carles de la Rapita, Tel: (977) 74.04.56.

ALCUDIA: 39.50 N. 03.08 E. (See Plan)

DOCUMENTS:
3 copies Crew List.
2 copies Cargo Manifest.
2 copies Crew Personal Effects Manifest.
PILOTAGE: Compulsory. Call Pilot one hour before arrival on VHF Channel 16 and hoist "G" flag when in sight of the port.

Pilot Station Tel: (971) 89 01 79.
ANCHORAGE: With the end of the breakwater bearing 000° at a distance of 7 cables and a depth of 12.0 m.
RESTRICTIONS: Tankers and L.P.G. Carriers berth during daylight only.

Vessels with a list are not permitted to berth.

Keel clearance varies according to berth.
MAX. SIZE: Vessels with maximum draft berth at the breakwater on heading 045° and are not allowed to turn on arrival or departure.
RADIO: Palma Radio.
VHF: Pilot station keeps watch on Channels 16 and 14.
TUGS: Not available.
BERTHING:

Quay	*Length* (m.)	*Depth* (m.)	*Remarks*
Breakwater	90.0	5.90	3×15 ton cranes
	157.0	5.50	(16 cu.m. each)
Rivera	150.0	5.50	2×15 ton cranes
	80.0	5.50	20 m. Ro/Ro Ramp
Gas Butano Jetty	80.0	5.50	8 in. and 4 in. shorelines

CRANES: See "Berthing".
BULK HANDLING FACILITIES: Coal, fertilisers and salt discharged at a rate of 500 t.p.h. by shore cranes.

Cement in bulk stored in 2×1,500 cu.m. tanks; loading and discharging connections; 4 in. shore line with length 110 m.

Asphalt receiving tanks of 3×1,900 cu.m. and 1×800 cu.m.; 8 in. shore line of 345 m. length and one connection.
SPECIALISED CARGO HANDLING FACILITIES: Two Ro-Ro platforms 20 m. wide. Facilities for handling containers.
STEVEDORES: Ordered by Agent. Working hours: 0800 hrs. – 1200 hrs. and 1400 hrs. – 1800 hrs.
MEDICAL: Hospital facilities available.
TANKERS: 2×2,500 cu.m. tanks for fuel oil; distance to tanks 450 m.; shore line 8 in.; no slop facilities.
DENSITY: 1026.
FRESH WATER: Available by gravity feed of approximately 7 t.p.h. Cost 70 pesetas per ton.
FUEL: Marine diesel available from 4 points along the quay, loading rate with pump is 12 t.p.h. Also available by truck with 30 ton capacity.
FIRE PRECAUTIONS: Dispersant liquid and floating boom (140 m.) on sight.
CONSULS: Located in Palma, 50 km. from Alcudia Port.
REPAIRS: Small repairs can be undertaken.
DRY DOCKS: Travel lift of 100 tons capacity at the yacht marina.
SURVEYORS: Watson Gray Espanola de Control S.A.
GANGWAY/DECK WATCHMEN: Not required.
HATCHES: Opening and closing by crew.
CUSTOMS ALLOWANCES: Quantity permitted for each crew member to be held out of bond: 200 cigarettes, 2 litres of wine and 0.75 litres of spirits.
REPATRIATION: Full facilities available.
AIRPORT: Palma Airport.
TIME: 1st October – 31st March GMT plus 1 hour. Last Sunday in March – 30th September GMT plus 2 hours.
HOLIDAYS: 1st January, 6th January, 1st May, 15th August, 12th October, 1st November, 8th December and 25th December. Local Holidays: 29th June and 2nd July.
POLICE/AMBULANCE/FIRE: Local Police/Fire: 54.59.17. Medical: 54.59.68. Red Cross: 54.54.21, or VHF Station Channel 73. Harbour Master: 54.53.01. Customs: 54.71.03.
SERVICES: Magnetic compass adjusting available.
SHORE LEAVE: Crew members allowed ashore.
IDENTIFICATION CARDS: Seaman's Book is sufficient.
GARBAGE DISPOSAL: Not available.
WASTE OIL DISPOSAL: Only in tanker trucks. Maximum capacity 20 tons. Require details through agent. Service carried out by Sevmar. Fax: 402499. Tel: 400408, 400561, 400758.
SEAMAN'S CLUBS: No seamans clubs. All facilities available.
CURRENCY: Spanish Peseta (Pta.).
DELAYS: Bunkering undertaken during daylight. Special permission required for bunkering at night.
GENERAL: *Weather Forecasts:*

Fax: (971) 404626.
Time: 1100 hrs. – 1300 hrs. (G.M.T.).
Telex: 688474 (anytime).
Recorded message: (971) 403600 or 403511 (anytime).

Warnings: In Winter, from November to March, winds from N.W. direction up to Force 6/7, make it especially dangerous when berthing and unberthing.

In Summer, from May to September, seaplanes land and take off close to commercial port entrance (taking sea water).

Vessels with dangerous goods are permitted on Alcudia roads. Anchoring point for lightening with this kind of cargo must be applied for from the Port Authorities.

At the end of June to December/January atmospheric pressure could affect the sea water level, thus the maximum drafts allowed may be reduced.
DEVELOPMENTS: Work in progress at the commercial port and the marina (See "Plan").
AUTHORITY: *Contact:* Captain Miguel Suner Mari, Pilot, Urbani "Lago Esperanza" Margallons No. 21, 07408 Puerto Alcudia, Majorca, Spain. Tel: (971) 890179, 890180. Fax: (971) 890179.

ALGECIRAS: 36.08 N. 05.26 W. (See Plan)

DOCUMENTS: *Clearance Inwards of Vessels:*
1 copy Maritime Health Declaration.
5 copies Crew List.
2 copies Cargo Manifests: 1 on entry, 1 on sailing.
2 copies Manifests in Transit: 1 on entry, 1 on sailing.
If Vessel is in transit:
5 copies Transit Passenger List.
2 copies of Arrival Documents.
2 copies Lists of Passengers who have disembarked or embarked.
Tankers:
2 copies Cargo Manifest: entry, sailing or ballast.
PILOTAGE: Vessels entering port must call the Pilot by Internationa Signal Code, sound, light or VHF.

The pilot boat is painted with a black "P" on both sides at its wides part. By day it will fly a blue flag with the letter "P" in white. At night, will show the International Pilot Lights. The area where the Pilot boar is a circle 0.5 miles radius with its centre 1 mile East of the Wester end of the breakwater extremity (red light).
ANCHORAGE: Vessels awaiting the Pilot can anchor to the North Barranco Lighthouse in water 30 m. depth under indications given the Pilot by VHF.
RESTRICTIONS: Vessels may enter by day or by night.
MAX. SIZE: Port of Algeciras: No restrictions as to length, max. dr 16.0 m.
Tankers: Gibraltar Refinery: Max. length 315 m., max. draft 20 m.
Monobuoy: Depth of water 60 m. Designed for vessels up to 500,0 d.w.t. Largest vessel accommodated to date: 423,000 d.w.t. with dr 22.9 m.
HEALTH: Free Pratique is obtained automatically when Authorit board on arrival and Maritime Declaration of Health is completed. case of suspected disease or fever on board full details should be s by radio to Sanidad Maritima, Algeciras, before arrival.
RADIO: Tarifa, Mijas, Aranjuez Radio and Cadiz Radio. Vessels bou for the Gibraltar Refinery must announce their arrival on VHF to the P Captaincy using Channel 16 for calling and Channel 13 communication.

Agent requires 72, 48 and 24 hours notice of arrival.
TUGS: 8 tugs up to 2,250 h.p., working in accordance with instructio from the Pilot. It is usual for vessels to provide tow-lines.

BERTHING:

Darsena Sur (South Dock):

Name	*Length* (m.)	*Depth* (m.)	*Usage*
Dique Norte	1,125	15 – 32	Bunkers
	260	8	
	420	10	
	700	14	
	315	16	
Muelle de la Isla Verde	250	13	General cargo containers and solid bulk cargoes.
	250	12	
	248	11	
	150	9	Ro/Ro
Muelle de la Galera (South)	75	4	Passengers
	305	6	Ferries
	110	10.5	Ferries
Muelle de la Galera (North)	176	10.5	General cargo and Ro/Ro
(East)	110	10.5	Fast ferries and general cargo
Muelle del Navio (East)	520	14	General cargo and containers
	644	16	
(South)	507	14	General cargo, containers
(West)	180	10.5	Ro/Ro

CRANES: See "Bulk Handling Facilities".

STEVEDORES: Ordered by vessel's Agent on basis of Master's ETA.

MEDICAL: Doctors and hospital facilities available. International vaccination certificates only required if vessel is proceeding from an infected area.

BULK HANDLING FACILITIES: *Cement:* Discharged to 2 storage silos at Muelle de la Isla Verde. Rate 200 t.p.h.

Containers: 4×30 ton Paceco (Sealand) gantry cranes at Muelle de la Isla Verde and 4×30.5 ton transtainers.

3×40 ton Paceco Post-Panamax and 3×50 ton Noell Post-Panamax cranes, 15 transtainers, 32 truck heads, 50 yard chassis, 648 reefer points at Maersk Espana Terminal at Muelle del Navio (270 m. length).

2×40 tonne Paceco cranes at Terminals Algeciras at Muelle del Navio (270 m.).

Scrap iron and metal products: Acerinox Quay: Length: 250 m. Depth 9.5 m. 3 jib cranes, capacity 25 tons each.

TANKERS: Refineria Gibraltar (C.E.P.S.A.) – 5 berths for tankers up to 283 m. length, 2 of which can accept draft up to 65 ft. Loading/discharge lines are 12 in., 10 in., 8 in., 6 in. and 4 in. Refineria Gibraltar has 2 slop tanks each of 600 cu.m. capacity which can accept oily residues.

Berth	*Length* (m.)	*Depth* (m.)
South	700	19 – 20
North	380	17 – 19
North	300	17 – 19
North	115	6
South	115	6

There are 20 hydraulic and 6 manually operated loading arms. Max. pressure permitted 150 p.s.i.

Monobuoy: Operated by Compania Espanola de Petroleos S.A. (C.E.P.S.A.).

Location: Lat. 36° 10' N., Long. 05° 24.8' W.

Depth: Approx. 60 m.

Anchorage: Pilot will advise anchorage in accordance with weather conditions.

Prohibited Anchorage: Vessels are not to anchor within 0.3 miles of the monobuoy or within 150 m. of the underwater pipeline which runs in a N. 20° E. direction from the buoy to the Terminal onshore.

Pipelines: There are two underwater pipes, one 42 in. for crude oil and one 16 in. for bunkers.

Navigation Aid: Light: Fl. 3 every 8 seconds ("U") Range 5 miles. Height above sea level 6.0 m.

The buoy is also equipped with a radar reflector 7 m. above sea level, "Racon" letter "U" and fog signal manually operated with characteristic 3 blasts every 3 seconds ("U" in Morse code).

The floating hoses display white flashing lights 70 m. apart, 20 flashes every 60 seconds. Range 1 mile. Height above sea level 0.75 m.

Charts: Spanish: No. 3500 and 3503. British: B.A. No. 1448.

Communications:

Telegraphic Address: Spanoil, Algeciras.

Telex Address: 78007 Cepsa E.

Telegraphic Communications: Once the vessel has left the port of loading, Master must send a telegram via Aranjuez Radio, giving the following information:

(a) Name of vessel.
(b) ETA in GMT.
(c) Amount loaded per Bill of Lading.
(d) Specific gravity.
(e) Maximum draft.
(f) Capacity of tanks.
(g) Slops in the cargo.
(h) Whether it has a central bow installation, in which case give dimensions.
Where not, indicate type, characteristics and distance to the stem.

If vessel is to effect loading operations, once it has left its unloading port, Master must send the following telegram:

(a) Name of vessel.
(b) ETA in GMT.
(c) Quantity of cargo required.
(d) Amount of dirty ballast and deballasting time.
(e) Capacity of tanks.
(f) Amounts of slops and kind.
(g) Whether it has a central bow installation, in which case, give dimensions.
Where not, give type, characteristics and distance to the stem.

If the cargo receiving points are of a different type to 16 in. or 12 in. standard ASA 150 lb. this must be communicated both in the case of a vessel coming to load and one which will be discharging.

Within 72 hours of arrival, the Master must send a second telegram including the following information:

(a) Name of vessel and Master.
(b) ETA in GMT.
(c) Amount of fuel required.
(d) Additional requirements.

Within 48 and 24 hours prior to arrival, he must send further telegrams confirming his ETA.

Radiotelephone Communications: As soon as the vessel is within VHF range, contact must be made with the Pilots or the Port Captaincy of the "Gibraltar" Refinery on Channel 13 to receive instructions with regard to berthing, this station listens out 24 hours a day.

Notice of Readiness: Will be accepted by the Monobuoy Berthing Master, when the vessel is in all respects ready to commence operations.

Notice of Readiness will be accepted under either of the following situations:

(a) When the Master receives the Monobuoy Berthing Master or,
(b) When the vessel has anchored in the anchorage area.

Port Closed: The Notice of Readiness will not be accepted when port closed.

Port closure periods are considered to be such when the weather conditions prevent vessels coming alongside and berthing. The decision to close the port is made by the Marine Authority.

Berthing sequence: Vessel will berth normally in strict order of arrival and any alteration will be duly communicated and sufficiently in advance.

Services and Facilities:

Pilotage: The Pilotage service is obligatory and the Corporation is available permanently. The waiting area for Pilots is between Lat. 36° 07.5' and Lat. 36° 08.5' N. and Long. 5° 24.0' and Long. 5° 25.0' W.

Mooring: The Monobuoy Berthing Master will board the vessel in the vicinity of the buoy together with a foreman, 2 deckmen and 2 divers and will assist the Pilot and crew respectively in the berthing operations. These services are provided free of charge and the personnel remain on board during the whole duration of operations during which food and accommodation of an adequate nature must be provided.

Tugs, launches, mooring equipment: Tugs and/or launches can assist the vessel in the operations of berthing and unberthing under the direct control and supervision of the Pilot and the Monobuoy Berthing Master. There are also launches for transporting crew members ashore.

Consignee: The Compania Espanola de Petroleos, S.A. at its "Gibraltar" Refinery, has a Consignee department. Vessels utilising this service must send their radiograms to the following address:

Compania Espanola de Petroleos, S.A.
"Refineria Gibraltar",
San Roque (Cadiz) – Spain
Telephone: 698060.
Fax: 698773.
Telex: 78007 Cepsa E. Telegrams: Spanoil (Algeciras).

Arrival Documents: The following documents are required:

6 copies of the Crew List
1 Negative Passenger List
3 copies of Passenger List if any onboard
2 copies of the Cargo Manifest for Algeciras
1 copy of the Cargo Manifest for Cargo in Transit
2 copies of the vessel's Manifest List, including bunker, oil, tobacco, alcohol, medicine, belonging to the vessel.
2 copies of a List of the Crew's and Passengers' Personal Effects.

The maximum quantity of tobacco and alcohol permitted for each crew member and passenger outside the manifest is 200 cigarettes and 1 litre bottle.

Free Pratique: It is not necessary to advise the Health Authorities prior to arrival unless there is any sickness on board.

Free Pratique is granted when the vessel is visited by the Health Official at the anchorage or when it is berthed at the Monobuoy and the following documents will be required:

1 Health Declaration
1 Crew List
1 Passenger List or
1 Negative Passenger List

The Health Official will inspect the Derat Certificate or Exemption. This Certificate can be drawn up or renewed at Algeciras if required.

Doctor: Medical Service, if required, can be obtained via the Agent and will be sent as quickly as possible.

Fuel Bunkers: Fuel Oil is supplied via the Monobuoy.

Apart from the advice by radio to the local Consignee, owners must contact Campsa-Madrid, advising them of the type and quantity of bunkers required on arrival.

(The suggestion above is based on the fact that in Spain all supplies are effected directly by Campsa through the authorised refineries).

Direct contact with Campsa by the Owner, and the transfer of funds for the supply, required by the local Agent prior to bunkering taking place.

Oils: A majority of international companies have stocks of oil in the country, requirements to be advised via their Agent sufficiently in advance in order to prepare documentation and delivery. This delivery will not be made whilst the vessel is moored at the Monobuoy carrying out loading or unloading operations since it has to be effected by barge or a tanker type tug. Only vessels operating with inert gas are excepted.

Water: This is supplied by a 350 ton vessel and must be requested 48 hours in advance via the local Agent. There is no water line via the Monobuoy.

Victualling and Provisions: All kinds of stores obtainable in Algeciras and deck and machinery supplies can also be provided, requirements are to be communicated to the Agent or Consignee by radio.

All deck and machinery supplies will be supplied by launches or tugs prior to berthing or after unberthing at the Monobuoy.

Spares to be supplied from abroad for vessels at Algeciras must be sent to the airport of Malaga, the airport of Seville or the airport at Jerez, addressed to the Master of the vessel in question and consigned to the local Agent at Algeciras.

Goods sent by TIR should be despatched to Malaga for Customs clearance.

Repairs: Only minor repairs can be carried out by local workshops. In the event of major repairs being required, there is at Cadiz, which is 120 kilometres away (approx.), all types of workshops and equipment. Any kind of repair which might leave the vessel without means of propulsion is absolutely prohibited whilst it is berthed at the Monobuoy.

Classification Societies: Lloyd's Register, Plaza Alta 7. Tel: (956) 662889.

Other Societies have a representative.

Telephone Numbers: Area Code (956)

Ambulance	604144

Mooring: Preparation for Mooring: Vessels must have in position a Pilot ladder and/or hoisting ladder or a gangway which is safe and firmly protected for immediate use and sufficiently long to reach the Monobuoy Berthing Master's launch.

For vessels with a freeboard of 40 ft. or more, the gangway must be extended, lowered and the platform must not be more than 10 ft. from sea level, a Pilot ladder shall also be provided for boarding the platform.

Vessels must provide a lee on the port side for the embarkation or disembarkation of Monobuoy Berthing Masters.

Vessels must have prepared on the forecastle and in the bow section the following:

(a) 2 mooring cables of polypropylene if possible.
(b) 2 veering cables 5 in. circumference, min. length 300 ft.

Vessels must have ready amidships and on the port side the following:

(a) Derrick equipped and ready to lift equipment from the launch.
(b) Mooring shackles.
(c) Wire and equipment for connecting hoses.

Note: If vessels moor with the aid of tugs, the Port Pilot will indicate the number of tugs to be used and the cables required.

Mooring at the Monobuoy: The Monobuoy is equipped with a cable 19 in. in diameter and 180 ft. long (55 m.) and with a breaking strain of 795.6 tons, its ends having collars and special cable protections with corresponding shackles. The shackle which connects it to the Monobuoy has a test strain of 688.8 tons and this is connected to a meter, which indicates at any time the strain to which the whole assembly is subjected. The shackle placed at the other end has a test strain of 510 tons and is connected to a length of chain of two different dimensions, its total length being 40 ft. (12 m.). The first 25 ft. (8 m.) are of 4 in. ending in two lengths of 702 mm. length and 440 mm. wide, and which are connected to the remaining 15 ft. (5 m.) of chain with a dimension of 2.75 in. which ends in two open links 478 mm. long and 293 mm. wide. The end of this length of chain is connected by means of a shackle S.W.L. 40 tons to a plaited cable of polypropylene 11 in. diameter and 250 ft. (76 m.) long, known as the approaching cable. The end of this cable is identified by means of a small 12 in. diameter buoy connected to it by means of a 0.5 in. guy and 5 ft. long. The weight of the length of chain mentioned above is supported by a cylindrical buoy 3,600 kg. in weight.

When the vessel is close to the Monobuoy the crew must pay out the end of the veering cable through the central fairlead or nearest alternative lead available on the port side, whilst at the same time, various flexible cables 16 in. or 10 in. are made fast on board, according to the tonnage, to each bitt and also to the bow, and if there is no central fairlead available, onto the bitts on the port side. Once on board, the chain will be made fast to the cables by means of two 4 in. or 2.5 in. shackles according to the type of cable to be used. Where the vessel has a "Smit Bracket" or similar type of berthing fitment, the chain will be made fast to this. Vessels of less than 150,000 d.w.t. will be connected to the 2.75 in. chain and those exceeding this tonnage will be connected to the 4 in. chain.

Whilst the vessel is berthed at the Monobuoy a tug will remain alongside in the event of it being necessary to remove the vessel from the Monobuoy, in which case she must have available at the stern a very good towing line.

Turbine vessels which may have their propellor turning, must go astern so as not to come close to the buoy and cause damage.

Connection and Disconnection of Hoses: General: The Monobuoy has two floating hoses 20 in. in diameter for discharge and loading which end in 3×16 in. diameter sections, each for direct connection having an approximate weight of 7 tons. The hoses will be hoisted and connected by the crew of the vessel in collaboration with the foreman and two deckmen from the Terminal. The Monobuoy Berthing Master will assist the vessel's officers in the connection operations. For supply of bunkers there is a 12 in. diameter hose available with a weight limit which is less than those mentioned above.

Derricks: All tankers operating at the Monobuoy must have a derrick with minimum capacity of 10 tons on the port side.

Flanges: The connecting flanges are 16 in. ASA for loading/unloading and 12 in. 150 ASA for bunkers. In the event of vessels not having flanges of these dimensions or reducers, this should be notified by radio 72 hours in advance.

Ballasting and Deballasting: Anti-pollution precautions: The vessel's Master must take the necessary measures so that there is no loss of dirty ballast and is responsible at all times for damages and costs which may originate from this.

Scuppers: Before commencing operations the scuppers must be closed.

Sea Valves: During the operation of ballasting, the tightness of the sea valves and inlets must be checked, taking all precautions to obviate contamination of the sea.

Ballasting/Deballasting during the night: If these operations are carried out during the night, the area must be adequately lit.

Inability to receive dirty ballast: All vessels operating at the Monobuoy must arrive with clean ballast since there is no facility for reception of dirty ballast. In the event that they have residue arising from tank cleaning, this must be pumped to the slop tanks, which will be measured and which will be loaded by the "load on top" system.

Loading and Discharging:

Communications during loading/discharging: All communications relative to loading and discharging of vessels will be made via the Monobuoy Berthing Master who will remain in contact constantly with the Refinery Blending department via portable VHF on Channel 9. In the event of damage to the portable VHF, contact will be continued via the vessel's equipment.

Damage during communication: In the event of damage to all communications with the Blending Department, the loading and discharging operations will cease immediately.

Average of loading and discharge: The installation can operate at an average (max.) of 12,000 cu.m. per hour and at a working pressure of 12 kg./sq.cm., at the vessel's manifold.

The supply of bunkers can be effected at a maximum average of 2,000 t.p.h. with a working pressure equal to 12 kg./sq.cm.

Anti-pollution precautions: Contamination of the sea by hydrocarbons is absolutely prohibited; this prohibition includes pumping. The non-fulfilment of this regulation can give rise to serious penalties and for which reason all vigilance must be applied to stop leaks which would give rise to the immediate cessation of all operations, the Master/Owner being entirely responsible for costs or damages which might arise therefrom. Trays must be provided to catch any possible leaks during connection or disconnection of hoses to the manifold.

Valve closure due to excessive loading: No valve will be closed which may stop or reduce the movement of the product, whilst the shore pumps are operating unless prior advice has been given to and the approval obtained from the Monobuoy Berthing Master. The practice of closing the valves at the vessel's manifold must be obviated.

If a decrease in pumping rate is required the shore terminal will lower the pumping rate to the required level if requested.

The Master will be responsible for any damage which may arise from the sudden stoppage in flow due to faults on board the vessel. It cannot be overemphasised for this to occur it is extremely dangerous and may give rise to extremely extensive damage to the installation.

Sample intakes and empties: All vessels which have available inert gas installations in service must arrive with all tanks depressurised for the purpose of taking samples, emptying water, etc. Once this operation has been effected, tanks can be pressurised once again. Once discharge has been terminated, the tanks will be depressurised in order that they may be inspected.

Also see "General" before first port.

FRESH WATER: Available from all berths in Algeciras rate 30 t.p.h.-200 t.p.h. depending on location, and at Refineria Gibraltar. Can also be supplied by barge.

FUEL: Fuel oil and Gas oil supplied by C.L.H. at Dique Norte (North Breakwater) and Muelle de la Isla Verde.

Product	*Location*	*No. of Points*	*t.p.h. per Point*	*t.p.h. of Quay*
Heavy fuel No. 1	Dique Norte	4	200	200
Gas Oil "A"	Dique Norte	4	250	250
"B"	Dique Norte	4	250	250
"B"	Dique Norte	1	75	75
"B"	Dique Norte	1	20	20
"B"	Dique Norte	1	30	30
Heavy Fuel No. 1	Muelle de la Isla Verde	3	150	150
Gas Oil "A"	Muelle de la Isla Verde	3	200	200
Gas Oil "B"	Muelle de la Isla Verde	3	200	200

Bunkers can also be delivered by road tanker or barge.

CONSULS:

Denmark
El Salvador
France
Great Britain
Italy
Morocco
Netherlands
Norway
Panama
Sweden

REPAIRS: Small repairs afloat can be effected. No dry docks.

CUSTOMS ALLOWANCES: Max. quantity of tobacco permitted in ship stores is 3 kilos per crew member and 2 kilos per passenger. The quant that may be held out of bond is 40 grammes tobacco per person p day. Wine/Spirits. 1 decilitre per person per day may be held out of bon

GANGWAY/DECK WATCHMEN: Not available from shore.

OPENING/CLOSING HATCHES: Opened and closed by ship's crew

AIRPORT: Jerez, 110 km. Malaga, 120 km. from Algeciras and Gibralt

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: New Year's Day, 6th January, 19th March, Maun Thursday, Good Friday, Easter Saturday, 1st May, Corpus Chri 29th June, 25th July, 15th August, 12th October, 1st Novemb 8th December, 25th December.

POLICE/FIRE/AMBULANCE: *Algeciras:* Police Tel: 091; F Tel: 662222, Ambulance Tel: 604144. *Refineria Gibraltar:* Fire a Ambulance Tel: 698060.

SHORE LEAVE: Crew members are permitted to go ashore subjec police control.

AUTHORITY: Autoridad Portuaria de la Bahia de Algeciras, Apart No. 7, Paseo de la Conferencia S/N, 11207 Algeciras, Spain. *Tel:* (9 575400. *FAX:* (956) 585443, 585442. *Contact:* Jose Luis Estr Port Director.

ALICANTE: 38.23 N. 00.28 W. (See Plan)

PORT LIMITS: The line drawn from Cabo de las Huertas and Cabo de Santa Pola.

DOCUMENTS:

4 Crew Lists.
4 Passenger Lists.
10 Manifests for Cargo, including cargo in transit as well as cargo for Alicante. Tobacco and Cargo Manifests to be visaed by Spanish Consulate in port of origin.
All vessels' Certificates.

Shipmaster's Report: November 1988.
First Port: See "Cadiz".
Second Port:
Customs – "Ruta".
Agent – 1 Crew List.
Quarantine – 1 Crew List and 1 Maritime Declaration of Health.

PILOTAGE: The Pilotage service is permanent, and should be requested by means of the International Signals Code. It has a VHF radio station and can be called up on Channel 16. The Pilots have a motor launch painted white with the letter "P" on both sides, and flies a black flag with letter "P" in white, whilst at night it shows lights in accordance with the International Regulations. The launch meets vessels 1 mile from the green breakwater light, but in bad weather closer to that light. Pilots Tel. 5211137.

ANCHORAGE: Vessels waiting to enter port may anchor at a distance of 0.5 miles off the breakwater in depths of 16 m.

MAX. SIZE: Vessels of up to 225 m. length and 38 ft. draft (60,000 – 80,000 d.w.t.) can be berthed alongside. For tankers, max. draft 35.20 ft. (10.73 m.) 36,000 d.w.t. at Muelle 11. Also see "Berthing".

Discharge of butane is carried out at buoys located to the South of the port and with a limitation of maximum length of 140 m. between perpendiculars and 28 ft. draft.

HEALTH: Regulations as dictated by the International Regulations for Foreign Health are enforced.

RADIO: Radio-telephone communication through Radio La Costera, Alicante, medium frequency range approx. 220 miles and VHF approx. 40 miles.

TUGS: 2 tugs available to assist berthing of 1,500 h.p. Normally ship's lines used for connection with tug. Tug meets vessel at Port entrance.

BERTHING: The breakwater extends in a S.W. direction and vessels berth within the breakwater. Max. depth being available at the outer end of the breakwater, decreasing in the N.E. direction.

Muelle Principe de Asturias: Dry bulk terminal. Length 306 m. Depth 14.0 m.

Muelle 14: Extends along the length of the N.E./S.W. breakwater and depths vary alongside the berth from 12.5 m. at the S.W. end to 8 m. at the N.E. end. Length of quay – 970 m.
Muelle 12: Depth alongside 8.0 m. Length – 296 m.
Muelle 11: A combined tanker and container berth. Depth 10 m. Length – 360 m.
Muelle 10: Depths alongside the berth vary from 6 m. to 8.75 m. Length – 203 m.
Muelle 9: Depth alongside berth 8.75 m. Length – 103 m.
Muelle 7: Depth alongside berth 8.75 m. Length – 240 m.
Muelle 6: Depth Alongside 8.0 m. Length – 160 m.

CRANES: All quays have cranes of 6 tons, and on Quay No. 11 there is a 35 ton portainer and 30 ton container crane. On Muelle Principe de Asturias there are 4×16 ton cranes. Loading and discharging operations are always carried out by shore personnel, irrespective of the means used.

SPECIAL CARGO HANDLING FACILITIES: There are 3 berths in the outer harbour located at the head of Berths 10/12 and 12/14 for Ro/Ro traffic. 2 Ro/Ro berths in the inner basin.

1×400 t.p.h. pneumatic unloader available.

STEVEDORES: It is necessary to advise Agents 48 hours in advance of the arrival of the vessel.

The main goods shipped at this port are: canned goods, aluminium ore, asphalt, ground pepper, bulk cement, etc. Average speeds of loading and discharge are: bulk cargo 60 t.p.h.; general cargo 50 t.p.h.; containers 30 units per hour.

MEDICAL: Many hospitals and medical services available. Advise Agent prior to arrival if medical assistance required.

TANKERS: Tankers discharge takes place at Muelle 11 (See "Berthing"). Product handled: Fuel oil (2×12 in.) and Gas oil (2×10 in.)

DENSITY: Average 1030.

FRESH WATER: Available from hydrants at the quays at the rate of 10 t.p.h., per hydrant.

FUEL: Supplied by CLH on all berths.

CONSULS: The following countries have local representation: Belgium, Denmark, Dominican Republic, France, Germany, Monaco, Norway, Netherlands, Paraguay, Peru, Sweden, United Kingdom.

REPAIRS: Only minor repairs carried out. There is a dry dock for small craft.

SURVEYORS: Comisario Maritimo Espanol (Spanish Maritime Commissary) and Lloyd's.

GANGWAY/DECK WATCHMEN: Agents normally provide watchmen.

OPENING/CLOSING HATCHES: Normally opened by crew and closed by stevedores using cranes.

CUSTOMS ALLOWANCES: 200 cigarettes and one bottle of spirits per person.

CARGO GEAR: All berths have cranes, varying from about 6 tons capacity. There is 1 heavy lift crane capacity 30 tons, and one gantry crane with 35 tons capacity.

REPATRIATION: Possible, without difficulty.

AIRPORT: About 8 km. distance from Alicante, and serviced by international flights.

TIME: GMT plus 1 hour in Autumn and Winter. GMT plus 2 hours in Spring and Summer.

HOLIDAYS: Normally no work is carried out on the following holidays: New Year, 1st January; Epiphany, 6th January; La Pelegrina, 26th April; Maundy Thursday; Good Friday; Labour Day, 1st May; Festival of San Pedro, 29th June; Corpus Christi; Santiago Apostol, 25th July; Assumption; Festival of the Spanish Speaking World, 12th October; All Saints', 1st November; Immaculate Conception, 8th December and Christmas Day, 25th December.

POLICE/AMBULANCE/FIRE: Police, Tel: 091. Ambulance, Tel: 5207201. Fire Brigade, Tel: 5229080.

TELEPHONES: Can be installed on board; the cost of installation currently is about 12,000 pesetas.

DEVELOPMENTS: Entrance channel to be dredged to 14.0 m.

Container Terminal (Muelle 11) to be dredged to 12.5 m.

SHIPMASTER'S REPORT: October 1983.

Documents: Unnecessary to have any papers visaed in previous port. Normal IMO papers acceptable but preferable to have separate Bonded Stores List.

Pilotage: In bad weather, Master will enter harbour without Pilot. Max. speed of pilot boat 7 knots.

On sailing, call Pilot 30 minutes before required by VHF Channels 16 or 12.

Health: No radio health message required.

Discharging: Discharging rate for boxes of pineapples using shore cranes was 25 t.p.h. per gang.

Fresh Water: Available at approx 15 t.p.h.

Watchmen: No watchman required.

Identification Cards: Agent provides separate I.D. cards for non-E.E.C. country crew members going ashore.

AUTHORITY: Junta del Puerto de Alicante, Muelle de Levante S/No., 03001 Alicante, Spain. *Tel:* (96) 5202255, 5203588. *Telex:* 66554 JPA E. *FAX:* (96) 5216359. *Contact:* Sergio Campos Ferrera, Port Director.
Comandancia de Marina, Tel. 211514, 216163.

ALMERIA: 36.52 N. 02.30 W. (See Plan)

DOCUMENTS:

4 Crew Lists.
4 Passenger Lists (embarking, disembarking and in transit).
2 Cargo Manifests of goods destined to Almeria, as well as other cargoes in transit.
Stores List in duplicate, including tobacco, spirits, radios, etc., belonging to vessel.
International Tonnage Certificate.
Certificate of Residues.

Note: Tobacco. In case vessel carries more than 6 kilos of tobacco per man, excess must be declared in a separate manifest, which must be visaed by a Spanish Consul. In absence of Consul, said document will have to be visaed by an Authority of former port of clearance. Otherwise, the vessel would be fined.

PILOTAGE: Compulsory, service is permanent. Pilots board vessels by motor-boat in roads, near entrance formed by two breakwaters. This entrance is 287 m. wide. Pilot boats are painted white and letter "P" is painted in black on each bow. Also boats have a blue flag hoisted on mast, with letter "P" in white on both sides of flag. At night, boats have white light, under this light is a red light. When weather is bad vessels approach as close as possible to entrance so that Pilot can easily board the vessel.

ANCHORAGE: When harbour is congested, vessel can anchor at West Mole while waiting for berth.

MAX. SIZE: Only limitation is draft. Max. draft 39 ft. in the inner port and 43 ft. in the outer port.

HEALTH: Pratique is obtained immediately after berthing, when Health Officer boards vessel, In case of suspected disease or fever on board Master must send a radio message to Agents, in order that they advise the Health Officer. Following documents are required by Health Officer upon berthing: Maritime Declaration of Health, Derat Certificate, 1 Crew List.

RADIO: Nearest important radio stations are Cadiz Radio and Palos Radio.

VHF: Call Pilot Station on Channel 16.

TUGS: 3 tugs available and compulsory in accordance with LOA, d.w.t. and weather conditions.

BERTHING: Prior to ship's arrival and in accordance with Master's ETA Agent attends Port Authorities to procure a proper available berth. Commercial quays have a length of 350 m. with single shed with max. depth 23 ft. and 712 m. with Ro/Ro ramp with max. depth 31 ft.; in 2 directions there is 350 m. with Ro-Ro ramp with max. depth 24 ft. – 29 ft. (also used by tankers). There is 369 m. of berthing space with 34 ft. depth and 250 m. with 39 ft. depth with open storage area for solid bulk cargoes.

There is a Ro-Ro ramp, max. load 20 tons per axle.

Iron Ore Berth: Max. size 80,000 d.w.t. Max. draft 13.9 m. 1 shiploader, rate 2,200 t.p.h. Operator: Cia. Andaluza de Minas S.A.

STEVEDORES: It is necessary that Master sends ETA so that Agent can inform Receiver's stevedores accordingly and arrange for proper reception of cargo and berth. Timetable of shifts available at the port; Daytime, normal working hours, from 0800 – 1200 hrs. and 1400 – 1800 hrs. (1 shift), 0800 – 1400 hrs. (1 intensive shift), 1400 – 2000 hrs. (1 intensive shift). Night time, from 1800 to 2400 hrs.; Sundays, 0800 – 1400 hrs., 1400 – 2000 hrs.

MEDICAL: Medical facilities are available; only it would be appreciated for Master to send a radio message if a crew member is in need of urgent medical attention.

TANKERS: Tankers berth at Muelle Levante (Eastern Breakwater) where the depth is 8.0 m. – 10.0 m. There is 1×8 in. line for diesel oil, 2×10 in. lines for gasoline and 1×12 in. line for fuel oil.

FRESH WATER: Always available. Deliveries from quay available at all berths, supplying about 30 t.p.h.

FUEL: Ordinary fuel oil and gas oil is available at local refinery of "CLH". It is advisable that Shipowners stem bunkers through their own Contractors, with an ETA of 48 hours, so that the order can be received in time.

FIRE PRECAUTIONS: Tankers perform their operations at the berth of "CLH" at East Pier, which has the necessary fire precautions. No special precautions at other piers.

CONSULS: Belgium, Denmark, Finland, France, Italy, Netherlands and Sweden.

REPAIRS: All types deck and engine repairs available.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: This work normally carried out by crew.

CERTIFICATES: Vessel should have the usual documents on board, but only the Safety Wireless, Safety Equipment and Derat Certificates are required by Authorities.

CUSTOMS ALLOWANCES: The quantity allowed per each crew member is 3 kilos tobacco. (See "Documents"). Wine and/or Spirits: Only 1 bottle for each crew member.

CARGO GEAR: Muelle de Ribera: 5 cranes capacity 3 tons.

Muelle de Poniente: 2 cranes capacity 6 tons and 2 cranes capacity 12 tons.

REPATRIATION: Good facilities available.

AIRPORT: Airport is located about 6 km. from town, well served by regular airlines.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: 1st January; 6th January; Good Thursday afternoon; Maundy Thursday; Good Friday; 1st May (Labour Day); 15th August (Assumption Day); Last Saturday in August (Our Lady of the Sea – Local Holiday); 12th October; 1st November; 6th and 8th December; 25th December and 26th December (second Christmas Day).

POLICE/AMBULANCE/FIRE: Police 091; Ambulance 220900; Fire 240080.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Port Authority provides containers.

WASTE OIL DISPOSAL: Contact: Jose A. Molina Hernandez. Tel: (950) 239042.

SEAMAN'S CLUBS: Club de Mar. Tel: (950) 230780.

CURRENCY: Peseta.

SHIPMASTER'S REPORT: October 1993.

Pilotage: Pilot boat max. speed 6 knots. In bad weather, vessel should enter breakwater at slow speed and embark Pilot under lee of breakwater.

Health: No radio health message required.

Loading Rate: Vegetables per gang hour 20 – 25 tons using vessel's or shore cranes.

Watchmen: Not necessary.

AUTHORITY: Autoridad Portuaria de Almeria – Motril, Muelle de Levante s/n, 04001 Almeria, Spain. *Tel:* (950) 23-60-33. *Telex:* Pajo-E 78892. *FAX:* (950) 23-29-49. *Contact:* Juan Manuel Reyes Lozano, Director.

AVILES: 43.35 N. 05.56 W. (See Plan)

DOCUMENTS:

4 Crew Lists.

2 copies Crew Personal Effects Lists, signed by each crew member.

2 Passenger Lists or a negative.

3 sets of Cargo Manifest of goods destined for the port.

Another Manifest covering transit cargo.

2 Provisions and Stores Lists, including tobacco, cigars, cigarettes, coffee, spirits, radios, cameras, etc., in possession of crew. In all cases make and number of radios to be indicated.

Safety Wireless Certificate and Safety Equipment Certificate.

Transit Tobacco Manifest: The Spanish Customs Regulations provide for 6 kilos of tobacco per crew member to be on board as usual provisions. If the total quantity of tobacco (including cigarettes, cigars, pipe and any other kind of tobacco) does not exceed said average of 6 kilos per crew member, such quantity may be declared as "provisions" on the usual Provisions List, and no further documentation is necessary. If the total quantity on board exceeds said average, the excessive quantity must be shown on a special transit manifest. Usual manifest forms may be employed, describing the tobacco in Spanish as "Tabaco en transito".

The essential point is that this transit manifest is visaed by the Spanish Consulate, which must insert a full and complete visa. A simple consular stamp is not sufficient. If there is no Spanish Consulate at the last port of call or nearby, the tobacco manifest may be visaed by the local Customs Authority or by another consulate, but the visa is still essential.

PILOTAGE: Compulsory for vessels over 50 g.r.t. Telegrams to be sent to Corporacion de Practicos, San Juan de Nieva – Aviles Tel: 5566856. Fax: 5566856. Vessel exceeding LOA 130 m. require 2 Pilots.

Send ETA 2 hours in advance, confirming by VHF when vessel some 10 miles off. Pilots listen continuously on Channels 16 and 12. Pilot craft are painted black with a white "P" on each bow. They are equipped with VHF and listen out on Channel 12, having also available Channels 16, 14, 9 and 6. When coming alongside a vessel they hoist the "H" flag. Normally they remain within the port, going out to vessels up to 1 mile from La Forcada.

ANCHORAGE: Outside the port vessels can use the sector between North and W.N.W. of La Forcada and at a distance of 1 mile from it, in 15 m. to 25 m. depth and sandy bottom. There are no sheltered anchorages. When awaiting a berth, vessels must remain at anchorage with 1 or 2 anchors.

RESTRICTIONS: Vessels LOA 180 m. – 210 m. enter and sail at any time.

Entrance Channel: Breadth: 153 m. Length: 920 m. up to San Juan de Nieva Basin. Depth at LW: 10 m. to 8.5 m. in the axis. Nature of bottom: Sand, hard clay and rock. Exposure: N.W. Breadth: 160 m. Depth at LW: 10 m. Maximum tidal flow: 2.25 knots.

MAX. SIZE: Max. LOA 225 m.

Keel Clearance:

LOA up to 130 m. – Keel clearance 2 ft.

LOA 130 m. – 150 m. – Keel clearance 3 ft.

LOA over 150 m. – Keel clearance 4 ft.

The admitted draft is calculated by deducting the number of feet required under the keel from the total depth of water which varies in accordance with tidal conditions. Tide tables are available upon request. In addition, the draft so calculated may still vary (by ±1 ft.) under special atmospherical conditions. However, for a rough guidance, the following average figures, from which the respective number of feet under the keel must be deducted, may be sufficient:

Neap Tides	*Normal Spring Tide*	*Equinoctial Spring Tide*
8.80 m.	9.70 m.	10.60 m.
(23 ft. 10 in.)	(31 ft. 10 in.)	(34 ft. 9 in.)

Alongside the quays (equinoctial LW) draft varies between 11 ft. and 30 ft.

HEALTH: Yellow flag to be hoisted, and once Health Authority has boarded, and the Marine Health Certificate completed, provided this is negative, clearance is automatic.

Health documents required: Marine Health Declaration if coming from another country, but if from another Spanish port, the Health Clearance Document from that port suffices.

Derat, or Exemption Certificate required.

If coming from country where epidemic is in force, certificates of vaccination for each crew member.

If sickness on board, patient will be examined immediately and decision taken as to clearance or isolation.

RADIO: *Coastal Station:* Cabo Penas Radio: Lat. 43° 39' 22" N., Long. 5° 50' 53" W.

Operational Procedures:

1. Safety, Assistance, and Urgency: All medium wave coastal stations listen out permanently on 2182 kHz. It is of maximum interest for the safety of human life at sea for all vessels in Spanish coastal waters at reasonable distances from the coast to maintain a listening watch for as much time as possible on this frequency.

2. Traffic from the Coastal Stations: Having firstly announced the fact on 2182 kHz, Cabo Penas Radio transmits at 1133 hrs. Call-up lists firstly of foreign vessels and then of national vessels. Weather forecasts are transmitted at 1103 hrs. and 1733 hrs.

3. Operating frequency: The station's main frequency is 1757.5 kHz and the subsidiary is 2649 kHz. In calling vessels on these frequencies, the respective vessel reply frequencies are 2013 kHz. and 3231 kHz.

Where vessels call-up Cabo Penas, they use respectively 2013 kHz and 3231 kHz, the coastal station replying on 1757.5 kHz and 2649 kHz respectively. The frequency of 2182 kHz may be used exceptionally by vessels to call up the coastal station when that frequency is not working emergency traffic.

Vessels which do not have the above frequencies, should call up on 2182 kHz, the coastal station inviting them to pass to one of the frequencies assigned to such ships.

Radio telephone calls and messages: Once radio contact has been established with the coastal station, a request is made as follows:–

Radio telephone calls:

(a) name and call sign of the vessel making the request.
(b) Identity number assigned by C.T.N.E. or in the absence of this the name of the shipowner or responsible entity for paying the ship's accounts, and the CIAC code in the case of a foreign vessel
(c) Person requesting the call.
(d) Telephone number of person or entity to be called.
(e) Locality, province or country, if the call is international.

At the end of the call, the coastal station will indicate the length and cost of the call, if requested.

Messages: Only vessels belonging to the Maritime Message Servic can use this service. The vessel sends its message to the coastal statio firstly indicating the name of its owner and telephone number.

Radio Medical Service: Crew members at sea can obtain help a advice via the coastal station who will connect the ship to the Rad Medical Centre. There is no charge for this service.

VHF: There is no transmission of weather forecasts, although a vess may obtain such information on VHF by requesting connection to t Regional Meteorological Centre. Such connections have to be paid f

Assistance, Urgency and Safety: All VHF coastal stations listen o permanently on Channel 16.

Cabo Penas Radio transmits call-up lists at 1103, 1303, 1703, 19 and 2030 hrs. It transmits general Notices to Mariners at 0903 hrs. a 1603 hrs.

Its main VHF frequency is Channel 26, but also operates on Chann 24, 25 and 27.

The following table shows the frequencies in MHz for traffic between coastal station and vessel.

Channel	*Coastal Stn.*	*Vessel*	
26	161.90	157.30	Duplex working for public correspondence
24	161.80	157.20	
25	161.85	157.25	
27	161.95	157.35	

Radio telephone calls: These can be made in the same way as the M/F transmission.

Operating Range: Cabo Penas Radio operates between Cabo (Cape) Lastres and Cabo (Cape) Vidio.

Boal Radio: Position Lat. 43° 22' N., 06° 42' W. Tel: 981-07 on VHF Channels 16 and 26.

TUGS: "Aranon" 600 h.p.; "Xaloc" 1,400 h.p.; "Nieva" 1,200 h.p.; "Raices", 1,800 h.p.

Requirements: LOA 100 m. – 130 m. – 1 tug.
LOA 130 m. – 150 m. – 2 tugs (1,000 h.p.)
LOA 150 m. – 210 m. – 2 tugs (3,000 h.p.)

BERTHING: 10 berths available.

Berth	*Length* (m.)	*Depth* (m.)	*Use*
Raices	822.84	8.0	Bulk and General
Raices (New)	250.00	12.0	Bulk and General
E. San Juan	140.00	6.0	Bulk and General
S. San Juan	300.00	6.0	Bulk and General
W. San Juan	277.70	3.5	Bulk and General
S.W. San Juan	90.25	2.0	Bulk and General
New Fish Quay	503.00	5.0	Fish
Aviles Fish Quay	515.94	2.0 – 1.0	Fish
E. Ensidesa	300.00	9.0	Fuel, General, Bulk
E. and S. Ensidesa	715.00	7.0	General, Bulk
S. Ensidesa	107.50	5.0	General
Endasa	132.84	7.0	Bulk cargo

CRANES:

Ensidesa:

1×30 tons lifting capacity
4×15 tons lifting capacity
9×12 tons lifting capacity
2× 6 tons lifting capacity
1×150 tons lifting capacity
2 gantry cranes×12 tons lifting capacity

Endasa:

2×10 tons lifting capacity

Commercial Berths:

5 cranes× 6 tons lifting capacity
3 cranes×16 tons lifting capacity
2 cranes×45 tons lifting capacity
2 cranes×30 tons lifting capacity
2 cranes×12 tons lifting capacity
6 cranes× 5 tons lifting capacity

Asturiana de Zinc:

1 crane × 4 tons lifting capacity
1 crane × 5 tons lifting capacity

STEVEDORES: Working hours: At CSI Planos Berth: Monday 0600 – 2400 hrs. Tuesday/Friday 0000 – 2400 hrs. Saturday 0000 – 0600 hrs. working shift. Thereafter no work. Sundays and holidays no work.

All other Quays: Monday/Friday. 0800 – 1200 hrs., 1300 – 1700 hrs. Overtime: 1700 – 2300 hrs.

Saturdays: 0800 – 1200 hrs. No overtime.

Sundays and Holidays: No work done.

MEDICAL: Crew members requiring medical attention, hospitalisation, etc., should be reported by the Master to the Ship's Agent in order to make the necessary arrangements. All services available.

TANKERS: Oil/Gas Berth: Equipped with facilities to load/unload oil products and gas through pipelines.

Liquified Gas Facilities:

Name	"Muelle de CSI Planos SA" – Zona "B" and "A".
Type of Berth	Concrete berth with rubber fenders.
Mooring	Normal mooring system giving lines to bollards alongside.
Length	300 m.
Depth	29 ft. LWOST alongside at berth, always afloat.
Type of handling installation	Shore hose connections of 6 in. for liquid and vapour available. No vessels' hoses required.
Largest LGC entered/ discharged (part cargo)	34,230/20,406 g.r.t./n.r.t., 53,400 cu.m. cargo capacity. Length overall: 216.10 m. Max. draft 36 ft. 2 in. (April 1982).
Shore Storage Particulars:	
Operator	Fertiberia SL.
Other Users	Some Spanish companies occasionally operating by previous agreement with "Enfersa".
Products handled	Ammonia.
Minimum temperature	Minus 33°C.
Cargo pressure	3 kg. – 4 kg.
Receiving temperatures	Ambient and fully refrigerated down to minus 33°C.
Maximum discharging rate	500 t.p.h. at minus 33°C.
Actual discharging rate	350 t.p.h. – 400 t.p.h.
Cargo operations permitted by night	Yes.
Round the clock discharging	Yes (SHinc).
Vapour return line available	Yes.
Distance from berth to storage	2.8 km.
Hoses of 6 in. available	Yes
Diameter of shore lines	12 in. Liquid and 8 in. Vapour.
Maximum back pressure permitted	3 kg. – 4 kg.

Tanks	*Temperature*	*Capacity*	*Cu.m.*
2 Spherical	Ambient	2,000 tons	2,500
1 Cylindrical	Fully refrigerated	10,000 tons	15,000

Cargo handling equipment at Marine Terminal 1 shore line.

FRESH WATER: Available ex-wharf or barge. From the wharf connections, it is supplied at 25 t.p.h. and from barge at those berths where there is no supply facility.

FUEL: Fuel and gas oil are supplied to ships by barge. There is a small tanker doing the service. Stem for bunkers can be arranged through usual contractors.

CONSULS: The following countries have consular representation in the nearby port of Gijon: Brazil, Colombia, Costa Rica, Dominican Republic, Finland, France, Italy, Netherlands, Norway, Panama, Peru, Portugal and Sweden.

REPAIRS: There is one shipyard at Aviles for small coasters and fishing trawlers. All types of repairs will be readily attended by specialised workshops. Advanced notification is suggested. Electrical power is supplied ex-wharf. Diver available.

DRY DOCKS: One dock at Las Canteres, owned by "Empresa Nacional Siderurgica", length 50 m., width 9.50 m. Capacity 600 tons.

Four docks at El Monumento owned by Astilleros Ojeda y Aniceto, length, 2 of 100 m. and 2 of 85 m. Width 3.10 m. Capacity 500 tons.

SURVEYORS: Lloyd's Register, A.B.S., B.V., Hispania Marine and G.L.

CUSTOMS ALLOWANCES: Normally Customs permit 200 cigarettes per man out of bond. Additional quantities needed on the stay of ship in port. 1 bottle of spirit per man. Also see "Documents".

AIRPORT: The regional airport, named Asturias (in some instances it is still known as Oviedo) is 12 km. away from the port. There are daily flights linking Aviles with Madrid, Bilbao, Barcelona, Malaga, Tenerife and Santiago. Bus service available to and from the airport.

TIME: GMT plus 1 hour, except during Summer when GMT plus 2 hours.

HOLIDAYS: 1st January, 6th January, 19th March, 1st May, 21st June, 16th July (Mercantile Marine), 25th July, 28th August, 8th September, 12th October, 1st November, 8th and 25th December, Maundy Thursday, Good Friday, Easter Monday, Corpus Christi, Ascension Day.

POLICE/AMBULANCE/FIRE: Police 544311 and 544511. Ambulance 540080, 540511, 540733, 540844. Fire 546114, 544127.

DEVELOPMENTS: New Raices Berth operating (Length 250 m., depth 12.0 m.).

AUTHORITY: Capitania Maritima, Avenida Conde Guadalhorce, Aviles, Spain. *Contact:* Angel Sabino Alonso Fernandez, Comandant.

Autoridad Portuaria de Aviles, Calle de Muelle 8, Aviles, Spain. *Tel:* (98) 5541111. *FAX:* (98) 5540479. *Contact:* Terminal Director.

AGENT: Alvargonzalez, S.A., Guadalhorce 105, Aviles, Spain. Tel: 562075/6. Telex: 87492.

BARCELONA: 41.20 N. 02.10 E. (See Plan)

DOCUMENTS:

(1) Manifest of Barcelona Cargo: 1 set covering all loading ports; make sure that this Manifest is in perfectly good order before ship's berthing, as Customs will board the vessel immediately and take it away as it is; thereafter any omission or excess of pages may lead to a fine. It is important that the Master has copies as Manifests mailed by Agents in loading ports sometimes arrive too late or not at all.
(2) Manifest of Transit Cargo: 2 sets (same recommendations as above).
(3) 3 Crew Lists.
(4) 1 Negative or Passengers List.
(5) 2 sets of Bills of Lading of the Barcelona cargo.
(6) 2 Provisions Lists.

Of items (3), (4) and (6) above several copies will be required for distribution among various authorities, therefore it would be well for the Master to have at least 3 copies of each ready at hand on arrival. Tobacco allowed per crew member is 6 kg.

All tobacco in excess of the 6 kg. allowed by the Spanish authorities should be manifested and signed by the Spanish Consul at the last port of call before Spain. If there is no Spanish Consul at the last port before calling at Spain, then the consulate of a country friendly to Spain or the Port Authorities could carry out the same formality. The same procedure must be followed when the vessel loads a cargo of tobacco for discharge in Spanish ports, or when the tobacco cargo is loaded in transit.

If any item of cargo manifested for Barcelona should be discharged in error at any other port in the ship's itinerary before arrival at Spain, there would be a fine imposed here for shortage of goods if no advice of such shortage is given before arrival.

Shipmaster's Report: November 1988.

4 Manifests of Barcelona Cargo.
5 Manifests of Transit Cargo.
2 sets of Bills of Lading.
5 Crew Lists.
1 (nil) Passenger List in Spanish.
1 (nil) Arms/Ammunition List in Spanish.
2 Maritime Declarations of Health.
2 Stores Lists.
4 Lists of Personal Effects.

APPROACHES: *Entrance:* Width 370 m., depth 16 m. Nature of bottom is mud and sand.

PILOTAGE: Pilot boats painted black, with letter "P" in white on each bow. Telegraphic address: "Pilot Station-Barcelona". Required notice of

ETA 24 hours before arrival. Signals to be made by vessels requiring Pilot: the letter "G" in sound and/or light. Can be contacted on VHF Channel 16.

Pilot boats have no radar. Pilots give priority to vessels nearest port entrance. Pilotage is compulsory and the service is permanent. In case of port congestion vessels remain at anchor at the roads.

ANCHORAGES: Vessels can anchor 0.8 miles away from breakwaters in depths over 40 m.

MAX. SIZE: Only limitation is draft: max. 45 ft.

HEALTH: Pratique obtained immediately after berthing, when Health Officer boards vessel. In case of suspected disease or fever on board Master must send a message to Agent, to advise Health Office. Following documents are required by Health Officer upon berthing; Maritime Declaration of Health, Derat Certificate, 1 Crew List.

RADIO: Aranjuez Radio, call sign EAD.

VHF: Barcelona Radio can be contacted on VHF Channel 16, 3 hours before arrival and Channel 26 for long distance calls.

TUGS: Operated by two private companies. Vessels do not need a tug for entering or leaving but may require one for internal manoeuvring, depending on the manoeuvre and on the size of the vessel, pre-arrangement with Pilots. Ship lines normally used. 12 tugs available, from 800 h.p. to 1,800 h.p.

BERTHING: Commercial quay, length 15,054 m. with depths 6.0 m. – 14.0 m., depending on location. Pier Barcelona, berths for transoceanic maritime passenger traffic, depth 31 ft. Shore fenders keep vessel about 1 m. off quay.

BULK CARGO FACILITIES:

Grain: The Terminal for discharge, storage and delivery of cereals and seed is located on Contradique Wharf (East Side). These products are shipped in large bulk carriers of up to 280 m. length. The maximum draft at the present time is 13.10 m. This terminal has pneumatic facilities on the wharfside for discharging vessels and which may reach optimum rates of 1,200 tonnes/hr. Soya bean is taken by belt conveyor to a factory located in Anden de Costa for conversion to oil and meal. This terminal comprises 3 silos with capacities of 20,000 tonnes, 45,000 tonnes and 80,000 tonnes respectively. There are 2×60 tonnes weighbridges.

In addition there is another terminal located on the Alvarez de la Campa Wharf specialising in the discharge, conversion and processing of soya bean. It has length 250 m., depth 11.20 m. and is equipped with modern pneumatic facilities for discharging, and like the Anden de Costa factory described above, meal and oil are also loaded at this terminal. The terminal's storage capacity is 42,000 tonnes of soya bean and 2,000 tonnes of oil. The discharge rate is 500 tonnes/hr.

Bulk Clinker and Cement loading terminal: Located at Contradique Wharf (South Side). Capacity for 27,000 tons clinker and 38,000 tonnes cement. Vessels up to 40,000 d.w.t. and having a draft of up to 12 m. may be loaded here without delays. This terminal is equipped with a 22 m. hoistable and rotary arm gantry crane for loading bulk carriers. Loading rate, 1,000 tons/hr. for cement and 1,500 tons/hr. for clinker. Apart from this terminal, there is another located on Alvarez de la Campa Wharf. The latter terminal has a storage capacity of 8,800 tonnes. This terminal receives cement from a works in the Province of Tarragona for subsequent overland distribution.

Potash loading terminal: Length 419 m., depth alongside 11.2 m., equipped with 2 loading bridges which can load up to 700 t.p.h. of this product. Storage capacity 80,000 tonnes.

Coal: Discharged at Sur No. 1 Wharf (East Side), length 450 m., depth alongside 14 m. and (North and South Side) length 350 m., depth 12 m. and 14 m. respectively.

It is equipped with portal cranes, lifting capacity 12/16 tons. Average discharge rate 110 tons per crane/hour. The storage area is sufficient for a vessel discharging 60,000 tonnes.

Iron, Steel and Scrap: Handled at Contradique Sur and Sur No. 1 Wharves. 12/16 tonnes capacity cranes are used. Hourly rate is 80 tonnes for scrap and 250 tonnes for manufactured products.

SPECIALISED CARGO-HANDLING FACILITIES:

Containers: Two terminals at Prince of Spain Wharf, total length 1,085 m., depth 14 m., total area 295,000 sq.m., 5 gantry cranes 35/45 tons. Section A (Maritima Layetana, S.A.): 4 transtainers, 13 straddle carriers, 17 forklifts with capacity 2.5/12 tons. 150 reefer points. Section B (Tersaco): 3 transtainers, 6 tractors, 12 trailers, 12 forklifts with capacity 2.5/35 tons. 120 reefer points.

Both terminals have computer systems and CFS.

There are other terminals for domestic traffic.

Roll-on/Roll-off traffic: 20 ramps available at different quays.

General cargo handling: It is fully mechanised and, apart from the pier cranes, there are fork-lift trucks, truck cranes and a palletisation process.

Liquid and non-petroleum bulk: Important special facilities are the liquefied natural gas discharge and gasification plant with special berth (depth 12 m.) and a storage capacity for 240,000 cu.m. of liquid gas.

There are 6 special berths (depth 12 m.) for inflammable liquids, chemicals, vegetable oil and tallow, and a storage capacity of about 150,000 cu.m.

STEVEDORES: *(a)* Daytime, normal working hours, from 0800–1200 and 1400–1800 hrs. (1 shift); *(b)* 0800 – 1400 and 1400 – 2000 hrs. (2 "intensive" shifts). Night-time, from 2000 – 0200 and 0200 – 0800 hrs. (2 intensive night shifts). Extra costs are involved for intensive shifts. Nightwork is paid on an overtime basis. Average rates for discharge of grains in bulk are about 7,500/8,000 tons per day of 24 consecutive hours; for general cargo a rate of 100 tons within normal working hours.

MEDICAL: All medical facilities are available; it would be appreciated if the Master advises in advance if crew member is in need of urgent medical attention. Contact Barcelona Radio in an emergency.

TANKERS: There are 6 berths for oil tankers (refined products), max. size 60,000 d.w.t., depth alongside 12 m. (2), 11 m. (2), 8.5 m. (2). Along the jetty there are 15 pipelines of up to 16 in. diameter, leading the products to the 350,000 cu.m. storage tanks, discharging being effected at a rate about 1,000 tonnes/hour for vessel.

Also see "Shipmaster's Report".

DENSITY: Average density between 1025 and 1028 in all seasons.

FRESH WATER: Available at all berths direct from shore lines. Rate of delivery about 16 t.p.h. – 20 t.p.h. Also possible by barge, rate 150 t.p.h.

FUEL: "Campsa" supplies a range of intermediate fuel oil up to heavy fuel oil bunker "C" 380 cST/50°C and marine gasoil. These products can be supplied by barge, at jetty or by tank truck.

REPAIRS: All types of deck and engine repairs can be carried out.

DRY DOCKS: Dry dock, max. available length 215 m., width at entrance 35 m. Can accommodate vessels of 50,000 d.w.t.

Floating dock, length 111 m., interior width 18.7 m., interior draft 6.4 m. Lifting capacity 6,000 tons.

SURVEYORS: Lloyd's 2410400. A.B.S. 2399275. B.V. 2371302. G. Lloyd 3154462.

GANGWAY/DECK WATCHMEN: According to police regulations, Master has to keep watchmen on board.

Organised robberies have taken place aboard vessels by gangs using gas to render Master and crew unconscious.

OPENING/CLOSING HATCHES: Normally carried out by crew, except in liner vessels which is contracted for by stevedores.

CERTIFICATES: Vessels should have all usual certificates aboard.

CUSTOMS ALLOWANCES: Quantity allowed for each crew member is 200 cigarettes and 1 bottle wine/spirits.

CARGO GEAR: All commercial piers served by electric shore cranes. In addition, 1 floating crane with a lifting capacity of 80 tons and 144 mobile cranes up to 50 tonnes.

REPATRIATION: Good facilities available.

AIRPORT: Located about 7 km. from town, well served by regular airlines.

TIME: GMT plus 1 hour; GMT plus 2 hours (Late March – Lat September).

HOLIDAYS: New Year's Day (1st January); Epiphany (6th January) Good Friday; Labour Day (1st May), Christmas Day (25th December) No cargo is worked on these days.

Other National holidays occur during the year, but overtime work ca be arranged.

POLICE/AMBULANCE/FIRE: Police 091; Harbour Police 3026367 Ambulance 3171717 (Also 24 hour medical service); Fire 080 and 2535353 (080 is best).

TELEPHONES: Only at Terminal Station.

SERVICES: All services available including compass adjusting, rad and radar repairs, supply of charts, nautical publications, availability Notice to Mariners, availability of safety equipment, etc.

IDENTIFICATION CARDS: Seaman's Book required. Crew List also t be presented at Autonomous Port of Barcelona.

DEVELOPMENTS: Lengthening under construction of breakwater Diqu del Este, and Pier Contradique. A wharf with 6 berths for tankers on plus 4 berths for vessels loading/unloading crude in bulk with a dep of 39 ft.

A 6th container crane is to be erected at Tersaco Container Termina

SHIPMASTER'S REPORT: March 1981.

Approaches: If vessel coming from the East, no problems, as the rad picks up the line of the breakwater about 20 miles out. There is als D.F. station close to the entrance to check vessel's position. Also suitab for calibrating the D.F. if time allows.

The extension to the breakwater is now completed, and the light bu marking the end of the extension has now been removed.

Anchorage position is about 0.5 miles from the breakwater where vessels usually remain at anchor awaiting instructions.

Port: The large Southern extension of the port is well under way, and it was in this dock that the vessel berthed. It would appear that this extension will be used for general cargo, containers, and oils/gases. The gas berths lie on the Eastern side of the dock. There being 3 berths available at present. The Northern Berth handles LNG/LPG. The second berth LPG and Berth No. 3 handles oils. Dredged depth alongside according to Chart B.A. 1180 is 10 m.

Pilots: Pilots board the vessel just outside the breakwater, from a small launch painted black with a white letter "P" painted on its sides. Pilots are reluctant to proceed very far outside the breakwater entrance.

Pilots can be contacted on VHF about 30 miles out at sea. Working Channels 16 and 12.

After completion of cargo, Pilots are called and appear on the vessel within 30 minutes.

For arrival Pilots are required to be given 24 hours' notice.

Berthing/Unberthing: Vessel's usually berth port side to head up the dock, but if it is required by the ship they will berth starboard side to.

Vessels can berth or sail at any time of the day or night.

Vessel assisted by 2 tugs forward and aft. Tugs using ship's lines. The 2 land side tugs put the lines ashore, and then push the vessel onto the quay until mooring is completed. No particular problems with berthing or unberthing.

Berth: The vessel lies alongside dolphin, which carries the pipeline. The dolphin is adequately fendered. Fenders are large flat wooden faces, with a backing of large rubber tyres.

Aft mooring arrangements not very satisfactory at this call as 2 of the mooring hooks were inoperative. Had they been working the usual arrangement of 3, 2 and 2 could have been possible.

Attention must be paid to the mooring boat, whose crew will take the ropes to any position they feel inclined. This happens forward. Aft they have fewer choices as to where to put the ropes. Vessel tied up at Berth No. 2 on this call.

Cargo Operations: Connection is to a cargo hose 12 in./8 in. line ASA 150. Shore provide the reducer and connect and disconnect. Pumping rate varied between 230/110 t.p.h. (butane). Butane tanks are 3 km. away so the usual high back pressure was experienced. Back pressure during discharge was 8 bars. Discharge was carried out using 2 pumps.

Vessel was informed by the surveyor that it was advisable to use as many pumps as the back pressure allowed, as the shore may protest at the slow discharge rate.

During this stay the shore tanks were full and were being topped off, this could have been the reason for the low rate. Possibly a better rate could be expected with propane as the tanks are only about 1 km. away.

The cargo hose was in a poor condition on the exterior. Burning was in operation on the berth ahead of the vessel, smoking regulations seemed lax.

Communications between the ship and shore were very poor as nobody spoke any English or French. Communications between the jetty and the tanks, were also very poor, messages are passed by sound powered telephone but it would appear that at the tanks nobody is in attendance at all times.

If it is possible and vessel is berthed at Berth No. 2 use the forward manifold otherwise the gangway will not be able to be landed on the dock, and will overhang by a few feet.

General: Papers required for the port are those laid down in "Guide to Port Entry". Chandler available, who can deliver by either road or barge. Storing from the quay would be awkward due to the space available on the dock, and in fact the derrick is supporting the cargo hose. After stores cranes cannot work to the quay. Stores were not taken at this port, for this reason.

Deck and engine repairs can be carried out at this port.

Lloyd's Surveyors are available for hull and engine surveys.

The airport is about 4 miles away and there is no problem with repatriation.

The berth is a considerable distance from the town and arranging taxis to come down to the vessel can cause problems. For this reason the vessel laid on a taxi service for a limited time during the vessel's stay in port. Taxi fare to town was about 400 pesetas.

No telephone available on the berth, but local calls may be made from the gate house of the "Enagas" Terminal across the road from the berth.

Water density 1025 (arrival), 1026 (departure).

RADIO OFFICER'S REPORT: September 1990.

Documents: The following is to be added to the list in the "Guide".

A Declaration of Oil Residues:

Last 3 ports sludge discharged: Date, quantity, by which means.
Total capacity of oil residue tanks.
Quantity of sludge on board.
Total capacity of the slop tanks.
Quantity of oil residue from, tank washing, on board.
Next ports with reception facility.

SHIPMASTER'S REPORT: October 1993.

Charts: B.A. 1180 and 1195.

Approach: The City of Barcelona with Castillo de Montjuich is easily identified. The breakwater entrance is not visually conspicuous, and is best identified on the radar. The stone mole gets lost in the shoreline buildings.

Pilot: The Pilot boards from a typical small black hulled white upperworks Spanish cutter. A good lee is required. 24 hours notice of arrival and 30 minutes notice on departure is required. The port is often very busy, so long waits can be expected. Vessels must not approach within 1 mile of the breakwater entrance until advised to do so by the Pilot Station. Pilot on VHF Channel 14.

Anchorage: Anchorage is exposed, and from previous experience holding ground is not considered good. Do not anchor within 1 mile of the Breakwater Head, and keep clear of the numerous pipelines and cables.

Tugs: Many modern tugs available. Normally two tugs are used. Ship's lines used.

Berth: The Inflammables Quay in the new port section, to the South of the old port, is used for all petroleum products and liquids.

Seven berths, all small jetties, protruding out about 50 m. from the shoreline, are used, all starboard side to, head out.

Depth alongside all berths is about 12.0 m.

We berthed at Pier 3, and used 2 head/stern lines to shore, by mooring boat (actually pilot boat), and 2 springs fore and aft to the jetty.

Ship's gangway at manifold.

Discharge: Discharged latex. Shore tanks across roadway about 200 m. away. Discharge was at maximum rate of ship's pump. Shore hose to ship's manifold to 6 in. Camlock coupling.

Receiver and Surveyor speak little English.

Fresh Water: Available on jetty. Port Authority waterman required. Arrange before weekend. Shore hoses through meter. Brackish.

Chandler: Stores can be delivered to within 50 m. of ship's manifold. The Receiver will provide a lift truck to ship's side.

Telephone: One public telephone near Jetty No. 4, a few minutes walk away.

Formalities: Vessel came from Italy, and paperwork not extensive. We prepared 6 Crew Lists, 1 Personal Effects List, 1 Stores List, 1 Discharge Manifest and 1 Transit Manifest. Formalities were handled by Agent and Civil Guard.

AUTHORITY: Puerto Autonomo de Barcelona, Puerta de la Paz No. 6, 08003 Barcelona, Spain. *Tel:* 3188850, 3188750. *Telex:* 54000 JOPB. *FAX:* (93) 3184047. *Contact:* L. Montero, Port Director.

BILBAO: 43.17 N. 02.55 W. (See Plan)

DOCUMENTS:

6 copies Crew List.
4 copies Passenger List (if any on board) or 2 Negative Passenger Lists.
3 copies Crew's Personal Effects Lists, if any.
3 copies Ship's Stores List.
Safety Radiotelegraphy Certificate.
Safety Equipment Certificate (g.r.t. 500 or above)
Safety Construction Certificate (g.r.t. 500 or above)
International Health Declaration Form.
Narcotic List.
Vaccination List.
Declaration of no animals on board.
3 copies Cargo Manifest.
2 copies Manifest of Cargo in Transit.

Tobacco Allowance: Crew members are not allowed to keep more than 200 cigarettes (or the equivalent in tobacco) and a bottle (1 litre) of spirits out of bond. The rest must be included in the vessel's Store Lists, and is to be sealed. The total maximum quantity that any ship can carry in accordance with the Spanish Laws is 6 kg. of tobacco for each person aboard.

Any quantity over this amount should be manifested as "tobacco in transit" and this manifest to be visaed by the Spanish Consulate in the previous port. For ships diverted at sea to a Spanish port or if a Spanish Consulate is not available at the last port of call, Master is required to send prior to arrival the following cable to:

DIRECCION GENERAL DE ADUANAS-MADRID

"Vessel .... Coming from .... bound to Bilbao with tobacco Manifest not visaed in the last port of call due to not being available Spanish Consulate".

Master ....

The text of the cable should be entered in the Log Book and a copy delivered to the Custom's Agent when boarding.

Clearance: Health and Customs Authorities will board either when vessel is at anchor or berthed. Customary national and international regulations concerning Free Pratique are applied. Unless contagious sickness being on board, or vessel coming from an epidemic zone, radio advice to Health Authority is not required. Health Declaration, Derat Certificate and Crew List are required by Health Authorities.

PILOTAGE: Pilotage is compulsory for vessels entering and leaving the Port of Bilbao. Vessels must make contact with the Pilot Station 1 hour before arrival; Masters shall make contact again when 7 miles from the port entrance.

Arrival Information: There are no traffic separation schemes or traffic control systems in the approaches to the port of Bilbao.

The Pilot Station keeps permanent radio watch on VHF Channel 12. When Pilot on board and ship approaching the berth VHF communication is carried on Channel 14.

ANCHORAGE: Masters will be informed by Harbour Pilot about the estimated berthing time and any other particulars that concern berthing prospects. Should need for anchoring arise, vessels will be requested to anchor under the control of the Harbour Pilot in the usual anchorages, i.e. in waters between former entrance mouth of Santurce and new entrance mouth of Lucero, where only ships under 15,000 R.T. without any IMDG coded cargo on board are allowed to anchor.

Ships whose characteristics and/or cargo conditions do not comply with these limitations are, if needed, obliged to anchor, also under the control of the Harbour Pilot, in some of the following anchorage spots:

Spot "A", true bearing 270° from the Pta. Lucero breakwater green light, 1.5 miles away.

Spot "B", true bearing 310° from the Pta. Lucero Breakwater green light, 1.5 miles away.

Spot "C", true bearing 015° from the Pta. Lucero Breakwater green light, 1.2 miles away.

Spot "D", true bearing 265° from the Pta. Lucero Breakwater green light, 2.5 miles away (for small sized ships).

Spot "E", true bearing 310° from the Pta. Lucero Breakwater green light, 2.5 miles away.

Crude and oil product carriers should also keep in close communication with the Refinery Terminal Superintendency about their positioning and other particulars.

Ships in general (without any IMDG coded cargo on board) that are requested to wait due to berthing schedule, or tide level when bound up river, may receive instructions from Pilot to anchor either in between new outer port entrance of Lucero and the older Santurce Breakwater; or inside waters enclosed by Arriluce and Santurce Breakwaters. In this latter area, an additional facility of 3 sets of mooring buoys for lightening, LASH type ship turnround operations, etc., are located in waters of 14.0 m. depth.

MAX. SIZE: Drafts available for dry cargo vessels range from 4 m. up to 14.5 m. and tankers up to 32 m. The largest vessel received was 409,499 d.w.t., length 378.01 m. and draft 22.48 m.

HEALTH: Vessels requiring Free Pratique have to fly "Q" Flag when entering port. If proceeding direct to berth, Pratique obtained immediately after berthing. Otherwise, at anchorage on arrival. Cases suspected disease or fever on board, Master must radio Agent, to advise Health Office. On berthing Health Authorities require Health Declaration, Derat Certificate and Crew List. Also see "Documents".

RADIO: Short wave communication link through Aranjuez Radio and Pozuelo del Rey Radio. Medium wave communication link is through Machichaco Cape Radio.

VHF: Bilbao Coastal Radio Station on Channel 16.

Other stations in vicinity and operating on the same calling channel are Cabo Mayor, Cabo Machichaco and Choritoquieta.

Petronor Refinery Terminal keeps permanent watch on VHF Channels 12 and 14.

TUGS: No tugs required for entering port, only for berthing or shifting inside river. Ship's lines used, tugs employed according Pilot's advice. 20 tugs available, 500 h.p. – 4,500 h.p.

BERTHING: For commercial use.

Passenger Terminal: 150 m. of berthing, depth 7.0 m., and Ro-Ro facilities.

General Cargo:

2,157 m. of berthing with depth of more than 12 m. and Ro/Ro facilities.
634 m. of berthing with depth between 10 m. and 12 m.
1,520 m. of berthing with depth between 8 m. and 10 m.
350 m. of berthing with depth between 6 m. and 8 m.
681 m. of berthing with depth between 4 m. and 6 m.

Dry Bulk Cargo:

1,068 m. of berthing, water depth over 12.0 m.
175 m. of berthing, water depth 10.0 m. – 12.0 m.
1,088 m. of berthing, water depth 8 m. – 10 m.
607 m. of berthing, water depth 6 m. – 8 m.
2,570 m. of berthing, water depth 4 m. – 6 m.

Liquid Cargoes:

Crude and oil products: Lucero Terminal (leased to Petronor Refinery)

Berth No. 1, draft 32 m., length 400 m. (with a fendered jetty 140 m. wide)

Berth No. 2, draft 19 m., length 400 m. (with a fendered jetty 96 m. wide)

Berth No. 3, draft 13 m., length 200 m. (with a fendered jetty 85 m. wide)

Berth No. 4, draft 11 m., length 200 m.
Berth No. 5, draft 11 m., length 200 m.
Berth No. 6, draft 7.5 m., length 100 m.

Other oils and chemicals:

220 m. of berthing, water depth 5 m.
*620 m. of berthing, water depth 9 m.
*980 m. of berthing, water depth 14 m.
*Jointly shared with dry cargo handling operations.

Privately owned Chemical Plants and Mills: Specially fitted for dry and liquid cargo handling, totalling 5,457 m. of berthing space; water depth 4 m. – 14 m.

Containers:

645 m. of berthing with depth of 14 m.
500 m. of berthing with depth between 8 m. and 10.5 m.

Ro/Ro Facilities:

There are also 4 Ro/Ro ramps available.

CRANES:

	Type	*Commercial Service*	*Private Service*

Floating Cranes: 4 units for bulk cargoes, 12 tons – 35 tons capacity.
1 for heavy lift cargoes up to 400 tons capacity.

STEVEDORES: Ordinary working time (Monday/Friday) 0800 - 1200 hrs., 1400 – 1800 hrs. (break at noon).

Ordinary working time (Monday/Friday) 0800 – 1400 hrs; 1400 - 2000 hrs. (2 intensive relief turns).

Extraordinary working time: Round the clock, 7 days a week, available. Inform Agent about requirements in advance.

MEDICAL: Medical service must be arranged by the Agent.

TANKERS: Arrival Information:
Tel: 6365291.
Telex: 32623 Nopre.
Fax: 6365332.

Petronor Refinery: Attention is drawn to the minimum under keel clearance of 1 m. required alongside.

Vessels up to 500,000 d.w.t. (according to draft) range will be accepted at Petronor Terminal.

Loading/Discharging/Transfer Operations:

No. 1 Jetty:	
Crude Oil:	
LOA	170 m. to 450 m.
D.W.T.	30,000 tons to 500,000 tons
Depth Alongside	31 m. (minimum)

Bitumen	1×6 in.	Camlock coupling	
No. 6 Jetty:			
Bitumen	1×6 in.	6 in.	150/300
		Flexible hose – Camlock coupling.	ASA DIN

N.B.: Any other flange size or rating will require special fabricated spool pieces to meet above flange specification. Spool pieces must be furnished and installed by the vessel. Terminal personnel will connect the coupler to proper ship's flanges. *Ship's* personnel will bolt on any required spool pieces. Ship's manifold must meet requirements of loading arm envelope and must provide suitable base and clearance for loading arms supports. Manifolds must comply with latest OCIMF standards. Failure to present correct reducers/spools will result in terminal making a charge for use of their equipment.

Discharging/Loading Rates:

Discharging: Maximum discharging rate accepted by Terminal:

Crude Oil – Jetty No. 1:	16,000 t.p.h.
Crude Oil – Jetty No. 2:	7,000 t.p.h.

Loading: Maximum loading rate provided, actually, by the Terminal:

Fuel Oil	3,000 t.p.h.
Gas Oil	1,500 t.p.h.
Kerosene	1,400 t.p.h.
Gasoline	1,400 t.p.h.
Naphtha	1,400 t.p.h.
LPG – Butane	190 t.p.h.
LPG – Propylene	90 t.p.h.
Bitumen	270 t.p.h.

Bunkering: Bunkering fuel facilities are available on all jetties.

The minimum quantity to be supplied is 100 tons fuel oil and 20 tons diesel oil.

Deballasting: All ballast will be unloaded to the shore facilities. At the moment, the cost of ballast reception ashore is 50 pesetas per ton, minimum charge 40,000 pts. Shore facilities unable to receive slops from heated cargo, chemical additives, low pour point and lube oils.

The Master will report to the Terminal the quantity of ballast on arrival and when due to bad weather, the ballast quantity is over the normal.

Only segregated ballast contained in SBT will be allowed to be discharged into the harbour after approval by the Port Authorities.

Note: Overboard discharge valves and sea suction valves continue to be a source of oil pollution. *Make sure these are tested and proven to be in good working order, closed tight and sealed.*

Gangway: Owner warrants that the vessel is equipped with a gangway in a safe and good operating condition.

Jetty Nos. 1 and 2 are provided with a shore gangway. The cost to the vessel's account is minimal.

Crude Oil Washing Tanks: When it is required to carry out crude oil washing of tanks during cargo discharge, Master must seek approval of the Port Authority and the Terminal at least 24 hours in advance.

During crude oil washing, it is recommended that 1 tug remains on stand-by during the operation.

Jetty Emergency Shutdown Systems and Surge Pressures: All jetties (fuel oil/clean products/LPG) are equipped with Emergency Shutdown (ESD) System to stop loading operations.

The system is activated by pushing the electrical "stop" button at any one of several stations on the jetty and in the Terminal Control Room.

On activating the loading ESD system, all jetties stop loading; the cargo pumps are all shutdown; the loading arm valves close on all jetties.

The valves and other equipment, have been designed and set to close in a minimum time for safety and still avoid damage by surge pressures.

Recognising the tremendous damage surge pressures can cause, careful check of the ship's emergency shutdown system will be made. If suitable record is not available on valve closure times, the Master will be asked to operate the system to enable timing of the valves.

The Terminal will not load at a rate in excess of that shown as being safe. Excess loading times caused by restricted loading rates due to the ship's ESD system will cause additional laytime to be allowed.

All cargo loading lines for fuel oil/clean products have a pressure switch installed that activates the ESD system with the same effect as mentioned above when the pressure on line exceeds 10 kg./sq.m. In case of activating ESD, Master to deliver to the terminal a full report of the incident.

Fenders: On the jetties the fenders and fendering structures are designed to absorb normal working stress levels, and each has a generous energy-absorbing capacity.

The energy imparted by vessels approaching the jetties is:

Berth No.	*Recommended Max. cm./sec.*	*Recommended Max. Angle to Jetty Face*
1	6	0° up to 7.5°
2	8	
3	9	
4 – 5	10	
6	10	

Intermediate "Yokohama" type fenders have been placed on Berths No. 1, 3, 4, 5 and 6, and No. 2 Berths all Yokohama fenders, to improve the absorption of the kinetic energy of vessel.

Mooring Arrangements: See "Plans".

Customs: The Customs Authority will board either when vessel is berthing or at anchor.

The usual documents required are:

6 copies Crew List.
4 copies Passenger List.
1 copy Negative Passenger List; if there are no passengers aboard.
3 copies Cargo Manifest for Petronor.
2 copies Cargo In-Transit, if any.
3 copies Stores List, including bunkers, vessel's property, tobacco, spirits, medicine chest, etc.
3 copies Crew's and/or Passengers' Personal Effects.

The crew members are not allowed to keep more than 200 cigarettes (or the equivalent in tobacco) and a bottle (1 litre) of spirits out of bond. The excess must be included in the vessel's Store Lists, and are to be sealed. The total maximum quantity that any ship can carry in accordance with the Spanish Law is 6 kg. of tobacco or 6,000 cigarettes for each person aboard (for example, for 30 crew members the maximum quantity allowed is 180 kg. of tobacco or 180,000 cigarettes). Any quantity over these amounts should be manifested as "tobacco in-transit" and this Manifest visaed by the Spanish Consulate in the last port.

If a Spanish Consul was not available in the last port of call, Master is required to send prior to arrival the following cable:

To: Direccion General de Aduanas – Madrid.
Vessel .... Coming from ....
Bound for Bilbao Petronor with Tobacco Manifest not visaed last port due to Spanish Consul not available in the last port.
Signed: Master.

The text of this cable is to be registered in the log book and 1 copy of the same is to be given to the Customs Agent when boarding.

Port Health: The national and international regulations concerning Free Pratique are applicable at Bilbao.

Free Pratique is granted when at berth; if anchored, the Agent will be requested to arrange the visit under Master's requirements.

Radio advice to the Health Authorities is not required unless there is contagious sickness on board or if coming from an epidemic zone.

Garbage or trash will not be dumped into the port waters. The area surrounding the vessel shall be kept clean.

DENSITY: 1025.

FRESH WATER: Available at some berths, rate 25 – 60 t.p.h., otherwise by barge.

FUEL: Pipelines available at some berths, rate at cargo berths 130 t.p.h. per loading point and up to 3,000 t.p.h. at VLCC berth, otherwise by barge. Advise Agent 48 hours in advance.

REPAIRS: See "Dry Docks".

DRY DOCKS: 3 dry docks 155 m.×20 m.; 146 m.×21.8 m.; 170 m.×19 m. for vessels up to 15,000 d.w.t. Dry docks served by 4×15 ton cranes.

Repair berth with length 450 m. and 5×15 ton cranes.

Contact: Astilleros Espanoles S.A. Tel: (4)4957150. Telex: 31519 Aers E. Fax: (4)4964976.

SURVEYORS: Most internationally recognised and well founded survey companies, concerned with cargo or ships' class certification, are established in the Port of Bilbao as well as those related to insurance in both areas. Ship's Agent can provide detailed information.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Normally by crew, except in liner vessels, when contracted by stevedores.

CERTIFICATES: Have usual documents on board (Safety Radio, Safety Equipment and Safety Construction).

CUSTOMS ALLOWANCES: Normally, Customs permit 200 cigarettes, and 1 bottle wine/spirits per man. Also see "Documents".

CARGO GEAR: Usually shore cranes employed in loading or discharging.

REPATRIATION: Good facilities.

AIRPORT: Sondica Airport 6 km. from the City, Tel: 4531350.

Foronda Airport, 50 km. from the City, Tel: 945-273300.

Overseas services and links to all over the world from both airports.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: 1st January; 6th January; 19th March; Good Friday; 1st May; Corpus Christi Day; 16th July, 25th July; 15th August; 12th October; 1st November; 8th December; 25th December; and another two fixed local holidays.

POLICE/AMBULANCE/FIRE: Police Tel: 088.

Ambulance/Hospitals: Basurto Hospital Tel: 4418800. Emergency medical service, Tel: 4614000 – 4614111.

Red Cross: Sea service, Tel: 4600200. Shore service, Tel: 4222222.

Fire Service: Santurce Area, Tel: 4922800. Bilbao Area, Tel: 088.

EMERGENCY CO-ORDINATION CENTRE: Marine Authority is in charge of services which are covered by the Coast Guard.

TELEPHONES: Every wharf has fixed public telephone kiosks and stevedoring terminal offices have up to date means of communication. No telephone plugs at berths.

SERVICES: Electronic and conventional marine equipment repairs, tanks and pipe cleaning and services in general up to the level corresponding with a first class port. Detailed information can be provided by ship's Agent.

BANKS: Due to the large activity of the port in international trade, every bank has specialised personnel in charge of overseas maritime commercial affairs.
STORING: Authorised ship chandler service is compulsory in order to arrange Customs Clearance. Ship is free to load up to 10 tons of stores. If over 10 tons dockers must be used.
SHORE LEAVE: In general there are no restrictions.
IDENTIFICATION CARDS: No shore passes are issued. Passport or Seaman's Book should be carried for dock entrance gate checking with Crew List.
GARBAGE DISPOSAL:

Limpiezas Nervion S.A. Tel: 4836726. Fax: 4836726. Charge 2,700 Pts per trip/day.

Conten. Tel: 4432048/4319013. Fax: 4437889. Charge 13,000 Pts. each container.

Collection 24 hours per day.

WASTE OIL DISPOSAL:

Berako. Tel: 4967300. Fax: 4950015.

Alfus. Tel: 4730295. Fax: 4730841.

Oil Treatment:

Sader. Tel: 4905811. Fax: 4903407.

Tradebe. Tel: 4730295. Fax: 4923209.

SEAMAN'S CLUBS: Stella Maris, Zona Portuaria de Santurce, 48980 Santurce (Vizcaya). Tel: 4616699/4616911. Facilities: Chapel, information, telephones, exchange, shop, post office, television, video, films, sports, library, bar, newspaper and magazines. Hours: 1000 hrs. – 1500 hrs., 1700 hrs. – 2200 hrs.
CURRENCY: Peseta.
DELAYS: Very exceptional and short time if any.
GENERAL: Stevedores' and Ship Agents' Association. Tel: 4234185 – 4239237.
DEVELOPMENTS: *Works in Progress:* Jetty for liquid bulks at Punta Ceballos: This is situated perpendicular to the coast, and is 340 m. long with a draft of 18.0 m. It has a reinforced concrete caisson platform and 2 berths, one on either side, permitting vessels of 10,000 d.w.t. to operate on the South side while vessels of 50,000 d.w.t. will be able to operate on the North side.

Development of the port in the Outer Harbour: This zone extends from the Santurce Breakwater to Punta Lucero Breakwater. The Port Authority has begun the construction of new docks between the Santurce Breakwater and Punta Lucero Breakwater. This will provide the port with 350 ha. of additional surface area with 8 km. of docks and berths with between 21.00 m. and 25.00 m. draft.

If Cadiz is the second port, the same papers are required except for Customs you only need the "Ruta".
PILOTAGE: Compulsory. Pilot will board the vessel between Los Cochinos and Diamante Buoys, from small tug having buff funnel with a black top with a black letter 'P' on each side of the buff part of the funnel. Pilots communicate with tugs by means of portable radio sets.

Corporacion Practicos Puerto de Cadiz, Muelle Reina Victoria No. 14, 11006 Cadiz. Telephone: 256550 day and night.

Pilot station on VHF Channel 16 and working Channel 14.
ANCHORAGE: Vessels waiting for a Pilot may anchor in any safe position according to draft and weather conditions. Tankers or deep draft vessels may anchor West of the Junction Buoy in 16 m. – 18 m. depth where the Pilot boards at first opportunity.
RESTRICTIONS: *Cadiz - Commercial Harbour:*
Channel Entrance:
Width.................................... 250 m.
Length .... 3,600 m.
Controlling depth at LLW .... 13 m.
Kind of bottom: Mud, sand & rocks.
Port Entrance:
Width.................................... 300 m.
Controlling depth at LLW .... 13 m.
Tides:
Maximum tide level .... 3.90 m.

Berth/unberth restrictions: Vessel can berth/unberth at any time of da or night.

Vessels exceeding 32 ft. 10 in. (10 m.) draft are subject to tide.

Vessels over 39 ft. 04 in. (12 m.) draft anchor North of Diamante Bu where there are no draft restrictions.

Berths are allocated on strict order of arrival with the followi preferences:
1. Passenger and Navy vessels.
2. Vessels unloading or loading.
3. Bunkers or provisions vessels.
4. Repair vessels.

Cadiz – Free Zone Harbour:

Channel Entrance:

Width	150 m.
Length	1,200 m.
Controlling depth at LLW	9 m.

Port Entrance:

Width	150 m.
Controlling depth at LLW	9.0 m.

Tides:

Maximum tide level	3.90 m.

Berth/unberth restrictions: Vessels can berth/unberth at any time of day or night subject to tides.

Cabezuela:

Entrance Channel:

Width	250 m.
Length	2,000 m.
Depth	13.0 m.

Santa Maria – Commercial Harbour:

Channel River Entrance:

Width	80 m.
Length	1,250 m.
Controlling depth at LLW	5.5 m.
Kind of bottom: Mud & sand.	

Berth/unberth restrictions: Vessels can berth/unberth at any time of day or night, subject to tides.

Explosives and Inflammables: Vessel cannot call at Cadiz carrying explosives or inflammables in Transit.

Power Cable: In position Lat. 36° 30.9' N., Long. 06° 15.2' W. with clearance of 50 m.

HEALTH: Master should radio, not more than 50 hours and not less than 5 hours before arrival, the following information to the Port Authority: name and nationality of ship, date and time of arrival, last port of call, number of passengers and crew aboard, if doctor on board and details of any sickness noted on voyage. Message to be addressed to "Sanidad Maritima Cadiz". International code quarantine signals to be shown on arrival when Free Pratique will be given provided health situation is satisfactory.

VHF: See "Pilotage".

TUGS: Normally join vessel off San Felipe Breakwater. 4 tugs available, up to 2,550 h.p.

BERTHING:

Cadiz:

Mole Reina Sofia: 600 m. length, depth alongside 12.0 m. – 13.0 m. LW. Ro-Ro ramp with 20.0 m. width.

Mole Alfonso XIII: 324 m. length, depth alongside 10 m. LW.

Mole Ciudad: 316 m. length, depth alongside 10 m. LW.

Mole Reina Victoria: 220 m. length, depth alongside 10 m. LW.

Mole Marques de Comillas: 380 m. length, depth alongside 10 m. LW.

Ro/Ro Terminals: There are 3 Ro/Ro ramps in the Port of Cadiz, 2×12 m. wide×100 tons capacity and 1×6.5 m. wide×60 tonnes capacity. Depth alongside all ramps is 10.0 m.

Industrial Terminal: Located at Cabezuela on the East side of Cadiz port. 530. m. of wharf with depth of 14.0 m. Terminal is used for bulk solid. In the second stage the length of wharf will be doubled. 4×16 ton cranes.

Free Zone: The free zone is about 2 miles South East of Cadiz. The port has 550 m. of berthing space with 9.5 m. of water alongside. 2×6 tons, 1×3/6 tons, 2×12 tons cranes and 1 Ro-Ro ramp.

Santa Maria: Muelle Exterior: Length 774 m. Depth alongside 6.5 m.

CRANES: *Cadiz:*

Gas freeing Plant: General description of services rendered: This installation is equipped for cleaning and gasfreeing of tankers, removal of last residues and dirty ballast and/or slops.

Spot "B", true bearing 310° from the Pta. Lucero Breakwater green light, 1.5 miles away.

Spot "C", true bearing 015° from the Pta. Lucero Breakwater green light, 1.2 miles away.

Spot "D", true bearing 265° from the Pta. Lucero Breakwater green light, 2.5 miles away (for small sized ships).

Spot "E", true bearing 310° from the Pta. Lucero Breakwater green light, 2.5 miles away.

Crude and oil product carriers should also keep in close communication with the Refinery Terminal Superintendency about their positioning and other particulars.

Ships in general (without any IMDG coded cargo on board) that are requested to wait due to berthing schedule, or tide level when bound up river, may receive instructions from Pilot to anchor either in between new outer port entrance of Lucero and the older Santurce Breakwater; or inside waters enclosed by Arriluce and Santurce Breakwaters. In this latter area, an additional facility of 3 sets of mooring buoys for lightening, LASH type ship turnround operations, etc., are located in waters of 14.0 m. depth.

MAX. SIZE: Drafts available for dry cargo vessels range from 4 m. up to 14.5 m. and tankers up to 32 m. The largest vessel received was 409,499 d.w.t., length 378.01 m. and draft 22.48 m.

HEALTH: Vessels requiring Free Pratique have to fly "Q" Flag when entering port. If proceeding direct to berth, Pratique obtained immediately after berthing. Otherwise, at anchorage on arrival. Cases suspected disease or fever on board, Master must radio Agent, to advise Health Office. On berthing Health Authorities require Health Declaration, Derat Certificate and Crew List. Also see "Documents".

RADIO: Short wave communication link through Aranjuez Radio and Pozuelo del Rey Radio. Medium wave communication link is through Machichaco Cape Radio.

VHF: Bilbao Coastal Radio Station on Channel 16.

Other stations in vicinity and operating on the same calling channel are Cabo Mayor, Cabo Machichaco and Choritoquieta.

Petronor Refinery Terminal keeps permanent watch on VHF Channels 12 and 14.

TUGS: No tugs required for entering port, only for berthing or shifting inside river. Ship's lines used, tugs employed according Pilot's advice. 20 tugs available, 500 h.p. – 4,500 h.p.

BERTHING: For commercial use.

Passenger Terminal: 150 m. of berthing, depth 7.0 m., and Ro-Ro facilities.

General Cargo:

2,157 m. of berthing with depth of more than 12 m. and Ro/Ro facilities.
634 m. of berthing with depth between 10 m. and 12 m.
1,520 m. of berthing with depth between 8 m. and 10 m.
350 m. of berthing with depth between 6 m. and 8 m.
681 m. of berthing with depth between 4 m. and 6 m.

Dry Bulk Cargo:

1,068 m. of berthing, water depth over 12.0 m.
175 m. of berthing, water depth 10.0 m. – 12.0 m.
1,088 m. of berthing, water depth 8 m. – 10 m.
607 m. of berthing, water depth 6 m. – 8 m.
2,570 m. of berthing, water depth 4 m. – 6 m.

Liquid Cargoes:

Crude and oil products: Lucero Terminal (leased to Petronor Refinery)

Berth No. 1, draft 32 m., length 400 m. (with a fendered jetty 140 m. wide)

Berth No. 2, draft 19 m., length 400 m. (with a fendered jetty 96 m. wide)

Berth No. 3, draft 13 m., length 200 m. (with a fendered jetty 85 m. wide)

Berth No. 4, draft 11 m., length 200 m.
Berth No. 5, draft 11 m., length 200 m.
Berth No. 6, draft 7.5 m., length 100 m.

Other oils and chemicals:

220 m. of berthing, water depth 5 m.
*620 m. of berthing, water depth 9 m.
*980 m. of berthing, water depth 14 m.
*Jointly shared with dry cargo handling operations.

Privately owned Chemical Plants and Mills: Specially fitted for dry and liquid cargo handling, totalling 5,457 m. of berthing space; water depth 4 m. – 14 m.

Containers:

645 m. of berthing with depth of 14 m.
500 m. of berthing with depth between 8 m. and 10.5 m.

Ro/Ro Facilities:

There are also 4 Ro/Ro ramps available.

Bitumen	1×6 in.	Flexible hose with Camlock coupling	
No. 6 Jetty:			
Bitumen	1×6 in.	6 in. Flexible hose – Camlock coupling.	150/300 ASA DIN

N.B.: Any other flange size or rating will require special fabricated spool pieces to meet above flange specification. Spool pieces must be furnished and installed by the vessel. Terminal personnel will connect the coupler to proper ship's flanges. *Ship's* personnel will bolt on any required spool pieces. Ship's manifold must meet requirements of loading arm envelope and must provide suitable base and clearance for loading arms supports. Manifolds must comply with latest OCIMF standards. Failure to present correct reducers/spools will result in terminal making a charge for use of their equipment.

Discharging/Loading Rates:

Discharging: Maximum discharging rate accepted by Terminal:

Crude Oil – Jetty No. 1: 16,000 t.p.h.

Crude Oil – Jetty No. 2: 7,000 t.p.h.

Loading: Maximum loading rate provided, actually, by the Terminal:

Fuel Oil	3,000 t.p.h.
Gas Oil	1,500 t.p.h.
Kerosene	1,400 t.p.h.
Gasoline	1,400 t.p.h.
Naphtha	1,400 t.p.h.
LPG – Butane	190 t.p.h.
LPG – Propylene	90 t.p.h.
Bitumen	270 t.p.h.

Bunkering: Bunkering fuel facilities are available on all jetties.

The minimum quantity to be supplied is 100 tons fuel oil and 20 tons diesel oil.

Deballasting: All ballast will be unloaded to the shore facilities. At the moment, the cost of ballast reception ashore is 50 pesetas per ton, minimum charge 40,000 pts. Shore facilities unable to receive slops from heated cargo, chemical additives, low pour point and lube oils.

The Master will report to the Terminal the quantity of ballast on arrival and when due to bad weather, the ballast quantity is over the normal.

Only segregated ballast contained in SBT will be allowed to be discharged into the harbour after approval by the Port Authorities.

Note: Overboard discharge valves and sea suction valves continue to be a source of oil pollution. *Make sure these are tested and proven to be in good working order, closed tight and sealed.*

Gangway: Owner warrants that the vessel is equipped with a gangway in a safe and good operating condition.

Jetty Nos. 1 and 2 are provided with a shore gangway. The cost to the vessel's account is minimal.

Crude Oil Washing Tanks: When it is required to carry out crude oil washing of tanks during cargo discharge, Master must seek approval of the Port Authority and the Terminal at least 24 hours in advance.

During crude oil washing, it is recommended that 1 tug remains on stand-by during the operation.

Jetty Emergency Shutdown Systems and Surge Pressures: All jetties (fuel oil/clean products/LPG) are equipped with Emergency Shutdown (ESD) System to stop loading operations.

The system is activated by pushing the electrical "stop" button at any one of several stations on the jetty and in the Terminal Control Room.

On activating the loading ESD system, all jetties stop loading; the cargo pumps are all shutdown; the loading arm valves close on all jetties.

The valves and other equipment, have been designed and set to close in a minimum time for safety and still avoid damage by surge pressures.

Recognising the tremendous damage surge pressures can cause, careful check of the ship's emergency shutdown system will be made. If suitable record is not available on valve closure times, the Master will be asked to operate the system to enable timing of the valves.

The Terminal will not load at a rate in excess of that shown as being safe. Excess loading times caused by restricted loading rates due to the ship's ESD system will cause additional laytime to be allowed.

All cargo loading lines for fuel oil/clean products have a pressure switch installed that activates the ESD system with the same effect as mentioned above when the pressure on line exceeds 10 kg./sq.m. In case of activating ESD, Master to deliver to the terminal a full report of the incident.

Fenders: On the jetties the fenders and fendering structures are designed to absorb normal working stress levels, and each has a generous energy-absorbing capacity.

The energy imparted by vessels approaching the jetties is:

Berth No.	Recommended Max. cm./sec.	Recommended Max. Angle to Jetty Face
1	6	0° up to 7.5°
2	8	
3	9	
4 – 5	10	
6	10	

Intermediate "Yokohama" type fenders have been placed on Berths No. 1, 3, 4, 5 and 6, and No. 2 Berths all Yokohama fenders, to improve the absorption of the kinetic energy of vessel.

Mooring Arrangements: See "Plans".

Customs: The Customs Authority will board either when vessel is berthing or at anchor.

The usual documents required are:

6 copies Crew List.

4 copies Passenger List.

1 copy Negative Passenger List; if there are no passengers aboard.

3 copies Cargo Manifest for Petronor.

2 copies Cargo In-Transit, if any.

3 copies Stores List, including bunkers, vessel's property, tobacco, spirits, medicine chest, etc.

3 copies Crew's and/or Passengers' Personal Effects.

The crew members are not allowed to keep more than 200 cigarettes (or the equivalent in tobacco) and a bottle (1 litre) of spirits out of bond. The excess must be included in the vessel's Store Lists, and are to be sealed. The total maximum quantity that any ship can carry in accordance with the Spanish Law is 6 kg. of tobacco or 6,000 cigarettes for each person aboard (for example, for 30 crew members the maximum quantity allowed is 180 kg. of tobacco or 180,000 cigarettes). Any quantity over these amounts should be manifested as "tobacco in-transit" and this Manifest visaed by the Spanish Consulate in the last port.

If a Spanish Consul was not available in the last port of call, Master is required to send prior to arrival the following cable:

To: Direccion General de Aduanas – Madrid.

Vessel .... Coming from ....

Bound for Bilbao Petronor with Tobacco Manifest not visaed last port due to Spanish Consul not available in the last port.

Signed: Master.

The text of this cable is to be registered in the log book and 1 copy of the same is to be given to the Customs Agent when boarding.

Port Health: The national and international regulations concerning Free Pratique are applicable at Bilbao.

Free Pratique is granted when at berth; if anchored, the Agent will be requested to arrange the visit under Master's requirements.

Radio advice to the Health Authorities is not required unless there is contagious sickness on board or if coming from an epidemic zone.

Garbage or trash will not be dumped into the port waters. The area surrounding the vessel shall be kept clean.

DENSITY: 1025.

FRESH WATER: Available at some berths, rate 25 – 60 t.p.h., otherwise by barge.

FUEL: Pipelines available at some berths, rate at cargo berths 130 t.p.h. per loading point and up to 3,000 t.p.h. at VLCC berth, otherwise by barge. Advise Agent 48 hours in advance.

REPAIRS: See "Dry Docks".

DRY DOCKS: 3 dry docks 155 m.×20 m.; 146 m.×21.8 m.; 170 m.×19 m. for vessels up to 15,000 d.w.t. Dry docks served by 4×15 ton cranes.

Repair berth with length 450 m. and 5×15 ton cranes.

Contact: Astilleros Espanoles S.A. Tel: (4)4957150. Telex: 31519 Aers E. Fax: (4)4964976.

SURVEYORS: Most internationally recognised and well founded survey companies, concerned with cargo or ships' class certification, are established in the Port of Bilbao as well as those related to insurance in both areas. Ship's Agent can provide detailed information.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Normally by crew, except in liner vessels, when contracted by stevedores.

CERTIFICATES: Have usual documents on board (Safety Radio, Safety Equipment and Safety Construction).

CUSTOMS ALLOWANCES: Normally, Customs permit 200 cigarettes, and 1 bottle wine/spirits per man. Also see "Documents".

CARGO GEAR: Usually shore cranes employed in loading or discharging.

REPATRIATION: Good facilities.

AIRPORT: Sondica Airport 6 km. from the City, Tel: 4531350.

Foronda Airport, 50 km. from the City, Tel: 945-273300.

Overseas services and links to all over the world from both airports.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: 1st January; 6th January; 19th March; Good Friday; 1st May; Corpus Christi Day; 16th July, 25th July; 15th August; 12th October; 1st November; 8th December; 25th December; and another two fixed local holidays.

POLICE/AMBULANCE/FIRE: Police Tel: 088.

DEVELOPMENTS: *Works in Progress:* Jetty for liquid bulks at Punta Ceballos: This is situated perpendicular to the coast, and is 340 m. long with a draft of 18.0 m. It has a reinforced concrete caisson platform and 2 berths, one on either side, permitting vessels of 10,000 d.w.t. to operate on the South side while vessels of 50,000 d.w.t. will be able to operate on the North side.

Development of the port in the Outer Harbour: This zone extends from the Santurce Breakwater to Punta Lucero Breakwater. The Port Authority has begun the construction of new docks between the Santurce Breakwater and Punta Lucero Breakwater. This will provide the port with 350 ha. of additional surface area with 8 km. of docks and berths with between 21.00 m. and 25.00 m. draft.

2 Crew Lists.
2 (Nil) Passenger Lists in Spanish.
2 copies Cargo Manifests in Transit.

If Cadiz is the second port, the same papers are required except for Customs you only need the "Ruta".

PILOTAGE: Compulsory. Pilot will board the vessel between Los Cochinos and Diamante Buoys, from small tug having buff funnel with a black top with a black letter 'P' on each side of the buff part of the funnel. Pilots communicate with tugs by means of portable radio sets.

Corporacion Practicos Puerto de Cadiz, Muelle Reina Victoria No. 14, 11006 Cadiz. Telephone: 256550 day and night.

Pilot station on VHF Channel 16 and working Channel 14.

ANCHORAGE: Vessels waiting for a Pilot may anchor in any safe position according to draft and weather conditions. Tankers or deep draft vessels may anchor West of the Junction Buoy in 16 m. – 18 m. depth where the Pilot boards at first opportunity.

RESTRICTIONS: *Cadiz - Commercial Harbour:*

Channel Entrance:

Width	250 m.
Length	3,600 m.
Controlling depth at LLW	13 m.

Kind of bottom: Mud, sand & rocks.

Port Entrance:

Width	300 m.
Controlling depth at LLW	13 m.

Tides:

Maximum tide level	3.90 m.

Berth/unberth restrictions: Vessel can berth/unberth at any time of da or night.

Vessels exceeding 32 ft. 10 in. (10 m.) draft are subject to tide.

Vessels over 39 ft. 04 in. (12 m.) draft anchor North of Diamante Bu where there are no draft restrictions.

Berths are allocated on strict order of arrival with the follow preferences:

1. Passenger and Navy vessels.
2. Vessels unloading or loading.
3. Bunkers or provisions vessels.
4. Repair vessels.

Cadiz – Free Zone Harbour:
Channel Entrance:
Width.. 150 m.
Length .... 1,200 m.
Controlling depth at LLW .... 9 m.
Port Entrance:
Width.. 150 m.
Controlling depth at LLW .... 9.0 m.
Tides:
Maximum tide level .... 3.90 m.

Berth/unberth restrictions: Vessels can berth/unberth at any time of day or night subject to tides.

Cabezuela:
Entrance Channel:
Width.. 250 m.
Length .... 2,000 m.
Depth .... 13.0 m.

Santa Maria – Commercial Harbour:
Channel River Entrance:
Width.. 80 m.
Length .... 1,250 m.
Controlling depth at LLW .... 5.5 m.
Kind of bottom: Mud & sand.

Berth/unberth restrictions: Vessels can berth/unberth at any time of day or night, subject to tides.

Explosives and Inflammables: Vessel cannot call at Cadiz carrying explosives or inflammables in Transit.

Power Cable: In position Lat. 36° 30.9' N., Long. 06° 15.2' W. with clearance of 50 m.

HEALTH: Master should radio, not more than 50 hours and not less than 5 hours before arrival, the following information to the Port Authority: name and nationality of ship, date and time of arrival, last port of call, number of passengers and crew aboard, if doctor on board and details of any sickness noted on voyage. Message to be addressed to "Sanidad Maritima Cadiz". International code quarantine signals to be shown on arrival when Free Pratique will be given provided health situation is satisfactory.

VHF: See "Pilotage".

TUGS: Normally join vessel off San Felipe Breakwater. 4 tugs available, up to 2,550 h.p.

BERTHING:

Cadiz:

Mole Reina Sofia: 600 m. length, depth alongside 12.0 m. – 13.0 m. LW. Ro-Ro ramp with 20.0 m. width.

Mole Alfonso XIII: 324 m. length, depth alongside 10 m. LW.

Mole Ciudad: 316 m. length, depth alongside 10 m. LW.

Mole Reina Victoria: 220 m. length, depth alongside 10 m. LW.

Mole Marques de Comillas: 380 m. length, depth alongside 10 m. LW.

Ro/Ro Terminals: There are 3 Ro/Ro ramps in the Port of Cadiz, 2×12 m. wide×100 tons capacity and 1×6.5 m. wide×60 tonnes capacity. Depth alongside all ramps is 10.0 m.

Industrial Terminal: Located at Cabezuela on the East side of Cadiz port. 530. m. of wharf with depth of 14.0 m. Terminal is used for bulk solid. In the second stage the length of wharf will be doubled. 4×16 ton cranes.

Free Zone: The free zone is about 2 miles South East of Cadiz. The port has 550 m. of berthing space with 9.5 m. of water alongside. 2×6 tons, 1×3/6 tons, 2×12 tons cranes and 1 Ro-Ro ramp.

Santa Maria: Muelle Exterior: Length 774 m. Depth alongside 6.5 m.

CRANES: *Cadiz:*
Electric Cranes

	Lifting Capacity (tons)	*Range* (m.)	*Height* (m.)
Mole Reina Sofia

			F. J. Portillo Ltd.

Free Zone: See "Berthing".

CONTAINER HANDLING FACILITIES: Container at Muelle Reina Sofia. Length 600 m., depth 12.0 m. – 13.0 m. 3×40 tonne gantry cranes, 2 with outreach of 35 m. and one with outreach of 38 m. Area of container park 195,000 sq.m. 2 mobile cranes and road and rail access to the terminal. 38 reefer points (380 V - 50 Hz and 440V - 6 Hz).

At Santa Maria there is 1×30 ton crane for containers and a container park of 11,000 sq.m.

STEVEDORES: *Hours of Working:*

Weekdays (except Saturdays): Normal day – Shift 0800 – 1800 hrs. – Lunchbreak 1200 – 1400 hrs. Appointment of gangs to be effected at 0730 hrs.

Shift System (from Monday to Sunday including holidays):
First Shift: 0800 – 1400 hrs.
Appointment of gangs to be effected at 0730 hrs.
Second Shift: 1400 – 2000 hrs.
Appointment of gangs to effected at 1330 hrs.
Third Shift: 2000 – 0200 hrs.
Fourth Shift: 0200 – 0800 hrs.
Appointment of gangs to be effected at 1830 hrs.
Saturday after 1400 hrs.:
Appointment of gangs to effected at 1100 hrs.
Sundays and Holidays:
Appointment of gangs to be effected at 1100 hrs. on the preceding day.

TANKERS: 3 Tanker berths for vessels up to 27 ft. draft at the piers in the Free Zone, operated by C.L.H. Hoses: Fuel oil 10 in., gas oil 8 in., gasoline 8 in.

International Terminals Corp. Berth, length 170 m., depth 9.5 m.
Products terminal located at Rota, length 350 m., depth 12.0 m.
Also see "Services".

DENSITY: 1029.

FRESH WATER: Fresh water available at all quays at 12 t.p.h. per hose.

Fresh water connections are spaced at intervals of about 30 m. along the quays. Cost 35.00 Pesetas per ton.

Contact: Servicos Municipalizados Agua y Electricidad, Maria Auxiliadora s/n, Cadiz. Telephone: 281666.

FUEL: Bunkers can be supplied to vessels by barge at Commercial quays or at anchor in bay, also at permanent installation in Free Zone Port at the rate of 180 t.p.h.

Bunkering order to be passed through vessels oil suppliers to Spanish Monopoly, Campsa Madrid.

REPAIRS: There are 3 shipyards – Astilleros Espanoles SA, at Cadiz and Matagorda. Empresa Nacional Bazan-Carraca, and several workshops of Auxiliar de la Construccion Naval. All types of repairs can be effected.

DRY DOCKS: Astilleros Espanoles S.A.: 2 dry docks for vessels up to 400,000 d.w.t. and 2 floating docks with capacity up to 120,000 d.w.t.

At Matagorda, there is a dry dock of 150.97 m. length, 19 m. width, and 6.23 m. max. draft.

At Puerto Real Factory there is a dry dock of 500 m. length, 100 m. width, and 9.0 m. draft, where they can accommodate vessels up to 400,000 tons.

OPENING/CLOSING HATCHES: This work is normally effected by the stevedores.

CUSTOMS ALLOWANCES: Max. of 6 kilos of tobacco for each person on board, all to be declared. Wine or spirits, 1 decilitre per man per day.

AIRPORT: Jerez 30 km., Seville 130 km. and Malaga 265 km. Daily flights to Madrid, Barcelona and overseas.

TIME: GMT plus 1 hour late September until late March. GMT plus 2 hours late March until late September.

TELEPHONES: Connection to vessels can be arranged by Agents.

SERVICES:

Boat Services: Sertrain S.L., Servicios de Lanchas y Trafico Interior del Puerto de Cadiz, Muelle Comercial 'Edificio El Soivre', Caseta No. 4 – 11006 Cadiz. Telephone: 255728, 253583 (Private).

Divers:
Francisco Salazar Casero (Pantera). Tel: 251587 and 256014.
Chinita, Tel: 224626 and 213008.

Garbage Disposal Facilities: Collection by truck, capacity per trip 8 tons. Garbage can be collected from arrival to sailing of vessel. Garbage should be bagged before landing. Ship's labour to be used to move garbage from ship to truck. No limit to the amount of garbage to be landed during the ship's call.

Tourist Office: Calderon de la Barca No. 1. Information Tel: 211313.

Taxi: Tel: 221503, 221006, 276969, 276735.

Emergency Telephone Numbers: Police: 091. Fire Brigade: 270080. Hospital San Juan de Dios: 287611. Hospital Mora Provincial: 212351. Ambulances: 289533 and 273758. Harbour Master: 224011 and 254901. Health Office: 253437. Immigration Office: 212154. Customs Office: 253370.

Gas freeing Plant: General description of services rendered: This installation is equipped for cleaning and gasfreeing of tankers, removal of last residues and dirty ballast and/or slops.

Reception of dirty ballast may be effected through separators at a maximum rate of 2,400 t.p.h. and slops according to discharge rate of vessel's stripping pumps.

Victor Pirate washing machines, conventional and bottom types, are available for using with either cold or hot water. Air driven exhaust fans for gasfreeing available; special equipment for working cargo tanks, safety lamps, portable lamps for small drainages of tanks and means for unloading of mud are available.

From an elevated structure at the mooring berth, towards midships, connections are made for slopping out dirty ballast and slops as well as for supplies to vessel as detailed below. In this structure is also situated the ship's gangway ladder and a pneumatic crane for both removal of materials and refuse ashore.

Plant is able to supply:

- ballast water up to 400 t.p.h.
- saturated stem to 12.5 kg./sq.cm. or reduced steam up to 12 t.p.h.
- washing water to required temperature up to 80°C. and pressure up to 13 kg./sq.cm. and a flow of 250 t.p.h.
- drinking water.
- treated water for boilers.
- compressed air to 7.5 kg./sq.cm.

Feed water can be connected to ship's fire system.

In the above mentioned structure high capacity foam and water cannons are arranged so that they are able to cover a major part of ship's deck. There are also inlets for fire hoses.

The supply of shore power is not foreseen.

Depths in the mooring area are 8.20 m. forward and 10 m. aft at LLW and size limit of vessel is 150,000 d.w.t.

This installation works uninterruptedly all day and night and Sundays if required.

Operator: Delta, P.O.Box 73, Cadiz (Spain). Tel: 23 10 00 to 23 10 09. Telegrams: "Delta" Cadiz. Telex: 76021 ASTIL E.

SHORE LEAVE: Crew are permitted to go ashore subject to police control.

AUTHORITY: Autoridad Portuaria de la Bahia de Cadiz, Plaza de Espana 17, 11006 Cadiz, Spain. *Tel:* (56) 240400. *FAX:* (56) 240476. *Contact:* Agustin M. Dominguez Lobaton, President. Armengol Vinas Castro, Technical Director. Pedro L. de Frutos Garcia, Port Captain (Tel: 253903). Manuel Rodrigues de Castro, Free Zone Delegate (Tel: 290606).

CARBONERAS: 36.58 N. 01.54 W. (See Plan)

SHIPMASTER'S REPORT: November 1983.

DOCUMENTS:

5 Crew Lists.
2 Stores Lists.
2 Crew Declarations.
1 Maritime Declaration of Health.
2 Cargo Manifests (in-transit cargo only).

PILOTAGE: Compulsory. Agents inform Pilot of vessel's requirements. The Pilot boards by tug or small fishing boat, about 1.5 miles off the jetty.

The Pilot Station is situated at Garrucha, about 15 miles North of Carboneras.

ANCHORAGES: There is a small anchorage South of an island called "Isla Carboneras" locally. The approx. position of the island is Lat. 36° 59.6' N., Long. 01° 53.9' W. About 1 mile South of the island vessels can anchor; it is not advisable for larger vessels to stay there long, because this place is too close to the shore and strong Southerly winds can be hazardous.

The depth of this anchorage is between 40 m. and 50 m.

MAX. SIZE: *Hornos Ibericos:* Max. draft 40 ft. Max. LOA 210 m. Max. beam 32 m. Max. airdraft 13 m. 100,000 d.w.t.

HEALTH: No Radio Pratique available, no yellow flag necessary.

RADIO: The nearest stations are Cabo de Gata – VHF Channels 16, 20, 27 and Cabo de Palos (EAP) – VHF Channels 16, 26, 27, but very poor reception.

VHF: The Pilots have to be called on VHF Channel 16; working Channels 12 or 9. Also see "Radio".

TUGS: 2 tugs are available, each 1,300 h.p. If more tugs are necessary, they have to be ordered via Agents from Almeria.

BERTHING: *Hornos Ibericos:* In front of the entrance to the port the vessel will be turned around by two tugs and enter the port stern first. There is one berth (length 240 m.) only and the ships always have to berth with the port side alongside. Usually the starboard anchor will be used. 4 headlines made fast to the shore by a small fishing boat as well as 3 sternlines and 1 breastline aft. 2 fore and 2 aft springs are made fast to the jetty. The jetty is fitted with 4 elastic fenders and additional tyres.

Pucarsa: One quay with length 240 m., depth 15.0 m., for discharge of coal.

BULK CARGO FACILITIES: *Hornos Ibericos:* There is one conveyor for loading cement and/or gypsum with a range of approx. 30 m. Every vessel with a length of approx. 200 m. has to shift for loading all holds. 1 fixed electric crane with capacity 11.5 tons, 1 mobile electric crane with capacity 9 tons and 1 mobile electric crane with capacity 10 tons.

Pucarsa: 1×35 ton mobile transporter. Discharge rate 1,600 t.p.h.

STEVEDORES: Stevedores work 24 hours a day, including Saturdays and Sundays.

MEDICAL: Only one doctor available. Serious cases are treated at hospital in Almeria. Vaccinations are done in Almeria.

FRESH WATER: Available by lorry only, each lorry carries 8 tonnes.

FUEL: Available by lorry from Almeria, max. 50 tonnes per lorry.

CONSULS: The nearest Consulates are at Almeria.

REPAIRS: Can be undertaken by workshops in Almeria or Cartagena.

GANGWAY/DECK WATCHMEN: Not compulsory as there is a guard at the factory gate.

HATCHES: Opening/closing done by crew. Open parts of hatches will be covered with tarpaulins by stevedores to prevent dust.

CERTIFICATES: No certificates required by Port Authority or Agents.

CUSTOMS ALLOWANCES: The quantity allowed per each crew member is 1 bottle spirits and 1 bottle wine. 6,000 cigarettes is to be allowed on board for each person on board.

REPATRIATION: Possible via Almeria, approx. 70 km. from Carboneras.

AIRPORT: At Almeria.

TIME: GMT plus 1 hour; from March to September GMT plus 2 hours.

HOLIDAYS: See "Almeria".

POLICE/AMBULANCE/FIRE: No facilities. In case of emergency vessel has to inform the stevedores who will contact the agency.

IDENTIFICATION CARDS: Not required. Crew members have to take their Seaman's Books ashore and the guard at the gate checks their names with a Crew List, received from the Agents.

GARBAGE DISPOSAL: Contact: Construcciones y Contratas S.A. Tel: (951) 454125.

WASTE OIL DISPOSAL: Contact: Jose A. Molina Hernandez. Tel: (951) 239042.

SEAMAN'S CLUBS: None.

AUTHORITY: Junta del Puerto de Almeria, Muelle de Levante, 04071 Almeria, Spain. *Tel:* (951) 236992. *FAX:* (951) 232949. *Contact:* D. Emilio Grande Onieva, Port Director.

CARTAGENA: 37.35 N. 00.59 W. (See Plan)

DOCUMENTS:

6 copies of the Crew List.

6 copies of the Passenger List, or 2 negative copies as the case may be.

2 sets copies Manifests covering cargo destined to Cartagena and carried in transit.

Store Provision List, in duplicate, including items such as: tobacco, spirits, radios, coffee, tea, bunkers, and any other items belonging to the vessel.

2 copies of all Personal Effects Lists, from passengers and ship's crew.

The amount of cigarettes allowed for each member of crew/passenger is 6 kilos; any amount over has to be manifested as "tobacco in transit", and this manifest must be visaed by a Spanish Consul in the last loading/discharging port. If there is no Spanish Consul in the port of call before Cartagena, the Master is requested to send a cable to: Direccion General de Aduanas, Madrid, quoting as follows: "m.v. '. . .' coming from . . . order to proceed to Cartagena tobacco manifest unlegalised = Master".

This cable is to be inserted in the radio log-book, and copy of same to be delivered to local Customs Authorities when boarding the vessel.

APPROACHES: Escombreras Bank with datum depth of 8.9 m. situated West of Escombreras Island, extends from 200 m. to 400 m. West of the Western tip of the island. This bank is marked by a West Cardinal Mark on top of a cylindrical post, 10 m. high, with a quick flashing white light, 9 flashes ev. 15 seconds, on the Western end of the bank.

There is a zone used for submarine exercises which is marked on the charts. Occasionally, naval divers carry out exercises in the vicinity of the port entrance. These are accompanied by naval vessels showing appropriate signals.

Ships bound for Escombreras, to enter the port, should steer for a point situated at the intersection of the N.S. line of the red light at the extremity of Navidad Pier, and the E.W. line through the green light at the extremity of the Bastarreche Pier, at which point, approximately, the Pilot boards the vessel. For tankers of more than 100,000 d.w.t., the pilot boards the vessel approximately 2 miles Westward of Escombreras Island.

The least recorded depth in the entrance to the port is 25 m. The approaches to the Port of Escombreras do not present any difficulties.

PILOTAGE: Compulsory. Position of Pilot Station 37° 34.6' N., 0° 59' W. Position with green light of Dique de Curra bearing 000°, and the white light of Las Losas bearing 090°. This is the position at which the Pilot normally boards.

Vessels bound for Escombreras wait for Pilot in position 37° 34.2' N. 0° 59' W., with green light of Dique de Curra bearing 000° and the green light of Dique Bastarreche bearing 090°.

Pilot launch is a motor-boat with cabin, about 11.0 m. long, black hul green below water line, white letter "P" painted on both sides.

When bad weather prohibits Pilot boarding in the above positio vessel may be required to embark Pilot inside the harbour breakwate

Vessels call Pilot in daytime by code flag "G", or by soundi 3 prolonged blasts on the whistle.

Radio messages, with ETA, may be sent direct to Practicos Cartage with 24 hours' notice, and confirmed 12 hours before arrival, messag should include vessel's sea water draft and, if calling for the first tim vessel's length overall. Pilot station equipped with VHF.

ANCHORAGE: Vessels anchored within the port limits should not car out repairs affecting main engines as the possibility of sudden stor in Winter may make it necessary to move to a sheltered anchora North of Cabo Tinoso, or to put to sea.

Vessels under 29 ft. 6 in. draft may anchor inside the breakwa provided they do not obstruct other vessels' movements.

Anchorage for larger vessels in Cartagena Roads, approxim position Lat. 37° 34.3' N., Long. 01° 00.0' W. in depths of about 65 good holding ground.

Anchorage for small tankers off Escombreras in approximate pos Lat. 37° 34' N., Long. 0° 58' 23" W., in depths of 42 m.

MAX. SIZE: No length limitations. For Cartagena max. draft 11.0 m. For Escombreras max. draft 20.4 m.

HEALTH: Free Pratique is immediately obtained when vessels berth any time from sunrise to sunset. Port Health Officers, require Maritime Health Declaration, Derat Certificate, and copy of Crew and Passenger Lists.

RADIO: Cartagena Radio, Aranjuez Radio, and/or Gibraltar Radio.

TUGS: 7 tug 1,100 h.p. – 3,800 h.p. with fire-fighting capabilities. All tugs on duty 24 hours duly equipped, with 2 shifts of crew.

Tugs join vessels in vicinity of port entrance, vessel's lines normally used.

The tugs available to assist berthing tankers in Escombreras are all diesel tugs, equipped with fire-fighting equipment. 6 tugs available of up to 3,800 h.p.

BERTHING: Total length of general cargo quays 679 m. Solid bulk materials: Total length of berthing 717 m.

Also see "Tankers".

CRANES:

No.	*Capacity*	*Type*
7	3 – 20 tons	Electric Gantry
2	3 tons	Mobile-Diesel
1	6 tons	Mobile-Diesel
2	25 tons	Mobile-Diesel
1	90 tons	Mobile-Diesel

STEVEDORES: In the case of a vessel calling at Cartagena at night time, Sundays or holidays, it is important that Master cable 24 hours in advance to advise his ETA in order that Agents are able to arrange stevedores' operations. Gangs can be called on as follows: on weekly working days 0800 and 1330 hrs. On Sundays/holidays 0800 hrs. (with prior advice to Union by 1200 hrs. on Saturdays or day preceding holidays). The official working hours are: Monday/Saturday 0800 to 1200 and 1330 to 1730 hrs. – Sundays/holidays: from 0800 to 1400 hrs.

MEDICAL: Medical services rendered as soon as requested but, in case of emergency, Master required to send urgent cable in advance.

TANKERS: Tankers call at Port of Escombreras 2 miles away from Cartagena Port, this port owned by Repsol Petroleo S.A. Slop discharge facilities available at Escombreras.

For ships of 250,000 d.w.t. Berth No. 7, of recent construction, consists of 4 dolphins, in a line parallel to Bastarreche Mole. Between the first and third dolphin is situated a loading platform with loading/discharging lines. The centre of this platform is situated at a distance of 230 m. from the head of Bastarreche Pier, bearing 140°.

The least depth in Berth No. 7 is 20.6 m. at the extreme South of the berth. The rest of the area has a depth of between 20.6 m. to 26 m.

The maximum length foreseen for tankers of 250,000 tons d.w.t. is 350 m. or, 1,148 ft., since the total length of the berth is 430 m.

The maximum allowable draft is 19.5 m. forward and 21.4 m. aft.

Shore lines for crude oil are 1 of 40 in. diameter and 3,500 m. length, and another of 24 in. diameter and 3,500 m. length.

The Woodfield hose-handling gantry has 4×16 in. hoses of which the 2 outside hoses should be used for loading bunkers as well as for discharging. Connecting flanges of 16 in. diameter, type 150 ASA.

Fresh water can be supplied by pipeline at all berths at a rate of 45 t.p.h.

Only vessels up to about 100,000 d.w.t. may be berthed at night.

8 berths suitable for tankers from 8.0 m. to 20.4 m. draft.

3 berths for LPG carriers up to 11.0 m. draft. Max. length 225 m.

A new berth for LNG carriers and minerals in bulk has been constructed in Escombreras Basin. For LNG carriers, max. draft 11.1 m., max. length 200 m. For minerals in bulk, total length of pier 350 m., max. draft 14.0 m.

Also see "Shipmaster's Report".

FRESH WATER: Available from quay by hose connections, only on working days. On Sundays/holidays notification to be required before 1400 hrs. preceding day.

FUEL: At Cartagena, only gas oil available from tank trucks. At Escombreras all grades of fuel available subject to advance notice given.

FIRE PRECAUTIONS: The Port Authority has its own emergency plan under supervision of Port Director, and its own Emergency Control Centre, with 24 hours of services every day of the year. In the port area, there is water-borne equipment available.

CONSULS: The following countries are represented in Cartagena:

Belgium
Denmark
Finland
France
Greece
Italy
Netherlands
Norway
Panama
Peru
Sweden

REPAIRS: There are very good repair facilities. A private shipyard "Empresa Nacional Bazan" and 2 other private repair shops.

DRY DOCKS: One dry dock can accept vessels (35,000 d.w.t.) of 566 ft. length and 73 ft. beam. Syncrolift of 8,740 tons lifting capacity.

GANGWAY/DECK WATCHMEN: Not compulsory, only used when required by Master under Immigration Police Supervision.

OPENING/CLOSING HATCHES: Usually by ship's crew.

CUSTOMS ALLOWANCES: 200 cigarettes per each crew member, out of bond. The excess to be declared as cargo in transit. Wine and/or spirit: 1 bottle for each crew member or passenger.

REPATRIATION: All facilities available.

AIRPORT: San Janvier Airport situated 27 miles from Cartagena with daily service to Madrid, Barcelona and Almeria.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: 1st January; 6th January; 19th March (St. Joseph); Maundy Thursday from 1400 hrs.; Good Friday; 1st May (Labour Day); Ascension Day; Corpus Christi; 29th June (St. Peter and St. Paul); 18th July (National holiday); 15th August; 12th October; 1st November(All Saints' Day); 25th December.

POLICE/AMBULANCE/FIRE: Police, Tel: 507750. Ambulance, Tel: 553470. Red Cross, Tel: 501727. Fire Department, Tel: 128888. Port Authority Control Centre, Tel: 524910.

CREW IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Arranged by Agent with local company.

WASTE OIL DISPOSAL: Arranged by Agent with local company.

SEAMAN'S CLUBS: The Casa del Mar can accommodate seafarers in possession of a Seaman's Book (39 beds available). Tel: (968) 505850, 502050.

DEVELOPMENTS: There is a programme to increase berthing-places by building new piers close to breakwaters, available for 3 vessels.

SHIPMASTER'S REPORT: March 1981.

Approaches: Approach to the port provides no great problem coming from either the East or West. Plenty of positions are available from the land as you near the port. The bay in which the port is situated is deep water up to the breakwater. So for anchoring, vessel has to proceed well into the bay. Pilots will advise the number of vessels lying at anchor and a suitable anchorage position.

The bay is exposed to winds from the S.E. through to the S.W. As the weather was good on both occasions that the vessel has visited, no comment can be made as to whether the anchorage would be tenable in strong winds, from these quadrants.

Pilots: Readily available day or night. Pilots board from a small boat, which is rather slow. The same boat acts as line boat when the vessel is berthing. Pilots work Channel 16, and can be contacted about 1 hour out from the port.

Berthing/Berth: Vessel can berth either side of the LPG Pier. Although on the Eastern side of the berth the max. draft allowed aft is 31 ft. 6 in. and forward 28 ft. On the Western side of the pier there is 36 ft. of water. Vessels berth with the assistance of 3 tugs (1 forward and 2 aft). Ship's lines are used to the tugs. Usual tie up forward is 4-2-2 and aft 4 lines go to buoys, 2 springs from the stern, and 2 breast lines from the main deck winch.

Pilots advise that the berth is exposed to S.W. winds and vigilance is required in tending moorings. The berth is adequately fendered with large tyres.

Fresh water is available at short notice, and is piped to the quay. The water man can be found at the gate. Water can be supplied any day except on a Sunday. Bunkers are also available from the quay.

Cargo: Cargo is discharged through a 12 in. 150 ASA "T" connection from which 2×6 in. lines are lead off. Shore supply this connection, and connect the pipe.

Discharge back pressure is 8 bars which means running 2 pumps. Discharge rate is between 70 – 210 tonnes per hour. The discharge rate varies without any notice being given to the vessel by the terminal as they direct the cargo into shore tanks or coastal vessels.

Communications are very poor between the terminal, the vessel and the Agent. Little or no information is relayed to the vessel, as to the state of the tanks, number of coasters arriving, etc. On this occasion we discharged half the cargo into another vessel in order to complete the discharge in time for loading our next cargo.

Customs and the shipper's agreements had to be granted.

Daily cargo surveys are carried out, at either 0800 hrs. or 1600 hrs. Surveyor is happy to take ship's readings without sighting ullages and temperatures himself. For commencing and completion surveys he is of course present. From daily surveys the terminal require total discharged and the hourly pumping rate for the day.

The terminal upon arrival, also asks the ship to sign a letter saying they require the cargo to be pumped with a back pressure of 15 kg./sq.cm. and for the cargo to be heated. A booster pump is required for this port and also a cargo heater (this may soon be supplied). At present the vessel has the pipe work for the heater. Heater and booster pump will be sited on the quay, and ship's power and pumps will be used to run both appliances.

With the high back pressure it is difficult to strip the tanks, so if time allows strip tanks into one tank with the manifold valve closed, and then finally discharge from this tank. In the end this will save time.

Shore will request hot gas to clear the cargo lines.

Chandler: Can supply most items but needs a few days to organise matters. Stores can be supplied by boat. The boat is rather like a small pleasure craft but quite adequate.

Shotblast can be supplied at this port. The shot was also delivered by barge.

Repairs: Engine repairs can be carried out in this port by the local shipyard repair firm.

AUTHORITY: Autoridad Portuaria de Cartagena, Plaza Heroes de Cavite, 30201 Cartagena, Spain.

Capitan Maritimo de Cartagena. *Contact:* Javier Llorens, Port Captain.

CASTELLON DE LA PLANA: 39.58 N. 00.01 W.

(See Plan)

(A) CASTELLON HARBOUR
(B) BREASTING ISLAND AND SEA BERTH

(A) CASTELLON HARBOUR

DOCUMENTS:

Manifest of Castellon cargo: 1 set covering all loading ports; make sure that this Manifest is in perfectly good order before ship's berthing, as the Customs will board the vessel immediately and take it away as it is; thereafter any omission or excess of pages may lead to a fine.

Manifest of the Transit Cargo: 2 sets (the same recommendations as above).

3 Crew Lists.

2 Negative of Passengers.

2 sets of Bills of Lading of Castellon cargo.

2 Provisions Lists.

2 Manifests of Personal Effects.

PILOTAGE: Compulsory, and service is permanent. Pilots board vessels by a cutter in Roads near entrance formed by the 2 breakwaters.

Pilot cutters are painted white and have the letter "P" in black on each bow. Cutters have a blue flag, with letter "P" in white. Signals to be made by vessels requiring Pilot: 3 long blasts. Telegraphic address: "Practicos, Comandancia Marina, Castellon".

ANCHORAGE: Vessels can remain at anchor in the Roads. Recommended anchorage: 0.5 miles East of lighthouse in depth of 12 m.

RESTRICTIONS: Max. draft 22 ft. for vessels of about 110 m. – 120 m. length. For vessels of more 120 m., to 140 m. length, max. draft is 20 ft. – 21 ft.

Also see Section "B".

HEALTH: Pratique obtained immediately after berthing, when Health Officer boards vessel. In case of suspected disease or fever on board Master must radio Agent to advise the Health Office. Following documents are required by the Health Officer upon berthing: Maritime Declaration of Health, Derat Certificate, 1 Crew List.

RADIO: Aranjuez Radio, call sign EAD, 36 – 48 hours prior arrival nearest radio station is El Grao Radio, call sign EAV.

TUGS: Tugs join vessels at entrance of port. Vessels of more than 100 m. length normally use 1 or 2 tugs. Ship's ropes used.

STEVEDORES: Very important that Master sends in advance short radio notice regarding vessel's ETA so Agent can inform Shippers or Receivers' stevedores accordingly. Official working hours of port are: Monday/Saturday 0830 – 1230 and 1400 – 1800 hrs.

MEDICAL: All kinds of medical services can be arranged. In case a crew member needs medical attendance urgently, it is advisable that Master sends a radio message in advance.

TANKERS: See Section "B".

LPG: See "Shipmaster's Report".

BALLAST: All ballast must be discharged to shore tanks, no exception will be made to this rule. A total of 17,000 cu.m. (110,000 bbls.) can be received by the Refinery ballast tanks.

FRESH WATER: All piers have water available by shore pipes. The rate of delivery is about 8 t.p.h. – 9 t.p.h.

FUEL: Available with 5 days' notice and subject to "CLH" berthing availability.

CONSULS Italy, Navarra 99, tel. 211004; France, Avda. Almazora S/N, tel. 211717; Norway, Enmedio, 9, tel. 222550; Sweden, Maestro Ripolles, 28, tel. 220053.

REPAIRS: Work shop for small repairs.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: Vessels should have usual documents on board, but only the Safety Wireless, Safety Equipment and Derat Certificates are required by authorities.

CUSTOMS ALLOWANCES: Normally, Customs permit 200 cigarettes per man out of bond and 1 bottle of spirit per man.

CARGO GEAR: All commercial piers served by electric shore cranes able to lift 3 – 6 tons and 14 – 18 tons (restricted use).

REPATRIATION: Good facilities exist.

AIRPORT: Valencia, 70 km. away.

TIME: GMT plus 1 hour. Summertime: GMT plus 2 hours (Late March – Late September).

HOLIDAYS: 1st January; 6th January; 19th March, St. Joseph; Maundy Thursday after 1400 hrs.; Good Friday; 1st May, Labour Day; Ascension Day; Corpus Christi; 14th June, local holiday; 29th June, St. Peter and St. Paul; 18th July, National holiday; 25th July, St. James; 15th August; 12th October; 1st November; 8th December; 25th December; and 2 or 3 local holidays more, variable.

POLICE/AMBULANCE/FIRE: Police: tel. 220516; Ambulance 213944; Fire 221222.

IDENTIFICATION CARDS: Not required.

SHIPMASTER'S REPORT: December 1980.

Approach: Straightforward (Chart BA. 1701). A plan of the port is included on BA. 1458. During final approach care must be taken not to pass between the buoys around the sea berth for oil tankers.

Anchorage: Can be obtained 1 mile Eastwards of Dique de Levante in 15 m.

Pilotage: Call on VHF Channel 16 and Pilot boards approximately half a mile Eastwards of Dique de Levante. Strong S.W.'ly set experienced whilst awaiting Pilot. Pilot boards from small launch which doubles as a mooring boat.

One tug is taken outside the breakwater using 2 ship's lines through the centre lead forward. A second tug makes fast at port main deck aft (tug's line) when vessel is in inner harbour (Darsena Comercial). Draft limitation of 22 ft.

Berthing: Possible day or night. Starboard side to Muelle de Serrano Lloberes. The berth doubles as a bulk facility and care must be taken to avoid fouling the loading elevator with the bow flare. The elevator is on rails 1.0 m. inside the face. The berth is fendered with tyres on wooden axles – quite common in Spain and quite effective.

There are ample bollards. As soon as first lines are ashore, the forward tug takes up position at the break of forecastle using tug's line to assist in pushing vessel alongside. Lining up takes some little time using mooring winches.

Connection: Six shore anacondas link a hydrant-like pipe, emerging from a manhole on the quay, with the vessel's 10 in. manifold. Hoses are 6 in. (300 ASA) and shore personnel connect/disconnect. Vessel supplies and fits reducers. Starboard derrick used to support a metal cradle carrying hoses over ship's rail.

Discharge: Upon completion of cargo survey, discharge commences slowly whilst hoses are purged by a small hose from the 'hydrant' to the sea. No heater or booster pump are required at this port. Back pressure approximately 3 kg./sq.cm. and average rate of 125 t.p.h. overall with usual hourly rates of 150/160 tonnes/p.h.

Shore Tanks: Are atmospheric and situated some 200 m. N.E. of berth. There are 2 tanks (each 2,000 – 2,500 tonnes capacity). There would appear to be no reliquefaction plant and gas is flared during filling from a flare situated atop each tank. It is reported that this leads to discrepancies in cargo figures but this was not the case for this call. Throughput is estimated at 15,000 tonnes per month with ammonia arriving from C.I.S., Libya, and Mexico.

Customs: Attended in the morning. Their visit was brief as transit papers (RUTA) has been prepared prior to the vessel's departure from Cartagena. Remember that bond locker must remain sealed when coasting. Customs checked bond seal.

General: Fresh water is available but none taken this call. Lub oils available via normal Madrid 'permit'. The Pilot can be reached on Tel: 222457 if required during the vessel's stay.

Only 2 tugs available and as preference is given to tankers berthing at sea berths, delays can occur in docking/undocking. We were delayed for four hours on leaving. Tugs are necessary for this port.

Local town (El Grao) is very quiet with numerous small restaurants all within a few minutes walk of the berth. A three star hotel opposite the yacht club is good for telephone calls to U.K. (cost around 265 pesetas for first three minutes).

Castellon proper lies 4 km. inland. Bus fare 30 pesetas.

AUTHORITY: Comandancia Militar de Marina, Grao de Castellon, Castellon de la Plana, Spain.

(B) BREASTING ISLAND AND SEA BERTH

LOCATION: The Petroleos del Mediterraneo, S.A. Refinery is located about 1 mile southward of Grao de Castellon Harbour on the Mediterranean coast of Spain.

The Refinery marine facilities are composed of a Breasting Island and a Sea Berth, both located in open sea.

The Breasting Island is located in approximate position Lat. 39° 56' 42" N., Long. 00° 01' 36" E., and the central point of the Sea Berth is in approximate position Lat. 39° 56' 16" N., Long. 00° 03' 03" E.

A Sea Buoy with radar reflector, showing a white flash every 10 seconds is located in approximate position Lat. 39° 56' 07" N., Long. 00° 03' 49" E.

The Refinery flare is located in position Lat. 39° 57' 00" N., Long. 00° 00' 06" W. The total height of the flare above the ground level is 75 m. (250 ft.).

The Grao de Castellon Harbour lighthouse is located in position Lat. 39° 58' 06" N., Long. 00° 01' 42" E. A white light showing groups of one and two occulting every 10 seconds is exhibited from it, with a range of about 17 nautical miles.

DOCUMENTS: The Port Authorities will board and clear the vessel at anchor or after berthing.

Vessels calling at Castellon should have ready the following documents:

6 copies Crew List.
2 copies Crew Manifest.
2 copies Stores List.
2 copies Passenger List.
Clearance from Last Port.
Vessel's Certificates.
Consignee's Documents (if calling to discharge), including:
(a) Vessel's Manifest of cargo.
(b) Bill of Lading.
(c) Intake Certificate.
(d) Ullage Report.
(e) Inspection Report.
(f) Certificate of Origin.
(g) Tanker's Time Report.

PILOTAGE: Pilotage is compulsory for all vessels. The pilot will board vessels in the vicinity of the waiting area or at anchor and will advise the Master on approaches to the berth, mooring and unmooring.

ANCHORAGE: Refer to Agent for certain restrictions on anchorage areas.

RADIO: *Arrival Message:* Masters are requested to advise Petroleos del Mediterraneo, S.A. Refinery, radio address "Petromed Castellon", of their expected time of arrival, 72 hours in advance or on sailing from the previous port. A cable confirming the ETA must be sent to "Petromed Castellon" 24 hours prior to arrival. Any further changes in the vessel's ETA must be promptly advised.

The Refinery will contact the vessel via Saint Lys Radio/FFL or Aranjuez Radio/EAV, with docking or mooring instructions, together wit any other information to expedite the vessel's turnaround.

Radio Telephone contact should be established with Petroleos de Mediterraneo, S.A. Refinery on VHF Channels 13 and 16; call sign is "Petromed Castellon".

The arrival message must include:

1. Vessel's name, ETA and Master's full name.
2. (a) If calling to discharge:
   Grade and cubic metres of cargo on board.
   Grade and cubic metres of bunkers required.
   Deepest draft in feet.
   Freeboard in feet.
   (b) If calling to load:
   Grade and cubic metres for each product to be loaded.
   Loading sequence suggested.
   Grade and cubic metres of bunkers required.
   Ballast on board and pumping rate per hour.
3. If calling to discharge crude oil:
   Ship's and shore figures.
   Safe working load of the cargo hose booms (minimum 8 tonnes
   Number of shackles of usable chain on each anchor.

All of these direct contacts with the Refinery do not relieve the Mast from his responsibility to keep his Agent fully informed.

TUGS: The use of tugs is compulsory by all vessels calling at the Petroleos del Mediterraneo, S.A. marine facilities.

Two tugs are stationed at Grao de Castellon and are available to assist vessels using the facilities through the Agency of Petroleos del Mediterraneo, S.A. who will, as Agents for the Owners of the tugs, make arrangements for the services of the tugs.

Ship's ropes must be used to the tugs.

Tugs are equipped with safety devices against fire and oil spillage.

BERTHING: *Sea Berth:* The depth of water in the berth is about 25 m. (82 ft.).

Vessels berth heading 075°/080° using both anchors forward, with about 280 m. (900 ft.) of chain out on each anchor.

The stern is secured to 5 Lamgar buoys equipped with 2 release hooks on each one. These buoys have flashing lights.

One navigational aid consisting of 2 lighted buoys is used to proceed to the Sea Berth and drop the anchors.

The crude oil is discharged through a 42 in. pipeline. The length of the pipeline to the coast is about 4,000 m. (14,000 ft.) and about 300 m. (990 ft.) to the crude oil tanks.

At the Sea Berth, the crude oil submarine pipeline ends in 2 strings of flexible hose. The length of each string is about 85 m. (280 ft.) and consists of 11 sections of 16 in. hose.

The flange of the rail hose to be connected to ship's manifold is 16 in., ASA series 150.

Vessels may be requested to displace the contents of the crude oil line by pumping at a reduced rate.

The maximum pressure at the ship's manifold should not exceed 10.5 kg./sq.m. (150 p.s.i.).

There is also a 10 in. pipeline for bunkering. This pipeline is connected to the Breasting Island and the total length is about 2,250 m. (7,400 ft.). The Sea Berth end of this bunkering line is connected to a string of flexible hoses consisting of 11 sections of 10 in. hose, with a total length of about 85 m. (280 ft.).

All hoses are resting on the sea bed.

The hoses will always be connected to the port side of the vessel.

Vessel's boom and rigging should have a minimum SWL of 8 tonnes.

Mooring: Vessels calling at the Sea Berth should be equipped with a minimum of 10 synthetic stern mooring ropes in good condition and each not less than 150 fathoms in length.

These ropes should be 9 in. or 10 in. in circumference. Mooring wires or wires and nylon tails instead of the ropes are acceptable. All vessels should be equipped with at least 13 shackles of usable chain on each anchor.

Cargo handling operations will not commence until the vessel is adequately moored.

Breasting Island: The depth of water in the berth is about 12.5 m. (41 ft.)

Vessels berth heading either East or West. Max. draft 37 ft.

The Breasting Island is built on piles. A central platform 70 m. (230 ft.) long and 15 m. (49 ft.) wide accommodates the loading arms and the island services. Two mooring dolphins are located at about 128 m. (420 ft.) from the centre of the platform. They are linked with the main platform by a walkway.

The platform elevation from the sea level is 6.8 m. (22 ft.).

Both sides of the Breasting Island central platform and the Eastern dolphin are provided with a resilient fendering system.

No fendering system is installed on the Western dolphin.

Two "swamped" breasting wires are anchored about 200 m. (640 ft.) off both sides of the Breasting Island.

Quick release hooks are provided on the platform corners and on both mooring dolphins.

Metal loading arms of the self–supported counterweighted type are used.

The number and size of the arms on either side of Breasting Island is as follows:

2×10 in. for dark products, bunker and ballast.
2× 8 in. for light products.
1× 8 in. for Ammonia.

The connecting flanges on each are ASA Series 150 and they are equipped with "Camlock" type quick connecting devices.

The following products can be loaded or unloaded at the Breasting Island:

Clean: Naphtha.
Premium Gasoline.
Regular Gasoline.
Automobile Diesel Oil/Heating Oil.
Turbo Fuel.
Ciclohexane.
Ammonia.
Dark: Marine Diesel Oil.
Domestic Fuel Oil.
Fuel Oil.
Crude Oil.

Cargo handling operations will not commence until the vessel is adequately moored.

All mooring ropes shall be in good condition and the crew shall keep them properly tended at all times.

One diesel driven fire pump delivers salt water to the fire system covering the Breasting Island.

This fire system is composed of 6 fire monitors mounted on raised platforms and fire hydrants at deck level.

The pump capacity is 340 cu.m.p.h. (1,500 g.p.m.) at 10.5 kg./sq.cm. (150 p.s.i.).

Fire hoses of 150 ft. and 300 ft. in length are positioned close to the hydrants and also stored on the fire hose racks located on both sides of the Breasting Island main platform.

The Breasting Island is equipped with devices against oil spillage.

LOADING: *Connecting/Disconnecting Loading Arms:* Connecting and/or disconnecting of hoses and/or loading arms will be carried out by Refinery contracted personnel and the assistance of at least 3 crew members.

All the operations will be performed under the direction and responsibility of a vessel's qualified Deck Officer.

All the vessel's equipment, i.e. winches, topping–off booms, etc., must be handled by the vessel's crew.

The Refinery will advise the Chief Officer on procedure for connecting the hoses and/or loading arms.

In case of having to leave the Breasting Island or Sea Berth due to a change of the weather or any other emergency, the vessel's crew must carry out all the disconnecting of cargo hoses or loading arms.

After the hoses or loading arms have been connected to the vessel's manifold the vessel's crew must carry out any shifting of hoses or loading arms required, either for loading/discharging or bunkering operations.

Loading Rates: It is expected that all vessels will be able to receive cargo as fast as it can be delivered.

The dark products are pumped by either one or two centrifugal pumps of 900 cu.m.p.h. capacity each. The clean products are pumped by either one or two centrifugal pumps of 680 cu.m.p.h. capacity each.

BALLAST: All ballast must be discharged to shore tanks, no exception will be made to this rule. A total of 15,000 cu.m. (94,000 Bbls.) can be received by the Refinery ballast tanks.

Special care must be taken not to pump overboard the contents of engine room and pumproom bilges or any other oily product.

Vessels in ballast shall have sufficient draft and will be properly trimmed for safe manoeuvering on arrival, but should not arrive excessively ballasted.

Crude Oil Washing: Vessels which require to carry out crude oil tank washing at Castellon should request authorisation to do so through the Refinery or ship's Agent at least 48 hours before arrival.

The Refinery will send by telex the following questions which must be fully and promptly answered by the vessel; in the event of the answers to those questions being satisfactory, the vessel will be provisionally authorised for crude oil washing of tanks.

Example of Telex:

REF	Forthcoming crude oil washing of tanks at Castellon. Following points require confirmation:
AAA	Inert Gas System fully operational and tested.
BBB	Each tank to be positively pressurised and method of establishing that this is so to be available.
CCC	The oxygen content of each tank should be maintained below 8% by volume before and during the operation.
DDD	Inert Gas System gas output to be continuously monitored and the oxygen level maintained below 8% by volume.
EEE	A positive means of establishing the output of the inert gas system is to be available in the ship's control room at all times and under constant supervision of the ship's staff who must take immediate steps to abort the tank washing if necessary.
FFF	Pressures in cargo tanks must be available to control room personnel.
GGG	All systems to be permanent steel pipework and pressure tested.
HHH	All tank openings to be sealed. Remote tank gauging systems therefore essential.
III	Throttling of discharge for crude spraying to be done on ship's valves.
JJJ	Responsible designated person to be in charge of operation.
KKK	Efficient radio communication to be maintained between ship and shore.
LLL	Please answer all points and add any additional ship requirements or comments.

When the ship is operating at the Castellon Terminal, before crude oil washing can be carried out, the following questionnaire regarding safety measures should be answered and signed by the Master:

(1) The Check List sent by telex has been carried out, before the operation starts.
(2) The Refinery representative has been informed of the operating plan.
(3) Ship/shore communications have been checked and are in correct working order.
(4) Inert Gas System is operating and the oxygen level within the tanks is below 8% by volume.
(5) Positive pressure of Inert Gas System gas exists in all tanks.
(6) Ship's personnel are available in their assigned posts.
(7) Stationary oxygen analyser is working correctly.
(8) Portable oxygen analysers are in correct working order.
(9) Oxygen level in tanks is below 8% immediately before starting crude oil washing.
(10) During crude oil washing the Master accepts the responsibility of checking the oxygen level of Inert Gas System effluent at least every hour; that, at all times, all ship's machinery shall be and remain closed down except for the machinery essential for the purpose of the operation and the safety of the ship and that designated personnel in charge of operations keep permanent watch at their assigned posts.
(11) The crude oil washing operation will be carried out at the sole risk and responsibility of the ship and the Master will remain responsible for ensuring that all proper safety precautions are observed.

Minimum Tank Cleaning Requirements: Following is a chart which has been prepared for general guidance in the preparation of cargo tanks for loading the different grades of cargoes indicated.

None of the indications contained in this chart will relieve the Master of the responsibility for carrying out additional tank preparation which he may find necessary to protect product specifications or the safe handling of the vessel's cargo.

Previous Cargo	*Cargo to be Loaded*					
	Naphtha	ATF–1	Mogas	ADO/HO	MDO	FO
Avgas	SH	M	D	M	M	F
JP–4	F	M	F	F	F	F
Mogas	SH	M	F	M	M	F
Naphtha	D	M	F	F	F	F
ATF–1A	F	D	F	F	F	F
ADO/HO	S	M	S	D	D	F
MDO	U	U	U	U	D	D
FO	U	U	U	U	M	D
Lube Oil	U	U	SH	S	M	F

D – Drain tanks, pumps and lines of all previous cargo and ballast water.

F – Tanks, lines and pump drain free of all cargo; flush tank bottoms, pumps and pipelines with clean sea water, drain completely dry.

M – Machine wash with hot water approximately 1 hour each tank or until slop water is clean, flush lines, pumps and risers. Remove loose bottom scale accumulations. Hand hose bottoms as necessary.

S – Thorough hot water machine wash approximately 2 hours or until slop water is clean; flush lines, pumps and risers. Remove excessive loose bottom scale. Hand hose tank, bottoms as necessary.

SH – Extra thorough hot water machine wash; hot water flush pumps, lines and risers. Procedures may require spotting tank cleaning machines in tanks to remove all traces of previous cargo from bulkheads, beams and other internal tank structure. Inspect tanks, remove loose scale/sediment. Hand hose as necessary.

U – Unsatisfactory for this service.

Note: Naphtha is considered as a "Lead free" product.

The above chart indicates the minimum tank cleaning requirements to maintain the specifications of those products loaded in *uncoated* tanks.

When cargo tanks are *coated*, substitute "cold water" instead of "hot water" in the above chart, for the range of clean products to be loaded from Naphtha to ADO/HO.

MEDICAL: Arranged by ship's Agent.

FRESH WATER: Fresh water is available by barge, with a capacity of 280 cu.m. Contact ship's Agent.

FUEL: Bunkers are available. Advice regarding quantities and specifications of oil required should be given to the ship's Agent prior to arrival.

Bunkering at Breasting Island: Vessels which call for loading will take bunkers while alongside using the same loading arms.

Bunkering at Sea Berth: Crude oil ships will take bunkers while berthed, using the bunker pipeline.

The bunker pipeline from Breasting Island to Sea Berth is maintained full of either MDO or ADO/HO and it is displaced into the vessel having bunkers. The total amount of MDO, ADO/HO displaced on board is about 120 cu.m. (750 Bbls.). In order to permit the Refinery to properly displace the bunker line on completion of fuelling, vessel must alert the Refinery when it is approaching within 330 cu.m. (2,075 Bbls.) of the desired volume.

Gasoil is available by barge with a capacity of 200 cu.m. Vessels which require gasoil bunkers shall give notification 48 hours prior to arrival with the exact quantity of gasoil required.

REPAIRS: Only minor repair facilities are available. Services to radio, gyro and radar are available.

As much advance notice as possible must be given to ship's Agent.

REPATRIATION: Crew members can be paid off or leave the vessel at Castellon de la Plana provided all Spanish regulations are satisfied.

All arrangements should be made through the ship's Agent.

SHORE LEAVE: Master to arrange launch service through ship's Agent.

GENERAL: *National Flag:* The Spanish flag must be flown during daylight hours from the foremast when inside territorial waters.

Pollution of the Sea by Oil: Tank cleaning which requires the discharge of slops overboard, must not be carried out anywhere. Accordingly, tank cleaning operations must be done well in advance of vessel's arrival (See "Ballast").

Mail: Ship's Agent will handle all official and private vessel's mail.

Painting and Litter: If painting vessel, proper precautions are to be taken not to get paint on the deck, fenders or string pieces.

No rags, cans or refuse of any kind are to be discarded on the dock or into the water.

Scuppers must be plugged at all times.

A properly rigged shield must cover all toilet and air–conditioning outlets located amidship.

Garbage, food waste or similar rubbish must not be disposed of overboard while in the Marine Terminal waters.

Gangway: Vessels must provide, rig and tend a safe gangway for access to and from the vessel.

Constant Readiness: While alongside at the Breasting Island or moored at the Sea Berth, vessels must maintain engines and propulsion machinery in readiness to leave under full power on short notice. No repairs are permitted which would interfere with this requirement.

Masters are reminded that the safety of the vessel is their responsibility.

Communications Ship/Shore: A person appointed by the Refinery will remain on board all vessels berthing at either the Breasting Island or the Sea Berth and he will be in charge of any ship/shore communications.

Ship/shore communications will be carried out either by telephone and/or by portable radio–telephone sets.

If a total breakdown in communications occurs, discharging/loading will be stopped until normal communications are restored.

Charts: Charts, almanacs, nautical publications and the Spanish Notices to Mariners are available, but requirements should be included in the Arrival Message to the ship's Agent in order to facilitate delivery.

Stores and Provisions: Stores and provisions are available. As much advance notice as possible must be given to ship's Agent in order to facilitate a good supply.

Cash: Masters are to contact their Agent in advance to provide cash.

Laundry: Requirements should be given to ship's Agent immediately on arrival in order to ensure a quick service.

AGENCY: If not otherwise advised, the ship's Agent for Petromed owned, chartered or affiliated vessels is: Consulmar, S.A., C. Canalejas 95, 2°, Post Box 7, Grao de Castellon. Cable Address: Consulmar – Castellon. Telephone: 22 23 88 – 22 24 27 – Castellon. Telex No. 65513

OPERATOR: Petroleos del Mediterraneo, S.A., Apartado 238, 12080 Castellon de la Plana, Spain. *Tel:* 280000. *Telex:* 65513 Pmed E. *Cables:* Petromed. *FAX:* 281399. *Contact:* E. Gomez, Marine Manager.

CASTRO-URDIALES: 43.24 N. 03.14 W.

DOCUMENTS:

3 Cargo Manifests, 1 visaed by the consular authority.
3 Cargo Manifests for other ports if the vessel has called at and loaded in other ports.
3 Ballast Manifests (if the vessel has arrived in ballast).
5 Passenger Lists (if passengers are carried).
5 Master's Certificates to the effect of "No Passengers" if no passengers are carried.
5 Crew Lists.
5 Stores Lists.
5 Crew's Store Lists – cameras, radios, spirits, cigarettes, etc.
Health Certificate.
Certificate of Derat and fumigation against insects.
4 Bills of Lading.
International Freeboard Certificate.
International Safety Certificate.
International Radio Certificate.
Certificate of Stowage of cargo.

PILOTAGE: *To request pilotage:* 1. Advise the arrival of the vessel 24 hours in advance. 2. Hoist flag "G" of the International Flag Code. 3. Anchor within the pilotage limits of the port.

Port Pilotage Limits: Coastal zone comprised between the Onton meridian and that of the Punta del Rabanal at 1 mile from the coast. The Pilot goes out to a limit of 1 mile outside the port. There are no means of radio communication with the pilot boat or Pilot Station. ETA to be given 24 hours in advance. Sound signals to summon the Pilot - 3 long blasts. In the event of bad weather, the Pilot does not proceed to sea, and the vessel must enter the port and anchor in the bay.

Anchorage to await Pilot: In the mouth of the port at 1 mile distant. The pilot boat carries a blue flag with the white letter "P" upon it. The pilot boat is blue and is a small motor-launch.

ANCHORAGES: The best anchorage is 045° – 800 m. from the green coloured beacon of the breakwater at the port entrance, in a depth of 12 m.

RESTRICTIONS: There are no entry restrictions. Vessels with a draft greater than 6 m. cannot enter the port.

MAX. SIZE: Length 105 m., draft 5 m., depth at the entrance 9.14 m.

HEALTH: The Health Official boards the vessel as soon as it is berthed alongside. In the event of suspected illness or fever, advise Agent by radio and anchor near the port until the Health Doctor authorises entry.

RADIO: The best radio station to pass the ETA telegram to consignees or Agents is Santander Radio station call sign "EAS". Frequency 500 kHz.

TUGS: None available.

BERTHING: Irrespective of tide. The S.E. pier has a total length of 980 ft., of which 500 ft. forms the commercial wharf, mainly for coasters sundry cargoes. No cranes. Fresh water supply. Depth 17 ft. at low water.

Iron ore loading tips: Along open coast adjoining Castro-Urdiales are several cantilever piers connected with the iron ore mines, partly sheltered in creeks or small coves. All vessels bound to load iron ore there should clear and apply at Port of Castro-Urdiales. Vessels cannot remain at these berths during rough weather but may find good anchorage in roads, or immediate shelter at the Port of Castro-Urdiales or better at Bilbao Harbour 9 miles East.

The Iron Ore Loading berths (no length limit) are as follows:

Name	*Situation*	*Approx. ebb tide draft*	*Loading rate per working hour*
Dicido	1 mile E.	21 ft.	800 tons
Saltacaballo	1.5 miles E.	22 ft.	800 tons
Onton	2 miles E.	21 ft.	1,000 tons

STEVEDORES: Ordered by Agent or Shipper. No ETA to stevedores necessary.

MEDICAL: It is not necessary for Agent to receive advance notice that medical attention is required. In the port there is a corps of doctors and one of them is always on duty for any emergency. Furthermore, there is a permanent Spanish Red Cross service with ambulances to transport any patient to a large hospital centre. There is also a hospital in the town.

In the case of serious illness, patients are taken by ambulance to the Cruces Medical Aid Centre (Province of Vizcaya-Bilbao) 18 km. from Castro Urdiales.

International Vaccination Certificates are required.

DENSITY: 1016.

FRESH WATER: Water may be taken on board at the San Luis Quay (also known as the Ocharan Mazas Quay). By means of hoses and at a rate of delivery of about 40 t.p.h.

FUEL: Not available.

CONSULS: None.

REPAIRS: Limited.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Carried out by crew.

CERTIFICATES: Safety Wireless, Safety Equipment, and Derat generally inspected.

CUSTOMS ALLOWANCES: Normally 200 cigarettes per man. For longer stay, new allotment out of bond obtainable. Wine/and/or Spirit: 1 bottle per man.

CARGO GEAR: At the small commercial wharf ship's derricks are used. At the iron ore loading berths along the coast with cantilever piers, conveyor belt employed with spout at the tip.

REPATRIATION: Crew changes and repatriation can be effected, bearing in mind that any consular negotiation must be made in Bilbao, since there are no Consulates in this port.

AIRPORT: Nearest Sondica (Bilbao) 40 km. by road.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: Sundays; 1st January; 19th March (Saint Joseph); April, Holy Thursday and Friday (variable each year); 1st, 23rd May; 13th and 29th June; 18th and 25th July; 15th August; 12th October; 1st November; 25th December. On holidays, work may proceed if requested.

POLICE/AMBULANCE/FIRE: Police (Civil Guard) Tel. 861146; Ambulance Red Cross 861147 and 861191; Hospital 860196; Fire 861294.

TELEPHONES: No arrangements for placing telephones on board.

SHORE LEAVE: Crew allowed ashore.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Services may possibly be obtained from Bilbao.

SEAMAN'S CLUBS: None.

CURRENCY: Spanish Pesetas (Pta).

DELAYS: The only delays that can normally be expected are those due to bad weather.

AUTHORITY: Military Marine Adjutant – Port Captain. Harbour Master Tel: 861147.

CEUTA: 35.53 N. 05.17 W. (See Plan)

DOCUMENTS:

Health Declaration.
2 Cargo Manifests.
2 Stores Lists.
4 Crew Lists.
5 Passenger Lists.

PILOTAGE: Radio Agent advising ETA 24 hours in advance; in the event of any unforeseen delay advice should be direct to the Pilot Station. International code signals used to call Pilot, or give 3 long blasts. Sound signal used day and night. Pilot boards 1 mile from the breakwater. Pilotage compulsory. Pilot on VHF Channel 16 throughout 24 hours, working Channel 12.

ANCHORAGES: To the N.W. of the green light buoy marking the port entrance and to a distance of one mile, in depths of 10 – 15 fathoms, but vessels must leave this area during strong winds from the first and fourth quadrants, in which case the anchorage in the South Bay is advisable. The outer part of the N.W. side of the Western Quay is very rocky.

Prohibited Anchorage: To the East of the meridian passing through the Red Light on the Eastern Quay, anchorage is prohibited due to the presence of submarine cables.

RESTRICTIONS: Vessels carrying explosives must give ample warning of arrival in advance to the Pilot Station in order that precautions may be taken.

MAX. SIZE: At berths: Length 220 m. Max. draft 33 ft. 6 in.

In bay: No limits at anchorages.

HEALTH: Pratique obtained immediately after berthing when vessel boarded by health officials.

RADIO: Tarifa, Mijas, Malaga, Gibraltar and Tangiers Radio. Preferably the first 3 stations (VHF Channel 16).

RADAR: No service available.

TUGS: Normally 2 tugs in service, 1,100 h.p. and 2,300 h.p. Tugs use ship's lines.

BERTHING:

Berth	*Length*	*Depth*	*Remarks*
Dock-Quays	270 m.	33 ft. 06 in.	—
	1,250 m.	30 ft. 02 in.	—
Muelle Espana	400 m.	7.9 m.–10.06 m.	—
Muelle Canonera Dato	4×125 m.	7.0 m.	4 Ro-Ro berths
Muelle Pesquero	260 m.	3.0 m.	Fish Quay
Muelle de Ribera	4×150 m.	7.0 m.	Under construction

CRANES: One crane of 20/30 tonnes capacity and 7 cranes of 3/6 tonnes capacity.

STEVEDORES: To be requested when sending ETA. The times for engaging personnel are from 0730 hrs. to 0830 hrs. and from 1630 hrs. to 1730 hrs., and within these times personnel are appointed up to midnight of that day.

On holidays, engagements take place the previous day at 1730 hrs. For Sundays, personnel are engaged on Saturday at midday. Extraordinary working hours are prohibited. With effect from 2000 hrs., work is considered as nightwork, and is subject to 50% increase in rates. Sundays, holidays, and Saturday afternoons are subject to 40% increase in paid rates.

MEDICAL: Advance notice by radio preferred. Hospital facilities available.

DENSITY: About 3.64%.

FRESH WATER: Available.

FUEL: All grades available, to be ordered in advance. Also see "General".

CONSULS:

Belgium	Tel. 513794 and 515741
Denmark	" 514307
France	" 511268 and 512927
Italy	" 511053 and 515140
Netherlands	" 512782 and 511287
Norway	" 511700 and 511759
Portugal	" 514213 and 512509
Sweden	" 514307

REPAIRS: Only minor repairs can be effected. Slipways for vessels up to 300 g.r.t.

SURVEYORS: Surveyors available for all types of certificates.

Comisario Espanol, Delgado Serrano, 1. Tel: 512932.
Lloyd's (Imco Lloyd's), Queipo de Llano, 2. Tel: 516933.

GANGWAY/DECK WATCHMEN: Available but not essential.

OPENING/CLOSING HATCHES: Performed by stevedores.

CUSTOMS ALLOWANCES: Maximum 6 kilos tobacco for each crew member. Normal daily consumption of wine and spirits allowed.

CARGO GEAR: Loading and discharging permitted using ship's gear. Loading and discharging of containers and handling of Ro-Ro vessels permitted.

AIRPORT: Nearest international airport at Tangier, 100 km. away, (and at Malaga, 137 km. away by sea).

TIME: GMT plus 1 hour in Winter, GMT plus 2 hours in Summer.

REPATRIATION: All facilities available.

IDENTIFICATION CARDS: Not required.

GENERAL: *Vessels greater than 220 m. in length or 33 ft. 6 in. draft:* There are 2 tankers which can effect supplies in the two bays, as well as foodstuffs 24 hours a day. It is necessary to request authorisation from the Local Marine Authority for embarkation and disembarkation in the Roads, together with any type of operation.

AUTHORITY: Comandancia Militar de Marina de Ceuta. *Tel:* 512621 and 512087. *Contact:* Captain Adolfo Garcia Alonso, Comandante.

CORUNNA: 43.23 N. 08.22 W. (See Plan)

DOCUMENTS:

3 Crew Lists.
2 Passenger Lists or a negative.
1 Cargo Manifest of goods destined for the port.
Another Manifest covering Transit Cargo.
2 Stores Lists, including tobacco, cigars, cigarettes, coffee, spirits, radios, cameras, etc., in possession of crew. In all cases make and number of radios to be indicated.
Safety Radio Certificate and Safety Equipment Certificate.

If vessel carries over 6 kilos tobacco per man, the excess to be declared in separate manifest, which must be visaed by Spanish Consul at the last port, otherwise vessel is exposed to heavy fine.

PILOTAGE: Compulsory. International code signals used to call Pilot.

RESTRICTIONS: No restrictions on night manoeuvres.

MAX. SIZE: Length and beam not restricted. Cargo vessels 57 ft. draft for berthing.

Tankers:

Berth	*Max. d.w.t.*	*Max. LOA* (m.)	*Max. Beam* (m.)	*Max. Draft (see note)* (m.)
Jetty No. 1	35,000	190	30.0	11.0
Jetty No. 2	65,000	190	30.0	13.0
Jetty No. 3	120,000	290	44.0	16.5
Jetty No. 4	65,000	290	44.0	15.5
San Diego Wharf	3,500	100	14.0	7.0

Note: The Military Port Authority limits the maximum draft of tankers entering Corunna to 15.5 m. and will notify when a vessel should wait for high water to proceed inwards.

Port Works Authority limits the draft of vessels of over 120,000 d.w.t. to 16.5 m.

HEALTH: International signals shall be displayed by vessels arriving from abroad until Free Pratique is granted. If vessels proceed directly to berth, Pratique can be obtained immediately after berthing. Otherwise, at anchorage at vessel's arrival.

If vessel has sickness on board of a contagious nature Master should advise Health Authorities by radio, and they will examine patients immediately upon arrival, to enable vessel to be granted Free Pratique.

RADIO/VHF:

Short Wave: Vessels can make contact through Pozuelo del Rey or Aranjuez radio stations.

Both maintain a continuous 24 hour service.

Medium Wave: Vessels approaching the Spanish coast can establish communications with any of the following Maritime Stations:

Barcelona
Bagur (Gerona)
Cabo Gata (Almeria)
Cabo de la Nao (Alicante)
Cabo Penas (Asturias)
Chipiona (Cadiz)
Finisterre (Corunna)
Machichaco (Vizcaya)
Arrecife
Las Palmas y Tenerife

VHF:

Station	*Channel*

BULK HANDLING FACILITIES: *Private Storage Facilities:*

Cement:	3 silos each of 800 tons capacity.
	4 silos each of 1,000 tons capacity.
Aluminium:	3 silos each of 3,000 tons capacity
	1 silo capacity 4,000 tons.
Fertiliser:	2 tanks each of 7,500 tons capacity.
Unspecified Oils:	2 silos each of 1,000 tons capacity.
	2 silos each of 500 tons capacity
	1 silo capacity 600 tons.
	1 silo capacity 350 tons.
	6 silos each of 500 tons capacity.

CRANES: 29 electric cranes, capacity 3 – 45 tons, outreach 10 – 35 m. 2 diesel-electric mobile cranes, capacity 1.5 – 6.0 tons, outreach 8.0 – 2.5 m.

1 locomotive crane, capacity 5 tons.

TANKERS:

Terminal Operator: Repsol Petroleo, S.A. Cable Address: Repsol Petroleo, S.A., Maritime Terminal, Corunna. Tel: (981) 289111, 289222. Telex: 82144, 86530. Fax: (981) 276011. VHF: Channels 12 and 72 (24 hour watch).

Telexes, cables and faxes must state "Please deliver a copy to Maritime Terminal Office".

Arrival Advice: All vessels bound for Repsol Marine Terminal are required to provide the following information: Time and date of departure and initial ETA at Corunna immediately after leaving the last port of call.

Confirmation of the vessel's ETA to be sent by telex or cable 72, 48 and 24 hours prior to arrival.

Non-compliance with the above requirements may cause delays to the vessel.

All messages should be addressed to the Corunna Ship's Agent with the remarks "please deliver a copy to Repsol Petroleo, S.A. Maritime Terminal".

In the 72 hour message the Master should also state the following information:

Code	*Meaning*
AAA	Ship's name, Call Sign, Flag and Port of Registry.
BBB	DWT and Summer loaded draft.
CCC	Drafts (on arrival, on departure and maximum draft during the stay alongside the Terminal).
DDD	Length, breadth and depth of vessel.
EEE	Operation to be carried out (loading/discharging).
FFF	If loading: Whether vessel is S.B.T/ or C.B.T. and if C.B.T., quantity of ballast to be discharged ashore (maximum rate/whether concurrently with cargo operations/cargo required/sequence/ maximum loading rate (cu.m./hr.)/the requirement of being fitted with a derrick in the cargo manifold area for manoeuvring the cargo hoses into position.
GGG	If discharging: Nature and quantity of cargo on board/API/temperature (°C)/ discharge sequence/maximum rate/whether the vessel is S.B.T. or C.B.T./if C.B.T., ballasting time and whether vessel is able to load ballast and discharge cargo concurrently.
HHH	Manifolds; type, number and diameter (cargo and bunker).
III	Is the vessel fitted with an Inert Gas system?
JJJ	Is the Inert Gas system fully operational?
KKK	Are cargo tanks inerted with a maximum oxygen content of 8% by volume?
LLL	If C.O.W. is to be carried out during the discharging: Vessels are required to ask for authorisation of the Port Authority to carry out C.O.W. while discharging, at least 24 hours prior to arrival, and it may be routed through the ship's agent.
MMM	Date of expiration and last annual survey of the Certificate of Building and I.O.P.P. Certificates.
NNN	Vessels must comply with the "Admission, Handling and Storage of Dangerous Goods National Regulations at Ports", in addition to the IMO Regulations, SOLAS Convention, MARPOL Convention and the recommendations of the "International Safety Guide for Oil Tankers and Terminals" (ISGOTT).
OOO	Name and type of the Insurance policy or Certificate of Financial Guarantee and P&I Club which are in force, concerning civil responsibility for any damage caused by hydrocarbon pollution.
PPP	Is all navigational, safety, anchoring and mooring equipment fully operational and ready for use? If not, specify.
QQQ	Notice of requirement (bunkers, water, etc.) and any other message that the ship's Master considers convenient.

Note: The ETA should be indicated with 6 figures (date/hour/minutes) in G.M.T.

Repsol Terminal: The Terminal Manager or in his absence, the Terminal Operator, is in charge of the Marine Terminal, with a continuous 24 hour service.

The offices are located in the building next to the main entrance gate.

While a vessel is alongside, an operator of the Marine Terminal shall remain on the jetty or wharf at all times to deal with routine operations and any emergency.

Access to the Marine Terminal through the main entrance gate is under the control of a security guard, who shall check the identity and entry permits of any person visiting the restricted area of the Marine Terminal.

Pilotage: Licensed pilots are available on a 24 hour basis, 365 days per year.

All vessels are requested to contact Corunna Pilots on VHF Channel 16, 2 hours before arrival at the rendezvous position, to give confirmation of the vessel's ETA and for receiving instructions about berthing or anchoring.

Vessels may contact Hercules' Tower Lookout on VHF Channel 16.

Tugs: Two tugs of 3,500 h.p. and 2,650 h.p. each, are contracted to Repsol Petroleo, S.A., to provide a towage service for tankers entering or leaving the harbour as well as emergency, anti-pollution and fire fighting services.

In addition to the tugs mentioned above there are 2 additional tugs whose services can be used when the circumstances require.

Berthing/unberthing manoeuvres of all vessels operating alongside Repsol Petroleo jetties will be carried out in accordance with the following regulations dictated by the Port Authority.

Vessel's Gross Tonnage	*No. of Tugs from 2,500 to 3,100 h.p.*	*Area*	*No. of additional Tugs*
Up to 5,000	1	1st	—
From 5,001 to 10,000	2	1st	—
From 10,001 to 25,000	2	1st, 2nd, 3rd	1 (1st area only)
Over 25,000	2	1st, 2nd, 3rd	1 (1st area only)

All the above tugs maintain a continuous listening watch on VHF Channel 12 and their crew remain on board at all times.

Jetty and Wharf Characteristics: All berths operate throughout 24 hours.

Jetty/Wharf	*Maximum Freeboard (m.)*	*Connections (in.)*	*Pumping Rate (cu.m.p.h.)*	*Products*
Jetty No. 1	10	1×3	100	Bunkers
		1×4	140	Butane/Propane
		1×4	140	Propylene
Jetty No. 2	10	1×10	1,200	Naphtha/Kerosene/ Gasoline
		1×10	1,100	Gas Oil
		1×10	1,100	Fuel Oil
		1×10	1,000[3]	Ballast
		1×10	1,500	G.O.P.V. (No. 1 jetty)
		1×12	2,000[3]	Crude Oil
		1×10	500[3]	MTBE/Methanol
Jetty No. 3	15[1]	2×16	6,000[3]	Crude
	12.5[2]	1×10	1,100	Gas Oil
Jetty No. 4	12.5	1×10	1,100	Fuel Oil
		1×10	2,000[3]	Ballast
		1×10	1,100	Bunkers
San Diego Wharf	6	Telescopic Trunk	120 t.p.h	Coke

Note:

[1] For Crude Oil.

[2] For Fuel Oil, Gas Oil and Ballast.

[3] Discharge of MTBE Crudes, Methanol and Ballast.

Customs: Vessels proceeding to discharge should bring the Manifest of Cargo visaed by the Spanish Consul in the port of origin. Should Spanish Consulate not be available, it is to be visaed by the Port Authority, stating in the manifest the remark "no Spanish Consul available".

Foreign vessels are required by Customs Authorities to produce the Ships Stores Declaration, both in English and Spanish, and likewise the Notice of no passengers on board.

Ballast/Pollution:

Vessels in Ballast: Vessels in ballast should arrive with sufficient draft to ensure safe manoeuvring, but shall try to arrive with the minimum of ballast in order to avoid unnecessary delays.

Deballasting: Repsol Terminal is equipped with dirty/clean ballast reception facilities.

Once the vessel is securely moored she will confirm the amount of ballast to be discharged ashore and the estimated time of the deballasting operation.

On no account should dirty ballast, polluted water and oily water or oily wastes from bilges be discharged into the port waters.

Only segregated ballast will be allowed to be discharged into port waters and then only under the responsibility and supervision of the Master.

Pollution: The Master is responsible for the observance of the following instructions:

Any leakage or spillage must be reported immediately to the Terminal Operator and the Terminal Office on VHF Channel 67. The Terminal Operator will immediately take emergency action as necessary and notify the Head of the Terminal Area.

Never rely on a shore stop as this will not exonerate the vessel from responsibility and clean-up expenses if cargo or bunker tanks overflow.

All flanged joints required to connect loading arms/hoses to a vessel, e.g. reducing pieces/spools, shall have a full set of bolts/studs available, the length of which being such that they stick out of the outer surface of the nut a minimum of 5 mm.

Provisioning: It is strictly forbidden to supply provisions or stores over land to vessels berthed alongside the Terminal jetties.

Provisions or stores shall be allowed to be loaded over the jetty to vessels but only with the permission of the Terminal Manager in cases of emergency and depending on the nature, measurements and weight of the commodities. These shall be carried by a vehicle duly authorised near the access to the jetty where the vessel is berthed.

The accesses to the jetty and/or vessel shall never be blocked and the safety regulations shall be properly complied with.

The Terminal Manager, after having received a request from the ship's agent, will authorise the supply of provisions and stores by sea, for which a barge carries out the service and secures alongside the vessel's stern. The Safety Regulations must be properly complied with, handling the provisions and stores on the poop deck and keeping clear the manoeuvring area (ropes, winches, etc.).

In case of need and at the discretion of Repsol the authorisation for the supply of provisions and/or stores on board the ship may be limited or cancelled.

Light products, LPG or Propylene carriers are not allowed to receive provisions or stores whilst alongside the jetties of the Terminal. The ship's agent should arrange storing to be carried out prior to or after the stay of the vessel alongside the Terminal.

Storage or Goods in Bond: It is strictly prohibited to warehouse in bond on the Terminal, goods discharged from or delivered to vessels.

Waste and Rubbish: It is prohibited to throw garbage or waste materials into the sea or onto the pier. Such materials are not allowed to be discharged ashore either. Vessels are required to have the appropriate installations available to store them during their stay in port.

All circulation pipes, sewage outlets, etc., which discharge on to the shore must be properly protected to prevent the water from falling on to the pier.

FRESH WATER: Can be supplied by pipeline at most berths, rate 30 t.p.h. – 150 t.p.h., or by barge at rate of 150 t.p.h.

FUEL: Can be supplied by pipeline at most berths. No barges.

CUSTOMS ALLOWANCES: Normally Customs permit 200 cigarettes per man out of bond. Additional quantities needed depend on the stay of ship in port. 1 bottle of spirits per man.

REPAIRS: Minor repairs can be effected in shore work shops.

AIRPORT: Nearest international airport at Santiago de Compostella 60 km. away. Local airport at Alvedro 5 km. away.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: Work can be arranged on following holidays. New Year's Day (January 1st, full day); Epiphany (January 6th, full day); Easter Thursday (half day); Easter Friday (full day); St. Joseph Artizan (May 1st, full day); Patron Saint of Spain (July 25th, full day); Ascension Day (August 15th, full day); Holiday of Hispanicism (October 12th, full day); All Saints' (November 1st, full day); Immaculate Conception (December 8th, full day); Christmas Day (December 25th, full day).

POLICE/AMBULANCE/FIRE: Police 221100. Port Police 223200. Ambulance 230810. Fire 295511, 295544 and 225555.

GARBAGE DISPOSAL: Collection service available. Skips provided alongside. This service has to be requested through the agent. 24 hour service. Charges included in normal port dues.

WASTE OIL DISPOSAL: Contact: Limpieza Maritima de Oleos, S.L., in La Coruna. Tel: 246000, 246169. Fax: 246320.

Trucks and tankers (Marpol) utilised for collection and removal. Arrangements to be made by ship's Agent.

SEAMAN'S CLUBS: None.

CURRENCY: Spanish Pesetas (Pta).

GENERAL:

Chart: B.A. Chart No. 1114.

Winds: The prevailing wind direction in the Winter season is Southwest and Northwest and in the Summer season Northeast.

AUTHORITY: Autoridad Portuaria de la Coruna, Avenida de la Marina No. 3, 15001-La Coruna, Spain. *Tel:* 81.22.74.02 (03-04-05). *Telex:* 82364 Jpco-E. *Cables:* Autoridad Portuaria. *FAX:* (81) 205862. *Contact:* Javier de la Riva, Port Director.

FERROL: 43.28 N. 08.16 W. (See Plan)

PORT LIMITS: Whole of the area in the Estuary joined by an imaginary line between Punta Coitelada and Cabo Priorino.

DOCUMENTS:

3 Crew Lists.

2 Passenger Lists or a negative.

1 Cargo Manifest of goods destined for the port.

Another Manifest covering transit cargo.

2 Stores Lists, including tobacco, cigars, cigarettes, coffee, spirits, radios, cameras, etc., in possession of crew. In all cases make and number of radios to be indicated.

Safety Radio Certificate and Safety Equipment Certificate.

If vessel carries over 6 kilos tobacco per man, the excess to be declared in a separate manifest, which must be visaed by Spanish Consul at the last port, otherwise vessel is exposed to heavy fine.

PILOTAGE: Compulsory. International code signals used to call Pilots. Pilots board off Ensenada de Carino.

MAX. SIZE: For entering and leaving the River Mouth: Cargo vessels up to 42 ft. draft.

HEALTH: If vessel proceeds directly to berth, Pratique can be obtained immediately after berthing. Otherwise, at anchorage at vessel's arrival. If vessel has sickness on board of a contagious nature Masters should advise Health Authorities by radio, and they will examine patients immediately upon arrival, to enable vessel to be granted Free Pratique.

RADIO: Corunna Radio (Riazor): Calls on 1748 kHz and listens on 2182 kHz and 2122 kHz.

Corunna (Eiris): Call sign "EAR" on 500 kHz and 472 kHz.

VHF: El Ferrol Pilot maintains permanent watch on Channel 14.

Corunna (Eiris): Call sign "EAR" on Channel 16 and 26.

TUGS: Available up to 1,750 h.p. Also salvage tug normally stationed at Ferrol.

BERTHING: Depth alongside quays 25 ft. – 42 ft.

CRANES:

No.	*Capacity* (tons)	*Reach* (m.)
1	16	35/9
1	16/30	35/9-10/23
4	12	26

Floating cranes available up to 130 tons capacity.

TANKERS: CLH, 3 berths, can accommodate tankers up to 656 ft. length and 30 ft. draft.

Tanker Cleaning and Gas-Freeing Plant: A deballasting, gas-freeing and tank cleaning plant is operating at Ferrol. It allows for vessels of any tonnage, and provides washing and degassing of tanks, dirty ballast intake and slops intake. Supply of drinking water and hot water up to 70°C is provided for washing tanks with a flow rate of up to 600 cu.m./hr. and an average pressure of 15 kg./sq.cm. Crane facility is also available.

FRESH WATER: Can be supplied from the quays.

FUEL: Can be supplied from the quays.

REPAIRS: Facilities for repairing all kinds of Naval and merchant ships are available. Any kind of hull or machinery repairs and installations can be carried out, as well as annual and 4 yearly surveys, reclassification, transformations and enlargements.

DRY DOCKS: 5 dry docks for building and repairing Naval and merchant ships. Largest dry dock length 330.20 m., width 50 m., capacity 230,000 g.r.t.

Shipyards: There are two main shipyards in the bay area, one of them with a turbine manufacturing section.

CUSTOMS ALLOWANCES: Normally Customs permit 200 cigarettes per man out of bond. Additional quantities needed depend on the stay of ship in port. One bottle of spirits per man.

AIRPORT: Alvedro Airport (La Coruna), two services a day to Madrid. Labacolla Airport (Santiago) 108 km. from the port. Regular services to Oviedo, Santander, Bilbao, San Sebastian, Barcelona, and Madrid.

TIME: GMT plus 1 hour in Winter. Summertime kept from March to September.

HOLIDAYS: Work can be arranged on following holidays. New Year's Day (January 1st, full day); Epiphany (January 6th, full day); Easter (two days); Easter Monday; St. Joseph Artisan (May 1st, full day); Labour Day (July 13th, full day); Patron Saint of Spain (July 25th, full day); Assumption Day (August 15th, full day); Holiday of Hispanicism (October 12th, full day); Constitution Day (December 6th); Immaculate Conception (December 8th); Christmas Day (December 25th, full day).

SERVICES: A modern deballasting, gas-freeing and tank cleaning plant accepts tankers up to 350,000 d.w.t.

GARBAGE DISPOSAL: Contact: Limpieza Maritima de Oleos, S.L., in La Coruna. Tel: 246000, 246169. Fax: 246320.

Trucks and tankers (Marpol) utilised for collection and removal. Arrangement to be made by ship's Agent.

WASTE OIL DISPOSAL: See "Garbage Disposal".

AUTHORITY: Autoridad Portuaria de Ferrol – San Ciprian, Muelle Curuxeiras, Apartado 20, 15401 Ferrol, Spain. *Tel:* 981-352103. *FAX:* 981-353174. *Contact:* D. Miguel Villalobos Santodomingo, Port Director.

GANDIA: 38.59 N. 00.09 W. (See Plan)

LOCATION: The port is situated 65 km. to the South of Valencia. Entrance to the port faces S.E. and is 200 m. wide, with a low water depth of 7.50 m.

APPROACHES: The harbour is entered along the South side of a 1.0 km. long breakwater, running E.S.E. from the shore North of the harbour. The Entrance Channel is about 600 m. in length, with depths of 7 m. to 6 m. (23 ft. – 20 ft.) LWS over a width of 100 m. The distance between the South Pierhead and the root of the breakwater is about 85 m.

PILOTAGE: Compulsory. Arrival notice should be given by telephone to Agent. Vessels are met about 0.5 – 1 mile off the Breakwater Head.

ANCHORAGES: Vessels can anchor off the harbour, in depths of 10 m. to 15 m., bearing of breakwater head (green light) 250° (True) distance 0.5 miles. Bottom sand and mud.

TUGS: 2×1,250 h.p.

BERTHING: The N.E. end of the commercial basin provides a turning place of about 160 m. diameter, where vessels normally turn for berthing bow seaward.

Berth Name	*Length* (m.)	*Depth* (m.)	*Use*
Sur, Prolongacion	150	7.0	Commercial
Sur	150	6.0	Commercial
Frutero	310	6.0	Commercial
Moto-Veleros	175	4.5	Fishing and fuel supplies
Pesquero	100	3.0	Fish
Norte	125	6.0	Various
Serpis	150	9.0	General Cargo

CRANES: The port of Gandia operates 7 gantry cranes, privately owned, with capacity of 2.5 tons to 35 tons and 4 mobile cranes.

CARGO HANDLING FACILITIES: Good warehouse accommodation. Forklifts, trucks, clamps, etc.

There is a warehouse for cold/frozen cargoes storage.

STEVEDORES: *Working Hours:* Winter: 0800 – 1200/1300 – 1700 Summer: 0800 – 1200/1400 – 1800.

FRESH WATER: Can be supplied alongside all piers.

REPAIRS: Small repairs can be carried out.

AIRPORT: Valencia Airport, 70 km. distant.

AUTHORITY: Autoridad Portuaria de Valencia, Muelle de la Aduana S/n, 46024 Valencia, Spain. *Tel:* 34-6-3939500. *Telex:* 64508. *FAX:* 34–6–3939599. *Contact:* Rafael del Moral Carro, Port Director.

GARRUCHA: 37.10 N. 01.49 W. (See Plan)

SHIPMASTER'S REPORT: (Updated 1984).

DOCUMENTS: Usual forms required:

4 Crew Lists
1 Crew Declaration
1 Ship's Stores Declaration
Ship's Register
Cigarettes and spirits sealed.

APPROACHES: Coming in from the East the port is easy to find, first sighting is of a small Spanish town at the edge of the sea. On the radar the harbour breakwater begins to show up at 12 miles, and is clearly distinguished at 6 miles.

PILOTAGE: The Pilot boards from a small open boat about 2 cables from the end of the breakwater, the boat is painted white and for a short spell shows a blue flag with a white "P" on it to convey that he is the Pilot and not a local fisherman.

There are 2 Pilots available. The service of a Pilot is obligatory both on entry and leaving for vessels of more than 50 g.r.t.

ANCHORAGES: On our arrival 1 vessel was anchored in a position off the centre of the town, 2 cables from the end of the breakwater on a line drawn continuing from the breakwater, this appears to be the anchorage mentioned in the Admiralty Pilot Book. We passed close inshore of her and obtained soundings of 14 m. – 16 m. when passing her position, whilst we were alongside another vessel arrived and anchored 1.5 cables to seaward from the breakwater.

RADIO: ETA to Pilots 24 hours prior to arrival.

VHF: Call Pilots on Channel 16, 1 hour prior to arrival.

TUGS: Two tugs of 1,200 h.p. to assist manoeuvring of vessels on entry and departure, the tug's assistance being obligatory for vessels of more than 110 m. LOA or 3,500 g.r.t.

BERTHING: The vessel entered the harbour from the South, when the bow was almost level with the end of the inner berth the starboard anchor was dropped to 1 shackle and the vessel swung to starboard on the anchor, a headline was sent away and when the vessel was three quarters swung the anchor picked up. The face of the quay was protecte with large roller rubber tyre fenders.

HARBOUR: The maximum permitted draft at the commercial quay is 8.5 m. The commercial quay will be extended to 220 m. length.

The harbour is man-made, the outer wall is made of high stone blocks in an "L" shape, the foot of the "L" attached to the land and the outer part running in line with the shore. It is entered from the South with a mole on the port hand enclosing a small fishing harbour. Minimum dept according to the Pilot is 6.3 m. In the N.W. corner on the outer breakwate there is a large concrete apron extending for a length of approximatel 100 m. where we loaded, then from the seaward end to the end o breakwater there is an open berth with a large cantilevered loading chut jutting out over the harbour which is fed from conveyors on the seawar side of the breakwater.

LOADING: The main export of the port is gypsum stone in bulk, w loaded from quay with 4 conveyor belts being fed by dumper trucks in bins on the end of the conveyor belts from the cargo stacked on th quay. Loading rate with the 4 conveyors was up to 1,000 tonnes/p. The labour was helpful in positioning the conveyors to our requiremen and they have one man who keeps a careful eye on the draft.

SUPPLIES: There is a ship chandler in Garrucha. Fresh water is suppl by road tanker and pumped aboard, the tankers holding approximat 6 tonnes and 10 tonnes.

AUTHORITY: Empresa Publica de Puertos de Andalucia, Puer Pesquero de Garrucha, 04630 Garrucha, (Almeria), Spa *Contact:* Alfonso Rodrigues Romero, Port Director.

GIJON: 43.34 N. 05.41 W. (See Plan)

LOCATION: The port is located on North coast of Spain in Gijon Bay. The harbour of Gijon has 3 main areas: Commercial area (formerly called Musel) on N.W. of Bay; Local Harbour on S.E. of Bay (used by yachts); Central area, where ship and dockyards are located.

PORT LIMITS: The limits of the harbour are defined by an imaginary line linking the extreme end of the "Dique Principe de Asturias" and Cerro de Santa Catalina. Beyond those limits, a vessel is still considered an "arrived ship", but is exempt from paying port dues.

DOCUMENTS: The following documents, duly signed by the Master, are required:

3 copies Crew List.
2 copies Provisions and Stores List.
2 copies Personal Effects Declaration.
4 copies Passenger List. If no passenger on board, state so in the cargo manifest and no list is required.
5 copies Cargo Manifest (3 for Gijon bound cargo, 2 for any transit cargo. A No-Cargo (ballast) manifest required when no cargo on board).

Transit Tobacco Manifest: If the total quantity of tobacco on board exceeds an average of 6 kilos per crew member, the excess quantity must be declared on a Transit Tobacco Manifest, describing the tobacco in Spanish as "Tabaco en transito". This Manifest is to be signed and stamped at a Spanish Consulate (alternatively to be visaed by another consulate or local Customs Authority).

In addition, the following Ship's Certificates are required for clearance:

Ship's Register.
Safety Radio.
Safety Equipment.
Safety Construction.
Load Line.
I.O.P.P.
Oil Residues Declaration (Annex I, Marpol 73/78). Forms provided by the Agent.

PILOTAGE: On approaching the Port of Gijon, Masters are to contact the Pilot Station via VHF Channels 16 and 14. The Pilot will board the vessel in the roads. Pilotage is compulsory.

ANCHORAGES: The Bay of Gijon, where the port is located, is a wide open area with deep water. Large vessels remain at anchor (when berth is not available) outside of the port limits. Smaller ships may anchor within the port limits. Masters should contact Pilot for most suitable anchorage place.

RESTRICTIONS: The mouth of the harbour is 600 m. wide, and depth at LWOST is over 18.5 m. Tidal range: 4.6 m. Present draft restriction is 57 ft.

MAX. SIZE: See "Berthing" and "Developments".

Ships bound to perform unloading operations at "Muelle Moliner" may enter with a max. draft of 46 ft. and a max. length of 275 m.

Ships bound to perform unloading operations at Muelle de Minerales may enter with a max. draft of 57 ft.

HEALTH: Free Pratique obtained by sending a cable to "Sanidad Exterior Gijon". It is automatic for vessels coming from another Spanish port or EEC country. If any death on board, Agent should be contacted first to advise adequate procedure, depending upon the nature of the death.

RADIO: Cabo Penas Radio. Call 2102 kHz. Answer 1677 kHz.

VHF: Pilots/tugs/linesmen on Channel 14. Cabo Penas Radio on Channel 16 (for calling) and Channel 26 (for traffic).

TUGS: "Torres" (2,050 h.p.), "Penas" (2,500 h.p.), "Nalon" (2,750 h.p.), "Narcea" (2,750 h.p.), "Sella" (3,000 h.p.) and "Arbeyal" (1,650 h.p.). When required, service is complemented with the tugs based at the nearby port of Aviles.

BERTHING: Pier's name, depth alongside during lowest Spring tide, usage and facilities:

Muelle de Minerales:
First Section:
247 m. length. 19 m. depth. Max. draft 17.38 m.
Solid bulk discharge.
Second Section:
405 m. length. 21 m. depth. Max. draft 17.38 m.
Solid bulk discharge.
Two 50 tonne grab unloaders discharging 2,200 t.p.h. each, suitable for 200,000 d.w.t. ships, with a maximum beam of 50. m.

Muelle de Los Porticos (North Pier):
First Section:
554 m. length. 14 m. depth.
Second Section:
146 m. length. 14 m. depth. Liquefied Gas discharge. Rate 100 cu.m./hr.
Connection to gaseoduct.

Muelle Norte:
First Section:
204 m. length. 8.5 m. depth.
Second Section:
211 m. length. 11 m. depth
Repairs and fitting out. Bulk and general cargo.
One dry bulk loader handling 2,600 t.p.h. for ships of 35,000 d.w.t. maximum.

Muelles de Ribera:
Alineacion 1:
230 m. length. 7 m. depth. General cargo.
Alineacion 2:
109 m. length. 7 m. depth.
Bulk cement loading installation 400 t.p.h.
Alineacion 3:
156 m. length. 8 m. depth. General cargo.

Espigon I:
North Section:
220 m. length. 8/10 m. depth. General cargo.
South Section:
190 m. length. 11.5 m. depth.
170 m. length. 9 m. depth.
Loading of steel goods.
2 cranes of 25 tons handling 140 t.p.h.
2 cranes of 12 tons handling 100 t.p.h.

Estacion Maritima:
Alineacion 4:
32 m. length. 6 m. depth.
Not in service.
Alineacion 5:
225 m. length. 7 m. depth. Asphalt and heavy cargoes.
Fixed Ro/Ro ramp, 15 m. wide.

Espigon II:
North Section:
300 m. length. 7 m./9.5 m. depth.
Cement loading installation: 200 t.p.h.
General and bulk cargo.
Head Section:
90 m. length. 12 m. depth. No equipment.
South Section 1:
180 m. length. 8.5 m. depth. General cargo, scrap, steel products.
4 cranes of 6 tons. Handling 60 t.p.h.
South Section 2:
180 m. length. 9.0 m. depth. General and bulk cargo.

Oil Berth:
North Section:
180 m. length. 8.5 m. depth.
Connection for oil products. Rate 400 t.p.h.
South Section:
180 m. length. 8.5 m. depth.
Connection for oil products. Rate 400 t.p.h.

Muelles del Rendiello:
Alineacion 6:
346 m. length. 5 m. depth. Fishing and small boats. Repairs.
Muelle Adosado:
443 m. length. 5 m./7 m. depth. Fishing and ice factory.

Muelles de la Osa:
Alineacion 7–1st.: 317 m. length. 8 m./10 m. depth. Connections for oil products (Continental Oil Co.).
Alineacion 7–2nd.: 250 m. length. 12 m. depth.
Bulk, general cargo and containers.
4 cranes of 12 tons handling 100 t.p.h.
2 cranes of 30 tonnes handling 150 t.p.h.
Alineacion 8:
206 m. length. 11.5 m. depth.
Heavy and general cargo.
Alineacion 9:
198 m. length. 10 m./11.5 m. depth.
2 cranes of 12 tonnes handling 60 t.p.h.
Ro/Ro ramp with width 9.5 m./12 m.

Muelle Moliner:
313 m. length. 14 m. depth. Bulk cargo and steel products.
4 cranes of 12 tons handling 100 t.p.h.

STEVEDORES: *Working Hours:* At "Muelle de Minerales" only, 24 hours a day, 7 days a week, Sundays and Holidays included. All other quays: Monday/Friday 0800 hrs. – 1200 hrs., 1300 hrs. – 1700 hrs. Normal working hours, 1700 hrs. – 2300 hrs. overtime. Saturday 0800 hrs. – 1200 hrs. It is possible to work overtime, and on Saturdays and Sundays at extra cost, by special arrangement.

Exceptionally, at "Muelle de Minerales" no work on January 6th/0600 hrs. to 7th/0600 hrs., May 1st/0600 hrs. to 2nd/0600 hrs., July 16th/0600 hrs. to 17th/0600 hrs., December 24th/1400 hrs. to 26th/0600 hrs. and December 31st/1400 hrs. to January 2nd/0600 hrs.

MEDICAL: Crew members requiring medical attention, hospitalisation, etc. should be reported by the Master to the Ship's Agent for prompt attention. All necessary facilities are available at Gijon.

TANKERS: *Terminal Continental Oil Co.:* 7th Section of La Osa Quays: 2 discharging arms for petroleum products and one charging arm for THF.

Maximum Discharging Rate: Fuel oil 1,300 cu.m./hr. and petrol 600 cu.m./hr.

The terminal operates a 24 hours service every day of the year. Cargo operations permitted by night. The quay has a depth of 11.5 m. at LWOST.

Also see "Berthing" and "Report".

DENSITY: 1026.

FRESH WATER: Available ex-wharf or by barge. From the wharf connections it is supplied at 20 t.p.h.

FUEL: Fuel and diesel oil are available and can be supplied to ships either directly from shore connection (available only at oil berth) or by a small tanker in service for the purpose.

CONSULS: The following countries have consular representation in Gijon: Brazil, Colombia, Costa Rica, Dominican Republic, Finland, France, Germany, Netherlands, Norway, Panama, Portugal, Sweden.

REPAIRS: There are shipyards at Gijon, and work shops specialised in naval works. All types of repairs can be attended to. It is recommended that advanced notification is given when assistance is required. Electrical power is supplied ex-wharf.

Spare Parts: In case of spare parts being forwarded by airfreight, each consignment must be accompanied by an original Airwaybill and a commercial invoice (in triplicate). About 2 days should be allowed for domestic transit and clearance. For truck deliveries, one day.

DRY DOCKS: 2 companies own a total of 4 dry docks at Gijon, the largest of which is 170 m. length, 27.40 m. wide for vessels up to 26,000 tons.

SURVEYORS: American Bureau, Bureau Veritas, Lloyd's Register, Germanischer Lloyd, N.K.K., Norske Veritas. Cargo inspectors also available.
GANGWAY/DECK WATCHMEN: Normally not required nor necessary.
HATCHES: Normally carried out by ship's crew.
CUSTOMS ALLOWANCES: Maximum of 6 kilos of tobacco per crew member, subject to having been declared.
CARGO GEAR: Loading and discharging, save rare exceptions, effected by shore gear.
REPATRIATION: Repatriation of crew members is no problem. EEC citizens need no formalities. Other nationalities are subject to visa or immigration control, for which reason advanced notice must be given to the Agent.
TIME: GMT plus 1 hour in Autumn and Winter. GMT plus 2 hours in Spring and Summer.
AIRPORT: The regional airport, named Asturias (in some instances it is still known as Oviedo) is 40 km. away from the port. There are daily flights linking Gijon with Madrid, Bilbao, Barcelona, Santiago and London. There is a bus service for passengers from Gijon to the airport and vice versa.
HOLIDAYS: 1996: January 6th, February 20th, April 3rd and 4th, May 1st, June 13th, July 16th and 25th, August 15th, October 12th, November 1st, December 6th and 26th.

For work on holidays, see "Stevedores". July 16th is a port holiday only.
POLICE/AMBULANCE/FIRE: Police, Tel: 091; Ambulance, Tel: 092; Fire, Tel: 080.
EMERGENCY CO-ORDINATION CENTRE: Civil Protection, Tel: 006.
TELEPHONES: No facilities yet for placing telephones on board. Only available at Agent's office, or through Cabo Penas Radio.
SERVICES: Tank cleaning equipment, facilities for discharge of tank washings, compass adjusting, radio and radar repairs, supply of charts, nautical publications, sounding paper, course recorder paper, Notice to Mariners, safety equipment, extension of certificates, etc.
BANKS: All Spanish banks are represented in town, as well as others non-Spanish.
STORING: Vessel can be stored by barge (subject to weather conditions) whilst at anchorage, or by truck when alongside. Storing can take place whilst loading/discharging. Trucks can proceed alongside. Forklifts, if required, can be used. Usual customs clearance formalities apply. Local riggers could be employed to assist with storing.
SHIP SUPPLY SERVICE: There are several operators. Agent should be contacted first.
SHORE LEAVE: Crew members of any nationality are allowed ashore.
IDENTIFICATION CARDS: Seaman's Book is sufficient.
GARBAGE DISPOSAL: Service provided by Port of Gijon Cleaning Service. Containers are placed at each berthing line by the Port Authority.
WASTE OIL DISPOSAL: Available.
SEAMAN'S CLUBS: Stella Maris, El Musel, 33290 Gijon. Tel: (985) 321229. Facilities include accommodation, restaurant, postal facilities, telephone, shop, tv-video, reading material, games and chapel.

Casa del Mar, Avda. Eduardo Castro, s/n La Calzada, Gijon. Tel: 327200/326951/327009/327190.
CURRENCY: Spanish Peseta (Pta). U.S.$ 1.00 = Pta.124.48 (March 1996).
DELAYS: Allow 24 hours notice for bunkering.
GENERAL: *Wind Conditions:* N.E. to East in Summer time, coinciding with high pressure. West to N.W. coincides with low pressure. Rotation of winds is direct. Starting S.W. and West, passing to N.W. with high sea, reaching with North the maximum intensity of gale. With N.E., fair weather.
DEVELOPMENTS: A new dry bulk unloading terminal (EBHI – European Bulk Handling Installations) has been completed on the Minerales Quay (See "Berthing"), to accommodate vessels of up to 200,000 d.w.t., with 2 berths with 21.0 m. alongside at LWOST, 2×50 tonne grab unloaders, each handling up to 2,200 t.p.h., a stacking area of 300,000 sq.m. 2 Stacker reclaimers handling 2,800 t.p.h. each and 4.4 km. of conveyors. There is a shiploader on the Norte Quay, linked to EBHI by conveyors, suitable for 35,000 d.w.t. vessels. It provides a loading rate of 2,600 t.p.h. and the berth has a depth of 11.0 m. at LWOST.

It is expected that the maximum allowed draft at Muelle de Minerales will soon be increased.

REPORT: November 1994 (Updated 1996).
Entering/Sailing Regulations:
Maximum draft permitted 57 ft.

Vessels with draft 57 ft. must berth on H.W., also Pilot will board 2 hours prior to berthing.
Anchorage:
Outer: It is suggested to drop anchor 1 mile from port entrance ("Cabo Torres" bearing 090° × 1.0 miles – 1.7 miles).
Inner: Depends on ship's particulars and weather conditions, being decided always by Pilot and Master.
Tide: Maximum tidal range 4.60 m.
Shore Storage Particulars:

Operator:	Repsol Butano, S.A.	
Products handled:	Butane	Propane
Minimum Temperature:	−4°C	−2°C and −45°C
Cargo Pressure:	12/14 kg.	12/14 kg.
Pressurised/ Semi-Refrigerated/ Fully Refrigerated:	Pressurised.	Semi-Refrigerated, pressurised and fully refrigerated.
Maximum Discharging Rate:	400 tons/hr.	200 tons/hr. (−2°C) 200 tons/hr. (−45°C)
Cargo Operations permitted by night:	Yes	Yes
Round the clock Discharging:	Yes	Yes
Vapour Return Line available:	Yes	Yes
Hoses of 6 in. available:	Yes	Yes
Diameter of Shore Line:	8 in. Liquid 6 in. Vapour	8 in. Liquid 6 in. Vapour
Maximum Back Pressure permitted:	4/5 kg./sq.cm.	6/8 kg./sq.cm.

Storage: 10 Butane tanks – 26,490 tons (46,425 cu.m.).
11 Propane tanks – 9,859 tons (17,296 cu.m.).

Storage tanks are located 2.5 km. (approx.) from Marine Terminal and 140 m. above sea-level.
Cargo Handling Equipment:
(a) 3 Shore line connections and 2 discharging arms for liquid as per Plan (See "Plans").
1 Reheater from −45°C to 0°C.
2 Booster pumps 400 t.p.h. capacity each.
(b) Intermediate station 2 km. from port.
4 Booster pumps 90 t.p.h. capacity each.
Railway Gas Terminal fitted for discharging directly from vessel to tank wagons.
Daily railway tank wagons forwarding capacity 1,500 tons.
Products for LPG Carriers: Available on request: Liquid Nitrogen, Methanol, CO2, Freon, Oxygen, Acetylene.

All kinds of chemicals (Gamlen, Perolin, Ameroid, etc.).
Liquified Gases Facilities:

Name:	"Muelle de los Porticos" (Dique Norte).
Type of Berth:	Normal concrete berth with rubber fenders.
Mooring:	Normal mooring system, giving lines to bollards alongside.
Length:	146 m., but any length acceptable.
Draft:	45 ft. (always afloat).
Type of Handling Installation:	6 in. shore hose connections for liquid and vapour and 8 in. discharging arms available. No vessels' hoses required.
Largest LPG/Carriers Entered/Discharged:	76,700 cu.m./48,920 GRT/61,400 DWT Length overall: 228.90 m. Draft: 44 ft. 4 in.

Larger sizes of ships can be accommodated.
Bunkers: Diesel oil and fuel oil available.

The Spanish Bunkering Company Cia. Logistica de Hidrocarburos, S.A. "C.L.H." is attending such service which has contracts with the main oil companies in the world, so Owners' usual contractors can be used for arranging delivery of any quantity required.

1×800 ton barge in operation.
Airport: Asturias Airport usually shown in the timetables, as Oviedo is located 40 km. West of Gijon, approximately 35 minutes drive by car on motorway.

A bus service Airport/Gijon Terminal (45 minutes travel) is regularly operating.

Domestic is the main traffic, but any direct international connection is easily arranged via Madrid and Barcelona from Asturias Airport.

Three weekly direct flights to/from Paris (Charles de Gaulle) and London (Stansted) available.
Spare Parts: Clearance allowed at Asturias Airport.

TIR and any other road transport consignments under EEC regulations are cleared in Gijon Customs House.
Products for LPG/Carriers: Available on request: Liquid Nitrogen, Methanol, CO2, Freon, Oxygen, Acetylene, all types of chemicals (Gamlen, Perolin, Ameroid, etc.).

AUTHORITY: Autoridad Portuaria de Gijon – Aviles, Apartado 82, C/Claudio Alvargonzales 32, 33201 Gijon (Asturias), Spain. *Tel:* (98) 5354945. *Telex:* 87369 Jupo E. *FAX:* (98) 5359917. *Contact:* Carlos Zapico Acebal, Chairman. Joaquin Juan Dalac, Port Director. Jose Pedro Vindel Muniz, General Manager. Harbour Master's Office: Tel: 5321276. Fax: 5310049.

AGENT: Romualdo Alvargonzalez, S.A. Apartado 141, Gijon. Tel: 344400. Telex: 87366. Fax: (98) 5359849.

HUELVA: 37.16 N. 06.55 W. (See Plan

PORT LIMITS: *Zone I:* From Fairway Buoy up to Odiel Point. Dockag charges commence when vessel is made fast to wharf, or inne anchorage.
Zone II: The area between the meridians of 6°48' W. and 6° 56' W. an the Parallel of 37° 04.5' N. and the coast.
DOCUMENTS:
3 Crew Lists.
2 Passenger Lists or a negative.
1 Cargo Manifest of goods destined to Huelva.
Another Manifest covering transit cargo.
2 Stores Lists, including tobacco, cigars, cigarettes, coffee, spir radios, cameras, etc., in possession of crew. In all cases make a number of radios to be indicated.
Safety Radio Certificate and Safety Equipment Certificate.

If vessel carries over 6 kilos tobacco per man, the excess to b declared in a separate manifest, which must be visaed by the Spani Consul at the last port, otherwise vessel is exposed to heavy fine.
PILOTAGE: Compulsory. Services all day. Entry or sailing depen on draft of vessel on arrival or departure. Agent must be in close cont with Pilot Office. Pilots are informed by Agent of ETA at bar. Vess must contact Huelva Pilot Station 2 hours before arrival on V Channel 14 or 16. Maximum draft and special conditions will communicated by Shipmaster. Regulation ladder required.

In rough weather, Pilots will not be available for entries or sailin Pilot Station, Tel: 34-59-284569. Fax: 34-59-247392. Cables: Practi de Huelva. Calle Saniucar Barrameda. Huelva.
ANCHORAGES: Anchorage is designated by Pilots.

MAX. SIZE: Max. LOA 250 m. Max. draft permitted, 39 ft. up to 44 ft. 08 in., depending on the tide.

The entry to port is always subject to tides and maximum sizes of vessels able to proceed to inner quay berths will depend upon the berth and the tidal constant.

HEALTH: As long as Masters of vessels notify Medical Office by cable that there are no sick on board and that the ship proceeds from an area free from contagious diseases as specified by the International Sanitary Regulations, Free Pratique will be granted to the vessel, although this does not eliminate all the sanitary measures specified in the Exterior Sanitary Regulations in force.

Notice should be given en-route towards the Port of Huelva and sufficiently in advance to permit the Free Pratique to be granted.

When there is any sickness on board, no operation will be carried out until the vessel or its personnel have been inspected by the Medical Authorities.

The granting of Free Pratique does not signify that the Yellow Flag may be lowered. This will be done once the Medical Authorities have carried out their inspection or are in possession of the Maritime Health Declaration Form signed by the Master.

RADIO: Local coastal radio station Huelva Radio or Chipiona Radio. Working frequency: 1700 kHz. Listens out permanently on 2182 kHz and Channel 16 on VHF.

Hours of service 24 hours (continuous).

National and International Radio traffic – telegrams and Notices to Mariners.

TUGS: Ship's lines or tug's lines employed. 4 tugs available: 1×1,125 h.p., 1×2,000 h.p., 1×2,200 h.p. and 1×2,750 h.p. Also available 1 sea tractor × 4,040 h.p. Number required to assist vessels at the discretion of the Master in agreement with Pilot. There are Port's suggestions, depending on the vessel size.

BERTHING: *Muelle de Torre Arenillas:* Mineral loading quay – 465 m. mooring length and 12 m. depth of water at LWST. 2 loaders of 1,200 t.p.h. each.

Pantalan de A.I.E.S.A.: Jetty belonging to "Aragonesas Industria Energia, S.A." for movement of liquid and solid bulk cargo. Length 150 m., with 8 m. depth of water at LWST. For movement of solids, a gantry crane of 6 tonnes is available, together with 3 tubes for liquids – 150 mm. (200 cu.m./hr.); 200 mm. (250 cu.m./hr.) and 100 mm. for liquid chlorine (80 cu.m./hr.).

Fertilizantes Espanoles S.A.: Extension of the Fertilizantes Espanoles jetty consisting of fitting out liquid quay for movement of solid bulk cargo. Length 120 m., 7.0 m. depth of water, 3×15 tonnes gantry cranes and pipes for conveyance of phosphoric and sulphuric acids. Rates: Phosphoric acid (loading) 350 t.p.h. – 550 t.p.h. Sulphuric acid (loading/unloading) 200 t.p.h. – 300 t.p.h. Phosphates (unloading) 500 t.p.h. – 800 t.p.h.

Ertoil S.A.: "Reina Sofia Quay" of Ertoil S.A. for the movement of liquid bulk cargoes, is 700 m. long and 8.0 m. – 9.5 m. depth at LWST. 2 berths for vessels up to 6,000 d.w.t., 1 berth for vessels up to 3,000 d.w.t. and 2 berths for lighters and tugs. Petroleum Products: 2×8 in. loading arms at East Berth; 1×8 in. loading arm at Central Berth and 3×8 in. loading arms at West Berth. Ballast: One loading arm at East and West Berth, rate 350 cu.m./hr. – 800 cu.m./hr. Titanium effluents: Two points at each end berth. Phenol/Acetone: Two loading arms at East Berth and 2 loading arms at West Berth. Propylene: 1×4 in. loading arm at Central Berth.

Pantalan de Foret S.A.: Liquids pier for vessels of 60 m. – 120 m. LOA and draft up to 7.5 m. Depth alongside 9.5 m. 1×8 in. pipeline for transferring sulphuric acid.

Pantalan de Empresa Nacional Minas de Almagrera: Length 120 m., depth 9.5 m. Mooring for vessels with liquid cargoes (sulphuric acid) from 3,000 d.w.t. – 15,000 d.w.t. 1×14 in. pipeline for transferring sulphuric acid.

Pantalan de CAPESA: Liquids pier for vessels of 120 m. – 200 m. LOA; max. 35,000 d.w.t. and draft up to 9.0 m.; 2×10 in. arms. Petroleum products.

Levante (Eastern) Quay: Length 1,200 m. of which 700 m. is for general cargo and bulk cargo. Depth 8 m. Equipment includes 6×8 tonne cranes for general cargo.

Tharsis Quay: 320 m. long, depth of water 6.0 m. Quay used for taking fresh water and supplies.

Fertilizantes Espanoles S.A. Quay: 120 m. long, depth of water 6.5 m. Used for fertilisers and liquid bulk cargoes. 6 in. line for unloading sulphuric acid (100 t.p.h.) and 10 in. line for loading and unloading ammonia (150 t.p.h.).

Pertrechos Quay: Used for fishing boat repairs. Backing on to it is a small floating dock.

Saltes Quay: 200 m. long, depth of water 5.5 m. Used for fitting out and deballasting.

Ingeniero Juan Gonzalo Quay: 902 m. long, depth of water 12 m. LWST for general cargo and solid bulk cargo. Equipped with 6 gantry cranes of 12 tons, 5×16 tonne cranes and 1×35 tonne crane. There is also a ramp for Ro/Ro vessels. Max. LOA 250 m.

ENAGAS: Length 290 m. Depth 12.0 m. One berth for LNG. 2 unloading arms rated at 2,000 cu.m./hr. each. One vapour return arm.

CRANES: 43 mobile cranes (private) with capacity up to 160 tons. Also see "Berthing".

STEVEDORES: 48 hours' advice to Agent necessary to engage labour.

MEDICAL: Agent must give at least 24 hours advance notice where medical aid is required. There is a provincial hospital. Vaccination certificates against fevers and cholera are issued by the Provincial Health Authority.

TANKERS: Ertoil S.A. (Oil Division) operate a SBM tanker-mooring 7 miles offshore, about 20 miles distant from Huelva. Mooring is suitable for vessels 900 ft. long with draft up to 70 ft. salt water (depth 72 ft.). Mooring 66 ft. is used for discharging only. Discharge rate is about 2,500 t.p.h. through two 12 in. lines and a 30 in. submarine line.

Torre Arenillas Terminal: Within Huelva port, there are 2 tanker berths, for vessels up to 240 m. LOA in Berth No. 2, and 220 m. in Berth No. 1. Max. draft 12.0 m. at low water.

Berth No. 1 (North) loading/discharging:

LPG	8 in. line
Gasoline	10 in. ,,
Naphtha	10 in. ,,
Diesel	10 in. ,,
Fuel oil	10 in. and 12 in. lines

Berth No. 2 (South) loading/discharging:

Benzene	8 in. line
Cyclohexan	8 in. ,,
Gasoline	10 in. ,,
Diesel	10 in. ,,
Distillates	10 in. ,,
Fuel oil	10 in. and 12 in. lines

Loading Rates: Oil/products 1,000 t.p.h. LPG 80 t.p.h.

Residues: There is a receiving station near the oil quay for tank residues, together with a product separator. Connection lines are 10 in.

Product	*S.G.*	*A.P.I.*
Propane	0.507	—
Butane	0.573	—
Gasoline 85-Ron	0.693	72.68
Gasoline 96-Ron	0.735	61.02
Campsa G.O.	0.832	38.57
R.D. 2494	0.789	47.84
Industrial F.O.	0.945	18.24

DENSITY: Water at this port is salt water. Fresh water, in quantity of 1 in. to 7.5 in., only present in heavy rainy weather.

FRESH WATER: The supply of drinking water is made at the Eastern (Levante) Quay at the rate of 20 t.p.h. per vessel and at quays of Ingeniero Juan Gonzalo, Minerales and Petrolero de Torre Arenillas. This can also be provided by means of tugs at a rate of 50 t.p.h and 30 t.p.h.

FUEL: Fuel oil and diesel available in main port. Not available at offshore tanker terminal.

CONSULS:

Belgium
Denmark
Finland
France
Germany
Greece
Italy
Netherlands
Norway
Panama
Portugal
Sweden

REPAIRS: Any kind in engine room, and hull above water.

DRY DOCKS: Only 1 small dry dock available for vessels up to 3,500 g.r.t.

GANGWAY/DECK WATCHMEN: The employment is at the discretion of Masters, who are free to either employ or do without any watchmen.

OPENING/CLOSING HATCHES: Normally effected by crew, liner vessels excepted.

CERTIFICATES: Safety Radio, Safety Equipment and Derat Certificates should be at hand for production if requested.

CUSTOMS ALLOWANCES: 200 – 300 cigarettes per man out of bond. If necessary permit may be obtained from Customs Authorities to open bond and provide crew with fresh supplies, if stay in port justifies procedure. Wine and/or Spirit Allowances: Two bottles per man.

REPATRIATION: No difficulty in this respect.

AIRPORT: The nearest is at Seville – San Pablo. A distance of 100 km. from Huelva.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: 1st January; 6th January; 28th February; Thursday preceding Good Friday; Good Friday; 1st May; 16th July; 15th August; 8th September; 12th October; 1st November; 6th and 8th December; 25th December.

Permit to work on any of the mentioned holidays can be obtained.

POLICE/AMBULANCE/FIRE: Police 091; Civil Guard 062; Fire Brigade 080; Ambulance 061.

EMERGENCY CO-ORDINATION CENTRE: SAR Tarifa (Cadiz): VHF Channel 16. Tel: 34-00-202202, 34-56-684757. Fax: 34-56-680606. Port of Huelva Emergency Control Centre: VHF Channels 14 and 16.

TELEPHONES: No arrangements exist, for the time being, to place telephones on board vessels.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Not necessary.

GARBAGE DISPOSAL: There is a private contractor service for reception of garbage from ships. MARPOL Certificate available.

WASTE OIL DISPOSAL: Dirty ballast reception at the oil berth of Torre Arenillas. Engine room bilge reception available at all berths. MARPOL 1 Certificate available.

SEAMAN'S CLUBS: Casa del Mar, Avda. Hispano America, Huelva, Tel: 257411/257565. Facilities include accomodation.

DEVELOPMENTS: The Channel has been dredged to a depth of 11.3 m. at LWST from Fairway Buoy up to Buoy No. 11, and 10.8 m. up to Enagas. A new quay is being built between Torre Arenillas Ore Quay and Ingeniero Juan Gonzalo Quay, 600 m. long, for general and dry bulk cargo.

IBIZA: 38.54 N. 01.28 E. (See Plan)

DOCUMENTS: *Passenger Liners:*

5 Crew Lists (Customs, Comandancia de Marina, Health, Police and Consignee).

6 Passenger Lists (Customs, Police, Guardia Civil, Obras del Puerto, Health and Consignee).

2 Lists of Crew and Passengers personal effects (Customs).

2 Stores Lists (Customs).

Health Certificate (Health Department).

2 Cargo Manifest, if any. (Customs).

2 Negative Cargo Manifests, if no cargo.

Cargo Ships:

5 Crew Lists.

2 Lists of Crew Personal Effects.

2 Stores Lists.

Health Certificate.

2 Cargo Manifests.

PILOTAGE: Pilotage compulsory. No ships allowed to go further than imaginary line between Botafoch Lighthouse and Isla Negra del Este, without a Pilot. Advisable to give 24 hours' notice of ETA. Shortly VHF will be installed in Pilot Station and boats. Pilot's boat is of the canoe type with white sides and letter "P" in black on both sides. Vessels requiring a Pilot must give 3 long whistles. By night flash morse "G".

Pilot will board between Botafoch Lighthouse and Isla Negra del Este. In bad weather vessel should follow pilot boat until Pilot is able to board.

ANCHORAGES: Anchorage area situated inside imaginary line: Botafoch-Negra del Este with depths of 40 ft. to 50 ft. Pilot required to anchor.

MAX. SIZE: Max. length for berthing, 135 m. Max. draft 21 ft.

HEALTH: Report in advance to Pilot if there is any problem. If situation is normal, then, after ship berths the Health Inspector boards and quickly grants Pratique. In event of any suspected disease or fever on board, the Pilot (without boarding), will show the anchorage area, then Health Inspectors and Authorities will board, and give necessary instructions.

Vessels entering after calling at another Spanish port have no problems obtaining Pratique.

TUGS: Not available.

BERTHING: Depths alongside 4 m. – 8 m.

STEVEDORES: Available, ETA required 24 hours in advance.

MEDICAL: Civil hospital, military hospital, and 3 private clinics available.

TANKERS: Load/discharge lines 10 in. and 8 in. No facilities for discharging residues. 1 berth. Max. draft of the ship is 21 ft.

FRESH WATER: Available at the quays. 9 tonnes/p.h.

FUEL: Available. Notice required 24 hours.

FIRE PRECAUTIONS: Tankers should have a rope over bows, at water level while the ship is berthed.

REPAIRS: There are good work shops and engineers but with limited possibilities. There is a shipbuilder's yard where they build and repair yachts and canoes.

GANGWAY/DECK WATCHMEN: Performed by crew.

OPENING/CLOSING HATCHES: There are no fixed rules on this matter: it varies according to the circumstances.

CUSTOMS ALLOWANCES: There are no free allowances.

REPATRIATION: Facilities for effecting crew changes and arranging any necessary repatriations.

AIRPORT: 8 km. away, served by scheduled flights daily.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: Cargo work can be arranged on the official holidays with an extra charge of 40% to the workmen.

New Year; Epiphany (6th January); Saint Joseph (19th March); Maundy Thursday: half-day (the evening); Good Friday; Ascension of our Lord (40 days after Resurrection); Saint Joseph the Artisan (1st May); The Holy Heart (last Friday of June); Exaltation to work (18th July); Santiago, Lord of Spain (25th July); Our Lady of the Snows, Lord of Ibiza (5th August); Ascent of Blessed Virgin Mary to Heaven (15th August); Feast of the Hispanicism (12th October); All Saint's Day (1st November); Festival of the Immaculate Conception (8th December); Christmas Day (25th December).

Although not yet official there will be introduced as a holiday Easter Monday and 26th December.

POLICE/AMBULANCE/FIRE: Police 301131; Ambulance 301214; Fire telephone call to the Comandancia de Marina, Tel: 301190.

SERVICES: Compass adjusting.

SHORE LEAVE: Crew members are allowed ashore.

IDENTIFICATION CARDS: Required.

DEVELOPMENTS: Increasing depths in the port to 7 m. It has also been approved to enlarge berthing quays to 220 m. and 7 m. depth, and build a fishing dock.

AUTHORITY: Comandancia Militar Marina – Ibiza. *Contact:* Edmundo Fraga Ferreiro, Comandante.

MAHON: Minorca, 39.52 N. 04.18 E. (See Plan)

DOCUMENTS: *Health Department:*

Crew List.

Passenger List.

Disinfect and Derat Certificates.

Port Authorities:

Crew and Passenger List.

Ship characteristics and other details.

Cargo.

Indication of previous Port and destination.

Customs:

Cargo Manifest.

Bill of Lading (Cargo for this port).

Crew List and Passenger List.

Also the Master will produce, if required, Log book and Passports of crew.

PILOTAGE: Compulsory to take Pilot on entry, departure and any movements within port. On approaching port, during day, ships will hoist flag corresponding to International Code "I need a Pilot". By night, by means of lights, according to International Code.

During day Pilot's boat is recognised by a square blue flag with letter "P" (painted white) in centre of flag. Pilotage area comprises all the estuary, from inside port to outside Capes of La Mola and San Carlos.

ANCHORAGES: Inside are good anchorages, for instance Cala Llorga and Plana de Cala Figueras.

MAX. SIZE: Unlimited length and width, but draft is limited to commercial port, 25 ft.; and to anchorage, 43 ft.

BERTHING: Commercial Quay: Length 518 m. average depth alongside 8 m.

Container and Ro/Ro Quay: Length 180 m. depth alongside 6.5 m.

STEVEDORES: Available. Loading and discharge is as follows:

Container Berth: 2 fixed cranes 800 tonnes per day loading and discharge.

Commercial Quay: 2 fixed cranes and 1 mobile crane with a capacity of 1,000 tonnes per day. Priority to regular lines.

MEDICAL: In case of accident or illness of any member of crew medical assistance and hospitalisation will be in civil hospital.

DENSITY: 1028.5.

FRESH WATER: Available. 4 points on the Container Quay and 7 points on the Commercial Quay.

FUEL: Available from CLH at Cala Figueras.

CONSULS: Italy: Tel: 363393; France: Tel: 363889; Netherlands: Tel: 362703.

REPAIRS: Small repairs possible.

OPENING/CLOSING HATCHES: Carried out by crew before 0800 hrs.

AIRPORT: 5 km. from Mahon – international and national flights.

TIME: GMT plus 1 hour from September to March, and 2 hours from March to September.

HOLIDAYS: Main holidays are: 1st January (New Year), Holy Week (variable), 1st May (Labour Day) Corpus Christi (variable), 24th June - National Holiday, 8th September, local holiday, 25th December - Christmas. Work is possible on all these dates provided the labour force is paid extra.

POLICE/AMBULANCE/FIRE: Police: Tel: 36.37.12; Ambulance: Tel: 36.11.80; Fire Brigade: Tel: 36.39.61.

TELEPHONES: No telephones on the Quays.

IDENTIFICATION CARDS: Not required.

MALAGA: 36.43 N. 04.25 W. (See Plan)

DOCUMENTS

5 Crew Lists.

5 Passenger Lists or Negative.

1 Cargo Manifest of goods destined to Malaga, as well as of other cargoes in transit.

Stores List in duplicate, including tobacco, spirits, radios, etc. belonging to vessel.

Details list in duplicate of all personal effects of the crew and Passengers (tobacco, spirits, cameras, radios, etc.). For vessels larger than 499 g.r.t., Safety Equipment Certificate.

Note: Tobacco: In case vessel carries more than 6 kilos of tobacco per man, the excess must be declared in a separate manifest, which must be visaed by Spanish Consul. In absence of Consul, said document will have to be visaed by an Authority or Consul of a friendly nation at the time of the former port clearance. Otherwise, vessel may be severely fined.

PILOTAGE: Pilotage is compulsory and service is permanent. Pilots board vessel by cutter in roads, near entrance formed by 2 breakwaters. Pilot cutters are painted black and have letter "P" in white on each bow. Cutters have a blue flag hoisted on mast, with the letter "P" in white on both sides of flag. At night, cutters have white light, and under this light, a red one. Entrance between breakwaters is 260 m. wide and easily accessible. When weather in the roads is bad, which seldom happens vessels approach as close as possible to entrance in order that Pilot can board easily.

ANCHORAGES: Vessels can anchor outside of breakwaters, in roads in depths of 80 ft. – 90 ft. Anchoring is prohibited in vicinity of tanker moorings, the Pilot will advise best position. Weather is bad occasional when East wind blows, during Winter.

MAX. SIZE: No restrictions in respect of breadth. Max. allowed leng is 220 m. – 240 m. Max. allowed draft to enter port is 40 ft. – 42 ft.

The tanker sealine berth (in roads) can accept vessels up 250,000 d.w.t.

Largest tanker at buoy mooring "Liotina", 317,521 d.w.t., leng 352 m., draft on entering or leaving 22 m.

HEALTH: If vessels proceed directly to berth, Pratique can be obtain immediately after berthing. In case of any suspected disease or fe on board, Master must radio to Agents, in order that they can adv Health Office.

RADIO: Nearest important radio station is Radio Costera (VHF – On Media) Cadiz, or Gibraltar and Aranjuez. Master's messages should received at least 24 hours before arrival.

TUGS: 1×1,050 h.p., 1×1,200 h.p., 1×1,500 h.p. and 1×1,800 h Ship's lines are used, tug-boats are employed according to Pilot's adv and upon request.

BERTHING: Pilots will advise Masters whether vessel has a free berth or not. Also if she has to anchor in Roads. Further particulars can also be obtained from Pilot.

Quay No.	*Length* (m.)	*Depth* (m.)	*Usage*
East	300	11.0	Passenger Cruises.
1A	472	9.4	General Cargo, Containers, Cruise vessels.
1B	99	8.0	General Cargo.
2	450	10.5	Bulk grain berth, Cruises.
3A	150	9.0	General Cargo, Passengers and Ferries.
3B	180	10.5	General Cargo, Passengers and Ferries.
3C	170	8.5	General Cargo, Passengers and Ferries.
4	455	8.0	General Cargo, Ro-Ro.
5	101	6.5	General Cargo, Ro-Ro.
6A	80	6.5	Coal Terminal, Container, Ro-Ro.
6B	400	11.0	Coal Terminal, Container, Ro-Ro, Tanker.
7	363	13.5	Tanker/Dangerous goods.
8	240	13.5	Operated by ENCS to offload crude oil for the Refinery.

CRANES: 17 quay cranes with capacity up to 30 tons.

SPECIALISED CARGO HANDLING FACILITIES: There are regular car ferries for passengers and cargo, Ro/Ro plying with Melilla.

At Quay No. 1, 20 ft. containers can be handled with a crane up to 30 tons and a Hyster forklift with appropriate spreader. Eventually 30 ft. containers will also be handled.

Quay No. 2 includes 15,000 ton silo for grain.

Quay No. 4 includes 9 vegetable oil tanks with a total capacity of 5,782 cu.m.

Quay No. 6 includes a 5,000 ton silo for cement. Unloading capacity 60 t.p.h. – 200 t.p.h.

Quay No. 7 (Foreport) includes 3,312 cu.m. for vegetable oils.

Quays No. 6 and 7 can handle all cargo in bulk, rate for coal 4,000 tonnes per day, in an ordinary working day.

There are 24×4 ton forklifts available for general cargo handling and 3 forklifts (25 tons – 28 tons) for container handling.

STEVEDORES: It is important that Master sends advance message regarding the vessel's ETA. Agents can inform Shippers or Receivers' stevedores accordingly, to arrange operations properly. Official working hours of port are: Monday/Saturday 0800 – 1200, 1400 – 1800 hrs.

MEDICAL: Any kind of medical service can be arranged. In case a crew member needs medical attendance urgently, it is advisable that the Master radio in advance.

TANKERS: *Quays No. 4, 6 and 7:* Operator: Demagrisa. Crude oil and caustic soda discharge pipeline – 250 t.p.h. Refined oil discharge pipeline – 300 t.p.h. Storage capacity 5,782 cu.m.

Operator: Sociedad Anonima Cros. 4 lines for naphtha discharge. Rate 210 t.p.h.

Operator: Repsol. Quay No. 7: Discharge lines for crude oil. Rate 1,500 t.p.h.

Western Jetty: Crude oil pipeline, diameter 24 in. with 2 discharge arms and 1 spare. Discharge capacity 2,000 – 2,500 t.p.h.

Operator: C.L.H. (Quays No. 6 and 7) Discharging and loading pipe for crude oil by-products with 4 inlet valves on each wharf, with 800 t.p.h. discharging capacity.

Wharf adjoining the Western Jetty: 1×14 in. and 3×12 in. discharging and loading pipes for crude oil by-products, with 2 inlet valves and a discharging arm, and 1,000 cu.m./hr. capacity.

Operator: Transcemasa, vegetable oil pipeline, discharging capacity 150 t.p.h., storage capacity 3,312 cu.m.

Playa Misericordia: Operator: Repsol Petroleo. Sea-line for discharging tankers up to 250,000 d.w.t. Max. discharge rate 6,000 t.p.h. through 1×30 in. pipeline.

Operator: Repsol Butano. Sea-line for butane which also handles propane. Max. discharge rate 300 t.p.h.

Operator: Sociedad Anonima Cros. Ammonia pipeline for discharging tankers up to 17,500 d.w.t. through 1×8 in. line. Discharge rate 200 t.p.h.

DENSITY: 1025.

FRESH WATER: Always available. Deliveries are performed directly from the quay, rate 20 t.p.h., or by tank-barge.

FUEL: Ordinary fuel oil and gas oil are available at local refinery of C.L.H. It is advisable that Shipowners contract bunkers through their own contractors, with 48 hours notice, so that order can be received in time. Delivery can be performed at bunkering pier at a rate of 60 t.p.h. or by road tankers.

FIRE PRECAUTIONS: Tankers perform their operations at the petroleum berth by Repsol or C.L.H. which have necessary fire precautions.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Required.

AUTHORITY: Junta del Puerto de Melilla, Avenida del Tte. Garcia Valino No. 2, Melilla. *Tel:* 681340. *Telex:* 77492 JPME E. *Contact:* The Port Director.

MOTRIL: 36.43 N. 03.30 W. (See Plan)

DOCUMENTS:

Health Certificate.
5 Passenger Manifests (1 Health, 2 Customs, 1 Police, 1 Agent).
4 Crew Manifests (1 Health, 2 Customs, 1 Agent).
2 Stores Lists (for Customs).

PILOTAGE: Arranged by Agent basis ETA given 24 hours in advance. pilot boat distinguished by painted "P". Night pilotage possible approx. 100% extra, on holidays 50% extra. Vessels await Pilot just outside port. Pilot compulsory for all foreign vessels and Spanish vessels arriving from abroad. Pilot should be requested when 1 mile from the port by means of international signals.

ANCHORAGES: Area near port. The Roads to the East of the port have very little depth. The sea is rough in this area and vessels can run the serious risk of beaching. The best location for anchorage is outside the port 0.25 miles S.S.W. from the port entrance, in 14 m. to 25 m. of water, mud bottom.

RESTRICTIONS: None, vessels may enter day or night.

MAX. SIZE: Entrance 34 ft. at LWS. Max. draft alongside quays, 34 ft.

HEALTH: Free Pratique given on board.

RADIO: Harbour tugboats and pilot operate on VHF Channel 12.

TUGS: One tug, 1,100 h.p. available.

BERTHING: There is 583 m. of quayage with a depth of 8.2 m. (27 ft.) at LWS; 107 m. of quayage with a depth of 6.4 m. (21 ft.) at LWS; 260 m. with a depth of 10.5 m. (34 ft.) at LWS.

CRANES: There are 5 electric cranes of 6 tons capacity; 2 electric cranes of 12 tons capacity and one mobile crane of 3 tons capacity.

BULK CARGO FACILITIES: Muelle de Levante: 285 m. length. Max. draft 8.2 m. (27 ft.) at LWS. Three cranes 6 ton capacity for handling bulk cargoes (grain, ore, coal, fertilisers, etc.). Loading/discharge rates: 300 t.p.h. One crane 3.5 tons to 6 tons for handling general cargoes.

Muelle de Poniente No. 1: 107 m. length. Max. draft 6.4 m. (21 ft.) at LWS.

Muelle de Poniente No. 2: 260 m. length. Max. draft 10.5 m. (34 ft.) at LWS. 2 cranes of 12 tons capacity.

Muelle de Costa: 298 m. length. Max. draft 8.2 m. (27 ft.) at LWS. Two cranes of 6 tons for handling general cargoes.

SPECIALISED CARGO HANDLING FACILITIES: Muelle de Poniente equipped for handling liquid chemicals and asphalt, by lines.

Ro/Ro Berths: 2 Ro/Ro berths at Muelle de Costa and 1 Ro/Ro berth at Muelle de Levante.

STEVEDORES: No ETA advice necessary. Agents arrange gangs.

MEDICAL: No advance notice required. All facilities available.

TANKERS: Vessel about 8,000 tons. No special requirements.

DENSITY: 1025.

FRESH WATER: Available alongside all quays.

FUEL: Gas oil available at Muelle de Levante. Rates of delivery: 200 t.p.h.

CONSULS: None in Motril. The nearest at Granada or Malaga.

REPAIRS: Minor repairs can be affected. There is a slipway for vessels up to 150 tons.

GANGWAY/DECK WATCHMEN: Agent arranges.

OPENING/CLOSING HATCHES: Crew open and close hatches.

CUSTOMS ALLOWANCES: Tobacco: About 100 cigarettes per man. Wine and or spirit. None.

REPATRIATION: Facilities available.

AIRPORT: The nearest airports are Malaga 105 km., Granada 70 km.and Almeria 120 km.

TIME: Local time GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: New Year's Day (January 1st), Epiphany Day (January 6th), Vote Day (January 13th), Maundy Thursday, Good Friday, Wort's Day (May 1st), Santiago Day (July 25th), Assumption Day (August 15th), Pilar's Day (October 12th), Local Holiday (October 15th), Immaculate's Day (December 12th) and Christmas Day (December 25th).

Work can be arranged on above days, however dependent upon permission of the Work Authority.

POLICE/AMBULANCE/FIRE: Police Tel: 601221. Ambulance Tel: 600200. Fire Tel: 600200.

TELEPHONES: No facilities for placing telephones on board.

SHORE LEAVE: Crew members are allowed ashore.

IDENTIFICATION CARDS: Not necessary.

AUTHORITY: Autoridad Portuaria de Almeria – Motril, Direccion del Puerto, Recinto Portuario, 18600 Motril (Granada), Spain. *Tel:* (958) 601207, 601238. *FAX:* (958) 601234. *Contact:* Julian Maganto Lopez, Port Director.

PALAMOS: 41.50 N. 03.08 E. (See Plan)

DOCUMENTS:

3 Crew Lists.
1 Passenger List or negative.
Manifest of goods destination Palamos and in transit.
Stores List in duplicate, including tobacco, spirits, radios, etc. belonging to vessel.
Detailed list in duplicate of all personal effects of crew and passengers (Tobacco, spirits, camera, radios, etc.).

Tobacco – any excess over 6 kilos per person must be stated on a separate manifest duly visaed by Spanish Consul.

If on inspection differences are found (more or less), articles removed and heavy fine imposed.

PILOTAGE: Pilotage is compulsory and service is permanent. Pilot is informed by Agent of vessel's ETA given 24 hours in advance. When vessels approach the breakwater, Pilot will board. Pilot boat is white with a black "P" painted on the side.

RESTRICTIONS: None but for draft. Vessels carrying dangerous cargo should get authorisation for berthing prior to arrival of the ship.

MAX. SIZE: No restrictions in respect of length. Max. draft 14.0 m.

HEALTH: Pratique is obtained immediately after berthing. In case of suspected disease or fever on board the Master must radio to Agent in order inform Health Office in time.

RADIO: Radio Costera of Barcelona, Bagur or Marmella.

VHF: Contact Pilot Station on Channel 9.

TUGS: None. Barcelona's tugs could be hired should the vessel's si make it necessary.

BERTHING: Depth of water in centre of harbour 15.0 m. – 20.0 m.

Commercial Quay: Length 258 m., depth 14.0 m. Ro-Ro ramp at Easte end with width 30 m. for ships with max. draft 12.0 m.

West Quay: Length 150 m., depth 7.0 m.

CRANES: 1×6 ton quay crane and 2×150 ton mobile cranes.

STEVEDORES: 24 hours' notice required in order to arrange gangs.

MEDICAL: Any kind of medical service can be arranged if informati received in time.

FRESH WATER: Plentiful supply of water by means of hoses from t pier to vessel. Maximum rate 100 cu.m./hr.

FUEL: Can be supplied. 24 hours' advance notice required.

CONSULS:

France	Tel: 314472	Portugal	Tel: 320148
Denmark	Tel: 314400	Sweden	Tel: 320850
Italy	Tel: 320200		

REPAIRS: Only small repairs.
SURVEYORS: Comisariado Espanol Maritimo – "Comismar". Tel: 210610, 215666.
GANGWAY/DECK WATCHMEN: It is not compulsory but advisable at night.
OPENING/CLOSING HATCHES: Normally opened/closed by the crew, otherwise according to Charter Party.
CERTIFICATES: Usual documents on board. Safety Wireless, Safety Equipment, Derat and Registered Tonnage Certificates are the only ones required by the Authorities.
CUSTOMS ALLOWANCES: Crew: 6 kilos tobacco per person. Passengers: 2 kilos per person. Any excess on this amount must be declared on a separate Manifest as in transit. Wine and/or Spirit: only 1 bottle per man. Any excess must be declared on a separate Manifest, as cargo in transit and stowed apart from the tobacco and spirits carried under the Provisions List. This Manifest must be visaed by the Spanish Consul at the last port of call. Any infringement of this regulation will subject the vessel to the immediate imposition of heavy fines and confiscation of the excess tobacco.
REPATRIATION: Good facilities exist.
AIRPORT: Gerona Airport situated at 42 km. distance and half an hour by car from Palamos. Regular flight services with Madrid, Barcelona, Palma Mallorca, London, and all over the world with transfer at Madrid and/or Barcelona.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer (March-September).
HOLIDAYS: 11th September.
POLICE/AMBULANCE/FIRE: Police 31 41 87; Ambulance 31 43 50; Fire 31 43 50.
IDENTIFICATION CARDS: Not required.
DEVELOPMENTS: The container yard is to be enlarged in the near future.
AUTHORITY: Ayudante Militar de Marina, Ayudantia Militar de Marina, Palamos (Gerona – Spain). *Tel:* 314070. *Cables:* Ayundante Marina Palamos.

Comissio de Ports de Catalunya, Doctor Roux 63, 08017 Barcelona, Spain. *Tel:* (93) 2041600. *FAX:* (93) 2054806.

Comissio de Ports de Catalunya, Zona Portuaria 1, Pg. General Mendoza 7-T, 17002 Gerona, Spain. *Tel:* (972) 201427. *FAX:* (972) 206856.

PALMA, Majorca: 39.34 N. 02.38 E. (See Plan)

PORT LIMITS: The seaward boundaries in order to pay port dues are constituted by a line between Cap Enderrocat and Punta de Cala Figuera.
DOCUMENTS: To be presented by Spanish registered ships in coastal trade:
Role of Navigation.
Crew List (on entering).
Crew List (on leaving).
Passenger List (if any).
General Declaration.
List of Goods (if any).
Health documents from port of origin.
Declaration of Coastal trade goods under fiscal dues (if any).
Application for berthing or port facilities.

To be presented by Spanish or foreign registered ships arriving from overseas:
Role of Navigation.
Crew List (on entering).
Crew List (on leaving).
List of Solework.
List of ship provisions.
Manifest of Goods (if any).
Health documents from port of origin.
Passenger List (if any).
Declaration of passengers (if any).
Application for berthing or port facilities.

PILOTAGE: Can be requested by VHF Channel 16, by telegram via coastal stations or by an agent to the following address: Camino de la Escollera 19; or by telephone No. 711937 with 2 hours advance notice of ETA.

Pilot boats are located in Consigna Jetty. The boats are painted white with the letter "P" painted in black on each bow or painted in black with the letter "P" painted in white on each bow. The ship should show the "H" flag of the International Code of Signals and should make by light signal the letter "G" of the Morse code. The pilot boat will board the ship in the Pilotage area. If the Pilot boat is unable to reach the ship in this area, it will meet the ship at the entrance to the port. Whilst waiting for the pilot, ships may anchor in the anchoring zone (See "Plan").
ANCHORAGE: West of a line joining Punta de Cala Figuera and Isla de Sa Torre (See"Plan").
RESTRICTIONS: No restrictions are imposed upon entry.
MAX. SIZE: Greatest length of vessel entered: 293.53 m. (Queen Elizabeth), greatest draft of vessel entered: 14.56 m. (Castillo de Salas). No appreciable tides.
HEALTH: If it should be suspected or be known that there is any disease on board, the pilot should be informed, and the ship will be visited by a representative of the Exterior Health Authority accompanied by a Doctor. If the disease is confirmed, the ship will remain at anchor in the area which has been allocated to her, i.e. the quarantine area.
VHF: All communications must be initiated on VHF Channel 16, after which instructions will be given as to which channel will be used.
TUGS: There are 2 tugs in service for ships in the port: the "Manacor" of 825 h.p. and the "Remolcanosa 20" of 1,740 h.p., property of Compania Remolcanosa. There is no minimum tug requirement. The tug will meet the ship at the entrance to the port. The ship's own lines will be used.
BERTHING: There are 2,253 m. of piers and quays with depths between 11 m. and 3 m. in the Eastern docks (Darsenas Comerciales) and 3,176 m. with depth between 12 m. and 4 m. in the Western docks (Darsena de Porto Pi), both for commercial traffic. Four fixed ramps for Ro-Ro vessels are available in Eastern docks and 5 (fixed) 25 tonnes ramps for Ro-Ro vessels and Ferry Terminal are available in Western Docks.
CRANES:
Ribera de S. Carlos: 2×6 tonnes.
Ampliacion Muelle Poniente: 2×6 tonnes.
Prolongacion Muelle Adosado: 1×28 tonnes.
Prolongacion Muelle Nuevo: 2×28 tonnes.
Espigon Exterior: 1×5 tonnes.
Testero Muelles Comerciales: 1×28 tonnes.

STEVEDORES: Contact the following private stevedoring companies:

Transmediterranea S.A., Estacion Maritima 2, Muelle de Paraires, 07015 Palma de Mallorca. Tel: 40 50 14. Fax: 70 06 11.

Transbalear S.A., Muelle Viejo S/N, 07012 Palma de Mallorca. Tel: 72 02 67, 72 37 04.

Iscomar S.A., Prolongacion Muelle Adosado S/N, 07012 Palma de Mallorca. Tel: 72 66 70.

Herederos de Pedro J. Pujol C.B., Muelle Ribera de San Carlos, 07015 Palma de Mallorca. Tel: 40 28 34.

MEDICAL: Medical attention may be obtained by a request via the pilots. There is no hospital in the Port. If dental attention is necessary, it should be requested from the Agent. Vaccinating, when necessary, will be done by the Exterior Health authorities. It is not possible to take vaccination doses away.
TANKERS: The diameter of the connections are 8 in. It is necessary to fit reducing pieces if the ship's lines are not of this diameter. Tank cleaning can be carried out in the Port. Discharge rate is 200 cu.m.p.h. – 300 cu.m.p.h.

Load/discharge lines for tankers are situated at the outer end of Dique del Oest (West Pier) at the new bulk liquids terminal of C.L.H., S.A.
DENSITY: 1028.
FRESH WATER: Available at most quays. A special request form has to be filled in at the Harbour Master's Office for this service.
FUEL: Official supplier is C.L.H., S.A. Direct quay-vessel delivery is available in Muelle de Peraires Quay. In the rest of the harbour a tanker lorry is used. Advance notice required.
FIRE PRECAUTIONS: The quay must be closed off with barriers between the bow and stern of the ship and to the point from which the connection is made. Smoking, lighting of fires, using lights or running of unprotected engines if forbidden in the enclosed area. Ships should check the Shore Check List for emergency procedures, fire fighting equipment, lighting and electronic equipment, etc.

REPAIRS: Only possible to handle 2,000 ton vessels in the shipyard of "Astilleros Mallorca".
DRY DOCKS: A 250 ton floating unit for yachts is available in "Astilleros Mallorca".
SURVEYORS: Surveyors from Lloyd's Register and Bureau Veritas can be contacted in the area through the Agent Miguel Puigserver S.A. and by Compania Britannia S.A. and TNI. These companies can be contacted via the Customs Agency Schembri S.A. In cases where the ship is insured by another company, refer to Lloyd's Register.
HATCHES: Opening/closing is usually carried out by crew.
CUSTOMS ALLOWANCES: It is forbidden for the crew members to remove from the ship any quantity of tobacco or alcoholic beverages. Passengers may take away 200 cigarettes, one bottle of alcoholic liquor and one bottle of perfume, with contents not greater than 200 gm.
CARGO GEAR: Loading and discharging normally is carried out using the port's equipment.
AIRPORT: Palma Airport is 14 km. from the port. Regular flights to the principal cities of Europe and the most important airports of Spain.
TIME: In Autumn and Winter local time is GMT plus 1 hour and during Spring and Summer GMT plus 2 hours. Change of time is at 0200 hrs. of the Sunday after the change of the season (Late March – Late September).
HOLIDAYS: The usual holidays at Christmas and Easter and others depending on the yearly Government rules. No cargo work can be arranged on those days.

Local Holidays: 1st January (Epiphany); 20th January (St.Sebastian); at Easter: Good Friday and Monday after Easter; 1st May (Labour Day); 25th July (St.James); 15th August (Assumption Of Our Lady); 12th October (Columbus Day); 1st November (All Saints Day); 6th December (Constitution Anniversary); 8th December (Immaculate Conception); 25th and 26th December (Christmas).

POLICE/AMBULANCE/FIRE: The telephones of the respective headquarters are as follows: Police 091; Ambulance 200706 and 270770; Insalud Hospital 061; Fire Brigade 080.
Emergencies: Red Cross of the Sea. Tel: 295000, 202222. Coast Guard 900-202-202; M.R.C.C.: VHF Channels 16 and 10; Weather: 403511, 906-365307.
TELEPHONES: Telephones can be installed on board ships at Dique del Oeste and Muelle de la Ribera de San Carlos. Cost is 19,800 Pts. per telephone plus the cost of any calls.
SERVICES: The Company Naturaser, located in the Dique del Oeste, Estacion Maritima No.5, can carry out the collection of dirty water produced by tank cleaning, bilge cleaning and fuel slops. It also has equipment necessary to clean tanks. It is possible to adjust compasses and to repair radios and radar.

Contact: Angel Matias Mateos, Port Director. Jose Escalas Porcel, Port Captain.

PASAJES: 43.20 N. 01.56 W. (See Plan)

PORT LIMITS: In this port a vessel is considered to be an "arrived ship" (subject to C/P Terms) when the Pilot leaves the vessel once she is inside the port. The laytime will commence when the Master has delivered in writing the Notice of Readiness.
Agent's Comment: The Pasajes Port Authority consider the port to be limited by an imaginary line linking the West of Arando Grande and the East of Arando Chico.
DOCUMENTS:

4 Crew Lists.
2 Passenger Lists or negative.
2 Cargo Manifests with an individual copy of each Bill of Lading for items to be discharged at port of Pasajes.

Copy of Manifest covering other cargo on board in transit for other ports.

Stores List in duplicate, including tobacco, cigarettes, spirits, radios, etc., belonging to the vessel.

Detailed Crew's Stores List, in duplicate, of all personal effects pertaining to crew and passengers (tobacco, cigarettes, spirits, cameras, radios, arms, etc.).

For vessels exceeding 499 g.r.t., Safety Certificate, Safety Equipment Certificate and Derat Certificate should be on board ready for production.
PILOTAGE: Pilot service is compulsory and permanent. Pilots board vessel in an area about 1.5 miles out from leading lights of port entrance. The telegraphic address is: Corporacion de Practicos, Pasajes. Notice should be given 24 hours before arrival; generally Agents keep Pilots informed of vessel's time of arrival when they are advised by Masters. VHF service in operation.

Pilots' cutter is painted in naval-grey with letter "P" painted in white on both sides of bridge; flag with letter "P" in white, is hoisted on cutter's mast.

International pilot signals are used by Pilots, by means of Aldis lamps, when approaching vessel at night. International light and sound signals to be made by vessel when requiring Pilot.

In event of bad weather Pilots cannot board vessel at usual 1.5 miles location. In this case vessel has to wait for instructions (VHF or radio) for entering port.

With respect to boarding and safety measures, the international safety regulations are to be followed.
ANCHORAGES: A limited number of vessels may anchor in Roads inside the port, in good shelter. Depth in area of anchorage is 25 ft. – 29 ft.
RESTRICTIONS: The entrance channel is 80 m. – 120 m. wide, 1,200 m. long and its depth 10 m. at LST, with sandy bottom. Vessels with a length not over 130 m., provided their draft allows, may enter or leave at any time during the day or night. Vessels with a length between 130 m. and 140 m. may enter or leave from 1 hour – 3 hours before high tide during day or night. Vessels with a length over 140 m. may only enter or leave from 3 hours – 1 hour before high tide during daylight. Vessels with a draft over 25 ft., though less than 130 m. in length, wi only be allowed to sail or enter from 4 hours before high tide to 2 hours after, on account of their draft, both during the day or at night.
MAX. SIZE: The Port Authority has determined the maximum particulars of the vessels that may use the port: those with a length not over 185 m and a draft not over 28 ft. forward and 29 ft. aft on entering/leaving. However, a special authorisation must be obtained from the Capitania Maritima (Civil) for vessels with a length from 175 m. – 185 m. Vessels bound to Lezo Quays are limited to the same draft as above but t 160 m. length.
HEALTH: If vessels proceed directly to berth Pratique can be obtained immediately upon berthing. If vessels anchored in bay, Pratique can b obtained after anchoring. In case of any suspected disease or fever o board, the Master must advise the Agents, by radio, in order that the may inform the Sanitary Authorities in advance.
RADIO: Nearest Radio stations are the coastal radio stations of Igueld and Cabo Mayor. Messages by radio-telephone can be transmitted v Radio Arcachon (France). Notice of ETA should be sent to Age 24 hours before arrival.
BERTHING: Berths are allocated by Port Control after notice of arriv and information regarding cargo given by Agent. Pilots inform Master of location of berth appointed, if any. No tidal difficulties for berthing shifting inside the port.

Berths belonging to Port Control.

Avanzado Norte	63.6	6	Port Authority.
Avanzado Oeste	120.3	6	Solid bulk/general.
Darsena Petroleo	50.0	6	Liquid bulk and ship's stores
Herrera	399.4	5	General cargo.
Reloj	240.0	5	Solid bulk/scrap.
Pescaderia 1	133.5	5.0	Unloading fresh deep-sea fish.
Pescaderia 2	215.0	5.0	Shallow water fish. Ice-storage.
Trintcherpe	381.2	6.0	Repairs, conversions and fitting-out.
San Juan	80.0	5.0	Major repairs, conversions and fitting-out.

TUGS: No tug-boats required for vessels with normal steering when entering port. Tug-boats are required for berthing or shifting to and/or from quays for vessels over 80 m. length. Ship's lines are used and tug-boats are employed according to Pilot's advice.

4 tugs available, the smallest and largest being 1,075 h.p. and 2,110 h.p. respectively.

CARGO HANDLING: *Containers:* 2×30 tonne cranes available for container handling.

Mechanical Handling Equipment: There are 33 forklift trucks ranging from 3 tonnes to 32 tonnes capacity, 32 shovel loader trucks of 3 tonnes to 12.3 tonnes, 6 platforms.

Various ancillary equipment, scrapers, bagging units, bulldozers, barges, lighters, work boats. There are 2 floating cranes, whose power ranges between 6 h.p. and 50 h.p., maximum reach on the largest being 12 m. and its height above sea level being 21 m.

Ro/Ro Traffic: The port has 2 ramps for Ro/Ro traffic at Buenavista 2 and Lezo 3.

Whenever a vessel arrives with flammable products, such as gas, propane, etc., the quay where vessel is discharging is fenced off.

CRANES:

Location (Berth)	*No. of Cranes*	*SWL* (tons)	*Reach* (m.)	*Output* (tonnes/p.h.)
Herrera	1	3.5/6	22.5/12.5	80

Iberdrola I	1	12.5	16.5	250

Mobile Cranes: 2×52 tons with 25 m. reach. 1×45 ton with 22 m. reach.

STEVEDORES: ETA advice should be received by Agent 24 hours before arrival in order arrange loading/unloading operations with stevedores. The official working time in the port is: Monday/Friday 0700 hrs. – 2100 hrs. Overtime on Saturdays, Sundays or Holidays.

MEDICAL: Any kind of medical assistance is available. In case urgent surgical or medical assistance required on vessel's arrival, Agent should be informed in plenty of time to make the necessary arrangements.

No particular inoculations required or vaccination/fever certificates to be produced unless epidemic at last or recently visited ports.

TANKERS: Berth at Muelle Petroleos: 2×8 in. (gas oil), 2×8 in. (fuel oil Nos. 1 and 2, gas oil).

FRESH WATER: Fresh water available at all wharves. Rate of delivery 25 cu.m.p.h. – 70 cu.m.p.h.

FUEL: Fuel is supplied by C.L.H. at Buenavista 1 – 2, Molinao and Capuchinos Quays. The rate of delivery is 100 t.p.h. Owners must pay C.L.H. for the fuel 24 hours prior to its delivery.

FIRE PRECAUTIONS: No specific precautions required unless the vessel carries flammable cargo. Special harbour fire-fighting corps.

CONSULS: Consulates/Vice-Consulates at San Sebastian and/or Pasajes:

Argentina
Belgium
Brazil
Colombia
Costa Rica
Chile
Denmark
El Salvador
Finland
France
Germany
Great Britain
Greece
Italy
Netherlands
Norway
Panama
Paraguay
Peru
Portugal
Sweden

REPAIRS: Repair shops and shipyards available, where repairs or overhauls may be carried out.

DRY DOCKS: One (1) floating dock 99.36 m. long. (internal 84.36 m.), 29.75 m. wide (24.50 m. internal), and 10.40 m. depth of water. Capacity 4,000 tonnes.

One (1) floating dock 68.92 m. long (internal 58.62 m.), 23.25 m. wide (18.0 m. internal), and 9.125 m. depth of water. Capacity 2,000 tonnes.

Two (2) slipways with 6 ramps of length between 130 m. and 157 m. and widths between 7.40 m. and 12.50 m. Max. admissable vessel tonnage: 1,200.

GANGWAY/DECK WATCHMEN: Compulsory. Shore watchmen available.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: Ship's Registry, Radio, Load Line, Equipment and Construction.

CUSTOMS ALLOWANCES: In case the vessel carries more than 6 kilos tobacco per crew member and more than 2 kilos per passenger, the excess must be declared in a separate Manifest which must be legalised by the Spanish Consular Authorities. In absence of Spanish Consular Authorities that Manifest will have to be legalised by an Authority of last port of clearance wherefrom the vessel proceeds. A reasonable amount of alcohol is allowed per man.

REPATRIATION: Good facilities for repatriation.

AIRPORT: Airport of Fuenterrabia is situated at 10 km. from Pasajes. Regular daily services with Madrid and Barcelona.

TIME: GMT plus 1 hour in Autumn and Winter. GMT plus 2 hours in Spring and Summer.

HOLIDAYS: 1st January; 6th January; 19th March; Maundy Thursday; Good Friday; Lunes de Pascua; 1st May; 7th July; 16th July; 31st July; 15th August; 12th October; 1st November; 6th December; 8th December; 25th December.

POLICE/AMBULANCE/FIRE: Police 351391; Ambulance 272222; Fire 080; Red Cross (local) 527052; Hospital, San Sebastian, 447000.

TELEPHONES: No possibility of placing telephones on board.

SERVICES: Divers.

SHORE LEAVE: Crew allowed to land immediately upon arrival.

IDENTIFICATION CARDS: Not required.

DEVELOPMENTS: Work in progress for the reorganisation of the Donibane Port Area.

Installation of a floating ramp for Ro-Ro traffic and complementary works.

Development of computerisation.

Interior fitting-out of the Edificio Trasatlantico (Transatlantic Building).

Work in progress in the Access Channel of the port.

Repair of the road surface on the quays Avanzado Oeste, Buenavista 1 and Molinao.

Detection and monitoring system by means of cameras in the Lezo 3 storage areas.

AUTHORITY: Capitania Maritima de Pasajes, Pasajes, Spain. *Contact:* Louis Pastor Mendez, Port Captain.

Autoridad Portuaria de Pasajes, Apartado 56, 20110 Pasaia, Spain. *Tel:* (943) 351844. *FAX:* (943) 352580. *Contact:* Port Director.

RIBADEO: 43.32 N. 07.02 W.

DOCUMENTS:

Manifest of Cargo, including Cargo in Transit.
3 Crew Lists.
2 Passenger Lists or negative.
2 Stores Lists.

If vessel carries over 6 kilos tobacco per man, the excess to be declared in a separate Manifest which must be visaed by Spanish Consul at last port, otherwise is exposed to heavy fine.

PILOTAGE: Prior advice of ETA required by Pilot, who boards at the mouth of the river at the time advised by Agent. Pilot boat is white-painted motor launch, carrying international pilot signals.

In case of bad weather, Pilot will instruct vessel by signals to proceed to anchorage or to berth.

The Pilot always boards on the lee side, in the latitude of Isla Pancha.

ANCHORAGE: At Ensenada de Arneo, approx. position Lat. 43° 33' N., Long. 7° 01.6' W. in depth of 9 m. LW.

RESTRICTIONS: Vessels enter night and day, limited only by draft and state of tide.

MAX. SIZE: Length and beam not limited. Max. draft 15 ft.

HEALTH: Pratique given on arrival on production of clean Bill of Health. International quarantine signals to be used. Port Authorities to be advised if any case of suspected disease or fever on board.

RADIO: Messages may be routed through coastal stations at Vigo, La Coruna or Gijon.

TUGS: None available.

BERTHING: Vessels may berth at the mole at any time, or state of tide, according to draft.

STEVEDORES: Stevedores services operated only by Servicio de Trabajadores Portuarios.

MEDICAL: Nearest clinic at Mondonedo 35 km. from Ribadeo.

DENSITY: 1025.

FRESH WATER: Water connections exist along the length of the mole. Rate, 20 t.p.h.

FUEL: There is a gas oil supply for small vessels, rate 12 t.p.h.

GANGWAY/DECK WATCHMEN: None required.

OPENING/CLOSING HATCHES: Performed by crew.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle wine/spirits per man.

CONSULS: Nearest at La Coruna.

REPAIRS: Minor mechanical repairs can be effected. Slipway for vessels up to 200 tons.

AIRPORT: Nearest at La Coruna, 150 km. away, or Aviles, 165 km. away, with regular services to Madrid.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

POLICE/AMBULANCE/FIRE: Tel: Ribadeo 110650.

AUTHORITY: El Ayudante Militar de Marina de Ribadeo.

ROSAS: 42.14 N. 03.10 E. (See Plan)

DOCUMENTS:

Crew List.
Passenger List.
(1 of each) Ship's Papers.

PILOTAGE: Pilots from Palamos berth vessels. 24 hours notice required.

ANCHORAGE: Bay of Rosas is anchorage area.

MAX. SIZE: Depth in Commercial Port is 4 m., with berths for cargo ships of about 1,000 n.r.t. (metric).

HEALTH: Once ship is anchored in the bay it obtains Pratique by means of signals, and by raising the yellow health flag. When vessel entering after calling at another port in the same country, this procedure is not required; Health Inspector boards at the quay side.

RADIO: Bagur Radio on VHF Channel 16.

VHF: Port Authority on Channels 16 and 12.

TUGS: 1 × 400 h.p.

BERTHING: Advisable during daylight only.

MEDICAL: Port Health Doctor available. Hospitals 18 km. distance. Red Cross of the Sea is located at Rosas and operates on a permanent basis. Tel. (972) 25-55-55. VHF Channels 16, 12 and 73. Station also has an all weather lifeboat.

FRESH WATER: Available at Commercial Port at rate of 8 tonnes/p.h. to 10 tonnes/p.h.
FUEL: Available to small vessels only.
REPAIRS/DRY DOCKS: Slipway for vessels of 300 tons.
POLICE/AMBULANCE/FIRE: Police Service 25-62-72; Ambulance Service 25-68-28; Fire Service 25-66-32.
AUTHORITY: Ayudante de Marina de Rosas, Muelle de Rosas No.4, 17480 – Rosas, Spain. *Tel:* 972-256323. *Telex:* 98520 MENA E. *FAX:* 972-150755. *Contact:* Ramon E. Vazquez Calvo, Captain of the Port.

SAGUNTO: 39.39 N. 00.13 W. (See Plan)

LOCATION: 18 km. North of Valencia.
PORT LIMITS: The East/West line through the point of Cape Escollera de Levante.
DOCUMENTS:

2 copies Entrance Manifest.
4 copies Crew List.
2 copies Crew Effects Declaration.
2 copies Provisions List.
Passenger List disembarking at this port.
Passenger List in transit.

Refer to "Barcelona" for other important information concerning Documentation.
PILOTAGE: Call Pilot on VHF Channel 12 one hour prior to arrival.
ANCHORAGE: From 155° to 170° from the Cape Canet Lighthouse in 20 m. of water.
RESTRICTIONS: Entrance to port faces S.E. and is 560 m. wide with a depth of 9.0 m. at LW.
HEALTH: Pratique can be arranged at any time by Consignees.
RADIO: Cadiz Radio-EAC, Cabo Palos Radio-EAP and Valencia Radio EAV.
TUGS: 4 tugs up to 1,250 h.p. available. Tugs normally join vessel either in anchorage or 0.5 miles from entrance. Ship's lines are used. Tugs should be ordered in ETA message also mentioning vessel's length and cargo. Use of tugs is compulsory for vessels berthing at Pantalan.
BERTHING:

Berth	*Length* (m.)	*Depth* (m.)	*Use*
Muelle Norte	570	9.80	Solid and General Bulk.
Muelle Centro	660	11.25	General Cargo.
Muelle Sur	580	9.80	General Cargo and Liquid Bulk.
Pantalan	270	14.00	Solid Bulk by Special Installation.

BULK HANDLING FACILITIES:

Location	*Owner*	*Remarks*
Pantalan	Autoridad Portuaria de Valencia	There is a 2,000 m. long conveyor belt with an output of 2,500 tons per hour.
Sur	Enfersa	Offloading of anhydride ammonia by retractable loading arm and loading of fertiliser by belts. Distance to tanks 1 km. Pipeline 6 in. Vapour return 4 in. Loading/ Discharging arm 8 in. Discharge rate 400 t.p.h. – 600 t.p.h. Temperature −33°C.

CRANES: The port operates 6 privately owned gantry cranes with capacity of 20 tons to 60 tons and 1 derrick of 250 tons.
STEVEDORES: Employed by consignees.
MEDICAL: Medical assistance should be ordered in advance. All kinds of medical assistance available. One hospital owned by A.P.V.
TANKERS: No facilities.
DENSITY: Salt water.
FRESH WATER: Available.
FUEL: None available.
FIRE PRECAUTIONS: Fire service organised by Altos Hornos.
CONSULS: Nearest at Valencia.
REPAIRS: Small repairs possible.
GANGWAY/DECK WATCHMEN: Usually by crew. The Civil Guard keep watch on all ships for contraband.
OPENING/CLOSING HATCHES: Effected by ship's crew.
CUSTOMS ALLOWANCES: 200 cigarettes only. One bottle spirits per man but bottle should be opened. Spanish spirits allowed; one bottle per man. No control of Spanish wines.
REPATRIATION: Facilities for effecting crew changes and arranging repatriation.
AIRPORT: Manises Valencia, 40 km. away.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: *Religious Festivals:* January 6th, March 19th, August 15th, December 8th and 25th. Variable: Good Friday and Corpus Christi. *National Festivals:* January 1st, May 1st, July 25th, October 12th.
TELEPHONES: None on board. Telephones placed in Boat house and Pilots' Office.
SHORE LEAVE: Crew members allowed ashore.
IDENTIFICATION CARDS: Passport only.
AUTHORITY: Autoridad Portuaria de Valencia (A.P.V.), Muelle de la Aduana, S/n, 46024 Valencia, Spain. *Tel:* 34-6-3939500. *Telex:* 64508. *FAX:* 34-6-3939599. *Contact:* Rafael del Moral Carro, Port Director.

SAN CIPRIAN: 43.42 N. 07.27 W. (See Plan)

LOCATION: The port is located on the N.W. coast of Spain, about 10.5 miles Eastward of Estaca de Bares Point.

Its entrance is located at Lat. 43° 42' 09" N., Long. 07° 27' 06" W.
Charts: B.A. Chart No. 1122. Spanish Navy Chart No. 4081.
PILOTAGE: Compulsory for all vessels over 150 g.r.t.

All vessels are requested to contact San Ciprian Pilots, or San Ciprian Port Control, on VHF Channels 16 and 14, 2 hours before arrival at the Pilot's station, giving confirmation on ETA and for receiving instructions about berthing and operations.
There are two stations to board the Pilot:
(1) Vessels over 10,000 g.r.t. and tankers of any size at position Lat. 43° 44' N., Long. 07° 26.65' W.
(2) Vessels from 5,000 to 10,000 g.r.t. at Lat. 43° 43.6' N., Long. 07° 27' W.

When weather conditions are unfavourable for a Pilot to board at the designated area, the Pilot will instruct through VHF radio, and the vessel may follow the Pilot's boat in, until conditions are suitable for boarding.
APPROACHES: *Entrance:* The port is well sheltered by 2 breakwaters, one in the North part with 935 m. length, leading to E.S.E. seawards, and another in the South part with a length of 1,130 m., leading to N.N.E. seawards, at which are placed the piers.

In between the breakwaters, the entrance of the port is 270 m. wide with a depth of 20.0 m. L.W.S.T.

The breakwater heads are marked with lights and a foghorn will be placed on the South breakwater head.

The port has 2 access channels, both duly marked with leading lights. To enter port through North Channel, vessels should steer on true course 202° from sea, leaving the Farallones Islands by her port side. Vessels may also use the East Channel, steering 271° (T), coming from sea, and leaving the Farallones Islands on the starboard side. In both channels, there is a minimum depth of 17.0 m. (56 ft.) at L.W.S.T.

The two piers are located in the inner part of the South breakwater with a depth from 7.0 m. – 17.0 m., having 320 m. for ship's berthing safely. The principal berth is 232 m. long with 17.0 m. – 14.0 m. depth. The auxiliary berth is 88 m. long with 7.0 m. depth.

The manoeuvring zone is about 1,100 m. × 800 m. and has a minimum depth of 12.5 m. at L.W.S.T.
ANCHORAGES: Vessels may anchor in the inner harbour with consent of the Port Control.

Larger vessels or those that do not have permission to anchor in the harbour, due to technical reasons, security or congestion have two different areas to anchor at roads:
(1) A: Lat. 43° 43.5' N., Long. 07° 26.73' W.
B: Lat. 43° 45' N., Long. 07° 25.83' W.
C: Lat. 43° 45' N., Long. 07° 24.5' W.
D: Lat. 43° 43.5' N., Long. 07° 24.5' W.
(2) Between Lat. 43° 43.5' N. and 43° 45' N. and
Long. 07° 34.5' W. and 07° 37' W.
RESTRICTIONS/MAX. SIZE: The largest size acceptable is 62,000 d.w.t. with a max. draft at the entrance of 12.5 m. These large ships may only manoeuvre with daylight and high water at the same time.

From 12,000 d.w.t. to 62,000 d.w.t., vessels require daylight. Below 12,000 d.w.t., vessels may proceed at any time.

Ships proceeding to the Auxiliary Pier are restricted to 7.0 m. draft and 110 m. LOA.

For all vessels, only clean ballast is to be discharged.

No tank cleaning or pumping of bilges is allowed whilst the vessel is in port or its approaches.

Also see "Berthing".
VHF: Radio Station on Channels 16 and 14.
TUGS: 2 tugs available. "Sertosa-14" 1,900 h.p. (24 tonnes bollard pull) and "Sertosa-19" 2,400 h.p. (32 tonnes bollard pull).

Use of tugs is compulsory for all vessels over 2,000 g.r.t. and when judged necessary by the Port Authority.

A third tug is available to assist large vessels.
BERTHING: *Principal Berth:* The berth accepts vessels up to 240 m LOA, 36 m. beam and 12.5 m. draft.

It allows discharge of bauxite in bulk, pet coke, fuel oil and also loadin of alumina. The berth is also used to load Ro-Ro vessels with aluminiu and general cargo vessels with alumina hydrate in bulk.
Equipment: Automatic unloading crane on conveyor belt for handling o bulk goods such as bauxite, pet coke, etc., and capable of handlin 15,000 tonnes per day.

Alumina shiploader, capable for loading 1,200 t.p.h.

Terminal arm for connection of fuel oil for the Factory use only. On oil pipe of 16 in. diameter and hose connection of 8 in.
Auxiliary Berth: The berth accepts vessels of up to 110 m. LOA, 16.0 m beam and 7.0 m. draft.

The berth is used to discharge caustic soda, aluminium, metallurgi sandy alumina in bulk, hydrate in bulk and big-bags, and anodes f electrolysis.
Equipment: Two cranes of 5 tons each, used for loading aluminium a alumina hydrate in big-bags and anodes.

Automatic system for loading alumina in bulk.

Hose connection of 6 in. to discharge caustic soda.
Alumina Maritime Terminal: The Terminal Manager, or in his absen the Terminal Supervisor, is in charge of the Maritime Terminal wi continuous 24 hour service.

The offices are located in a building between the two piers.

While a vessel is alongside, a Supervisor of the Maritime Termi will remain on the pier or in the office at all times to deal with rou operations and any emergency.

The access to the Maritime Terminal through the Factory is under t control of a security guard, who shall check the identity of personne

Upon arrival at the port, Identity Cards will be supplied to al incomings and outgoings through the premises, but one must kee the restricted lanes and not trespass into the Factory.

MEDICAL: Hospital facilities at Alumina Espanola S.A. are only available on an emergency basis.

Full hospital facilities available in Burela 15 km. distant, without prior notice. Dentists available during normal work hours.

FRESH WATER: Available. If the vessel is to be supplied with fresh water, an official form must be filled, forms to be supplied by the Agent.

FUEL: Not available locally. Small quantities can be supplied by road tanker from Corunna.

REPAIRS: No major facilities at the port. Mobile repair companies available. No berths dedicated for repair work.

If you are expecting an outside visit, either personal or technical, proper advice is to be given to your Agent for them to obtain the compulsory permits from the Factory.

Should you require some maintenance or repairs, proper notice is to be given to the Port Authorities.

GARBAGE DISPOSAL: Contact: Limpieza Maritima de Oleos, S.L., in La Coruna. Tel: 246000, 246169. Fax: 246320.

Trucks and tankers (Marpol) utilised for collection and removal. Arrangements to be made by ship's Agent.

WASTE OIL DISPOSAL: See "Garbage Disposal".

SEAMAN'S CLUBS: None.

GENERAL:

Fire Precautions: The Alumina Terminal has a well trained firefighting crew and fire hydrants are installed at all strategic points. No smoking allowed on all wharves and in ship's holds.

Garbage: Service for solids is available with containers provided on the pier if required, with an official form.

Gangs: All requests for labour must be done by telex or cable.

In order to insure that gangs will be available, it is imperative that the telex message be in the Port Office by 1400 hrs. the day before the gangs are required.

Ladders: If the accommodation ladder is not suitable for the berth configuration, vessel will be requested to fill a form and the Port Authorities will supply an adequate one.

Mobile Cranes: In addition to the quay cranes indicated, the Port Authority have available several cranes, which can be utilised if required, with an official form.

Stores: Stores may be delivered to vessel by road. Loading of stores may be restricted during cargo operations.

Tide/Winds: Rise and fall: 0.5 m. to 4.1 m.

The prevailing wind direction in the Winter season is N.W., and in the Summer season N.E.

AUTHORITY: Alumina Espanola S.A., Apartado 71, 27890 San Ciprian, Lugo, Spain. *Tel:* 34-82-596000, 596048. *Telex:* 82298. *FAX:* 34-82-596003. *Contact:* Miguel A. Lourenzo, Manager. Tel: 34-82-596000, ext. 1174. Telex: 82085. Fax: 34-82-596016.

Harbour Master (at Burela): Captain Bernardo Rodriguez. Tel: 34-82-586100. Fax: 34-82-586110.

The port has the status of a "Private Port", so traffic is subject to the rules of the Factory.

The Owner of the port is Alumina Espanola, S.A.

SANT CARLES DE LA RAPITA: 40.36 N. 00.36 E. (See Plan)

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists or negative.
3 Cargo Manifests or Master/Ballast Declaration.
1 Stores List.
1 Crew Manifest.

PILOTAGE: Pilotage is compulsory and service permanent. Pilot is informed by Agent of vessels ETA, given 24 hours in advance. When vessels approach the breakwater, Pilot will board. The pilot boat is white with a black "P" painted on the side. Contact Pilot Station on VHF Channel 14. Pilot Tel: (977) 74.05.01/74.08.04.

RESTRICTIONS: None but for draft. Vessels carrying dangerous cargo should get permission for berthing prior to arrival.

MAX. SIZE: Maximum draft allowed is 17 ft. Contact Pilot for draft information.

HEALTH: Pratique is obtained immediately after berthing. In case of suspected disease or fever on board the Master must radio Agent in order to inform Health Officer in time.

RADIO: Radio Costera of Barcelona and Tarragona.

VHF: See "Pilotage".

TUGS: Available to assist berthing. Tugs normally join vessel at breakwater entrance. The following tugs are available: 1×1,750 h.p., 1×1,200 h.p. and 1×800 h.p.

BERTHING: Depth of water in centre of harbour 26 ft.

Commercial Wharf: Length 1,607 ft.

CRANES: 2 cranes, 1×12 tons and 1×8 tons.

STEVEDORES: 24 hours notice required in order to arrange gangs. Unloading rates depend on type of cargo.

MEDICAL: Any kind of medical service can be arranged if information received in time.

FRESH WATER: Plentiful supply of water by means of hoses from the pier to vessel.

FUEL: Can be supplied by truck, but 24 hours notice required. Marine diesel oil is available at bunkering pier, but max. draft is 12 ft.

CONSULS: See "Tarragona".

REPAIRS: There are 3 slipways as follows: 1×180 tons, 1×70 tons and 1×0 tons.

SURVEYORS: S.G.S., Vista Alegre N. 32-3, 43540 Sant Carles de la Rapita. Tel: (977) 74.22.24/54.22.28. Fax: (977) 54.11.00.

GANGWAY/DECK WATCHMEN: Not compulsory but advisable at night.

OPENING/CLOSING HATCHES: Normally opened/closed by the crew, otherwise according to "Charter Party". Lashing must be carried out by crew.

CERTIFICATES: Solas, Load Lines, I.O.P.P., Derat, Register and Tonnage Certificates.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle wine/spirits per person. Any excess must be declared and locked/sealed. Any infringement of the regulations will subject the vessel to the immediate imposition of a heavy fine and confiscation of excess.

REPATRIATION: Good facilities available.

AIRPORT: Reus Airport situated 90 km. distance and 45 minutes by car from Sant Carles. Regular flight services with Madrid. Barcelona airport situated 190 km. and 2 hours by car, worldwide destinations and arrivals.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer (Late March – late September).

HOLIDAYS: July 25th and September 11th.

POLICE/AMBULANCE/FIRE: Police: 74.07.17; Ambulance: 74.10.12; Fire: 70.00.80.

Branch office at San Carles de la Rapita. Tel: (977) 74.04.56.

SANT FELIU DE GUIXOLS (Gerona): 41.46 N. 03.01 E. (See Plan)

PILOTAGE: Pilotage is compulsory. Service between 0700 to 2400 hrs. Tel: 320910 or call Barcelona Radio or Bagur Radio (VHF).

ANCHORAGE: Vessels arriving after midnight or due to port congestion are anchored outside the breakwater.

MAX. SIZE: The maximum advisable draft for berthing is 22 ft. and up to 115 m. length.

TUGS: No tugs available.

BERTHING: Due to the fact that a few vessels can work at the same time, it is advisable to know as soon as possible the ETA for berthing arrangements.

Commercial Wharf: Length 108 m. Depth 22 ft.
Breakwater: Length 116 m. Depth 22 ft.
A pier for coasting vessels with a maximum draft of 18 ft.

MEDICAL: Any kind of medical services can be obtained at Sant Feliu or Gerona hospitals.

FRESH WATER: By means of hoses from the pier.

FUEL: Can be supplied in small quantities.

CARGO GEAR: Commercial Wharf is served by an electric crane able to lift up to 6 tons. Normally vessel's derricks are used.

AUTHORITY: Ayudantia Militar de Marina, Raig 6, Sant Feliu de Guixols (Gerona), Spain. *Tel:* 972-320967. *Contact:* Harbour Master.

SANTANDER: 43.28 N. 03.49 W. (See Plan)

PORT LIMITS: Between Cabo Mayor and Cabo Ajo.

DOCUMENTS:

5 Crew Lists.
7 Passenger Lists, or 3 negative.
3 Cargo Manifests of the goods destined to the Port of Santander.
2 sets of Manifests for Cargoes in Transit.
Stores List in triplicate, including tobacco, spirits, radios, etc., belonging to the vessel.
Detailed list in triplicate of all personal effects of crew and passengers (tobacco, spirits, cameras, souvenirs, radios, etc.).
For vessels exceeding 499 g.r.t: Safety Radio Certificate and Safety Equipment Certificate.

Legalisation required for manifests covering tobacco and tobacco products. This legalisation to be effected at the port prior to the first Spanish port of call.

Master and each member of crew of vessel can carry for his own consumption up to 6 kilos of tobacco in whatever form, and, if passengers are carried, up to 2 kilos per passenger, all of which must be declared in Provisions List (1 kilo of tobacco = 1,000 cigarettes = 100 cigars). If Masters carry greater quantity than stated above, it cannot be manifested as tobacco for consumption on board, but must be included in Consular Manifest as being in transit, and as such must be separated in the holds from other cargo and hatches or lockers will be sealed by Customs until ship leaves Spanish waters. This Consular Manifest has to be legalised by a Spanish Consul. In the absence of Consul, said document will have to be visaed by an Authority of the former port of clearance. Otherwise, vessel would be severely fined.

PILOTAGE: Compulsory and service is permanent. Pilots board vessel by a cutter at the roads, near the entrance off Mouro Island. Pilot cutters are painted white and have the letter "P" in black, on each bow. Cutters have blue flag with letter "P" in white, on both sides of flag. At night cutters have a white light, under this a red one. VHF available.

ANCHORAGES: The harbour consists of a large bay which provides good anchorage.

FRESH WATER: Available at Commercial Port at rate of 8 tonnes/p.h. to 10 tonnes/p.h.
FUEL: Available to small vessels only.
REPAIRS/DRY DOCKS: Slipway for vessels of 300 tons.
POLICE/AMBULANCE/FIRE: Police Service 25-62-72; Ambulance Service 25-68-28; Fire Service 25-66-32.
AUTHORITY: Ayudante de Marina de Rosas, Muelle de Rosas No.4, 17480 – Rosas, Spain. *Tel:* 972-256323. *Telex:* 98520 MENA E. *FAX:* 972-150755. *Contact:* Ramon E. Vazquez Calvo, Captain of the Port.

SAGUNTO: 39.39 N. 00.13 W. (See Plan)

LOCATION: 18 km. North of Valencia.
PORT LIMITS: The East/West line through the point of Cape Escollera de Levante.
DOCUMENTS:
2 copies Entrance Manifest.
4 copies Crew List.
2 copies Crew Effects Declaration.
2 copies Provisions List.
Passenger List disembarking at this port.
Passenger List in transit.
Refer to "Barcelona" for other important information concerning Documentation.
PILOTAGE: Call Pilot on VHF Channel 12 one hour prior to arrival.
ANCHORAGE: From 155° to 170° from the Cape Canet Lighthouse in 20 m. of water.
RESTRICTIONS: Entrance to port faces S.E. and is 560 m. wide with a depth of 9.0 m. at LW.
HEALTH: Pratique can be arranged at any time by Consignees.
RADIO: Cadiz Radio-EAC, Cabo Palos Radio-EAP and Valencia Radio EAV.
TUGS: 4 tugs up to 1,250 h.p. available. Tugs normally join vessel either in anchorage or 0.5 miles from entrance. Ship's lines are used. Tugs should be ordered in ETA message also mentioning vessel's length and cargo. Use of tugs is compulsory for vessels berthing at Pantalan.
BERTHING:

Berth	*Length* (m.)	*Depth* (m.)	*Use*
Muelle Norte	570	9.80	Solid and General Bulk.
Muelle Centro	660	11.25	General Cargo.
Muelle Sur	580	9.80	General Cargo and Liquid Bulk.
Pantalan	270	14.00	Solid Bulk by Special Installation.

BULK HANDLING FACILITIES:

Location	*Owner*	*Remarks*
Pantalan	Autoridad Portuaria de Valencia	There is a 2,000 m. long conveyor belt with an output of 2,500 tons per hour.
Sur	Enfersa	Offloading of anhydride ammonia by retractable loading arm and loading of fertiliser by belts. Distance to tanks 1 km. Pipeline 6 in. Vapour return 4 in. Loading/Discharging arm 8 in. Discharge rate 400 t.p.h. – 600 t.p.h. Temperature −33°C.

CRANES: The port operates 6 privately owned gantry cranes with capacity of 20 tons to 60 tons and 1 derrick of 250 tons.
STEVEDORES: Employed by consignees.
MEDICAL: Medical assistance should be ordered in advance. All kinds of medical assistance available. One hospital owned by A.P.V.
TANKERS: No facilities.
DENSITY: Salt water.
FRESH WATER: Available.
FUEL: None available.
FIRE PRECAUTIONS: Fire service organised by Altos Hornos.
CONSULS: Nearest at Valencia.
REPAIRS: Small repairs possible.
GANGWAY/DECK WATCHMEN: Usually by crew. The Civil Guard keep watch on all ships for contraband.
OPENING/CLOSING HATCHES: Effected by ship's crew.
CUSTOMS ALLOWANCES: 200 cigarettes only. One bottle spirits per man but bottle should be opened. Spanish spirits allowed; one bottle per man. No control of Spanish wines.
REPATRIATION: Facilities for effecting crew changes and arranging repatriation.
AIRPORT: Manises Valencia, 40 km. away.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: *Religious Festivals:* January 6th, March 19th, August 15th, December 8th and 25th. Variable: Good Friday and Corpus Christi. *National Festivals:* January 1st, May 1st, July 25th, October 12th.
TELEPHONES: None on board. Telephones placed in Boat house and Pilots' Office.
SHORE LEAVE: Crew members allowed ashore.
IDENTIFICATION CARDS: Passport only.
AUTHORITY: Autoridad Portuaria de Valencia (A.P.V.), Muelle de la Aduana, S/n, 46024 Valencia, Spain. *Tel:* 34-6-3939500. *Telex:* 64508. *FAX:* 34-6-3939599. *Contact:* Rafael del Moral Carro, Port Director.

Autoridad Portuaria de Valencia (A.P.V.), Muelle Centro S/N, 46520 Puerto Sagunto, Spain. *Tel:* (96) 2681178. *Telex:* 62521 Pavsg E. *FAX:* (96) 2680972. *Contact:* Ricardo Mallach.

SAN CIPRIAN: 43.42 N. 07.27 W. (See Plan)

LOCATION: The port is located on the N.W. coast of Spain, about 10.5 miles Eastward of Estaca de Bares Point.

Its entrance is located at Lat. 43° 42' 09" N., Long. 07° 27' 06" W.
Charts: B.A. Chart No. 1122. Spanish Navy Chart No. 4081.
PILOTAGE: Compulsory for all vessels over 150 g.r.t.

All vessels are requested to contact San Ciprian Pilots, or San Ciprian Port Control, on VHF Channels 16 and 14, 2 hours before arrival at the Pilot's station, giving confirmation on ETA and for receiving instructions about berthing and operations.
There are two stations to board the Pilot:
(1) Vessels over 10,000 g.r.t. and tankers of any size at position Lat. 43° 44' N., Long. 07° 26.65' W.
(2) Vessels from 5,000 to 10,000 g.r.t. at Lat. 43° 43.6' N., Long. 07° 27' W.

When weather conditions are unfavourable for a Pilot to board at the designated area, the Pilot will instruct through VHF radio, and the vessel may follow the Pilot's boat in, until conditions are suitable for boarding.
APPROACHES: *Entrance:* The port is well sheltered by 2 breakwaters; one in the North part with 935 m. length, leading to E.S.E. seawards, and another in the South part with a length of 1,130 m., leading to N.N.E. seawards, at which are placed the piers.

In between the breakwaters, the entrance of the port is 270 m. wide with a depth of 20.0 m. L.W.S.T.

The breakwater heads are marked with lights and a foghorn will be placed on the South breakwater head.

The port has 2 access channels, both duly marked with leading lights. To enter port through North Channel, vessels should steer on true course 202° from sea, leaving the Farallones Islands by her port side. Vessels may also use the East Channel, steering 271° (T), coming from sea, and leaving the Farallones Islands on the starboard side. In both channels, there is a minimum depth of 17.0 m. (56 ft.) at L.W.S.T.

The two piers are located in the inner part of the South breakwater with a depth from 7.0 m. – 17.0 m., having 320 m. for ship's berthing safely. The principal berth is 232 m. long with 17.0 m. – 14.0 m. depth. The auxiliary berth is 88 m. long with 7.0 m. depth.

The manoeuvring zone is about 1,100 m. × 800 m. and has a minimum depth of 12.5 m. at L.W.S.T.
ANCHORAGES: Vessels may anchor in the inner harbour with consent of the Port Control.

Larger vessels or those that do not have permission to anchor in the harbour, due to technical reasons, security or congestion have two different areas to anchor at roads:
(1) A: Lat. 43° 43.5' N., Long. 07° 26.73' W.
B: Lat. 43° 45' N., Long. 07° 25.83' W.
C: Lat. 43° 45' N., Long. 07° 24.5' W.
D: Lat. 43° 43.5' N., Long. 07° 24.5' W.
(2) Between Lat. 43° 43.5' N. and 43° 45' N. and
Long. 07° 34.5' W. and 07° 37' W.
RESTRICTIONS/MAX. SIZE: The largest size acceptable is 62,000 d.w.t. with a max. draft at the entrance of 12.5 m. These large ships may only manoeuvre with daylight and high water at the same time.

From 12,000 d.w.t. to 62,000 d.w.t., vessels require daylight. Below 12,000 d.w.t., vessels may proceed at any time.

Ships proceeding to the Auxiliary Pier are restricted to 7.0 m. draft and 110 m. LOA.

For all vessels, only clean ballast is to be discharged.

No tank cleaning or pumping of bilges is allowed whilst the vessel is in port or its approaches.

Also see "Berthing".
VHF: Radio Station on Channels 16 and 14.
TUGS: 2 tugs available. "Sertosa-14" 1,900 h.p. (24 tonnes bollard pull) and "Sertosa-19" 2,400 h.p. (32 tonnes bollard pull).

Use of tugs is compulsory for all vessels over 2,000 g.r.t. and when judged necessary by the Port Authority.

A third tug is available to assist large vessels.
BERTHING: *Principal Berth:* The berth accepts vessels up to 240 m LOA, 36 m. beam and 12.5 m. draft.

It allows discharge of bauxite in bulk, pet coke, fuel oil and also loading of alumina. The berth is also used to load Ro-Ro vessels with aluminium and general cargo vessels with alumina hydrate in bulk.
Equipment: Automatic unloading crane on conveyor belt for handling bulk goods such as bauxite, pet coke, etc., and capable of handling 15,000 tonnes per day.

Alumina shiploader, capable for loading 1,200 t.p.h.

Terminal arm for connection of fuel oil for the Factory use only. On oil pipe of 16 in. diameter and hose connection of 8 in.
Auxiliary Berth: The berth accepts vessels of up to 110 m. LOA, 16.0 m beam and 7.0 m. draft.

The berth is used to discharge caustic soda, aluminium, metallurgi sandy alumina in bulk, hydrate in bulk and big-bags, and anodes electrolysis.
Equipment: Two cranes of 5 tons each, used for loading aluminium a alumina hydrate in big-bags and anodes.

Automatic system for loading alumina in bulk.

Hose connection of 6 in. to discharge caustic soda.
Alumina Maritime Terminal: The Terminal Manager, or in his abse the Terminal Supervisor, is in charge of the Maritime Terminal wi continuous 24 hour service.

The offices are located in a building between the two piers.

While a vessel is alongside, a Supervisor of the Maritime Term will remain on the pier or in the office at all times to deal with rou operations and any emergency.

The access to the Maritime Terminal through the Factory is under control of a security guard, who shall check the identity of personn

Upon arrival at the port, Identity Cards will be supplied to al incomings and outgoings through the premises, but one must kee the restricted lanes and not trespass into the Factory.

MEDICAL: Hospital facilities at Alumina Espanola S.A. are only available on an emergency basis.

Full hospital facilities available in Burela 15 km. distant, without prior notice. Dentists available during normal work hours.

FRESH WATER: Available. If the vessel is to be supplied with fresh water, an official form must be filled, forms to be supplied by the Agent.

FUEL: Not available locally. Small quantities can be supplied by road tanker from Corunna.

REPAIRS: No major facilities at the port. Mobile repair companies available. No berths dedicated for repair work.

If you are expecting an outside visit, either personal or technical, proper advice is to be given to your Agent for them to obtain the compulsory permits from the Factory.

Should you require some maintenance or repairs, proper notice is to be given to the Port Authorities.

GARBAGE DISPOSAL: Contact: Limpieza Maritima de Oleos, S.L., in La Coruna. Tel: 246000, 246169. Fax: 246320.

Trucks and tankers (Marpol) utilised for collection and removal. Arrangements to be made by ship's Agent.

WASTE OIL DISPOSAL: See "Garbage Disposal".

SEAMAN'S CLUBS: None.

GENERAL:

Fire Precautions: The Alumina Terminal has a well trained firefighting crew and fire hydrants are installed at all strategic points. No smoking allowed on all wharves and in ship's holds.

Garbage: Service for solids is available with containers provided on the pier if required, with an official form.

Gangs: All requests for labour must be done by telex or cable.

In order to insure that gangs will be available, it is imperative that the telex message be in the Port Office by 1400 hrs. the day before the gangs are required.

Ladders: If the accommodation ladder is not suitable for the berth configuration, vessel will be requested to fill a form and the Port Authorities will supply an adequate one.

Mobile Cranes: In addition to the quay cranes indicated, the Port Authority have available several cranes, which can be utilised if required, with an official form.

Stores: Stores may be delivered to vessel by road. Loading of stores may be restricted during cargo operations.

Tide/Winds: Rise and fall: 0.5 m. to 4.1 m.

The prevailing wind direction in the Winter season is N.W., and in the Summer season N.E.

AUTHORITY: Alumina Espanola S.A., Apartado 71, 27890 San Ciprian, Lugo, Spain. *Tel:* 34-82-596000, 596048. *Telex:* 82298. *FAX:* 34-82-596003. *Contact:* Miguel A. Lourenzo, Manager. Tel: 34-82-596000, ext. 1174. Telex: 82085. Fax: 34-82-596016.

Harbour Master (at Burela): Captain Bernardo Rodriguez. Tel: 34-82-586100. Fax: 34-82-586110.

The port has the status of a "Private Port", so traffic is subject to the rules of the Factory.

The Owner of the port is Alumina Espanola, S.A.

SANT CARLES DE LA RAPITA: 40.36 N. 00.36 E.

(See Plan)

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists or negative.
3 Cargo Manifests or Master/Ballast Declaration.
1 Stores List.
1 Crew Manifest.

PILOTAGE: Pilotage is compulsory and service permanent. Pilot is informed by Agent of vessels ETA, given 24 hours in advance. When vessels approach the breakwater, Pilot will board. The pilot boat is white with a black "P" painted on the side. Contact Pilot Station on VHF Channel 14. Pilot Tel: (977) 74.05.01/74.08.04.

RESTRICTIONS: None but for draft. Vessels carrying dangerous cargo should get permission for berthing prior to arrival.

MAX. SIZE: Maximum draft allowed is 17 ft. Contact Pilot for draft information.

HEALTH: Pratique is obtained immediately after berthing. In case of suspected disease or fever on board the Master must radio Agent in order to inform Health Officer in time.

RADIO: Radio Costera of Barcelona and Tarragona.

VHF: See "Pilotage".

TUGS: Available to assist berthing. Tugs normally join vessel at breakwater entrance. The following tugs are available: 1×1,750 h.p., 1×1,200 h.p. and 1×800 h.p.

BERTHING: Depth of water in centre of harbour 26 ft.

Commercial Wharf: Length 1,607 ft.

CRANES: 2 cranes, 1×12 tons and 1×8 tons.

STEVEDORES: 24 hours notice required in order to arrange gangs. Unloading rates depend on type of cargo.

MEDICAL: Any kind of medical service can be arranged if information received in time.

FRESH WATER: Plentiful supply of water by means of hoses from the pier to vessel.

FUEL: Can be supplied by truck, but 24 hours notice required. Marine diesel oil is available at bunkering pier, but max. draft is 12 ft.

CONSULS: See "Tarragona".

REPAIRS: There are 3 slipways as follows: 1×180 tons, 1×70 tons and 1×0 tons.

SURVEYORS: S.G.S., Vista Alegre N. 32-3, 43540 Sant Carles de la Rapita. Tel: (977) 74.22.24/54.22.28. Fax: (977) 54.11.00.

GANGWAY/DECK WATCHMEN: Not compulsory but advisable at night.

OPENING/CLOSING HATCHES: Normally opened/closed by the crew, otherwise according to "Charter Party". Lashing must be carried out by crew.

CERTIFICATES: Solas, Load Lines, I.O.P.P., Derat, Register and Tonnage Certificates.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle wine/spirits per person. Any excess must be declared and locked/sealed. Any infringement of the regulations will subject the vessel to the immediate imposition of a heavy fine and confiscation of excess.

REPATRIATION: Good facilities available.

AIRPORT: Reus Airport situated 90 km. distance and 45 minutes by car from Sant Carles. Regular flight services with Madrid. Barcelona airport situated 190 km. and 2 hours by car, worldwide destinations and arrivals.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer (Late March – late September).

HOLIDAYS: July 25th and September 11th.

POLICE/AMBULANCE/FIRE: Police: 74.07.17; Ambulance: 74.10.12; Fire: 70.00.80.

IDENTIFICATION CARDS: Not required.

SANTANDER: 43.28 N. 03.49 W. (See Plan)

PORT LIMITS: Between Cabo Mayor and Cabo Ajo.

DOCUMENTS:

5 Crew Lists.
7 Passenger Lists, or 3 negative.
3 Cargo Manifests of the goods destined to the Port of Santander.
2 sets of Manifests for Cargoes in Transit.
Stores List in triplicate, including tobacco, spirits, radios, etc., belonging to the vessel.
Detailed list in triplicate of all personal effects of crew and passengers (tobacco, spirits, cameras, souvenirs, radios, etc.).
For vessels exceeding 499 g.r.t: Safety Radio Certificate and Safety Equipment Certificate.

Legalisation required for manifests covering tobacco and tobacco products. This legalisation to be effected at the port prior to the first Spanish port of call.

Master and each member of crew of vessel can carry for his own consumption up to 6 kilos of tobacco in whatever form, and, if passengers are carried, up to 2 kilos per passenger, all of which must be declared in Provisions List (1 kilo of tobacco = 1,000 cigarettes = 100 cigars). If Masters carry greater quantity than stated above, it cannot be manifested as tobacco for consumption on board, but must be included in Consular Manifest as being in transit, and as such must be separated in the holds from other cargo and hatches or lockers will be sealed by Customs until ship leaves Spanish waters. This Consular Manifest has to be legalised by a Spanish Consul. In the absence of Consul, said document will have to be visaed by an Authority of the former port of clearance. Otherwise, vessel would be severely fined.

PILOTAGE: Compulsory and service is permanent. Pilots board vessel by a cutter at the roads, near the entrance off Mouro Island. Pilot cutters are painted white and have the letter "P" in black, on each bow. Cutters have blue flag with letter "P" in white, on both sides of flag. At night cutters have a white light, under this a red one. VHF available.

ANCHORAGES: The harbour consists of a large bay which provides good anchorage.

RESTRICTIONS: Entrance is well marked and there is no bar. Depth at entrance is at minimum 35 ft.
MAX. SIZE: No restriction in respect of length or breadth, the maximum advisable draft to enter port is 35 ft. at HWOST.
HEALTH: If the vessel proceeds directly to berth, Pratique can be obtained immediately after berthing. Otherwise, at anchorage on vessel's arrival.

If vessel has sickness on board of a contagious nature Masters should advise Health Authorities by radio, and they will examine patients immediately upon arrival, to enable vessel to be granted Free Pratique. If vessel has to be fumigated or deratted a charge is made.
RADIO: Nearest important radio station is Cabo Mayor Radio, and it is advisable that messages are received at least 24 hours before arrival.
TUGS: No tugs required for entering the port, only for berthing or shifting when in port. Ship's lines are used, and tugs are employed according to Pilot's advice.
BERTHING:

Berth	*Length* (m.)	*Depth* (m.)
Calderon	270	4.0
Maura	55.6	6.5
Albareda	267	7.25 to 9.5
Almirante	94.2	9.5
Maliano (Sections 10 and 11)	242	10.5
Maliano (Section 9)	129	7.0
Maliano (Section 8)	106.4	5.0
Maliano (Sections 1 – 7)	710	8.0
North Edge	538	9.5
Raos (No. 1)	300	13.0
Raos (No. 2)	208	13.0
Raos (No. 3)	570	10.0
Raos (No. 4)	270	13.0
Raos (No. 7)	170	10.0
Terquisa Quay	170	12.5
Container Quay (Raos)	150	13.0
Repsol Quay	244	11.5

All depths of water quoted above correspond to LWOST and 13 ft. – 14 ft. should be added for depths at HWOST. Bottom is generally soft.

Calatrava Wharf: For discharge of chemicals. Depth alongside 34 ft. with overall length limitation of 980 ft. Up River, at Astillero, beyond the harbour area, there is one spout called Orconera Tip for loading iron ore. Vessels up to 260 ft. – 270 ft. length are allowed with a maximum draft, fully loaded, of 19 ft. Loaded vessels can only sail at high water. A modern installation for dismantling and scrapping vessels is operating up river, on the way to Astillero.
CRANES:

Maura Quay	1 fixed 30 ton crane (electric)	
Maliano Quay (Sections 10 & 11)	3 electric cranes	6 tons
Maliano Quay (Sections 1 to 7)	5 electric cranes	3 – 6 tons
North Edge Quay	4 electric cranes	6 tons
	4 electric cranes	12 tons
Raos 1	4 electric cranes	16 tons
Raos 3	7 electric cranes	16 tons
Raos 3	3 electric cranes	6 tons
Raos 3	Mobile container crane	35 tons

Also movable motor cranes, mechanical shovels and similar, available.
STEVEDORES: It is very important that Masters send advance notice regarding vessel's ETA. With this notice, Agents can inform Shippers or Receivers' stevedores accordingly. Official working hours of port, are: Monday/Saturday: 0800 – 1200 hrs.; 1400 – 1800 hrs.
CARGO HANDLING FACILITIES: There are berths for handling bulk cargoes, grain, ore, coal, etc. There are also berths for handling bulk liquids, chemicals. Berth available for Ro/Ro traffic.

1×30.5 tonne Liebherr gantry crane for containers.
MEDICAL: Any kind of medical services can be arranged.
TANKERS: "Campsa" (Spanish State Monopoly): Installation is served by two identical concrete wharves situated in Maliano Basin, berthing space of which is 500 ft. with a depth alongside of 29 ft.
DENSITY: Sea water.
FRESH WATER: Always available. Supply is performed by tugs and from shore connections at various quays.
FUEL: Ordinary fuel, diesel and gas oil are available at "Campsa". Depth alongside 16 ft. – 32 ft.

Advisable that shipowners stem bunkers through their own Contractors with (at least) 48 hours' notice. Delivery can be performed either by tank-trucks or at bunkering pier.
CONSULS:

Belgium
Bolivia
Colombia
Costa Rica

Peru
Portugal
Sweden

Note. Acting as Consul of those countries with no Consular Representation: Valentin Lavin del Noval, Dominican Rep. Consul.
REPAIRS: Good repair facilities with various shipyards at port. All types of deck, engine, etc., repairs are possible.
DRY DOCKS: Three dry docks, one of which is within the harbour area and the other at Astillero (beyond the harbour area). Dimensions are:

Extreme length	405 ft.	434 ft.	722 ft.
Breadth at entrance	58 ft.	54 ft.	105 ft.
Depth on sill (high water)	23.7 ft.	20 ft.	38 ft.

GANGWAY/DECK WATCHMEN: Not compulsory but available upon request.
OPENING/CLOSING HATCHES: Effected normally by crew, except in liner vessels, which is contracted by stevedores.
CERTIFICATES: Vessels should have the usual documents on board, but only the Safety Radio, Safety Equipment and Derat Certificates are required by Authorities.
CUSTOMS ALLOWANCES: Normally, Customs permit 200 cigarettes per man out of bond. Additional quantities needed depend on the stay of ship in port. One bottle of spirits per man.
CARGO GEAR: Shore cranes are usually employed in loading/discharging operations.
REPATRIATION: No difficulties.
AIRPORT: About 4 miles from town. There are regular services with Madrid and Barcelona. Also charter flights to U.K. and other European countries.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS:

January 1st, New Year's Day	Full day	Work can be arranged
January 6th, Epiphany	,,	,,
March 19th, Saint Joseph	,,	,,
Maundy Thursday	,,	,,
Good Friday	,,	,,
May 1st, Saint Joseph Artisan	,,	,,
Ascension Day	,,	,,

December 25th, Christmas Day	,,	,,

POLICE/AMBULANCE/FIRE: Police 222543; Civil Security Guards 232004; Hospital, Casa de Socorro 221214, Valdecilla 231400; Fire 231662; Ambulance Cruz Roja 270235.
TELEPHONES: In very special instances, can be arranged.
SERVICES: Available for tank cleaning, washings, compass adjusting, hull cleaning whilst floating, radio installation repairs, etc.
SHORE LEAVE: Crew allowed ashore at any time.
IDENTIFICATION CARDS: Not required.
GARBAGE DISPOSAL: Marpol service available.
WASTE OIL DISPOSAL: Marpol service available.
SEAMAN'S CLUBS: Marine Social Institute, Avda. Sotileza. Tel: 214600.
CURRENCY: Peseta.
DEVELOPMENTS: New quay at Raos 8 available from July 1997 (Length 300 m., depth 13.0 m.).
AUTHORITY: Autoridad Portuaria de Santander, Paseo de Pereda 33-1°, 39004 Santander, Spain. *Tel:* 42-314060. *Telex:* 35936 Jpsr E. *FAX:* 42-314904. *Contact:* D. Manuel Martin Ledesma, Port Director.

SEVILLE: 37.25 N. 06.00 W. (See Plan

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
2 Cargo Manifest, including cargo for discharge and in transit.
Declaration of Health.
2 Lists of Provisions and Stores.
2 Copies of Bills of Lading.

If vessel carries over 6 kilos tobacco per man the excess to be declar in a separate manifest which must be visaed by Spanish Consul at las port, otherwise is exposed to heavy fine.
PILOTAGE: *At the Bar:* Vessels may commence to enter and leave th river 1.5 hours after low water. Bar Pilots are stationed at Chipiona an come out to board vessels when requested, 2 miles North of Chipion Lighthouse.

Pilot motor launches about 9 m. long, painted white with black "P" o sides. They carry regulation lights and signals day and night.
River Pilots: Vessels should radio their ETA at least 24 hours in advan to "Practicos Sevilla". River Pilots are stationed at the pier at Bonanz Lat. 36° 48' N., Long. 06° 20' W. Sound signal to call Pilot is 3 long blast Pilot boards from white-painted launch marked by black letter "P" an carrying regulation signals. Pilots require means of embarkation i accordance with International Conventions.
ANCHORAGE: At Bonanza, in depth of 20 ft. below chart datum.
RESTRICTIONS: Navigation in the River Guadalquivir is prohibited night, both inward and outward for tankers or vessels with hazardo cargoes. Any vessel with a draft greater than 19 ft. 06 in. may not lea at night.

Draft is controlled by height of tide and this should be ascertained Owners or Agents in advance for the probable date of entry.
MAX. SIZE: Max. draft 23 ft., max. beam 24.2 m. (The limitation in bea is for passing through the lock). Lock length 200 m., width 25 m. Tank are required to have an additional 1 ft. keel clearance.
HEALTH: Pratique is obtained on arrival at Bonanza, on presenta of International Health Certificates.
RADIO: Tarifa Radio – EAC.
VHF: Channel 12 is used to call all stations between Chipiona a Seville, and between vessels.
TUGS: Normally join vessel in the anteport. Ship's tow line is used

BRIDGES: Vessels berthing at Delicias Quay must pass through the Alfonso XIII drawbridge. May be opened between 0715 hrs. and 2200 hrs.
STEVEDORES: 24 hours' notice should be given by Agents and confirmed 12 hours before vessels arrival.
CRANES: 46 cranes with capacity 3 tons – 36 tons.
MEDICAL: All medical and hospital facilities available.
TANKERS: There are 2 berths, depth alongside 20 ft.
At Quay No. 2, hoses 8 in. diameter.
At Quay No. 3, hoses 8 in. and 10 in. diameter.
DENSITY: Fresh water. The tide has no influence at Seville.
FUEL: All grades available.
CONSULS: The following countries are represented at Seville:

Belgium
Bolivia
Canada
Colombia
Cuba
Chile
Denmark
Dominican Republic
Germany
Great Britain
Greece
Honduras
Italy
Liberia
Nicaragua
Netherlands
Panama
Peru
Portugal
Sweden
United States
Uruguay
Venezuela

REPAIRS: All types of repairs can be effected.
DRY DOCK: Astilleros Espanoles S.A. have 1 dock, length 149 m., breadth 25 m.
GANGWAY/DECK WATCHMEN: Not considered necessary. All quays are watched by the Guardia Civil.
OPENING/CLOSING HATCHES: Performed by ship's crew.
CUSTOMS ALLOWANCES: 6 kilos tobacco per crew man, and 2 kilos per passenger; this includes tobacco in bonded stores. No restriction on wines/spirits.
REPATRIATION: All facilities available.
AIRPORT: Situated 12 km. away, regular daily flights to Madrid, Barcelona, other parts of Spain. Some transatlantic flights.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: 1st January; 6th January; 27th and 28th March,; Maundy Thursday; Good Friday; 1st May; 29th May; 25th July; 15th August; 1st November; 6th and 8th December; 25th December. All holidays may be worked with overtime.
POLICE/AMBULANCE/FIRE: Police: 091; Fire Brigade: 232123; Ambulance: 231945.
TELEPHONES: Can be installed on board if requested 10 days in advance.
SERVICES: Fresh provisions and stores available, refuse collection, correction of compasses.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not required.
AUTHORITY: Comandancia Militar de Marina de Sevilla, Avenida de Molini No.7, Sevilla, Spain. *Tel:* 4614146. *FAX:* 4615648.
Contact: Comandante, Militar de Marina.

SOLLER, Majorca: 39.47 N. 02.46 E.

DOCUMENTS: See "Bilbao".
PILOTAGE: None available. 2 intermittent lights situated on the Mole indicate the Entry Channel.
MAX. SIZE: Advisable length and draft 60 m. and 4.50 m. respectively.
TUGS: None available.
MEDICAL: It is advisable to give advance notice if medical attention is required. There are no hospitals. Medical service is available 5 km. from the port.
FRESH WATER: Not available at the quay.
FUEL: Not available. If required the order should be placed to CLH through the Agent.
CONSULS: None.
REPAIRS: No facilities exist.
GANGWAY/DECK WATCHMEN: Crew do this operation.
OPENING/CLOSING HATCHES: Crew.
AIRPORT: The airport is situated 40 km. away; the island is well connected with the Peninsula (mainland) and with foreign airports.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: It is advisable to have these available.
AUTHORITY: Jefe Encargo del Despacho de Buques, Oficianas del Destacamento de la Comandancia Militar de Marina en Soller.

TARRAGONA: 41.05 N. 01.14 E. (See Plan)

PORT LIMITS: New port limits are within a rectangular sea zone limited by:
1. Harbour breakwaters and adjacent shoreline.
2. Imaginary line starting from Punta Mora (1° 09' 36" E.)
3. Imaginary line starting from Salou Cape (1° 20' 33" E.)
4. Parallel Lat. 41° 00' 00" N.

All the vessels anchoring within this zone will incur harbour dues.

DOCUMENTS: Cargo Manifest of all goods in ship, stating any foreign port from where those goods come. This procedure should always be done in the first Spanish port.

In first Spanish port ship should produce an Itinerary Manifest; and those ships which carry goods to discharge should produce this Manifest in those ports in which they will discharge the goods.

Supplies Certificate for those ships not having any goods to discharge in any Spanish port, or who have previously been in other Spanish port.
Register of the Supplies and Equipment in ship.
Register of the Crew's Effects, if the ship comes directly from a foreign port.
Passenger List (if there are passengers). Negative Passenger List (if there are no passengers).
Crew List.
Health Certificate, if the ship comes from another Spanish port.
All ship's Certificates valid.
Tanker Check List for tankers.
All ship's Declaration of Oil Residues (sludges).
Oil Record Books properly filled in.

APPROACHES: *Entrance Channel:* Width 250 m., length 1,050 m., depth 20.0 m., bottom – gravel and sand.
Entrance Mouth: Width 350 m., depth 22.0 m., max. current 2 knots.
PILOTAGE: Compulsory. Provided by Corporation Pilots of the Port of Tarragona, Muelle Aragon s/n., 43004 Tarragona. Tel: 34-77-24.02.07. Fax: 34-77-24.47.44.

Pilot's communicate with vessel on VHF Channel 16 and Channels 14-12-9. Notice of ETA and request for Pilot must be made to Chief of Operations at least 24 hours in advance (Fax No.= 24.47.44.).

Pilot boats: Black colour with letter "P" painted in white on both sides.
Lights: According to International Regulations. Pilotage area begins at a max. distance of 2 miles from port entrance. Ships waiting for Pilot anchor in the Rada (Roads) and East of the lighthouse. If weather does not allow, Pilot will meet ship at port entrance. Ladder for Pilot to be placed at leeward side.
VTS Requirements: Pre-entry requirements:

Time: 1 hour before arrival at Tarragona port limits. 2 hours before arrival at Tarragona port limits for vessels with dangerous goods.

Place: At least 9 miles before arrival at the breakwater (green light).

Format and Contents: Name, flag, call sign, port of registry, draft, GT, last port of call, cargo and IMDG identification.
ANCHORAGES: West limit is marked by imaginary line running N/S at the Cap Salou to Latitude 41° N. East limit is marked by imaginary line running N/S at Torre de la Mora to Latitude 41° N. Depths in Rada are 16.0 m. and 30.0 m.; reasonable holding ground (mud and sand).
RESTRICTIONS: There are restrictions regarding berthing of Tankers in the Pantalans Asesa and Repsol, Monobuoy of Repsol and Inflammables Quay, during night hours, whatever their tonnage.
MAX. SIZE: Draft 18.0 m.
Bulk carriers: Draft 18.0 m.

Tankers:	At Pier	18.00 m.
	At Monobuoy	42.80 m.

LPG Vessels: Draft 12.0 m.
Also see "Berthing".
HEALTH: Hospitals and clinics available. There is a doctor service in Health Department of port, which is authorised to vaccinate, and give certificates against yellow fever authorised by the OMS.
RADIO: Tarragona Radio, VHF Channel 16.
VHF: Pilot on Channel 16.
TUGS: 7 tugs, 2,030 h.p. – 4,000 h.p. Tugs join vessel outside port. Ship's lines are used.
BERTHING: Port Authority Facilities:

Floating Crane: None.

SPECIALISED CARGO HANDLING FACILITIES:

Location	*Owner*	*Characteristics*
Muelle Catalunya	Berge Maritima, S.A.	Multipurpose warehouse for cereals and other uses of 40,000 ton capacity. Two platform of 16 tonnes and 60 tonnes with their corresponding offices and without any mechanical service.
Muelle Aragon	Interbeton-2, S.A.	Detachable warehouse for cement, capacity 9,500 tons.
Muelle Aragon	Silos de Tarragona, S.A.	Cereal silos of 45,000 tons capacity, with 4 automatic grain elevators handling 400 t.p.h. and 2×5.5 ton pneumatic scales for weight checking. 2×300 t.p.h. output and recirculation elevators. Three output scales for direct truck loading. 2×400 t.p.h. berth to silo grain conveyor belts.
Muelle Castilla Oeste	Silos de Tarragona S.A.	Polivalent warehouse for cereals and other uses of 15,000 tons capacity.
Muelle Aragon	Berge Maritima S.A.	Multipurpose warehouse for cereals and other uses of 35,000-ton capacity with 4 mechanical lifts with a capacity of 250 t.p.h. each, 2 conveyor belts of 250 t.p.h. and another of 500 t.p.h. and 1×60 ton weighbridge with 15 m.×3 m. platform.
Muelle Lerida/ Aragon	Aut. Portuaria	Quay and double ramp for the loading/unloading of vehicles.
Muelle Lerida/ Levante	Aut. Portuaria	Quay and double ramp for the loading/unloading of vehicles.
Muelle de Navarra	Aut. Portuaria	Quay and ramp for loading/ unloading vehicles.
Muelle Reus	Edergrasa	3 outlets with 4 pipes for the loading and unloading of chemical products onto or from tankers with capacity of 20,758 cu.m. of storage at 150 t.p.h. and 1×60 ton weighbridge with 15 m.×3 m. platform.
Muelle Reus	Cargill Espana S.A.	Silos for grain of 30,700 tons capacity, with 3 elevators for filling and recirculator and unloading of 300 t.p.h. and 1×60 ton weighbridge with 15 m.×3 m. platform. 1 pneumatic unloader of 150 t.p.h. 2 conveyor belts for grain from berth to silos of 300 t.p.h. each.
Muelle Reus	Cementos del Mar, S.A.	Two silos of 4,000 ton total capacity for loading and unloading of cement, and 60 ton weighbridge with a 15 m.×3 m. platform.
Muelle Reus	Fruport, S.A.	Refrigerated warehouse with 2×13,000 cu.m. chambers and handling area of 1,750 sq.m. for unloading and storage of perishable products. Truck unloading dock for 5 vehicles simultaneously. New refrigerated warehouse with 2,700 cu.m. chamber and handling area of 1,200 sq.m. with 4 docks for loading/unloading simultaneously.
Muelle Reus	C.L.H.	2×10 in. pipelines for the loading and unloading of liquid fuels producing 250 t.p.h. Fuel supply to fishing boats with 2 outlets and 4 in. pipeline.
Muelle Castilla Oeste	Codemar-Iberbulk S.A.	Warehouse for cereals of 6,860 sq.m. with 28,000 tons capacity and a 60 ton weighbridge with a 15 m. × 3 m. platform.
Muelle Rioja	C.L.H.	3 pipelines for unloading liquid fuel to the factory. 1×10 in. petrol, 1×10 in. diesel oil and 1×12 in. fuel oil.
Muelle Rioja	Terminales Quimicos, S.A.	Firefighting system consisting of an electric pump, a diesel pump and two Jockey pumps.
Zona entre contradiques	Terminales Quimicos, S.A.	Chemical products terminal with 45 tanks and total capacity of 28,016 cu.m. and one loading and unloading outlet with 4×6 in. pipelines.
Muelle Castilla	Cargill Espana S.A.	Silos for grain of 40,000 tons capacity and a 10 ton receiving hopper scale, 2 elevators for filling and recirculation and 2 conveyor belts for filling and unloading of 800 t.p.h. each. Automatic unloader of 800 t.p.h. Automatic unloader of 450 t.p.h. A conveyor belt from berth to silos of 800 t.p.h.
Atraque No. 1 de Inflamables	Repsol Butano, S.A.	3×10 in. pipelines for the loading and unloading of LPG with an average of 250 t.p.h. in normal unloading conditions (they do not allow an operational temperature of less than 5°).
Atraque No. 1 de Inflamables	Terminales Quimicos, S.A.	8 outlets with 4 pipes of 6 in.
Zona Inflamables	Terminales Quimicos, S.A.	Chemical products terminal with 45 tanks and total capacity of 90,000 cu.m. for ship loading and unloading, 22 loading and unloading points for use simultaneously. Possibility of inerting, heat supply and inert atmosphere holding.
Zona Inflamables	Terminales Portuarias S.A.	Enlargement of the terminal for the reception, storage and re-shipment, with the construction of 3 new tanks. Chemical products terminal with 27 steel tanks and 24,755 cu.m. capacity, equipped for possible supply of heat and for the recirculation of the content together with a loading and unloading pump and individual loading arm for each tank. 6 points for loading/unloading of road tankers simultaneously. Possibility of inerting and maintaining inert atmosphere.
Atraque No. 2 de Inflamables	Terminales Quimicos, S.A.	7 terminals with 4×6 in. pipes.
Atraque No. 1 de Inflamables	Terminales Portuarias, S.A.	6 terminals with 4×6 in. stainless steel pipes and 2×6 in. cast steel pipes.
Atraque No. 2 de Inflamables	Terminales Portuarias, S.A.	6 terminals with 4×6 in. stainless steel pipes and 2×6 in. cast steel pipes.
Atraque No. 3 de Inflamables	Repsol Butano S.A.	3×10 in. pipeline for the loading and unloading of LPG with an average throughput of 250 tons/hr in normal unloading conditions (they do not allow an operational temperature of less than −5°).
Atraque No. 4 Inflamables	Terminales Quimicos, S.A.	2 pipelines for loading water of 12 in. diameter. 1 pipeline for loading/unloading gasoil of 10 in. diameter. 1 pipeline for loading/unloading oil of 8 in. diameter. 1 stainless steel pipeline for loading/unloading chemical products of 6 in. diameter.
Atraque No. 1 and 2 de Inflamables	Caburos Messer	1×4 in. pipe for the supply of nitrogen to the berthing points No. 1 and 2.
Atraque No. 3 de Inflamables	Carburos Messer	1×3 in. pipe for the supply of nitrogen.
Zona Inflamables	Terminales Quimicos and Terminales Portuarias	Facility for the loading/unloading wagons for liquids.

Location	*Owner*	*Characteristics*
Puerto Exterior	Asfaltos Espanoles S.A.	Dolphin 1,150 m. long with 3 moorings for ships of 6,000, 20,000 and 100,000 d.w.t. 3 pipelines for crude, oil, naphtha and deballasting of 16 in. – 20 in. diameter. Capacity 1,000 t.p.h./3,000 t.p.h. 4 pipelines for fuel-oil, naphtha and asphalt of 12 in. diameter. Capacity 600 t.p.h. 11 pipelines for ethylene, gas oil, gasoline, propylene and other chemical products of 6 in. – 8 in. diameter. Capacity 100 t.p.h. – 600 t.p.h. 8 pipelines for fresh water supply, firefighting water, treated water, compressed air and gas return.
Puerto Exterior	Repsol Petroleo, S.A.	Dolphin 1,489 m. long with 5 moorings for ships of 11,000, 45,000 and 100,000 d.w.t. 2 pipes for crude oil of 30 in. diameter and 56 in. diameter. Capacity 3,500/12,500 t.p.h. 2 pipes for Naphtha and deballasting of 24 in. diameter. 6 pipes for fuel-oil (2), vacuum gas-oil, petrol (2) and gas-oil of 20 in. diameter. 2 pipes for kerosene and pygas of 16 in. diameter, 1 pipe for bunker fuel of 14 in. diameter, 1 pipe for propane of 12 in. diameter, 2 pipes for ethylene and propylene of 10 in. diameter, 3 pipes for bunker diesel, octene and butane of 8 in. diameter, 3 pipes for butadienne, fresh water (not drinking water) and vapour to flare of 6 in. diameter, 1 pipe for blanketing by nitrogen of 4 in. diameter, 1 pipe for ethylene gas of 3 in. diameter, 1 pipe for propylene gas of 4 in. diameter. Monobuoy for unloading and bunkering of ships up to 250,000 d.w.t. in normal conditions and exceptionally up to 325,000 d.w.t. and 40 m. draft. 2 floating hoses of 24 in. for crude oil. Connection with the ship is 16 in. ASA of 150 lb. and 1 floating hose of 12 in. diameter for bunkering fuel oil, connection with the ship is 10 in. ASA of 150 lb.

CARGO HANDLING EQUIPMENT: (Private).

Forklift Trucks: 38×2.5 – 25 tons.

Forklifts with Spreaders for Containers: 7×20 – 40 tonnes.

Shovel Loaders: 47×1 – 80 tonnes.

Grabs: 9×3 tons; 7×12 tons, 4×14 tons, 9×16 tons, 5×20 tons, 6×25 tons.

Hoppers for Trucks: 17×8 tonnes – 50 tonnes.

Conveyor Belts: 12×250-800 t.p.h. for bulk cargoes.

TANKERS:

A.S.E.S.A.:

Max. LOA:	155 m.
Monobuoy	Crude Oil
Max. Draft:	140 ft. 05 in.
Max. LOA:	350 m.
Max. Size:	325,000 d.w.t.

Mooring and unmooring manoeuvres are performed with the assistance of tugs. Pilotage is compulsory for mooring.

No engine repair is allowed that could prevent the immediate departure of the tanker. The International Safety Regulations are to be observed.

Repsol Monobuoy:

SBM type, with a diameter of 14 m. Anchored with 6 chains, 42 m. depth. Connected to the Monobuoy are 3 floating hoses (2×24 in., 1×12 in. diameter), 287 m. length. Vessels sailing in the proximity should give a wide berth.

The Monobuoy location is: Lat. 41° 04.1' N., Long. 1° 13.3' E.

Day marking of Monobuoy: Yellow "X" shaped figure. Night marking by yellow light visible all round, with 4 flashes every 20 secs., range 5 miles.

Dirty Ballast:

At the installations of REPSOL there is a plant for the disposal and treatment of ballast with a maximum capacity of 30,000 cu.m. at a maximum flow of 2,000 cu.m.p.h. The plant is available to all tankers due to take cargo in the Pantalan.

Also see "Specialised Cargo Handling Facilities".

NOTE: The REPSOL Jetty and Terminal Port Captain requires: (1) Vessels due to load/discharge liquid products must guarantee at all times their tanks are free of oxygen; and (2) vessels fitted with IGS must provide for and prove their system is in good working order before approaching any of the REPSOL jetty berths.

Gas Free Certificates: Gas Free Certificates will be required for all tankers, no matter what the previous cargo carried was.

Inward Cargo Manifest: The Customs House will no longer accept general cargo denominations like "chemicals", "productos quimicos", "acids", etc.

All commodities must be manifested with their denominations, viz. "Ethylglycol", "Styrene Monomer", "Sulphuric Acid", etc.

LPG:

Asesa Berth No. C-06:

Ship's Length	Minimum 75 m., maximum 125 m.
Draft	Maximum 25 ft.
Deadweight	Pier owners (Asesa) receive vessels up to 5,000 d.w.t. at this berth.
Allowed weather conditions for berthing	Max. wave height 70 cm. – 80 cm. Max. wind force 35 km./hr. – 40 km./hr.
Mooring Details:	See "Plan".

Products:

Ethylene:

Storage capacity	9,000 tonnes (2 tanks)
Operating pressure storage tanks	10 gm. – 65 gm.
Design pressure storage tanks	70 gm.
Compressor capacity	4.6 tonnes per hour
Pipelines to berth	Liquid nominal diameter 10 in. Liquid nominal diameter 2 in. (for pre-cooling purposes only)
Lengths of pipelines	1,100 m.
Unloading facilities on dock	Chicksan type DCMA, nominal diameter 8 in., length 46 ft.
Unloading rate max.	400 tonnes per hour at −103°C (at higher temperatures unloading rate decreases fast).

Propylene Oxide:

Storage capacity	1,600 tonnes (1 tank)
Operating pressure	0.3 – 0.45 kg./sq.m.
Design pressure	0.50 kg./sq.m.
Pipe-lines to berth	Liquid nominal diameter 8 in. Vapour nominal diameter 4 in.
Lengths of pipelines	1,100 m.
Unloading Facilities on dock	SS hoses nominal diameter 4 in. (for vapour)

STEVEDORES: Advisable to report ETA, in order to have all the necessary equipment and necessary number of workmen required for operations. If there are not enough cranes at a given time, own ship equipment is used.

FRESH WATER: Supply of fresh water by means of an underground pipe in all the commercial quays of the port. Rate 20 t.p.h.

FUEL: Fuel oil, diesel oil and gas oil available. Request of this supply should be done with 24 hours' notice through the Commercial Agent of C.L.H.

CONSULS:

Brazil
Colombia
Costa Rica
Cuba
Denmark
Finland
France
Greece
Guatemala
Italy
Netherlands
Norway
Sweden
United Kingdom

REPAIRS: Small repairs available.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Not compulsory, if Master requires them he is provided with specialised staff for this purpose.

OPENING/CLOSING HATCHES: Although this work is normally carried out by crew it can be done as well by the stevedores if required at extra charge.

CUSTOMS ALLOWANCES: It is permitted to have a packet of cigarettes per person per day. Unlimited allowance of national drinks.

REPATRIATION: Facilities exist.

AIRPORT: There is a small airport 12 km. away, for cargo and charter flights.

Nearest international airport for passengers and spare parts consignments is at Barcelona, which is 1 hour 30 minutes drive (60 miles).

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: January 1st and 6th; May 1st; June 24th; August 15th and 19th; September 11th and 23rd; October 12th; November 1st; December 6th, 8th, 25th and 26th. Also: Good Friday and Easter Monday.

POLICE/AMBULANCE/FIRE: Police 23.33.11; Ambulance at local hospital 23.35.35; Fire 54.50.80.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Service available through Grino Trans S.A., c/o Mar. No. 13, 43004 Tarragona, Tel: 77-215274.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

DEVELOPMENTS: The port is designing 2 quays for dry bulk. One of the quays will have 150 m. length and 14.00 m. depth, and will have a berthing line perpendicular to the present berthing line of the Catalonia Quay. The second quay will have a berthing line of 400 m. length and 14.00 m. depth, and will be located between the Aragon Quay and the Catalonia Quay.

The port is also constructing a new berth for dangerous liquid cargoes at Muelle de Inflamables.

The Port of Tarragona will open the new car terminal. It is located in a new esplanade. The new dock will provide a capacity of 10,000 cars and the esplanade of 16.5 hectares will be connected by road and railway. All Roll-on/Roll-off facilities are ready in the new car terminal.

SHIPMASTER'S REPORT: February 1987.
Vessel: 95,000 d.w.t.
Documents:

6 copies Crew List.
2 copies Crew Declaration.
3 copies Stores List.
1 copy Health Declaration.

Two Health Officers boarded. Ship's stamp required on all documents.

Anchorages: Vessel anchored one mile off East Breakwater. Bottom is mud and holding good.

Tugs: One tug secured forward and aft. 2 ship's lines used through the centre fairleads.

Berthing: Vessel berthed at the Southern outermost berth. Vessel steams in and lets go starboard anchor. Two headlines and one forward backspring are sent ashore after which vessel swings to port with assistance from the tugs. The backspring is to be kept tight. First line ashore aft is a spring. The lines to the tugs are sent ashore by a boat.

On completion of mooring the vessel has forward: 4 headlines, 2 breastlines and 2 springs. Aft: 4 sternlines, 2 breastlines and 2 springs and an additional line to the starboard quarter buoy.

Gangway: Normally a shore gangway is provided but on our visit it was being repaired.

Shore Leave: Passes are required for shore leave. Transport is required.

SHIPMASTER'S REPORT: June 1987.

Vessel arrived at 1700 hrs. and Pilot boarded at 1800 hrs. Vessel all fast at 1900 hrs.

On entering the Pilot boards about one mile from the breakwater and on departure he leaves just inside the breakwater.

Vessels of Panamax size use 3 tugs. Tugs' performance was reasonable.

Our arrival draft was 12.83 m. and the present maximum draft at the bulk terminal is 14.0 m.

There is a new berth nearing completion (Cataluna Quay) which will have a depth alongside of 20.0 m.

A new SBM is being positioned off the port to take maximum size vessels.

No Spanish arrival forms provided. I.M.O. forms used. Arms and Ammunition List, Passenger List and Drugs List required. These may be typed on ship's paper. Agent requires Load Line Certificate, Safety Certificate, Radio Certificate, Safety Construction Certificate and I.O.P.P.

Cargo operations commenced at 0900 hrs. the following day and cargo (11,000 tonnes) was completed at 0115 hrs. the next day. Documents completed at 0200 hrs. and Pilot boarded at 0300 hrs. The vessel was clear of the berth at 0340 hrs. and Pilot departed at 0410 hrs.

SHIPMASTER'S REPORT: September 1987 (Updated 1990).
Chart: BA. Chart No. 1193.
Documents:

6 copies Crew List.
2 copies Crew Declaration.
2 copies Manifest.
1 copy Health Declaration.
2 copies Cargo Manifest.

Terminal shore passes are issued to all crew members. Customs are likely to board the vessel at any time.

Anchorage: Anchorage is outside the breakwater in the area indicated on BA. Chart No. 1193. Depth is about 15 fathoms. This is not a good anchorage in Winter due to the heavy ground swell.

Pilotage: The Pilot boards at the anchorage or off the breakwater entrance near the green buoy marking the breakwater extension. Berthing is only carried out during daytime. However, unberthing is possible throughout 24 hours. Unberthing for small vessels may be allowed without the use of a Pilot if no Pilot available.

Movements inside the harbour only take place during daylight hours.

Pilot may be contacted on VHF Channels No. 12 and 9.

Berthing: Ethylene is handled at 2 piers operated by REPSOL (Berth No. 11) and ASESA. Vinyl Chloride Monomer (VCM) is handled at one pier by ASESA.

Vessel berthed port side to head out at Berth No. 11 (REPSOL). The berth is very open to Southerly winds and swells. Moorings consisted of3 head/stern lines and 2 springs at each end. The starboard anchor was also used and a line was run from aft to the off shore buoy.

Personnel are not allowed to walk down the pier. A mini bus is provided by the terminal. No stores are allowed on pier. The ASESA Pier is the nearest to the city and the depth on Berth "C" is 30 ft.

VCM is handled on Berths "B" and "C" and ethylene is handled at Berth "B". Vessel berthed starboard side to head out. Moorings consisted of 3 head/stern lines and 2 springs forward and aft. Port anchor used.

In Winter time a line is run to the offshore buoy aft and a heavy shore spring is provided forward. The berth is effected by wind and swells from the South but to a lesser extent that the REPSOL berth. Vehicles with stores are allowed to within 100 m. of the vessel. There is a mini bus every hour on the half hour from 0730 hrs. to 0230 hrs. from the pier to the city centre and on the hour from 0800 hrs. to 0300 hrs. from the city to the pier.

Cargo:

REPSOL: Ethylene is handled through an 8 in. Chicksan at the REPSOL Berth. The arm is the nearest arm to the shore. The ship's maximum pumping rate is allowed up to a back pressure of 2 Bar. Samples can take up to 3 hours.

ASESA: Ethylene is handled through an 8 in. Chicksan. Ship's maximum pumping rate allowed up to a back pressure of 3 Bar. Samples take about 3 hours.

DOW: Ethylene pipelines are interconnected between both berths so berthing can take place on either pier, depending upon availability.

VCM loading is also carried out at ASESA through stainless steel/rubber hoses of 4 in. (liquid and vapour). Ambient storage. (In August our intake temperature was +28° C). Vapour can only be pumped ashore. The terminal has 2 loading pumps which give loading rates of 90 t.p.h. or 150 t.p.h. Samples take 1.5 hours per ship's tank.

VCM storage capacity is 6,000 tonnes in 2 × 3,000 tonne tanks. One tank is for finished product and one for production. Maximum production 450 tonnes per day. However this is greatly reduced in the Summer months due to the high temperature.

Ethylene is purchased from local supplier to produce VCM.

General: There are many ship chandlers in the area.

Fresh water available by barge at both piers. Water is not of good quality and should be only taken in emergency.

Nearest main airport is at Barcelona which is 2 hours drive.

The construction of the breakwater extension has ceased for the present time. The Pilot reported that work is not expected to resume in the near future.

A new quay for bulk cargoes has been completed. Depth alongside 21 m. The channel and turning basin leading to the berth is also dredged to 21 m. Maximum draft permitted at the new berth is 20 m.

SHIPMASTER'S REPORT: October 1993.

Approaches: Breakwater, Oil Piers and Cabo de Salou Lighthouse to South stand out well.

Anchorage: Area as per B.A. Chart No. 1193, to North of Breakwater. Anchorage is exposed. To the south of the breakwater is the SBM and oil pipelines.

Pilot: Pilot on VHF Channels 9 and 14 (24 hours). Pilot boards from typical Spanish cutter with black hull and grey upperworks. A good lee is required. Pilot requires 30 minutes notice on departure.

Tugs: Two tugs of good power used. Tugs lines used.

Berth: Darsena del Molino: A new extension to the West of the old port. West side used for discharge and loading of chemicals and LPG. Three jetty berths as per B.A. 1193. Jetty No. 3 used for LPG. Vessels can berth either side to, pilots prefer Port side to, head in. Depth 10.0 m.

Moorings run by Pilot boat. 2 head/stern to shore. 2 springs either end to jetty.

Good fenders.

Ship's gangway from manifold.

Loading: We loaded Methyl Methacrylate Monomer (MMM) through 6 in. shore hose. Shore labour connect/disconnect hose. Average rate 212 t.p.h. Stop for 15 minutes for "First Foot" samples. Inhibitor added before and during loading. "First Foots" by gravity. Actual loading by shore pump. Shipper and Surveyor spoke good English. Line blown on board on completion.

Stores: Roadway about 60 m. from ship's side. From past experience trucks are not allowed on actual jetty. If a large quantity of stores are being delivered, a fork lift truck is required.

Fresh Water: Available from jetty. From past experience ship's hoses are used.

Telephone: Public call box near bow of ship.

AUTHORITY: Autoridad Portuaria de Tarragona, Passeig de l'Escull s/n, 43004 Tarragona, Spain. *Tel:* 977-226611 and 22670 *Telex:* 56520 APT. *FAX:* (977) 225499, 219638. *Contact:* Josep M Maceira Barbosa, President. Luis Grau Sbert, Port Director. Jes Sanchez Icart, Operations Manager.

TORREVIEJA: 37.58 N. 00.40 W.

PORT LIMITS: The port limits are considered to be at 1 mile distance from the lighthouse at the end of the Eastern Dock or breakwater.

DOCUMENTS:

4 Crew Lists.
4 Lists of Passengers.
10 Cargo Manifests, including Cargo in Transit, together with cargo for Alicante. Tobacco and Cargo Manifests visaed by the Spanish Consul in the port of origin. All the vessel's certificates, and where necessary in respect of the cargo which international regulations require.

PILOTAGE: The corporation does not have a radio station, however, it does have a walkie-talkie with a range of about 12 miles on VHF equipped with the following Channels: 6, 9, 11, 14, 16. The pilot craft is 10 m. overall length and is painted white, with the letter "P" painted in black on the sides. The pilot craft normally operates within a 1 mile radius of the white light of the breakwater lighthouse.

ANCHORAGE: The anchorage which is most recommended for vessels is 1 mile from the breakwater, with a sandy bottom and good holding ground.

MAX. SIZE: The port's maximum sizes are: Overall length 150 m. Max. draft on entry of 21 ft., if the vessel has to remain anchored awaiting a berth, and max. departure draft of 29 ft. 6 in.

HEALTH: Regulations as laid down by the International Foreign Health Requirements are enforced.

RADIO: Coastal station at Alicante; on MF with average range of 220 miles, and on VHF with a range of 40 miles.

TUGS: None available.

BERTHING: There is a berth in the Western Dock, with a length of 360 m., and a max. depth of 10 m. The loading operations are effected by shore equipment, provided that bulk salt is being loaded, or with the vessel's gear when bagged salt is being loaded.

CRANES: The port has no cranes, however, a mobile crane can be used for any weight which has to be loaded, the max. capacity of this crane is 7 tons.

STEVEDORES: There are no stevedoring gangs as the work force is employed by the Salt Plant. The only commodity loaded is salt and work is between 0600 hrs. and 2200 hrs.

MEDICAL: If a doctor is required by the Master, medical services can be furnished locally, it being necessary to transfer the patient to clinic in Alicante, if the case is serious.

TANKERS: No facilities available.

DENSITY: Average port density is 1030.

FRESH WATER: Available. Rate 5 t.p.h.

CUSTOMS ALLOWANCES: Each crew member is permitted to have 200 cigarettes and 1 bottle of spirits out of ship's bond.

REPATRIATION: Possible.

HOLIDAYS: Normally no work is done in the port on the following holidays: New Year (January 1st), Epiphany (January 6th), San Vicente (April 23rd), Maundy Thursday, Good Friday; Labour Day (May 1st); Festival of San Pedro (June 29th), Corpus Christi; Santiago Apostol (July 25th); Assumption Day, Festival of the Spanish speaking world (October 12th); All Saints (November 1st); Immaculate Conception (December 8th) and Christmas Day (December 25th).

AUTHORITY: Ayudante Militar de Marina.

VALENCIA: 39.27 N. 00.18 W. **(See Plan)**

DOCUMENTS:

3 Crew Lists.
2 Passenger Lists or negative.
1 Cargo Manifest of goods destined for the port.
Manifest covering transit cargo.
2 Stores Lists, including tobacco, cigars, cigarettes, coffee, spirits, radios, cameras, etc., in possession of crew. In all cases make and number of radios to be indicated.
Safety Radio Certificate and Safety Equipment Certificate.

If vessel carries over 6 kilos tobacco per man, the excess to be declared in a separate manifest, which must be visaed by Spanish Consul at the last port, otherwise vessel is exposed to heavy fine.

Shipmaster's Report: November 1988.

Customs: 2 Stores Lists.
2 Crew Declarations.
2 Crew Lists.
2 (Nil) Passenger Lists in Spanish.
2 copies Manifests of Cargo in Transit.
Quarantine: 1 Maritime Declaration of Health.
1 Crew List.
1 (Nil) Passenger List in Spanish.
Agent: 1 Crew List.
1 Crew Declaration.
1 (Nil) Passenger List in Spanish.
1 Stores List.

PILOTAGE: Pilotage is compulsory for this port. Day and night service. The pilot launch is painted black with a letter "P" painted in white on the sides.

ANCHORAGES: There is a good anchorage outside the port, vessels are required to keep the entrance channel clear.

RESTRICTIONS: Entrance to the port faces S.E. and is 500 m. wide, with a low water depth of 17.0 m.

MAX. SIZE: The following size vessel has entered the port:

GRT	*LOA*	*Draft**
105,327 tons	234 m.	13.65 m.

*Real draft on entry/departure.

HEALTH: If the vessels proceed directly to berth, Pratique can be obtained immediately after berthing. Otherwise, at anchorage at vessel's arrival.

If vessel has sickness on board of a contagious nature Master should advise Health Authorities by radio, and they will examine patients immediately upon arrival, to enable vessel to be granted Free Pratique.

RADIO: Coastal radio station with international frequencies 1580 kHz.

ETA to be sent to Agent in advance.

TUGS: 8 tugs available up to 3,630 h.p. Two tugs normally used for berthing and unberthing.

BERTHING: Quays operated by Port Authority:

CARGO HANDLING FACILITIES:

Special Loading/Unloading Facilities:

Location	*Owner*	*Remarks*
Espigon Turia Sur	C.L.H.	3 petroleum products points connected to pipelines, pumping installation.
Muelle del Turia	C.L.H.	Petroleum products point connected to pipelines, pumping installation.
Espigon Turia Testero	C.L.H.	Petroleum products point connected to pipelines, pumping installation.
Dique del Sur	C.L.H.	Unloading of petroleum products. Pier with pipelines up to the factory.
Espigon Turia Testero	Cia.Valenciana de Cementos Portland S.A.	Loading of cement in bulk. Hovercrafts conducted by a rolling bridge, crane fed, with a conveyor belt from silos.
Espigon Turia Testero	Cia.Valenciana de Cementos Portland S.A.	Pneumatic loading of concrete in bulk from trucks with bridges.
Espigon Turia Norte	Demagrisa	Vegetable oils point. Wines point. Both connected to a pipe system with pumping installation.
Muelle del Turia	Esdecasa	Pneumatic loading of grains and seeds by a suction machine, connected to a conveyor belt placed in the gallery.
Espigon Turia Sur	Proas	Asphaltic products point, connected to a pipe, pumping installation.
Espigon Turia Sur	Demagrisa	Point for wines, connected to a pipeline, pumping installation.
Nuevo dique del Este	Terminales Portuarias, S.A.	Chemical products point, connected by a pipeline, pumping installation.
Muelle del Sur	Terceval, S.A.	Grain terminal with handling directly from vessel to silo or vice versa.

Facilities for Specific Traffic:

Discharge of Petroleum Products: Pier capable of accepting vessels up to 210 m. long with 12 m. draft, having a discharging capacity of 1,000 t.p.h.

Loading of Cement: Special facility using two simultaneous gravity systems by means of conveyor belts and gantries from silos and by pneumatic hoses from trucks, reaching an output of 800 t.p.h. This is carried out at a pier which allows up to 14 m. draft.

Container Terminal: There are 3 specialised container terminals.

(A) Public Container Terminal:

The operator is Maritima Valenciana S.A.

There is a quay length of 800 m. with 14.0 m. water depth, and a second quay with length of 176 m. and a water depth of 9.0 m.

The Terminal is equipped with 5 container gantry cranes, 2×40/45 ton Panamax Paceco and 3×32.5 ton Standard Paceco. The mobile handling equipment consists of 11×40 ton Paceco Fruehau 070 rubber tyred transtainers. There are electrical points for 300 refrigerated units.

There is a total area of 35 ha., of which 25 ha. are used for stacking and handling, with storage for up to 12,500 TEU.

There is a paved back-up area of 13 ha. and 4,000 sq.m. of covered area for CFS operations (storage 80 TEU).

Traffic in 1994: 300,819 TEU.

Traffic in 1995: 454,094 TEU.

(B) Terminales del Turia S.A.:

The quay length is 235 m. with 9.0 m. water depth. The Terminal is equipped with 2 gantry cranes, 1×40 ton Inta Eimar and another 32 tons. There is a transtainer with a capacity of 30 tons.

Traffic in 1995: 62,160 TEU.

(C) Transbalear:

One container quay, served by 1×28 ton Imenasa crane.

Traffic in 1995: 12,731 TEU.

Multi-Purpose Terminal: Terminal operating company: Terport S.A. Berths and cranage: Total quay length 420 m., depth 12.0 m. equipped with 4 portal cranes (2×30 tons and 2×12 tons), 2 Ro-Ro ramps and one mobile crane 80 tons.

Terminal Facilities: Total area 11 ha.; 50 electric reefer points; front handlers: 13 Caterpillar (4×30 tons, 5×10 tons and 4×3 tons).

Consolidation: CFS on Terminal. Covered area 6,000 sq.m.; reefer points on Terminal; forklifts on Terminal.

Traffic in 1995: 68,570 TEU.

Roll-on/Roll-off Traffic: There are 14 specialised berthing places for this type of traffic. On the Levante Quay, there are moorings with a 9.0 m. water depth. Between the Levante and Outer Transveral Levante Quays, there is a corner with 2 berthing places of 12.0 m. and 7.0 m. water depth respectively.

In the interior harbour there are 6 berthing places with water depths of between 7.0 m. and 7.5 m. Between the Outer Poniente Transversal Quay and Poniente Quays, there is a corner with 2 berthing places of 7.0 m. and 9.0 m. water depth respectively. Lastly on the Muelle Turia there are 3 berthing places, one is on the Espigon del Turia Sur with 11.0 m. water depth, and the other 2 are between this quay and the Muelle Turia with a water depth of 9.0 m.

CRANES: There are 51 gantry cranes, 6 with 32/45 tons capacity. There is also one floating crane of 135/34 tons capacity at 7.0/21.40 m. reach.

MEDICAL: All medical services available in the port and in the city.

TANKERS: *C.L.H.:* One berth, length 210 m., depth 12 m.

Pipelines: The port areas equipped for oil traffic are connected to the C.L.H. plant by means of a network of 5 pipelines, starting at the Turia Pier and Quay, and ending at the plant itself.

These pipelines are 1×10 in. diameter with a capacity of 300 cu.m./hr., and another of 8 in. and 250 cu.m./hr. for movement of fuel oil. 2×8 in. diameter and 250 cu.m./hr.; one for gas oil and one for gasoline. There are also means of delivery of aviation paraffin by means of 1 pipeline 6 in. diameter at the rate of 120 cu.m./hr.

Also see "Berthing".

Waste Reception Facilities: There is a private service for waste collection. These products are transferred outside of the port enclosure.

Pollution: The naval command has a tug to fight against sea pollution and contamination.

FRESH WATER: Available at all main berths at the rate of 30 t.p.h.

FUEL: C.L.H. can supply by pipelines at the Turia berths, at the rate of 100 t.p.h. – 280 t.p.h.

CONSULS: The following countries are represented in Valencia:

Austria
Belgium
Benin
Bolivia
Brazil
Colombia
Chile
Denmark
Dominican Republic
Ecuador
El Salvador
Finland
France
Gabon
Germany
Great Britain
Greece
Guatemala
Haiti
Honduras
Iceland
Italy
Ivory Coast
Liberia
Monaco
Norway
Netherlands
Peru
Seychelles
Sierra Leone
Sweden
Switzerland
U.S.A.
Uruguay
Venezuela

REPAIRS: All types of hull and machinery repairs can be effected.

FLOATING DOCK: 1 floating dock available, owned by Union Naval de Levante. Interior length 143 m., interior width 24.60 m. Lifting capacity 8,000 tonnes.

CUSTOMS ALLOWANCES: Normally Customs permit 200 cigarettes per man out of bond. Additional quantities needed depend on the stay of ship in port. One bottle of spirits per man.

AIRPORT: Valencia Airport, 15 km. from the port.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: Work can be arranged on following holidays. New Year's Day (January 1st, full day); Epiphany (January 6th, full day); Saint Joseph (March 19th, full day); Easter (two days); Labour Day (May 1st, full day); Patron Saint of Spain (July 25th, full day); Assumption Day (August 15th, full day); Community Day (October 9th, full day); Holiday of Hispanicism (October 12th, full day); Holiday of the Virgin Mary (December 8th); Christmas Day (December 25th, full day).

The Public Container Terminal working time is 24 hours a day, every day, except Labour Day (May 1st, full day); New Year's Day (January 1st, full day) and Christmas Day (December 25th, full day).

POLICE/AMBULANCE/FIRE: Police 091; Fire 3730080; Ambulance 3606211, 3526750.

DEVELOPMENTS: *New Container Terminal:* The South enlargemen project will be operational mid-1997. The surface area i 1,000,000 sq.m., berthing length 1,000 m. and depth 16.0 m.

Equipment: 4 Post-Panamax and 3 Panamax Paceco portainers and 20 Paceco transtainers.

Operator: Maritima Valenciana, S.A. Tel: 34-6-367-25-62. Fax: 34-6 367-86-59.

AUTHORITY: Autoridad Portuaria de Valencia, Muelle de la Aduana, S/n 46024 Valencia, Spain. *Tel:* 34-6-3939500. *Telex:* 64508 *FAX:* 34–6–3939599. *Contact:* Rafael del Moral Carro, Port Director.

VIGO: 42.14 N. 08.42 W. (See Plan

DOCUMENTS:

Maritime Declaration of Health.
Crew List.
Passenger List.
Manifest of Cargo for the Port.
Manifest of Cargo in Transit.
Ship's Stores List.
Crew's Personal Effects List.
Ship's Particulars Declaration.

Note: Tobacco: In case the vessel carries more than 6 kilos of tobacc per man, the excess must be declared in a separate manifest, whic must be visaed by a Spanish Consul. In the absence of the Consul, sai document will have to be visaed by an authority of the former port o clearance. Otherwise the vessel would be severely fined.

PILOTAGE: Pilotage at Vigo is compulsory and the service permanen day and night. Pilots board in auxiliary motor-boats with a letter "P" i white at both sides of the hull and a blue flag with the letter "P" in white near the entrance of the harbour, in the zone included inside Punta Lameda-Cabo Vicos on the channel of the South Entrance and inside Punta Caballo-Subrido, on the channel of the North, both situated to the West of the harbour. At night the pilot boats have a white light visible around the horizon and under this light another red one, also visible around the horizon. International Code signals used to call Pilot, or 4 long blasts on the whistle. Pilot station situated at Transatlanticos Pier 3 Pilot boats normally on station on a line connecting Borneira and Transatlanticos Pier.

ANCHORAGE: Several suitable anchorages in the Vigo Estuary naturally sheltered, in depths of more than 35 m. The main anchorag opposite the port on the South side of the "Ria" has depths of 15 m.-25 m.

MAX. SIZE: No limitation for length and beam, unlimited deep wate approaches.

Largest Vessel: LOA 337 m. Draft on arrival and departure 14.50 m.

HEALTH: If vessels proceed directly to the berth, Pratique can b obtained immediately after berthing. Otherwise, at the anchorage o vessel's arrival. In case of suspected disease or fever on board, th Master must send a radio message to the Agent in order that they advis the Health Office.

RADIO: The nearest Radio Station is Vigo Radio, situated in the limit of Vigo Port.

TUGS: No tug-boats are required for entering the port. Only used fo berthing ships from 120 m. length upwards according to Pilot's advice At Vigo there are 7 modern tugs from 350 h.p. – 8,200 h.p. Tugs jo vessel off the berth. Tug's line used at no extra charge.

BERTHING:

VILANOVA I LA GELTRU: 41.12 N. 01.43 E.

(See Plan)

DOCUMENTS:

3 Crew Lists.

1 Passenger List or negative.

Manifest of Goods destined for Vilanova i la Geltru and in-transit.

Stores List, in duplicate, including tobacco, spirits, radios, etc. belonging to vessel.

Detailed list, in duplicate, of all personal effects of crew and passengers (tobacco, spirits, cameras, radios, etc.).

Tobacco – any excess over 6 kg. per person must be stated on a separate manifest duly visaed by Spanish Consul.

If on inspection differences are found (more or less), articles are removed and a heavy fine imposed.

PILOTAGE: Pilotage is compulsory and service permanent. Pilot informed by Agent of vessels ETA, given 24 hours in advance. When vessels approach the breakwater, Pilot will board. The pilot boat is white with a black "P" painted on the side. Contact Pilot Station on VHF Channel 16. Tel: (93) 8949655.

RESTRICTIONS: None but for draft. Vessels carrying dangerous cargo should get permission for berthing prior to arrival.

HEALTH: Pratique is obtained immediately after berthing. In case of suspected disease or fever on board, the Master must radio Agent in order to inform Health Officer in time.

RADIO: Radio Costera of Barcelona on 2182 kHz.

VHF: See "Pilotage".

TUGS: None. Barcelona's tugs could be hired should the vessel's size make it necessary.

BERTHING: Depth of water in centre of harbour 16 ft. – 20 ft. South Commercial Wharf length: 836 ft., depth 18 ft.; East: 721 ft., depth 12 ft. – 15 ft.

CRANES: Two railway portico cranes of 16 tons capacity, 1 mobile crane of 3 tons capacity and 1 mobile crane of 20 tons capacity.

STEVEDORES: 24 hours notice required in order to arrange gangs. Unloading rates depend on type of cargo.

MEDICAL: Any kind of medical service can be arranged if information received in time.

FRESH WATER: Plentiful supply of water by means of hoses from the pier to vessel.

FUEL: Can be supplied if required, but 24 hours notice required.

CONSULS: See "Barcelona".

REPAIRS: Only small repairs possible.

SURVEYORS: Comisariado Espanol Maritimo "Comisar".

GANGWAY/DECK WATCHMEN: Not compulsory but advisable at night.

OPENING/CLOSING HATCHES: Normally opened/closed by the crew, otherwise according to "Charter Party". Lashing must be carried out by crew.

CERTIFICATES: Usual documents on board. Safety Radio, Safety Equipment, Derat and Registered Tonnage Certificates are the only ones required by Authorities.

CUSTOMS ALLOWANCES: Crew: 6 kg. tobacco per person. Passengers: 2 kg. per person. Any excess on this amount must be declared on a separate manifest as in-transit. Wine and/or Spirits: Only 1 bottle per person. Any excess must be declared on a separate manifest, as "cargo in-transit" and stowed apart from the tobacco and spirits carried under the Provisions List. This Manifest must be visaed by the Spanish Consul at the last port of call. Any infringement of this regulation will subject the vessel to the immediate imposition of a heavy fine and confiscation of excess tobacco.

REPATRIATION: Good facilities available.

AIRPORT: Barcelona Airport situated 40 km. distant and 30 minutes by car from Vilanova I la Geltru.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer (Late March – late September).

HOLIDAYS: September 11th.

POLICE/AMBULANCE/FIRE: Police: (93) 8930947; Ambulance: (93) 8158979; Fire: (93) 8151111.

IDENTIFICATION CARDS: Not required.

AUTHORITY: Ayudante Militar de Marina, Vilanova I la Geltru (Barcelona-Espana). *Tel:* 8154219. *Cables:* Ayudante Marina, Vilanova I la Geltru.

Comissio de Ports de Catalunya, c/Dr. Roux No. 63, 08017 Barcelona. *Contact:* Zona Portuaria II-III, Ronda General Mitre 117, Sobreatico – 08022 Barcelona. Tel: 93-2113116. *FAX:* 93-4186012.

Vilanova I la Geltru. Tel: (93) 8155219.

VILLAGARCIA DE AROSA: 42.36 N. 08.46 W.

(See Plan)

DOCUMENTS:

Declaration of Health.
3 Crew Lists.
Passenger List.
3 Cargo Manifests.
Manifest for Cargo in Transit.
Crew Declaration.
Ship's Stores List.

APPROACHES: Access through Arosa Bay main channel entrance in position Lat. 42° 28' N., Long. 08° 59' W.

PILOTAGE: Compulsory for entering, leaving, berthing, unberthing or shifting. Ships bound for any port in Arosa Bay, must report ETA through ship's local Agent 24 hours in advance of their arrival, specifying if GMT or local time.

Pilot Boarding Station: Ships bound for Villagarcia are normally boarded 2 miles off harbour breakwater (Lat. 42° 35.4' N., Long. 08° 50.0' W.). Under previous request Pilot may be obtained at Lat. 42° 31' N., Long. 08° 57' W. (2 miles off Rua Island). Pilots may be contacted by VHF Channel 12.

Pilot for Shifting or Departure: Notify at least 1 hour in advance.

Berths are requested through Ship's Agent and arranged by Harbour Authorities in advance.

Linesmen and Boatmen are arranged through Ship's Agent.

ANCHORAGES: There is sufficient anchorage for any size of vessel in Arosa Bay. Vessels awaiting Pilot at Rua Island may anchor 1 mile Southward of Rua Island, in depths of 35 m. to 40 m., bottom is mud. For anchorage in the harbour area (Eastward of El Seijo light), a Pilot must be arranged.

MAX. SIZE: No restrictions, except max. draft 7.0 m. (23 ft.) at LWS.

RADIO/VHF: Nearest stations are: Vigo Radio, VHF Channel 16; Finisterre Radio, MF 2,182 kHz.

TUGS: Compulsory for ships of 90 m. LOA or more.

One small tug available. Additional tugs may be called from Vigo when required. Ship's lines normally used.

BERTHING:

Berth Name	*Wharf Length (m.)*	*Depth Chart Datum (m.)*	*Remarks*
Ferrazo	200	11.0	Bulk cargoes through pipelines and general cargo.
Comercial W.	243	7.0	Bulk cargoes through pipelines and general cargo.
Comercial N.	80	7.0	General cargo.
Comercial E.	300	3.0-7.0	General cargo.
Pasajeros	430	3.0-4.0	Passengers.
Ramal	120	3.0-4.0	General cargo.
Ramal	250	7.0	Ro-Ro, bulk and general.

CRANES: 1×12 ton, 4×6 ton and 3×3 ton electric cranes at Comercial Mole. 1×12 ton, 1×6 ton and 2×3 ton electric cranes at Ramal Mole.

Mobile diesel cranes also available as required.

SPECIALISED CARGO-HANDLING FACILITIES: Discharge of cement in bulk through pipeline at Comercial Mole-West. Discharge/loading of liquid chemical products and asphalt through pipelines at Comercial Mole-West.

STEVEDORES: Normal working hours for general cargo: 0830-1800 (break 1230-1400). Normal working hours for frozen cargoes (2 shifts): 0830-1430 and 1430-2030. Advise ETA before 1700 hrs. in order to commence 0830 hrs. next day.

TANKERS: Discharge lines: 4 in. for methanol, 6 in. for urea formaldehyde, 8 in. for asphalt, at Comercial Mole-West. No slop facilities. No facilities to combat oil spills. No shore steam.

DENSITY: Normal density 1025. In severe rainy seasons may drop to 1020/1018.

FRESH WATER: Available at all berths. Order through Agent. Approx. rate 10 t.p.h.

FUEL: Gas-oil available by pipeline at Comercial Mole.

REPAIRS: Small deck and engine repairs can be done. No dry-dock available.

SURVEYORS: Comisariado Espanol Maritimo available. Order throug Agent.

HATCHES: Opening/closing of hatches to be carried out by ship's cre only.

REPATRIATION: Crew changes and repatriation possible.

AIRPORT: Nearest airport at Santiago de Compostela, some 50 km away.

TIME: Western European time kept. (GMT plus 1 hour in Winter; GM plus 2 hours in Summer).

HOLIDAYS: Set yearly by the Government. For details contact Agen

POLICE/AMBULANCE/FIRE: Police 091 or 501864/50025 Ambulance 500987; Fire 501008/851633.

EMERGENCY CO-ORDINATION CENTRE: Harbour Master's Offic tel. 500209.

BANKS: Branches of main Spanish banks.

SHORE LEAVE: No restrictions. No shore passes. Seaman's Book sufficient.

AUTHORITY: Autoridad Portuaria de Villagarcia, Muelle de Pasajeros 36600 Villagarcia de Arosa, Galicia, Spain. *Tel:* 34-86-500232, 50023 501340. *FAX:* 34-86-507923. *Contact:* Enrique Disdier da Vila, Po Director.

NOTES

Please also advise Shipping Guides Ltd.

Sri Lanka

GENERAL:

MINES: *Danger from Mines:* Reports have been received (1986) indicating that waters near Sri Lanka ports may be mined.

NAVIGATION: *Control of Navigation in Sri Lanka Waters:* The Sri Lanka Government has issued regulations controlling navigation in the territorial waters of Sri Lanka.

(1) No vessel shall enter or remain within Sri Lanka's territorial waters other than:

Vessels entering or leaving the ports of Colombo, Galle, Trincomalee and Kankesanturai.

Vessels navigating through the Traffic Seperation Scheme off Dondra Head.

Vessels laid up inside Trincomalee Harbour.

Vessels engaged in Sri Lanka's coastal trade.

Vessels waiting in the roads off the Port of Colombo with the approval of the Harbour Master.

Vessels navigating through Sri Lanka's territorial sea and internal waters in Palk Strait with the permission of the Commander of the Sri Lanka Navy.

(2) Any vessel which enters Sri Lanka's territorial waters in contravention of these regulations shall do so at their own risk, and the Sri Lanka Government shall not be liable for any loss or damage such vessel may suffer.

(3) The Master of any vessel which enters Sri Lanka's territorial waters shall identify itself if challenged by:

Any vessel responsible for performing coastguard duties.

Any aircraft.

Any Sri Lanka authority from land by radio.

(4) Any vessel which has to enter Sri Lanka's territorial waters for purposes other than those given in (1) shall do so only with the approval of the Harbour Master.

(5) All vessels approaching the Port of Colombo are required to keep at least 1.5 miles clear of the single point mooring buoy in position Lat. 06° 58.67' N., Long. 79° 46.50' E. No vessel is permitted to go closer than 1.5 miles without the permission of the Harbour Master.

SHIP SUPPLY SERVICE: GAC Shipping Limited (Sri Lanka) operate a Ship Supply Service from the Port of Galle.

Galle is situated approximately 75 miles South of Colombo and 94 miles South of Katunayake International Airport. Flights to all major destinations operate from this busy airport which handles a very large volume of business. The road journey between Colombo and Galle takes approximately 3 hours.

A standard 65 ft. "GACSHIP" crew boat is on station at Galle, and there is a small GAC Operations Office located close by the port entrance. The office is equipped at present with I.D.D. telephone and VHF. Telex and fax facilities are being installed. A VHF listening watch on Channel 16 is maintained on a 24 hour basis, call sign "GACSHIP GALLE". The range of this set has been proven upto a maximum distance of 20 miles.

The SSS Operation is coordinated fully by GAC Shipping Limited, Colombo, which is a 24 hour operational office, fully equipped with telex, facsimile, IDD telephones, and all communications should be addressed to this office.

In addition to the normal crew change, spares and stores delivery services, available in the Arabian Gulf, the following services can be arranged at Galle with sufficient notice, normally 72 hours.

Bunkers	MDO only at present maximum 500 tonnes.
Fresh Water	Maximum 200 tons in one delivery.
Provisions	Fresh/frozen.
Underwater	Hull cleaning/inspection.
Lube Oil	Offshore delivery, drums only.
Survey	Hull machinery and liquid/dry cargoes.

Helicopter services between Katunayake and Colombo, and Colombo and Galle can be arranged without difficulty.

There are no Visa requirements for visiting Company representatives or joining crew members.

The "Rendezvous" position is 12 nautical miles South of Point de Galle in approximately 70 m. depth. This position can be adjusted to suit individual vessel requirements.

Co-Ordinating Office for Sri Lanka SSS:

GAC Shipping Ltd., P.O. Box 1116, 180 Bauddhaloka Mawatha, Colombo 4, Sri Lanka. Tel: 94-1-586191, 584870, 581191/2/3/4. Fax: 94-1-582806. Telex: 23418 GACSHIP CE. Office operational 24 hours daily.

Galle Operations: Listening watch on VHF Channel 16, 24 hours daily, call sign "GACSHIP GALLE". Tel: (94-9) 34025. Telex: 23418 GACSHIP CE. Fax: 94–1–582806.

COLOMBO: 06.56 N. 79.50 E. (See Plan)

DOCUMENTS:

5 each of Crew and Passenger Lists.

8 Manifests.

1 Arrival Report for Pilot, including Dangerous Cargo Declaration.

1 Master's Declaration for Immigration, and same for Police.

2 Private Property Lists of Officers and Crew for Customs.

2 copies of Preliminary Report by Master for Customs.

1 Maritime Declaration of Health for Port Health Officer.

1 Master's Declaration of Cargo for Quarantine Department.

PILOTAGE: Vessels approaching port apply for Pilot by flying the "G" flag by day or 2 red lights at night. They can, in addition, use VHF Channel 16. The telegraphic address of Pilot Station is "Pilot Station Sri Lanka Ports Authority Colombo" and a provisional ETA 24 hours ahead is advisable with corrections thereafter. However, these are best channelled through the vessel's Agent. Pilot boat is a wooden motor launch with the word "Pilot" on its side. It flies the "H" flag by day or red and white lights by night according to the international code. Pilot boarding position is with the Southwest breakwater North end light in transit with North West Breakwater South end light at a distance of 1.0 miles off. Advice of where to anchor can be obtained from the Pilot by VHF.

ANCHORAGES: The anchorage off port is within 3 miles of the harbour mouth where up to 14 fathoms of water is available. 18 fathoms of water is available within 6 miles. This anchorage is to be used on instructions from Pilot Station.

All vessels arriving have to anchor South of Panadura (Lat. 6° 43' N.) until instructed to proceed to the anchorage off harbour.

RESTRICTIONS: Entry may take place at all hours of the day and night.

MAX. SIZE: For entering harbour, max. draft 12.0 m. and a length of 900 ft. is permissible. Beam is not critical. There is no appreciable rise and fall of tide.

Tankers' maximum dimensions for berthing alongside: Length 750 ft., draft 34 ft.

HEALTH: Vessel entering port must fly the "Q" flag until boarded by the Port Health Officer to grant Pratique. Pratique may be granted by radio if there is a doctor on board provided the ship is not calling from a port in India. A radio message should be sent within 24 hours of the vessel's ETA in the following terms "Last port — no quarantinable disease on board – Doctor on board" and the Port Health Officer will reply to the Agent confirming Pratique being granted by radio. Pratique is automatic if the vessel enters after calling at another port in Sri Lanka. If any quarantinable disease on board double "Q" flags must be hoisted prior to entering harbour.

RADIO: "Colombo Radio" with a call sign 4PB is the usual channel for communicating with Colombo.

VHF: The Pilot Station is presently available on VHF Channel 10 and the Authorities' Cargo Operations Control Room on VHF Channel 11.

TUGS: Tugs normally join the vessel at the harbour mouth and use tugs lines. Three tugs up to 45 tons bollard pull are available at any one time, 4th tug on advance request.

BERTHING: There are no specific requirements relating to berthing space but early advice of draft and length is most advisable.

Report: September 1993 (Updated 1996).

The following information has been received from Agent in Colombo:

PVQ	Prince Vijaya Quay
GP	Guide Pier

CONTAINER HANDLING FACILITIES: *Queen Elizabeth Container Terminal (QCT):* Length 425 m. Depth 9.5 m. – 10.8 m. 3×35 ton shore gantry cranes and 65 reefer points available. Annual volume 260,000 TEUS.

Jaye Container Terminal (JCT): Length 632 m. (Stage 1 and 2), 660 m. (Stage 3 and 4). Depth 12.0 m. – 13.0 m. (Stage 1 and 2), 14.0 m. (Stage 3 and 4). 5 Panamax shore cranes, 6 Post panamax shore cranes and 3 additional cranes on order. 1596 reefer points. Expected volume for 1996 – 1,300,000 TEUS.

Fully computerised planning and operational control system including electronic bay plan facility.

STEVEDORES: The stevedores at Colombo are the Sri Lanka Ports Authority, having the monopoly of stevedoring and lighterage. ETA at least 24 hours in advance if possible.

Working hours: (2 shifts) 0730 to 1630 and 1630 to 0400, depending on requirements, extendable until 0600.

Booking gangs: For discharge on 1st day, 24 hours advance notice required by Agent and thereafter at Agent's request at the end of shift.

MEDICAL: Although advance notice of medical assistance required is helpful, particularly when port stay is limited, it is not essential. Comprehensive hospital facilities are available either in private nursing homes or the Government hospitals. The following inoculations are required: cholera; yellow fever if calling from ports in East Africa and Mozambique.

TANKERS: There is one tanker berth for import of gas oil, lubricating oil and white oil, and export of Naphtha/furnace oil.

The diameter of discharge lines;

White oil, 10 in., capacity 250 t.p.h.

Gasoline, 10 in., capacity 170 t.p.h.

Furnace oil, 14 in., capacity 500 t.p.h.

Naphtha, 12.75 in., capacity 450 t.p.h.

Pumping will not be commenced after nightfall. No residue discharge facilities are available.

There is an SPM 6 miles outside the harbour for discharge of crude oil. Max. size 180,000 tonnes deadweight. Pipeline 36 in.×9.2 km.

Report: December 1992.

(1) Proposed New Oil Terminal:

Planned LOA : 220 m.

Planned Draft : 13.0 m., could be increased to 14.0 m.

Deadweight : 60,000 tonnes

Diesel : Available

Bunkers : Available

This berth will be designed to accommodate broad beam shallow draft tankers up to a maximum of 60,000 d.w.t.

Although this berth was originally planned to be operational in 1993, due to the other various development programmes within the Port of Colombo, no priority has been afforded to this project. It is therefore unlikely that this terminal would be operational prior to 1994.

(2) North Pier:

LOA : 180 m. at draft 10.36 m. LOA can be increased to 190 m. at draft of 9.8 m. for'd and 10.36 m. aft.

Bunkers/Diesel : Available, subject to quantity required and availability of berth.

Temporary restrictions have been placed on this berth as this area has been utilised in connection with the construction work of the new container terminal.

(3) Prince Vijaya Quay: Operator : Sri Lanka Ports Authority

(A) PVQ 1

LOA : 137 m.

Draft : 9.2 m.

Density : 1025

(B) PVQ 2

LOA : 152 m.

Draft : 9.45 m.

This berth is primarily for general cargo. Bunkers and water available by barge.

LPG discharged into bowsers (road trucks). No storage available. Normally only vessels that can carry 1,200 – 1,600 tonnes are handled.

(4) Coastal Berth:

(A) CB 1

LOA : 98 m.

Draft : 6.0 m.

This berth is primarily for general cargo.

Bunkers and water available.

LPG discharged into bowsers (road trucks). No storage available. Normally only vessels that can carry 1,200 – 1,600 tonnes are handled.

DENSITY: 1025.

FRESH WATER: Fresh water is readily available by barge and from hydrants at the Jaye Container Terminal. The rate of delivery is approx. 40 t.p.h. The water is of good quality.

FUEL: Furnace, diesel and gas oil available. Advance notice of at least 24 hours is advisable as the bunker requirements of the port often exceed the ability of the oil companies to supply immediately.

4 barges available, 450 tons, 650 tons and 1,000 tons. Fuel also available by pipeline if berth (max. draft 34 ft.) available.

CONSULS: Belgium, China, Cyprus, Czech Rep., Denmark, Egypt, France, Germany, Greece, Indonesia, Italy, Japan, Maldives, Myanmar, Netherlands, Philippines, Poland, Romania, Russia, Thailand, Switzerland, U.S.A., Yugoslavia.

REPAIRS: Most main engine and boiler repairs and minor hull repairs can be effected.

DRY DOCKS: No. 1 – 700 ft.×85 ft.×32 ft. over blocks – Max. size 675 ft. LOA. 80 ft. breadth – Deepest draft 29 ft.

No. 2 – 350 ft.×54 ft.×22 ft. over blocks.

No. 3 – 400 ft.×54 ft.×18 ft. over blocks.

Owners and Operators – Colombo Dockyard Limited.

New dry dock: Length 263 m., width between fenders 44 m., depth over sill 8.2 m., capacity 100,000 d.w.t.

SURVEYORS: *American Bureau:* c/o Malship (Ceylon) Ltd., Reclamation Road, Colombo 11. Tel: 24658, 25856. Telex: 21150.

Salvage Association: c/o Aitken Spence & Co. Ltd., 13 Lloyds Buildin P.O.Box 5, Sir Baron Jayathileke Mawatha, Colombo 1. Tel: 27861- 27103. Telex: 21142/21598.

Lloyd's Register: No.7, 19th Lane (2nd Floor), Colombo 3.

Bureau Veritas: c/o Delmege Forsyth & Co. Ltd., 101 Vinniyalanka Mawatha, Colombo 10. Tel: 93361. Telex: 21320.

GANGWAY/DECK WATCHMEN: Watchmen are available and are t be recommended unless members of the crew are available to provid this service.

Piracy: Acts of piracy have taken place in the approaches to the port

OPENING/CLOSING HATCHES: This work is normally carried out b the stevedores except in the case of MacGregor or similar hatch cover which they will not handle.

CERTIFICATES: Register showing vessel's name, port of registry, gros and net tonnages and owner. Safety Equipment Certificates, quadrenni and annual, Ship's Articles (British) and Clearance from previous po and Derat Certificate.

CUSTOMS ALLOWANCES: Cigarettes 25 per man per day. Tobacc 1 oz. per man per day. Snuff 1 oz. per man per day. Spirits 0.25 bott per man per day. Wine 1 bottle per man per day. Beer 2 bottles pe man per day.

REPATRIATION: There is no difficulty in arranging repatriation and cre changes.

AIRPORT: It is 18 miles to the international airport which is served b regular airlines.

TIME: Sri Lanka standard time is 5.5 hours in advance of GMT. GM plus 6.5 hours in Summer.

HOLIDAYS: Cargo work can normally be arranged on all except th following holidays:

Sinhalese and Tamil New Year; 1st May; Wesak Full Moon Day Christmas Day.

POLICE/AMBULANCE/FIRE: Harbour Police 21075; Ambulanc 20428; Ambulance launch: Call Pilot Station on VHF Channel 16. Por Fire Brigade 32331 and VHF Channel 16.

EMERGENCY CO-ORDINATION CENTRE: "Colombo Radio".

TELEPHONES: Will be available to vessels alongside in the near future

BANKS: American Express International Corporation, 45 Janadhipath Mawatha, P.O.Box 650, Colombo 1. Tel: 23366, 37991, 31288- Telex: 21469 "Amex".

Algemene Bank Nederland N.V., 41 Janadhipathy Mawatha P.O.Box 317, Colombo 1. Tel: 20205. Telex: 21590 "Abn A".

Citibank N.A., P.O.Box 888, Iceland Bldg., Colombo. Tel: 547316 Telex: 21445 "Ctbk" Ce.

Overseas Trust Bank Ltd., 39 Bristol Street, Colombo 1. Tel: 547655- Telex: 21489 "Otbsl" Ce.

The Chartered Bank, 17 Janadhipathy Mawatha, P.O.Box 2 Colombo 1. Tel: 26671-4. Telex: 21117 "Banchar" Ce.

Grindlays Bank, 37 York St., P.O.Box 112, Colombo. Tel: 91161- Telex: 21130 "Grindlays" Ce.

Bank of America, P.O.Box 308, Colombo. Tel: 547372/5. Telex: 214 "Bo Facol" Ce.

STORING: See "Prelims".

1. Yes, able store both by barge and truck.
2. Yes, vessel could store from barges during both loading an discharging.
3. Trucks could proceed alongside vessel.
4. Yes, fork lift trucks could be used.
5. Any operation could be carried out with prior approval of Customs under Customs supervision.
6. No. Port Stevedoring labour has to be made use of. However, loc riggers can be employed by obtaining special permission from the Chi Operations Manager of the Sri Lanka Ports Authority.

SHIP SUPPLY SERVICE: See "General" before first port.

SHORE LEAVE: There is no restriction on crew members being allow ashore but advised to carry passport or other identification.

IDENTIFICATION CARDS: These are not essential but the crew expected to carry some form of identification with a photograph on when they leave the vessel.

GARBAGE DISPOSAL: Garbage in bags is collected by small boat after making special arrangements with the Agent.

WASTE OIL DISPOSAL: Quantities up to 50 tons can be collected aft making special arrangements with Agent.

SEAMAN'S CLUBS: Missions to Seamen, 26 Church Street, Colomb Tel: 448572.

DELAYS: Delays for vessels working cargo are seldom over 24 hou Vessels requiring bunkers should advise ETA as early as possible

GENERAL: Ships should not discharge oil within territorial wate dispose of any waste into harbour or on to quays, immobilise ma engines without prior permission, use radio for transmission in harbo Ships should hoist national flag during daylight hours.

AUTHORITY: Sri Lanka Ports Authority, No. 19 Church Street, P.O.B 595, Colombo 1. *Tel:* 421201, 421231. *Telex:* 21805 Ports C *FAX:* 440651. *Contact:* Mr. Sundra Jayawandhana, Chairma (Tel: 325559. Fax: 440651).

Mr. H.D.A.S. Premachandra, Chief Operations Manager. (Tel: 325 Fax: 320956).

Captain S.Chinniah, Harbour Master. (Tel: 421079. Fax: 421079).

AGENT: GAC Shipping Ltd., P.O. Box 1116, 180 Bauddhaloka Mawat Colombo 4, Sri Lanka. Tel: (94-1) 581191, 581192, 581193, 581 Telex: 23418 GACSHIP. Cables: Confidence. Fax: (94- 582806.

GALLE: 06.01 N. 80.14 E. (See Plan)

PORT LIMITS: To the Eastward Unawatuna Point, to the Westward Gindurah Point, to the Southward the usual sea league from the line between these points.

DOCUMENTS: Pilot brings on board:

Arrival Report and Maritime Declaration of Health.

Port Health Officer boards vessel after berthing and collects Crew List, Passenger List, Maritime Declaration of Health. Examines crew, passengers and International Certificates of Vaccination.

Customs. Manifests, Bonded List, Passenger List, Cargo List, List of Currency, Port Declaration.

Immigration. 3 Crew Lists.

PILOTAGE: Apply for Pilots via local Agents. Send ETA not more than 24 hours prior arrival via Colombo Radio. Vessels telegraph direct to Harbour Master, Galle, via Colombo Radio. Vessels advised listen-in on Channel 16, VHF.

Pilot launch about 60 ft. long with white hull carrying word "Pilot". Pilot launch proceeds to vessels from Harbour Master's Office and Pilot will board about 0.25 mile to South of bell buoy. Vessels should anchor until pilot launch arrives and heave-up on approach of pilot launch; due to heavy swell prevalent *essential* vessels provide good lee for Pilot. Proper pilot ladder and two man ropes should be ready. Vessels anchoring should do so to the South or East of bell buoy. See "Anchorages".

ANCHORAGES: Best anchorage lies to Eastward of bell buoy where depth is 9 fathoms. To Southward of bell buoy depth increases to 15 fathoms. Vessels should anchor about 0.5 mile from bell buoy.

RESTRICTIONS: Vessels should not proceed North of bell buoy. Entry prohibited after 1800 hrs. and may be delayed by bad weather. Generally a wind force of over 25 knots and a swell of over 4 ft. delays entry.

MAX. SIZE: Two alongside berths available for vessels up to 450 ft. length and 24 ft. draft. 750 ft. of quay space available.

HEALTH: The International Declaration of Health, handed to Master by Pilot, must be completed and returned to Port Health Officer, who boards after berthing. Port Health Officer also requires 2 Crew Lists, synopsis of Vaccination Certificates, Derat Certificate and examines Certificate of Vaccination.

RADIO: Colombo Radio.

VHF: Harbour Master's Office on VHF Channel 16, regular watch not maintained.

TUGS: At present only 1 tug of 450 h.p. available throughout year. If sufficient notice given (over 24 hours) an additional tug could be sent from Colombo (only available during N.E. monsoon). Tug meets vessel at berth, tug's lines used. Charges for tugs included in port (pilotage) charges irrespective of ownership of towing lines.

BERTHING: See "Max. Size".

STEVEDORES: All stevedoring carried out by Sri Lanka Ports Authority. Gangs, lighters etc. are all arranged by Sri Lanka Ports Authority. 16 lighters of approx. 15 d.w.t. capacity available for working vessels in stream berth.

MEDICAL: All facilities available. Vessels arriving in Galle and requiring medical attention should cable Agent and "Port Health – Galle" at least 12 hours in advance.

DENSITY: 1025.

FRESH WATER: In cases of emergency up to 20 tons fresh water could be supplied daily in stream in 400 gallon tanks conveyed by lighters. Alongside main quay up to 50 tons per night could be supplied by Bowser.

FUEL: Bunkering Division of Ceylon Petroleum Corporation, Kolonnawa (off Colombo) can service vessels with small quantities of fuel. 5 days' prior notice required.

CONSULS: All Consular Officers in Colombo, 72 miles away, 2 hours by train, 2.5 hours by road.

REPAIRS: No repairs possible as Galle open to S.W., essential that vessels have engines ready at all times. No shutdown permitted.

GANGWAY/DECK WATCHMEN: Ceylon Police Station. Two policemen aboard every vessel in harbour. For vessels berthed alongside policemen stationed aboard through day. For stream vessels policemen stationed only during hours when cargo worked.

OPENING/CLOSING HATCHES: Shore labour, but there is no objection to hatches being opened prior to labour boarding.

CUSTOMS ALLOWANCES: Present allowance 200 cigarettes per week, 2 bottles beer per day. Others proportionately.

REPATRIATION: Sub-collector of Customs acts as Shipping Master and will sign on/off properly authorised crew changes.

AIRPORT: Colombo, approximately 130 km.

TIME: Standard Time is GMT plus 5.5 hours. GMT plus 6.5 hours in Summer.

HOLIDAYS: Non-working days in the port (dates variable yearly): Sinhala and Tamil New Year in April; Wesak Full Moon in May.

POLICE/FIRE/AMBULANCE: Harbour Police 3222; Ambulance 2261. No fire brigade available.

TELEPHONES: No telephones available aboard.

SHIP SUPPLY SERVICE: See "General" before first port.

SHORE LEAVE: Crew allowed ashore.

AUTHORITY: Sri Lanka Ports Authority, Closenberg Jetty, Magalla, Galle, Sri Lanka. *Tel:* 09-22963 (Resident Manager); 09-22824 (Assistant Harbour Master).

AGENT: See "Colombo".

KANKESANTURAI: 09.49 N. 80.03 E.

SHIPMASTER'S REPORT: May 1979.

LOCATION: Kankesanturai (KKS) is situated on the North coast of Sri Lanka in position Lat. 9° 48' 57.5" N., Long. 80° 02' 41.5" E.

DOCUMENTS: See "Colombo".

APPROACHES: Kankesanturai cannot be approached directly from sea but is approached via the Pedro Channel. The area seaward of Pedro Channel is very shallow and abounding in reefs.

Approaches to Pedro Channel: The East coast is low lying and sandy with only palm trees. The landmarks for making Pedro Channel are (a) Mullaittivll Light and (b) an obelisk situated in position Lat. 9° 35' N., Long. 80° 27.5' E. Mullaittivll Light was not working and the obelisk which is 100 ft. high can hardly be distinguished because it is surrounded by vegetation. The best approach is to steam on a course of 280° (T) heading straight for the obelisk. (Note: Radar distances etc., could not be observed as the vessel's radar was out of order). This area is covered by B.A. Charts No. 2197, 2031 and 68A. These charts are not to be fully relied upon as the charts last large correction, etc., was in 1947. This vessel did not have a working radar, hence it was decided to lower the boat and sound the intended track ahead. The track sounded was followed until the obelisk was ahead of the track and visible, which was in this case at about 5 miles. Once the vessel enters Pedro Channel it has to proceed on a course parallel to the coast. After altering course in a Northwesterly direction the obelisk which is the only mark in the area is soon covered by vegetation and not visible. The next landmark being the Point Pedro Lighthouse which is 25 miles away to the North. The objects marked on the chart like churches, buildings etc., cannot be relied upon at all as they are numerous.

Depths in Pedro Channel: As marked on the chart the depth in Pedro Channel varies from 6.5 to 9 fathoms. During this vessel's transit, it was suspected to be less and at certain points, the boat was again lowered and soundings of 28 ft. were obtained.

Approaches to KKS: After passing Point Pedro Light course was altered to West keeping about 3 miles off the land and dangers. "KKS" can be observed from quite a distance because of chimneys of a cement factory. The "KKS" lighthouse could also be visually observed at a distance of about 8 miles. When "KKS" lighthouse bore South, distance 2.5 miles, the vessel was stopped and again the boat was lowered to sound the anchorage area and approaches. Depths of 30 ft. to 36 ft. were found just 0.5 miles distance from the land. The anchorage was approached and this vessel anchored with "KKS" light distance 0.5 miles. Four shackles were used and throughout the stay the vessel held fast.

After anchoring soundings were taken all round the vessel and the least depth obtained was 31 ft. at low water. There is hardly any tide, the maximum difference being about 2 ft. The vessel usually lies in an East-West direction and when swinging around usually does so via North. Only on one occasion throughout the stay did she swing via the South.

RADIO: Communication with "KKS" even from Colombo (telephone) was very difficult, sometimes delays over 4 to 5 hours were experienced. "KKS" has no telex communication. The best method is to keep the vessel's radio station open and communicate via Madras Radio.

CARGO OPERATIONS: *Port of "KKS" and Discharging:* This is a anchorage only port which is open from March to October. Cargo is bagged on board and discharged into lighters. The lighters are then landed on the beaches and labour carries bags ashore to the warehouse which is about 30 yards away. On this vessel cargo was bagged during the night and discharged by day. There are at one time about 200 – 300 labourers on board. The labour for bagging and discharging are different. The average discharge rate worked out to about 800 tons. This is the first time the bagging had to be done as normally vessels calling are loaded with bagged cargo. The crane operators are very careful and follow the instructions given by the vessel with regard to the cranes. About 12 vessels call at this port per year during the season.

DENSITY: Density was found to be constant at 1025.

FRESH WATER: None available. Ample fresh water needed as water also has to be supplied to the labour.

PROVISIONS: Almost all types of provisions available at reasonable costs. Rice which is also available is of very poor quality. The Agents also handle the ship chandling.

LAUNDRY: Laundry facilities are available, but costs are slightly on the high side. This is also handled by the Agents.

REPAIRS: There is a small workshop available for mechanical/electrical repairs.

CURRENCY: All currencies have to be declared and all currencies except Indian, Pakistani and Bangladesh can be changed in banks. The above three currencies are supposed to be banned in Sri Lanka.

GENERAL: "KKS" is a very small town. The largest town being Jaffna which is 14 miles away. Buses and taxis are available.

AUTHORITY: Port soon to be controlled by Sri Lanka Ports Authority.

TRINCOMALEE (including Pulmoddai):
08.36 N. 81.15 E. **(See Plan)**

DOCUMENTS:
International Maritime Declaration of Health.
6 copies Crew List.
6 copies Passenger List.
Cholera or Yellow Fever Certificates required if vessel is arriving from an infected port.

PILOTAGE: Call Pilot on VHF Channel 16, also send ETA via Colombo Radio to Pilot Station. Vessels should indicate ETA through Colombo Radio, either to Agent or direct to Deputy Harbour Master, Trincomalee, at least 24 hours before arrival. No night pilotage. Pilot boards incoming vessels between hours of 0600 and 1800 hrs. about 2 cables Northward of Round Island (Lat. 8° 30' 48" N., Long. 81° 13' 24" E.). Vessels embarking Pilot should whenever possible lower an accommodation ladder. Vessels awaiting a Pilot should anchor 0.5 miles N.W. of Round Island light tower in depths from 11 to 13 fathoms.

Vessels arriving between 1800 hrs. – 2100 hrs. may be brought in at Deputy Harbour Master's discretion if they come to anchorage 5 cables N.W. of Round Island.

ANCHORAGES: Trincomalee Harbour is the only entirely sheltered natural harbour in Sri Lanka. Good anchorage may be found in almost any part of harbour in good weather.

RESTRICTIONS: Vessels may enter during hours of daylight only. Range of tide is very small and does not restrict entry.

MAX. SIZE: Almost unlimited length and draft can be accommodated in anchorage. Only 1 berth which can accommodate up to 600 ft. length, and 32 ft. draft. This jetty used for discharging tankers and bunkering.

HEALTH: The Port Health Officer boards vessels after arrival at anchorage to grant Pratique. Pratique automatic for vessels arriving from another port in Sri Lanka.

RADIO: All cables to Deputy Harbour Master, Agents, Receivers, etc., should be routed through Colombo Radio; call sign 4PB.

Pilot carries portable VHF set, Channel 16, with about 10 miles range.

TUGS: Two tugs available. One tug attends when required. Tow-lines generally not used; but if required tug or ship's lines used.

BERTHING: A bulk-grain berth to accommodate vessels of 800 ft. in length, and draft forward 41 ft. and aft 46 ft. is available at Malay Cove, in the vicinity of Round Point.

Also see "Developments".

Pulmoddai: Pulmoddai is a roadstead, on the Eastern coast of Sri Lanka and approximately 38 miles from Trincomalee. The loading season is usually from April to September.

The Mineral Sands Corporation has housing for their staff and a medical practitioner is employed by them who also acts as a Port Health Officer for granting Pratique to vessels.

The Corporation has two godowns with a capacity of 14,000 tons of rutile and 25,000 tons of ilmenite. Presently ore is transported by conveyor belts from the godowns for lighterage along a pier stretching up to 250 ft. into the sea. The Corporation has a fleet of 8 steel lighters, of which 6 are of 100 tons capacity and 2 of 200 tons capacity. The loading rate is around 2,000-2,600 tons per day working 5 hooks in good and fair weather.

The stevedore labour is private and is recruited from Trincomalee whenever a ship operates at Pulmoddai. As the stevedores stay on board until completion of loading, it will be necessary for the vessel to carry sufficient water to meet the stevedore requirements.

It is customary for the ship to provide food and accommodation for two Customs Officers and a representative of the Shippers during cargo operations.

Prior information is also essential by the Agents of vessel's ETA, etc., which should be passed to the Plant Manager of the Corporation at Pulmoddai by cable or telex to enable him to obtain labourers from Trincomalee.

There is no launch service, but the Corporation provides a launch on a schedule drawn by the Corporation, and the Agents could make use of this facility.

STEVEDORES: Stevedoring operations have been nationalised and are carried out by the Sri Lanka Ports Authority, Trincomalee.

TANKERS: One tanker berth at which vessels of 600 ft. length and 32 ft. draft are discharged.

Report: December 1992

*Oil Berth:*A temporary restriction has been placed on the oil berth.

At present both the head and stern buoys are very old and due for replacement in the near future.

The fendering on the jetty is extremely poor and the connecting bridge between the dolphins is in a state of disrepair.

LOA: 180 m.
Draft: 10.0 m.

DENSITY: Salt water.

FRESH WATER: Available, supplied by water barges.

FUEL: Marine heavy diesel and furnace oil can be supplied at 24 hours' notice.

CONSULS: All Consular Officers are in Colombo.

REPAIRS: Only minor repairs can be carried out.

GANGWAY/DECK WATCHMEN: Watchmen are provided by the Sri Lanka Ports Authority.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCES: Tobacco issued as required. Wine and/or Spirit issued as required.

REPATRIATION: Crew changes and repatriation can be effected.

AIRPORT: No International flights through Trincomalee.

TIME: GMT plus 5.5 hours. GMT plus 6.5 hours in Summer.

HOLIDAYS: Dates of holidays are not fixed. Cargo work can generally be arranged on any holiday.

TELEPHONES: Police 2308; Ambulance 448; Fire 335. There are no telephone connections for ships.

SHIP SUPPLY SERVICE: See "General" before first port.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Identity Cards or Passports are required to be carried by crew members ashore.

DEVELOPMENTS: Tokyo Cement Company Jetty is now in operation to discharge cement clinker by grabs. Length of berth 460 ft. Depth alongside 28.5 ft.

AUTHORITY: Sri Lanka Ports Authority, Inner Harbour Road, Trincomalee. *Tel:* 541395. *Contact:* Resident Manager/Deputy Harbour Master.

AGENT: See "Colombo".

NOTES

Please also advise Shipping Guides Ltd.

Sudan

PORT SUDAN: 19.37 N. 37.14 E. (See Plan)

DOCUMENTS:
Port Sudan Harbour Master's Declaration.
Sudan Customs Declaration.
Quarantine Form.
(All above forms to be filled by Master on arrival).
3 Crew Lists.
3 Passengers Lists.
1 Crew Declaration.
1 Dutiable Stores.
4 copies Manifest.
1 copy Bills of Lading.
1 Provisions List.

PILOTAGE: 24 hours' notice ETA. VHF Channel 14. Pilot boards South of South Wingate Beacon. Pilotage compulsory.

ANCHORAGES: Towartit Anchorage, approx. 8 miles S.E. of harbour.

RESTRICTIONS: No restrictions providing berth available.

Age Restrictions: The Sea Ports Corporation, Port Sudan, issued the following circular:

"(1) Ships of over fifteen years of age will not be allowed to work in the harbour unless able to produce a Sea Worthy Certificate stating that all deck appliances and propellers are fit for work and capable of lifting and handling all kinds of goods carried on board the ship. The Owner or the Charterers of the ship will be held responsible for the correctness of the Certificate and for any delay incurred due to defect or non-efficiency of ship appliances.

(2) Ships working within the Red Sea Basin will be allowed to enter the harbour despite their age limit or nationality provided that they produce the Certificate referred to in Para (1) above.

(3) Ships carrying goods to Port Sudan Harbour must not carry any packages which cannot be lifted by the ship's own gear or are away from the reach of their gear.

(4) Breaches of any of the above will be subject to a fine of two thousand Sudanese pounds."

MAX. SIZE: Length 850 ft. Max. draft at Oil Terminal 39 ft., other berths between 28 ft. and 34 ft. 6 in.

HEALTH: Radio Pratique obtainable if message sent not more than 24 and not less than 8 hours before arrival to "Quarantine, Port Sudan", with following information: Name of ship and ETA; Name of Agent; Whether surgeon carried or not; Whether illness on board, if so, what illness; Port of departure and last port of call. On receipt the Quarantine Medical Officer will inform ship by wireless whether Pratique is granted or not.

RADIO: Port Sudan Radio (call sign STP). Operates daily on High Frequency as follows: 8676 kHz from 0400 hrs. to 2200 hrs. GMT; 500 kHz – continuous listening watch for first 10 minutes of every hour. Radiograms may be handed in at Port Sudan Post Office at all times and at Port Sudan Quays Post Office during office hours.

VHF: Port Sudan Radio on Channel 16 and 19 from 0400-2200 hrs. GMT.

Port Control on Channel 14.

TUGS: About 1 mile from harbour entrance. Either ship's or tug's lines at Pilot's discretion.

No. 15	642 ft.	37 ft.	35 ft.
No. 16	230 ft.	37 ft.	35 ft.
No. 17	908 ft.	41 ft.	39.5 ft.
No. 18	908 ft.	41 ft.	39.5 ft.

CARGO HANDLING: Grain silo of 50,000 tons capacity situated at Berth No. 15.

Container traffic handled at Berths No. 17 and 18. Ro-Ro vessels handled at Berth No. 16.

20 mobile cranes, capacity 7 tonnes – 54 tonnes.

60 forklift trucks.

STEVEDORES: Require 24/48 hours advance notice of ETA and stowage of cargo. Rate of Discharge and Loading: General cargo, 5 – 10 tons per hook per hour. Bagged cargo, 15 – 20 tons per hook per hour.

Exports: Main exports are cotton, cottonseed, Arabic gum, oilcakes, beans, sugar, oilseed, hides, skins, wheat bran, karkadeh, ground nuts, edible oil, molasses and livestock.

Tea: Following exports should not be stowed with tea: castor-seed, hides, linseed, edible oil, oilcake. Cottonseed may be stowed with tea with separation of 3 ft. but it is preferable to stow in separate compartment from tea.

Cotton: Gum should never be stowed with cotton.

Transhipment cargo: Is normally not accepted at Port Sudan without prior permission, except in very small quantities.

Weight: Deadweight of cargo is expressed per ton of 1,000 kilos.

MEDICAL: Advance notice advisable. Hospital facilities available. Crew and passengers must have valid International Health books.

TANKERS: At Berth No. 16, vessels up to 600 ft. length can berth with overhang. Max. draft 34 ft. 6 in.

Berths 17 and 18 accommodate tankers up to 39 ft. draft. Berths connected by pipeline to refinery 8 km. South of Port Sudan.

Used for discharging crude oil and loading refined products.

"No smoking" notices required.

DENSITY: 1025.

FRESH WATER: Available ex-quay and ex-barge, capacity 200 tons.

FUEL: Marine Fuel oil (normally 1000 secs.); marine diesel oil (42/45 secs.); gas oil (35 secs.). 24/48 hours' advance notice advisable. Name of suppliers is required. Bunkers at times in short supply.

CONSULS: Nigeria.

REPAIRS: Minor deck and engine repairs.

DRY DOCKS: Slipways for 2 vessels up to 500 tons capacity.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Normally by stevedores.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes per person. Alcohol not allowed. Only personal requirements may be taken ashore.

REPATRIATION: Not recommended. Formalities take 2/3 days.

AIRPORT: 16 miles S.E. of port. Two flights daily to Khartoum and 2 flights a week to Cairo.

TIME: GMT plus 2 hours.

HOLIDAYS: The following government holidays will be considered as port holidays:

Day	*No. Days*
Independence Day	1
Christian Coptic Holiday	1
Rajab Revolution	1
Religious Holiday	1
Sham el Nassem	1
Ramadan Bairam	3
Kurban Bairam	5
Mohammedan New Year	1
Christmas Day	1

The port will not work on the following days: January 1st (Independence Day), November 10th-14th (First Day Kurban Bairam), December 1st (Mohammedan New Year), February 19th (Mulid El Nabi), June 30th (Revolution Day), September 3rd (First Day of Ramadan Bairam), December 25th (Christmas Day). Overtime will be worked on all other days.

POLICE/AMBULANCE/FIRE: Police 4888; Ambulance 2400; Fire 5922.

TELEPHONES: No arrangements exist for placing telephones on board.

IDENTIFICATION CARDS: Identification required in lieu of passports.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not usually available but could be specially arranged with refinery.

SEAMAN'S CLUBS: None.

CURRENCY: Sudanese Pound (S£).

GENERAL: Foreign currency allowed ashore, but must be changed in banks only. Crew are permitted to go ashore with any amount Sudanese Currency.

DEVELOPMENTS: The first development stage includes modification of 2 existing berths to accept ships of up to 50,000 d.w.t. and container vessels, relaying railway track in the port area and asphalting.

Second phase of development includes extension of 2 container berths, additional works at the Ro-Ro berth, a new oil berth (100,000 d.w.t.) and upgrading of the grain silo complex.

AUTHORITY: Sea Ports Corporation, P.O.Box 531 Port Sudan Quays, Port Sudan, Sudan. *Tel:* 2910, 2258. *Telex:* 70012 Rasmina SD. *Cables:* RASMINA. *Contact:* Mr. M.T. Aila, General Manager. Captain Omer D. Elkhaliefa, Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

Suriname

MOENGO: 05.38 N. 54.25 W.

A bauxite mining town about 70 miles up the Cottica River, a tributary of the Commewijne River, which latter joins the Suriname River at Fort New Amsterdam. Moengo is 94 miles from the Suriname River Light Buoy.

DOCUMENTS/PILOTAGE/GENERAL: Refer to "Paramaribo".

PILOTAGE: Vessel arriving after 2000 hrs. at the light buoy for Moengo can proceed on a suitable tide and anchor at Fort New Amsterdam without having to call at Paramaribo to be entered. In this case vessel will be entered on arrival at Moengo.

Also see "Paramaribo".

TUGS: Not available.

Towage is compulsory in the Cottica River from 40 miles below Moengo for vessels over 200 ft. long.

MAX. SIZE: Ships of 525 ft. can be accommodated. The Commewijne Bar is 9 ft. – 10 ft., so that the ruling draft is that of the Suriname River, maximum admissable draft being subject to the Suriname River.

BERTHING: Moengo has two piers at which ore is loaded by a transporter at the rate of 800/1,000 t.p.h. One pier is 430 ft. long and has a depth of 24 ft. alongside. Both will accommodate ships of 525 ft. length. Tracks are laid on the 430 ft. pier and a 25 ton crane is available.

PROVISIONS: Not available.

FRESH WATER: Small quantities can be supplied.

FUEL: Small quantities can be supplied.

AIRPORT: About 5 km. from docks.

AUTHORITY: District Commissioner acts as Harbour Master.

See "Paramaribo".

NEW NICKERIE: 05.57 N. 56.59 W.

DOCUMENTS:

6 copies Crew List.
6 copies Passenger List.
Customs Documents; Crew Declaration Lists; for instance, souvenirs, electric apparatus, etc.
2 copies Ship's Store Lists.
3 copies Manifests of Import.
4 copies Manifests of Export.
1 copy Transit Manifest.
2 copies Manifests of Coastal Cargo.
Ship's Papers to be shown on request.

PILOTAGE: Pilotage is compulsory for the Nickerie River for ships bigger than 50 gross tons. There is always a Pilot available; ETA to be sent 48 hours before arrival and, 12 hours before arrival give necessary correction message to the Agent.

Ships can only enter the river at or about the time of high water.

The Pilot boards near the Sea Buoy (Buoy No. 1). The pilot boat is painted black and white with "Pilot 1" on the side. The pilot boat does not use the international red-white pilot lights at night. It is possible to make radio telephone contact with the boat (Pilot carries a walkie-talkie VHF equipped with Channel 12). There is a signal lamp on board.

Send ETA message to Agent who will order the Pilot. Awaiting high water the vessel can anchor about 3 miles N.N.E. of the Sea Buoy.

ANCHORAGES: With a draft of 15 ft. the ship can safely anchor 3 miles N.N.E. of the Sea Buoy. It is not advisable to anchor in the Nickerie River for a long time, the river is too narrow.

MAX. SIZE: Minimum depth on the bar is 2.10 m. with maximum draft at HW varying from 14 ft. to 17 ft., maximum length is 130 m., governed by the width of the river (170 m. and upriver 70 m.). The vessel has to use the high-inlet for cooling water, etc., while passing the bar.

At low water ships are seated in the mud without consequence to hull, rudder or propeller alongside the wharf. There are berths for oil-carriers.

HEALTH: There is no Pratique procedure. Only in the event of any suspected disease on board must a doctor must be called.

RADIO: Send ETA cables to Paramaribo Radio. VHF equipment also used.

TUGS: No tugs available.

BERTHING: The port of New Nickerie is 3 miles up river.

Wageningen: Lies 27 miles up river and can be reached with the same draft as New Nickerie, but the width of the river is only 70 m., which restricts length to 120 m.

STEVEDORES: The Agent orders the gangs (maximum 3 gangs available).

MEDICAL: No advance notice required for medical treatment. There is 1 hospital in Nickerie with a surgeon.

TANKERS: There are 3 piers in Nickerie: Esso, Shell and Texaco pier. Maximum permitted draft 12 ft. 1 in. at Spring tide.

DENSITY: In the dry season the density on the river near New Nickerie is 1015. In the rainy season the density is 1005 near HW, and 1000 near LW. These all depend upon Spring tide or Neap tide.

FRESH WATER: Fresh water is available alongside the wharf of New Nickerie. It is loaded from shore by hose.

FUEL: Small quantities of fuel available from Esso or Shell, also grease and petrol.

CONSULS: No consuls in Nickerie.

REPAIRS: Small engine repairs and shaft repairs and some welding repairs can be done.

GANGWAY/DECK WATCHMEN: It is recommended to have a watchman during the night.

OPENING/CLOSING HATCHES: Patent hatches must be opened b the crew, other hatches by the stevedores.

CUSTOMS ALLOWANCES: Master included: for every 72 hours stayin in port: 15 cigars or 60 cigarettes or 30 cigarillos or 150 gm. tobacc plus 0.25 bottle spirits or 5 bottles beer or 1 bottle wine.

REPATRIATION: Possible via Paramaribo.

AIRPORT: The airport is 16 km. from the port of Nickerie. Once per da there is a flight to Paramaribo arranged by Suriname Airways.

Daily bus service between New Nickerie and Paramaribo.

TIME: Local time is GMT minus 3 hours. No alteration during year.

HOLIDAYS: See "Paramaribo".

POLICE/AMBULANCE/FIRE: Police 356; Ambulance 241; Fire 333.

TELEPHONES: No arrangements can be made for a telephon connection on board.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not needed.

DELAYS: Delays in berthing: There are only 2 wharves with a total lengt of 700 ft. Banana ships have priority. Delays in loading and dischargin there are only 3 gangs of stevedores. These can be enlarged to 5 "sma gangs".

DEVELOPMENTS: In the future a bigger and deeper port will be bui in the Corentyne River, about 20 miles up the river.

AUTHORITY: District Commissioner acts as Harbour Master.

See "Paramaribo".

PARAMARIBO: 05.50 N. 55.09 W.

PORT LIMITS: The seaward boundaries of the port, within which vessel is considered to be "arrived" is the entrance of the Surinam Marowijne, Coppename, Corantijn and Nickerie Rivers. Laytim commences to count after vessel has anchored or berthed.

LOCATION: On the left bank of the Suriname River about 8 miles abov New Amsterdam and 21 miles from light-buoy at river entrance.

DOCUMENTS:

5 Incoming Cargo Manifests (if any cargo), otherwise 3 copies.
1 Cargo Transit Manifest.
4 Outward-going Manifests.

These above-mentioned must be sent ahead to the Agent so that th can be translated into Dutch.

6 Crew Lists.
2 Stores Lists.
2 Crew Declaration Lists.
6 Passenger Lists.

PILOTAGE: Compulsory. All ships are requested to amend th estimated time of arrival in local time, at least 12 hours in advance b special message through the wireless station to their Agents or to th Harbour Master. Arrival message should include draft of vessel and oth requirements. 6 hours prior to arrival the ETA has to be confirmed an if necessary corrected. The Pilot will be dispatched after receiving th confirmed ETA. As shipping only uses the Suriname River, th Commenwijne River, the Cottica River and the Nickerie River, all Pilo except one for Nickerie are stationed at Paramaribo. Paramaribo Pilo board the vessels 1 mile North of the light buoy and between the lig and Braamspunt (Lat. 5° 57' N., Long. 55° 10' W.). Pilot station on VH Channel 12. Pilot station and harbour office to be advised of deepe draft. All vessels have to stop off the light buoy.

ANCHORAGES: Anchorage off town in 18 ft. – 35 ft. of water at LWS Government Officials board vessels immediately on arrival for Inwa Clearance. Vessels which are required to anchor off the port to wait f berths may be boarded at the anchorage.

RESTRICTIONS: The bar at the entrance of the Suriname River contro the ports of Paramaribo, Moengo, Paranam and Smalkalden, and ha a depth of 15 ft., with a rise at Neaps of 6 ft. 7 in. or Springs 8 ft. 10 i but it is soft mud. Due to the fact that the bar consists of mud, vesse regularly leave the port with drafts between 22 ft. and 23 ft.

CHANNEL: The channel is marked by numbered buoys with rad reflectors, odd numbers on the West with red lights, and even numbe to the East with green lights and painted respectively red and green.

HEALTH: Port doctor will visit an arriving ship only if there is a case contagious disease aboard, or if one of the preceding ports of call ha been declared to harbour contagious disease. No Bill of Health required. A ship with an infection on board must advise the Harbo Master by special message through the wireless station before arriv Yellow Fever Certificates required. Pratique granted by Customs Offic

RADIO: There is a 24 hour radio telephone watch at the Harbo Master's Office on VHF Channel 12. The coast station, PZN, al maintains a 24 hour radio telegraph (500 kHz) and telephone servic the 2,182 kHz band.

VHF: Harbour Office on Channel 12, 24 hours a day. Radio Stat "PZN" on Channels 16 and 12, 24 hours a day.

RADAR: None.

TUGS: Available from Paranam.

BERTHING:
B.E.M. Wharf: 110 ft. long, least depth 18 ft. Private cement and gravel discharge wharf, Moorings 450 ft. apart.
Banana Export Pier: 297 ft. long, least depth 18 ft. Fresh water can be supplied.
New Oil Terminal: Moorings 570 ft. apart. Least depth 18 ft. Platform length 65 m. Used for oil and gas.
Flour Pier: 36 ft. long. Moorings 160 ft. apart. Least depth 16 ft. Only possible to discharge flour with a grain elevator, rate 30 t.p.h.
Vensur Cement Wharf: 87 m. long, depth alongside 14 ft. Moorings 600 ft. apart.
New Haven Dock: 520 m. long. Least depth on the North end 4.5 m. at L.W.S. and least depth on South end 4.0 m. at L.W.S. Max. depth 21 ft. Fresh water can be supplied.
Shell Oil Terminal: Moorings 540 ft. apart. Least depth at LWS 18 ft. Exclusively for oil, gas and bunkering.

CRANES: One crawler crane 25 tons capacity.

MEDICAL: Excellent medical and dental attention is available to crew members of all vessels. Four hospitals available.

TANKERS: See "Berthing" and "Shipmaster's Report".

BALLAST: Vessels must arrive with sufficient ballast to permit safe handling. All vessels should enter port with clean ballast water that may be pumped overboard while in the harbour, as it is prohibited to pump dirty ballast water or oil residue or sweepings into the harbour.

FRESH WATER: The water is of excellent quality. Available at most berths as mentioned above.

FUEL: Ship's bunkers are available in most ports of Suriname in limited quantities. Advice regarding quantities and specifications of oil should be given to Agent's representative immediately after docking. Suppliers are Shell, Esso and Texaco.

CONSULS:
Austria
Barbados
Belgium
Brazil
Canada
China
Colombia
Denmark
Dominican Republic
Ecuador
Finland
France
Germany
Guyana
Haiti
Indonesia
Italy
Japan
Korea
Mexico
Netherlands
Norway
Peru
Portugal
Spain
Sweden
U.K.
U.S.A.
Venezuela

Embassies:
Brazil
China
France
Guyana
India
Indonesia
Japan
Korea
Netherlands
Russia
U.S.A.
Venezuela

REPAIRS: No facilities for major ship repairs. Local workshops can do repairs of minor nature. There are 2 floating dry docks and 1 floating derrick owned and operated by the Suriname Drydock Co. Lifting capacities of dry docks: 400 – 650 tons.

SURVEYORS: Lloyd's Register, International Register of Shipping, Bureau Veritas and Germanischer Lloyd.

GANGWAY/DECK WATCHMEN: The Customs board the vessel while riding at anchor or alongside one of the docks. All vessels are required to make a proper gangway available to the Customs Boarding Officer.

The local authorities assign one or more Customs Guards to each vessel during its stay in port. The charges for guarding are for the account of the vessel. These Officials must be provided with meals on board at regular meal hours, and cabins if necessary.

CUSTOMS ALLOWANCES: 60 cigarettes or 15 cigars or 0.5 lb. of tobacco. One-fifth litre of spirits, one-third litre of wine, 2 litres of beer, for each crew member.

All remaining stores must be declared and placed under seal. If vessel remains in port over 72 hours Customs will allow an issue of stores.

CARGO GEAR: Load/discharge by ship's gear.

REPATRIATION: Under special circumstances vessels may sail without all crew members on board (sickness, etc.). The Master furnishes a letter to his Agent authorising him to accept responsibility for the missing seaman or seamen.

AIRPORT: Zanderij Airport, 46 km. from Paramaribo. Served by SLM, KLM, ALM, Cruzeiro and Guyana Airways.

TIME: Local time is GMT minus 3 hours. Vessels are required to use local time in ETA messages and when dealing with Agents.

HOLIDAYS: New Year's Day, Revolution Day (February 25th), Holi Phagwa* (March 10th), Good Friday, Easter Monday, Labour Day (May 1st), Freedom Day (July 1st), Id-Ul-Fitr*, Republic Day (November 25th), Christmas Day, Boxing Day. *These holidays depend on the moon.

EMERGENCY CO-ORDINATION: Harbour Office. Tel: 74575. Telex: 163 Havkan Sn.

BANK: Algemene Bank Nederland N.V., Kerkplen 1, Paramaribo. Tel: 71555. Telex: 122 Bancol Sn.

STORING: Can be arranged by Barge or Trucks, whilst loading or discharging, depending on berth, with Customs in attendance. Local labour available.

SHORE LEAVE: Under normal circumstances no restrictions are imposed by the Government Immigration Authorities on shore leave.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Surinamese Guilder (SFl).

GENERAL: While alongside vessels must maintain engines and propulsion machinery in readiness to leave the pier under full power on short notice. No repairs are permitted which should interfere with this requirement. While alongside, oil tankers should have their offshore anchor out about 50 ft.

All vessels except naval vessels, must furnish a statement, of the amount and character of explosives carried, also a certificate to show how they are stored and manner of packing.

Special anchorage areas are provided in the harbour for vessels with dangerous cargo.

All firearms and ammunition must be manifested on store lists and must remain in bond on board during vessel's entire stay in territorial waters of Suriname. Any violation of this regulation renders the vessel subject to fines and confiscation of firearms and ammunition.

SHIPMASTER'S REPORT: March 1990 (Updated 1992).
Shell Terminal at Suhoza: There appears to be more water than charted in river. Chart Datum was verbally quoted to me at 4.6 m. and inward we could have safely been deeper if more cargo was carried, provided vessel came up river with the high tide.

Depths at the berth were not as expected. We were advised there was 22 ft. at all times but vessel was aground at every low tide. This was not felt as vessel sat in soft mud without a list. Vessel lies alongside 2 dolphins with reasonable fendering, with the hose jetty also adequately fendered.

Mooring arrangements are adequate but it is longwinded getting ropes ashore as initially the headlines have to be passed over the fish jetty to a dolphin and then brought some considerable distance to river bank.

Breast lines were secured to a dolphin and same was well piled.

Stern lines have to be pulled ashore by lorry after boat gets them to bank which again makes a longwinded job, but once in berth, despite strong current, vessel sits comfortably.

Springs secured to dolphins as per normal.

The stern dolphin was not used as too near ship for useful mooring point. One must ensure fishing boats are out of the way before mooring, as once tied up they would be trapped inside their own jetty if on the inboard side.

Loading is all done by barges, one was reasonably fast, the other had a very slow loading rate. The barges are adequately manned and safety practices are correct. They have sufficient fenders to come alongside. It is suggested that 4 lengths of hose are used next time, as when we are light, the freeboard is nearly too much for 3 lengths, and if 4 lengths available it should be easier for barge to disconnect and us to hang-off hose until next barge comes, rather than disconnecting at ship every time, as this operation was very labour intensive. I enquired as to why we could not load at crude jetty and was advised that the depth of water there is only 14 ft.

Sailing should be done as soon as possible after low water. It was difficult pulling stern out of mud but if vessel does not get away promptly it is difficult to catch the tide at the bar. We actually crossed bar 1 hour after high water and had to increase river speed to make this deadline. Any later than this and it would be safer to anchor off New Amsterdam for next high water, which would be uneconomical. Steaming at full speed in river on 19 ft. draft even keel made us squat badly and steering was a problem. At times vessel was felt to slide through soft mud. Sounder was rather blurred when less than 1.0 m. under keel. There are no tugs in river so when coming on and off berth it is essential to use the tide. With a fish jetty close ahead and another jetty astern it is rather tight, but no problems.

AUTHORITY: The Ministry of Transport Communication and Tourism, P.O.Box 888, Paramaribo, Suriname. *Tel:* (597) 474575, 472845. *Telex:* 163 Havkan Sn. *FAX:* (597) 472940. *Contact:* E. Fitz-Jim, Director of Maritime Affairs.

AGENT: Alcoa Steamship Company, Inc., P.O.Box 1842. Paramaribo, Suriname. Tel: 77600, 73613. Telex: 113. Cables: Alcoaship Parbo. Steamship Agents/Stevedoring Operators.

PARANAM: 05.38 N. 55.05 W.

LOCATION: On left bank of the Suriname River about 64 km. from the light buoy (Fairway Buoy), consisting of bauxite mining, alumina refining and an aluminium smelter with facilities for shipping these commodities.

DOCUMENTS/PILOTAGE, and all General Information refer to "Paramaribo".

RESTRICTIONS: See "Berthing".

MAX. SIZE: Vessels up to 47,500 d.w.t. load to outer bar draft (approximately half load) and usually top off at Trinidad. Max. LOA 700 ft.

HEALTH: Health Officer does not board unless there are quarantinable diseases aboard.

TUGS: Available.

BERTHING: *General Dock:* Concrete pier of about 350 ft., moorings 660 ft. apart. Least depth 30 ft., max. air draft 42 ft., max. beam 80 ft. This dock used for loading bauxite or aluminium ingot and for discharging general cargo, oils, caustic and other raw materials,
Apron Unloading Dock: Used for unloading bauxite from Moengo and other country districts. Also used for unloading limestone.
Length 450 ft.
Max. air draft 30 ft.
Unloading rate 600 t.p.h.
Alumina Pier: Depth 25 ft., moorings 680 ft. apart. Used for loading alumina or discharging oils and caustic. Max. air draft 50 ft., max. clearing height 72 ft. Also see "Shipmaster's Report".
Loading Capacity: Bauxite General Dock: 900 t.p.h.
Alumina at Alumina Dock: 850 t.p.h. Loading by conveyor, spout trimmed (Telescopic chute).

CRANES: One gantry crane 55 tons capacity.

FRESH WATER: Can be supplied.

FUEL: Small quantities of light diesel No. 2 only in emergency.

REPAIRS: None can be effected.

AIRPORT: At Zanderij, 30 km. from dock.

GENERAL: The Outer Bar is the limiting factor for the port. Harbour Office at Paramaribo give Bar drafts for each tide.

The river silt is extremely soft and in consequence the river water is very dirty and although fresh (995 at the berths) the evaporators cannot be kept on line. There is also a great danger of blocking the cooling water system, especially when crossing the bars. Blackouts on both motor and steam ships are a common occurence. Care should be taken to ensure that cooling systems are as clear as possible before entering the river. High suctions must be used when passing over all bars in Suriname.

SHIPMASTER'S REPORT: October 1986 (Updated 1988).
Alumina Terminal: Lat. 05° 36.9' N., Long. 55° 05.2' W.
Local Time: GMT minus 3 hours.
Approaches: Low lying coastline. Vessels anchor about 5 miles North of light buoy (Fairway Buoy) in position Lat. 06° 05' N., Long. 55° 12.7' W. to await HW. Lighthouse at Lat. 05° 54' N., Long. 55° 12' W.
Pilotage: Compulsory. River Pilot boards 1 mile North, of light buoy (Fairway Buoy). Pilot boarding and HW to be confirmed by Paramaribo Port Control on VHF Channel 12 and Harbour Office on Channels 12 and 16.

Very shallow waters from Buoy No. 1 to Buoy No. 6 on either side, with variable currents. Buoyed channel up to Buoy No. D11 (30 miles from light buoy – Fairway Buoy). Draft restricted to 22 ft. with safe draft of 21 ft. in HW. Safe turning basin and anchorage 2 miles up river from Paranam. For down river transit, waiting anchorage for HW is off Paramaribo at Leonsburg in Lat. 05° 52.5' N., Long. 55° 05.5' W.
Berthing: By River Pilot. No tug for berthing. Alumina Pier length 207 m., alongside depth is 30 ft. Other berths at Paranam for discharge of general cargo and loading bauxite.
Loading: By conveyor-fed telescopic chute. Capacity 850 – 1,000 t.p.h. Can reach all holds. Cargo work 24 hours.
Density: About 995 – 996 alongside berth.
Fresh Water: Available at berth.
Bunkers: Not available.
Provisions: Limited quantity of some fresh vegetables and meats available at local Chinese 'supermarket'.
Shore Leave: No restrictions. Paranam Town is 1 mile from berth. Paramaribo City about 1 hour by car. Nearest airport at Zanderij International, 30 km. from Paranam.
Radio: PZN (Paramaribo Radio) provides reliable services.

AUTHORITY: District Commissioner officially acts as Harbour Master but vessel movements, pilotage, etc. handled by Paramaribo Harbour Master's Office.

WAGENINGEN: 05.46 N. 56.41 W.

PORT LIMITS: Laytime commences to count after vessel is made fast to wharf.
DOCUMENTS:
5 copies Cargo Manifest.
6 copies Crew List.
6 copies Passenger List.
2 copies Stores List.
2 copies Crew Declaration List.
PILOTAGE: Compulsory. Pilot boards at New Nickerie.
ANCHORAGES: None.
RESTRICTIONS: The minimum depth on the Bar is 2.1 m. in the mouth of the Nickerie River. Width of the river at Wageningen is 130 m.
MAX. SIZE: LOA 120 m., max. draft 5.0 m.
HEALTH: Upon arrival, a Quarantine Questionnaire is handed to the Master, which has to be filled immediately and returned to the Ministry of Public Health.
RADIO: Coast Radio Station "PZN" on 500 kHz, 2,182 kHz and VHF Channels 16 and 12 throughout 24 hours.
VHF: Harbour Master's Office on Channels 16 and 12.
RADAR: Not available.
TUGS: Not available.
BERTHING: Length of the quay 118 m. Least depth alongside 6.10 m. Maximum permissible draft at low water is 5.0 m. (See Bar draft – Restrictions).

Loading is by shore equipment.
CRANES: Not available.
BULK CARGO FACILITIES: Available.
BRIDGES: Crossing Nickerie River: At Groot Henar Passage, height of bridge when closed 5.0 m. at HWS. Bridge open 40 m. at HWS. Passage width 100 m.
STEVEDORES: Contact ship's Agent.
MEDICAL: Full hospital facilities at New Nickerie, about 50 km. from Wageningen.
TANKERS: No facilities.
DENSITY: 1016.
FRESH WATER: Available.
FUEL: Possible in the harbour at New Nickerie.
FIRE PRECAUTIONS: None.
CONSULS: At Paramaribo.
REPAIRS: Not available.
DRY DOCKS: Not available.

Contact: R. Hassankhan, Acting Harbour Master (Pilot).

NOTES

Please also advise Shipping Guides Ltd.

Sweden

GENERAL:

DEEP SEA PILOTAGE: See "Baltic Deep Sea Pilotage".

PILOTAGE: Helsingborg Pilot Station serves the ports of Hoganas, Helsingborg and Landskrona. Pilots for through-pilotage can be obtained. A 24 hour watch on VHF Channel 16 and/or telephone +4642110035 is maintained. Pilots can also be arranged through ship's local Agents. 5 hours notice is required.

Pilotage is compulsory for all ports for ships of certain gross tonnages and/or carrying certain cargoes. For passage through the Oresund, an IMO Recommendation has been issued recommending all laden tankers with a draft exceeding 7.0 m. and gas or chemical tankers to employ a pilot. Only licensed Swedish or Danish pilots are permitted to pilot vessels through the Oresund.

ICE-BREAKING SERVICE:

Location: Ice-breaking Directorate, Norrkoping.

Telephone: (011) 19 10 00 (0800 hrs. – 1640 hrs. local time).
(011) 12 29 60 (outside above hours).

Telex: 64416 Ice Serv S.

Cables: Civilmarin.

Procedure: Requests for ice-breaker assistance should be made well before vessel's arrival at the ice to the Directorate, locally (to most Swedish Harbour or Pilot Offices) or to an ice-breaker.

Vessels approaching ice-bound areas may be instructed, in daily Ice Reports issued by Coastal Radio Station (see ALRS Vol. 5), to report to the Directorate. Reports, which should be made well before arrival at the ice are to include the following details of the vessel:

1. Name.
2. Nationality.
3. Call sign.
4. Size.
5. Draft.
6. Engine power.
7. Year built.
8. Ice class.
9. Amount of cargo.
10. Destination.
11. ETA at ice-covered waters.

Vessels which have made a request or report and subsequently cancel or delay their voyage must inform the Directorate, a local office or an ice-breaker immediately.

Information Service: For details of Coastal Radio Stations which broadcast Ice Reports, including positions of ice-breakers, see ALRS Volume 5.

Ice-Breakers:

Call: Swedish ice-breakers with their call signs are:

Ymer	SPIA	Tor	SCYN
Frej	SBPT	Oden	SBXQ
Atle	SBPR	Thule	SCKD
Njord	SBPO	Ale	SBPQ

Frequency:	500 kHz	WT
	2182, 2140 kHz	RT
	Channels 16, 6	VHF

Procedure: Calls to ice-breakers may be booked through the nearest Coastal Radio Station. Vessels receiving assistance must maintain continuous listening watch on the channel specified by the ice-breaker.

GARBAGE/WASTE OIL DISPOSAL: In Sweden a "no-special-fee-system" applies to reception facilities in all ports, on condition that:

Advanced notice is given during normal working hours, at least 24 hours before delivery.

The delivery takes place during normal working hours.

The delivery takes place at the time which was agreed.

The ship's own pumps are capable of delivering liquids within a reasonable time.

If inadequacies are observed in the system they should be reported to National Swedish Maritime Administration, Ships Division, S-60178 Norrkoping. Tel: 46 11191334. Telex: 64380 shipadm s. Fax: 46 11101949.

In order to obtain further information about individual port facilities contact the relevant port authority.

SEAMAN'S CLUBS: Handelsflottung Kultur-och Fritidsrad (Swedish Government Seamen's Service) (HKF) is a government authority, attached to the Ministry of Transport. Its operations are financed by a fraction of the light dues, paid by vessels calling at Swedish ports.

HKF has its own representatives in Kobe, Antwerp, Rotterdam, Hamburg, Gothenburg, Helsingborg, Malmo, Norrkoping and Stockholm. In foreign ports, HKF co-operates intimately with Swedish Seamen's Missions and the Norwegian Government Seamen's Service, which serve the Swedish seafarers where HKF lacks representatives of its own. Important services include distribution of Swedish magazines and newspapers, movie and library exchange, sports, excursions and transportation.

HKF also provide a news service consisting of the news bulletin SAX-presset, compiled daily by the Swedish Central News Agency and forwarded by the Gothenburg Coast Radio Station. HKF publishes the quarterly Utkik ("Look-out") and an annual seamen's sports magazine and contributes sports information in the monthly merchant navy program of Radio Sweden International.

AHUS: 55.56 N. 14.19 E. (See Plan)

DOCUMENTS: See "Stockholm".

PILOTAGE: Pilots meet vessels at Pallagrund. Telegraphic address: "Pilotstation, Ahus". Tel: 044 – 247474. VHF Channel 16 call sign: "Pilot Station, Ahus." Awaiting Pilot, anchor outside Pallagrund. Depth 15 m. – 20 m. (Also see "Stockholm").

ANCHORAGES: Anchorage forbidden in dredged entrance channel.

RESTRICTIONS: No special regulations.

MAX. SIZE: Max. length 160 m., max. draft 7.7 m.

HEALTH: No special regulations.

RADIO: Stockholm Radio (SDI) also VHF, Channel 16 and working Channel.

Ahus Port Radio keeps watch, Monday to Friday 0800 to 1600 hrs. on VHF Channel 16. Working Channel 11, 12 and 13. At other times Ahus Pilot Station.

RADAR/VHF: Radar on Pilot Station. VHF call sign: Pilot Station, Ahus. Channel 16. Also see "Radio".

TUGS: 1 tug available with advance notice.

BERTHING: Depth alongside (at MW) as follows:

Berth	*Length* (m.)	*Depth* (m.)
Wine Quay	100	4.2
No. 1 – 4	270	5.8
No. 5 – 17	740	7.2
No. 18 – 26A	470	8.2
26B	15	4.2

Depth allowance 0.5 m.

CRANES: 7 shore cranes, capacity 5 tons – 29 tons. No cranes at Berths No. 1 – 4 or Wine Quay.

STEVEDORES: Ahus Harbour and Stevedoring Co. Tel: 044-289035. Working hours: Monday to Friday 0700 – 1600 hrs. Meal breaks 0845 – 0900 hrs. and 1200 – 1245 hrs.

FRESH WATER: Delivered from pipeline.

FUEL: Available day and night.

FIRE PRECAUTIONS: No special regulations.

CONSULS: Danish Vice-Consul: O.Boulevarden 52, S-29131 Kristianstad. Tel: 044-138000. Norwegian Vice-Consul: Uddevogen 3, S-29154 Kristianstad. Tel: 044-126350.

REPAIRS: Minor repairs only.

DRY DOCKS: No dry dock.

GANGWAY/DECK WATCHMEN: If wanted, watchmen available.

OPENING/CLOSING HATCHES: Normally by the crew.

CUSTOMS ALLOWANCES: See "Stockholm".

AIRPORT: Nearest airport about 10 miles away. 6 flights per day.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: See "Stockholm".

POLICE/AMBULANCE/FIRE: Police Tel: 242030; Ambulance Tel: 90000; Fire Tel: 90000.

TELEPHONES: None available.

IDENTIFICATION CARDS: Crew List needed. No cards.

GARBAGE DISPOSAL: Information available on request to Harbour Office.

WASTE OIL DISPOSAL: Information available on request to Harbour Office.

SEAMAN'S CLUBS: None.

CURRENCY: Swedish Kroner (SEK).

AUTHORITY: Ahus Harbour and Stevedoring Co., Krangatan 2, S-29632 Ahus, Sweden. *Tel:* 044-289035. *FAX:* 044-241128. *Contact:* Sten Lundell, Harbour Master.

BROFJORDEN: 58.21 N. 11.25 E. (See Plan)

LOCATION: Brofjorden Harbour is situated near Lysekil in position Lat. 58° 21' N., Long. 11° 25' E.

The harbour facilities are under the control of Scanraff. The berths are open for day and night navigation, allowing vessels to enter and leave at any hour, weather permitting.

PORT LIMITS: Between "Stretudden" (crude oil berth) and the island "Rixo" in Brofjorden.

DOCUMENTS: Documents required for entry and clearance:

Certificate of Registry, Certificate of Tonnage, Derat Exemption Certificate, 3 Crew Lists, 1 Crew Manifest, 1 Declaration of Bonded Stores. Free Pratique will be received via Customs on arrival berth. Oil Pollution Certificate.

PILOTAGE: Pilotage is compulsory. The pilots will act as both sea pilots and harbour pilots. Pilot station VHF Channel 16 around the clock. Channel 16 for calling only, thereafter changing to an agreed Channel. Call: Lysekils Pilots.

According to harbour regulations VLCCs are requested to give 72 hours' ETA, and if any changes 48 and 24 hours' ETA.

Product tankers are requested to give 48 and if any changes 24 hours' ETA.

Position where Pilot will Board:

VLCCs	Lat. 58° 13' 05" N., Long. 11° 09' 05" E.
Product tankers	Lat. 58° 15' 01" N., Long. 11° 13' 03" E.

Notification: All arriving ships not intending to use a pilot shall announce their arrival to "Lysekil Pilot" on VHF Channel 12 at the Brofjorden entance buoy.

Ships leaving the jetty and not intending to use a pilot shall contact "Lysekil Pilot" on VHF Channel 12 before departure for announcement and ask for information about ships coming in.

In case of incoming ships, the ship departing shall keep in contact until the ships have passed and are clear of each other.

ANCHORAGES:

VLCCs	East Scaw, Lat. 57° 42' N., Long. 10° 49' E.
	Water depth: 26 m.
	Holding ground: Sand, good.

Product Tanker Only (up to 60,000 d.w.t.):

Lat. 58° 20' 03" N.	Water depth: 28 m.
Long. 11° 21' 00" E.	Holding ground: Clay, good
Lat. 58° 19' 07" N.	Water depth: 26 m.
Long. 11° 23' 05" E.	Holding ground: Clay, good

RESTRICTIONS: *When Berthing VLCC:* Visibility minimum 4 miles, wind force max. 12 m./sec. and current max. 1 knot at the outer buoys (No. 1 and 2).

MAX. SIZE:

Crude Oil Jetty:

Deadweight:	50,000 – 500,000 tons.
Length overall:	No limit.
Beam restriction:	No limit.
Draft restriction:	25 m. (82 ft.)
Depth of water:	28.0 m. (92 ft.).

Product Jetty (Berths No. 2 and 3):

Deadweight:	50,000 tons.
Length overall:	230 m. (755 ft.).
Beam restriction:	No limit.
Draft restriction:	14.4 m. (47 ft.).
Depth of water:	16.0 m. (53 ft.).

Product Jetty (Berth No. 1):

Deadweight:	7,000 tons.
Length overall:	120 m. (394 ft.).
Beam restriction:	No limit.
Draft restriction:	8 m. (26 ft.).
Depth of water:	8.8 m. (29 ft.).

Product Jetty (LPG Berth No. 4):

Length overall:	100 m. (328 ft.).
Beam restriction:	No limit.
Draft restriction:	7.0 m.
Depth of water:	8.0 m.

HEALTH: No special papers required. Master informs by radio or on arrival.

RADIO: For ETA cables to Agent and Receivers call Gothenburg Radio.

Pre-Arrival Information: Before arrival, the Master shall, via his agent, inform Scanraff about items asked for in the pre-arrival telex that is sent to the vessel.

Notification Requirements: Notification shall, in addition to what is said in the pre-arrival telex, contain particulars of the vessel's Master and Crew List and the Master is required, if so requested by Scanraff, to supply such further particulars and produce such documents as may be necessary for the calculation of the dues payable in respect of the vessel and goods and for the use of loading and discharging facilities, etc.

The duties incumbent on the Master of the vessel may be fulfilled by his agent or other proxy.

VHF: VHF stations are installed at the Pilot Station, the pilot boat, the tug boats and at the Scanraff Harbour Office. Scanraff and Lysekil Pilot listen on Channel 16 day and night.

When mooring: the Pilot, Harbour Master, mooring boats and the mooring gangs carry portable VHF sets. Channel 69 is usually used.

RADAR: At the Pilot Station two radar sets are installed for watching the entrance.

TUGS: Use of tugs is compulsory for berthing/unberthing at the crude oil jetty and depending on the weather condition and type of vessel it can be compulsory even for berthing at product jetties.

One tug with bollard pull of approximately 40 tons is stationed in Brofjorden. Additional tugs are available. The tugs are equipped for fire fighting.

Only towing companies approved by Scanraff are entitled to assist vessels.

Mooring boats are available for handling of mooring lines.

For VLCCs: Tugs made fast after passage of Dynabrott and Brandskars Flak Lighthouses.

For Product Tankers: Tugs made fast when passing Bubacka Buoy (opposite crude oil berth).

BERTHING:

Instruments:	SAAB Doppler Radar and current meter at crude jetty.
Salinity:	18 – 34%
Current Velocity:	0.2 – 0.9 knots at entrance.
Nature of Bottom:	Clay.

The Crude and Product Jetties are equipped with quick release hooks. The coaster berth has usual type of bollards.

One Safety Tug-boat is always standing-by within the harbour area in case of emergency. When a crude carrier is alongside an additional Safety Tug-boat is standing by.

Berthing/Shifting: Berths are allocated by Scanraff. Should no berth be available, incoming vessels will be requested to anchor at an anchorage allocated by the Pilot Station.

The berthing operation will be supervised by Scanraff personnel.

It is the responsibility of the Master to inform themselves, through Scanraff or the Pilot Station, of the depth of water at their allotted berth, mooring and anchorage.

Before arrival at the quay all mooring ropes, heaving lines, stoppers, etc. required for mooring shall be ready for immediate use and also a sufficient number of men shall be available during the mooring operation.

All mooring points, except at Jetties No. 1 and No. 4, are equipped with quick release hooks for swift cast-off in case of danger. Operation of these hooks is only to be done by Scanraff personnel.

Vessels arriving at or leaving the harbour must be assisted by tugs if requested by Scanraff.

At the Crude Oil Jetty, the use of tugs is compulsory both at arrival and at departure from the jetty.

Only towing companies approved by Scanraff are entitled to assist vessels arriving at or departing the port.

Vessels approaching the port or at anchor shall communicate wit Scanraff or tugs by means of VHF radio.

When vessels are moored, anchored or moved, care must be take to ensure that no damage is caused to other vessels or to quays, jetties cables, pipelines or the like and that there is no interference with traffic

Vessels berthed alongside a quay may not be moored by means o their anchors, without the express permission of Scanraff. Scanraff have the right, due to traffic control or harbour discipline and safety so require to issue any necessary orders and instructions concerning the mooring anchoring, warping and movement of vessels and the Masters of vessels shall be required to comply with any order or instruction thus issued.

MEDICAL: Hospital available in Lysekil. No particular inoculations required.

TANKERS:

Crude Jetty:

Concrete jetty for tankers of 50,000 d.w.t. to 500,000 d.w.t.

Length of jetty-deck: 135 m.

Height of jetty-deck above MLW: 6 m.

Minimum distance between fenders: 96 m.

Height of gangway tower: 27 m.

3×16 in. marine arms for cargo handling.

1×12 in. marine arm for bunker supply (Only Bunker "C" available)

All 4 arms are equipped with hydraulic operated speed seal couplings designed for 150 lb-ASA flanges, minimum size 10 in.

Reach capability of arms: Max. 30 m., min. 4 m. above sea level Max. 11 m., minimum 3 m. from berthing line.

Fresh water can be supplied at a rate of 60 t.p.h.

1×4 in. sewer-line connection is located between manifolds on jetty-deck.

Shore-connected telephone will be placed on board. Telephone number 604 60. Area number 0523.

Telephone number to Scanraff switchboard 69000. Area number 0523

Mooring: Vessel is normally moored port side to jetty.

Approach velocity is continously measured by doppler radar and reported to ship's Master/Pilot during berthing operations on request.

Max. allowed approach speed is shown in "Plan Section".

Communication between jetty-pilot-tugs and mooring-boats by VHF.

Under normal weather conditions 6 tugs representing approximately 23,000 h.p. are used for berthing of VLCCs. Under unsteady weather conditions additional tugs can be ordered.

During hard weather conditions Scanraff can demand the use of two tugs during berthing/unberthing operations.

19 mooring lines are required for safe mooring. All lines to be provided by the ship.

Mooring lines to be arranged in accordance with "Plan" (See "Plan Section"), or as close to as possible.

Combination of synthetic, ropes and wires in the same direction shall be avoided.

All mooring wires shall have rope tail ends.

Self tensioning winches are not allowed.

All mooring lines will be put on quick release hooks of 150 tons SWL each.

4×10 in. mooring lines are available on jetty-deck for emergency use.

Safety Precautions: Vessel must be safely moored before gangway is placed on board and marine arms connected.

Correct setting of winch brakes to be checked regularly by ship's personnel.

Safety wires to be properly rigged fore and aft.

Cargo handling and/or bunkering will be stopped if wind velocity reaches 20 m./sec. (39 knots) for wind between N.W. – S.W. and during thunderstorms.

Whenever a crude carrier greater than 35,000 d.w.t. is moored at the Crude Jetty, 2 safety tugs are available in the Brofjorden Harbour. They can be alongside, ready for action within 15 minutes.

Safety tugs are standing-by and can be contacted on VHF Channel 12 or 16: "Lysekil Pilot" and ask for "Safety Tugs Brofjorden" or o telephone No. 0523-605 52.

Telephone will be placed on board.

Product Jetty: Potable water is available at all berths.

Bunker oil is available at Jetties No. 1 – 4 (at Jetty No. 4 only gaso available).

Cargo and ballast handling is to be carried out on hydraulically operated marine arms, except sulphur which is loaded through a flexible hose.

Dry garbage can be left ashore (free of charge) in containers placed between Berths No. 2 and 3 and beside the harbour building.

The Brofjorden Harbour and Lysekil's Pilot monitor VHF Channels 12 and 16 day and night.

Telephone can be ordered on board through the agent or the Loading Master.

Mooring: At wind velocities equal or higher than 15 m./sec. (on average use of tugs is compulsory during berthing as follows:

1. For ship equipped with bowthruster and over 15,000 d.w.t.
2. For ship without bowthruster and over 7,000 d.w.t.

Communications between ship and jetty during berthing operations b VHF.

Berths No. 2 and 3 are equipped with quick release hooks for mooring lines. Berths No. 1 and 4 are equipped with fixed bollards. All mooring lines to be provided by the ship.

During high wind conditions Scanraff can order use of tugs for mooring operations.

Safety Precautions: Self-tensioning winches may not be used i automatic mode. Correct setting of winch brakes to be checked regular by the ship's crew.

Ship's crew to be responsible for proper line tension at all times.

Safety wires to be properly rigged fore and aft.

If wind velocity reaches 25 m./sec. (48 knots) and durin thunderstorms, cargo and/or ballast operations can be stopped.

A safety tug is available in the Brofjorden Harbour day and night. Safet tug can be contacted on VHF Channel 12 or 16. Call "Lysekil Pilot" an ask for "Safety Tug Brofjorden", or Telephone No. 0523-605 5

LOADING: *Required Size of Manifold Flanges on Board Ships:*

Size (in.)	*Flange Rating*	*Service*	*Rate* (cu.m./hr.)

2	300 lbs. ANSI	Vapour return	
6	300 lbs. ANSI	Butane, Propane	200/175
2	300 lbs. ANSI	Vapour return	

All hard arms are hydraulically operated.

Note: All ships should, on arrival, be equipped with reducers suitable to actual loading arms.

FUEL: Bunker "C" only is available at Crude Oil Jetty, diesel oil is delivered to crude carriers by truck (through pipeline at gatehouse, so can be undertaken during discharging). Bunker "C" and diesel oil are available at Product Jetties and the Coaster Jetty.

FIRE PRECAUTIONS: A special Fire Instruction will be given on board on arrival.

POLLUTION: Oil pollution prevention. A special instruction will be given on board on arrival.

CONSULS: Denmark, Finland, Netherlands, Norway and Germany have consuls in Uddevalla, 40 km. from Scanraff.

REPAIRS: City Varvet Gotenborg. For hull and engine repairs, harbour and voyage service.

Andersson & Callenberg: For electrical installations.

Engine repairs must be reported to Port Captain for permission.

DRY DOCK: Gothenburg, capacity 250,000 tons.

SURVEYORS: Saybolt, Caleb Brett and other cargo inspectors are available.

Lloyd's Register, Det Norske Veritas and others surveyors are available.

GANGWAY/DECK WATCHMEN: The Crude Oil Jetty has gangway tower, but accommodation ladder is necessary at the Product Jetty.

Watchman is compulsory at the Crude Oil Jetty. At the Product Jetty watchman is available on request.

CUSTOMS ALLOWANCES: 1 bottle spirit and 200 cigarettes or 200 grams tobacco.

REPATRIATION: Changing of crew and any necessary repatriation is possible.

AIRPORT: Nearest airport is Gothenburg, 100 km. South of Lysekil.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

POLICE/AMBULANCE: Dial 90 000 and ask for necessary service.

EMERGENCY CO-ORDINATION CENTRE: Skandinaviska Raffinaderi AB Scanraff. Tel: 0523-60460, Fire and Safety Department.

TELEPHONES: Telephone on board is compulsory at the Crude Oil Jetty, and can be ordered on board at the Product Jetties through the agent or the Loading Master.

A coin-operated telephone is also available at the Product Jetty gate.

SERVICES: Compass adjusting is available. Local ship chandler available.

BANK: Skandinaviska Enskilda Banken, Postbox 22. 453 00 Lysekil. Tel: 0523-14020. Telex: 21020 (Gothenburg Office).

STORING: See "Prelims".

1. Vessel can be stored by barge.
2. Vessel can be stored by barge during loading/discharging operation if ship's crane abaft the funnel can be used. Storing amidships can be permitted but not during loading/discharging operation.
3. No trucks are allowed to handle stores. Minor storing can be done by means of wagon from the gate to the jetty and via the ship's gangway.
4. Fork lift trucks are not allowed to be used on the jetty to handle stores.
6. Local riggers are employed by the local ship's chandler to assist with storing.

SHORE LEAVE: Crew members are allowed ashore. No identification card or passes are needed.

GARBAGE DISPOSAL: On the jetties, containers are available for minor amounts of clean garbage.

WASTE OIL DISPOSAL: At Jetties 1 – 4, it is possible to pump engine room slops to shore tank. A container for oily waste is available on jetties.

SEAMAN'S CLUBS: Seamans Church in Uddevalla, Nonnens Vay 11, Uddevalla. Tel: 0522-35526.

CURRENCY: Swedish Kronor (SEK).

REGULATIONS:

Safety Towing Wires: Vessels, while secured alongside the jetty, must provide and rig towing wires with sufficient length and strength on the offshore bow and quarter, with eyes maintained just above water level, ready for emergency towing.

The wires must be securely fastened to the ship's bollards.

Inert Gas Systems: All vessels carrying crude oil, calling at the Brofjorden Harbour, must have a fully operational inert gas system. Prior to arrival, the vessel must confirm that all cargo tanks are fully inerted and have an oxygen content of 8% or less by volume.

Random samples can be taken, and provided these are found to have an oxygen content of no more than 8% by volume, the vessel will be permitted to commence operations.

If the random samples indicate an oxygen content in excess of 8% by volume, all cargo operations will be ceased, or permission to commence operations will not be given to the vessel and the oxygen content of all tanks will be checked, and operations will not be commenced until the required oxygen level has been achieved.

If such delays cause extra long lay time in port, Scanraff will have the right to charge the vessel for such extra long lay time, and Scanraff will not accept any demurrage costs for time caused by that the vessel's inert gas system does not comply with these regulations.

It is strictly forbidden to overpressure the tanks with inert gas so much that the safety valves open to atmosphere.

It is also strictly forbidden to ventilate inert gas to atmosphere from tanks or through by-passing safety valves.

Inspection: Scanraff's representative shall, at any time, have permission to enter the vessel to ensure that the Port Regulations are being complied with, and that cargo equipment is in good order. He/she shall also have the right to stop operations if the regulations are violated.

Ballast Water: Only clean ballast water contained in segregated ballast tanks will be permitted to be discharged into the waters at the Scanraff area. Random samples can be taken from segregated ballast tanks.

Contaminated ballast water, defined as such according to Swedish Law, will not be permitted to be pumped overboard, but will have to be pumped ashore to the terminal ballast tanks.

According to Swedish Law, ships which intend to discharge ballast water to shore installation must report to Scanraff, before deballasting starts, if the ballast water contains emulsifier or other chemical cleaning agents.

Ballast for entering the harbour should be carried in a minimum number of tanks, and all tanks stripped so as to minimise the time required to discharge ballast while alongside the pier.

The Harbour Regulations will be placed on board on arrival.

GENERAL: *Vacating Berth:* Scanraff have the right to request a vessel to vacate the Crude Berth when berth time for such vessel reaches 48 running hours, provided the retention of such vessel at its berth will, in Scanraff's judgement, hinder or delay the berthing of another vessel.

Running hours shall commence upon the vessel's arrival and completion of mooring and shall cease when the last rope is let go.

If commencement of unloading is delayed for any reason not caused by vessel or its Master or the unloading is prohibited and/or interrupted at the request of Scanraff or public authorities, running hours shall be extended by the period of such prohibition or interruption unless the reason therefore is due to circumstances for which the vessel or its Master are responsible.

AUTHORITY: Skandinaviska Raffinaderi AB, S-54381 Lysekil, Sweden. *Tel:* +46-523-669456. *FAX:* +46-523-669574. *Contact:* Mats Eggers, Harbour Master.

GAVLE: 60.41 N. 17.11 E. (See Plan)

PORT LIMITS: A line from Utvalnas (approx. 60° 45.2' N. 17° 21.4' E.) over Bakharen to Langharen (approx. 60° 41.0' N. 17° 17.5' E.).

DOCUMENTS:

2 Crew Lists (for European vessels).
2 Crew Lists (for other vessels).
2 Manifests.
2 Bills of Lading.
1 Tobacco List.
1 Stores List.

Following documents supplied by Agent and signed by Master:

On arrival from foreign port:
4 Reports of Arrival (Customs).
1 Declaration of Master (of persons on board).
1 Declaration of living animals (if any).

On arrival from any port:
1 Report of Arrival (Harbour Office).

On departure to foreign port:
4 Reports of Departure.
1 Declaration of Master (of persons on board).

PILOTAGE: *(a)* Sea Pilots: Pilot station: Bonan, Telephone Nos. 991 10 and 992 20. Telegraphic address: Pilotstation, Gavle. 5 hours advance notice of ETA Pilot Station. Notice of ETA can be given over any Swedish coastal radio station or free of charge on VHF over any Swedish Pilot Station or Grundkallen Lighthouse.

VHF: Channels 16: Calling and Safety Pilot station and
13: Pilotage traffic Pilot boats.

All pilot boats are orange. International signals for calling Pilot. Pilot boards: S.E. of Grasjalsbadan 60° 43' N., 17° 27' E., and on request South of Eggegrund Lighthouse, 60° 43' N., 17° 34' E. In case of bad weather closer to Pilot Station. Anchorages: Graberget roadstead N.E. of Bonan Lighthouse (approx. 60° 44.8' N. 17° 20.5' E.), about 350 m. from shore and 18 – 21 m. (10 – 13 fathoms) depth. Open to Easterly winds. *(b)* Harbour Pilots: Available for moving within harbour area on application to Port Administration, Telephone Nos. 17 88 61 or 17 88 62 or by VHF to Gavle Port Radio, Channels 16, 14 and 13.

ANCHORAGES: See "Pilotage". Outer roadstead situated inside of Northern entrance and in red sector of Fredriksskans Light. Outer roadstead well protected, depth of 15 – 11 metres (8 – 6 fathoms). Anchoring forbidden:

(a) In dredged channel between lights in Northern Channel and to a point 800 m. W.S.W. of Light No. 4.

(b) In white sector of Fredriksskans Light E.N.E. within a distance of 2,000 m. from same.

(c) In navigable channel from Fredriksskans Light to Gavle Dolphin Light.

(d) In Fredriksskans Harbour Basins and between Oil Berth No. 21 and the Terminal Granudden.

RESTRICTIONS: One fairway leads to harbour. Northern Fairway is 10.9 m. deep and has bottom width of 60 m. Day-time: Max. LOA 220 m. Max. breadth 28.0 m. Max. draft 10.4 m. or max. breadth 30 m. Max. draft 9.0 m. Night-time: max. draft 7.35 m.; max. length 172 m. All depths are referred to mean water level. Ships on way from outer roadstead shall give way to vessels proceeding towards outer roadstead. This shall not apply to vessels with tow unless vessel approaching also has tow.

MAX. SIZE: Max. permissible draft (at mean water) as follows:

Fredriksskans Harbour

	Max. Draft (m.)	(ft. in.)	*Real depth* (m.)	*Allowance* (m.)
Oil Berth No. 21	10.4	34 01	10.8	0.4
Max. length 220 m. (722 ft.)				
Oil Berth No. 1	7.35	24 01	7.7	0.35
Max. length 200 m. (656 ft.)				
Oil Berth No. 2 – 3	5.2	17 01	5.4	0.2
Berth No. 4 – 8	7.35	24 01	7.7	0.35
Berth No. 9 – 14	8.9	29 02	9.3	0.4
Karskar				
Berth No. 105 – 106	6.5	21 04	6.8	0.3
Length 195 m. (640 ft.)				
Berth No. 107 – 108	7.8	25 07	8.1	0.3
Length 196 m. (640 ft.)				
Berth No. 109	4.6	15 01	4.8	0.2
Length 90 m. (295 ft.)				
Berth No. 110, South end.	4.6	15 01	4.8	0.2
Length 35 m. (115 ft.)				
Berth No. 110, North end.	6.0	19 08	6.3	0.3
Length 75 m. (246 ft.)				

Terminal Granudden: See "Cargo Handling".

HEALTH: Pratique always automatic. If any suspected disease or fever on board, notify ship's Agent.

RADIO: Stockholm Radio (SDJ).

RADAR/VHF: No port radar service, but Bonan Pilot Station, Eggegrund Lighthouse, and three pilot cutters equipped with both radar and VHF and assist any ship approaching Pilot Station on request. After calling Pilot Station on VHF Channel 16, ships will be given assistance on Channel 13, 12, or 6.

Also see "Pilotage."

TUGS: Join vessel outside Fredriksskans Lighthouse or outside Karskar for berthing, and outside Northern entrance channel for passage through same.

CARGO HANDLING: Container berth, max. draft 8.9 m. Three cranes with 32 tons capacity which have container spreaders for 20 ft. and 40 ft. containers.

Roll-on/Roll-off berth, max. draft see "Terminal Granudden".

Terminal Granudden: A port terminal at Granudden which is situated opposite Fredriksskans Harbour. The terminal comprises 350 m. of quay with a Roll-on/Roll-off berth, having max. draft for vessels: 9.0 m. for length of 150 m. adjacent to Roll-on/Roll-off ramp and 10.4 m. for length of 200 m., 2 warehouses each having an area of 22,000 sq.m., as well as extensive storage space. The total terminal area is 150,000 sq.m. and it will have an annual maximum capacity of 1.2 million tons forest products. The terminal has very good connections with both main roads and the railway system.

STEVEDORES: 24 hours' notice (if possible) order arrange gangs.

MEDICAL: Notice of medical attention to Agent as early as possible. All kinds of medical and hospital facilities available. Vaccinations necessary on arrival from diseased area. (Common for all Swedish ports.)

TANKERS: *Tanker Berth No. 21:*

Max. length 220 m. (722 ft.). Max. draft (M.W.) 10.4 m. (34 ft. 2 in.).

Manifold connection size (all grades) 200 mm. (8 in.).

Berth to Depot pipeline size:

	mm.	in.
Heavy Fuel Oils	450	18
Gas Oil	400	16
Gasoline	350	14
Kerosene	250	10

Tanker Berth No. 1:

Max. length 200 m. (656 ft.). Max. draft (M.W.) 7.35 m. (24 ft. 2 in.).

Manifold connection size:

	mm.	in.
Fuel Oils	250	10
Gasoline	200	8
Kerosene	200	8

Berth to Depot pipeline sizes:

	mm.	in.
Fuel Oils	350	14
Gasoline	300	12
Kerosene	250	10

Tanker Quay K201:

Max. length 220 m. (722 ft.). Max. draft 10.4 m. (34 ft. 5 in.).

Owned by Karskar Energi AB.

DENSITY: Fresh water.

FRESH WATER: Delivered from water posts at all quays i Fredriksskans Harbour and Terminal Granudden. At Karskar, fresh wat delivered by road tanker.

FUEL: All kinds of fuel oils available either from pipelines at oil bert or by lorries at all other quays. Following viscosities (Redwood normally in stock: 35, 225, 650, 1500, and 3500 secs. Other viscositie can also be delivered. Notice of delivery is required day before.

CONSULS:

Denmark	Tel: 115190	Netherlands	Tel: 177400
Finland	Tel: 125900		

REPAIRS: Repairs can be carried out in all parts of harbour by Bryna Mekano.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Available, but not compulsory.

OPENING/CLOSING HATCHES: Can be done by either crew o stevedores. Only patent hatches have to be opened by crew.

CERTIFICATES:

Tonnage Certificate.

Derat Certificate (Not older than 6 months).

Certificate of Nationality (for Swedish ships only).

CUSTOMS ALLOWANCES: Tobacco: each crew member 20 cigarettes or 100 grammes of tobacco out of Bond.

Wine and spirit: Each crew member 1 bottle (75 centilitres) of spirit an moderate quantities of wine and beer out of bond. After a week i Sweden the same quantity may be taken out on request to Custom Office.

REPATRIATION: Crew changes and repatriation arranged by Agent.

AIRPORT: Stockholm Airport (Arlanda) 145 km. (90 miles) served b regular airlines. Rorberg airport 16 km. (10 miles). Regular traffic t Swedish airports.

TIME: GMT plus 1 hour in Winter. Summertime GMT plus 2 hours.

HOLIDAYS: New Year's Day (Jan. 1st); Twelfth Day (Jan. 6th); Good Friday; Easter Day; Easter Monday; First May (May 1st); Whit Sunda Whit Monday; Midsummer Day (Saturday nearest to June 24th All Saints' Day (first Saturday in Nov.); Christmas Day (Dec. 25th Boxing Day (Dec. 26th).

POLICE/AMBULANCE/FIRE: Police Tel: 655000; Ambulance Te 179830; Fire Tel: 179650. Emergency Tel: 90000.

SERVICES: Minor quantities of oil and other liquid residues can b discharged into tank lorries with special suction equipment.

IDENTIFICATION CARDS: Not needed.

GARBAGE DISPOSAL: A number of garbage containers are alway provided on the quay. No charge.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: Local club provides facilities which includ refreshments, newspapers, games, table tennis, sauna, musica instruments, radio, TV, billiards, swimming pool outside (Summertime telephone.

Recreation rooms open weekdays 1800 – 2200 hrs., Sundays an holidays 1700 – 2000 hrs. Tel: 026-120858. Closed Saturdays.

CURRENCY: Swedish Kronor (SEK).

No restrictions placed upon seafarers.

DELAYS: Normally no delays in berthing, loading, discharging o bunkering.

AUTHORITY: Gavle Hamn, Fredriksskans, S 80595 Gavle, Sweden *Tel:* (026) 178840/178861. *FAX:* (026) 140979. *Contact:* C. Westmar Port Director. Leif Aberg, Harbour Master.

GOTHENBURG: 57.42 N. 11.57 E. (See Plan

DOCUMENTS:

2 Cargo Declarations (IMO Model).
2 Crew Lists.
2 Passenger Lists.
2 Crew Declarations (must be signed by each crew member).
2 Stores Lists.
2 Arms and Ammunition Lists.
1 Health Document (if voyage exceeding 15 days).
Nationality Certificate.
Tonnage Certificate.
Derat Certificate.
Certificate of Insurance or other financial security in respect of c liability for oil pollution damage (if more than 2,000 tons of oil board).
Manifests, Bills of Lading.

Note: All certificates should be originals.

TRAFFIC CONTROL SYSTEM (VTS): The Port of Gothenburg controlled by a traffic control system. It is a vessel movement-con and information system managed from the Gothenburg Traffic Con Centre (TCC), call sign "Gothenburg Traffic". The system is based radar control and VHF communication. Vessels over 300 g.r.t. exceeding 50 m. length should report to the TCC on VHF Channel incoming when 6 miles off Vinga Island, out-going when leaving the be There are also certain way-points in the area (marked on the cha where vessels should report to the TCC. Vessels should keep continu watch on VHF Channel 13 within the whole traffic-control area. A "Wo VTS Guide" issued by IALA can be obtained from the Port Authority from ship's Agent. When 6 miles off Vinga Island, Master has to "Customs Gothenburg" on VHF Channel 16 (working on Channel and report contents of Bonded Stores.

ANCHORAGES: Large tankers may anchor 2 miles S.W. of Trubaduren Light in depths of 40 m. – 70 m. Other vessels can find good anchorages with soft bottom at Vinga Sand, in Danafjord and Rivofjord, outside the traffic routes. Anchoring in the fairway is prohibited.

PILOTAGE: Incoming vessels have to notify the Traffic Control Centre (TCC) call sign "Gothenburg Traffic" on VHF Channel 13 or by telephone 031-12 54 33 that they require a Pilot. Notification to be done 5 hours before ETA at the pilot grounds at Vinga Island, where the pilot boat will be at hand. The pilot grounds are marked on the charts. Approved pilot ladder (if rail is high, accommodation ladder), heaving line and a man standing by to receive Pilot (Also see "Stockholm").

RESTRICTIONS: No restrictions at any time of day and night. Tankers over 75,000 d.w.t. berth and unberth in daylight only.

MAX. SIZE: Torshamnen, water depth 19.6 m. Fully loaded tankers of 225,000 d.w.t. on draft of 18.9 m. received, 19.05 m. with special permission. Partly loaded tankers of max. 318,000 d.w.t. have been received. Skarvik Harbour, water depth 13 m. Tankers up to 50,000 d.w.t. Skandia Harbour, general cargo, container vessels, water depth up to 12 m. General cargo harbours: for other cargo and passenger vessels 10 m. Water depth at MLW. Tide of no importance.

HEALTH: Advise "Portsan Gothenburg" 4 hours before entry via the ship's Agent.

Before the vessel calls at any Swedish port, the Master of the vessel is required to give information covering the state of health on board the vessel to the Customs Authority:

(1) If the Master has reason to believe that there is any sickness aboard which requires quarantine;

(2) If the vessel comes from a port of call that has been declared infected with a quarantine illness and arrival at the Swedish port occurs during the incubation period;

(3) If anyone aboard the vessel has visited or been in contact with an infected area and arrival of vessel at Swedish port occurs before the incubation period for the sickness has expired.

RADIO: Goteborg Radio, call sign SAG.

ETA: Advise Port Authority of ETA 24 hours prior to arrival.

Also see "Pilotage".

VHF:

Gothenburg Pilot	Channel 69.
Gothenburg Traffic	Channel 13.
Gothenburg Customs	Channel 16.

TUGS: Tugs normally join vessel between the islands of Nya Alvsborg and Rya Nabbe. Tugs join at Dana Fiord for tankers bound for Torshamnen. According to Master's desire ship's or tug's lines can be used. 12 tugs available (235 h.p. – 4,000 h.p.).

CRANES: *Mobile Cranes:* 1×36 tons (reach outside quay 28 m.). 1×45 tons (reach outside quay 33 m.).
Floating Crane: 1×150 tons (reach 10 m.) or 30 tons at 22 m. If crane supported by pontoon it can lift 215 tons at 10 m.
Container Cranes: 2×70 tons (hook) or 40 tons under spreader. 1×60 tons (hook) or 40 tons under spreader. 1×50 tons (hook) or 32 tons under spreader. 2×45 tons (hook) or 32 tons under spreader.

BRIDGES: Alvsborgsbron (suspension bridge) in the Western part of the city (clearance 45 m.), Gotaalvbron (weighbridge) in the centre of the city (clearance 19.5 m.) and Marieholmsbron (railway swing bridge) in the Eastern part of the city (clearance 5.3 m). The bridges Gotaalvbron and Marieholmsbron keep continuous watch on VHF Channel 9. If no connection, contact "Gothenburg Traffic" on VHF Channel 13.

STEVEDORES: The Port of Gothenburg provides dock workers.

General Conditions for Assignment of Personnel (excluding external terminals):

Working time and guaranteed hours: (Port of Gothenburg A.B. supplement to the general terminal conditions of the Swedish Stevedoring Association).

1. *Skandia and Alvsborg Harbour:*

Normal Working Hours:

Daytime Shift I: Monday – Friday 0700 hrs. – 1600 hrs. Meal breaks: 0830 hrs. – 0900 hrs. and 1200 hrs. – 1230 hrs.

Daytime Shift II: Monday – Thursday 1600 hrs. – 2400 hrs., Friday 1600 hrs. – 2300 hrs. Meal breaks: 1930 hrs. – 2000 hrs.

Overtime: Please note that all overtime work is voluntary.

Weekdays 1630 hrs. – 0500 hrs., Saturday 0700 hrs. – 2200 hrs., Sunday/holiday 0700 hrs. – 2100 hrs.

Completion:

Monday – Friday 1630 hrs. – 0500 hrs., Saturday 0700 hrs. – 0500 hrs., Sunday/holiday 0700 hrs. – 2100 hrs.

2. *Normally no work will be performed on the following days:* New Year's Day, May 1st, Midsummer Eve (24th June 1988), Midsummer Day (25th June 1988), Christmas Day, New Year's Eve.

3. *Guaranteed Hours:* All "temporary" labour is guaranteed a minimum of 4 hours pay.

Overtime: (All personnel)

Monday-Friday	3 hours
Saturday	5 hours
Sunday/Public Holiday	6 hours

All hours ordered are to be paid for. Permanent employees are entitled to special compensation for work later than 2100 hrs. Monday – Friday.

4. *Deadlines for requesting labour and/or overtime:*

Weekdays latest 1000 hrs. on the day before operation is to commence. Cancellation latest 12 noon on the day before operation is to commence.

Overtime: Weekdays – latest 1000 hrs. on the same day.

Cancellation latest 1200 hrs. on the same day.

Saturday/Sunday – latest 1000 hrs. on preceding Thursday.

Cancellation latest 0900 hrs. on preceding Friday.

Public holidays – latest 1000 hrs. on the last but one normal working day before the Public holiday.

Cancellation latest 0900 hrs. on the last working day before the Public holiday.

5. The above regulations are not valid in case of "force majeure" such as strikes, lock-outs, natural catastrophies, or any other unforeseeable incidents of which the Port of Gothenburg A.B. has no control.

6. These regulations are valid until further notice. They can, however, be changed with immediate effect when/if some other agreement is made with labour unions.

CONTAINERS: The Skandia and Alvsborg Harbours for container handling with 20 berths and 12 ferry ramps. Also see "Berthing" and "Cranes".

TANKERS:

Torshamnen:

		Berth No. 801	*Berth No. 800*
Operator		Port of Gothenburg A.B.	
Users		OK, Shell and various	
Product		Crude Oil

at mean water	alongside	19.60 m.	19.60 m.
Under keel clearance	approaches	1.45 m.	1.45 m.
	alongside	0.55 m.	0.55 m.
Dimensions safely	length	350 m.	280 m.
acceptable (also see	beam	no restr.	no restr.
below)	draft	19.05 m.	15.85 m.
	d.w.t. (summer)	abt. 250,000	abt. 115,000
Water density		1013	1013
Nature of bottom		clay	clay
Boom arrangement		4×16 in.	2×12 in.
Manifold heights	maximum	22.00 m.	17.00 m.
	minimum	3.00 m.	1.50 m.
Public telephone number		031632446	031632445

Draft: That the above figure, 19.05 m., is given on the basis of mean water level and brackish water (density 1013). There is very little tide at Gothenburg, only about 20 cm. (8 in.). The draft is more affected by wind, Easterly winds blowing the water away from the coast, Westerly winds blowing the water towards the coast. In winter and early spring (January-May) there can be long periods of Easterly wind, when it would be prudent not to arrive on a deeper draft than 18.60 m./brackish water.

Lightering: In case of need lightering can be arranged 3 nautical miles S.W. of the Trubadur Lighthouse. This is in open sea and restricted to wind force less than 6 – 7 m./s.

For crude oil distribution to other refineries lightering can take place across the finger jetty from Berth No. 801 to Berth No. 800.

Gas lightering is being done via 8 in. acid proof steel pipeline across jetty. Flanges drilled to ASA 150 and 300. No hoses available, vessels have to provide same.

Moorings: Berth 801 – VLCCs: Owing to the somewhat exposed nature of berth Masters are advised, that when strong off-shore winds are forecast, to ballast the vessel, stop discharge if necessary and, maintain steam on the winches to supplement the brakes. It is strongly recommended that vessels over 210,000 s.d.w.t. make use of the extra mooring as described below.

Instructions for the use of extra mooring (E.M.):

1. Pass ashore a wire and a shackle and make fast to the eye of the E.M. on the caisson. Free the E.M. from its hook by means of the capstan on the caisson. Bring home the E.M. and belay it.
2. At departure. Before letting go the E.M. make fast a strong rope or a wire in the eye of the E.M. and take the other end to the caisson for hanging off the E.M. Let go the E.M. and, by means of the capstan, back to the caisson and place it on its hook, heave it.

Note: Maximum draft:

On lesser draft sizes up to 210 m. – 215 m. may be accepted but special approval from the Harbour Authorities needed on each occasion.

Report: *Restriction:* Entry to Gothenburg by large ships is not undertaken if visibility is less than 3 miles, or if the wind speed exceeds 15 m./sec. (about 30 knots.) Ships over 17.4 m. (57 ft.) draft do not enter during hours of darkness.

Ballast: Cannot be received ashore.

Dimensions: The harbour is prepared to accept vessels exceeding 335 m. length provided distance from bow to manifold is max. 180 m. and vessels' draft does not exceed 18.29 m. (60 ft.), brackish water. Special approval needed in each case.

Bunkers: Supplied by barge only.

Pilotage: Pilotage is compulsory and necessary. Pilots are stationed at TCC and are taken out by fast pilot boats to meet incoming ships based on ETA and VHF contacts. On Vinga Island there is a lookout manned by personnel from Gothenburg Station. The lookout listens continuously on VHF Channels 13-16 and maintains VHF watch on Channel 69 and 11A. Pilots are government controlled. Two Pilots are assigned to ships over 60,000 d.w.t..

Sea pilots go with the ship all the way to berth as there are no harbou pilots.

South of Vinga Island there are 3 anchorage areas named A, B, and C marked on the Swedish Chart No. 931.

In addition to those mentioned above there are anchorages in the Danafjorden and the Rivofjorden.

Torshamnen Berth: Approaches – Cautionary Advice: Care must be taken when turning from the channel to Torshamnen berth, particularly when the wind is from the West, not to turn too late as the ship can drif laterally and be carried on to Dynan Shoal (rock), or on to the end dolphi of the berth.

Berthing Procedure: All ships are berthed heading N.E., therefore, on the West berth (801) ships are starboard side to, and on the East bert (800), portside to.

Berthing should be as parallel as possible as the forward moorin dolphins are only 10 m. inside the breasting face line and the limits o the 19.6 m. (64.3 ft.) depth run close to the breasting faceline.

The first ropes ashore (by boat) are usually the forward spring and a head line. It is important the ship does not run too far ahead of positio as the limit of the 19.6 m. depth is only 200 m. from the centre of the berth. There is no approach velocity measuring device at these berths and no published maximum allowable impact velocity, but ships shoul endeavour to control their approach speed to less than 10 cm./sec.

See "Plan" for recommended mooring diagram for the Torshamne berth.

Svenska Statoil AB Terminal Ryahamnen: Berthing: Ocean going ships always berth heading upriver portside to. Moorings are taken ashore and to the buoys by power boat. Spring lines go to the jetty head, head breast lines to a buoy forward, stern/breast lines to a buoy aft with 1 or 2 breast lines to a mooring post on shore. It is important to give good lines for the after breast lines as N.W. winds can cause a problem. As the jetty between the end concrete dolphins is constructed entirely of wood, it is important that the large ships contact only the end dolphins during berthing operations.

The fendering of the end dolphins has low energy absorption qualities and, therefore, landing should be as light as possible.

The upriver dolphin is fendered with a solid wood facing, the downriver dolphin with truck tyres.

No shore moorings or shore gangways are provided at this terminal

DENSITY: Average density 1012. Tide of no importance.

FRESH WATER: Available from quay or water boat.

FUEL: All grades available at short notice.

CONSULS:

The following countries are represented in Gothenburg:

Austria
Bangladesh
Belgium
Bolivia
Brazil
Chile
Costa Rica
Denmark
Ecuador
Finland
France
Gabon
Germany
Great Britain
Greece
Guatemala
Honduras
Iceland
Ireland
Italy
Japan
Madagascar
Mexico
Morocco
Netherlands
Norway
Pakistan
Portugal
Senegal
South Africa
Switzerland
Togo
Turkey

REPAIRS: All kinds of repairs possible.

DRY DOCKS: 3 floating docks. Largest being 268 m. × 34.8 m. with a depth of 8.0 m. over the sill. There are 2×90 ton and 1×70 ton cranes available for ship repairs. Mobile cranes are also available.

GANGWAY/DECK WATCHMEN: Watchmen accepted by Harbour and Fire Authorities on tankers and vessels loaded with explosives. On other vessels not necessary.

OPENING/CLOSING HATCHES: By crew or stevedores.

CUSTOMS ALLOWANCES: Tobacco, per 10 days 200 cigarettes o 250 gram other tobaccos. Wine and/or Spirits, per 10 days 1 bottle o spirits and 1 litre of wine, alternatively 2 litres of wine.

Require report latest 24 hours prior to arrival via Port o Gothenburg Co.

CARGO GEAR: Certificates that equipment is approved.

REPATRIATION: Excellent communications by air or by rail.

AIRPORT: Distance of Landvetter Airport 20 km. – 30 km. dependin on where ship is berthed. Airport served by regular airlines.

HOLIDAYS: See "Stevedores".

POLICE/AMBULANCE/FIRE: Tel. 90 000, ask for "Polislarm" "Ambulans", or "Brandlarm".

TELEPHONES: At all quays ships can be connected to telephone.

GENERAL: Seaman's Institute, Amerikagatan 2, open weekdays 100 to 2130 hrs., Saturdays and Sundays 1400 – 2130 hrs.

SERVICES: Tank-cleaning equipment and facilities for discharge of tan washings in the Skarvik Harbour. Compass adjusting.

Communication Centre:
Gothenburg Traffic. Tel: 031-63 23 50, 63 21 55. Telex: 21547 Scanprt S. VHF Channel 13.

IDENTIFICATION CARDS: Not necessary. Crew List to be furnished in the oil harbours.

GARBAGE DISPOSAL: Old Harbours: Drums are available on jetties. For large quantities of garbage, telephone Oil Harbour Office (031-63 24 24), or via VHF Channel 12.

WASTE OIL DISPOSAL: Collection service of waste oil (sludge) is available, but has to be reported to the Port of Gothenburg AB, 24 hours in advance. Tel: +46 (031) 632155. Fax: +46 (031) 632301.
Capacity of barge – 100 cu.m.
Capacity of trucks – 11 cu.m. (10 trucks available).

Disposal of Waste Products: *Disposal of Residual Oil from the Engine Room:* Oil residues and sludge from the engine room, which are not allowed to be discharged at sea, is received, free of charge, outside the shipyards, by the Port of Gothenburg, provided:

1. The waste comes from normal duty of the machine, during the ship's journey between it's previous port and Gothenburg.
2. The quantity of residual oil is proportional to the ship's d.w.t.
3. The waste consists of water, petroleum hydrocarbons and the additives which normally are a part of residual fuel and lubricating oil, and which must be disposed of at a competent reception facility. Any substances from PCB, chlorine, organic solvents and detergents must not exist.
4. The Sea Traffic Department, Port of Gothenburg AB, has been informed at least 24 hours before the disposal of the residual oil is intended to be carried out.
5. The request provides information about quantity, viscosity, specification of oil residues, possible compounds of lubricating/fuel oil with/without solvents, emulsifiers, etc., as well as the hose connection required.
6. The ship's connection is available on deck and of an international standard.
7. The operating pressure in the line between the ship and the reception facility ashore does not exceed 0.6 MPa (6 kp/cu.m.).
8. The operating discharging rate is not less than 5 cu.m./hr.
9. The discharge of the residual oil is transferred to a competent reception facility (e.g. collected by vehicle or vessel), from 0730 hrs. – 1530 hrs. weekdays only.
10. The collecting vehicle's or vessel's waiting time does not exceed 15 minutes, including time for connecting of hoses.
11. The ship is providing a safety watch, who is supervising the operation, in order to prevent leakages.
12. The ship is providing personnel for connection and disconnection of the hose between the ship and the reception facility.
13. Oil residues in drums are put at specific, by the harbour authority designated area.
14. The drums are compact and leakproof without defects, and permanently labelled. The declaration of contents should be in both Swedish and English, together with the ship's name.
15. That smaller amounts of residues are disposed of in designated receptacles, when the possibility of disposal in drums, as described above, are not practicable.
16. The ship will be charged the additional costs, which may arise, if the above mentioned conditions are not complied with.

Safety Regulations concerning Disposal of Residues from the Engine Room:
Responsibility Areas:

1. It is the collecting vessel's or vehicle's responsibility to ensure, before the transfer is commenced, that the operation is supervised by a safety watchman who can, if necessary, order the operation to be stopped.

   The safety watchman of the collecting ship or vehicle could be either a crew member or the driver of the vehicle.
2. All personnel involved in the transfer operation are obliged, within their respective areas of responsibility, to take all necessary precautions, to prevent an oil spillage ashore or into the water.

Precautions before discharge of residues from the engine room is commenced:

(i) All scuppers, on board all vessels involved in the operation, must be plugged.
(ii) The vents of the cargo tanks, of the ship which is receiving the residual oil, must be appropriately fitted to avoid an overflow.
(iii) Information of maximum loading quantity in each tank and maximum operating pressure respectively, must be provided by the discharging ship's responsible officer, to the receiving ship or vehicle.
(iv) The hose for disposal of residual oil must be properly and securely connected on board the collecting ship's or vehicle's manifold, and be rigged in a way which prevents damage of the hose, from possible movements of the ship.
(v) Only approved hoses, which have been tested during the last twelve month period, may be used.
(vi) Checks of the operating valves setting is an obligation, to ensure filling of the right tank.
(vii) Efficient communication, preferably by radio, must be established between the vessel and vehicle involved in the operation. This communication must be maintained until the operation is finished and the hose has been disconnected.

During discharge of residual oil:

1. Hose connections must be continuously checked to detect possible leakage.
2. Supervision by a safety watchman is an obligation throughout the operation. The operation must immediately be stopped on his command.

After operation is finished:
The hose must be properly disconnected to avoid any spillage of oil. A drip tray must be used. Hoses which have no automatic shut-down valve must be blanked before being returned to the receiving ship or vehicle.

Actions in the event of a hose burst, overfill, or any other circumstances which may cause a spillage:
These actions must be taken in the event of a hose burst, overfill or other circumstances which have caused the spillage:
Stop all operations.
Close all valves in operation on all vessels or vehicles involved in the operation.
Call the Vessel Traffic Control Centre by VHF Channel 13 or telephone 031-632350.

AUTHORITY: Port of Gothenburg AB, S-40338 Gothenburg, Sweden. *Tel:* (031) 632000. *Telex:* 20957 Scanprt S. *FAX:* (031) 632301. *Contact:* G. Wennergren, President. Jorgen Wallroth, Harbour Master.

HALLSTAVIK: 60.03 N. 18.35 E. (See Plan)

DOCUMENTS: 2 Crew Lists; other documents see "Stockholm".
PILOTAGE: Svartklubben Pilot Station. VHF Channel 16 and others. Radar at station and in boats. 5 hours' notice prior to arrival. Tel: Hallstavik 0175/10006. Cable: "Pilotstation Hallstavik".
ANCHORAGES: Good and protected anchorage places available.
RESTRICTIONS: Tankers are navigated in daylight only. Max. air draft for all vessels 40 m.
MAX. SIZE: LOA 150 m., beam 25 m. and draft not to exceed 23 ft.
HEALTH: No special action except for suspected disease. In case of disease contact Agent for information.
RADIO: Stockholm Radio.
TUGS: Normally available.
STEVEDORES: Loading effected by factory. Ordinary working hours: 0630 – 1530, maximum 1 hour overtime. Saturdays no work.
MEDICAL: Medical attendance available day and night.
TANKERS: Max. draft 23 ft. Connection 6 in., pipe to quay-cisterns is about 1,000 m., discharging rate about 200 t.p.h.
DENSITY: Practically fresh water.
FRESH WATER: Available from quay; rate 2 t.p.h.
FUEL: Delivered by trucks from Stockholm.
CONSULS: At Stockholm, 100 km. away.
REPAIRS: Minor repairs only.
OPENING/CLOSING HATCHES: Ship's crew.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits.
CARGO GEAR: Loading by ship's gear or mobile crane.
AIRPORT: Stockholm Airport, Arlanda, 75 km. away.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: Easter; Whitsuntide; Midsummer; Christmas and New Year's Day.
POLICE/AMBULANCE/FIRE: Alarm Tel: 90000.
GARBAGE DISPOSAL: Facilities available free of charge.
WASTE OIL DISPOSAL: Facilities available free of charge, max. capacity 10 cu.m.
GENERAL: *Shippers:* Holmens Bruk AB. Export about 300,000 tons of newsreel/year. Import about 50,000 tons of fuel oil. 2 ordinary loading quays and 1 Roll-on/Roll-off berth available.
Agency: Erik Clemedson AB. Cables: "Clemed". Telex: 76213.
DEVELOPMENTS: See "Plan".
AUTHORITY: Holmen Paper AB, Hallsta Paper Mill, S-76381 Hallstavik, Sweden. *Tel:* 0175-26000. *Telex:* 76209. *Cables:* Holmen. *FAX:* 0175-26401. Agent 0175-23355. *Contact:* R. Sonderberg, Harbour Master.

HALMSTAD: 56.40 N. 12.52 E. (See Plan)

DOCUMENTS:
3 Crew Lists.
3 Passenger Lists.
3 Stores Lists (Tobacco and Stores).
5 Manifests.
2 Bills of Lading and Ship's Papers.

PILOTAGE: Advance notice of ETA 5 hours before arrival. Pilot station and pilot boat equipped with VHF Channels 16, 13, 6. Pilot boards at lightbuoy in Halmstad Road (L.Fl. 10 sec. 56° 37' N., 12° 47.5' E.) (Also see "Stockholm".)
ANCHORAGES: Good holding ground in 30 ft. – 40 ft. in roads 1 mile to 2 miles S.E. of breakwater.
MAX. SIZE: See "Berthing".
RADIO: Gothenburg Radio.
RADAR: Pilot station equipped with radar.
VHF: Port Authority on Channels 16, 13 and 9.
TUGS: Meet at Halmstad Road. Ship's lines used.

BERTHING:

Berth	*Length* (m.)	*Max. draft* (ft.)
Ostrakajen	300	30 ft.
Ostrakajen	230	27 ft.
Jarnverkskajen	220	27 ft. 6 in.
Importkajen	470	23 ft. 6 in.
Importkajen	270	22 ft.
Tullkammarkajen	400	18 ft.
Kattegattshamnen	285	27 ft. 6 in.
New Quay	135	24 ft. 7 in.
(Ro/Ro ramp ready October 1990)		
	Max. LOA (m.)	*Max. draft* (ft.)
Oceanhamnen – Inner Berth	200	32
Outer Berth	235	33

CRANES: 8 rail mounted cranes and 4 mobile cranes, capacity up to 100 tons.

SPECIAL CARGO HANDLING FACILITIES:
Roll-on/Roll-off: Kattegattshamnen: 2 fixed ramps. 43 m. and 23 m. wide. Max. draft 27 ft. 6 in.

Ostrakajen: 1 fixed ramp. 25 m. wide. Max. draft 27 ft.

Containers: Handled at Ostrakajen and Kattegattshamnen.

BULK HANDLING FACILITIES: A new harbour basin (Oceanhamnen) was opened in 1981. Alongside the berth ships with max. LOA 235 m. and max. draft 11.3 m. can be handled. A rail mounted bulk-unloader, screw type, can discharge bulk-cargoes at a capacity of 500 t.p.h. On the quay is a bulk-terminal operated by Nordic Bulk AB, Halmstad.

Bulk cargo can also be handled alongside the Importkajen and Jarnverkskajen with grab-equipped cranes. 1×200 t.p.h. unloader for limestone and dolomite. 1×100 t.p.h. pneumatic unloader for soda imports.

STEVEDORES: *Working Hours:* Monday – Friday 0700 – 1630 plus 3 hours' overtime. Saturday – Overtime 6 hours. Sundays – By special agreement.

MEDICAL: Hospital facilities available.

TANKERS: Max. draft at oil berth 30 ft. Max. LOA – 700 ft. Diameter of discharge lines 8 in. and 10 in.

DENSITY: Average 1005 (depending on wind).

FRESH WATER: Fresh water available from berth 35 t.p.h.

FUEL: Viscosities available: 1.2 englergrades/20°C. By arrangement with ship's Agent.

CONSULS: Danish, Finnish, German.

REPAIRS: Shipyard carries out ship repairs.

DRY DOCKS: 2 slips.

GANGWAY/DECK WATCHMEN: Not necessary. Available if required.

OPENING/CLOSING HATCHES: Normally carried out by crew, but if carried out by stevedores cost charged to vessel.

CERTIFICATES: Bill of Measure, Nationality Certificate and Derat Certificate.

CUSTOMS ALLOWANCES: Tobacco/spirits, 1 bottle spirits, 1 bottle wine and 200 cigarettes free on board. Quantity over will be closed under Customs seal. No other restrictions.

REPATRIATION: Facilities exist for changing crew and repatriation.

AIRPORT: Halmstad Airport, 1 mile from town centre, 2 flights per day for Stockholm.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: New Year's Day; Twelfth Day; Good Friday; Easter Day; Easter Monday; Ascension Day; Whit Sunday; Whit Monday; Mid-Summer Day; All Saints' Day; Christmas Day; Christmas Monday, Labour Day.

POLICE/AMBULANCE/FIRE: Tel. 90 000.

TELEPHONE: For placing a telephone on board cost is 130 SEK, and 59 SEK, a day for hire.

SHORE LEAVE: Crew members allowed ashore.

IDENTIFICATION CARDS: Only needed oil harbour.

GENERAL: *Charts:* BA 3671. Swedish 92 and 923.

AUTHORITY: Halmstad Hamn Och Stuveri AB, P.O. Box 1, 30102 Halmstad, Sweden. *Tel:* 46-35-155310. *Telex:* 38076 HSTUV. *FAX:* 46-35-140593. *Contact:* C. Olausson, Harbour Master.

HARGSHAMN: 60.10 N. 18.29 E. (See Plan)

LOCATION: The port is situated in the archipelago of Oregrund, about 130 km. North of Stockholm and about 110 km. South of Gefle. It is a natural and well sheltered harbour, suitable for vessels up to about 10,000 d.w.t.

DOCUMENTS: The Customs Officers require the following documents on arrival:

Tonnage Certificate (Certificate of Registry).
Certificate of Nationality.
Swedish Light Dues Receipt for current year.
Crew List, 2 copies.
Crew's Effects Declaration (spirits and tobacco only), 2 copies.
Ship's Stores Declaration (spirits and tobacco only), 2 copies.
If the international IMO Forms are not available, similar forms are accepted.

PILOTAGE: Pilot is compulsory for tankers over 1,200 g.r.t. and d cargo vessels over 1,600 g.r.t.

Pilot is available from 0300 hrs. – 2400 hrs. and is embarked o Svartklubben Lighthouse (Lat. 60° 09' N., Long. 18° 52' E.). Order fo Pilot has to be given 5 hours before needed and can be given via th Agent or direct to the Svartklubben Pilot Station, VHF Channel 16, Te Hallstavik 0175-10006, Cables: "Pilotstation Hallstavik".

Distance from sea off Svartklubben to Hargshamn is about 17 nautica miles. For vessels arriving from North, Pilot will board on request a Oregrund or North thereof.

MAX. SIZE:
Max. allowed draft 8.5 m. at MLW (density of water 1005).
Max. allowed length of vessel about 185 m.
Max. allowed breadth of vessel about 28 m.
Max. allowed draft at new quay for general cargo 7.3 m.

RADIO: ETA is to be given 48 hours and 24 hours in advance to th Agent. Tel: Osthammar 0173-20080 or cable: "Oreship Hargshamn".

VHF: Harbour Office on Channels 9, 11 and 16.

TUGS: A tug of 1,200 h.p. is available from Hallstavik, and is normal used to assist vessels over 9,000 d.w.t. on departure only.

BERTHING: *Ore Quay:* Length 90 m. Minimum depth alongside 11 m Berth equipped with a loading conveyor, capacity 800 t.p.h.

New Quay: Length 40 m. Minimum depth alongside 8 m.
Equipped with mobile cranes 50 tons and 160 tons.

Railway Ferry Berth: (Built 1989). One ramp for railway-wagons to lowe deck, max. load 395 tons. One ramp to upper deck for lorries, max. loa 75 tons. Minimum depth alongside 7.20 m.

STEVEDORES: *New Quay:* Ordinary Working Hours: Monday-Frida 0700 – 1600.

Stevedores: Hargshamn Terminal AB, S-740 73 Hargshamn. Te Osthammar 0173-20155.

FRESH WATER: Available.

SURVEYORS: From Stockholm (130 km. away).

CUSTOMS ALLOWANCES: 200 cigarettes per man and 1 bottle o spirits per Officer.

AIRPORT: Stockholm-Arlanda, 100 km.

EMERGENCY CO-ORDINATION CENTRE: Stockholm Radio.

GARBAGE DISPOSAL: Skips available alongside free of charge.

WASTE OIL DISPOSAL: Truck to be ordered via agent. Charge depend on quantity water/oil.

SEAMAN'S CLUBS: None.

CURRENCY: Swedish Kronor (SEK).

STORING: Can be effected with some minor difficulties.

GENERAL: *Ice:* The port can be kept open all Winter. Normally the is ice from last week of December until the last week of March/first wee of April. In port and entrance there is fast ice up to 40 cm. – 50 c thick.

Navigation is maintained in broken ice-channel.

Off the Pilot Station or in Aland Sea there is very seldom packed i or other difficulties during a normal Winter.

Charts: Swedish No. 536 (1:50000). B.A. No. 2335 (1:100000).

AUTHORITY: Hargs Hamn AB, Humlegardsgatan 5, S-114 Stockholm, Sweden. *Tel:* 08-6609310. *FAX:* 08-66018 *Contact:* Gunder Hurtigh, Port Director.

AGENT: Bjorsbo Shipping AB, S-740 73 Hargshamn. Tel: Ostham 0173-20080. Fax: Osthammar 0173-20120. Cables: "Oresh Hargshamn".

HARNOSAND (Hernosand): 62.38 N. 17.57 E. (See Pla

DOCUMENTS:
2 Crew Lists and/or 2 Passenger Lists (stating what tobacco, cigare or spirits each man has in their possession).
Derat Certificate.
Manifest and/or Bills of Lading.
Register, and if vessels have previously been in Sweden same y bills for light dues paid.

Certificates: See "Stockholm".

PILOTAGE: Applications for licensed Pilots should be made at le 5 hours before arrival. When making application, specify name of ves tonnage, draft and destination. Also give estimated time for taking P on board and route. If this procedure not followed, the Maritime Ser cannot guarantee to supply a Pilot without considerable delay to ves

Preferable to make application by telephone or by radio via a coa station or by some other method direct to Pilot Station. Also possib request Pilot by VHF.

Pilot station at Spikarna/Sundsvall for Northbound vessels Skagsudde/Ornskoldsvik for Southbound vessels.

ANCHORAGES: In port approaches in depth of 15 m. to 40 m.

RESTRICTIONS: During Winter assistance given by State Ice-brea

MAX. SIZE: Up to 32 ft. 5 in. draft. Also see "Tankers".

HEALTH: Vessels arriving from ports outside Europe must, for In Clearance, provide Customs Officer with written declaration of free from infection. Further instructions will be issued by Customs Office such a declaration cannot be given.

RADIO: Cable Agents to give ETA, draft and cash require Stockholm Radio SDJ.

TUGS: Tug assistance is available.

BERTHING:

Berth No.	*Length* (m.)	*Depth* (m.)
1	51	8.00
2	67	8.00
3	51	8.00
4	85	5.70
5	85	5.70
6	50	7.40
7	80	8.00
8	50	8.00
9	62	10.50

CRANES: 2 rail-mounted cranes of 10 tons and 12 tons capacity. Mobile cranes up to 100 tons capacity are available.
TANKERS: *Municipal Oil Pier:* Max. LOA 200 m. Max. draft 10.0 m. Depth alongside 10.5 m. Max. d.w.t. 45,000. Vessels berth either side alongside. Tugs available but not required. Offshore anchor used.
DENSITY: Nearly fresh water.
FRESH WATER: Available from the quays.
FUEL: Can be supplied.
REPAIRS: Most repairs possible.
DRY DOCK: At Gustavsvik.
GANGWAY/DECK WATCHMEN: Gangway watchmen available.
OPENING/CLOSING HATCHES: Normally done by crew.
CUSTOMS ALLOWANCES: 200 cigarettes and 75 centilitres spirits per man/week. Extra granted on request.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: New Year's Day; Epiphany; Good Friday; Easter Monday; Labour Day; Ascension Day; Whit Monday; Midsummer Day; All Saints' Day; Christmas Day; Second Christmas Day.

Work ceases at 1130 hrs. on the following eves of holidays and is voluntary and paid with 100 per cent overtime: Easter Eve; Whitsun Eve; Midsummer's Eve; Christmas Eve and New Year's Eve.
POLICE/AMBULANCE/FIRE: Telephone numbers: Accidents, Police, 90000; Fire: ask for alarm 90000.
IDENTIFICATION CARDS: Not necessary.
GARBAGE DISPOSAL: Container placed alongside free of charge.
WASTE OIL DISPOSAL: Facilitated by tanker trucks of 9 cu.m. capacity. Contact Port Authority for details.
SEAMAN'S CLUBS: None.
AUTHORITY: Harnosands Hamn, S-87180 Harnosand, Sweden. *Tel:* (0611) 28270, 28271. *Telex:* 71020. *Cables:* Hernoport. *FAX:* (0611) 28269. *E-Mail:* port.of.harnosand@com.itv.se *Contact:* Lars Wikstroem, Port Manager.

HELSINGBORG: 56.03 N. 12.41 E.

(See Plan)

DOCUMENTS: See "Stockholm".
APPROACHES: The harbour basins are very easy to approach. The deep water outside breakwaters – varying from 10 m. to 30 m. (33 ft. – 98.5 ft.) – adjacent to the sailing route in the Sound facilitates port calls. Normally comparatively large ships can proceed directly to the quays without tug assistance.
PILOTAGE: Call Pilot on VHF Channel 16 (Tel: 042-210035, Mobile No. 0708-252901). Pilots will board and disembark at the roads or at "N:1" Light Buoy in traffic separation scheme "in the Sound" from an orange coloured Pilot boat. Pilots can also be obtained at the Oresund North Light Buoy (Lat. 56° 12' N., Long. 12° 30' E.) (5 hours notice) or off Kullen Light (12 hours advance notice). Helsingborg Pilots are also Seapilot for the Sound, Kattegatt, Baltic and North Sea (See "General – Pilotage" before first port).

Anchorages: It is not recommended to anchor outside Helsingborg due to the heavy ferry traffic.

Good anchorage is found at Raa Roads, about 0.5 nautical miles S.W. from Raa Lighthouse (3 nautical miles South from Helsingborg).

Pilots: 24-hour service. Channels 16 and 80 (VHF relay station on Kullen Lighthouse).
ANCHORAGES: See "Pilotage".
MAX. SIZE: Permissible length about 220 m.; breadth unlimited; draft 7.0 m.–11.7 m. on MW, depending on which berth the vessel is bound for. No tides but certain variations following prevailing current and winds. *Tankers:* Max. draft 10.5 m.
HEALTH: Pratique automatic for all vessels arriving from non-infected ports. In cases where Pratique should be obtained, notice to be given through ship's Agent. Further directions given by Pilot.
RADIO: For communication – Stockholm Radio.
VHF: 24 hour watch on Channel 16. Call sign "Helsingborg Harbour", working Channels 11 and 12. Ships to contact the harbour 1 hour before arrival and 1 to 0.5 hours before departure.
Pilots: Channel 16, working Channel 80.
Tugboats: Working Channels 16 and 69.
VTS Centre: Channel 11.
TUGS: 2 tugs available, up to 44 tons bollard pull. Tugs join vessel outside entrances.
BERTHING: See "Tables" overleaf on Page 2024.
CRANES: 22 cranes, including 2 container cranes (42 tons and 45 tons) and 2 multi-purpose cranes (30 tons each).
BULK CARGO FACILITIES: 2 berths of 215 m. length for grain and fertilisers, max. draft 9.9 m. Loading capacity 700 tonnes per hour. Storage 250,000 tonnes.
SPECIALISED CARGO HANDLING FACILITIES: Complete container terminal West Harbour with 670 m. berths and 3 Ro/Ro berths, max. draft 11.7 m. There are a total of 10 Ro/Ro berths in the port. All types of handling equipment. Liquid chemicals handled at the tanker terminal.
STEVEDORES: Cargo handling performed by Helsingborgs Hamn AB offering all kinds of harbour work including loading, discharging, warehousing, etc.
MEDICAL: For attention, application to be made through ship's Agent. Hospital facilities available.
TANKERS: Dimensions of pipelines – for oils, 14 in., 12 in., 8 in., petrol, 12 in., 10 in., 6 in., slops, 6 in. Discharge facilities for slops through pipelines from Berths No. 504 and 505. Tankers berth at Quays No. 503 and 504 with depth of water alongside 11.0 m. MW, and Quay No. 505 depth of water alongside 8.0 m. MW.
DENSITY: 1007. No tides, but slight variations in accordance with prevailing currents and winds.
FRESH WATER: Available from quay connections (Tel: 042-122049).
FUEL: Bunker fuel delivered from pipelines or by tank lorry. Advance notice required. Any grade available.
FIRE PRECAUTIONS: Standard procedures apply.
CONSULS:

REPAIRS: All kinds of deck and engine repairs can be carried out.
DRY DOCKS: Length of largest dry dock 112 m. Depth on sill about 16 ft.
SURVEYORS: Lloyd's Register local agent: Tel: 201315. Fax: 201471.
GANGWAY/DECK WATCHMEN: Watchmen generally at Master's option.
OPENING/CLOSING HATCHES: By crew or stevedores.
CERTIFICATES:
Certificate of Nationality.
Bill of Measurements.
Crew Declaration.
Bond Declaration (Spirits, cigarettes, tobacco, etc.)
Derat Certificate.
Crew List.
CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes or equivalent quantities for each person on board. Wine and/or Spirit, one bottle each member to be held out of bond.
CARGO GEAR: Usual Board of Trade Regulations valid.
REPATRIATION: Repatriation possible, by air and by train.
AIRPORT: Kastrup 60 km., Sturup 70 km., Angelholm 30 km. Heliport within the port.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: Official holidays 1st and 6th January, 1st May, 1st Saturday November, 25th and 26th December, plus 2 holidays for Easter, 1 holiday for Whitsun and 1 holiday for Midsummer on appropriate dates.
POLICE/AMBULANCE/FIRE: Police 14 40 40 or in an emergency situation all services via tel. 9 00 00.
TELEPHONES: Quay-connected telephones are placed on board on request.
SERVICES: Tank cleaning, discharge of tank washings, compass adjustments, etc., can be carried out after application through local Agents.
Environment Protection: For oil protection, cleaning, sludge-suction, refuse collection etc., call VTS Centre Tel. 106300. Night service Tel. 10 63 22.
Receiving Station for Waste Oil: By law, water pollution from ships is prohibited. Sludge is accepted (free of charge) through Helsingborgs Hamn AB or through vessel's local Agent.
Provisions: Provisions are supplied by ship-chandlers 24 hours daily.
Repair/Maintenance: Repair and maintenance of containers, flats, trailers, trucks and other cargo handling equipment is carried out. Consult local Agent.

Testing according to CSC provisions (Convention for Safe Containers).

For ship repair call Fartygsmekano AB. Tel: 042-12 02 95. Fax: 042-18 09 16.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not needed.
GARBAGE DISPOSAL: *Dustbins for Ships:* Dustbins are available. Galley refuse is to be delivered in plastic bags.
WASTE OIL DISPOSAL: Available. Tel: 10 63 22. Also see "Services".
SEAMAN'S CLUBS: Located at Drottninggatan 46. Tel: 11 50 84. Hours: 1300 – 2000, 1700 – 2000 (Sunday).
REGULATIONS: Normal regulations apply.
DELAYS: No other delays than berths being occupied by working vessels can be expected.
AUTHORITY: Helsingborgs Hamn AB, P. O. Box 821, Oceangatan 3, S-25108 Helsingborg, Sweden. *Tel:* 042-10 63 00. *Telex:* 72215. *FAX:* 042-13 54 83. *Contact:* Per-Olof Jansson, General Manager.

HOGANAS: 56.12 N. 12.33 E. (See Plan)

Privately-owned port serving owning company only – Hoganas AB. Customs and pilotage arranged through Authorities in Helsingborg (12 nautical miles S.E. of Hoganas).

DOCUMENTS: See "Stockholm".

PILOTAGE: Compulsory. Pilot will board and disembark at the Oresund North Light Buoy (Lat. 56° 12' N., Long. 12° 30' E.). Pilot service day and night, available after request to pilot office at Helsingborg.

Also see "General – Pilotage" before first port.

RESTRICTIONS: Entrance Channel, Length 750 m.; width 65 m.; depth 8.20 m.

The harbour is seldom closed by ice.

MAX. SIZE: LOA 130 m., max. draft 7.40 m. The Pilots have berthed vessels with a draft in excess of 7.40 m.

TUGS: There are no tugs stationed at Hoganas, but tugs are available after request to the Harbour Office at Helsingborg.

BERTHING: *The Pier (Extending South-Westerly).*

Length of quayage:	380.00 m.
Depth alongside:	
For 120 m. (from outer end)	6.60 m.
For the next 160 m.	8.20 m.
For remaining 100 m. varies down to	4.00 m.
The Cross Quay:	
Depth alongside at 75 m. from Northern end	3.50 m.
the remainder is unnavigable	
Quay in the Middle of the Harbour:	
Length of quay:	180.00 m.
Depth alongside N.W. side:	
For 120 m. (from outer end)	6.60 m.
For the next 35 m. the depth varies from to being unnavigable.	4.2 m.
Depth alongside S.E. side:	
For 30 m. (from outer end)	2.50 m.
remainder is unnavigable	

The depth of water at this port is somewhat affected by winds.

CRANES: 1×25 ton rail mounted electric crane (21 tons-grab duty), 1×25 ton mobile crane.

STEVEDORES: Working hours; a normal working day, Monday to Friday from 0700 to 1600 hrs. Normally no working on Saturdays.

FRESH WATER: Available.

FUEL: Can be supplied.

REPAIRS: Machine shop repairs only.

GARBAGE DISPOSAL: One container on the quay for garbage disposal from vessels.

WASTE OIL DISPOSAL: Collection is available with tank truck up to 8 cu.m. in ordinary working hours without any charges.

Notice for collection must be given 48 hours before vessel's arrival.

SEAMAN'S CLUBS: Nearest Seaman's Club at Helsingborg, 20 km. South of Hoganas.

CURRENCY: Swedish Kroner (SEK).

AUTHORITY: Hoganas Hamnbyggnads AB., Box 39, S-26383 Hoganas, Sweden. *Tel:* (Harbour) (46) 042-338224. *Telex:* 72368 Hbmet S. *FAX:* (46) 042-341130. *Cables:* Clayworks Hoganas. *Contact:* Bo Norberg, General Manager. Leif Andersson, Harbour Master.

HORNEFORS: 63.37 N. 19.54 E. (See Plan)

PULP AND PAPER MILL IS CLOSED AND PARTLY DISMANTLED. NO OPERATION TAKING PLACE AT PRESENT. IT IS ONLY POSSIBLE TO CALL AT THE PORT DURING DAYLIGHT.

DOCUMENTS:

1 List of Bonded Stores.
2 Tobacco Lists.
3 Crew Lists.
3 Passenger Lists.

Health documents, none – if all on board healthy. In case of illness on board, this must be reported to Customs on arrival.

Copy B/L and copy Manifest.

PILOTAGE: Pilot station, Bredskar Tel: 090-45021; Pilot must be ordered 5 hours before arrival. If change in position, this must be advised at least 2 hours before arrival. Pilot can also be taken at Skagsudde Pilot Station Tel: 0660/66003. (Also see "Stockholm").

ANCHORAGES: Will be advised by Pilots.

RESTRICTIONS: Daylight entry only possible.

MAX. SIZE: Max. length 105 m. – 110 m. Max. draft 5.8 m.

RADIO: Harnosand Radio, Tel: 0611-12733.

TUGS: Available. Tugs to be ordered in advance.

BERTHING: No particular arrival times necessary.

CRANES: None available.

STEVEDORES: Labour must be ordered latest 1430 hrs. day before commencement loading, and if such day is Monday labour to be ordered before 1100 hrs. Saturday.

MEDICAL: No special regulations. Hospital and doctors available day and night.

FRESH WATER: By pipe, 2 t.p.h.

FUEL: No fuel available in port. Must be ordered from Holmsund.

CONSULS: None.

REPAIRS: No facilities available.

GANGWAY/DECK WATCHMEN: Not compulsory, but can be arranged.

OPENING/CLOSING HATCHES: Normally done by ship's crew.

CERTIFICATES:

Lighthouse dues (receipts).
Oil Record Book.
Derat Exemption Certificate.
Nationality Certificate.
Ship's Register (International form).
For open/closed ships – Freeboard Certificate.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes man/week or 250 grams of tobacco man/week. Wines/Spirits, 1 bottle of wine and 1 bottle of spirits man/week. Note: Must be 21 years of age before crew member is allowed to have spirits or wines.

REPATRIATION: No facilities for crew changes.

AIRPORT: 25 km. from port. Served by Linjeflyg, domestic services flights to Stockholm 6 times a day.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: Christmas Eve; Christmas Day; Second day after Christmas; New Year's Eve; New Year's Day; Easter Friday; Saturday and Sunday; Midsummer Eve and Midsummer Day; Whitsunday; Epiphany (1st May); Ascension Day; The Day of All Saints (1st weekend November).

POLICE/AMBULANCE/FIRE: Tel. 90 000.

TELEPHONES: None available for placing on board.

IDENTIFICATION CARDS: Not necessary.

AUTHORITY: Hornefors Foretagscentrum AB, 91020 Hornefors, Sweden. *Tel:* 0930-20900. *FAX:* 0930-20958.

HUDIKSVALL (including Iggesund): 61.44 N. 17.07 E. (See Plan)

PORT LIMITS: Vessel is considered to be an "arrived vessel" when berthed alongside quays in port or, if berths not available, at anchor in Inner Roads, outside berths; but not when vessels, owing to darkness etc., are anchored outside Pilot Stations or in Outer Fairways.

DOCUMENTS: If arriving direct from foreign port, following documents presented to Customs Officer who embarks during office hours (0800 – 1700 hrs.):

3 Crew Lists, 2 Tobacco Lists, Derat Certificate (not over 6 months old), Certificate of Nationality, Certificate of Tonnage, 2 Manifests covering incoming cargo.

Receipts of Light Dues, paid to Swedish Authorities during year.

PILOTAGE: Gavleborg Pilots will undertake pilotage. Call "Gavleborg Pilots" on VHF Channels 16/13 to arrange rendezous.

ANCHORAGES: Anchorage places for vessels awaiting Pilot or anchoring owing to weather conditions: 61° 37.5' N., 17° 25.0' E.; 61° 37.0' N., 17° 22.0' E.; 61° 37.7' N., 17° 21.3' E. depending upon prevailing winds, etc. Bottom mud and/or sand. Depth 10 m. – 30 m.

RESTRICTIONS: No tidal water at Hudiksvall. Tankers of more than 100 m. in length between perpendiculars not allowed entry during darkness because of narrow channel with some bends. Dry cargo vessels up to 150 m. length allowed entry after dark.

MAX. SIZE: *Tankers:* Daylight 45,000 d.w.t., length 210 m., draft 9.8 m. After dark 6,000 d.w.t. length 100 m., draft 7.5 m.

Other Vessels: 16,000 d.w.t., length 160 m., draft 8.7 m.

LW between 0.2 m. – 0.5 m. sometimes as much as 0.7 m. below MWL, may occur often. LW periods may occur when N.W. winds blowing over Northern Sweden.

HEALTH: Pratique automatic. No doctor visits incoming vessels if not specially ordered for treatment on board, etc.

RADIO: Vessels coming from South and having not yet passed the Stockholm area are recommended to call Stockholm Radio – VHF Channels 25 or 28 for vessels between Gotland/Sweden, 24 outside Stockholm South, 28 Stockholm East and North, 23 North of Aalands Sea, and in Gavle Bay. Hernosand Radio SAH: Channels 25 Hudiksvall area, 24 Sundsvall area, 23 Hernosand area, 28 Ornskoldsvik area. Hudiksvall harbour office: Channel 16. Working Channel 9.

TUGS: Tug compulsory for tankers over 6,000 d.w.t. and for other vessels over 8,000 d.w.t. in fairway. Vessels met near isle of "Enbarsskar" at Lat. 61° 39.5' N., Long. 17° 17.0' E. For mooring purposes tug compulsory for tankers over 6,000 d.w.t. and for other vessels exceeding 5,000 d.w.t. Ship's lines used. Ice-breaking tug "Mercur", call sign SIJL, 3,000 h.p. available in Hudiksvall during the whole year.

BERTHING: Main berth Hudiksvall draft allowed at MW 8.6 m. alongside 165 m., thereafter 5.4 m. alongside 30 m. and thereafter 4.8 m. alongside 160 m. One Ro–Ro ramp draft allowed 8.6 m. at MW.

Pier at Iggesund 7.3 m. draft allowed MW 150 m. length of pier. Ro-Ro berth 17.4 m. draft if more than 12 m. from Ro-Ro berth, if less, draft allowed 6.2 m. Ro-Ro berth II 7.3 m. draft allowed if more than 12 m. from berth, if less, 6.6 m.

STEVEDORES: Ordered 1600 hrs. on day preceding vessel's arrival. For loading starting Monday morning, gangs to be ordered before 1100 hrs. local time Saturday. 3 – 5 gangs available at Hudiksvall and Iggesund. Working hours: Monday-Friday, 0700 – 1600 hrs.; Meal hours: 0900 – 0930, 1230 – 1300. 2 hours' overtime at extra cost of 50% Monday, Tuesday, Thursday, Friday (1600 – 1800 hrs.). For completing vessel, further 3 hours Monday, Tuesday, Thursday, Friday (1800 – 2100 hrs.). Extra cost of 100%. For completing vessel 5 hours' overtime can be obtained on Wednesday (1600 – 2100 hrs.), 2 hours at 50% and 3 hours at 100% extra.

On Saturdays no normal work, but stevedores available for maximum 8 hours' work, 100 per cent overtime has to be paid, and minimum 5 hours has to be paid even if vessel working less than 5 hours on Saturdays.

TANKERS: One berth only. Depth alongside 10.9 m. Draft allowed 9.8 m. at MW. Pipe diameter for fuel: 10 in. light oils: 8 in. Connecting hoses between pipes and vessel: 8 in. diameter, both types. Shore tanks lie about 100 m. – 200 m. from berth, 5 m. – 8 m. above sea. Surface of jetty about 2 m. above sea level.
DENSITY: Average 1002 – 1001.
FRESH WATER: Fresh water available all berths. Delivery capacity about 15 t.p.h. – 20 t.p.h. During Winter it is difficult to arrange hoses, vessels assist with own hoses.
FUEL: Available all berths. Delivered by tank-lorries from Sundsvall 50 miles North of Hudiksvall. 24 hours' notice required.
FIRE PRECAUTIONS: No special precautions. Within bounded area oil jetty smoking prohibited. Also on new quay outside sawmill.
CONSULS:

TELEPHONES: No telephones available for connecting onboard at Iggesund. At Hudiksvall telephones available. Skr 25 per day plus cost of calls.
IDENTIFICATION CARDS: Not needed. If crew going to doctor or to hospital preferable he carries passport.
SERVICES: No tank cleaning or discharge of tank washings.
PORT REGULATIONS: Speed limit: maximum 5 knots within the harbour basin. Plastic pipe is laid out on the bottom around the oil berth, anchoring during berthing is prohibited. Pipe filled with compressed air after vessel's mooring, comes up to the surface forming ring around vessel and oil jetty as protection against oil leakage.
DELAYS: During Winter (December-April) delays on berthing/sailing owing to ice in fairways and alongside quays. Mooring delays will occur owing to ice between vessel and quay.
GENERAL: Hudiksvall port is very near town. Railway station, bus station, etc., very near port. Oil port about 700 m. from town.
The port of Stocka is closed to commercial vessels.
AUTHORITY: Hudiksvalls Hamnstyrelse, Tullhuset, 82400 Hudiksvall, Sweden. *Tel:* 0650/19166. *FAX:* 0650/17140. *Contact:* Arne Strandell, Harbour Master.

HUSUM: 63.20 N. 19.09 E. (See Plan)

PILOTAGE: Contact local Agent: Grundberg Shipping AB, Tel: 0660-10235. Clearing Tel: 0660-82805, 82806.
MAX. SIZE: Max. draft 10.6 m.
TUGS: Available.
BERTHING: No special requirements other than authority from local Agent.

In the South part of the harbour basin there is a new concrete berth; namely the raw material berth.

(i) The South part of the wharf is 180 m. long with 11.4 m. depth.

Loading: Pulp and paper by mobile cranes. Turpentine and resin-oil via 6 in. – 8 in. pipe-connections. Capacity 200 t.p.h.

Discharging: Raw oil via 12 in. and sodium hydrate via 6 in. – 8 in. pipe-connections. Unloading of limestone, china clay, sodium sulphate, sulphur, aluminium sulphate, softwood and hardwood by mobile cranes.

(ii) The North part of raw material berth is 65 m. long, 10 m. depth, with a solid Ro-Ro berth 16 m. wide. There are connections available for loading/unloading fluid products.

To the North of the raw material berth there is the loading berth, 300 m long and approximately 10 m. depth for loading pulp and paper usin mobile cranes. Connected to the loading berth is a solid Ro-Ro ber with a ramp, length 30 m.

There are warehouses with a total storage capacity of 15,000 sq.m.

(iii) Barge quay with length 90 m. and width 40 m. for vessels up t 120 m. LOA for discharge of timber.
STEVEDORES: Stevedores can be ordered from representative of loca Agent. Labour must be ordered prior to 1400 hours to start following da or for a second shift. Labour for the same day at 1000 hours must b ordered at 0800 hours, labour for 1200 hours ordered at 0930 hours an labour to start at 1400 hours ordered prior to 1100 hours.
FRESH WATER: Available through hose pipes.
FUEL: All grades and viscosities available through bunker suppliers.
AIRPORT: Approximately 15 minutes by car, served by regular airlines
TIME: GMT plus 1 hour. Summertime kept April to October.
POLICE/AMBULANCE/FIRE: All services available.
TELEPHONES: Available on wharf.
SERVICES: Post, telefax and telex facilities. Various other services available or can be provided.
GENERAL:
Tides: Water level in metres above (+) and below (–) average wate level.

High water level	+1.0 m.
Normal high water level	+0.7 m.
Normal low water level	–0.6 m.
Low water level	–1.1 m.

Local Travel: Buses from Husum to Ornskoldsvik (25 km.). Railwa station at Ornskoldsvik.
AUTHORITY: Mo och Domsjo AB, Harbour Department, Husum Mill, S 89035 Husum, Sweden. *Tel:* 0663-18416. *Telex:* 6058 Massa/Pulp o 6070 Papper/Paper. *FAX:* 0663-18310. *Cables:* Modo AB, Husum Mil *Contact:* Ake Jonsson, Traffic Manager.

KALMAR: 56.40 N. 16.22 E. (See Pla

DOCUMENTS: See "Stockholm".
PILOTAGE: Compulsory for vessels exceeding 70 m. LOA or bea 14 m. or draft 4.5 m. and all vessels with dangerous cargo. Pilot ma be ordered on VHF, Channel 16 or by telephoning 0480/1071 Approaching from North, Pilot boards at Skaggenas or Krongrundet, fro the South at Tradgardsgrundet. Round-the-clock service provided. (Als see "Stockholm").
ANCHORAGES: Good anchorage available outside port.
MAX. SIZE: Largest vessel 25,000 tons deadweight, LOA 560 (approx.), draft 24 ft. Channel and harbour depth 26 ft.
TUGS: Available, order by Tel. 56200.
RADIO: Stockholm Radio.
VHF: Harbour Master on VHF Channel 16.
BERTHING:

Quay	*Berth No.*	*Length (m.)*	*Depth (m.)*

KARLSBORGSVERKEN (Kalix District): 65.48 N. 23.17 E.

PILOTAGE: Pilot station at Lulea.
MAX. SIZE: Max. draft entrance to Karlsborgsverken 6 m., to Axelsvik 8.8 m. Size no limit.
TUGS: Tugs must be ordered from Lulea.
BERTHING:

	Max. draft. (m.)	*Length of quay* (m.)
Cellulose Quay	6.0	145
Timber Quay	6.0	250
Axelsvik Oil Harbour	8.8	60
Tore (17 nautical miles) N.W. Karlsborgsverken	6.0	170

The Cellulose Quay and the Axelsvik Oil Harbour are private quays, owned by ASSI, Karlsborgsverken. The Timber Quay is owned by Kalix Kommune.
CRANES: No land cranes. Mobile cranes to hire for loading/discharging.
STEVEDORES: Available, No particular ETA advice required except as normally sent by Master to the Agent.
MEDICAL: Hospital and dental services available.
TANKERS: Axelsvik (Oil Harbour) 4 miles East. See "Berthing".
FRESH WATER: Available at all berths except at Axelsvik Oil Harbour.
CONSULS: None.
REPAIRS: Workshop available for minor repairs.
OPENING/CLOSING HATCHES: Usually carried out by the vessel's crew.
AIRPORT: Lulea 85 km. from Karlsborgsverken.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Telephone 90000 in emergency and ask for service required.
TELEPHONES: Available at quays.
SHORE LEAVE: Allowed.

AGENT: Grundberg Shipping AB, P.O.Box 716, S-941 28 Pitea, Sweden. Tel: 0911 46070. Telex: 68307 Shipexp S. Fax: 0911 46175. Cables: Grundbergs Pitea.
All communications to be via Pitea.

KARLSHAMN: 56.10 N. 14.52 E. **(See Plan)**

DOCUMENTS:
3 Crew Lists (IMO Forms).
3 Passenger Lists.
2 Tobacco Lists.
2 Stores Lists.
1 Manifest.
1 Bill of Lading.
PILOTAGE: Vessels approaching port call Karlshamn Pilot Station 5 hours in advance on VHF Channel 16. Pilot boat orange coloured. Lights and sound signals as international regulations. Pilot boat always located 2 nautical miles South from Ortholmen Pilot Station, this point marked on charts. Location of anchorage in same area where Pilot taken. (Also see "Stockholm").
ANCHORAGES: Depths of water in anchorage area approximately 20 m. – 25 m.
MAX. SIZE: Max. draft: Tankers at Kolo Oil Harbour and Oxhaga Oil Harbour require 0.5 m. underkeel clearance if fitted with double bottom, and 1.0 m. if not. For remaining harbours within the port area minimum 0.5 m. underkeel clearance required.
Max. length of vessels at Kolo Oil Harbour 260 m., at Oxhaga Oil Harbour 230 m., at Sutudden Oil Harbour 190 m., and at Stilleryd Harbour 220 m. No tide.
HEALTH: If infectious disease on board Master must immediately send information to Agent.
RADIO: Karlskrona Radio.
RADAR/VHF: The Pilot Station is fitted with radar and VHF.
TUGS: 2 tugs available, 3,000 h.p. and 2,000 h.p. Join vessels about 1 nautical mile outside harbour boundary. Tugs lines always used. Vessels of 10,000 d.w.t. and over require a minimum of one tug.
BERTHING:
Inner Harbour: West Harbour Area.

Berth	*Length* (m.)	*Depth* (m.)
Ocean Quay	150	9.0
Soja Quay	250	8.0
West Quay	400	7.5 – 6.0

These quays are served by 2 grain elevators.
Via the West Harbour area oil seed plants, copra and vegetable oils for the Karlshamn Oil Factory (AKO) are shipped as well as other bulk goods.
East Harbour Area.

Berth	*Length* (m.)	*Depth* (m.)
East Pier	160	7.5
East Quay	350	6.0

The East Pier is equipped with 2×6.7 tons rail-bound unit goods cranes. Adjacent to the East Pier are 2 stores with a total floor area of 7,000 sq.m.
Loading and discharging is carried out with mobile cranes at the East Quay. The Harbour has 3 mobile cranes with lifting capacities ranging from 4 tons to 23 tons.
Goods shipped via the East Harbour area include timber products, timber, bulk goods and general cargo.

Sterno Harbour:
A special harbour for stone products, wood and timber. Depth is 6 m.
Stone blocks are loaded at a special quay and crushed stone products, chiefly diabase which is used for producing mineral wool, are discharged from quay by a stone-crushing plant. The crushing plant is owned by NCC.
Stilleryd Harbour:
The harbour consists of a 400 m. long quay with water depths of 8 m. and 11 m. on the West side, and one 190 m. long quay on the East side with 8 m. water depth. 2×35 ton and 1×20 ton luffing cranes are used for loading and discharging vessels and they are backed up by mobile cranes. Double railway tracks serve the quay.
The harbour also has Ro-Ro facilities with depths 8.0 m. – 11.0 m. Stilleryd Harbour accommodates vessels of up to 40,000 d.w.t. The harbour area features 6 warehouses with a total storage area of 32,000 sq.m. Adjacent to the quay area is a stockyard of approximately 200,000 sq.m., of which 50,000 sq.m. is asphalted.
Sodra Skogsagarna ship products like paper pulp, paper, wood chips, pulpwood, etc. via the Stilleryd Harbour. Fernstroms Granitindustrier ship stone blocks while Vikingtra AB ship wood and timber via this harbour.
MEDICAL: Hospital facilities available.
TANKERS: Different lines used. From 12 in. to 6 in. depending on cargo to load/discharge. 3 different loading/discharging berths available. 1 at Inner Harbour, 1 at Kolo Harbour and 1 at Oxhaga.
Kolo Oil Harbour:
Position Lat. 56° 09' N., Long. 14° 43' E. Pilot boards by Laknallarna, position Lat. 56° 07' 8" N., Long. 14° 53' E. Max. LOA 260 m., max. draft 13.5 m. 75,000 d.w.t. or 100,000 d.w.t. with part load. Depth at berth and approaches 14.00 m. A minimum of 2 tugs are generally used.
The pipeline is 20 in., length 400 m. and hose connection 12 in. Max. rate, 1,500 cu.m./hour (HFO). There are no ballast facilities and no clean ballast can be discharged into harbour. Vessels are allowed to clean tanks and gas free in the roads only.
Fresh water available at 20 t.p.h. by pipeline.
Old Oil Harbour:
Situated at Sutudden where a large number of major oil corporations and manufacturing companies have their depots. Heavy and light fuel oils, diesel oil, petrol and paraffin are imported and stored here. Storage capacity amounts to approximately 180,000 cu.m. of which half consists of underground storage facilities.
The oil quay has a depth of 11.0 m. and can accommodate fully-laden tankers of up to 30,000 d.w.t. with draft 10.50 m.
Oxhaga Oil Harbour:
The oil harbour is situated at Munkahusviken where the water depth at the quay is 13 m. Underground storage facilities with a total capacity of 400,000 cu.m. – 200,000 cu.m. for heavy oil and 200,000 cu.m. for light oil – have been constructed. Storage has been leased to manufacturing companies, municipalities and oil companies.
There is an LPG underground storage of 50,000 cu.m. within the harbour. LPG tankers discharge at the oil pier.
Oxhaga Nabb's oil harbour is used by fully laden tankers of 50 – 55,000 d.w.t. Depth of water 13 m., max. draft 12.5m.
An above ground storage area for petroleum, oil and chemicals is planned for the oil harbour areas. Surveys have shown that it is possible to build additional underground storage facilities for petroleum products in the Oxhaga area.
DENSITY: 1006.
FRESH WATER: Fresh water available and delivered by hoses.
FUEL: All grades available.
CONSULS:
Denmark, Tel: 16000.
Netherlands, Tel: 19760
Finland, Tel: (0454) 15420.
Norway, Tel: (0454) 15385
REPAIRS: Small deck and engine repairs can be effected.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Watchmen only necessary when tankers discharge petroleum products.
OPENING/CLOSING HATCHES: By crew.
CERTIFICATES: Certificates of Tonnage, Derat Certificate.
CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes per man/week. Wine and/or Spirits, 1 bottle per man/week.
REPATRIATION: Facilities for repatriation of crew possible.
AIRPORT: Distance from airport 30 km. 10 flights per day.
HOLIDAYS: January 1st and 6th; Easter; May 1st, 15th, 26th; June 21st; December 25th, 26th. Work can be arranged during holidays.
POLICE/AMBULANCE/FIRE: Tel. 90 000.
TELEPHONES: Telephones on board arranged at cost of 235 Sw. Kr.
IDENTIFICATION CARDS: Not needed.
GARBAGE DISPOSAL: Port Authority provides garbage disposal in containers alongside.
WASTE OIL DISPOSAL: Waste oil from ship's engine rooms received free of charge (under conditions stipulated in "Harbour Tariffs and Regulations") into tank ashore, max. 500 cu.m. or by tanker trucks. Located at Sutudden Oil Harbour. Tel: 46-454-81500. Fax: 46-454-13590. Telex: 4501 Hamnen S. Weekdays 0700 – 1600 hrs.

AIRPORT: Regular domestic airlines. Several flights per day to and fro Stockholm and Gothenburg.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Telephone number 90 000.
SERVICES: Tank-cleaning equipment and facilities for discharge of tan washings available.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not necessary for shore leave.
REGULATIONS: Ship's propulsion machinery may not be used whe ship is berthed.
DELAYS: Normally not to be expected.
AUTHORITY: Vanerhamn AB, Stuvargatan 1, 65221 Karlstad, Swede *Tel:* 054-144860. *FAX:* 054-213316. *Contact:* Hans Erwald, Managin Director.

KLINTEHAMN: 57.23 N. 18.11 E. (See Pla

The Harbour Quay is 340 m. long and depth 5 m. Depth on entranc 5.5 m. The most unfavourable winds are South — West. The harbo is however to be considered as good and safe.

Most products are loaded/discharged with mobile cranes.

Documents needed are Nationality Certificate, Bill of Measuremen Passenger List, Crew List, Derat Certificate, Ship's and Cre Declaration.

Pilot Station at Visby. Pilots have VHF on Channel 16.

Bunkers and water can be obtained.

AUTHORITY: Gotlands Kommun, Gatukontoret, Hamnavdelninge Farjeleden 2, 62181 Visby, Sweden. *Tel:* 0498-269475. *FAX:* 049 269065. *Contact:* Harbour Master.

KOPING: 59.30 N. 16.01 E. (See Pla

DOCUMENTS: See "Stockholm".
PILOTAGE: Via Sodertalje: Pilots obtainable for inward bound vess from Landsort to Sodertalje and from Sodertalje to Koping; for outw bound vessels from Koping and Sodertalje. Via Stockholm: Pi obtainable for inward bound vessels from Simpnas, Furusu Sandhamn, Dalaro and Landsort to Stockholm and from Stockholm Koping; for outward bound vessels from Koping and Stockholm. (A see "Stockholm"). Harbour pilotage obtainable but not compulsory harbour area. Assistance of a boatman is compulsory for arriv vessels. For information Tel: (8) 550-30467.

Distances: Landsort – Sodertalje (nautical miles), 34; Sodertalje Koping, (nautical miles), 69; Landsort – Dalaro, (nautical miles), 3 Dalaro – Stockholm, (nautical miles), 46; Sandhamn – Stockho (nautical miles), 36; Stockholm – Koping, (nautical miles), 78; Vaste – Koping, (nautical miles), 27; Harbour Pilotage, (nautical miles), 2
ANCHORAGES: At the "Broken" light buoy, clay bottom.
RESTRICTIONS: Ice is prevalent in Lake Malaren and the inlet from Baltic from January to March, but the entrance channel is kept o during Winter season.
MAX. SIZE: The Pilot Station on Lake Malaren, Tel: 0755/30467, give information on the max. admissible sizes of vessels. In general following applies:

Max. Admissible	*Via Sodertalje*	*Via Stockholm*
Length	124 m.	110 m.
Breadth	17 m.–18 m.	15 m.
Draft	6.5 m.–6.8 m.	5.65 m.
Height of masts above water level	35 m.	26 m.

The figures stated for the draft are subject to variation accordi the water level. The entrance fairway to the port has been dredge a depth 7.6 m., the width of the bottom being 60 m.
VHF: Work frequency Channel 14. Call Koping Port Radio, Channe
TUGS: Available day/night.

BERTHING: *Deep-Water Harbour:* (built 1932, large extension 1936-64) has 152 m. of quayage with a depth of 6.2 m. and 377 m. with a depth of 7.3 m. alongside, and is equipped with 4×7 ton level-luffing jib cranes, 2 of them having a maximum lifting capacity of 10 tons each at 18 m. radius; 1×33 ton and 1×36 ton "multi-purpose" crane.

There is also an 80 m. quay, depth 6.2 m. – without cranes – where loading/unloading by vessel's own winches can be undertaken.

Mobile cranes also available.

The quays are rail-connected and equipped with connections for supplying electricity, telephones and fresh water.

There are about 10,000 sq.m. of concrete stockyards within reach of the cranes, and outside this area and at a short distance from the cranes, a space of about 40,000 sq.m. is available for storage of goods. There are also about 22,000 sq.m. of sheds of different types in connection to the quays.

The cranes are well equipped with lifting devices such as grabs of different types etc. Conveyor belts of varying length, fork trucks, trimming and other cargo handling equipment are also available.

Oil Harbour: A modern oil harbour is situated at the mouth of River Kopingsan (North side), the jetty having one outside and one inside berth with depth of 7.6 m. and 5.7 m. respectively.

On the North side is an 80 m. concrete quay for grain loading vessels. Depth alongside 7.3 m.

Private Wharves: A private harbour, belonging to Cementa Co., is situated in the immediate vicinity of the "Deep-Water Harbour". There is a 110 m. concrete quay, with 7.3 m. alongside, and 1×6 ton travelling portal crane and 1 belt conveyor available. There is also a 50 m. pier, same depth, for self-unloading (cement) vessels.

STEVEDORES: Working hours: 0700 – 0900 hrs., 0930 – 1300 hrs. and 1330 – 1600 hrs. (Monday to Friday). Special conditions on Christmas Eve, New Year's Eve, Easter Eve, Whitsun Eve and Midsummer Eve.

Overtime work: can usually be executed on Mondays, Tuesdays, Wednesdays, Thursdays and Fridays and for 6 hours on Saturday.

FRESH WATER: Available.

FUEL: Available.

REPAIRS: Minor mechanical, electrical and other repairs can be carried out by different local firms. Diver available.

GARBAGE DISPOSAL: Service available. Contact Malarterminalen Koping AB. Tel: 18110.

WASTE OIL DISPOSAL: Service available. Contact Malarterminalen Koping AB. Tel: 18110.

SEAMAN'S CLUBS: None.

AUTHORITY: Malarterminalen Koping AB, Box 142, S-731 23 Koping, Sweden. *Tel:* 46-221-18110. *FAX:* 46-221-20835. *Contact:* Arne Risfors, Managing Director.

KRISTINEHAMN: 59.19 N. 14.07 E. (See Plan)

PORT LIMITS: A line drawn Westward from Strandudden to Valon (see Swedish Chart No. 132) defines the seaward limits of the port.

PILOTAGE: Pilotage compulsory for vessels exceeding 1,200 d.w.t. regardless of cargo being carried and for all ships carrying dangerous cargo.

Certificate may be granted to sail without Pilot after service-examination.

Pilots available at Vanersborg, the entrance to the Lake of Vanern after leaving Trollhatte Canal, and at Kristinehamn.

No local pilotage.

DOCUMENTS:

Certificate of Nationality.
Identification and Measurement Papers.
Oil Log.
Certificate regarding insurance for oil damage.
Derat Certificate.
Last Port Clearance.
1 copy of General Declaration (Form 611.10).
2 copies Ship's Stores Declaration (Form 611.13).
2 copies Crew's Effects Declaration (Form 616.8).
2 copies Cargo Declaration (Form 611.7).
1 copy Crew List (Form 612.13).
1 copy Declaration on account of Import Prohibition as to Livestock (Form 730.5).
1 copy Maritime Declaration of Health (Form 612.7).

ANCHORAGES: In the Varnumsviken, N.W. of Kristinehamn. The roads have a depth of 5 m. – 9 m., bottom clay.

RESTRICTIONS: In Winter, the fairways to the harbour will be kept open by the local icebreaker from 0600 hrs. until 1600 hrs. Any icebreaking services beyond these hours have to be ordered and will be charged accordingly.

MAX. SIZE: All vessels capable of passing through the Trollhatte Canal can enter Kristinehamn. Max. dimensions: Length 87 m., beam 13 m., draft 5.3 m.

HEALTH: First entry will be cleared alongside, otherwise automatic.

VHF: The port can be reached by VHF Channels 9, 11, 12, 14 and 16. In Winter, the icebreaking tug may communicate on all channels.

Instructions/Regulations regarding traffic communications will be available when passing the Trollhatte Canal.

RADAR: No port radar service.

TUGS: The tug "Dan", 600 b.h.p. and 5 tonnes bollard pull, will assist on request.

BERTHING: The outer harbour (Berths No. 20 – 25), has a quay of 360 m. length; in the river there is a quay (Berths No. 16 – 19) approx. 170 m. length. Depth 5.7 m at chart datum.

On the S.W. side of the river there is a berth, 88 m. length, for loading grain. Loading equipment on berth. Depth 5.7 m.

On the West side of Varnumsviken, Kroksvik, there is a 80 m. concrete pier for discharging refined oil products. Depth 5.7 m.

Also see "Tankers".

CRANES: 3 × 7 tonne slewing cranes with luffing jibs and 1 × 24 tonne with luffing jib, on rails, in the outer harbour (Berths No. 20 – 25). Three railway tracks underneath the portals along the quay. One fixed crane, 40 tonnes, at Berth No. 16.

BULK CARGO FACILITIES: On the S.W. side of the river there is a loading elevator for agricultural produce. Loading capacity 200 tonnes per hour.

On Berths No. 20 – 25, bulk commodities like coal, ore, grain and scrap iron can be handled by Cranes No. 7, 8 and 9 equipped with grabs.

SPECIALISED CARGO HANDLING FACILITIES: No special equipment for handling containers. No Roll-on/Roll-off berth.

BRIDGES: None.

STEVEDORES: Working hours 0700 – 1600 hrs., Monday to Friday.

General cargo: 40 – 60 tonnes per gang per hour.

Forest industries produce: Approx. 100 tonnes per gang per hour.

MEDICAL: Full hospital facilities available without prior notice.

TANKERS: There is a concrete pier, length 80 m., on the West side of Varnumsviken, with a berth on each side. Max. draft 5.3 m. The pier is equipped with a crane for lifting lines. Diameters of discharging lines are 6 in. and 8 in. Average discharging rate 500 – 700 cu.m.p.h.

DENSITY: 1000 (Fresh water).

FRESH WATER: Available at Berths No. 20 – 25, rate 5 – 10 tonnes per hour.

FUEL: Available at all berths, delivered by truck.

FIRE PRECAUTIONS: As per international standards.

CONSULS: France, Germany and Norway are represented at Karlstad, 45 km. distant.

REPAIRS: All types of deck and engine repairs can be carried out.

DRY DOCKS: None.

SURVEYORS: Lloyd's and Norske Veritas.

GANGWAY/DECK WATCHMEN: Not required.

CUSTOMS ALLOWANCES: 1 litre spirits, 1 litre wine, 5 litres beer and 200 cigarettes per person. Additional allowances for the Master.

CARGO GEAR: Shore cranes normally used.

REPATRIATION: Can be arranged.

AIRPORT: At Karlstad, 45 km. distant.

TIME: GMT plus 1 hour. Summertime GMT plus 2 hours.

HOLIDAYS: January 1st and 6th, May 1st and 20th, December 24th, 25th, 26th and 31st. Cargo work can be arranged on these days.

POLICE/AMBULANCE/FIRE: Dial 90000.

EMERGENCY CO-ORDINATION CENTRE: Dial 90000 and the Centre will notify the necessary services.

TELEPHONES: Can be arranged on request.

SERVICES: No facilities for disposal of tank cleanings.

BANKS: Handelsbanken and Wermlandsbanken represent a number of foreign banks.

STORING: See "Prelims".

1. Vessels can be stored by trucks only.
3. Trucks can proceed alongside the berth.
4. Fork lift trucks can be used when handling stores.
5. Ship's chandler will take care of Customs Regulations.
6. Local riggers can be employed to assist with storing.

SHORE LEAVE: Permitted, no restrictions.

IDENTIFICATION CARDS: Seaman's Book is sufficient.

GARBAGE DISPOSAL: Garbage containers available at the dockside. Contact the Harbour Authority.

WASTE OIL DISPOSAL: A tanker truck is available and will be placed alongside ship on request. Waste oil must be pumped by vessel's own equipment into the truck. Maximum delivery is limited to 4 cu.m. per call, for which there is no charge.

SEAMAN'S CLUBS: No Seamen's Club.

CURRENCY: Swedish Kronor (SEK).

DELAYS: Normally no delays.

DEVELOPMENTS: None.

AUTHORITY: Kristinehamns Hamn, Hamnvagen 6A, S-68130 Kristinehamn, Sweden. *Tel:* 0550-88000. *Telex:* 66030. *FAX:* 0550-83897. *Contact:* Jim N. Hjelmtvedt, Harbour Master/General Manager.

LANDSKRONA: 55.52 N. 12.48 E. (See Plan)

DOCUMENTS: See "Stockholm".

PILOTAGE: Pilot available on request from Helsingborg Pilot Station in daytime. 5 hours' notice required. Pilot stations and boats equipped with VHF. Pilot boards and disembarks off the fairway entrance or as agreed with the Pilot Station. (Also see "Stockholm" and "General-Pilotage" before first port).

ANCHORAGES: Vessels of up to 10 m. draft can safely anchor North of Staffans Bank.

MAX. SIZE: Depth in channel and harbour 11 m. (36 ft.). Max. draft 10 m. Max. LOA 190.0 m. Extreme breadth 30.0 m.

HEALTH: See "Stockholm".

RADIO/VHF: Gothenburg Radio, call sign SAG. Pilot station, pilot boats and tugs equipped with VHF Channel 16. Harbour Office equipped with Channels 16 and 10.

TUGS: Tugs usually meet off Pilhaken Lightbuoy. Ship's lines.

BERTHING: Terminal for handling bulk cargoes. Rock phosphate can be discharged with a capacity of 8,000 tons per 24 hours.

MEDICAL: Medical attention and hospital facilities available.
TANKERS: No oil berth in Landskrona.
DENSITY: Density of water changes with currents.
FRESH WATER: Available from quay.
FUEL: Small quantities of fuel oil can be obtained from quay.
CONSULS:

Danish Vice-Consulate	Tel: 0418/16150
Finnish Vice-Consulate	Tel: 0418/78000
Netherlands Vice-Consulate	Tel: 0418/35020

REPAIRS: All types of deck and engine repairs.
DRY DOCKS: Dry dock for ships up to about 25,000 d.w.t. (189 m. length). Floating dock for up to about 5,000 d.w.t.
GANGWAY/DECK WATCHMEN: Not available.
OPENING/CLOSING HATCHES: Usually carried out by ship's crew.
CERTIFICATES: See "Stockholm".
CUSTOMS ALLOWANCES: See "Stockholm".
AIRPORT: Sturup, 60 km. Angelholm 50 km. Kastrup (Copenhagen) 35 km.
TIME: GMT plus 1 hour in Winter. Summertime GMT plus 2 hours.
HOLIDAYS: See "Stockholm".

4. Yes.
6. Yes.

IDENTIFICATION CARDS: Not needed.
GARBAGE DISPOSAL: Free container at quay.
WASTE OIL DISPOSAL: Collection available by tanker trucks.
SEAMAN'S CLUBS: Swedish Government Seaman's Service, Drottninggatan 46, 25121 Helsingborg. Tel: (0) 42-139761. Fax: (0) 42-187585. Representative: J.Fremmesson.
CURRENCY: Swedish Kroner (SEK).
REGULATIONS: Anchoring prohibited between and up to 50 m. from harbour lights.
AUTHORITY: Landskrona Hamn, Box 275, 261 23 Landskrona, Sweden. *Tel:* 0418-79003. *FAX:* 0418-24105. *Contact:* Staffan Lindberg, Port Director.

LIDKOPING: 58.30 N. 13.10 E.

DOCUMENTS:
3 Crew Lists (IMO Fal Form 5).
2 Crew Effects List (IMO Fal Form 4).
2 Ship's Stores Declaration (IMO Fal Form 3).
PILOTAGE: Compulsory for vessels over 1,200 d.w.t.
MAX. SIZE: Length 87 m., beam 13 m., draft 5.3 m. and air draft 27 m. are maximum dimensions for passing through the Trollhatte Canal.
VHF: Lidkoping Harbour operates on Channel 16.
TUGS: One tug available, 920 h.p.
CRANES: 3 shore cranes of 5 tonnes each.
STEVEDORES: Working hours 0700 – 1600 hrs., Monday to Friday.
MEDICAL: Hospital facilities available.
FRESH WATER: Available.
FUEL: Gas oil available.
REPAIRS: Workshops can undertake repairs.
HATCHES: Opening/closing carried out by crew.
REPATRIATION: Facilities exist for carrying out crew changes.
AIRPORT: Nearest International Airport is Gothenburg, 130 km. distant.
TIME: GMT plus 1 hour, Summertime GMT plus 2 hours.
POLICE/AMBULANCE/FIRE: Dial 90000
GARBAGE DISPOSAL: Containers are placed on the quay free of charge.
WASTE OIL DISPOSAL: Facilities available (up to 5 cu.m.) with 24 hour notice to Harbour Authorities.
SEAMAN'S CLUBS: None.
AUTHORITY: Vanerhamn AB, P.O.Box 2124, S-53102 Lidkoping, Sweden. *Tel:* (0) 510-45000. *Telex:* 67336. *FAX:* (0) 510-62189. *Contact:* Hans Erwald, Harbour Master.

LULEA: 65.35 N. 22.09 E. (See Plan)

DOCUMENTS: See "Stockholm".
Certificates: See "Stockholm".
APPROACHES: *Fairways:* Two fairways lead into Lulea. The South Fairway, Germandoleden, is about 17 nautical miles long and the North Fairway, Sandoleden, is about 27 nautical miles long.

Special rules and traffic regulations apply to these fairways.

Ice Conditions: The port area is generally ice-infested during the period December-April. During this period, ships at sea are assisted by the State-owned icebreaker and within the harbour area by the Lulea Bogserbats AB port icebreaker. Year-round navigation has been possible since Spring 1970.

PILOTAGE: Telegraphic address, "Pilotstation Lulea". Tel: (0920) 5535 or (0920) 294000, Fax: (0920) 55306. Advance notice 5 hours. VH Channel 16. Pilot boat, orange with international signals. Pilot boar about 2 nautical miles West of Rodkallen for entering Germandolede and 1 nautical mile N.E. of Farstugrundens Lighthouse for enterin Sandoleden. Location of anchorage when awaiting Pilot: West Rodkallen and South of Farstugrunden Lighthouse.
ANCHORAGES: Germandofjarden, 1.5 nautical miles S.E. Larsgrundet Lighthouse and Inner Roads.
MAX. SIZE: Max. draft at MW 11.2 m. (up to "Panamax") in Sandolede and 7.5 m. in Germandoleden.
HEALTH: No special regulations.
RADIO: Stockholm Radio.
VHF: Port Authority on Channels 16, 14, 12, 11 and 10.

Traffic Control on Channels 16, 14, 13, 12, 11 and 10 throughou 24 hours. Tel: (0920) 294000 or (0920) 55356.

Tugs on Channel 16.

TUGS: Meet ships at the Inner Road for the ore dock, and in Sandolede 1 nautical mile South of the coal quay (Victoria Harbour) and the terminal. Tug's lines to be used.

Two tugs of 4,200 h.p. each are available for towing and ice breakin

Towing: Lulea Bogserbats AB is responsible for towing and ice breakin in the Port of Lulea. Special tug regulations apply at Uddebo Oil Por Victoria Harbour and the Ore Quay. Tugboat assistance can be ordere through Lulea Traffic, Tel: (0920) 294000 or (0920) 55356, or throug VHF call Channels 16 and 14.

Boatmen: The port boatmen are on duty if needed at all quays. The can be ordered through Lulea Traffic – Tel: (0920) 294000 or (092 55356 – or VHF call Channels 16 and 14. At the Ore Quay, howeve the respective companies provide their own boatmen.

BERTHING: *Deep Quay:* Length 150 m., depth 8.0 m. No good handled.
Cement Quay: Length 60 m., depth 9 m. Cement.
LKAB Ore Quay: Length 415 m., depth 13.2 m. Iron ore. Two shiploade of 4,000 t.p.h. each (Not in use 1997).
Lulea New Ore Quay: Length 250 m., depth 12.5 m., one shiploader.
SSAB Quay: Length 498 m., depth 8.0 m. No goods handled.
Victoria Harbour: Length 775 m., depth 9.0 – 12.2 m. Coal, coke, iro steel, limestone. Three 18 ton grab cranes, 35 tons with hook an 1×25 ton gantry crane (rate 800 t.p.h.).
Stromoren Ro/Ro Quay: Length 120 m. Depth 9.0 m.
STEVEDORES: Bottenvikens Stuveri AB. Tel: (0920) 55600.
TANKERS: Diameter of lines from 150 mm. up to 350 mm. 2 oil jettie depth 7.8 m. and 12.2 m. Length 20 m. and 60 m. respectively. Faciliti for receiving dirty ballast. Capacity 300 cu.m./hr.
New Oil Berth: Max. LOA 250 m., max. beam 32.3 m., max. draft 11.1 m max. d.w.t. 45,000. Distance bow to manifold 120 m. Vessels ber starboard side to.
DENSITY: Fresh water, 1000.
FRESH WATER: Fresh water available at all berths. Minimum charg U.S.$ 30.00. Cost U.S.$ 2.50 per ton.
FUEL: All grades of oil available.
CONSULS: Telephone Numbers:

Danish 15602	French 16329	Norwegian 221790
Finnish 50145	Germany 53852	U.K. vacant

REPAIRS: Only small engine repairs.
SURVEYORS: Bothnia Control. Tel: 55412.
GANGWAY/DECK WATCHMEN: Safety watchmen are to be on boa all tankers when loading or discharging.
OPENING/CLOSING HATCHES: Ship's crew.
CUSTOMS ALLOWANCES: 200 cigarettes or 250 grams of tobacco each Crew member every 10 days. (Wine/Spirits) 1 litre for each Cre member over 20 years old, every 10 days.
AIRPORT: 15 km. from port. Served by regular airlines.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: See "Stockholm".
POLICE/FIRE/AMBULANCE: Tel: 90 000.
TELEPHONES: Connections available at oil terminal, coal terminal a ore terminal.
IDENTIFICATION CARDS: Not necessary.
GARBAGE DISPOSAL: Garbage containers can be placed alongsi free of charge. Contact Lulea Traffic, VHF Channel 14, or ship's age
WASTE OIL DISPOSAL: Waste oil can be disposed of via tanker truc minimum pumping rate of 5 cu.m. per hour is required from the ship. to 8 cu.m. can be disposed of free of charge. The service can arranged through ship's agent or through Port of Lulea, Traffic Divisi Fax: 0920-55594.
SEAMAN'S CLUBS: A football field is available near Victoria Harbo
CURRENCY: Swedish Kronor (SEK). U.S.$ 1.00 = SEK 7.00 (1.96
DEVELOPMENTS: A new quay for iron ore is planned (See "Plan")
AUTHORITY: Lulea Hamn, Stromorvagen 9, 97437 Lulea, Swed *Tel:* (0920) 294007. *After Hours Tel:* (0920) 294000. *FAX:* (0920) 555
Contact: Bo Westman, Port Director.

LYSEKIL: 58.17 N. 11.26 E. (See Pl

DOCUMENTS: See "Stockholm".
PILOTAGE: Pilot boards 2 miles West of Gaven Lighthouse. 5 ho advance notice required. Pilot ordered by VHF Channel 16 or teleph No. 660800.
ANCHORAGES: Safe anchorages both for small and large vessels outside harbour in Gullmarsfiord.
RESTRICTIONS: No restrictions night entry, except max. draft poss 30 ft. No tide.

MAX. SIZE: Maximum permissible length for berthing about 600 ft. Draft 30 ft.
HEALTH: Declaration of Health only when required from Customs or for vessel coming from outside Scandinavia.
RADIO: Cable Agents giving ETA, draft, cargo and cash required via Gothenburg Radio.
RADAR/VHF: No port radar service, VHF for calling Pilot, Channel 16.
TUGS: Must be requested through Agent at least 12 hours before arrival.
BERTHING: 4 berths available. Grotorev: Length 240 ft., max. draft 33 ft. Gullmarskajen: Length 600 ft., max. draft 29 ft. Grotokajen: 500 ft., max. draft 22 ft. Anderssons Kav: 400 ft., max. draft 18 ft. Railway on all berths.
CRANES: Five mobile harbour cranes working all berths. Maximum capacity 80 tons. No restrictions against using ship's own gear.
STEVEDORES: Ordered by Agents.
MEDICAL: Hospital in town.
TANKERS: See the port of "Brofjorden".
DENSITY: About 1027.
FRESH WATER: Available from shore installation.
FUEL: Gas oil and diesel available.
CONSULS: Denmark, Finland, Iceland, Norway.
REPAIRS: Small repairs possible.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Normally opened by crew.
CERTIFICATES: Registered Tonnage Certificate.
CUSTOMS ALLOWANCES: See "Stockholm".
HOLIDAYS: See "Stockholm".
REPATRIATION: Change of crew and repatriation possible.
AIRPORT: None.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
TELEPHONE: Police, Ambulance, Fire Brigade, Tel: 90000.
IDENTIFICATION CARDS: Not required.
AUTHORITY: Lysekils Hamn, Hamnkontoret, S-45380 Lysekil, Sweden. *Tel:* 0523-14090. *FAX:* 0523-14094. *Contact:* Olle Samuelson, Harbour Master.

MALMO (including Limhamn): 55.37 N. 13.00 E.

(See Plan)

DOCUMENTS:
2 Crew Lists.
1 Passenger List.
2 Lists of Personal Effects (Tobacco List).
1 Declaration of Health.
2 Stores Lists.
3 Cargo Manifests.
1 Bill of Measurement.
1 Certificate of Nationality.
1 Derat Certificate.

PILOTAGE: Malmo Pilot Station serves the ports of Malmo, Trelleborg and Ystad and the Falsterbo Canal. Pilots for through-pilotage can be obtained. A 24 hour watch on VHF Channels 16 and 20 or telephone 46406115269 is maintained. The Pilot Station is equipped with Telex: 32435 MLOTS. Fax: (40) 301868.

Pilots can also be arranged through ship's local Agent. 5 hours notice is required. Pilot boat orange-coloured cutter equipped VHF and radar. Pilot boards at Malmo roadstead. In case of bad weather vessel awaits Pilot at roadstead. (Also see "Stockholm" and "General – Pilotage" before first port).

ANCHORAGES: Vessels anchor about 5 cables North of Fairway Buoy "Roder Prick" and East of leading lights Centralhamnsrannan Nedre and Ovre, and S.W. of leading lights Malmo Oljehamn Nedre and Malmo Oljehamn Ovre. Depth 12 m. to 14 m. and bottom hard clay. Larger vessels will be anchored at the Pilots directions.

RESTRICTIONS: Speed must be reduced inside breakwaters. When red flag hoisted (red lantern at night) at the N.E Dry dock pier head, indicating dock gates open, vessels may pass breakwater at minimum speed. Bridge opening signal for passing from South Wharf Basin. Call Malmo port on VHF Channel 14 one hour before opening. Work day is 0600 hrs. – 1800 hrs.

MAX. SIZE: *Bulk/Oil Harbour:* Max. length 260 m. on draft not exceeding 12.5 m. for bulk harbour and 11.4 m. for oil wharf.

Free Port: Max. length 225 m. on draft not exceeding 8.6 m. Max. length recommended in New Harbour is 150 m. on max. draft 6.6 m. and in Industrial Harbour 170 m. on max. draft 8.4 m. No tides.

HEALTH: Free Pratique automatically granted arriving from non-infested areas. If arriving from infested areas Health Declaration must be presented immediately on arrival. If diseases on board suspected, vessel allowed to enter after approval of City Medical Adviser, but nobody allowed on board until vessel's crew examined by doctor and after approval of Medical Adviser.

RADIO: Vessel can route ETA cables through Gothenburg Radio (call sign SAG or Channel 26 on VHF), open all hours. Radio stations can also be called by radio-telephone on 2182 kHz.

VHF: Port Control Office equipped with VHF (Calling and working on Channel 14), open Monday-Friday, 0600 hrs. to 1800 hrs. Masters can receive information about berthing, present traffic and existing hazards to navigation in harbour area. Telex: 33275. Fax: 040-302517.

TUGS: Tugs usually meet vessels at roadstead. Tugs lines used.

Tugs can be arranged through a shipbroker or the Port Control office and are available round the clock from the Red Tug Fleet Co. Ltd. in Malmo. 1×3,000 h.p. tug available. Others are available if necessary.

BERTHING:

Passenger Harbour:

Berth	*Length* (m.)	*Depth* (m.)

3 of these cranes can be equipped with grabs

Port of Limhamn: Incorporated with Malmo Port Authority 1978. This port consists of a cement jetty, a centreport and a ferry port.

The Port of Limhamn lies to the South of Malmo and is accessible via two fairways; the Southern one has a depth of 5.0 m. and leads to the Ferry Harbour, and the Northern fairway has two branches, one to the Oil Harbour with a depth of 10.5 m. and one to the Central Harbour with a depth of 8.6 m.

			Cranes	
Berth	*Length* (m.)	*Depth* (m.)	No.	(tons)
Centreport:				
107 – 111	500	8.4	1	5 (private berth)
104 – 106	200	8.0 – 8.4	–	
112 – 113	180	8.0	–	
117 – 118	200	8.0	–	
Ferry port:				
217, 220		5.0	Car ferry berth	
Oil berth (jetty):				
125	90	10.0	Loading plant for cement and tanker berth	

BRIDGES: Will be opened with certain exceptions 0600 – 1800 hrs. weekdays. May be opened other hours on request to Port Control Office.

CONTAINER HANDLING FACILITIES: 10 Roll-on/Roll-off ramps, 2 container berths with 2×46 tons capacity container cranes, 4 forklift trucks with 25 – 46 tons capacity.

STEVEDORES: Normal working hours are from 0700 – 1600 hrs., Monday to Friday. Standard overtime shifts of up to 4.5 hours can be arranged. Additional overtime work can be obtained by special arrangement with the Terminal Company. Overtime work can also be arranged on Saturdays, Sundays and holidays.
Stevedore Company: Malmo Sjoterminal AB, Box 566, 211 20 Malmo. Tel: 040-6804100. Telex: 32713 Seaterm S. Fax: 040-180501. Director: Bertil Cederholm.

MEDICAL: No advance notice required for medical attention. Good hospital facilities available. See also "Health".

TANKERS/BULK CARRIERS: The Bulk/Oil Harbour in the Northernmost section of the port of Malmo can be reached by a special approach fairway, the Oil Harbour channel, which has a depth of nearly 43.5 ft. The harbour is equipped with 7 berths, 2 of these being for ocean-going tankers with modern equipment for the unloading of oils and chemicals. Water depth varies between 19.5 ft and 39 ft.

The harbour can accept fully-loaded tankers of up to 60,000 d.w.t. as well as partly-loaded ships of up to 100,000 tons.

The berths for ocean-going tankers are each equipped with 3 hydraulically manoeuvrable transfer plants for faster and more reliable unloading. A piping system leads from the berths, unloading capacity of up to 2,000 tons per transfer plant per berth per hour. Tanks and pipes can be heated from a central steam-production station used by all firms.

The Oil Harbour area also contains storage tanks for liquid chemicals reception and storage tanks for LNG and solvents. There are also good possibilities for development within the area, e.g. petrochemical industries.

Berth	*Quay Length*	*Depth*	*Crane capacity*
1001 – 1002	200 m.	13.5 m.	3×20 tons (500 t.p.h.)
1003	260 m.	12.0 m.	
1004	260 m.	12.0 m.	
1006 – 1007	90 m.	6.0 m.	
1008 – 1009	90 m.	6.0 m.	
1010	100 m.	6.0 m.	

Also see "Berthing" – Port of Limhamn.

Report: *Cautionary Advice – In Port:* The port is approached from the N.W. via a relatively narrow dredged channel, marked with buoys and keeping 2 red leading lights in line. A current with a velocity of up to 2 knots may set across the channel, usually in a Northeasterly direction. It is, therefore, important that tugs are made fast with good lines before the channel is entered. Strong Southerly and Southeasterly winds, particularly in the Spring, may lower the water level in the harbour considerably below mean water level. The average density of the harbour water is 1010 at MLW.

Berthing Procedure: The procedure is similar for both berths used by Esso. Vessels berth port side alongside, and are normally swung in the manoeuvring basin North of the berth, assisted by tugs. If underkeel clearance permits, the starboard anchor is used and vessels are then pushed alongside the breasting face which is protected by truck tyres on wood.

DENSITY: Average density 1010. No tide experienced.

FRESH WATER: Fresh water can be ordered from the Boatmen Malmo office (Tel: 040-187580) and is available at all quays at a rate of about 20-30 t.p.h.

FUEL: All types of bunker oil are available from tank trucks at various quays in Malmo and Limhamn.

FIRE PRECAUTIONS: Apart from usual non-smoking precautions, vessel discharging or loading dangerous goods of Class 1 in IMO code required to have a fire guard on board at all times.

In Oil Harbour the shore-valve watchman also serves as fire guard.

DOCUMENTS: 3 Customs Documents. 3 Health Documents. 3 Cr Lists. 3 Passenger Lists. 3 Manifests.

Master of ship arriving at first Swedish port from abroad has to g Maritime Declaration of Health on special form.

PILOTAGE: See "Stockholm". Ships will be received 2 nautical mi North of the lighthouse Gustav Dahlen. The Pilot must be ordered radio, telephone or in some other way at least 5 hours before pilo to start.

ANCHORAGES: Lat. 58° 38.7' N., Long. 16° 22.5' E. Depth 70 ft.

RESTRICTIONS: Tankers loaded with more than 10,000 tons gaso must not move in port at night-time. Tankers over 15,000 d.w.t. wil be shifted at night-time. Pampushamnen Oil Jetty: Tankers loaded more than 10,000 tons must not enter at night-time. Inner Harbo Tankers loaded with more than 15,000 tons must not enter at night-t

MAX. SIZE: Pampushamnen Oil Jetty can berth vessel of about 70,000 d.w.t. with max. draft of 11.4 m. MLW. Gastgivarehagen Oil Jetty can berth vessel with a max. draft 8.4 m. MLW and length 195 m. Ramshall and Tallbacken Oil Jetty can berth vessel with max. draft 7.9 m. MLW, length 177 m., breadth 24.4 m., daytime only. General cargo and bulk cargo quay at Pampushamnen with max. draft 11.4 m. MLW. General cargo quay (Ohmanskajen via the Lindo Kanal) can berth vessel max. draft 8.4 m. MLW and max. LOA 190 m. Dry cargo vessels of 15,000 d.w.t. or more for Ohmanskajen daylight entry only. Dry cargo vessels of max. LOA 190 m. and max. breadth of 23 m. and vessels of max. LOA 180 m. and max. breadth of 26 m. permitted. Vessels exceeding this size shall obtain prior permission from Pilots to enter the Ohmanskajen through the Lindo Kanal. Vessels must be able to make headway through the Kanal with a speed not exceeding 5 knots. Dry cargo vessels of 25,000 d.w.t. or more should have bridge controlled main engines. Inner Harbour can berth vessel max. draft 6.4 m.

Largest tanker at Pampushamnen, 66,875 d.w.t. LOA 236.46 m., Beam 33.3 m. Also see "Tankers".

Largest dry cargo vessel at Pampuskajen: 43,793 d.w.t., LOA 183 m., Beam 31.1 m. A vessel of LOA 199.7 m. and Beam 33.3 m. has also berthed.

Largest dry cargo vessel at Ohmanskajen: 34,976 d.w.t., LOA 181 m., Beam 26.4 m.

RADIO: Stockholm Radio, Tingstade Radio.

TUGS: 2 tugs available, 1,680 b.h.p. and 3,400 b.h.p. The 2 tugs are icebreaking. Join vessel off St. Juten Lat. 58° 38.1' N., Long. 16° 19.6' E. Ship's lines to be used. All towing is carried out subject to "Scandinavian Tugowners Standard Conditions of the year 1959 revised 1974".

RADAR/VHF: VHF Channel 9, 14 and 16. No radar.

BERTHING: No specific requirements except at Oil Jetty Tallbacken and Ramshall, which require daylight docking and undocking.

Berths specially equipped for grain, berths equipped for containers, berth for Ro/Ro traffic, berths handling liquid chemicals. 5,300 m. of quayage with depths of 5 m. – 12 m. and 6 oil jetties.

Norra kajen: Norra kajen is used primarily for the handling of coal, steel, bulk commodities and raw wood material. The quay is equipped with bulk handling cranes, and the water depth is between 6.0 m. and 7.0 m.

Sodra kajen: Used primarily for timber, forest products and general cargo shipped in small tonnage. Water depth 6.0 m. – 7.0 m. Grain, fodder, fertilisers and clay are handled on a section of the quay between Ohmanskajen and Sodra kajen. Depths here are between 7.0 m. and 9.0 m.

Ohmanskajen: With a water depth of 9.0 m., Ohmanskajen is mainly used for general cargo, containers and forest products.

Adjacent to Ohmanskajen there is one Ro/Ro berth (depth 9.0 m.) and a passenger terminal (depth 8.0 m.) with storing areas and warehouses for goods storage. 2×30 ton cranes for container handling.

Pampusterminalen: Pampusterminalen, water depth 12.0 m. has the capacity for serving 2 vessels simultaneously and 30,000 to 40,000 tonners can utilise their carrying capacities at full draft. Via Pampusterminalen, general cargo, forest products and bulk commodities are handled. Cargoes are moved by the ship's own equipment, which is complemented if necessary by 5 shore cranes. The quay is also used by Ro/Ro vessels with stern quarter ramps.

Adjacent to Pampusterminalen, there are large areas for storing goods within fenced grounds. Warehouses are available for weather-sensitive goods. Pampusterminalen has a railway connection as well as high standard roads connecting with European highways and major district roads.

Pampushamnen Pier No. 3 Ro/Ro berth for coal discharge: A Ro/Ro berth has been added to Pier No. 3 for discharging of coal from barges.

CRANES: All cranes are operated by Norrkopings Hamn and Stuveri AB. These include 14 electrical transportable quay cranes with a capacity of 4 – 10 tonnes, two 30 tonnes cranes which together can lift 50 tonnes, and in Pampus Harbour 2 electric cranes of 35 tonnes and 50 tonnes, and one mobile crane of 36 tons. There are also 2 mobile cranes of 6 – 23 tonnes. One fixed heavy lift crane with a maximum lifting capacity of 320 tonnes (water depth alongside crane is 9.0 m.) and one 4 tonnes floating crane.

SPECIALISED CARGO HANDLING FACILITIES: *Ro/Ro Berths:*

One Ro/Ro berth with a fixed concrete ramp and a water depth of 9 m. Loading and discharging by shore cranes (30 tons) may take place simultaneously with Ro/Ro operations. Stern loading vessels port side alongside.

One Ro/Ro berth with a fixed concrete ramp and a water depth of 8 m. for Ro/Ro operations only. Stern loading vessels starboard side alongside.

One Ro/Ro berth with a fixed concrete ramp adjacent to the heavy lift crane (320 tons) specially designed for heavy loads. Water depth 9 m.

One Ro/Ro berth with depth of 7.5 m. for discharging coal.

Djuron

Grain Terminal, position Lat. 58° 38' N., Long. 16° 20.1' E. 160 m. long concrete pier with a water depth of 12.2 m. MLW. Travelling grain loader with maximum loading capacity 500 tonnes/hour. Max. elevation above MLW 18 m.

Braviken

Paper Mill, Holmens Bruk AB. Lat. 58° 38.3' N., Long. 16° 16.1' E. 126 m. long concrete pier with a water depth of 8.8 m. MLW. Mobile cranes for loading on request. Otherwise ship's gear. Ro/Ro fixed concrete ramp 20 m. wide with a water depth of 6.8 m. MLW. Stern loading vessels starboard side alongside.

STEVEDORES: Gangs must be ordered before 1400 hrs. day before arriving.

MEDICAL: Arranged by Agent. All services available.

TANKERS: *Pampushamnen:* Pier I: Depth alongside 12 m. The berth is equipped with a crane for the handling of hoses and has pipe connections for all petroleum and bitumen products. Permanent gangway for the use of tankers.

Pier II: Depth alongside 12 m. The berth is equipped with a crane for the handling of hoses, and 3 mechanical couplings and has pipe connections for all petroleum products. Permanent gangway for the use of tankers.

Pier III (coastal tonnage): Depth alongside 7.5 m. The berth is equipped with a crane for the handling of hoses and has pipe connections for all petroleum products.

Fuel oil: one 18 in. and one 16 in. pipelines for discharging. 2 connections with 8 in. hoses. Gas oil: 14 in. pipes with 2 connections to 8 in. hoses. Asphalt: 10 in. pipes. Gasoline: 12 in. pipes with 1 connection to 8 in. hose. Connection to bigger or smaller hoses possible through existing flange-connections.

Pipe connections for discharging ballast water are installed at all piers at Pampushamnen. Receiving of ballast water is covered by ballastage. Ballast water containing any chemical agents not accepted. Receiving capacity during the first hour is 650 cu.m. Thereafter, 150 cu.m.p.h.

Tallbacken (Pol Transport): Depth alongside 8.5 m. Beam of vessels restricted to 24 m. (78 ft. 9 in.) due to passage through the Handelo drawbridge. Vessels require own gear for the handling of hoses.

3 connections for variable kinds of oil, 8 in. hose connections.

Gastgivarehagen (Pol Transport): Depth alongside 9 m. The berth is equipped with a crane for the handling of hoses.

4 connections for variable kinds of oil, 8 in. hose connections.

DENSITY: 1000.

FRESH WATER: Delivered by 1 water boat of 90 cu.m.

FUEL: All grades available, delivered by boat.

CONSULS:

6. Yes.

SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Seaman's Book or Passport if travelling outside port area.
AUTHORITY: Cementa AB, Box 102, 62030 Slite, Sweden. *Tel:* (0498) 281000. *Telex:* 4136. *Cables:* Cementa Slite. *FAX:* 0498-281390. *Contact:* Magnus Helmer, Port Manager.

SODERHAMN: (includes Stugsund, Langror Oilberth, Sandarne Factory Berth and Orrskar Woodchip Berth.) 61.18 N. 17.05 E. (See Plan)

DOCUMENTS:
2 Crew Lists.
3 Bills of Lading.
3 Manifests.
2 Crew Effects Declarations.
2 Ship's Stores Declarations.
Tonnage Certificate.
Certificate of Nationality.
Ship's Register.
PILOTAGE: Pilot must have 5 hours' notice. Telegraphic address "Soderhamn Pilot Station", Ljusne. VHF Channel 16 for calling pilot boat and Pilot Station and 13. Pilot boat is orange. International signals to be used. Vessels can normally receive Pilot between Hallgrund and Storjungfrun. In case of bad weather or ice, Master consults Pilot for advice (Also see "Stockholm").
ANCHORAGES: Lilljungfru Anchorage S.W. Lilljungfrun, where depths are 15 m. – 20 m., is W. or S.W. of Norrutharet. Branthalls Anchorage W. Branthall Island, depths 10 m. – 15 m.
HEALTH: No special action except for suspected disease. In case of disease contact Agent for information.
RADIO: Stockholm Radio. Within reach, Master may call Soderhamn Port Radio. Tug station is Stugsund. Tug fitted VHF, Channels 16,13,12.
There is a radar station at Soderhamn. Pilot station, Ljusne, and the pilot boats are fitted with radar.
MAX. SIZE: Langror Oil Berth. Breadth of entrance fairway 55 m. – 60 m. and depth 8.3 m. at mean level (M.L.). Depth according to M.L. of 1987. Max. ship length about 170 m. at the quay.
Orrskar: Woodchip Terminal, breadth of entrance fairway 110 m., depth 12.8 m. M.L. New quay for general cargo, depth 10.45 m. M.L.
Sandarne: Breadth 30 m., depth 7.0 m. M.L. breadth 55 m. – 60 m. in unlit fairway.
Stugsund: Breadth 30 m., depth 6.0 m. M.L.
Soderhamn: Breadth 10 m. – 15 m., depth 3.5 m. M.L.
Depth varies about 1 ft. below and 1 ft. above M.L. Breadth given at narrowest point in fairway.
TUGS: Normally meet large vessels at Otterhallans Lighthouse, Blomman Lightbuoy and others off quays on request. Ship's lines to be used.
BERTHING: Boatmen can be ordered by Pilots or Agents. Large ships berth oil berth only in daylight because channel not lit.
CRANES: One electric crane to lift 10 tons in Stugsund. In other berths mobile cranes can be hired.
STEVEDORES: Gangs to be ordered by Agent usually at 1500 hrs. for starting next morning at 0700 hrs.
MEDICAL: Medical attendant available day and night.
TANKERS: 6 in. or 8 in. connections. Only 1 berth and max. depth at quay 8.3 m.
DENSITY: Practically fresh water.
FRESH WATER: Available in all ports. Delivered through pipelines on wharf. Rate: 10 t.p.h.
FUEL: Any normally used grade on request to oil company with few hours' notice.
CONSULS: None.
REPAIRS: Minor plate-work and welding can be carried out.
SURVEYORS: A Surveyor is appointed at the Port.
GANGWAY/DECK WATCHMEN: Watchmen available.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CERTIFICATES: Traffic permission (not necessary for ports within the Custom District boundaries), Bill of Measurement, Swedish Sailor's Roll (only Swedish ships), Foreign Nationals Crew Passports, Derat Certificate (6 month), Certificate of Health.
CUSTOMS ALLOWANCES: (Tobacco), out of bond, 200 cigarettes or 250 gm. tobacco. (Wine/Spirits), out of bond, 1 bottle of spirits and wine, maximum 1 litre or 2 bottles of wine.
CARGO GEAR: Valid cargo gear certificates.
REPATRIATION: Facilities exist for effecting crew changes.
AIRPORT: Nearest international airport Stockholm.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: No work on official holidays, but may be possible on special request. New Year's Day (1st January); Twelfth Day (6th January); Good Friday; Easter Sunday and Easter Monday; 1st May; Whit Sunday and Whit Monday; Midsummer Day; All Saints' Day; 25th December and 26th December; New Year's Eve; Easter Eve; Whitsun Eve; Midsummer Eve; Christmas Eve.
POLICE/AMBULANCE/FIRE: Police 90000 or 0270/72300; Ambulance 90000; and Fire 90000 or 0270/75000.
TELEPHONES: Quay telephones can be placed on board at Orrskar quay. 2 telephones.
SERVICES: Facilities for discharge of tank-washings max. 20 tons. Tank-cleaning and facilities for discharge of tank-washings of great extent are Stockholm and Sundsvall. Compass adjusting in Stugsund Berth.
BANKS: Skandinaviska Enskilda Banken, Box 4, Kopmangatan 1, 826 21 Soderhamn.
STORING: See "Prelims".
1. Yes.
2. Yes.
3. Yes.
4. Yes.
5. Only bonded stores.
6. Stevedores, on request.
IDENTIFICATION CARDS: Not needed.
GARBAGE DISPOSAL: Container available on wharf. No charges.
WASTE OIL DISPOSAL: Engine room slops only. Tanker trucks capacity 8 cu.m. available at all berths. The service can be ordered through Soderhamns Hamn, Tel: 0270-54640, 24 hours before arrival. Collection only between 0700 – 1530 hrs.
SEAMAN'S CLUBS: Only local facilities available, e.g. shop, international telephone, postage, etc.
CURRENCY: Swedish Kronor (SEK).
REGULATIONS: Port Regulations available from Agent or Port Office.
DELAYS: Fog, ice and bad weather may delay berthing. Rain and snow can delay loading and discharging of dry cargo.
GENERAL: There is a VHF port radio at the Port Office, Stugsund. Working hours 0730 – 1630 hrs. Channel 16 for call and Channel 12 fo working. During the ice-breaking season the tug may be out even a night. Tug has same channels. Soderhamn Customs District includes all berths mentioned above.
AUTHORITY: Soderhamns Hamn, Strandgatan 4, S-82660 Soderhamn, Sweden. *Tel:* 0270-54640, 54580. *FAX:* 0270-55190. *Contact:* Rutger Hagberg, Harbour Master.

SODERTALJE: 59.12 N. 17.38 E. (See Plan)

PORT LIMITS: Approximately 2 nautical miles from entrance.
DOCUMENTS:
Crew List.
Cargo Manifest.
List of Ports of Call.
PILOTAGE: Pilot to be ordered at least 5 hours before arrival at Landsort Pilot Station on VHF Channel 13. Distance from Landsort to Sodertalje is 34 nautical miles.
Pilotage compulsory for all vessels carrying petroleum, gas and chemicals.
ANCHORAGES: Pilots direct vessels to suitable anchorages.
RESTRICTIONS: Cables over fairway with vertical clearance of 42 m. at MLW and railway bridge 40.5 m. (Between South Harbour and Oi Harbour).
MAX. SIZE:

	Length	*Beam*	*Draft*	*Airdraft*
Uthamnen (Outer Harbour)	200 m.	32 m.	8 m.	40.5 m.
Sydhamnen (South Harbour)	200 m.	32 m.	9 m.	42.0 m.
Igelstahamnen (Igelsta Harbour)	200 m.	32 m.	9 m.	40.5 m.
Oljehamnen (Oil Harbour)	200 m.	32 m.	9 m.	40.5 m.

HEALTH: Derat Certificate required.
RADIO: Stockholm Radio.
VHF: Channel 13 calling "Pilot Sodertalje" or "Malarbron" for ordering of boatmen 1 hour before arrival.
RADAR: No port radar service.
TUGS: Available through local Agents for vessels over 10,000 d.w.t.
BERTHING: *Sydhamnen:*
Ro/Ro Berth No. 9, length 70 m., depth 6.4 m. MW.
Ro/Ro Berth No. 10, length 130 m., depth 7.9 m. MW.
Ro/Ro Berth No. 11, length 130 m., depth 7.9 m. MW.
Ro/Ro Berth No. 12, length 160 m., depth 9.8 m. MW.
Oljehamnen: Jetty No. 6, depth 10.1 m. Jetty No. 7/8, depth 6.9 m.
Uthamnen: Lo/Lo berth (general cargo), length 300 m., depth 5.9 m.- 8 m. Silo Quay, length 155 m., depth 8.4 m.
Igelstahamnen: Coal and oil discharge berth, length 150 m., dept 10.5 m. Coal discharged using shore equipment.
CRANES: *Uthamnen:* 3 cranes with capacity up to 25 tons.
Sydhamnen: Mobile cranes up to 47 tons with auto container spreade forklifts up to 45 tons.
Igelstahamnen: Shore equipment for coal discharge.
BULK HANDLING FACILITIES:
Uthamnen: Salt in bulk.
Siloquay: Grain loading.
Igelstahamnen: Coal discharge, oil discharge.
Oljehamnen: Oil petroleum products and liquid chemicals.
SPECIALISED CARGO HANDLING FACILITIES: 24,000 sq.m. for co and warm storage available.
STEVEDORES: Ordinary working hours: 0700 – 1130 hrs., 1200 - 1600 hrs. on weekdays. Stevedores can be ordered by telephoni 08-55023750 or by telex No. 10273 Sodstuv.
TANKERS: See "Berthing".
FRESH WATER: Available at all berths.
FUEL: Available at all berths.
REPAIRS: Can be undertaken at all berths.
DRY DOCKS: Nearest at Stockholm.
SURVEYORS: Cargo surveyors are available from Stockholm.
GANGWAY/DECK WATCHMEN: Available.
HATCHES: Opening/closing carried out by stevedores.
AIRPORT: Nearest at Stockholm, 60 km. distant.
TIME: GMT plus 1 hour. Summertime GMT plus 2 hours.
HOLIDAYS: Cargo work can be carried out by special agreement holidays.
POLICE/AMBULANCE/FIRE: Dial 90000 and request necess service.
TELEPHONES: Can be placed on board vessels.
BANKS: Only Swedish banks are represented.
STORING: See "Prelims".
1. By truck.
2. Vessels can store while loading/discharging.
4. Forklifts available.
6. Yes.
GARBAGE DISPOSAL: Garbage containers in each harbour. Con Port Authority Tel: 08-55023750.
WASTE OIL DISPOSAL: Collection service of waste oil throug harbour via tanker truck. Contact Port Authority Tel: 08-55023750.
SEAMAN'S CLUBS: The Seamen's Club is situated in Stockho 30 km from the port. Contact Tel: 08-6632421.
CURRENCY: Swedish Kronor (SEK). U.S.$ 1.00 = SEK 6.80 (28.2
SHORE LEAVE: Permitted.
AUTHORITY: Port of Sodertalje, Box 2016, S-15102 Soder Sweden. *Tel:* 08-55023759. *Telex:* 10273 Sodstuv. *FAX:* 08-55031 *Contact:* Ingvar Wiren, Managing Director.

SOLVESBORG: 56.03 N. 14.35 E. (See Plan)

DOCUMENTS: See "Stockholm".

PILOTAGE: Pilot station at Ahus, Tel: 044/240027, needs 5 hours' notice. Pilot Station (Karlshamn): Tel: 0454-14102. Pilot station and pilot boat can be ordered by VHF Channel 16, working on Channel 13. Harbour office in Solvesborg can be called on same frequency. (Also see "Stockholm".)

ANCHORAGES: Roadstead to South of harbour 25 ft. deep with good holding ground.

MAX. SIZE: Depth in outer harbour 8.2 m. (27 ft.) and in inner harbour 7.5 m. (25 ft.) Recommended for ships to have 1 ft. 6 in. of water under keel. Max. length 170 m. (558 ft.). Breadth 30 m. (98 ft.). Draft 7.7 m. (25 ft.) for vessel entering harbour. Largest ships to enter harbour were 26,000 tons oil tanker with load of 16,000 tons and 30,000 ton dry cargo ship loading 5,000 tons of pulp.

HEALTH: See "Stockholm".

Animals: Private dogs and cats etc., not allowed ashore without quarantine.

RADIO: Stockholm Radio and Gothenburg Radio.

VHF: Harbour Office can be reached by VHF, Channel 16. Working frequency Channel 14.

Tug "Hafnia" – Channels 6, 13, 14 and 16.

Workboat "Portia" – Channels 6, 13 and 16.

TUGS: 1 tug available, 1×665 h.p. (ice-breaking).

BERTHING:

Location	Length (m.)	Depth (m.)	No. of cranes (max. load) tons
Inner Harbour:			
Western Quay, Southern Section	225	7.0	1 (5)
Western Quay, Northern Section	129	6.5	1 (6)
Northern Quay	85	5.0	Mobile (35)
Blekinge Quay	53	4.0	—
Other Quays	190	3.0	Mobile (35)
Outer Harbour:			
Ro-Ro ramp	20	6.0	
Side-deck at the Ro-Ro ramp	45	6.0	Mobile (35)
Outer Harbour Quay	200	8.2	1 (26)
Oil Jetty	25 + Dolphins	8.2	1 (40)
(The Ro-Ro berth, quay and oil landing-stage are situated on a 500 m. line).			
Private Harbours:			
Quay	165	6.0	1 (15)
New Quay	115	6.0	1 (15)

Within the port area a total of 25 straddle, fork and clamptrucks, as well as 2 front loaders, the biggest fork truck having a lifting capacity of 25 tons.

A storage space of 21,000 sq.m. inside warehouses, and an open air space of 140,000 sq.m.

STEVEDORES: Require notice before 1500 hrs. if loading/discharging shall start at 0730 hrs. following morning, or notice before 1000 hrs. if loading/discharging shall start 1300 hrs. the same day.

Stevedoring Company: Solvesborg Stuveri and Hamn AB. Tel: 0456-10119, 12295.

TANKERS: 3 Shore-lines for oil products from oil jetty to depots.

1. 250 mm. for Bunker C (2nd fuel).
2. 200 mm. for paraffin oil.
3. 200 mm. for petrol. For discharge coasters use ship's equipment.

Larger ships discharging Bunker C oil use harbour's 8 in. rubber hose.

FRESH WATER: Available.

FUEL: Ordered from oil companies by ship's Agents.

CONSULS: Royal Norwegian Vice-Consulate, Stortorget 10, Box 115, S-29401 Solvesborg. Tel: 0456-150 20.

REPAIRS: Carried out by local workshops.

DRY DOCKS: Facilities available.

GANGWAY/DECK WATCHMEN: Watchmen normally not needed. Can be ordered by ship's Agents.

OPENING/CLOSING HATCHES: Normally opened/closed by crew.

CERTIFICATES: See "Stockholm".

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes/week per head. Wine/spirit: normally 1 litre/week.

Customs House, Tel: 12000.

REPATRIATION: Possible.

AIRPORT: 50 km. to Kristianstad Airport and 60 km. to Ronneby Airport. Served by regular inland airlines.

TIME: Local time is GMT plus 1 hour. Summertime GMT plus 2 hours.

HOLIDAYS: See "Stockholm".

POLICE/AMBULANCE/FIRE: Dial 90 000 and ask for Police, Ambulance or Fire Department.

TELEPHONES: Telephones available in Agent's offices at quay and telephone boxes.

IDENTIFICATION CARDS: Not needed.

DELAYS: Normally no delays.

GARBAGE DISPOSAL: Blue, closed, containers are placed in harbour area. Notify harbour authority, if used.

WASTE OIL DISPOSAL: Tanker trucks of 12 cu.m. available at any berth.

SEAMAN'S CLUBS: Telephone boxes and post office in city centre. No other services for seamen.

CURRENCY: Swedish Kronor (SEK).

AUTHORITY: Solvesborgs Stuveri & Hamn AB, Box 60, S-294 22 Solvesborg, Sweden. *Tel:* 46-456-10119, 12262. *FAX:* 46-456-12761.

Contact: Kjell Andersson, Managing Director.

STENUNGSUND: 58.04 N. 11.49 E. (See Plan)

LOCATION: Stenungsund is located on the East side of Askero Fjorden about 23 miles North of Gothenburg. There are 3 terminals.

1. The Power Board Terminal.
2. The Borealis Havden Terminal.
3. The Norsk Hydro Terminal.

The terminals are located about 20 miles from the Hatteberget Light Tower (Lat. 57° 52' N., Long. 11° 28' E.) and are reached via Marstrands Fjorden and Hake Fjorden.

DOCUMENTS:

3 Crew Lists.

2 Passenger Lists.

1 Tobacco and/or Stores List.

1 Manifest.

1 List of Animals on Board (if any).

Access to the usual ship's papers (measurement, register, certificate, etc.).

If away from Sweden more than 15 days: Bill of Health.

APPROACHES: When approaching from the West, ships must keep North of the area dangerous due to mines extending to Lat. 57° 47' N., Long. 11° 03' E.

Currents in this area are unpredictable and are much influenced by the wind. Ships have reported experiencing a change in direction of current on approaching the Hatteberget Light Tower, for example, South-going outside Hatteberget, North-going inside Hatteberget. Currents of 1 to 3 knots have been experienced.

Seabuoy-Berth: For larger ships bound for Stenungsund the recommended track is Algo Fjorden shown on charts as passing between N. Meholm and S. Meholm is not always followed by Pilots, some preferring to pass South of the Hunden Shoal and S. Meholm. Great caution is needed in taking this Southerly route as there are unmarked dangers. During darkness or in poor visibility the Pilot's intentions should be fully discussed before entering Algo Fjorden.

The channel between Bratton, Kallon and Almon Islands at the North end of Hake Fjord and under the Tjornbron (bridge) between Kallon and Almon is in the form of an "S" bend and vision is obstructed. Traffic may be suddenly met with little warning, particularly as some ships do not carry Pilots, and there is no speed limit. Engines should be on standby, anchors ready and manned in this area.

PILOTAGE: The pilot boat is steel hulled, painted orange, and it will meet ships based on ETA and VHF contact. The Pilot boards at Hatteberget Light Tower. Pilots will not handle large vessels during darkness. Those ships must anchor and await daylight. ETA advice to Pilot to be sent to "Lotsarna Marstrand" via Goteborg Radio at least 5 hours before arrival giving ship's name, flag, draft, ETA Pilot Station and destination.

ANCHORAGES: While awaiting berth vessels anchor outside harbour N.W. of Powerboard Jetty. Safe anchorages everywhere, but fairway South of Galteron Lighthouse has to be avoided.

RESTRICTIONS: Max. draft in channel 13.0 m. Night navigation is decided by individual case.

Bridge height at Tjornbron is 43 m.

MAX. SIZE: *Powerboard Jetty:* Max. draft North side 12.30 m., South side 10.50 m.

Statoil Havden: Max. LOA 240 m. Max. draft 14.0 m. Distance bow to manifold 99.0 m.

Norsk Hydro Terminal: Max. LOA 100 m. Depth 9.5 m.

HEALTH: No special Pratique necessary. If any disease or fever suspected on board, doctor must be called on arrival. Pratique automatically granted when entering from another port in Sweden.

RADIO: Gothenburg radio.

VHF: Pilot on Channel 16. Working on Channel 6.

TUGS: At present no tugs are stationed in Stenungsund but have to be ordered from Gothenburg at least 2 hours' steaming away.

Tugs are diesel driven, single screw, single rudder. Tugs are made fast after passing Vinterholmen at the North end of Hake Fjord and before passing through the narrows under the bridge. Tugs tow on the hook using ship's ropes. The larger tugs use two ship's ropes out of the same lead and care must be taken to equalise the load on the two lines before full load is taken.

The Pilot carries his own VHF set (having Channels 16, 13 and 12) and uses this to communicate with the tugs.

50,000 d.w.t. tankers use 3 tugs, 1 large tug forward, 1 large and 1 smaller tug aft.

MEDICAL: Doctors and dentists available at short notice. Hospitals situated at Uddevalla and Kungalv, ambulances at Stenungsund.

TANKERS: The Powerboard Terminal:

General: The Powerboard Jetty is a finger pier aligned East/West located on the East side of the Askero Fjord about 1 nautical mile North of the town of Stenungsund (Lat. 58° 05.3' N., Long. 11° 49.2' E.). It is shown on B.A. Chart 890. It is used for the import and export of fuel oil for the power station located 0.5 miles away and for the import of products, solvents and LPG for oil and petrochemical companies.

Cautionary Advice: Currents in Askero Fjorden are unpredictable both in speed and direction but generally run across the direction of the finger pier. The fendering of the outer corners of the pier is of low energy absorption characteristics and heavy landings must be avoided. Anchors should be manned and ready for letting go.

Berthing Procedures: On proceeding up Askero Fjorden past Havden the ship is swung to starboard with the assistance of tugs and lined up for the pier. Anchors are sometimes used to help steady the bow on the correct heading, and as assistance in bringing the ship up.

Ocean-going ships berth on the North side of the pier and are, therefore, starboard side to berth. When in position, most ships' sterns protrude beyond the end of the pier by as much as one-third of their length, therefore, maximum attention must be paid to the stern moorings. Because moorings placed on the buoy on the starboard quarter or on the bollards on the South shore prevent ships from using the South side of the pier the terminal will not, as a rule, put moorings to these points. However, in periods of unsettled weather, particularly if winds are from the S.W., Masters of the larger ships should insist on stern moorings being sent to the buoy and South shore. It should be borne in mind that tugs are not readily available at Stenungsund. Moorings are taken ashore initially by boat and then by heaving line. The forward spring line is usually first line ashore. No shore moorings are provided.

Gangway: Ship's gangway is used, there is ample room on the jetty to land the gangway abaft the manifold. Note that when ship is light the normal ship's gangway will become very steep (over 50°) and special safety precautions to prevent accidents to personnel will be necessary.

Fendering: The concrete strong points of the pier are protected by tubular rubber 600 mm. diameter erected horizontally. The concrete outer corners are well protected with low friction fenders.

Cargo Connections and Handling: HFO, Heating Oil, Naphtha and Mogas are handled. Ullages and temperatures are taken jointly with shore representative upon arrival alongside.

Starboard manifold should be prepared for 10 in. hoses, 2 or 3 flexible hoses with 10 in. ASA bolted flanges are usually connected. Starboard derrick and a 4 ton shore crane are used for hose connection.

Concurrent loading and discharging are not allowed. Maximum back pressure is 10 kg./sq.cm.

Naphtha receiving capacity is maximum 3,000 cu.m.p.h. Normal discharge rate is about 1,800 cu.m.p.h.

Deballasting Facilities: The terminal has limited high flash ballast reception facilities, about 2,400 cu.m. Discharge rate is about 500 cu.m.p.h.

Clean oil-free ballast may be discharged overboard but it is the ship's responsibility to ensure that the ballast water is oil-free and very heavy penalties are imposed for oil pollution.

Passing Traffic, Weather, Tide, etc.: There are no unusual problems except for strong S.W. winds when it is important that breast moorings are run to the starboard quarter buoy and to the South shore.

Special Regulations: No small craft are allowed alongside ship while at jetty. No bunkering during loading and discharging.

Oil Pollution Safeguards: Floating oil booms – partly fixed and partly portable are available to surround the ship and jetty. Mechanical suction equipment is available.

Fire Fighting Equipment: Remote-controlled foam-guns and water monitors are available at the berth.

Fresh Water: Good quality fresh water is available ex-jetty by hose, rate 25 t.p.h.

Additional Information: The berth on the South side of the Powerboard finger pier also handles HFO, heating oil, naphtha and mogas but is mainly used for loading/discharging LPG.

Statoil Terminal, Havden: *General:* Statoil's Havden terminal berth is located on the North side of the Havden peninsula on the East side of Askero Fjorden (Lat. 58° 05' N., Long. 11° 48.5' E.). It is a marginal type berth with a breasting face about 60 m. long. It is used for the discharge of naphtha and LPG.

Cautionary Advice: See "Powerboard Terminal".

Telegraph cables (shown on the chart) run out from the shore close Northwards of the berth and anchors should not be used. In addition, the dredged area tapers quite sharply towards the East end of the berth and use of an anchor could result in the ship "sitting" on the anchor or its cable.

Berthing Procedures: On arriving off Havden the ship is swung to starboard with the assistance of tugs and steamed slowly to the berth. Ships always berth starboard side to berth. Moorings are taken ashore by motor boat, the forward spring is usually the first line ashore. The stern of the ship is not well sheltered from the prevailing S.W. winds and special attention must be paid to putting out good stern moorings. It must be remembered that tugs are not readily available in Stenungsund. No shore moorings are provided.

Gangway: Ship's gangway used, ample room on the jetty to land the gangway aft of the cargo manifold. Note that, when ship is light, the normal ship's gangway will become very steep (over 50°) and special precautions to prevent accidents to personnel will be necessary.

Fendering: Each of the 3 concrete strong points is fendered by truck tyres around a rubber core slung horizontally. Care should be taken not to land initially between the strong points.

Cargo Connection and Handling: Only naphtha and LPG are handled at this berth. No bunkers can be provided. 2×10 in. fully counterbalanced hard arms of Chicksan manufacture are provided. Each has 10 in. ASA bolted flanges.

Ullages and temperatures are taken together with shore representative upon arrival alongside.

Starboard manifold should be prepared to accept 2×10 in. hard arms. If ship's manifold has large overhang outside the support, this should be jacked up before connection of arms. Stays, derricks, etc., in vicinity of starboard manifold should be removed. There are no facilities for receipt of dirty ballast at the terminal.

Oil Pollution Safeguards: Floating oil booms, partly fixed, partly portable are available to surround ship and jetty. Mechanical suction equipment is available.

Fire Fighting Equipment: The jetty is equipped with a fire water and a foam line and portable monitors.

Fresh Water: Good quality fresh water is available ex-jetty by hose, rate 25 t.p.h.

Norsk Hydro Terminal: Max. LOA 100 m. Depth 9.5 m.

FUEL: Only available by barge from other places (i.e. Gothenburg). Bunkering only during daylight. Can be ordered at short notice.

FIRE PRECAUTIONS: Normal precautions.

CONSULS: At Gothenburg.

REPAIRS: Minor repairs can be made locally, large repairs by labour from Gothenburg shipyards. Gas-freeing alongside with Port Captain's approval only. Repairs alongside with Port Captain's approval only.

SURVEYORS: D & D Marine Consult, Upplandsgatan 25, 11360 Stockholm. Tel: 08-34 1590.

GANGWAY/DECK WATCHMEN: Watchmen from ashore necessary when telephone connected.

CUSTOMS ALLOWANCES: 200 cigarettes. 1 bottle of spirits.

REPATRIATION: All facilities exist.

AIRPORT: Gothenburg 50 km. away. Regular airlines.

TIME: GMT plus 1 hour.

HOLIDAYS: Tankers load and discharge all year round.

TELEPHONES: Connected on board if required. Watchmen attend calls. Fireman and alarm on jetty during whole operation.

SHORE LEAVE: Permitted. Distance to Stenungsund 1 km., Uddevalla 40 km. or Gothenburg 50 km. by bus, train or taxi. Shore passes issued at the gate.

IDENTIFICATION CARDS: The gate at the Powerboard Terminal is TV-guarded. Each crew member must carry a Passing Permission allowing passage through the gate. Required number of permissions will be handed over to the Master by the Agent on ship's arrival. Passing Permission at Statoil Terminal, Havden, is not required.

GARBAGE DISPOSAL: Container available for garbage, free of charge.

WASTE OIL DISPOSAL: Reception facilities for engine slops only up to a maximum of 15 cu.m. at a time.

SEAMAN'S CLUBS: None.

CURRENCY: Swedish Kronor (SEK).

SHIPMASTER'S REPORT: January 1989 (Updated 1990).

Pilotage: On approaching the port, call 'Marstrand Pilot' on VHF Channel 11. The pilot usually boards between Hatteberget Light Tower and Astol Island to the N.W., from a fast launch painted orange. The water in the approaches is deep. The Racon on Hatteberget Light is usually visible when passing the Skaw. It takes approximately 1.0 hours – 1.5 hours to reach the Statoil berths.

Anchorage: There are no safe anchorages outside the fjord. If vessel is awaiting a berth it is usual to anchor to the West of the berths. An alternative anchorage is in the area 6 miles North of Algon Island, which is within the pilotage waters.

Max. Size: Power Board Terminal: On the North side of the jetty the maximum draft is 12.6 m. and on the South side 10.6 m.

Statoil Terminal: This berth is to be dredged to 14.0 m.

Tugs: There are no tugs stationed at Stenungsund. If tugs are required they have to be ordered from Gothenburg, which is 2.5 hours away by sea. 5 hours notice is required. Tugs normally join vessel at the 'S' bend at Tjornbron Bridge. Vessels of 32,000 cu.m. capacity require 2 tugs for berthing and one for unberthing.

Berths: Power Board Terminal: Lat. 58° 05.3' N., Long. 11° 49.2' E.

The finger pier is located on the East side of Askero Fjord and is aligned in an East/West direction. The pier is 1 mile North o Stenungsund.

The jetty is used for the import of oil for the power station and for import of LPG and ethylene for oil companies.

Approach to the berth is difficult in strong S./S.W. winds.

Vessels berth head-in, starboard side alongside, on the North side o the jetty and port side alongside on the South side. The offshore ancho is often used when berthing.

On the North Berth, vessels should be well secured at the stern whe S./S.W. winds are blowing and well secured at the South Berth whe N.W./N. winds are blowing.

Statoil Terminal: The berth is located on the North side of Havde Peninsula, to the West of Stenungsund. Vessels are swung to starboa and then pushed slowly into the berth. The stern overhangs whe alongside, so good moorings are required aft when S./S.W. winds a blowing. The leads for the after moorings are poor and the leads for th headlines are long.

Cargo: Power Board Terminal: Ethylene is handled on both sides of th jetty, dependent on the receiver. Neste use the North side and Stat use the South side. The North side berth is equipped with an 8 i hydraulic arm (150 ASA) with clamps and automatic disconne mechanism. The South side berth is also equipped with an 8 i (150 ASA) hydraulic arm, but without clamps. Shore supply th necessary reducers. No VRL connected.

Initially small amounts of cargo are pumped ashore from each ta in turn, so that samples can be taken on the jetty. Analysis takes abo 2 hours. The cargo temperature is to be at least −100°C. and usua colder temperatures required. If the temperatures are correct, the sho facility can usually handle rates up to 500 cu.m.p.h. on the North si and 200 cu.m.p.h. on the South side. Hot gas required on completio It usually takes about 20 minutes to clear line, so about 40 mb. is requi in the tanks. The jetty has a steam/hot water line for de-icing. Loc surveyor used.

Statoil Terminal: LPG handled at this berth. Discharge is by 10 i (150 ASA) non-hydraulic arm. Shore supply the necessary reducer, VRL. Samples are taken prior to arm being connected. Analysis ta 3 hours. Once lines are cool, the rate can be increased to maximu Cargo goes into cavern storage so any rate can be accepted witho difficulty. There was very little contact with the shore once discha had commenced.

A surveyor from the terminal and SGS are available for figu Terminal surveyor will use density from sample for calculations.

General: Power Board Terminal: There is an electric crane with 4 t SWL on the North side. No trucks allowed on jetty. Trolleys availa for the 300 m. haul from the roadway.

Statoil Terminal: Stores can be manhandled from the barrier which is approximately 300 m. from the ship. A hand driven shore crane can be used for loading stores. There is a telephone in the cabin on the jetty. Fresh water is available. All medical facilities are available locally. Stores are expensive.

AUTHORITY: Vattenfall, S-44487 Stenungsund, Sweden. *Tel:* 46-303-66141. *FAX:* 46-303-66161. *Cables:* Kraftverket. *Contact:* Ove Kristoffersson, Harbour Master.

Statoil Petrokemi AB, S-44481 Stenungsund. *Tel:* 0303-87000. *FAX:* 0303-87444. *Contact:* Morgan Hermansson or Anders Ranswall, General Managers.

Norsk Hydroplast AB, S-44483 Stenungsund. *Tel:* 0303-71560. *Telex:* 21206. *FAX:* 0303-84756. *Contact:* Stig Grunden, General Manager.

STOCKHOLM: 59.19 N. 18.03 E. (See Plan)

DOCUMENTS:

(a) Crew List: Normally 2 copies; for oil harbour at Loudden and Free Port, 3 copies.

(b) Passenger List: Regular passenger services 2 copies; cruise ships (lists for cruise ships must be sent in advance to Agent for forwarding to Immigration Authorities), 2 copies.

(c) Customs Documents: Arrival report (form can be obtained on arrival), 4 copies. Crew Effects Declaration, 2 copies. Ship's Stores Declaration, 2 copies.

(d) Quarantine Certificate or Bill of Health: Derat Certificate not more than 6 months old to be shown. *Note:* Additional quarantine regulations may be imposed in special circumstances.

(e) Manifest: 3 copies.

(f) Bills of Lading: 1 copy of each. Liners may be subject to other regulations with regard to *(e)* and *(f)* above.

(g) Ship's Documents: Tonnage Certificate. Certificate of Nationality.

PILOTAGE: *(Sweden General).* Applications for licensed Pilots should be made at least 5 hours before pilotage is due to commence. When making application specify name of vessel, tonnage, draft and destination. Also give estimated time for taking Pilot on board and route. If this procedure not followed, the Maritime Service cannot guarantee to supply a Pilot without considerable delay to vessel.

Preferable make application by telephone, or by radio via a coastal station or by some other method direct to Pilot Station nearest point where pilotage is to begin. Also possible request Pilot by VHF telephone to any Maritime Service Pilot Station, Pilot waiting point or lighthouse which is equipped with VHF.

The Maritime Service's network of permanent VHF telephone stations has been extended to give almost complete coverage of all Pilot Stations and waiting points and is also operative for a number of lighthouses. The radio stations can operate on different Channels and are equipped for frequency modulation. During hours when Pilot Stations are open, a constant watch is kept on frequency 156.80 MHz (Channel 16). This frequency should be used for all signals and replies – and for distress traffic. Outside these hours, normal traffic transmissions, i.e. applications for Pilots, etc. should be made on frequency of 156.65 MHz (Channel 13) or on reserve operating frequency of 156.60 MHz (Channel 12).

When making VHF telephone call, the type of call signal that should be sent is "Lotsarna (or Pilot Station) plus the name of the Pilot Station or the pilotage attendance".

	Soderhamn/ Simpnas	*Sandhamn*	*Landsort*
Cable address	Kapellskars Pilot Station	Stockholm Pilot Station	Nynashamn Pilot Station

(c) Depth	33 – 38 fathoms	11 – 22 fathoms	11 – 16 fathoms

RESTRICTIONS: Very large passenger vessels and fully-loaded tankers of approx. 15,000 d.w.t. or over not allowed pass through Skerries during darkness.

Ships with gross tonnage exceeding 300 tons must proceed only on an Easterly course in Lindalssundet. Ships with gross tonnage exceeding 300 tons must not proceed through Kodjupet and Sandhamnssundet (between Sandon and Korso).

Ships with a gross tonnage exceeding 300 tons, not using a Pilot, must be equipped with VHF telephone which must be continuously watched on Channel 16 and 9.

A vessel reporting system has been established covering the entrances to the Port of Stockholm. Vessels over 300 g.r.t. report to Stockholm Pilot Station ("Lotsarna Stockholm") when passing way points. Reports to be given by VHF Channel 73.

Tankships with gross tonnage exceeding 800 tons carrying crude oil products, mineral oil and certain chemicals must have licensed Pilot in the passages Arholma-Stockholm; Soderarm-Stockholm; Sandhamn-Stockholm; Landsort-Stockholm; Landsort-Nynashamn; Landsort-Sodertalje and in the Lake of Malaren.

MAX. SIZE:

Max. Dimensions Passenger – or Dry Cargo Ships:

DAYLIGHT

	LOA (m.)	*Beam (m.)*	*g.r.t.*	*Draft (m.)*
Sandhamn	245.0	35.0	43,000	11.0
Landsort	200.0	22.0	18,000	10.0
Simpnas/Soderarm	245.0	35.0	18,000	8.0
Gustavsberg	60.0	9.5	—	4.2

Ships larger than 30,000 g.r.t. or longer than 200 m. to be assisted by 2 Pilots and to have assistance of tugs through the Archipelago.

DARKNESS

	LOA (m.)	*Beam (m.)*	*g.r.t.*	*Draft (m.)*
Sandhamn	175.0	26.0	18,000	9.0
Landsort	175.0	26.0	13,000	9.0
Simpnas/Soderarm	175.0	26.0	13,000	7.0

Max. Dimensions Tankers:

DAYLIGHT AND VISIBILITY EXCEEDING 1 NAUTICAL MILE

	LOA (m.)	*Beam (m.)*	*d.w.t.*	*Draft (m.)*
Sandhamn	200.0	32.0	35,000	11.0
Landsort	175.0	26.0	15,000	10.0
Simpnas/Soderarm	175.0	28.0	15,000	8.0

Ships exceeding 22,000 g.r.t. to have 2 Pilots onboard. Ships of this size are normally not handled in winds stronger than 15 m./s.

DARKNESS OR POOR VISIBILITY (LESS THAN 1 NAUTICAL MILE)

	LOA (m.)	*Beam (m.)*	*d.w.t.*	*Draft (m.)*
Sandhamn	175.0	26.0	15,000	9.0

Simpnas/Soderarm	145.0	19.0	10,000 (13,000 double bottom)	7.0

Tankers:

Tanker Discharge Quay	*Max. safe draft*	*Available Quay length*
Bergs Oil Harbour	12.4 m.	230 m.
Kvarnholmen	9.4 m. – 10.8 m.	183 m. – 230 m.
Loudden	8.2 m. – 11.0 m.	190 m. – 230 m.
Vartan	7.4 m. – 10.4 m.	190 m. – 230 m.

HEALTH: Vessels arriving from ports outside Europe must for Inward Clearance provide Customs Office with written Declaration of Freedom from Infection. Further instructions will be issued by Customs Office when such a Declaration cannot be given.

RADIO: Stockholm Radio, call sign SDJ.

RADAR/VHF: All 3 Pilot Stations have radar for internal use. No harbour radar service. VHF Channels 16 and 12. Also see "Restrictions".

TUGS: Very large vessels may be met by tugs by special arrangement at pilot boarding point. Tugs available to special order to assist with berthing; they rendezvous usually near berth.

Rates: According to fixed tariff.

BERTHING: See Tables on Page 2042 .

BRIDGES:

HOURS FOR OPENING FOR MOVABLE ROAD BRIDGES OVER HAMMARBY SEALANE

Movable parts of road bridges over sealane of Hammarby opened on request for vessel unable freely to pass under the bridges, all through the year at regular hours.

STEVEDORES: Stevedores available from Stockholms Hamn AB. Tel: 08/6702600. Working hours 0700 – 0900, 0930 – 1100, 1115 – 1330 and 1400 – 1600. Stevedores required for 0700 hrs. must be booked previous day.

MEDICAL: Full hospital facilities available without prior notice. Dentists available during normal working hours.

TANKERS:

Quay	*No. of Berths*	*Max. d.w.t.*	*Depth alongside (ft. in.)*	*Diameter of Discharge Pipelines (in.)*
Bergs (Statoil)	1	65,000	43 00	12 – 20
Kvarnholmen	2	30 – 65,000	33 00 – 39 04	8 – 14
Loudden (Municipal)	5	25 – 60,000	28 06 – 39 00	6 – 12
Vartan (Statoil/Shell)	3	20 – 60,000	24 08 – 36 00	8 – 10

DENSITY: Salt content of 0.5%. No variations

GANGWAY/DECK WATCHMEN: Not essential, but recommended for large tankers.

OPENING/CLOSING HATCHES: If opened and closed by stevedores, subject to extra fee.

SODERHAMN: (includes Stugsund, Langror Oilberth, Sandarne Factory Berth and Orrskar Woodchip Berth.) 61.18 N. 17.05 E. (See Plan)

DOCUMENTS:
2 Crew Lists.
3 Bills of Lading.
3 Manifests.
2 Crew Effects Declarations.
2 Ship's Stores Declarations.
Tonnage Certificate.
Certificate of Nationality.
Ship's Register.

PILOTAGE: Pilot must have 5 hours' notice. Telegraphic address "Soderhamn Pilot Station", Ljusne. VHF Channel 16 for calling pilot boat and Pilot Station and 13. Pilot boat is orange. International signals to be used. Vessels can normally receive Pilot between Hallgrund and Storjungfrun. In case of bad weather or ice, Master consults Pilot for advice (Also see "Stockholm").

ANCHORAGES: Lilljungfru Anchorage S.W. Lilljungfrun, where depths are 15 m. – 20 m., is W. or S.W. of Norrutharet. Branthalls Anchorage W. Branthall Island, depths 10 m. – 15 m.

HEALTH: No special action except for suspected disease. In case of disease contact Agent for information.

RADIO: Stockholm Radio. Within reach, Master may call Soderhamn Port Radio. Tug station is Stugsund. Tug fitted VHF, Channels 16,13, 12.

There is a radar station at Soderhamn. Pilot station, Ljusne, and the pilot boats are fitted with radar.

MAX. SIZE: Langror Oil Berth. Breadth of entrance fairway 55 m. – 60 m. and depth 8.3 m. at mean level (M.L.). Depth according to M.L. of 1987. Max. ship length about 170 m. at the quay.

Orrskar: Woodchip Terminal, breadth of entrance fairway 110 m., depth 12.8 m. M.L. New quay for general cargo, depth 10.45 m. M.L.

Sandarne: Breadth 30 m., depth 7.0 m. M.L. breadth 55 m. – 60 m. in unlit fairway.

Stugsund: Breadth 30 m., depth 6.0 m. M.L.

Soderhamn: Breadth 10 m. – 15 m., depth 3.5 m. M.L.

Depth varies about 1 ft. below and 1 ft. above M.L. Breadth given at narrowest point in fairway.

TUGS: Normally meet large vessels at Otterhallans Lighthouse, Blomman Lightbuoy and others off quays on request. Ship's lines to be used.

BERTHING: Boatmen can be ordered by Pilots or Agents. Large ships berth oil berth only in daylight because channel not lit.

CRANES: One electric crane to lift 10 tons in Stugsund. In other berths mobile cranes can be hired.

STEVEDORES: Gangs to be ordered by Agent usually at 1500 hrs. for starting next morning at 0700 hrs.

MEDICAL: Medical attendant available day and night.

TANKERS: 6 in. or 8 in. connections. Only 1 berth and max. depth at quay 8.3 m.

DENSITY: Practically fresh water.

FRESH WATER: Available in all ports. Delivered through pipelines on wharf. Rate: 10 t.p.h.

FUEL: Any normally used grade on request to oil company with few hours' notice.

CONSULS: None.

REPAIRS: Minor plate-work and welding can be carried out.

SURVEYORS: A Surveyor is appointed at the Port.

GANGWAY/DECK WATCHMEN: Watchmen available.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: Traffic permission (not necessary for ports within the Custom District boundaries), Bill of Measurement, Swedish Sailor's Roll (only Swedish ships), Foreign Nationals Crew Passports, Derat Certificate (6 month), Certificate of Health.

CUSTOMS ALLOWANCES: (Tobacco), out of bond, 200 cigarettes or 250 gm. tobacco. (Wine/Spirits), out of bond, 1 bottle of spirits and wine, maximum 1 litre or 2 bottles of wine.

CARGO GEAR: Valid cargo gear certificates.

REPATRIATION: Facilities exist for effecting crew changes.

AIRPORT: Nearest international airport Stockholm.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: No work on official holidays, but may be possible on special request. New Year's Day (1st January); Twelfth Day (6th January); Good Friday; Easter Sunday and Easter Monday; 1st May; Whit Sunday and Whit Monday; Midsummer Day; All Saints' Day; 25th December and 26th December; New Year's Eve; Easter Eve; Whitsun Eve; Midsummer Eve; Christmas Eve.

POLICE/AMBULANCE/FIRE: Police 90000 or 0270/72300; Ambulance 90000; and Fire 90000 or 0270/75000.

TELEPHONES: Quay telephones can be placed on board at Orrskar quay. 2 telephones.

SERVICES: Facilities for discharge of tank-washings max. 20 tons. Tank-cleaning and facilities for discharge of tank-washings of great extent are Stockholm and Sundsvall. Compass adjusting in Stugsund Berth.

BANKS: Skandinaviska Enskilda Banken, Box 4, Kopmangatan 1, 826 21 Soderhamn.

STORING: See "Prelims".
1. Yes.
2. Yes.
3. Yes.
4. Yes.
5. Only bonded stores.
6. Stevedores, on request.

IDENTIFICATION CARDS: Not needed.

GARBAGE DISPOSAL: Container available on wharf. No charges.

WASTE OIL DISPOSAL: Engine room slops only. Tanker trucks capacity 8 cu.m. available at all berths. The service can be ordered through Soderhamns Hamn, Tel: 0270-54640, 24 hours before arrival. Collection only between 0700 – 1530 hrs.

SEAMAN'S CLUBS: Only local facilities available, e.g. shop, international telephone, postage, etc.

CURRENCY: Swedish Kronor (SEK).

REGULATIONS: Port Regulations available from Agent or Port Office.

DELAYS: Fog, ice and bad weather may delay berthing. Rain and snow can delay loading and discharging of dry cargo.

GENERAL: There is a VHF port radio at the Port Office, Stugsund. Working hours 0730 – 1630 hrs. Channel 16 for call and Channel 12 for working. During the ice-breaking season the tug may be out even at night. Tug has same channels. Soderhamn Customs District includes all berths mentioned above.

AUTHORITY: Soderhamns Hamn, Strandgatan 4, S-82660 Soderhamn, Sweden. *Tel:* 0270-54640, 54580. *FAX:* 0270-55190. *Contact:* Rutger Hagberg, Harbour Master.

SODERTALJE: 59.12 N. 17.38 E. (See Plan)

PORT LIMITS: Approximately 2 nautical miles from entrance.

DOCUMENTS:
Crew List.
Cargo Manifest.
List of Ports of Call.

PILOTAGE: Pilot to be ordered at least 5 hours before arrival at Landsort Pilot Station on VHF Channel 13. Distance from Landsort to Sodertalje is 34 nautical miles.

Pilotage compulsory for all vessels carrying petroleum, gas and chemicals.

ANCHORAGES: Pilots direct vessels to suitable anchorages.

RESTRICTIONS: Cables over fairway with vertical clearance of 42 m. at MLW and railway bridge 40.5 m. (Between South Harbour and Oi Harbour).

MAX. SIZE:

	Length	*Beam*	*Draft*	*Airdraft*
Uthamnen (Outer Harbour)	200 m.	32 m.	8 m.	40.5 m.
Sydhamnen (South Harbour)	200 m.	32 m.	9 m.	42.0 m.
Igelstahamnen (Igelsta Harbour)	200 m.	32 m.	9 m.	40.5 m.
Oljehamnen (Oil Harbour)	200 m.	32 m.	9 m.	40.5 m.

HEALTH: Derat Certificate required.

RADIO: Stockholm Radio.

VHF: Channel 13 calling "Pilot Sodertalje" or "Malarbron" for ordering of boatmen 1 hour before arrival.

RADAR: No port radar service.

TUGS: Available through local Agents for vessels over 10,000 d.w.t.

BERTHING: *Sydhamnen:*
Ro/Ro Berth No. 9, length 70 m., depth 6.4 m. MW.
Ro/Ro Berth No. 10, length 130 m., depth 7.9 m. MW.
Ro/Ro Berth No. 11, length 130 m., depth 7.9 m. MW.
Ro/Ro Berth No. 12, length 160 m., depth 9.8 m. MW.

Oljehamnen: Jetty No. 6, depth 10.1 m. Jetty No. 7/8, depth 6.9 m.

Uthamnen: Lo/Lo berth (general cargo), length 300 m., depth 5.9 m.-8 m. Silo Quay, length 155 m., depth 8.4 m.

Igelstahamnen: Coal and oil discharge berth, length 150 m., dept 10.5 m. Coal discharged using shore equipment.

CRANES: *Uthamnen:* 3 cranes with capacity up to 25 tons.

Sydhamnen: Mobile cranes up to 47 tons with auto container spreade forklifts up to 45 tons.

Igelstahamnen: Shore equipment for coal discharge.

BULK HANDLING FACILITIES:

Uthamnen: Salt in bulk.

Siloquay: Grain loading.

Igelstahamnen: Coal discharge, oil discharge.

Oljehamnen: Oil petroleum products and liquid chemicals.

SPECIALISED CARGO HANDLING FACILITIES: 24,000 sq.m. for co and warm storage available.

STEVEDORES: Ordinary working hours: 0700 – 1130 hrs., 1200 - 1600 hrs. on weekdays. Stevedores can be ordered by telephonin 08-55023750 or by telex No. 10273 Sodstuv.

TANKERS: See "Berthing".

FRESH WATER: Available at all berths.

FUEL: Available at all berths.

REPAIRS: Can be undertaken at all berths.

DRY DOCKS: Nearest at Stockholm.

SURVEYORS: Cargo surveyors are available from Stockholm.

GANGWAY/DECK WATCHMEN: Available.

HATCHES: Opening/closing carried out by stevedores.

AIRPORT: Nearest at Stockholm, 60 km. distant.

TIME: GMT plus 1 hour. Summertime GMT plus 2 hours.

HOLIDAYS: Cargo work can be carried out by special agreement o holidays.

POLICE/AMBULANCE/FIRE: Dial 90000 and request necess service.

TELEPHONES: Can be placed on board vessels.

BANKS: Only Swedish banks are represented.

STORING: See "Prelims".
1. By truck.
2. Vessels can store while loading/discharging.
4. Forklifts available.
6. Yes.

GARBAGE DISPOSAL: Garbage containers in each harbour. Cont Port Authority Tel: 08-55023750.

WASTE OIL DISPOSAL: Collection service of waste oil through harbour via tanker truck. Contact Port Authority Tel: 08-55023750.

SEAMAN'S CLUBS: The Seamen's Club is situated in Stockho 30 km from the port. Contact Tel: 08-6632421.

CURRENCY: Swedish Kronor (SEK). U.S.$ 1.00 = SEK 6.80 (28.2

SHORE LEAVE: Permitted.

AUTHORITY: Port of Sodertalje, Box 2016, S-15102 Soder Sweden. *Tel:* 08-55023759. *Telex:* 10273 Sodstuv. *FAX:* 08-55031 *Contact:* Ingvar Wiren, Managing Director.

SOLVESBORG: 56.03 N. 14.35 E. (See Plan)

DOCUMENTS: See "Stockholm".

PILOTAGE: Pilot station at Ahus, Tel: 044/240027, needs 5 hours' notice. Pilot Station (Karlshamn): Tel: 0454-14102. Pilot station and pilot boat can be ordered by VHF Channel 16, working on Channel 13. Harbour office in Solvesborg can be called on same frequency. (Also see "Stockholm".)

ANCHORAGES: Roadstead to South of harbour 25 ft. deep with good holding ground.

MAX. SIZE: Depth in outer harbour 8.2 m. (27 ft.) and in inner harbour 7.5 m. (25 ft.) Recommended for ships to have 1 ft. 6 in. of water under keel. Max. length 170 m. (558 ft.). Breadth 30 m. (98 ft.). Draft 7.7 m. (25 ft.) for vessel entering harbour. Largest ships to enter harbour were 26,000 tons oil tanker with load of 16,000 tons and 30,000 ton dry cargo ship loading 5,000 tons of pulp.

HEALTH: See "Stockholm".

Animals: Private dogs and cats etc., not allowed ashore without quarantine.

RADIO: Stockholm Radio and Gothenburg Radio.

VHF: Harbour Office can be reached by VHF, Channel 16. Working frequency Channel 14.

Tug "Hafnia" – Channels 6, 13, 14 and 16.

Workboat "Portia" – Channels 6, 13 and 16.

TUGS: 1 tug available, 1×665 h.p. (ice-breaking).

BERTHING:

Location	*Length* (m.)	*Depth* (m.)	*No. of cranes (max. load)* tons
Inner Harbour:			
Western Quay, Southern Section	225	7.0	1 (5)
Western Quay, Northern Section	129	6.5	1 (6)
Northern Quay	85	5.0	Mobile (35)
Blekinge Quay	53	4.0	—
Other Quays	190	3.0	Mobile (35)
Outer Harbour:			
Ro-Ro ramp	20	6.0	—
Side-deck at the Ro-Ro ramp	45	6.0	Mobile (35)
Outer Harbour Quay	200	8.2	1 (26)
Oil Jetty	25 + Dolphins	8.2	— 1 (40)
(The Ro-Ro berth, quay and oil landing-stage are situated on a 500 m. line).			
Private Harbours:			
Quay	165	6.0	1 (15)
New Quay	115	6.0	1 (15)

Within the port area a total of 25 straddle, fork and clamptrucks, as well as 2 front loaders, the biggest fork truck having a lifting capacity of 25 tons.

A storage space of 21,000 sq.m. inside warehouses, and an open air space of 140,000 sq.m.

STEVEDORES: Require notice before 1500 hrs. if loading/discharging shall start at 0730 hrs. following morning, or notice before 1000 hrs. if loading/discharging shall start 1300 hrs. the same day.

Stevedoring Company: Solvesborg Stuveri and Hamn AB. Tel: 0456-10119, 12295.

TANKERS: 3 Shore-lines for oil products from oil jetty to depots.

1. 250 mm. for Bunker C (2nd fuel).
2. 200 mm. for paraffin oil.
3. 200 mm. for petrol. For discharge coasters use ship's equipment.

Larger ships discharging Bunker C oil use harbour's 8 in. rubber hose.

FRESH WATER: Available.

FUEL: Ordered from oil companies by ship's Agents.

CONSULS: Royal Norwegian Vice-Consulate, Stortorget 10, Box 115, S-29401 Solvesborg. Tel: 0456-150 20.

REPAIRS: Carried out by local workshops.

DRY DOCKS: Facilities available.

GANGWAY/DECK WATCHMEN: Watchmen normally not needed. Can be ordered by ship's Agents.

OPENING/CLOSING HATCHES: Normally opened/closed by crew.

CERTIFICATES: See "Stockholm".

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes/week per head. Wine/spirit: normally 1 litre/week.

Customs House, Tel: 12000.

REPATRIATION: Possible.

AIRPORT: 50 km. to Kristianstad Airport and 60 km. to Ronneby Airport. Served by regular inland airlines.

TIME: Local time is GMT plus 1 hour. Summertime GMT plus 2 hours.

HOLIDAYS: See "Stockholm".

POLICE/AMBULANCE/FIRE: Dial 90 000 and ask for Police, Ambulance or Fire Department.

TELEPHONES: Telephones available in Agent's offices at quay and telephone boxes.

IDENTIFICATION CARDS: Not needed.

DELAYS: Normally no delays.

GARBAGE DISPOSAL: Blue, closed, containers are placed in harbour area. Notify harbour authority, if used.

WASTE OIL DISPOSAL: Tanker trucks of 12 cu.m. available at any berth.

SEAMAN'S CLUBS: Telephone boxes and post office in city centre. No other services for seamen.

CURRENCY: Swedish Kronor (SEK).

AUTHORITY: Solvesborgs Stuveri & Hamn AB, Box 60, S-294 22 Solvesborg, Sweden. *Tel:* 46-456-10119, 12262. *FAX:* 46-456-12761. *Contact:* Kjell Andersson, Managing Director.

STENUNGSUND: 58.04 N. 11.49 E. (See Plan)

LOCATION: Stenungsund is located on the East side of Askero Fjorden about 23 miles North of Gothenburg. There are 3 terminals.

1. The Power Board Terminal.
2. The Borealis Havden Terminal.
3. The Norsk Hydro Terminal.

The terminals are located about 20 miles from the Hatteberget Light Tower (Lat. 57° 52' N., Long. 11° 28' E.) and are reached via Marstrands Fjorden and Hake Fjorden.

DOCUMENTS:

3 Crew Lists.

2 Passenger Lists.

1 Tobacco and/or Stores List.

1 Manifest.

1 List of Animals on Board (if any).

Access to the usual ship's papers (measurement, register, certificate, etc.).

If away from Sweden more than 15 days: Bill of Health.

APPROACHES: When approaching from the West, ships must keep North of the area dangerous due to mines extending to Lat. 57° 47' N., Long. 11° 03' E.

Currents in this area are unpredictable and are much influenced by the wind. Ships have reported experiencing a change in direction of current on approaching the Hatteberget Light Tower, for example, South-going outside Hatteberget, North-going inside Hatteberget. Currents of 1 to 3 knots have been experienced.

Seabuoy-Berth: For larger ships bound for Stenungsund the recommended track is Algo Fjorden shown on charts as passing between N. Meholm and S. Meholm is not always followed by Pilots, some preferring to pass South of the Hunden Shoal and S. Meholm. Great caution is needed in taking this Southerly route as there are unmarked dangers. During darkness or in poor visibility the Pilot's intentions should be fully discussed before entering Algo Fjorden.

The channel between Bratton, Kallon and Almon Islands at the North end of Hake Fjord and under the Tjornbron (bridge) between Kallon and Almon is in the form of an "S" bend and vision is obstructed. Traffic may be suddenly met with little warning, particularly as some ships do not carry Pilots, and there is no speed limit. Engines should be on standby, anchors ready and manned in this area.

PILOTAGE: The pilot boat is steel hulled, painted orange, and it will meet ships based on ETA and VHF contact. The Pilot boards at Hatteberget Light Tower. Pilots will not handle large vessels during darkness. Those ships must anchor and await daylight. ETA advice to Pilot to be sent to "Lotsarna Marstrand" via Goteborg Radio at least 5 hours before arrival giving ship's name, flag, draft, ETA Pilot Station and destination.

ANCHORAGES: While awaiting berth vessels anchor outside harbour N.W. of Powerboard Jetty. Safe anchorages everywhere, but fairway South of Galteron Lighthouse has to be avoided.

RESTRICTIONS: Max. draft in channel 13.0 m. Night navigation is decided by individual case.

Bridge height at Tjornbron is 43 m.

MAX. SIZE: *Powerboard Jetty:* Max. draft North side 12.30 m., South side 10.50 m.

Statoil Havden: Max. LOA 240 m. Max. draft 14.0 m. Distance bow to manifold 99.0 m.

Norsk Hydro Terminal: Max. LOA 100 m. Depth 9.5 m.

HEALTH: No special Pratique necessary. If any disease or fever suspected on board, doctor must be called on arrival. Pratique automatically granted when entering from another port in Sweden.

RADIO: Gothenburg radio.

VHF: Pilot on Channel 16. Working on Channel 6.

TUGS: At present no tugs are stationed in Stenungsund but have to be ordered from Gothenburg at least 2 hours' steaming away.

Tugs are diesel driven, single screw, single rudder. Tugs are made fast after passing Vinterholmen at the North end of Hake Fjord and before passing through the narrows under the bridge. Tugs tow on the hook using ship's ropes. The larger tugs use two ship's ropes out of the same lead and care must be taken to equalise the load on the two lines before full load is taken.

The Pilot carries his own VHF set (having Channels 16, 13 and 12) and uses this to communicate with the tugs.

50,000 d.w.t. tankers use 3 tugs, 1 large tug forward, 1 large and 1 smaller tug aft.

MEDICAL: Doctors and dentists available at short notice. Hospitals situated at Uddevalla and Kungalv, ambulances at Stenungsund.

TANKERS: The Powerboard Terminal:

General: The Powerboard Jetty is a finger pier aligned East/West located on the East side of the Askero Fjord about 1 nautical mile North of the town of Stenungsund (Lat. 58° 05.3' N., Long. 11° 49.2' E.). It is shown on B.A. Chart 890. It is used for the import and export of fuel oil for the power station located 0.5 miles away and for the import of products, solvents and LPG for oil and petrochemical companies.

Cautionary Advice: Currents in Askero Fjorden are unpredictable both in speed and direction but generally run across the direction of the finger pier. The fendering of the outer corners of the pier is of low energy absorption characteristics and heavy landings must be avoided. Anchors should be manned and ready for letting go.

Berthing Procedures: On proceeding up Askero Fjorden past Havden the ship is swung to starboard with the assistance of tugs and lined up for the pier. Anchors are sometimes used to help steady the bow on the correct heading, and as assistance in bringing the ship up.

Ocean-going ships berth on the North side of the pier and are, therefore, starboard side to berth. When in position, most ships' sterns protrude beyond the end of the pier by as much as one-third of their length, therefore, maximum attention must be paid to the stern moorings. Because moorings placed on the buoy on the starboard quarter or on the bollards on the South shore prevent ships from using the South side of the pier the terminal will not, as a rule, put moorings to these points. However, in periods of unsettled weather, particularly if winds are from the S.W., Masters of the larger ships should insist on stern moorings being sent to the buoy and South shore. It should be borne in mind that tugs are not readily available at Stenungsund. Moorings are taken ashore initially by boat and then by heaving line. The forward spring line is usually first line ashore. No shore moorings are provided.

Gangway: Ship's gangway is used, there is ample room on the jetty to land the gangway abaft the manifold. Note that when ship is light the normal ship's gangway will become very steep (over 50°) and special safety precautions to prevent accidents to personnel will be necessary.

Fendering: The concrete strong points of the pier are protected by tubular rubber 600 mm. diameter erected horizontally. The concrete outer corners are well protected with low friction fenders.

Cargo Connections and Handling: HFO, Heating Oil, Naphtha and Mogas are handled. Ullages and temperatures are taken jointly with shore representative upon arrival alongside.

Starboard manifold should be prepared for 10 in. hoses, 2 or 3 flexible hoses with 10 in. ASA bolted flanges are usually connected. Starboard derrick and a 4 ton shore crane are used for hose connection.

Concurrent loading and discharging are not allowed. Maximum back pressure is 10 kg./sq.cm.

Naphtha receiving capacity is maximum 3,000 cu.m.p.h. Normal discharge rate is about 1,800 cu.m.p.h.

Deballasting Facilities: The terminal has limited high flash ballast reception facilities, about 2,400 cu.m. Discharge rate is about 500 cu.m.p.h.

Clean oil-free ballast may be discharged overboard but it is the ship's responsibility to ensure that the ballast water is oil-free and very heavy penalties are imposed for oil pollution.

Passing Traffic, Weather, Tide, etc.: There are no unusual problems except for strong S.W. winds when it is important that breast moorings are run to the starboard quarter buoy and to the South shore.

Special Regulations: No small craft are allowed alongside ship while at jetty. No bunkering during loading and discharging.

Oil Pollution Safeguards: Floating oil booms – partly fixed and partly portable are available to surround the ship and jetty. Mechanical suction equipment is available.

Fire Fighting Equipment: Remote-controlled foam-guns and water monitors are available at the berth.

Fresh Water: Good quality fresh water is available ex-jetty by hose, rate 25 t.p.h.

Additional Information: The berth on the South side of the Powerboard finger pier also handles HFO, heating oil, naphtha and mogas but is mainly used for loading/discharging LPG.

Statoil Terminal, Havden: *General:* Statoil's Havden terminal berth is located on the North side of the Havden peninsula on the East side of Askero Fjorden (Lat. 58° 05' N., Long. 11° 48.5' E.). It is a marginal type berth with a breasting face about 60 m. long. It is used for the discharge of naphtha and LPG.

Cautionary Advice: See "Powerboard Terminal".

Telegraph cables (shown on the chart) run out from the shore close Northwards of the berth and anchors should not be used. In addition, the dredged area tapers quite sharply towards the East end of the berth and use of an anchor could result in the ship "sitting" on the anchor or its cable.

Berthing Procedures: On arriving off Havden the ship is swung to starboard with the assistance of tugs and steamed slowly to the berth. Ships always berth starboard side to berth. Moorings are taken ashore by motor boat, the forward spring is usually the first line ashore. The stern of the ship is not well sheltered from the prevailing S.W. winds and special attention must be paid to putting out good stern moorings. It must be remembered that tugs are not readily available in Stenungsund. No shore moorings are provided.

Gangway: Ship's gangway used, ample room on the jetty to land the gangway aft of the cargo manifold. Note that, when ship is light, the normal ship's gangway will become very steep (over 50°) and special precautions to prevent accidents to personnel will be necessary.

Fendering: Each of the 3 concrete strong points is fendered by truck tyres around a rubber core siung horizontally. Care should be taken not to land initially between the strong points.

Cargo Connection and Handling: Only naphtha and LPG are handled at this berth. No bunkers can be provided. 2×10 in. fully counterbalanced hard arms of Chicksan manufacture are provided. Each has 10 in. ASA bolted flanges.

Ullages and temperatures are taken together with shore representative upon arrival alongside.

Starboard manifold should be prepared to accept 2×10 in. hard arms. If ship's manifold has large overhang outside the support, this should be jacked up before connection of arms. Stays, derricks, etc., in vicinity of starboard manifold should be removed. There are no facilities for receipt of dirty ballast at the terminal.

Oil Pollution Safeguards: Floating oil booms, partly fixed, partly portable are available to surround ship and jetty. Mechanical suction equipment is available.

Fire Fighting Equipment: The jetty is equipped with a fire water and a foam line and portable monitors.

Fresh Water: Good quality fresh water is available ex-jetty by hose, rate 25 t.p.h.

Norsk Hydro Terminal: Max. LOA 100 m. Depth 9.5 m.

FUEL: Only available by barge from other places (i.e. Gothenburg). Bunkering only during daylight. Can be ordered at short notice.

FIRE PRECAUTIONS: Normal precautions.

CONSULS: At Gothenburg.

REPAIRS: Minor repairs can be made locally, large repairs by labour from Gothenburg shipyards. Gas-freeing alongside with Port Captain's approval only. Repairs alongside with Port Captain's approval only.

SURVEYORS: D & D Marine Consult, Upplandsgatan 25, 11360 Stockholm. Tel: 08-34 1590.

GANGWAY/DECK WATCHMEN: Watchmen from ashore necessary when telephone connected.

CUSTOMS ALLOWANCES: 200 cigarettes. 1 bottle of spirits.

REPATRIATION: All facilities exist.

AIRPORT: Gothenburg 50 km. away. Regular airlines.

TIME: GMT plus 1 hour.

HOLIDAYS: Tankers load and discharge all year round.

TELEPHONES: Connected on board if required. Watchmen attend calls. Fireman and alarm on jetty during whole operation.

SHORE LEAVE: Permitted. Distance to Stenungsund 1 km., Uddevalla 40 km. or Gothenburg 50 km. by bus, train or taxi. Shore passes issued at the gate.

IDENTIFICATION CARDS: The gate at the Powerboard Terminal is TV-guarded. Each crew member must carry a Passing Permission allowing passage through the gate. Required number of permissions will be handed over to the Master by the Agent on ship's arrival. Passing Permission at Statoil Terminal, Havden, is not required.

GARBAGE DISPOSAL: Container available for garbage, free of charge.

WASTE OIL DISPOSAL: Reception facilities for engine slops only up to a maximum of 15 cu.m. at a time.

SEAMAN'S CLUBS: None.

CURRENCY: Swedish Kronor (SEK).

SHIPMASTER'S REPORT: January 1989 (Updated 1990).

Pilotage: On approaching the port, call 'Marstrand Pilot' on VHF Channel 11. The pilot usually boards between Hatteberget Light Tower and Astol Island to the N.W., from a fast launch painted orange. The water in the approaches is deep. The Racon on Hatteberget Light is usually visible when passing the Skaw. It takes approximately 1.0 hours – 1.5 hours to reach the Statoil berths.

Anchorage: There are no safe anchorages outside the fjord. If vessel is awaiting a berth it is usual to anchor to the West of the berths. An alternative anchorage is in the area 6 miles North of Algon Island, which is within the pilotage waters.

Max. Size: Power Board Terminal: On the North side of the jetty the maximum draft is 12.6 m. and on the South side 10.6 m.

Statoil Terminal: This berth is to be dredged to 14.0 m.

Tugs: There are no tugs stationed at Stenungsund. If tugs are required they have to be ordered from Gothenburg, which is 2.5 hours away by sea. 5 hours notice is required. Tugs normally join vessel at the 'S' bend at Tjornbron Bridge. Vessels of 32,000 cu.m. capacity require 2 tugs for berthing and one for unberthing.

Berths: Power Board Terminal: Lat. 58° 05.3' N., Long. 11° 49.2' E.

The finger pier is located on the East side of Askero Fjord and is aligned in an East/West direction. The pier is 1 mile North of Stenungsund.

The jetty is used for the import of oil for the power station and for import of LPG and ethylene for oil companies.

Approach to the berth is difficult in strong S./S.W. winds.

Vessels berth head-in, starboard side alongside, on the North side of the jetty and port side alongside on the South side. The offshore anchor is often used when berthing.

On the North Berth, vessels should be well secured at the stern when S./S.W. winds are blowing and well secured at the South Berth when N.W./N. winds are blowing.

Statoil Terminal: The berth is located on the North side of Havden Peninsula, to the West of Stenungsund. Vessels are swung to starboard and then pushed slowly into the berth. The stern overhangs when alongside, so good moorings are required aft when S./S.W. winds are blowing. The leads for the after moorings are poor and the leads for the headlines are long.

Cargo: Power Board Terminal: Ethylene is handled on both sides of the jetty, dependent on the receiver. Neste use the North side and Statoil use the South side. The North side berth is equipped with an 8 in. hydraulic arm (150 ASA) with clamps and automatic disconnect mechanism. The South side berth is also equipped with an 8 in. (150 ASA) hydraulic arm, but without clamps. Shore supply the necessary reducers. No VRL connected.

Initially small amounts of cargo are pumped ashore from each tank in turn, so that samples can be taken on the jetty. Analysis takes about 2 hours. The cargo temperature is to be at least −100°C. and usually colder temperatures required. If the temperatures are correct, the shore facility can usually handle rates up to 500 cu.m.p.h. on the North side and 200 cu.m.p.h. on the South side. Hot gas required on completion. It usually takes about 20 minutes to clear line, so about 40 mb. is required in the tanks. The jetty has a steam/hot water line for de-icing. Local surveyor used.

Statoil Terminal: LPG handled at this berth. Discharge is by 10 in. (150 ASA) non-hydraulic arm. Shore supply the necessary reducer, no VRL. Samples are taken prior to arm being connected. Analysis takes 3 hours. Once lines are cool, the rate can be increased to maximum. Cargo goes into cavern storage so any rate can be accepted without difficulty. There was very little contact with the shore once discharge had commenced.

A surveyor from the terminal and SGS are available for figures. Terminal surveyor will use density from sample for calculations.

General: Power Board Terminal: There is an electric crane with 4 t SWL on the North side. No trucks allowed on jetty. Trolleys available for the 300 m. haul from the roadway.

Statoil Terminal: Stores can be manhandled from the barrier which is approximately 300 m. from the ship. A hand driven shore crane can be used for loading stores. There is a telephone in the cabin on the jetty. Fresh water is available. All medical facilities are available locally. Stores are expensive.

AUTHORITY: Vattenfall, S-44487 Stenungsund, Sweden. *Tel:* 46-303-66141. *FAX:* 46-303-66161. *Cables:* Kraftverket. *Contact:* Ove Kristoffersson, Harbour Master.

Statoil Petrokemi AB, S-44481 Stenungsund. *Tel:* 0303-87000. *FAX:* 0303-87444. *Contact:* Morgan Hermansson or Anders Ranswall, General Managers.

Norsk Hydroplast AB, S-44483 Stenungsund. *Tel:* 0303-71560. *Telex:* 21206. *FAX:* 0303-84756. *Contact:* Stig Grunden, General Manager.

STOCKHOLM: 59.19 N. 18.03 E. (See Plan)

DOCUMENTS:

(a) Crew List: Normally 2 copies; for oil harbour at Loudden and Free Port, 3 copies.

(b) Passenger List: Regular passenger services 2 copies; cruise ships (lists for cruise ships must be sent in advance to Agent for forwarding to Immigration Authorities), 2 copies.

(c) Customs Documents: Arrival report (form can be obtained on arrival), 4 copies. Crew Effects Declaration, 2 copies. Ship's Stores Declaration, 2 copies.

(d) Quarantine Certificate or Bill of Health: Derat Certificate not more than 6 months old to be shown. *Note:* Additional quarantine regulations may be imposed in special circumstances.

(e) Manifest: 3 copies.

(f) Bills of Lading: 1 copy of each. Liners may be subject to other regulations with regard to *(e)* and *(f)* above.

(g) Ship's Documents: Tonnage Certificate. Certificate of Nationality.

PILOTAGE: *(Sweden General).* Applications for licensed Pilots should be made at least 5 hours before pilotage is due to commence. When making application specify name of vessel, tonnage, draft and destination. Also give estimated time for taking Pilot on board and route. If this procedure not followed, the Maritime Service cannot guarantee to supply a Pilot without considerable delay to vessel.

Preferable make application by telephone, or by radio via a coastal station or by some other method direct to Pilot Station nearest point where pilotage is to begin. Also possible request Pilot by VHF telephone to any Maritime Service Pilot Station, Pilot waiting point or lighthouse which is equipped with VHF.

The Maritime Service's network of permanent VHF telephone stations has been extended to give almost complete coverage of all Pilot Stations and waiting points and is also operative for a number of lighthouses. The radio stations can operate on different Channels and are equipped for frequency modulation. During hours when Pilot Stations are open, a constant watch is kept on frequency 156.80 MHz (Channel 16). This frequency should be used for all signals and replies – and for distress traffic. Outside these hours, normal traffic transmissions, i.e. applications for Pilots, etc. should be made on frequency of 156.65 MHz (Channel 13) or on reserve operating frequency of 156.60 MHz (Channel 12).

When making VHF telephone call, the type of call signal that should be sent is "Lotsarna (or Pilot Station) plus the name of the Pilot Station or the pilotage attendance".

	Soderhamn/ Simpnas	*Sandhamn*	*Landsort*
Cable address	Kapellskars Pilot Station	Stockholm Pilot Station	Nynashamn Pilot Station
Notice of arrival	5 hours	5 hours	5 hours
VHF Channels	6, 12, 13, 16	6, 12, 13, 16	6, 12, 13, 16
Description of pilot boat	Pilot boat on day duty flies international flag "H". Pilot boat on night duty carries lights conforming to International Regulations for Preventing Collisions at Sea, Rule No. 29.		
	33 ft. steel cutter painted red-orange	33 ft. steel cutter painted red-orange	40 ft. steel cutter painted red-orange
To order Pilot:	Tel: 08-6666622. Fax: 08-6666690. Telex: 12858 Stolops. Cables: Pilot Station Stockholm. VHF: Channel 13. Pilot may be called by radio or VHF.		
Boarding point	At Bjorko outside outer Skerries, 2 – 3 n.m. N.W. or E. of Simpnasklubb	2 n.m. S.E. of Revengegrund Light	2.5 n.m. S. of Oja
Anchorage for vessels awaiting Pilot	Near position stated above	Near position stated above	Near position stated above

ANCHORAGES:

	Arholma	*Sandhamn*	*Landsort*
(a) Prohibited anchorage	59° 30' N. 19° 05' E. 59° 45' N. 19° 14' E.	59° 17' N. 18° 54' E.	
(b) Suitable anchorages	2 – 4 n.m. N.N.W. of Simpnasklubb	2 – 4 n.m. E. and S. of Revengegrund	6 – 8 n.m. S.S.E. of Landsort
(c) Depth	33 – 38 fathoms	11 – 22 fathoms	11 – 16 fathoms

RESTRICTIONS: Very large passenger vessels and fully-loaded tankers of approx. 15,000 d.w.t. or over not allowed pass through Skerries during darkness.

Ships with gross tonnage exceeding 300 tons must proceed only on an Easterly course in Lindalssundet. Ships with gross tonnage exceeding 300 tons not must proceed through Kodjupet and Sandhamnssundet (between Sandon and Korso).

Ships with a gross tonnage exceeding 300 tons, not using a Pilot, must be equipped with VHF telephone which must be continuously watched on Channel 16 and 9.

A vessel reporting system has been established covering the entrances to the Port of Stockholm. Vessels over 300 g.r.t. report to Stockholm Pilot Station ("Lotsarna Stockholm") when passing way points. Reports to be given by VHF Channel 73.

Tankships with gross tonnage exceeding 800 tons carrying crude oil products, mineral oil and certain chemicals must have licensed Pilot in the passages Arholma-Stockholm; Soderarm-Stockholm; Sandhamn-Stockholm; Landsort-Stockholm; Landsort-Nynashamn; Landsort-Sodertalje and in the Lake of Malaren.

MAX. SIZE:

Max. Dimensions Passenger – or Dry Cargo Ships:

DAYLIGHT

	LOA (m.)	*Beam (m.)*	*g.r.t.*	*Draft (m.)*
Sandhamn	245.0	35.0	43,000	11.0
Landsort	200.0	22.0	18,000	10.0
Simpnas/Soderarm	245.0	35.0	18,000	8.0
Gustavsberg	60.0	9.5	—	4.2

Ships larger than 30,000 g.r.t. or longer than 200 m. to be assisted by 2 Pilots and to have assistance of tugs through the Archipelago.

DARKNESS

	LOA (m.)	*Beam (m.)*	*g.r.t.*	*Draft (m.)*
Sandhamn	175.0	26.0	18,000	9.0
Landsort	175.0	26.0	13,000	9.0
Simpnas/Soderarm	175.0	26.0	13,000	7.0

Max. Dimensions Tankers:

DAYLIGHT AND VISIBILITY EXCEEDING 1 NAUTICAL MILE

	LOA (m.)	*Beam (m.)*	*d.w.t.*	*Draft (m.)*
Sandhamn	200.0	32.0	35,000	11.0
Landsort	175.0	26.0	15,000	10.0
Simpnas/Soderarm	175.0	28.0	15,000	8.0

Ships exceeding 22,000 g.r.t. to have 2 Pilots onboard. Ships of this size are normally not handled in winds stronger than 15 m./s.

DARKNESS OR POOR VISIBILITY (LESS THAN 1 NAUTICAL MILE)

	LOA (m.)	*Beam (m.)*	*d.w.t.*	*Draft (m.)*
Sandhamn	175.0	26.0	15,000	9.0
Landsort	145.0	19.0	10,000 (13,000 double bottom)	9.0
Simpnas/Soderarm	145.0	19.0	10,000 (13,000 double bottom)	7.0

Tankers:

Tanker Discharge Quay	*Max. safe draft*	*Available Quay length*
Bergs Oil Harbour	12.4 m.	230 m.
Kvarnholmen	9.4 m. – 10.8 m.	183 m. – 230 m.
Loudden	8.2 m. – 11.0 m.	190 m. – 230 m.
Vartan	7.4 m. – 10.4 m.	190 m. – 230 m.

HEALTH: Vessels arriving from ports outside Europe must for Inward Clearance provide Customs Office with written Declaration of Freedom from Infection. Further instructions will be issued by Customs Office when such a Declaration cannot be given.

RADIO: Stockholm Radio, call sign SDJ.

RADAR/VHF: All 3 Pilot Stations have radar for internal use. No harbour radar service. VHF Channels 16 and 12. Also see "Restrictions".

TUGS: Very large vessels may be met by tugs by special arrangement at pilot boarding point. Tugs available to special order to assist with berthing; they rendezvous usually near berth.

Rates: According to fixed tariff.

BERTHING: See Tables on Page 2042 .

BRIDGES:

HOURS FOR OPENING FOR MOVABLE ROAD BRIDGES OVER HAMMARBY SEALANE

Movable parts of road bridges over sealane of Hammarby opened on request for vessel unable freely to pass under the bridges, all through the year at regular hours.

STEVEDORES: Stevedores available from Stockholms Hamn AB. Tel: 08/6702600. Working hours 0700 – 0900, 0930 – 1100, 1115 – 1330 and 1400 – 1600. Stevedores required for 0700 hrs. must be booked previous day.

MEDICAL: Full hospital facilities available without prior notice. Dentists available during normal working hours.

TANKERS:

Quay	*No. of Berths*	*Max. d.w.t.*	*Depth alongside* (ft. in.)	*Diameter of Discharge Pipelines* (in.)
Bergs (Statoil)	1	65,000	43 00	12 – 20
Kvarnholmen	2	30 – 65,000	33 00 – 39 04	8 – 14
Loudden (Municipal)	5	25 – 60,000	28 06 – 39 00	6 – 12
Vartan (Statoil/Shell)	3	20 – 60,000	24 08 – 36 00	8 – 10

DENSITY: Salt content of 0.5%. No variations

GANGWAY/DECK WATCHMEN: Not essential, but recommended for large tankers.

OPENING/CLOSING HATCHES: If opened and closed by stevedores, subject to extra fee.

Berthing Procedures: On proceeding up Askero Fjorden past Havden the ship is swung to starboard with the assistance of tugs and lined up for the pier. Anchors are sometimes used to help steady the bow on the correct heading, and as assistance in bringing the ship up.

Ocean-going ships berth on the North side of the pier and are, therefore, starboard side to berth. When in position, most ships' sterns protrude beyond the end of the pier by as much as one-third of their length, therefore, maximum attention must be paid to the stern moorings. Because moorings placed on the buoy on the starboard quarter or on the bollards on the South shore prevent ships from using the South side of the pier the terminal will not, as a rule, put moorings to these points. However, in periods of unsettled weather, particularly if winds are from the S.W., Masters of the larger ships should insist on stern moorings being sent to the buoy and South shore. It should be borne in mind that tugs are not readily available at Stenungsund. Moorings are taken ashore initially by boat and then by heaving line. The forward spring line is usually first line ashore. No shore moorings are provided.

Gangway: Ship's gangway is used, there is ample room on the jetty to land the gangway abaft the manifold. Note that when ship is light the normal ship's gangway will become very steep (over 50°) and special safety precautions to prevent accidents to personnel will be necessary.

Fendering: The concrete strong points of the pier are protected by tubular rubber 600 mm. diameter erected horizontally. The concrete outer corners are well protected with low friction fenders.

Cargo Connections and Handling: HFO, Heating Oil, Naphtha and Mogas are handled. Ullages and temperatures are taken jointly with shore representative upon arrival alongside.

Starboard manifold should be prepared for 10 in. hoses, 2 or 3 flexible hoses with 10 in. ASA bolted flanges are usually connected. Starboard derrick and a 4 ton shore crane are used for hose connection.

Concurrent loading and discharging are not allowed. Maximum back pressure is 10 kg./sq.cm.

Naphtha receiving capacity is maximum 3,000 cu.m.p.h. Normal discharge rate is about 1,800 cu.m.p.h.

Deballasting Facilities: The terminal has limited high flash ballast reception facilities, about 2,400 cu.m. Discharge rate is about 500 cu.m.p.h.

Clean oil-free ballast may be discharged overboard but it is the ship's responsibility to ensure that the ballast water is oil-free and very heavy penalties are imposed for oil pollution.

Passing Traffic, Weather, Tide, etc.: There are no unusual problems except for strong S.W. winds when it is important that breast moorings are run to the starboard quarter buoy and to the South shore.

Special Regulations: No small craft are allowed alongside ship while at jetty. No bunkering during loading and discharging.

Oil Pollution Safeguards: Floating oil booms – partly fixed and partly portable are available to surround the ship and jetty. Mechanical suction equipment is available.

Fire Fighting Equipment: Remote-controlled foam-guns and water monitors are available at the berth.

Fresh Water: Good quality fresh water is available ex-jetty by hose, rate 25 t.p.h.

Additional Information: The berth on the South side of the Powerboard finger pier also handles HFO, heating oil, naphtha and mogas but is mainly used for loading/discharging LPG.

Statoil Terminal, Havden: *General:* Statoil's Havden terminal berth is located on the North side of the Havden peninsula on the East side of Askero Fjorden (Lat. 58° 05' N., Long. 11° 48.5' E.). It is a marginal type berth with a breasting face about 60 m. long. It is used for the discharge of naphtha and LPG.

Cautionary Advice: See "Powerboard Terminal".

Telegraph cables (shown on the chart) run out from the shore close Northwards of the berth and anchors should not be used. In addition, the dredged area tapers quite sharply towards the East end of the berth and use of an anchor could result in the ship "sitting" on the anchor or its cable.

Berthing Procedures: On arriving off Havden the ship is swung to starboard with the assistance of tugs and steamed slowly to the berth. Ships always berth starboard side to berth. Moorings are taken ashore by motor boat, the forward spring is usually the first line ashore. The stern of the ship is not well sheltered from the prevailing S.W. winds and special attention must be paid to putting out good stern moorings. It must be remembered that tugs are not readily available in Stenungsund. No shore moorings are provided.

Gangway: Ship's gangway used, ample room on the jetty to land the gangway aft of the cargo manifold. Note that, when ship is light, the normal ship's gangway will become very steep (over 50°) and special precautions to prevent accidents to personnel will be necessary.

Fendering: Each of the 3 concrete strong points is fendered by truck tyres around a rubber core slung horizontally. Care should be taken not to land initially between the strong points.

Cargo Connection and Handling: Only naphtha and LPG are handled at this berth. No bunkers can be provided. 2×10 in. fully counterbalanced hard arms of Chicksan manufacture are provided. Each has 10 in. ASA bolted flanges.

Ullages and temperatures are taken together with shore representative upon arrival alongside.

Starboard manifold should be prepared to accept 2×10 in. hard arms. If ship's manifold has large overhang outside the support, this should be jacked up before connection of arms. Stays, derricks, etc., in vicinity of starboard manifold should be removed. There are no facilities for receipt of dirty ballast at the terminal.

Oil Pollution Safeguards: Floating oil booms, partly fixed, partly portable are available to surround ship and jetty. Mechanical suction equipment is available.

Fire Fighting Equipment: The jetty is equipped with a fire water and a foam line and portable monitors.

Fresh Water: Good quality fresh water is available ex-jetty by hose, rate 25 t.p.h.

Norsk Hydro Terminal: Max. LOA 100 m. Depth 9.5 m.

FUEL: Only available by barge from other places (i.e. Gothenburg). Bunkering only during daylight. Can be ordered at short notice.

FIRE PRECAUTIONS: Normal precautions.

CONSULS: At Gothenburg.

REPAIRS: Minor repairs can be made locally, large repairs by labour from Gothenburg shipyards. Gas-freeing alongside with Port Captain's approval only. Repairs alongside with Port Captain's approval only.

SURVEYORS: D & D Marine Consult, Upplandsgatan 25, 11360 Stockholm. Tel: 08-34 1590.

GANGWAY/DECK WATCHMEN: Watchmen from ashore necessary when telephone connected.

CUSTOMS ALLOWANCES: 200 cigarettes. 1 bottle of spirits.

REPATRIATION: All facilities exist.

AIRPORT: Gothenburg 50 km. away. Regular airlines.

TIME: GMT plus 1 hour.

HOLIDAYS: Tankers load and discharge all year round.

TELEPHONES: Connected on board if required. Watchmen attend calls. Fireman and alarm on jetty during whole operation.

SHORE LEAVE: Permitted. Distance to Stenungsund 1 km., Uddevalla 40 km. or Gothenburg 50 km. by bus, train or taxi. Shore passes issued at the gate.

IDENTIFICATION CARDS: The gate at the Powerboard Terminal is TV-guarded. Each crew member must carry a Passing Permission allowing passage through the gate. Required number of permissions will be handed over to the Master by the Agent on ship's arrival. Passing Permission at Statoil Terminal, Havden, is not required.

GARBAGE DISPOSAL: Container available for garbage, free of charge.

WASTE OIL DISPOSAL: Reception facilities for engine slops only up to a maximum of 15 cu.m. at a time.

SEAMAN'S CLUBS: None.

CURRENCY: Swedish Kronor (SEK).

SHIPMASTER'S REPORT: January 1989 (Updated 1990).

Pilotage: On approaching the port, call 'Marstrand Pilot' on VHF Channel 11. The pilot usually boards between Hatteberget Light Tower and Astol Island to the N.W., from a fast launch painted orange. The water in the approaches is deep. The Racon on Hatteberget Light is usually visible when passing the Skaw. It takes approximately 1.0 hours – 1.5 hours to reach the Statoil berths.

Anchorage: There are no safe anchorages outside the fjord. If vessel is awaiting a berth it is usual to anchor to the West of the berths. An alternative anchorage is in the area 6 miles North of Algon Island, which is within the pilotage waters.

Max. Size: Power Board Terminal: On the North side of the jetty the maximum draft is 12.6 m. and on the South side 10.6 m.

Statoil Terminal: This berth is to be dredged to 14.0 m.

Tugs: There are no tugs stationed at Stenungsund. If tugs are required they have to be ordered from Gothenburg, which is 2.5 hours away by sea. 5 hours notice is required. Tugs normally join vessel at the 'S' bend at Tjornbron Bridge. Vessels of 32,000 cu.m. capacity require 2 tugs for berthing and one for unberthing.

Berths: Power Board Terminal: Lat. 58° 05.3' N., Long. 11° 49.2' E.

The finger pier is located on the East side of Askero Fjord and is aligned in an East/West direction. The pier is 1 mile North of Stenungsund.

The jetty is used for the import of oil for the power station and for import of LPG and ethylene for oil companies.

Approach to the berth is difficult in strong S./S.W. winds.

Vessels berth head-in, starboard side alongside, on the North side of the jetty and port side alongside on the South side. The offshore anchor is often used when berthing.

On the North Berth, vessels should be well secured at the stern when S./S.W. winds are blowing and well secured at the South Berth when N.W./N. winds are blowing.

Statoil Terminal: The berth is located on the North side of Havden Peninsula, to the West of Stenungsund. Vessels are swung to starboard and then pushed slowly into the berth. The stern overhangs when alongside, so good moorings are required aft when S./S.W. winds are blowing. The leads for the after moorings are poor and the leads for the headlines are long.

Cargo: Power Board Terminal: Ethylene is handled on both sides of the jetty, dependent on the receiver. Neste use the North side and Statoil use the South side. The North side berth is equipped with an 8 in. hydraulic arm (150 ASA) with clamps and automatic disconnect mechanism. The South side berth is also equipped with an 8 in. (150 ASA) hydraulic arm, but without clamps. Shore supply the necessary reducers. No VRL connected.

Initially small amounts of cargo are pumped ashore from each tank in turn, so that samples can be taken on the jetty. Analysis takes about 2 hours. The cargo temperature is to be at least −100°C. and usually colder temperatures required. If the temperatures are correct, the shore facility can usually handle rates up to 500 cu.m.p.h. on the North side and 200 cu.m.p.h. on the South side. Hot gas required on completion. It usually takes about 20 minutes to clear line, so about 40 mb. is required in the tanks. The jetty has a steam/hot water line for de-icing. Local surveyor used.

Statoil Terminal: LPG handled at this berth. Discharge is by 10 in. (150 ASA) non-hydraulic arm. Shore supply the necessary reducer, no VRL. Samples are taken prior to arm being connected. Analysis takes 3 hours. Once lines are cool, the rate can be increased to maximum. Cargo goes into cavern storage so any rate can be accepted without difficulty. There was very little contact with the shore once discharge had commenced.

A surveyor from the terminal and SGS are available for figures. Terminal surveyor will use density from sample for calculations.

General: Power Board Terminal: There is an electric crane with 4 t SWL on the North side. No trucks allowed on jetty. Trolleys available for the 300 m. haul from the roadway.

Statoil Terminal: Stores can be manhandled from the barrier which is approximately 300 m. from the ship. A hand driven shore crane can be used for loading stores. There is a telephone in the cabin on the jetty. Fresh water is available. All medical facilities are available locally. Stores are expensive.

AUTHORITY: Vattenfall, S-44487 Stenungsund, Sweden. *Tel:* 46-303-66141. *FAX:* 46-303-66161. *Cables:* Kraftverket. *Contact:* Ove Kristoffersson, Harbour Master.

STOCKHOLM: 59.19 N. 18.03 E. (See Plan)

DOCUMENTS:

- *(a)* Crew List: Normally 2 copies; for oil harbour at Loudden and Free Port, 3 copies.
- *(b)* Passenger List: Regular passenger services 2 copies; cruise ships (lists for cruise ships must be sent in advance to Agent for forwarding to Immigration Authorities), 2 copies.
- *(c)* Customs Documents: Arrival report (form can be obtained on arrival), 4 copies. Crew Effects Declaration, 2 copies. Ship's Stores Declaration, 2 copies.
- *(d)* Quarantine Certificate or Bill of Health: Derat Certificate not more than 6 months old to be shown. *Note:* Additional quarantine regulations may be imposed in special circumstances.
- *(e)* Manifest: 3 copies.
- *(f)* Bills of Lading: 1 copy of each. Liners may be subject to other regulations with regard to *(e)* and *(f)* above.
- *(g)* Ship's Documents: Tonnage Certificate. Certificate of Nationality.

PILOTAGE: *(Sweden General).* Applications for licensed Pilots should be made at least 5 hours before pilotage is due to commence. When making application specify name of vessel, tonnage, draft and destination. Also give estimated time for taking Pilot on board and route. If this procedure not followed, the Maritime Service cannot guarantee to supply a Pilot without considerable delay to vessel.

Preferable make application by telephone, or by radio via a coastal station or by some other method direct to Pilot Station nearest point where pilotage is to begin. Also possible request Pilot by VHF telephone to any Maritime Service Pilot Station, Pilot waiting point or lighthouse which is equipped with VHF.

The Maritime Service's network of permanent VHF telephone stations has been extended to give almost complete coverage of all Pilot Stations and waiting points and is also operative for a number of lighthouses. The radio stations can operate on different Channels and are equipped for frequency modulation. During hours when Pilot Stations are open, a constant watch is kept on frequency 156.80 MHz (Channel 16). This frequency should be used for all signals and replies – and for distress traffic. Outside these hours, normal traffic transmissions, i.e. applications for Pilots, etc. should be made on frequency of 156.65 MHz (Channel 13) or on reserve operating frequency of 156.60 MHz (Channel 12).

When making VHF telephone call, the type of call signal that should be sent is "Lotsarna (or Pilot Station) plus the name of the Pilot Station or the pilotage attendance".

	Soderhamn/ Simpnas	*Sandhamn*	*Landsort*
Cable address	Kapellskars Pilot Station	Stockholm Pilot Station	Nynashamn Pilot Station
Notice of arrival	5 hours	5 hours	5 hours
VHF Channels	6, 12, 13, 16	6, 12, 13, 16	6, 12, 13, 16
Description of pilot boat	Pilot boat on day duty flies international flag "H". To order Pilot:	Tel: 08-6666622. Fax: 08-6666690. Telex: 12858 Stolops. Cables: Pilot Station Stockholm. VHF: Channel 13. Pilot may be called by radio or VHF.		
Boarding point	At Bjorko outside outer Skerries, 2 – 3 n.m. N.W. or E. of Simpnasklubb	2 n.m. S.E. of Revengegrund Light	2.5 n.m. S. of Oja
Anchorage for vessels awaiting Pilot	Near position stated above	Near position stated above	Near position stated above

ANCHORAGES:

	Arholma	*Sandhamn*	*Landsort*
(a) Prohibited anchorage	59° 30' N. 19° 05' E. 59° 45' N. 19° 14' E.	59° 17' N. 18° 54' E.	
(b) Suitable anchorages	2 – 4 n.m. N.N.W. of Simpnasklubb	2 – 4 n.m. E. and S. of Revengegrund	6 – 8 n.m. S.S.E. of Landsort
(c) Depth	33 – 38 fathoms	11 – 22 fathoms	11 – 16 fathoms

RESTRICTIONS: Very large passenger vessels and fully-loaded tankers of approx. 15,000 d.w.t. or over not allowed pass through Skerries during darkness.

Ships with gross tonnage exceeding 300 tons must proceed only on an Easterly course in Lindalssundet. Ships with gross tonnage exceeding 300 tons must not proceed through Kodjupet and Sandhamnssundet (between Sandon and Korso).

Ships with a gross tonnage exceeding 300 tons, not using a Pilot, must be equipped with VHF telephone which must be continuously watched on Channel 16 and 9.

A vessel reporting system has been established covering the entrances to the Port of Stockholm. Vessels over 300 g.r.t. report to Stockholm Pilot Station ("Lotsarna Stockholm") when passing way points. Reports to be given by VHF Channel 73.

Tankships with gross tonnage exceeding 800 tons carrying crude oil products, mineral oil and certain chemicals must have licensed Pilot in the passages Arholma-Stockholm; Soderarm-Stockholm; Sandhamn-Stockholm; Landsort-Stockholm; Landsort-Nynashamn; Landsort-Sodertalje and in the Lake of Malaren.

MAX. SIZE:

Max. Dimensions Passenger – or Dry Cargo Ships:

DAYLIGHT

	LOA (m.)	*Beam (m.)*	*g.r.t.*	*Draft (m.)*
Sandhamn	245.0	35.0	43,000	11.0
Landsort	200.0	22.0	18,000	10.0
Simpnas/Soderarm	245.0	35.0	18,000	8.0
Gustavsberg	60.0	9.5	—	4.2

Ships larger than 30,000 g.r.t. or longer than 200 m. to be assisted by 2 Pilots and to have assistance of tugs through the Archipelago.

DARKNESS

	LOA (m.)	*Beam (m.)*	*g.r.t.*	*Draft (m.)*
Sandhamn	175.0	26.0	18,000	9.0
Landsort	175.0	26.0	13,000	9.0
Simpnas/Soderarm	175.0	26.0	13,000	7.0

Max. Dimensions Tankers:

DAYLIGHT AND VISIBILITY EXCEEDING 1 NAUTICAL MILE

	LOA (m.)	*Beam (m.)*	*d.w.t.*	*Draft (m.)*
Sandhamn	200.0	32.0	35,000	11.0
Landsort	175.0	26.0	15,000	10.0
Simpnas/Soderarm	175.0	28.0	15,000	8.0

Ships exceeding 22,000 g.r.t. to have 2 Pilots onboard. Ships of this size are normally not handled in winds stronger than 15 m./s.

DARKNESS OR POOR VISIBILITY (LESS THAN 1 NAUTICAL MILE)

	LOA (m.)	*Beam (m.)*	*d.w.t.*	*Draft (m.)*
Sandhamn	175.0	26.0	15,000	9.0
Landsort	145.0	19.0	10,000 (13,000 double bottom)	9.0
Simpnas/Soderarm	145.0	19.0	10,000 (13,000 double bottom)	7.0

Tankers:

Tanker Discharge Quay	*Max. safe draft*	*Available Quay length*
Bergs Oil Harbour	12.4 m.	230 m.
Kvarnholmen	9.4 m. – 10.8 m.	183 m. – 230 m.
Loudden	8.2 m. – 11.0 m.	190 m. – 230 m.
Vartan	7.4 m. – 10.4 m.	190 m. – 230 m.

HEALTH: Vessels arriving from ports outside Europe must for Inward Clearance provide Customs Office with written Declaration of Freedom from Infection. Further instructions will be issued by Customs Office when such a Declaration cannot be given.

RADIO: Stockholm Radio, call sign SDJ.

RADAR/VHF: All 3 Pilot Stations have radar for internal use. No harbour radar service. VHF Channels 16 and 12. Also see "Restrictions".

TUGS: Very large vessels may be met by tugs by special arrangement at pilot boarding point. Tugs available to special order to assist with berthing; they rendezvous usually near berth.

Rates: According to fixed tariff.

BERTHING: See Tables on Page 2042 .

BRIDGES:

HOURS FOR OPENING FOR MOVABLE ROAD BRIDGES OVER HAMMARBY SEALANE

Movable parts of road bridges over sealane of Hammarby opened on request for vessel unable freely to pass under the bridges, all through the year at regular hours.

STEVEDORES: Stevedores available from Stockholms Hamn AB. Tel: 08/6702600. Working hours 0700 – 0900, 0930 – 1100, 1115 – 1330 and 1400 – 1600. Stevedores required for 0700 hrs. must be booked previous day.

MEDICAL: Full hospital facilities available without prior notice. Dentists available during normal working hours.

TANKERS:

Quay	*No. of Berths*	*Max. d.w.t.*	*Depth alongside (ft. in.)*	*Diameter of Discharge Pipelines (in.)*
Bergs (Statoil)	1	65,000	43 00	12 – 20
Kvarnholmen	2	30 – 65,000	33 00 – 39 04	8 – 14
Loudden (Municipal)	5	25 – 60,000	28 06 – 39 00	6 – 12
Vartan (Statoil/Shell)	3	20 – 60,000	24 08 – 36 00	8 – 10

DENSITY: Salt content of 0.5%. No variations.

GANGWAY/DECK WATCHMEN: Not essential, but recommended for large tankers.

OPENING/CLOSING HATCHES: If opened and closed by stevedores, subject to extra fee.

Berthing Procedures: On proceeding up Askero Fjorden past Havden the ship is swung to starboard with the assistance of tugs and lined up for the pier. Anchors are sometimes used to help steady the bow on the correct heading, and as assistance in bringing the ship up.

Ocean-going ships berth on the North side of the pier and are, therefore, starboard side to berth. When in position, most ships' sterns protrude beyond the end of the pier by as much as one-third of their length, therefore, maximum attention must be paid to the stern moorings. Because moorings placed on the buoy on the starboard quarter or on the bollards on the South shore prevent ships from using the South side of the pier the terminal will not, as a rule, put moorings to these points. However, in periods of unsettled weather, particularly if winds are from the S.W., Masters of the larger ships should insist on stern moorings being sent to the buoy and South shore. It should be borne in mind that tugs are not readily available at Stenungsund. Moorings are taken ashore initially by boat and then by heaving line. The forward spring line is usually first line ashore. No shore moorings are provided.

Gangway: Ship's gangway is used, there is ample room on the jetty to land the gangway abaft the manifold. Note that when ship is light the normal ship's gangway will become very steep (over 50°) and special safety precautions to prevent accidents to personnel will be necessary.

Fendering: The concrete strong points of the pier are protected by tubular rubber 600 mm. diameter erected horizontally. The concrete outer corners are well protected with low friction fenders.

Cargo Connections and Handling: HFO, Heating Oil, Naphtha and Mogas are handled. Ullages and temperatures are taken jointly with shore representative upon arrival alongside.

Starboard manifold should be prepared for 10 in. hoses, 2 or 3 flexible hoses with 10 in. ASA bolted flanges are usually connected. Starboard derrick and a 4 ton shore crane are used for hose connection.

Concurrent loading and discharging are not allowed. Maximum back pressure is 10 kg./sq.cm.

Naphtha receiving capacity is maximum 3,000 cu.m.p.h. Normal discharge rate is about 1,800 cu.m.p.h.

Deballasting Facilities: The terminal has limited high flash ballast reception facilities, about 2,400 cu.m. Discharge rate is about 500 cu.m.p.h.

Clean oil-free ballast may be discharged overboard but it is the ship's responsibility to ensure that the ballast water is oil-free and very heavy penalties are imposed for oil pollution.

Passing Traffic, Weather, Tide, etc.: There are no unusual problems except for strong S.W. winds when it is important that breast moorings are run to the starboard quarter buoy and to the South shore.

Special Regulations: No small craft are allowed alongside ship while at jetty. No bunkering during loading and discharging.

Oil Pollution Safeguards: Floating oil booms – partly fixed and partly portable are available to surround the ship and jetty. Mechanical suction equipment is available.

Fire Fighting Equipment: Remote-controlled foam-guns and water monitors are available at the berth.

Fresh Water: Good quality fresh water is available ex-jetty by hose, rate 25 t.p.h.

Additional Information: The berth on the South side of the Powerboard finger pier also handles HFO, heating oil, naphtha and mogas but is mainly used for loading/discharging LPG.

Statoil Terminal, Havden: *General:* Statoil's Havden terminal berth is located on the North side of the Havden peninsula on the East side of Askero Fjorden (Lat. 58° 05' N., Long. 11° 48.5' E.). It is a marginal type berth with a breasting face about 60 m. long. It is used for the discharge of naphtha and LPG.

Cautionary Advice: See "Powerboard Terminal".

Telegraph cables (shown on the chart) run out from the shore close Northwards of the berth and anchors should not be used. In addition, the dredged area tapers quite sharply towards the East end of the berth and use of an anchor could result in the ship "sitting" on the anchor or its cable.

Berthing Procedures: On arriving off Havden the ship is swung to starboard with the assistance of tugs and steamed slowly to the berth. Ships always berth starboard side to berth. Moorings are taken ashore by motor boat, the forward spring is usually the first line ashore. The stern of the ship is not well sheltered from the prevailing S.W. winds and special attention must be paid to putting out good stern moorings. It must be remembered that tugs are not readily available in Stenungsund. No shore moorings are provided.

Gangway: Ship's gangway used, ample room on the jetty to land the gangway aft of the cargo manifold. Note that, when ship is light, the normal ship's gangway will become very steep (over 50°) and special precautions to prevent accidents to personnel will be necessary.

Fendering: Each of the 3 concrete strong points is fendered by truck tyres around a rubber core slung horizontally. Care should be taken not to land initially between the strong points.

Cargo Connection and Handling: Only naphtha and LPG are handled at this berth. No bunkers can be provided. 2×10 in. fully counterbalanced hard arms of Chicksan manufacture are provided. Each has 10 in. ASA bolted flanges.

Ullages and temperatures are taken together with shore representative upon arrival alongside.

Starboard manifold should be prepared to accept 2×10 in. hard arms. If ship's manifold has large overhang outside the support, this should be jacked up before connection of arms. Stays, derricks, etc., in vicinity of starboard manifold should be removed. There are no facilities for receipt of dirty ballast at the terminal.

Oil Pollution Safeguards: Floating oil booms, partly fixed, partly portable are available to surround ship and jetty. Mechanical suction equipment is available.

Fire Fighting Equipment: The jetty is equipped with a fire water and a foam line and portable monitors.

Fresh Water: Good quality fresh water is available ex-jetty by hose, rate 25 t.p.h.

SHIPMASTER'S REPORT: January 1989 (Updated 1990).

Pilotage: On approaching the port, call 'Marstrand Pilot' on VHF Channel 11. The pilot usually boards between Hatteberget Light Tower and Astol Island to the N.W., from a fast launch painted orange. The water in the approaches is deep. The Racon on Hatteberget Light is usually visible when passing the Skaw. It takes approximately 1.0 hours – 1.5 hours to reach the Statoil berths.

Anchorage: There are no safe anchorages outside the fjord. If vessel is awaiting a berth it is usual to anchor to the West of the berths. An alternative anchorage is in the area 6 miles North of Algon Island, which is within the pilotage waters.

Max. Size: Power Board Terminal: On the North side of the jetty the maximum draft is 12.6 m. and on the South side 10.6 m.

Statoil Terminal: This berth is to be dredged to 14.0 m.

Tugs: There are no tugs stationed at Stenungsund. If tugs are required they have to be ordered from Gothenburg, which is 2.5 hours away by sea. 5 hours notice is required. Tugs normally join vessel at the 'S' bend at Tjornbron Bridge. Vessels of 32,000 cu.m. capacity require 2 tugs for berthing and one for unberthing.

Berths: Power Board Terminal: Lat. 58° 05.3' N., Long. 11° 49.2' E.

The finger pier is located on the East side of Askero Fjord and is aligned in an East/West direction. The pier is 1 mile North of Stenungsund.

The jetty is used for the import of oil for the power station and for import of LPG and ethylene for oil companies.

Approach to the berth is difficult in strong S./S.W. winds.

Vessels berth head-in, starboard side alongside, on the North side of the jetty and port side alongside on the South side. The offshore ancho is often used when berthing.

On the North Berth, vessels should be well secured at the stern whe S./S.W. winds are blowing and well secured at the South Berth whe N.W./N. winds are blowing.

Statoil Terminal: The berth is located on the North side of Havde Peninsula, to the West of Stenungsund. Vessels are swung to starboa and then pushed slowly into the berth. The stern overhangs whe alongside, so good moorings are required aft when S./S.W. winds ar blowing. The leads for the after moorings are poor and the leads for th headlines are long.

Cargo: Power Board Terminal: Ethylene is handled on both sides of th jetty, dependent on the receiver. Neste use the North side and Stato use the South side. The North side berth is equipped with an 8 i hydraulic arm (150 ASA) with clamps and automatic disconne mechanism. The South side berth is also equipped with an 8 i (150 ASA) hydraulic arm, but without clamps. Shore supply th necessary reducers. No VRL connected.

Initially small amounts of cargo are pumped ashore from each ta in turn, so that samples can be taken on the jetty. Analysis takes abo 2 hours. The cargo temperature is to be at least −100°C. and usua colder temperatures required. If the temperatures are correct, the sho facility can usually handle rates up to 500 cu.m.p.h. on the North si and 200 cu.m.p.h. on the South side. Hot gas required on completio It usually takes about 20 minutes to clear line, so about 40 mb. is requi in the tanks. The jetty has a steam/hot water line for de-icing. Loc surveyor used.

Statoil Terminal: LPG handled at this berth. Discharge is by 10 (150 ASA) non-hydraulic arm. Shore supply the necessary reducer, VRL. Samples are taken prior to arm being connected. Analysis tak 3 hours. Once lines are cool, the rate can be increased to maximu Cargo goes into cavern storage so any rate can be accepted witho difficulty. There was very little contact with the shore once discha had commenced.

A surveyor from the terminal and SGS are available for figu Terminal surveyor will use density from sample for calculations.

General: Power Board Terminal: There is an electric crane with 4 t SWL on the North side. No trucks allowed on jetty. Trolleys availa for the 300 m. haul from the roadway.

Statoil Terminal: Stores can be manhandled from the barrier which is approximately 300 m. from the ship. A hand driven shore crane can be used for loading stores. There is a telephone in the cabin on the jetty. Fresh water is available. All medical facilities are available locally. Stores are expensive.

AUTHORITY: Vattenfall, S-44487 Stenungsund, Sweden. *Tel:* 46-303-66141. *FAX:* 46-303-66161. *Cables:* Kraftverket. *Contact:* Ove Kristoffersson, Harbour Master.

Statoil Petrokemi AB, S-44481 Stenungsund. *Tel:* 0303-87000. *FAX:* 0303-87444. *Contact:* Morgan Hermansson or Anders Ranswall, General Managers.

Norsk Hydroplast AB, S-44483 Stenungsund. *Tel:* 0303-71560. *Telex:* 21206. *FAX:* 0303-84756. *Contact:* Stig Grunden, General Manager.

STOCKHOLM: 59.19 N. 18.03 E. **(See Plan)**

DOCUMENTS:

(a) Crew List: Normally 2 copies; for oil harbour at Loudden and Free Port, 3 copies.

(b) Passenger List: Regular passenger services 2 copies; cruise ships (lists for cruise ships must be sent in advance to Agent for forwarding to Immigration Authorities), 2 copies.

(c) Customs Documents: Arrival report (form can be obtained on arrival), 4 copies. Crew Effects Declaration, 2 copies. Ship's Stores Declaration, 2 copies.

(d) Quarantine Certificate or Bill of Health: Derat Certificate not more than 6 months old to be shown. *Note:* Additional quarantine regulations may be imposed in special circumstances.

(e) Manifest: 3 copies.

(f) Bills of Lading: 1 copy of each. Liners may be subject to other regulations with regard to *(e)* and *(f)* above.

(g) Ship's Documents: Tonnage Certificate. Certificate of Nationality.

PILOTAGE: *(Sweden General).* Applications for licensed Pilots should be made at least 5 hours before pilotage is due to commence. When making application specify name of vessel, tonnage, draft and destination. Also give estimated time for taking Pilot on board and route. If this procedure not followed, the Maritime Service cannot guarantee to supply a Pilot without considerable delay to vessel.

Preferable make application by telephone, or by radio via a coastal station or by some other method direct to Pilot Station nearest point where pilotage is to begin. Also possible request Pilot by VHF telephone to any Maritime Service Pilot Station, Pilot waiting point or lighthouse which is equipped with VHF.

The Maritime Service's network of permanent VHF telephone stations has been extended to give almost complete coverage of all Pilot Stations and waiting points and is also operative for a number of lighthouses. The radio stations can operate on different Channels and are equipped for frequency modulation. During hours when Pilot Stations are open, a constant watch is kept on frequency 156.80 MHz (Channel 16). This frequency should be used for all signals and replies – and for distress traffic. Outside these hours, normal traffic transmissions, i.e. applications for Pilots, etc. should be made on frequency of 156.65 MHz (Channel 13) or on reserve operating frequency of 156.60 MHz (Channel 12).

When making VHF telephone call, the type of call signal that should be sent is "Lotsarna (or Pilot Station) plus the name of the Pilot Station or the pilotage attendance".

Simpnas/Soderarm	145.0	19.0	10,000 (13,000 double bottom)	7.0

Tankers:

Tanker Discharge Quay	*Max. safe draft*	*Available Quay length*
Bergs Oil Harbour	12.4 m.	230 m.
Kvarnholmen	9.4 m. – 10.8 m.	183 m. – 230 m.
Loudden	8.2 m. – 11.0 m.	190 m. – 230 m.
Vartan	7.4 m. – 10.4 m.	190 m. – 230 m.

HEALTH: Vessels arriving from ports outside Europe must for Inward Clearance provide Customs Office with written Declaration of Freedom from Infection. Further instructions will be issued by Customs Office when such a Declaration cannot be given.

RADIO: Stockholm Radio, call sign SDJ.

RADAR/VHF: All 3 Pilot Stations have radar for internal use. No harbour radar service. VHF Channels 16 and 12. Also see "Restrictions".

TUGS: Very large vessels may be met by tugs by special arrangement at pilot boarding point. Tugs available to special order to assist with berthing; they rendezvous usually near berth.

Rates: According to fixed tariff.

BERTHING: See Tables on Page 2042 .

BRIDGES:

HOURS FOR OPENING FOR MOVABLE ROAD BRIDGES OVER HAMMARBY SEALANE

Movable parts of road bridges over sealane of Hammarby opened on request for vessel unable freely to pass under the bridges, all through the year at regular hours.

STEVEDORES: Stevedores available from Stockholms Hamn AB. Tel: 08/6702600. Working hours 0700 – 0900, 0930 – 1100, 1115 – 1330 and 1400 – 1600. Stevedores required for 0700 hrs. must be booked previous day.

MEDICAL: Full hospital facilities available without prior notice. Dentists available during normal working hours.

TANKERS:

Quay	*No. of Berths*	*Max. d.w.t.*	*Depth alongside* (ft. in.)	*Diameter of Discharge Pipelines* (in.)
Bergs (Statoil)	1	65,000	43 00	12 – 20
Kvarnholmen	2	30 – 65,000	33 00 – 39 04	8 – 14

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per person per week or 200 g. (7 oz.) of tobacco per person per week. Wine and/or spirit: One bottle of spirits per person per week, one bottle of wine per person per week.

CERTIFICATES:
Tonnage Certificate.
Certificate of Nationality.
Derat Certificate not more than 6 months old.
Ship's articles, Crew List or similar document listing all persons signed on aboard.

CARGO GEAR: Cargo vessels carrying goods which constitute a fire or explosion hazard or other flammable or otherwise dangerous goods must notify Port Authorities in advance the nature and quantity of goods concerned. In certain cases a red flag or red light must be carried at mast head.

REPATRIATION: Crewmen may be signed-on and paid-off. Whether paid-off crewmen will be allowed to remain in the country and seek new employment, depends on existing bi-lateral agreements between countries. Generally, only a citizen of a Scandinavian country may seek work in Sweden without a special labour permit.

FRESH WATER: Fresh water may be obtained from quayside. 1,000 cu.ft./hr. can be delivered from quayside. At Loudden max. 3,500 cu.ft./hr. can be delivered.

FUEL: All grades bunker oil, lubricating oil, etc. can be supplied.

REPAIRS: All types of deck and machinery repairs can be carried out.

DRY DOCKS: None.

AIRPORT: Arlanda, approx. 22 miles from central Stockholm. Served by regular airlines.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: New Year's Day (January 1st); Epiphany (January 6th); Good Friday (variable Friday in March/April); Easter Monday (variable Monday in March/April); May 1st; Ascension Day (variable Thursday in May/June); Whit Monday (variable Monday in May/June); Midsummer Day (variable Saturday in June); All Saints' Day (first Saturday in November); Christmas Day (December 25th); Boxing Day (December 26th). No work is normally done on these days.

POLICE/AMBULANCE/FIRE: Tel: 90 000.

TELEPHONES: Ship-to-shore telephone connections can be provided at most quays.

SERVICES: Electric current can be laid on at some quays. Port is responsible for collection of oil residues. Licensed compass adjusters available.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Passport or Seaman's Discharge Book with photograph.

GARBAGE DISPOSAL: A collection service is available. Containers are provided alongside. Charges are included in the port dues. Ordered through Agent.

WASTE OIL DISPOSAL: Collection service available by tanker trucks at any berth. Charges are included in port dues. Ordered through Agent.

SEAMAN'S CLUBS: Available.

DELAYS: Occasionally shortage of stevedores. Some delay may be caused by ice, but port kept permanently open by ice-breakers.

AUTHORITY: Port of Stockholm, P.O.Box 27314, S-10254 Stockholm. *Tel:* 08-6702600. *FAX:* 08-6702601. *Cables:* Capitalport.
Contact: Thomas Krokstedt, Harbour Master.

STORUGNS, Gotland Is.: 57.50 N. 18.48 E. (See Plan)

Situated on Eastside of Bay of Kappelshamn on the North coast of Gotland.

DOCUMENTS: Vessels arriving from foreign ports shall have the following documents:
1 Crew Manifest.
1 Stores List.
3 Crew Lists.
Tonnage Certificate.
Certificate of Nationality.
Declaration of Health (Derat Certificate), not older than 6 months.
Not applicable to vessels from Scandinavian ports.

NOTICE OF ARRIVAL: On which the loading turn number is based, should be given when the vessel has passed Lat. 57° 52' N. The notice can be given by VHF (Storugns Harbour Radio).

Vessels may not berth without permission of the Company.

PILOTAGE: Pilot boards in the outer approaches and should be ordered at least 5 hours in advance by Tel: 0498/227010 (Storugns) or 210138 (Visby). Pilots keep watch on VHF Channel 16.

ANCHORAGES: With good holding ground. Vessels waiting in the roads should keep watch on VHF Channel 16 during ordinary harbour working hours.

Ships lying in the roads shall anchor so that in-going and out-going vessels can pass without hindrance or risk. Anchoring in Kappelshamnsviken in the area between Lat. 57° 51' N. and an E.W. line 200 m. South of the quay's Southernmost point is prohibited unless permission is obtained from the Company.

Prohibited Anchorage: See "Plan".

RESTRICTIONS: The harbour can be entered at all times regardless of wind direction except during strong Northerly winds.

The bay is normally ice-free. During exceptionally cold spells with Northerly winds traffic may be temporarily stopped or hindered by ice-floes.

MAX. SIZE: Depth at entrance and at quay 10 m. Vessels up to 20,000 tons have loaded to full draft. Max. draft 9.2 m.

HEALTH: No restrictions provided no disease or fever on board and vessel not arriving from port where disease or fever in existence.

RADIO: 96 and 24 hours before vessel's ETA preliminary notice must be given to the Company. Changes of ETA exceeding 10% of the remaining time must be reported. It is, however, not necessary to report changes of less than 1 hour. The Company may under special circumstances waive the obligation to give 96 hour notice.

On the arrival of a vessel in the harbour area notice of arrival must be given either in writing, or by telephone 0498/227100 or by VHF radio. In respect of notice of arrival the harbour area is Kappelshamnsviken South of Lat. 57° 52' N. If a vessel, owing to bad weather or for any other reason cannot safely lie within the harbour area, the Company may accept notice of arrival from vessel North of above mentioned latitude.

Between 0500 hrs. and 2230 hrs. vessels waiting in the roads shall keep watch on VHF radio or, if the vessel is not equipped with such, on the ordinary radio.

Coastal Radio Stations: Stockholm Radio and Tingstade Radio (Tingstade Radio, radio telegrams only).

VHF: Storugns Harbour Radio VHF Channel 16.

TUGS: Rederi AB Gute. Tel: 0498-223000. On the island of Gotland.

BERTHING: The harbour which is situated on the Eastern side of Kappelhamsviken is intended solely for the loading of limestone which is obtained from the nearby quarry. The Gotland limestone, which is of high purity and has a very low percentage of impurities, is used in cellulose, sugar, metallurgic and chemical industries, and in iron production.

The limestone is delivered in 11 different grades. The density is 2.5/2.6 tons/cu.m.

The stowage factor varies between 17 and 26 (17 – 18 for grades 0 – 3 mm., 23 – 26 for grades between 3 and 120 mm., and 20 – 24 for grades above 120 mm.).

Quay	*Length*		*Depth*	
Quay 1 outside	140 m.		outside	9.5 m.
inside	120 m.		inside	7.0 m.
Quay 2	48 m.	(no loading)		5.0 m.
Quay 3	110 m.		outer	7.0 m.
			inner	6.0 m.

Boatmen: Vessels with Pilots on board need not order boatmen. Other vessels can obtain boatmen service through their Agents or by calling the boatmen service firm "Trossvakt" on Tel: 0498/225433. Booking should be done at least 2 hours before ETA. Shipper/NordKalk AB cannot offer boatmen service.

BULK HANDLING FACILITIES: The loading elevators are movable along their respective quays. The capacity on Quay 1 (loading of limestone only) is about 500 – 1,000 t.p.h and on Quay 3 (loading of quick lime only) about 300 – 600 t.p.h.

Shipmaster's Report: 1979. Loading rate 967.5 t.p.h.

Cleaning of holds, discharging of ballast and opening of hatches shall be carried out in sufficient time to avoid delays in loading. The loading should be so planned that shifting of the vessel and loading elevators can be avoided as far as possible.

STEVEDORES: Normal working hours are Monday – Thursday 0530 hrs. – 2230 hrs. and Friday – Sunday 0600 hrs. – 1900 hrs. Overtime working to complete loading is available to a limited degree.

During ordinary working hours vessels are loaded by turn. The turn is based upon the time of notice of arrival.

MEDICAL: Central hospital at Visby.

FRESH WATER: Not available.

FUEL: Most grades available from Visby subject prior notice.

CONSULS: Nearest consuls at Visby for Denmark, Finland, Norway and Germany.

REPAIRS: Only minor repairs possible.

DRY DOCKS: None.

GANGWAY/DECK WATCHMEN: Not compulsory but available.

OPENING/CLOSING HATCHES: Ship's crew open and close.

CUSTOMS ALLOWANCES: Presently 200 cigarettes per head/week. Practically no spirits allowed out of bond.

REPATRIATION: Good possibilities for changing crew.

AIRPORT: Visby.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

POLICE/AMBULANCE/FIRE: Tel: 90 000.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Seaman's Book or Passport if travelling outside port area.

AUTHORITY: NordKalk Storugns AB, Storugns, S-62034 Laerbro, Sweden. *Tel:* 0498-227100. *Telex:* 4150 Nkalk S. *FAX:* 0498-227227.
Contact: Bjoern Mathiasson, Harbour Master.

STROMSTAD: 58.56 N. 11.10 E.

DOCUMENTS/PILOTAGE: See "Stockholm".

ANCHORAGES: Available within port for vessels up to and including 3,000 d.w.t.

MAX. SIZE: Cargo ships (not tankers), max. 3,000 d.w.t.

BERTHING: No particular restrictions for berthing within the port.

FRESH WATER: Available.

FUEL: Not available.

REPAIRS: Repairs possible.
GANGWAY/DECK WATCHMEN: Necessary.
OPENING/CLOSING HATCHES: Carried out by crew.
REPATRIATION: Facilities exist for effecting crew changes.
AIRPORT: Landvetter (Gothenburg). Distance: 200 km. There is also a local taxiplane.
HOLIDAYS: Cargo work cannot be arranged on holidays.
POLICE/AMBULANCE/FIRE: Police 12530; Ambulance 90000 (ask for ambulance); Fire 90000.
TELEPHONES: No arrangements exist for placing telephones on board.

UMEA: 63.49 N. 20.16 E.

(See Plan)

DOCUMENTS:

Ship's Documents:
Tonnage Certificate.
Certificate of Nationality.
Derat Certificate (not older than 6 months).

Supplied by Master on arrival:
copy of each Manifest.
copy of each Bill of Lading.

Supplied by Agent and signed by the Master on arrival from foreign ports:
Maritime Declaration of Health.
3 Crew Lists (one set).
2 Passenger Lists (one set).
2 Crew Effects Declarations.
2 Ship's Stores Declarations.
2 Cargo Declarations.
4 Reports of Arrival.
1 Declaration of Living Animals (if any) (supplied by the Customs Officer).

Furthermore on arrival from any port:
1 Report of Arrival, with double net tons, if applicable (Harbour Office).
1 Passenger List (if any in transit).
1 Crew List.

On departure to a Foreign Port:
4 Reports of Departure.

PILOTAGE: Umea Pilot Station: Hillskar. Tel: 090-41622 and 090-40372. Telegraphic address "Pilotstation Umea".

At least 5 hours' advance notice of ETA at Pilot Station, stating time and Pilot Station and destination, can be given over any Swedish coastal radio station or free of charge on VHF over any Swedish Pilot Station and some lighthouses.

Pilot station and pilot boats fitted with VHF Channel 16 – calling and safety; Channel 13 – pilotage and traffic; Channel 12 – spare Channel.

All pilot boats orange with flag "H" and equipped with radar.

Boarding point, Lat. 63° 36.5' N., Long. 20° 25.5' E., 1.0 nautical miles 145° (T) from Vaktaren Lighthouse. In case of bad weather, in the fairway, closer to the Pilot Station.

Anchorage for vessels awaiting Pilot: Lat. 63° 36' N., Long. 20° 28' E., 1.5 nautical miles S.E. of Vaktaren Lighthouse. Depth 18 m. to 30 m.

ANCHORAGES: See "Pilotage".

Osterfjarden roadstead between Umea Hamn and Obbola. Length about 2,800 m. and about 400 m. wide, midstream in River Umea. To the North and South of Lat. 63° 42.3' N., Long. 20° 21.0' E. and with a depth of 12 m. to 22 m.

Anchorage is forbidden around position Lat. 63° 40.5' N., Long. 20° 20.0' E.

Cables and fresh water pipeline on Osterfjarden roadstead passing East-West around Lat. 63° 42.5' N.

RESTRICTIONS: Entry permitted during darkness, for tankers, not more than 17,000 d.w.t. and a max. draft of 9.0 m., and dry cargo vessels with a draft not exceeding 9.2 m.

During unsuitable weather conditions, according to the Pilot on duty. Tankers exceeding 1,600 g.r.t. and with a cargo of mineral oil products and other dangerous cargoes, must take a Pilot.

MAX. SIZE: Max. depth and max. permissible draft (at MW) in the fairway as follows:

The fairway to:	*Maximum draft* (m.)	*Depth* (m.)
Ferry Station No. 1-2	7.6	6.0
Ferry Station No. 3	9.7	7.0
Stormskar Oil Berth and Obbola	9.7	
Holmsund Oil Jetty	5.5	
Umea Inner Harbour and Gimonas Oil Jetty	3.0	

No tide.

HEALTH: Free Pratique automatically for ships arriving from non-infected areas. In event of any suspected disease or fever on board notify the Agent, who will give necessary directions. It is possible to send a telegraphic message to "Sanitary Authority, Umea" containing state of health on board, in ordinary items or code. (Also see "Documents").
RADIO: Harnosands Radio (SAH) on 2182 kHz or on VHF Channel 23-26 or 28 (depending on ship's position).

Port Radio: Umea Port Radio keeps watch, Monday to Friday, 0600 – 1500 hrs. on VHF Channel 16. Working Channels 11 and 13. At other times Umea Pilot Station. No port radar service, but Umea Pilot Station and the pilot boats are equipped with VHF and can assist on request.
TUGS: Normally necessary only for larger tankers when berthing. Tugs join vessels just off the jetty. Ship's lines always used.
BERTHING: Depth alongside (at MW) as follows:

Umea Outport	*Depth* (m.)
Ferry Stations	
No. 1 Hillskar	6.0
No. 2 Hillskar	7.0
No. 3 Truthallan	7.0
Oil Berth, Stormskar	11.0
Pilot Berth	5.3
South Quay, Berth Nos. 9 to 10	11.0
Pier Quay, Berth Nos. 7 to 8	11.0
North Quay, Berth Nos. 2 to 6	7.87
North Quay, Berth Nos. 1 to 2	6.0

CRANES:
North Quay: 1 crane, 2 – 5.0 tons and 2 mobile cranes 40 tons.
Pier Quay: 3 cranes, 3 – 7.5 tons.
South Quay: 1 crane of 40 tons.
Ferry Station No. 3: 1 crane 3 – 5 tons.
STEVEDORES: Holmsunds Stuveri AB. Tel. 090-153700. To be ordered before 1300 hrs. local time, day before gangs required. For work on Saturdays, Sundays, and holidays, special regulations.

Working hours: Monday to Friday 0600 – 1500 hrs., meal hour 1000 – 1100 hrs. Coffee breaks 0800 – 0810 hrs.; 1300 – 1310 hrs.
MEDICAL: All kinds of medical attention and hospital facilities available. Notify Agent as soon as possible.
TANKERS: Oil berths at Port of Umea.
Stormskar: Depth 11 m. Reducing pieces for all diameters between 6 in. and 12 in. and all types of flanges available. One crane for handling hoses. Max. LOA 215 m., max. beam 30.0 m., max. draft 9.7 m. (channel limitation at MLW is 9.2 m.) Max. d.w.t. 42,000. Vessels usually berth starboard side to.
Obbola: Oil Jetty, depth 11.0 m. Max. LOA 200 m., max. draft 9.7 m. (channel limitation at MLW is 9.2 m.). Max. d.w.t. 40,000. Vessels berth port side to.
DENSITY: Nearly fresh water.
FRESH WATER: Delivered from water posts in Port of Umea at Ferry Station No. 1, Oil Berth, Berth Nos. 1 – 10 and in Umea Inner Harbour.
FUEL: All kinds and grades of fuel oil available in Port of Umea. Bunkering at Berths 1 – 10 possible during normal loading or unloading from pipeline. At Ferry Station Nos. 1 and 2 and the Oil Berth also bunkering from pipeline. Fuel can also be delivered from lorries. Notice as early as possible.
FIRE PRECAUTIONS: Security watchmen from Port of Umea while alongside the Oil Berth. Alarm regulations in writing will be delivered on arrival.
CONSULS: Finland.
REPAIRS: Most deck and engine repairs.
SURVEYORS: Lloyd's Agent: Iwan Lundstedts Eftr. AB, Tel: 090-24700. Telex: 54036. Fax: 090-23649. Contact: Torsten Lundberg, Managing Director.
GANGWAY/DECK WATCHMAN: Available but not compulsory except for tankers.
OPENING/CLOSING HATCHES: Can be done by stevedores if necessary, except patent hatches.
CUSTOMS ALLOWANCES: *Tobacco:* 200 cigarettes (minimum age 15 years).
Spirits and Wine: (Minimum age 20 years). 1 litre alcohol over 22% by volume, 2 litres wine, 15 litres beer, *or* 2 litres alcohol under 22% by volume, 2 litres wine, 15 litres beer.
REPATRIATION: Facilities exist for effecting crew changes and arranging repatriation.
AIRPORT: Umea, approx. 20 km. away, served by regular airlines.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: New Year's Day (1st January); Twelfth Day (6th January); Good Friday; Easter Monday; May Day (1st May); Whit-Sunday; Whit-Monday; Midsummer's Day (nearest Saturday to 24th June); All Saints' Day (1st Saturday in November); Christmas Day; Boxing Day.
POLICE/AMBULANCE/FIRE: Alarm central 90-000 and ask for service required.
TELEPHONES: Available for placing on board at Berths 1 – 10 and Oil Berth at Stormskar.
IDENTIFICATION CARDS: Not required. Seaman's Book sufficient.
GARBAGE DISPOSAL: Collection service is available during working hours. Tel: 090-163285.
WASTE OIL DISPOSAL: Collection service is available during working hours at no charge. Notice to be given 24 hours before arrival. Tel: (090) 163285. Fax: (090) 24306.

The ship has to discharge the waste oil at a capacity of at least 5 cu.m./hr., otherwise overtime is charged.
SEAMAN'S CLUBS: Seaman's Home, Port of Umea, S-91300 Holmsund. Tel: (090) 40151. Facilities: Shop, international telephone service, postage and games.
CURRENCY: Swedish Kroner (SEK).
AUTHORITY: Umea Hamnforvaltning, Umea Hamn, Box 83, S-91322 Holmsund, Sweden. *Tel:* 090-163280. *FAX:* 090-24306. *Contact:* Per Ove Englund, Port Director.

VALLVIK: 61.11 N. 17.11 E. (See Plan)

DOCUMENTS: See "Stockholm".
PILOTAGE: Pilot station at Soderhamn (Ljusne Station).
ANCHORAGES: *(a)* Ljusne bight sheltered from West, North to N.E. winds, depths 6 to 8 fathoms. *(b)* North side of Storjungfrun Island sheltered from South to S.W. winds, depths 10 to 12 fathoms.
RESTRICTIONS: No direct restrictions. Ships of about 5,000 d.w.t. or more are recommended not to enter or leave the harbour in darkness (due to Pilot and weather conditions).
HEALTH: No special action except if suspected disease. In that case contact Agent.
MAX. SIZE: Max. draft in fairway 7.5 m. Length of loading pier is 200 m. Berthing possible on both sides.
East Side (from outer end):

Distance	Depth MWL (m.)
0 – 80 m.	8.3
80 – 85 m.	7.7
85 – 110 m.	7.2
110 – 140 m.	6.7
140 – 175 m.	5.8
175 – 195 m.	5.7
195 – 200 m.	5.2

West Side (from outer end):

0 – 40 m.	7.6
40 – 70 m.	5.8
70 – 90 m.	5.5
90 – 140 m.	4.6

RADIO: Northward bound ships contact Stockholm Radio, Southward bound Harnosand Radio.
RADAR/VHF: No port radar service. There is a radar station at Ljusne. Pilot station and some of the pilot boats are fitted with radar. Master may contact Pilot by means of VHF Channels 16 and 13.
BERTHING: Ship's Agent keeps contact with Port Authorities.
STEVEDORES: Agent arranges required or available gangs according to the Shipmaster's wishes.
TANKERS: 10 in. diameter discharging hoses and pipeline. Tanker berth at loading pier, 3 different connecting points.
FRESH WATER: Delivered by hose from quay. Rate about 8 t.p.h.
FUEL: Tanker lorries ordered through Agent, available with a few hours notice.
CONSULS: Danish, Dutch and French Consuls in Soderhamn.
REPAIRS: Machinery repairs, plate-work and welding can be carried out to a certain extent.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Not necessary. If wanted, can be arranged.
OPENING/CLOSING HATCHES: Normally carried out by crew. Can be done by stevedores.
CARGO GEAR: Cargo gear certificates valid.
REPATRIATION: Facilities for crew changes available.
AIRPORT: Nearest airport Arlanda, about 15 miles North of Stockholm
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: See "Soderhamn".
POLICE/AMBULANCE/FIRE: See "Soderhamn".
TELEPHONES: No arrangements for placing telephones on board Telephone for ship's use available in Harbour Master's Office.
IDENTIFICATION CARDS: Not needed.
GARBAGE DISPOSAL: No service available.
WASTE OIL DISPOSAL: No service available.
SEAMAN'S CLUBS: None.
AUTHORITY: NCB-Vallvik, Vallviks Hamn, 82021 Vallvik, Sweden *Tel:* 0270-62000. *Telex:* 47011. *FAX:* 0270-69210. *Contact:* Ew Andersson.

Kolkajen	240	7.6	3 jib cranes 12 tons – 33 tons
Ostra Kajen	527	5.0 – 7.6	1 jib crane 25 tons 4 cranes × 5 tons 1 heavy lift crane 210 tons
Lillakajen	120	7.6	2 cranes × 6 tons
Silokajen	130	7.3	1 loader, rate 750 t.p.h.
Tullhuskajen	483		

BRIDGES: 4 bridges. All of them to be opened at passage except bridge at Sodertalje which closed from 1630 hrs. – 1830 hrs. weekdays and 1300 hrs. – 1500 hrs. Saturday or day before a holiday.
STEVEDORES: Stevedores for next working day ordered by at least 1500 hrs. day before and ETA to be given in due time. Tel: 021-180100.
MEDICAL: Necessary service given by local hospital and private doctors. Vaccinations carried out.
FRESH WATER: Ordered through Port Administration.
FUEL: Bunkering of all grades of oil can be carried out at all quays from trucks.
FIRE PRECAUTIONS: Accordance harbour regulations.
CONSULS: Denmark, Finland and Norway.
REPAIRS: Most deck and engine repairs, as well as electrical.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Can be obtained from shorewatch companies at different rates for night/day work.
OPENING/CLOSING HATCHES: Crew. Can be carried out by stevedores.
CERTIFICATES: Measurement Certificate and all gear test certificates required, if ship's gear to be used.
CUSTOMS ALLOWANCES: (Tobacco), 200 cigarettes or 200 gm. tobacco. Additional allowance depending on expected stay in port and size of vessel. (Spirits), 1 bottle of 0.75 c.l. for each crew member over 21. Additional allowance on request.
REPATRIATION: Possible. Accommodation to be ordered in good time.
AIRPORT: Arlanda, 120 km. International lines.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: See "Stockholm".
POLICE/AMBULANCE/FIRE: Tel. 90000.
TELEPHONES: In oil and deep-water harbour, most quays fitted with telephones.
SERVICES: Compass adjusting. Small radio repairs by local radio men.
SHORE LEAVE: Crew can leave vessel after Customs clearance and Immigration control.
IDENTIFICATION CARDS: None required.
GARBAGE DISPOSAL: Ordered through Port Administration.
WASTE OIL DISPOSAL: Ordered through Port Administration.
DEVELOPMENTS: Constant new development and extensions. Additional room for extension in old harbour, deep harbour and oil harbour.
AUTHORITY: Vasteras Hamn AB, Seglargatan 3, S-72132 Vasteras, Sweden. *Tel:* 021-180100. *FAX:* 021-180656. *Contact:* Kjell Eriksen, Managing Director. Per Barkenhielm, Assistant Manager. Stig Jansson, P.R.Manager.

VASTERVIK: 57.46 N. 16.38 E.

PILOTAGE: Compulsory. Pilot boards in Lat. 57° 45.1' N., Long. 16° 57.3' E., available day and night. Tel: 0490-28041. Call sign "Lotsarna Ido".
BERTHING: *Outer Harbour:* Djuphamnskajen Lucernakajen, length 200 m., depth 8.3 m.

Oil Quay (North part of Lucernakajen): Depth 8.3 m., equipped with 3×8 in. pipelines.

Ferry Harbour: Quay length 100 m., depth 6.3 m.

Inner Harbour: Quay length 900 m., depth alongside from 4 m. to 6 m.

Oil berth: Length 15.0 m., depth alongside 6 m.

FRESH WATER: Can be obtained from all quays.
AUTHORITY: Vasterviks Hamn, Box 3093, 593 03 Vastervik, Sweden. *Tel:* 0490-88860. *Contact:* Olof Lindroos, Harbour Master.

VISBY: 57.38 N. 18.17 E. (See Plan)

DOCUMENTS: See "Stockholm".
PILOTAGE: Compulsory for cargo vessels over 90 m. LOA (16 m. beam) and tankers over 80 m. LOA (15 m. beam). Pilot stationed at Visby Pilot Station. Pilot boards in Visby Roads. 12 hours' notice of ETA is required. Pilot listens out on VHF Channels 16/13 throughout 24 hours. Tel: +46 (0) 498 210138.
ANCHORAGES: In Visby Roads (Lat. 57° 38.15' N., Long. 18° 15.9' E.), 0.3 – 0.5 nautical miles outside breakwater. Depth 20 m. – 50 m. Good holding ground.
Restrictions: It is forbidden to anchor within the marked area outside Visby port entrance (for limits see chart).

At Hogklint, which is approximately 4 miles South of Visby, there are several sea cables, amongst which is the "Gotland Cable" which supplies Gotland with electricity. Anchoring is not permitted within 300 m. either side of the "Gotland Cable".

RESTRICTIONS: Priority given to ferries entering and leaving. All vessels and pleasure craft to keep watch on Channel 16 for traffic information.

No tide in harbour. Currents outside harbour up to 4 knots running along coast. Prevailing winds, Summer time mostly S.W., Winter between N.W. and N.E. Harbour open to winds between S.W. – W., which when strong produces swell along the piers.

Fairway: This passes from the sea between the breakwaters to the oil harbour and is dredged to approximately 9.0 m., permitting vessels with drafts of 7.2 m. to enter.

There are leading lights (2 lights) for entrance into Visby Harbour, also red day markers.

Water Levels: High water level +0.8 m.
Normal high water level +0.5 m.
Normal low water level −0.4 m.
Low water level −0.7 m.

MAX. SIZE: Maximum draft permitted for vessel proceeding to the oil harbour is 7.2 m., to the outer harbour 6.3 m. and to the inner harbour 5.6 m.

RADIO: Stockholm Radio.

VHF: Stockholm Radio: Channel 16, working channel for Visby area is Channel 25.

Tinstaede Radio: Navigational warnings and weather forecast for waters around Gotland. Calling VHF Channel 16, working Channel 13.

Visby Port: Assisting vessels calling at Visby Port. Calling VHF Channel 16, working Channel 9 (Office hours only).

TUGS: No tugs in the port. Available if requested upon 8 hours notice. Ordered by Agent or Port Office.

BERTHING:

Harbour	*Length* (m.)	*Depth* (m.)	*Remarks*
Outer Harbour			
Ferry Berth No. 7	200	8.0	Ro/Ro.
Ferry Berth No. 6	165	8.0	Ferry berth with fixed 32 m. width ramp. Terminal Building serves both Berths No. 5 and 6.
Ferry Berth No. 5	205	7.0	Same as Berth No. 6.
Outer Oil Quay	60	8.0	3 ton crane for hose lifting. 8 in. hose connections. Capacity 250-300 cu.m.p.h.
Southern Small Boat Harbour	300	2.0	Small boat harbour with 2 bridges. Entry to the West of Fish Harbour.
Inner Harbour			
Outer Part North Breakwater	350	6.0	Ferry Berth No. 3 at quay's inner part (quay length 125 m.) Ro/Ro berth with fixed 20 m. width ramp. Remaining quay length used mainly for timber and pulp loading.
Holmen			
West Quay	200	7.0	Ferry Berth No. 4 with fixed 18 m. ramp.
Eastern Quay	120	6.0	Fixed electric crane (max. 15 ton). Sawdust loading via nozzle (capacity 120 t.p.h.)
Old Oil Pier	42	6.0	Quay with support dolphin.
Oil Quay	60	8.0	See "Tankers".
Fishing Harbour	390	3.0	
Inner Part			
Ferry Berth No. 1	110	6.0	Fixed 16 m. wide Ro/Ro ramp.
Ferry Berth No. 2	115	6.0	Fixed 30 m. wide Ro/Ro ramp.
Fish and Small Boat Harbour	240	4.0-3.0	Visitors' Harbour 3 m. deep (approx.)

BRIDGES: No bridges or overhead cables.

STEVEDORES: Working hours, Monday – Friday 0700 – 1600. Overtime possible.

MEDICAL: Well equipped hospital in city.

TANKERS: One berth. Length 60 m., depth 8.0 m. Max. LOA 160 m. One hydraulic crane for hose handling. Hose connections 6 in. and 8 in. Max. discharge rate 250 – 400 cu.m./hr.

Note: Pilotage compulsory for tankers over 80 m. LOA and 15.0 m. beam. Linesmen compulsory for vessels over 1,200 g.r.t.

DENSITY: 1005.

FRESH WATER: Available.

FUEL: Available by truck.

REPAIRS: Only small repairs are possible.

AIRPORT: Located 5 km. North of city. Daily flights to Stockholm and some other cities in Sweden.

POLICE/AMBULANCE/FIRE: Dial 112.

GARBAGE DISPOSAL: Container provided on arrival.

WASTE OIL DISPOSAL: Sludge removed by tanker lorry at 24 hours notice to Agent or Port Office.

AUTHORITY: Golands Kommun, Port of Visby, S-62181 Visby, Sweden. *Tel:* +46 (0) 498 269470. *FAX:* +46 (0) 498 269065. *Contact:* Gosta Hammarberg, Harbour Master (Tel: 269472).

WALLHAMN: 58.01 N. 11.42 E. (See Plan)

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
2 Tobacco and/or Stores List.
2 Crew Effects Declaration.

PILOTAGE: Pilot boards at Hatteberget. Telegraphic Address "Pilotstation Marstrand", Tel: 0303–60004. VHF Channel 16.

5 hours' notice to be given through Agent.
2 hours' notice to be given by vessel.

ANCHORAGE: As advised by Pilot Station.

MAX. SIZE: Max. draft 10.0 m. Max. length – no restriction.
Berth No. 6: Max. draft 5.5 m., max. length 110.0 m.

HEALTH: No special action except for suspected disease, in which case Agent should be contacted for further information.

RADIO: Gothenburg Radio.

VHF: Wallhamn Harbour Radio – Channel 16.

TUGS: Tugs from Gothenburg will join at entrance.

BERTHING: Four berths for Roll-on/Roll-off: (1) 180 m. × 10.8 m. depth (2) 130 m. × 10.8 m. depth. (3) 160 m. × 8.5 m. depth (4) 240 m. × 8.5 m. depth.

One berth for loading stone products. Length 110 m. Depth 6.0 m.

CRANES: 2 container gantry cranes.

STEVEDORES: ETA given to Agents is sufficient.

MEDICAL: Doctors and dentists available at short notice. Neares hospital in Kungaelv, 35 km.

FUEL: Most grades of bunker oil available with short notice.

CONSULS: In Gothenburg, 60 km. away.

REPAIRS: Can be arranged.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: By crew or by stevedores.

REPATRIATION: All facilities available.

AIRPORT: Landvetter International Airport, Gothenburg, 85 km. away.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: Stevedoring and clearance of vessels can be performe every day of the year, 24 hours' service.

POLICE/AMBULANCE/FIRE: Tel. 90 000.

SHORE LEAVE: Permitted within limits laid down by police.

IDENTIFICATION CARDS: Not necessary. Seamen's Book or Passpo should be carried.

GARBAGE DISPOSAL: Service available. Dustbins provided on quay free of charge when quantities are reasonable.

WASTE OIL DISPOSAL: Service available and provided through por authorities. Free of charge if certain conditions are fullfilled. Contact Por Authority for details.

SEAMAN'S CLUBS: None.

CURRENCY: Swedish Kronor (SEK).

AUTHORITY: Wallhamn Terminal AB, S-47199 Wallhamn, Swede *Tel:* 46-304-679900. *Cables:* Wallhamn. *FAX:* 46-304-66097 *Contact:* U. Andersson, Agency Manager. C. Frisk, Port Director.
Agency: Tel: 46-304-679967. Fax: 46-304-660473.

YSTAD: 55.26 N. 13.50 E. (See Pla

DOCUMENTS:
Crew List.
Passenger List.
Custom Documents.
Manifests.
Bills of Lading.
Ship's Papers, etc.

TRAFFIC WARNING SYSTEM: Vessels approaching Ystad, listen Channel 10 and 16 for broadcast announcing ferry departures. All inwa bound and outbound vessels have to announce their intention, and wh manoeuvring within the port area, Channel 10 has to be used.

PILOTAGE: Vessels approaching Ystad's Harbour must apply for P at Malmo at least 5 hours before pilotage due to commence. Tel: 04 115269 or 040-978315 or VHF (Channels 16 or 20), stating tonna draft and destination. VHF call sign "Lotsarna" plus name of pil station. (Also see "Stockholm".) Pilot boards at Ystad Roads Lightb (Lat. 55° 23.5' N., Long. 13° 47.5' E.).

ANCHORAGES: Road: 1.0 nautical mile S.W. harbour entran 9 m. – 10 m. depth; sand and clay, good anchorage ground. The r is open to winds from S.S.W.

MAX. SIZE: Largest fully loaded vessel that can enter harbour ab 5,500 d.w.t. Depth 7.2 m., max. draft 6.7 m. (22 ft.)

RADIO: Goteborg and Stockholm.

VHF: 24 hour watch at Malmo Pilot Station on VHF Channel 16 a "Ystad Port Radio" on Channel 16 during office hours (0700 – 2400 h

TUGS: Tug usually meets vessel at entrance buoy. Ship's lines u Tugs not compulsory.

BERTHING: Vessels of 150 m. length and 20 m. breadth can e harbour. Max. draft 22 ft. at MWL.

Ro/Ro Berth: Three movable ramps for lorries/goods. Breadth 10 m. and 12 m. One railway ferry ramp with a fixed car ramp to u deck.

CRANES: 2×6 tons (9 ton with double gear), 1×5 ton, 1×3 to cranes are rail-mounted and electric. 1×36 ton mobile crane.

STEVEDORES: Stevedores must be ordered from Ystads Stuver Tel: 0411-18080. Working hours Monday – Friday 0700 – 163 Meal intervals 0900 – 0930 hrs. and 1200 – 1230 hrs.

MEDICAL: Agents to be notified in advance if medical attention wanted.
TANKERS: Load/discharge lines 8 in. diameter, but reducing pieces for 6 in. and 10 in. diameter. (Tankfarm of 40,000 cu.m.)
DENSITY: Density in harbour is 1006-1010.
FRESH WATER: Available from quays. About 10 t.p.h.
FUEL: Coal and oil can be obtained by lorries.
CONSULS: Danish Consul, Tel: 72840. Finnish Consul, Tel: 18400. Norwegian Consul, Tel: 11635.
REPAIRS: Mechanical workshop.
SURVEYORS: Surveyor appointed by the Swedish National Administration of Shipping and Navigation at the Port Office.
GANGWAY/DECK WATCHMEN: Can be arranged.
OPENING/CLOSING HATCHES: Crew or stevedores.
CERTIFICATES: See "Stockholm".
CUSTOMS ALLOWANCES: Tobacco, about 200 cigarettes or 200 gram of tobacco for each member of crew. Spirits, 1 bottle for each member of crew.
CARGO GEAR: Loading/discharging with shore cranes and Roll-on/Roll-off ramps.
AIRPORT: 30 km. distant and served by regular airlines.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: Christmas; New Year; Easter; Whitsun and Midsummer. No cargo work.
POLICE/AMBULANCE/FIRE: Police, Tel: 13620; Ambulance and Fire, Tel: 90000.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Not needed.
GARBAGE DISPOSAL: Containers about 7 cu.m. capacity for firm garbage can be placed alongside. The charge will be about SEK 600 (container delivery and emptying included). Call Port Office or agent, for further information.
WASTE OIL DISPOSAL: Sludge can be collected by tank lorry, free of charge. Other kinds of oil contaminated water can be delivered to a 500 cu.m. tank. Charge SEK 75/cu.m. Port Office can supply further information.
SEAMAN'S CLUBS: None.
CURRENCY: Swedish Kronor (SEK).
GENERAL: *Refuse Disposal:*

Contaminated Water: To the reception station at Revhuskajen (max. 500 cu.m.).

Waste Oil: Via a tank-truck (max. 10 cu.m.).

Solid Garbage: Via a motorised container to a refuse dump (max. 12 cu.m.).

DEVELOPMENTS: Entrance to be dredged to 7.5 m. and inner entrance to be widened to 150 m. (See "Plan").
AUTHORITY: Ystads Hamn, Hamnkontoret, Hamngatan 18, S-27100 Ystad, Sweden. *Tel:* 0411-77263, 77000. *FAX:* 0411-74950. *Cables:* Southport. *Contact:* Torsti Lehtinen, Harbour Master.

Switzerland

BASLE: 47.33 N. 7.34 E. (See Plan)

PORT LIMITS: A line drawn 50 m. off the shore.
DOCUMENTS:

1 Rhine-Manifest or "T"-Paper.
1 Provisions List.

The respective documents, mentioned in No. 1.10 of the Rhine Shipping Police Regulation have to be on board. Where possible, cargo manifests and stowage plans should be forwarded ahead of the vessel to the local Agent.
PILOTAGE: Holders of a High Rhine Shippers Licence have to Pilot the vessel between Basle and Birsfelden. Such licence-holders can be ordered at Signal-station (VHF Channel 18 or telephone 6314400 or Birsfelden Locks 3113855).
ANCHORAGES: Vessels moored at riverside quays have to use anchors.
RESTRICTIONS: Shipping is blocked from high water mark II (gauge Rheinfelden 430 cm. up– resp. 450 cm. downstream of the Middle Bridge at Basle). Other restrictions will be announced by the Port Authority.
MAX. SIZE: Water Depth: 3.50 m.

Air Draft: 5.70 m. to basin II, port of Kleinhuningen; 7.00 m. to all the other port areas of Basle Town; 4.80 m. to 7.00 m. to the ports of Basle Country.

Beam: 11.40 m. to basin II, port of Kleinhuningen and through the locks of Birsfelden.

Length: 110 m. for the section between the Middle Bridge at Basle and the locks of Birsfelden.
VHF: Port Authority on Channel 18 (call: Signalstation). Working hours: Monday to Friday 0500 – 2100 hrs., Saturday 0500 – 1300 hrs.
TUGS: Only one private tug/pushboat is available (call: BRAGTANK, Tel: 6314422 or from ship to ship on VHF Channel 10: Vogel Gryff). Tug assistance is necessary for the section between Basle and Birsfelden from High Water Mark I (gauge Rheinfelden 350 cm.) for single engine vessels.
BERTHING: Two artificial basins at Kleinhuningen, riverside quays at Kleinhuningen (Klybeckquai), St. John, Birsfelden and Au. Load/discharge of dry cargo is done by shore equipment.

Also see "Max. Size".
CRANES: 62 shore cranes with lifting capacities up to 2×300 tons.
SPECIALISED CARGO HANDLING FACILITIES: 2 container terminals. No LPG berth.
BRIDGES: Railway bridges across the channel to basin II, port of Kleinhuningen, permit a max. air draft of 5.70 m.
STEVEDORES: Working hours: Monday to Friday 0500 – 2100 hrs., Saturday 0500 – 1300 hrs.
MEDICAL: Hospital facilities available.
TANKERS: Tanker piers at Kleinhuningen (Klybeck Quay and Basin I; the last one for oil only), St. John (vegetable oil and stove oil), Birsfelden and Au.

Tankers with dangerous goods (K1 and K2 products) are not allowed to enter the basins. Load/discharge done by vessel's pumps.
FRESH WATER: Good quality potable water available.
FUEL: Diesel oil available.
CONSULS:

Austria
Belgium
Benin
Brazil
Cape Verde
Denmark
Ecuador
Finland
France
Germany
Hungary
Italy
Jamaica
Luxembourg
Mali
Mexico
Monaco
Netherlands
Norway
Peru

Syrian Arab Republic

GENERAL

PORT REGULATIONS:

In corroboration of Articles 2 and 8 of the Decree Law No. 154/1961 which created the General Directorate of Ports and invited them to control the safety and security of ports and territorial waters and empower them to enact communiques and instructions for same and for public interest, the following provisory instructions will be in force for vessels lying in the Syrian ports and territorial waters until permanent regulations are issued for the safety of the harbours.

1. Any vessel calling at Syrian ports should contact the pilotage station or the signal towers upon entering Syrian territorial waters 12 miles (marine) giving her name, nationality and her cargo in case the whole or part is dangerous, also her ETA at the waiting zone of the port of destination.
2. The Masters of foreign vessels lying in Syrian ports should hoist the Syrian flag (size 63 cm.×126 cm.) in accordance with international maritime courtesy. The Agent should supply any vessel without same upon her arrival at Syrian ports.
3. The vessel should hoist international signals for a Pilot or for dangerous cargo, also the quarantine flag, etc., in accordance with her situation while approaching Syrian ports.
4. The vessels once in territorial waters are not authorised to receive any person on board before Free Pratique is granted by Harbour Authorities.
5. It is forbidden to receive any person after Free Pratique and during the stay of the vessel either in road or inner basin unless by written authorisation from the Harbour Authorities. Customs and Security are exempt when in service.
6. It is forbidden for a vessel to use her wireless when lying in Syrian ports or at anchorage unless with authorisation from the Harbour Authorities and in emergency cases.
7. It is forbidden for vessels lying in Syrian ports to use their own steam or electrical blowers, amplifiers or make any other signals not allowed by international rules to avoid sea collisions or the light signals authorised by the Harbour Authorities in accordance with Article 14 of the present communique.
8. Masters should keep at any time on board of their vessels while lying in the ports a continuous watch and enough seamen in order to secure the exploitation department necessities or during emergency cases, and in order to take the necessary steps to avoid fire and damages to others (Article 17 of D/Law 193).
9. If a Syrian watchman is appointed to watch the vessel, he must have an authorisation order from the Harbour Authorities. The shipping Agent is responsible for the execution.
10. It is forbidden to use the vessel's life-boats in the ports or in territorial waters unless by previous written authorisation from the Harbour Authorities on the basis of a written request stating the causes, the time of the dropping down of the life-boat from the vessel, and the time of its lifting provided the cause is necessary.
11. All vessels should keep their gangways up from sunset to 0700 hrs.
12. The hatches, stores, etc., should be covered and locked, if possible, during the night.
13. In case any objects from the vessel or their cargo drop into the sea, the Master should inform both the Port Co. and the Harbour Master immediately of same.
14. The following signals should be used for the above mentioned cases as follows:

	Signals	
Case	*Sound*	*Lights*
(a) Attack by thieves	Sequence of 6 short blasts.	Sequence of 6 light signals and flashes from the foremast.
(b) Case of fire onboard or alongside	Sequence of long blasts, each set 6 blasts.	Sequence of 6 long flashes.
(c) Case of serious injury	Sequence of 2 long blasts.	Sequence of 2 long flashes from the foremast.
(d) Case of stranding	Sequence of 4 long blasts.	Sequence of 4 long flashes.

N.B.

1. Distance time between each sequence is half a minute, but the length of the signals should be in accordance with international signals regulations.
2. The above signals should be accompanied by wireless call on Channel 16 to both Pilotage and Stations in Syrian ports.
3. The above instructions do not forbid the use of other sound and light signals stated in the international rules.

NOTICE: Vessels proceeding to Syrian ports are required to signal the following to the port radio station when 50 miles from the port of destination.

(a) ETA.
(b) Nationality.
(c) Name.

BANIAS: 35.14 N. 35.56 E. (See Plan)

DOCUMENTS:

5 copies Crew List.
1 copy Vaccination List.
1 copy Stores List.
1 copy Private Stores List.
1 copy Slop Chest.

In case of cargo to be discharged, Original and 2 copies Manifest and 3 copies Bill of Lading.

APPROACHES: Vessels bound for Banias should follow the following:

(a) Lat. 35° 13' 00" N., Long. 35° 42' 00" E.
(b) Lat. 35° 13' 00" N., Long. 35° 56' 56" E.
(c) Lat. 35° 16' 00" N., Long. 35° 55' 25" E.
(d) Lat. 35° 16' 00" N., Long. 35° 40' 34" E.

Otherwise vessels are subject to severe fines.

PILOTAGE: Compulsory. Pilots board all tankers approaching the Terminals. These Pilots act in the same capacity as Mooring Masters in the berthing of vessels, after which they supervise the raising of the flexible hoses and their connection to the ship's manifold. During loading operation they act as the Company's Representatives. The Company's Mooring Masters will meet tankers in the vicinity of Marqab Light Buoy.

It is requested that tankers of 40,000 d.w.t. and over should have rigged, when in light condition, an accommodation ladder lowered to about 12 ft., above the water. This can be adjusted to suit conditions. A pilot ladder should be rigged abaft the accommodation ladder, to within 3 ft. above the water. This will enable the Pilot to ascend the pilot ladder clear of the launch and then step on to the lower platform of the accommodation ladder. United Kingdom Merchant Shipping (Pilot Ladders) Rules are relevant.

ANCHORAGE: In the event of a berth not being available, or suspension of mooring operations on arrival, a good anchorage can be used South of the berths in the vicinity of the Marqab Light Buoy positioned at: Lat. 35° 12' 27" N., Long. 35° 54' 46" E. It is important to maintain a listening watch on VHF, Channel 16 or visual watch on the shore Signal Station positioned approximately at Lat. 35° 13' 04" N., Long. 35° 57' 00" E. and recognised at night by lozenge shaped lights, in order to avoid delays.

On being advised of expected time "Mooring Master will board", heave short your anchor before his arrival.

Vessel Berthing Confirmation: Vessels waiting at anchorage for confirmation or other reasons beyond the control of Banias Terminal, will be boarded by Mooring Master within 4 hours after such confirmation is received, providing free allocated berth and suitable weather.

RESTRICTIONS: Berthing operations for loading and unloading will take place only between 0700 hrs. and 1600 hrs. (local time) in Winter, and 0600 hrs. and 1800 hrs. (local time) in Summer, i.e. during daylight, SHINC and weather permitting. Summer starts 1st May and Winter starts 1st November.

MAX. SIZE: See "Berthing".

NOTICE OF READINESS: Time of Notice of Readiness tendered will be considered when vessel arrives in the very near vicinity of the Marqab Light Buoy (position Lat. 35° 12' 27" N., Long. 35° 54' 46" E.), where the Pilot/Mooring Master will board and receive ship and remain on board throughout the entire operation.

HEALTH: Masters of tankers due may obtain Free Pratique by addressing the usual quarantine message to their Agents through commercial radio channels.

RADIO/VHF: Banias Terminal Radio Station – Call sign: "YKM 5". Frequency: 500 kHz and 442 kHz and VHF Channel 16. Also see "Radio Procedure" below.

Tanker VHF Radio Communications: Vessels approaching Banias can communicate with the Terminal by FM, VHF, Channel 16. Range 30 to 40 miles. Frequency 156.8 MHz. Simplex Operation. Call sign: "Banias". On arrival, ship's radio installations will be sealed according to normal practice and the boarding Mooring Master will put his own portable equipment on board. Communications will then be as follows:

Banias – Equipment: Fixed station sited in the Terminal. Call sign: "Banias". Frequency: Transmitting 163.6 MHz. Receiving 159.1 MHz. Range: 8 miles. Watches: Continuous whilst vessels are in port or immediate vicinity.

Mobile Station – Equipment: Placed aboard vessel on arrival at Banias. Call sign: Ship's name. Frequency: Transmitting 159.1 MHz. Receiving 163.6 MHz. Range: 5 miles. Watches: Mutually agreed between ship and the Terminal on first establishing contact.

Note: The radio telephone circuit is connected with the main Company Communications network in Banias Terminal.

Radio Procedure:

Station	*Banias Syria* Private station for communication with tankers bound for Banias, Syria.

Call sign: YKM5
Address: S.C.O.T. Banias – Syria

MF Schedules (A1)

Banias Radio Station (YKM5) keeps a 24 hours continuous watch on 500 kHz and answers calls on 500 kHz. QSY 440 kHz for traffic. Broadcasts traffic list on 500 kHz at 0430, 0830, 1230, 1630 and 2030 (GMT). Receives on ship frequencies 425, 454, 468, 480 and 512 kHz – also broadcasts traffic lists, on 440 kHz at 0432, 0832, 1232, 1632 and 2032 (GMT).

HF Schedules (A1)

Time GMT	*Listens on*	*Answers on*	*Traffic list at (GMT)*
04 – 05	4 MHz Band	4351 kHz	0410
05 – 06	8 MHz Band	8667 kHz	0510
08 – 09	6 MHz Band	6493 kHz	0810
09 – 10	12 MHz Band	12987 kHz	0910
12 – 13	8 MHz Band	8667 kHz	1210
13 – 14	16 MHz Band	16967 kHz	1310
16 – 17	16 MHz Band	16967 kHz	1610
17 – 18	6 MHz Band	6493 kHz	1710

VHF Schedules (F.3)

Banias Terminal keeps watch on Channel 16. This has a range of approximately 40 miles and its call sign is "Banias Control".

For traffic, change to another channel as instructed by Banias Terminal.

Note: YKM5 deals only with traffic for SCOT Banias QSJ nil.
YKM5 uses only two frequencies out of HF schedule.
From 0500 to 0600 on 8667 kHz.
From 0800 to 0900 on 6493 kHz.
From 1700 to 1800 on 6493 kHz.

Confirmation of ETA's: To avoid delay on arrival, it is essential and in your interest to communicate with YKM5 at least 48 hours prior to arrival, and thereafter maintain contact, also stating cargo quantity and grade, max. rate (load/offload), SWL of derrick capacity, specific gravity and temperature, n.r.t. and arrival draft. Failure to give any notice at least 24 hours prior to arrival may delay the Notice of Readiness by an amount equal to the difference between 24 hours and the number of hours of notice prior to arrival, and this at the sole discretion of the Terminal.

In the event of a ship having arrived without having contacted Banias Control 4 hours before ETA, a 4 hour period shall accrue to Banias Terminal before a Mooring Master boards the ship.

TUGS: Available only on demand from General Directorate of Harbours at Lattakia.

MOORING REQUIREMENTS:

Forward:

Anchors to be fitted with marker buoys with 20 fathoms of line.
2×120 fathom mooring lines.
2 rope stoppers.
1 suitable wire stopper (preferably Carpenter Patent) for use with 4.75 in. mooring lines.

Aft:

4×120 fathom mooring lines.
4 rope stoppers.
2 suitable wire stoppers (preferably Carpenter Patent) for use with 4.75 in. to 5.5 in. mooring lines.

Boat Ropes

To be rigged on either side of ship, and of not less than 4.5 in. circumference.

Derricks and Cranes: Must be capable of plumbing overside abreast of discharging manifold.

Load/Offload Manifold:

2 × 0.25 in. spanners.
2 × 0.875 in. spanners.
2 × 7 lbs. hammers.
1 × 2 lbs. axe.

Hose hang-off bitts are required at about 10 ft. from the ship's rail at the loading manifold, to secure submarine hoses on the port side.

Safety of Mooring and Anchor Chains: Vessel must have not less than 11 shackles of anchor chain on each side.

On completion of mooring operation, vessel must have between 6.5 and 7.5 shackles of anchor chain tight in the water in conformity with vessel's LOA.

BERTHING: The open sea line berths (CBMS) are situated to the North of Marquab Light Buoy.

Each berth is equipped with flexible hoses connected by pipelines to shore installations.

At all berths vessels moor using both anchors forward, with wires to a buoy on the port bow, one buoy astern and one on each quarter. Hoses are lifted on the port side to be connected to the ship's manifold which must have pressure gauge fitted.

Berths No. 2 and 3:

	Loading	*Unloading*
Max. LOA	925 ft.	900 ft.
Min. LOA	600 ft.	600 ft.
Max. d.w.t.	130,000 tonnes	97,000 tonnes
Max. Draft:		
Berth No. 2	52 ft. (Summer)	50 ft. (Winter)
Berth No. 3	53 ft. (Summer)	51 ft. (Winter)
Min. SWL of Derrick	7.5 tons	

Vessel's pumps to maintain pressure of 7 kg./sq.cm. at ship's connecting manifold during the entire discharging operation.

Vessel should have the possibility of ballasting while discharging cargo at any time without contamination of cargo and delaying operations (Segregated ballast systems).

Max. loading rate per berth per hour: 5,500 tons when both berths are in use.

Berth No. 4:

Max. LOA	750 ft.
Min. LOA	560 ft.
Max. Draft	42 ft. (Summer and Winter).
Min. SWL of Derrick	7.30 tons.
Max. d.w.t.	66,000 tonnes.
Min. d.w.t.	30,000 tonnes.

Berth is equipped with 2×24 in. sea lines, and 2×16 in. hose strings ending with 2×12 in. hoses and valved displacement manifold.

A minimum distance of 3.0 m. between ship's manifold and ship's rail is required for safe connections.

One of the sea lines is for displacement purposes only.

Max. loading rate 2,000 tons per hour.

Berth No. 5:

	In Summer	*In Winter*
Max. LOA	840 ft.	815 ft.
Min. LOA	600 ft.	600 ft.
Max. d.w.t.	85,000 tonnes	66,000 tonnes
Min. d.w.t.	35,000 tonnes	35,000 tonnes
Max. Draft	43 ft.	41 ft.
Min. SWL of Derrick	7.5 tons	

Berth is equipped with PLEM mounted sub-sea valves remotely operated from shore.

Loading rate: 2,000 cu.m./hr. for heavy fuel and 1,900 cu.m./hr. for white products.

Discharging rate for gas oil: 3,000 cu.m./hr.

Note: Ship's hose connecting manifold to be equipped with pressure and temperature gauges.

Berth No. 6:

	In Summer	*In Winter*
Max. LOA	700 ft.	650 ft.
Min. LOA	500 ft.	500 ft.
Max. d.w.t.	50,000 tonnes	40,000 tonnes
Min. d.w.t.	20,000 tonnes	20,000 tonnes
Max. Draft	34 ft.	32 ft.
Min. SWL of Derrick	7.5 tons	

Berth is equipped with PLEM mounted sub-sea valves remotely operated from shore.

Max. loading rate: 1,500 cu.m./hr. for vacuum gas oil and 2,000 cu.m./hr. for premium gasoline.

Ship's hose connecting manifold to be equipped with pressure and temperature gauges.

Berth No. 7: (For LPG).

Max. LOA	700 ft.
Min. LOA	350 ft.
Max. d.w.t.	7,000 tonnes.
Min. d.w.t.	3,000 tonnes.
Max. Draft	24 ft. (Summer and Winter).
Note:	
Min. LOA	300 ft. can be accepted but only in fine weather, provided ship has sufficient ropes.
Min. SWL of Derrick	3 tons.
Single derrick or crane for lifting:	(a) One string of 8 in. cargo hose. (b) One string of 4 in. balance line hose.

Note: Both strings of hose (210 ft.) end with relevant class 300 AS Camlock coupling and butterfly valve.

Minimum Cargo Temperature:
(a) Summer+10°C.
(b) Winter +10°C or ambient temperature.

Flow rate: 300 t.p.h.

Max. pressure at ship's manifold: 7.0 kg./sq.cm.

Ship's manifold to be equipped with clean filters, temperature and pressure gauges.

Ship's connecting flanges to be diameter 8 in. and 4 in. respectively class 300 ASA.

Minimum time for opening and closing any line valve to be more than 30 seconds to avoid surges.

All tools to be of a non-spark generating metal, such as copper.

Berth No. 7: (For Jet Fuel).

Max. LOA	700 ft.
Min. LOA	350 ft.
Max. d.w.t.	20,000 tonnes.
Min. d.w.t.	8,000 tonnes.
Max. Draft	28 ft. in Summer. 26 ft. in Winter.
Min. SWL of Derrick	5 tons.

Loading rate: 1,500 cu.m./hr.
Discharge rate: 2,200 cu.m./hr.

Maximum pressure at ship's manifold during discharge: 7 kg./sq.cm

Ship's manifold to be equipped with filters which are to be cleane and ready for use at each call.

Ship's connecting manifold to be equipped with pressure gauge.

All connection tools (spanner, hammer, etc.) to be of copper.

HOSES: Berth are numbered from North to South:

No. 2: For Crude Oil: 2 strings of 10 in. hose ending with 12 in. reduce (160 ASA).
No. 3: For Crude Oil: 2 strings of 16 in. hose ending with 12 in. reduce (150 ASA).
No. 4: For Fuel Oil: 2 strings of 12 in. hose ending with 12 in. butter valves, and displacement manifold (150 ASA).
No. 5: For Fuel Oil and White Products: One string of 16 in. hose each, ending with 12 in. butterfly valve (150 ASA).
No. 6: For Fuel Oil and White Products: One string of 16 in. hose each, ending with 12 in. butterfly valve (150 ASA).
No. 7: For LPG and Jet Fuel:
LPG: One string of 8 in. hose ending with 8 in. butterfly valve (3 ASA). One string of 4 in. hose ending with 4 in. butterfly va and used as balance line (300 ASA).
Jet Fuel: One string of 12 in. hose ending with 12 in. butte valve (150 ASA).

LOADING/DISCHARGING:

1. Ship's hose connecting manifold to be equipped with press gauge.
2. When discharging, the pressure at the ship's manifold should exceed 7 kg./sq.cm., and within this range of pressure the Term installations are capable of receiving at various rates, depending berth and storage tanks allocated to the ship. The Term Administration would prefer the ship's pumps to be rated accordin and to be of the centrifugal type.
3. Loading-on-top slops (LOT) is not acceptable, and slops t segregated from cargo, as Banias Terminal is not equipped slop treatment facilities. Pressure gauge to be fitted on ship's side connecting manifold.

BALLAST: The Port Authority is most strict and will impose heavy for any oil pollution of the sea. In addition, vessels may be ordered of the berth and at risk of losing turn. Ensure ballast quantity onb is kept to about one third of d.w.t. in Winter and one quarter of d.w Summer for safe manoeuvring in the prevailing weather condi Excess ballast causes delay.

Banias is an open roadstead and sudden changes in weather can be experienced especially during the Winter months. It is good practice to commence loading as soon as hoses are connected and whilst ballast discharge is still in progress, always providing this can be achieved safely and with no danger of contamination.

POLLUTION: The Port Authorities will, in cases where pollution is ascertained, collect a declaration from the Master of the offending ship, in which declaration he authorises his Agents to pay any fine to be levied by the Official Committee in the future.

In the light of the above and to avoid any delay to vessels, Owners are kindly requested to:

1. Supply vessels with necessary chemicals to destroy any quantity of oil overflowing into the sea.
2. Provide a bank guarantee of Stg. £5,000 to be deposited against eventual fines. Such a guarantee (or cash) must be given before offending vessel is released.

MEDICAL: Hospital facilities or other relevant medical information are available through Agent on and/or prior to arrival of vessel.

FRESH WATER: Available through Agents by means of barges, cost U.S.$10.00 per ton.

FUEL: Diesel oil available via Agent.

SURVEYORS: Through Agents – Shipco.

CUSTOMS ALLOWANCES: According to regulations or at Customs' own discretion.

REPATRIATION: Facilities exist through Agents.

TIME: Local time is GMT plus 2 hours.

SERVICES: In the event of tankers requiring assistance to lift loading hoses, recover lost anchors, and cables, etc., limited aid may be given during normal working hours. Current charges are available on application from Agent.

SHORE LEAVE: Permission may be obtained from Immigration Dept. ashore through Agents.

GARBAGE DISPOSAL: Available via Agent.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: Usual local facilities.

CURRENCY: Syrian Pound.

REGULATIONS: Terminal Requirements and Conditions of Use of Terminal Facilities will be handed over to Master of vessel at each time of call. The following are some of the regulations in the booklet.

Vessel in Berth: Ships are not allowed to remain in berth for any reason when loading operation stopped. Hoses should be disconnected and dropped to sea unless stay authorised by Terminal Superintendent.

Deck Watch: A continuous watch on deck must be maintained throughout the operations, especially towards the Shore Signal Station positioned as follows: Lat. 35° 13' 04" N., Long. 35° 57' 00" E, to ensure safe operations and to avoid delays, in addition to a continuous watch on Channel 16.

Lighting: During hours of darkness the manifold and poop mooring area of the sea in vicinity of ship should be adequately lit.

Main Engines: Must be kept on shore notice. Repairs which will immobilise must not be carried out in berth.

Deck Machinery: Must be ready for immediate use at all times.

Whistle or Siren: To be available at all times.

Signalling: An "Aldis" type lamp to be readily available.

Stores, Provisions, Etc.: It is strictly forbidden for provisions, stores or other items to be received or discharged whilst loading is in progress. Launches or other craft must not lie alongside during the same period.

Tanker Safety Regulations: Tanker Safety Requirements must be strictly adhered to at all times. The Mooring Master is authorised to stop all operations should he consider the safety regulations are not being complied with.

Please refer to Tanker Safety Guide (LPG and Others).

Boarding: The boarding of a vessel whilst in a mooring is restricted to persons holding valid passes which are issued by the Terminal Superintendent on application to ship's Agents and authorised chandlers. This restriction is applied in conjunction with the Syrian Harbour and Security Authorities. Ship's crew are not to be disembarked for any reason before official authorisation is granted.

Guests: Guests are not allowed unless visit is approved by Master and Shore Representative jointly.

Action in Case of Emergency: In the event of a fire, oil spillage, or other emergency on the vessel, the emergency signal is: *Three or more blasts of not less than ten seconds duration each, on whistle or siren supplemented by a continuous ringing of the general alarm bells.*

Dry Certificate: Master to provide 3 copies of Dry Tank Certificate to Shore Representative duly signed.

Leaving Berth due to Bad Weather: Ship must let go the mooring ropes in water and leave berth. The ropes can be collected when weather permits.

NOTICE TO MASTER: Please be advised that any complaint or dispute between ship's and SCOT's personnel which may arise during your stay in berth, must be brought to the attention of Banias Terminal Superintendent before leaving berth for necessary investigation.

Complaints reaching the Terminal after vessel's departure will be discarded.

DELAYS: Confirmation, restricted berthing hours, unsuitable weather and free berths.

WEATHER: The Director of Port Authorities has issued statistics of the weather conditions along the Syrian coast after an experience of 20 years.

State of winds and whirlwinds on the Syrian Coast

	Kind and direction of winds
Winter	
December	Regular winds blowing from N.E. to S.E., sometimes S. to S.W., the alteration of winds is accompanied with rains.
January	Excess of storms starting to blow from S.E. to N.E. The alteration of winds from the E. is occasionally accompanied by heavy rains with probability of hail.
February	Excess of storms and heavy rains blowing from S.W. to N.E. and E.
Spring	
March	Variable winds from S.E. to S.W. and accompanied by heavy rains and altering to N.W. slight.
April	Variable winds from N.W. and S.W., and S. winds accompanied with light rains.
May	Regular winds blowing S.W. to N.W. and altering to S. sometimes accompanied by rain.
Summer	
June	Slight winds from S.W. and S.
July	Moderate winds from S. to S.W.
August	Slight N.W. winds.
Autumn	
September	Winds S.W. and N.W. accompanied by some rain from 15th September. Winds will lighten during the end of the day and will alter at night to slight E.
October	Variable winds from W. to S. and N.W. accompanied by rain will alter at night to E.
November	The winds are variable from N.E. and N.W. accompanied sometimes by rain which will alter to E.

SHIPMASTER'S REPORT: Cigarette allowance is strictly enforced at 40 cigarettes per man, and has to be carefully declared. If the Chief Steward has a slop-chest, it has to be carefully declared. Whisky has to be declared separately from other spirits, but in practice it is better to declare each type of spirits separately.

The ship's Log Book is stamped by the police.

AUTHORITY: Syrian Company for Oil Transport (S.C.O.T.), P.O.Box 13, Banias (Tartous), Syrian Arab Republic. *Tel:* 963-43-711300, 711301, 711302, 711303. *Telex:* Scot 441012 Sy. *Cables:* Scot, Banias. *FAX:* 963-43-710418. *Contact:* M.T. Askar, Terminal Superintendent in charge. M. Douba, General Manager.

BORJ ISLAM: 35.40 N. 35.48 E. (See Plan)

SHIPMASTER'S REPORT: October 1980.

LOCATION: Borj Islam is located at Lat. 35° 40' N. Long. 35° 47' 35" E. 1.4 miles to the North of Ras El Fasori.

This location was adapted about 2 years ago by the Syrian Government as a discharge zone for LPG carriers and tankers of small tonnage. In this respect, we know that the last vessel to visit this port was an LPG carrier of approximately 5,000 tons.

The coast is a conspicuous promontory with deep water in front of it. For mooring at night, there are no lights indicating this berth, and this presents difficulties.

By day, one can steer towards the cement works which is the most important point of reference in that vessels berth beneath these works.

ANCHORAGES: Vessels arriving by night should anchor in the nearby roads of Lattakia.

By day, the advisable anchorage is 200 m. on a bearing of 140° from the cement works.

PILOTAGE: Pilot must be contacted on arrival on VHF Channel 16 at Lattakia, and instructions will be given for berthing. The Pilot boards vessels at Borj Islam.

BERTHING: This is very difficult since there are no berths or buoys. The vessel berths "stern to the land" with 2 anchors 6/7 shackles on each and lines are fixed on to rocks.

Great attention must be paid to winds from the South or S.W. and West or N.W., since this location is open to such winds.

DISCHARGE: This is effected with hoses (supplied by the ship for connection purposes). The product is discharged slowly to tanker trucks.

The position where the vessel anchors has a depth of water from 11 m. to 40 m.

LATTAKIA: 35.31 N. 35.46 E. (See Plan)

PORT LIMITS: The seaward boundary of the port is about 2 miles West of the main breakwater, starting with the entrance line of 133° South.

DOCUMENTS: In addition to the copies of Bills of Lading, Cargo Manifests and the various Ship's Certificates, the Master of an arriving vessel must produce the following documents:

- Crew List, showing full names of crew members, nationality, date of birth, and rank onboard.
- Stores List.
- Passengers List.
- Health Certificates and International Inoculation Certificates.
- All other documents relevant to the ship.

PILOTAGE: Upon a vessel's arrival at the anchorage area, she may call the Pilot in any of the following ways:

(a) Flying the internationally recognised flag.
(b) Blowing the ship's whistle – 2 long and 1 short.
(c) Calling the Pilot Station on VHF – Lattakia Pilot Station – using Channel 16.
(d) Signalling the pilot boat. – Grey colour hull and white colour bridge, always flying the Pilot's flag (letter "H").

The Pilot boards an arriving vessel when she has reached a distance of about a few hundred metres West of the Breakwater Head under good weather conditions. When the weather is bad, an arriving vessel is directed to the port basin entrance by VHF. The Master is advised of proper directions to follow and when he is to lower the pilot ladder to the lee side, by the Pilot.

Traffic List: Broadcast twice daily on VHF Channel 16:

Meeting takes place at 1100 hrs.

ANCHORAGES: Upon arrival at the anchorage area referred to under "Port Limits", the vessel has to wait for orders. This Anchorage Area has a depth of 20 m. – 25 m., and all Masters waiting there have to keep listening on VHF Channel 16, from 0600 until 2200 hrs. local time, for fresh orders. It is always recommended to keep a special watch on VHF Channel 16, for sudden orders.

RESTRICTIONS: The state of tide at Lattakia is negligible, and all vessels may enter and sail out of the harbour by night or day provided she has a Pilot onboard.

MAX. SIZE: The maximum permissible length, breadth and draft of an arriving vessel are determined by the place of berth or anchorage point outside the breakwater.

HEALTH: All arriving vessels are boarded by the quarantine service to whom all relevant documents are submitted, in particular the Derat Certificate, and incidents onboard reported.

The application is filed by the Agent, who accompanies the boarding authorities. Free Pratique is never automatic.

RADIO: The name of the Lattakia station is "Lattakia Radio" on 2182 kHz or Channel 16 on the VHF. Following first contact another Channel is agreed upon, leaving Channel 16 for the pilotage service.

VHF: See "Radio" and "Pilotage".

TUGS: 16 tugs up to 1,100 h.p. Tugs are always under the direct orders of the Pilot and join the vessel at the point the Pilot boards. Usually ship's lines are used but there is no charge for the use of the tug's lines.

BERTHING: Quay berths available as follows:

Name	*Length* (m.)	*Depth* (ft.)	*Remarks*
Khahaleh Quay	600	31	28 ft. 6 in. at the root.
Silo Quay	185	25	27 ft. 6 in. at the root.
Passenger Quay	240*	22 – 31	
*East Division	55	—	21 ft. at the root.
*West Division	185	—	25 ft. at the root.
Eastern Quay	270	22	
Northern Quay	276	13	
Others	530	—	For Port Services.

None of these quays is a specialised one. Cargo is loaded or discharged either by the ship's gear or Port Co. cranes, at the entire discretion of the latter. A ship may operate in the basin or open road in and from barges.

CRANES: Electric quay cranes: 16×3-6 tons (18×6-16 tons electric cranes will be available on the extension – see "Developments"). Mobile cranes: 58×3-12 tons, 4×15 tons, 6×70 tons. Floating cranes: 1×100 tons, 1×32 tons. Forklifts: 2×30 tons (containers), 92×2-6 tons, 4×8 tons. Straddle carriers: 4×32 tons. 2 floating cranes, 100 ton and 32 ton.

BULK CARGO FACILITIES: *Grain Silos:* In the silo, there are 72 storage bins, the capacity of each is 45,000 tons of grain in which operations of sieving, fumigation, drying and filling can be carried out.

Grain is shipped automatically onboard vessels at a rate of 150 t.p.h. This rate can be doubled when the repairs are completed. Grain is discharged ex-vessels by sucking devices, the total capacity of which reaches 200 t.p.h. A study is being carried out to provide grain silos with automatic intake equipment and to develop the silos quay.

STEVEDORES: 24 hours' ETA advice is required to arrange working gangs if vessel is scheduled to operate on arrival. The average loading and discharging rates vary with the type of vessel, nature of cargo, where berthing and whether working in lighters or not.

MEDICAL: Except for urgent cases on board, the Agent need not be notified in advance. Hospitals in town available, and likewise doctors and private clinics. No particular inoculations are required.

DENSITY: 1033 (33 grams Salt per cu.m.).

FRESH WATER: Supplied either from hydrants alongside main quay or from tank barge (capacity 170 tons).

FUEL: All types of marine fuels are available, may be delivered in any quantity from tank trucks alongside quay. 48 hours' notice is required.

FIRE PRECAUTIONS: No specific precautions except that vessels carrying explosives must operate and discharge into lighters in the open Roads.

CONSULS: Sweden, Finland, Netherlands, Greece, Italy, Spain, Portugal.

REPAIRS: Only minor deck, radio, and radar repairs may be carried out. Extensive and specialised workshops are not available.

DRY DOCKS: Not available. Only a 900 ton slipway is in operation.

SURVEYORS: Only minor surveys by Lloyd's, German Lloyd and Veritas.

GANGWAY/DECK WATCHMEN: Compulsory and are supplied at a hire rate of LS 48.00 per watchman per day.

HATCHES: Normally opened and covered by the ship's crew.

CUSTOMS ALLOWANCES: Cigarettes, 2 packs per man. Spirits, as would be reasonably agreed with the Customs on board prior to sealing the vessel's stores.

CARGO GEAR: Two floating cranes are available – one of 100 tons capacity and the other of 32 tons. Both may be used at the entire discretion of the Lattakia Port Company. Also one mobile crane of 25 tons capacity.

REPATRIATION: All facilities exist and are attended to by the vessel's Agent.

AIRPORT: Damascus International airport is 340 km. from Lattakia by road.

TIME: Winter Time GMT plus 2 hours. Summer Time GMT plus 3 hours.

HOLIDAYS: Following the Lunar Calendar, the first 2 days of Bayram and Al-Adha are the only non-operational days.

POLICE/AMBULANCE/FIRE: Police Tel. No. 93; Ambulance Tel. No. 93; Fire Tel. No. 91.

TELEPHONES: No proper arrangements exist. Vessels in port may use VHF Channel 16 with the Pilot Station of Lattakia Radio.

SHORE LEAVE: Crew members allowed ashore to visit the city with shore passes issued by the Police Authorities in the port.

IDENTIFICATION CARDS: Shore passes in addition to the Seaman's Book.

DELAYS: Vary with state of congestion prevailing in the port.

DEVELOPMENTS: The execution of the 2nd development stage underway and it will cover the following new facilities:

Specialised container and Ro/Ro quays.

	Length	*Draft*
Containers	260 m.	13.3 m
Containers	190 m.	11.8 m.
Ro/Ro	200 m.	11.8 m.
General Cargo	350 m.	11.8 m.
General Cargo	425 m.	10.5 m.
General Cargo	450 m.	7.0 m.

In addition there will be new warehouses and stacking areas totalling 230,000 sq.m.

In its planning, the Company has provided for the import of equipment and machinery in a way that meets the needs of the enlarged area. Same will be supplied in accordance with fixed time schedules corresponding to the progress of execution.

There have been calls for tenders for the supply of the following equipment:

16 mobile quay cranes of 6 tons capacity (contract presently being negotiated).

2 mobile quay cranes of 16 tons capacity (contract presently being negotiated).

2 tug boats 1,500 tons (under contract).

3 passenger boats, each can accommodate 15 passengers (under contract).

Gantry cranes 45 tons capacity (under contract).

10 forklift trucks 10 tons capacity (under contract).

2 forklift trucks 30 tons – 35 tons capacity (under contract).

4 straddle carriers (under contract).

A call for tender for the supply of the following equipment is presently being prepared:

Diesel mobile crane 10 tons capacity.

A pilot boat.

VHF station and equipment.

SHIPMASTER'S REPORT: December 1979.

Documents: Health Declaration, De-Rat Certificate, Ship's Register, Cargo Manifest, all Safety, Load line and Radio Certificates.

Pilotage: Compulsory. Pilot boards in the Roads. Normal ETAs required.

Anchorage: Vessel anchored approximately 1 mile West of the breakwater in 60 ft.

Restrictions: Vessel may enter and leave at any stage of the tide; day or night.

Max. Size: Max. draft at present 28 ft. 6 in., (this is to be increased). Keel clearance of 1.5 ft. required.

Health: Vessel anchors on arrival. Free Pratique filed by Agent who accompanies boarding authorities. The authorities sign the log book and inspect all certificates which must be up-to-date.

Radio: Lattakia Radio or Banias Radio.

VHF: Pilot and Port Authority on Channel 16.

Tugs: 5 tugs available. Tugs are required for berthing, however vessels may unberth without tugs.

Berthing: Vessel berthed at the main quay which is 1 mile from the entrance. A total of 4 berths are available plus a Ro/Ro berth. Max. siz (approximately) LOA 190 m., beam 25 m. and deepest draft 28 ft. 6 in The least depth of water in the channel from sea to the berth is 30 ft Mean tidal range is negligible. Nature at the bottom is mud and the density is 1033.

Cargo Handling Facilities: There are bulk handling facilities for grain and molasses.

Cranes: There are approximately 20×5 ton cranes on the main quay There are 2 floating cranes, 1 of 35 tons capacity and the other 100 tons capacity.

There is limited storage space for containers, however this is to b increased. There is equipment for handling 20 ft. and 40 ft. containers

Facilities: The following are available: Fresh water (poor quality), fres provisions (poor quality), minor repairs, airport (at Damascus 340 km. Lloyd's Surveyor (Agency), Salvage Surveyor (Agency), ship's laund (good but expensive), bunker fuel oil and diesel oil (by truck), doct and hospital, groceries and meats.

Consuls: Sweden, Finland, Netherlands, Greece, Italy and Portugal.

SHIPMASTER'S REPORT: January 1982.

Approaches to Lattakia: The entrance to Lattakia Harbour is well defin but vessels must approach the Green Buoy near breakwater wi extreme caution. A wreck is located in position: Lat. 35° 32' N Long. 35° 43' E., approximately on a bearing of 275° – 1.8 miles fro the Green Buoy. A wide berth must be given on entry to Lattakia to th wreck (m.v. "Bravo Neck") with full load of cargo.

The harbour is generally congested and a long delay at ou anchorage must be anticipated. It is advisable for ships to register advance if this is feasible, to avoid delay. The outer anchorage does n afford good holding ground and during near gale force winds ships a liable to drag anchor.

A traffic list is generally broadcast on VHF Channel 16 at 0600 h and 1800 hrs. daily.

Logistic supplies are poor and water is a difficult commodity to obta Ships are advised to top up with water and fuel before arrival at Lattak

A prominent land mark (whitish hotel) is visible approximately 1 m West of Rasibin Hani Light.

AUTHORITY: Lattakia General Port Company, P.O.Box 220, Baghdad Street, Lattakia, Syrian Arab Republic. *Tel:* 23900/1/2/3/6. *Telex:* 451008 Lapoco Sy. *Cables:* Latakia Port. *Contact:* Madhat Abul Shamlat, General Manager.

TARTOUS: 34.53 N. 35.45 E. (See Plan)

DOCUMENTS: Bill of Health – The usual International form should be filled in on arrival and the Agent will deliver on board the Bill of Health and Port Clearance upon departure.

Manifests – Should be certified by the Syrian Consulate at port of loading in 4 copies.

Ship's Registry – To be presented to the Port Authorities upon request.

Crew List – 4 copies should be handed over to the Agent along with passenger or transit manifests.

Stores List – 2 copies required by Customs who will allow 40 cigarettes to be retained by each person on board, the balance of slop chest and stores shall be sealed during ship's stay in port. Customs officers are at liberty to search crew quarters.

Derat Certificate – Valid certificate required and no extension can be obtained.

PILOTAGE: See "Berthing".

APPROACHES: Vessels approaching the port should keep to the authorised passage defined by the following co-ordinates:

Lat. 34° 56' 24" N., Long. 35° 38' 00" E.
Lat. 34° 56' 24" N., Long. 35° 48' 36" E.
Lat. 34° 59' 00" N., Long. 35° 50' 00" E.
Lat. 34° 59' 00" N., Long. 35° 52' 36" E.
Lat. 34° 54' 24" N., Long. 35° 51' 12" E.
Lat. 34° 54' 24" N., Long. 35° 37' 48" E.

ANCHORAGE: Vessels proceeding to Tartous pick up Pilot at the Anchorage which is 0.5 miles S.W. of the main breakwater. The rocky bottom constitutes good holding ground with a depth of up to 20 m. of water.

RESTRICTIONS: *Terminal Regulations:* All tankers must be equipped with S.B.T., I.G.S. and C.O.W. and not be more than 20 years old.

MAX. SIZE: At present minimum depths are at the entrance of the harbour about 2 cables seaward of the green light on the S.W. Breakwater. Depth about 33 ft. Max. draft 32 ft. dependent on swell. Also see "Tankers".

RADIO: *Confirmation of ETA:* Before arriving at Tartous terminal, tankers must inform Tartous Control (T.T.C.) of their ETA, 72 hours and 24 hours in advance, stating: Discharging port and quantity of cargo required. Also must make contact with T.T.C. at least 2 hours before ETA at Tartous anchorage area to receive loading instructions.

Procedures for Coast Station Communication: All times in GMT.

1. After general call on 500 kHz, terminal broadcasts traffic lists on 479 kHz at 0730, 1130, 1430 and 2030 hrs., and keeps watch on 500 kHz from 0500 hrs. till 2130 hours. Answers on 479 kHz.
2. After general call, transmits its traffic lists simultaneously on 8472 and 12699 kHz at 0830, 1330 and 1930 hrs.
Keeps watch on the 8354 – 8374 kHz band from 1100 – 1130 hrs.
from 1500 – 1530 hrs.
from 1800 – 1830 hrs.
And answers simultaneously on 8472 and 12699 kHz.
3. Keeps watch on Channel 16 for 24 hours.
4. Keeps watch, calls and replies on 2182 kHz from 1100 – 1130 hrs.
from 1430 – 1500 hrs.
5. Land station charge free for motor tankers.

Tartous Terminal Station, Lat. 34° 57' N., Long. 35° 52' E.:
FC YKI 500 A1 600 watt. Hours 0700 – 2300 hrs.
479 A2
427 A2
8472 A1
12699 A1

BERTHING: Mooring Masters are supplied by the terminal and vessels can contact the terminal directly by telex No. 470002 sy, or through Shipping agent in Tartous, giving their ETA and requirements. Vessels berth heading to the predominant S.W. winds, i.e. starboard side alongside unless contrary winds prevail at the time of the berthing.

Southern breakwater – 2,650 m. long called Main breakwater
Northern breakwater – 1,650 m. long called Lee breakwater

The distance between the 2 heads of these breakwaters is 250 m. with a depth of 10.5 m., which is being dredged in order to bring it up to 13 m.

The harbour is divided into 3 basins which are protected by the 2 breakwaters: (1) The North basin; (2) The Middle basin; (3) The Southern basin. The Southern basin is the only one used presently, for the discharge of cargo.

12 vessels can be moored at anchor inside the breakwater of this basin, the depth being between 8 m. – 13 m. The turning circle at the entrance is 450 m. diameter with a depth of 11 m. – 13 m.

The main quay which is 150 m. wide offers on its Southern side from the shore side 300 m. of jetty with a depth alongside of 2 m. – 4 m., 300 m. with 8 m. and 200 m. with 9 m. to 10.5 m. depth. A standard gauge railway line is installed on the entire length of the quay.

FLOATING CRANE: A floating crane of 100 tons lifting capacity available.

POLLUTION: See "Banias".

MEDICAL: Medical facilities are available, but serious cases may involve transportation to Lattakia or Damascus.

TANKERS: *Operator:* Syrian Crude Oil Transportation Co.

Maximum safe length of tankers acceptable – 280 m.
Maximum safe draft of tankers acceptable – 52 ft.
Maximum deadweight of tankers acceptable – 35,000 – 115,000 tons.

There are 2 berths for loading:

No.	*Max. Rate*	*Sealine*	*Hoses*	*Depth of Water*
1 (North)	4,000 t.p.h.	1×28 in.	2×12 in.	76 ft.
2 (South)	5,000 t.p.h.	1×28 in.	2×12 in.	72 ft.

Loading is by gravity and loading rate depends upon height of tank and level of oil. All strings of hoses are fitted with 12 in. connections.

Notice of Readiness: Notice of Readiness will be accepted when vessel arrives in the very near vicinity of the anchorage area (Position Lat. 34° 56' 42" N., Long. 35° 49' 30" where the Mooring Master, who is Company's representative, will board and receive vessel and remain on board throughout the entire operation.

Pilot Ladder: Combination of accommodation and pilot ladder to be rigged, accommodation ladder to be lowered to within 12 ft. of water. Pilot ladder to be placed abaft and to within 3 ft. of water.

Anchorage: In the event of berth not being available or suspension of mooring operations on arrival a good anchorage is to be used South of the berths in the vicinity of the anchorage area.

Shore Control will keep vessel advised of expected time of berthing, etc.

It is important and in the vessel's interest to maintain a listening watch on Channel 16 or a visual watch on the shore, to avoid delays.

On being advised of expected time "Mooring Master will board", heave short anchor before his arrival.

Moorings:

Forward: Anchors to be fitted with marker buoys with 20 fathom of line. 2×120 fathom mooring lines; 2 rope stoppers; 1 suitable wire stopper (preferably carpenter patent) for use with 4.75 in. – 5.5 in. circ. mooring wires.

Aft: 4×120 fathom mooring lines; 4 rope stoppers; 2 suitable wire stoppers (preferably carpenter patent) for use with 4.75 in. – 5.5. in. circ. mooring wires.

Boat Ropes: To be rigged on either side and of not less than 4.5 in. circ.

Derricks and Cranes: SWL of 7 tons is recommended. it must be capable of plumbing overside abreast of loading manifold.

Loading Manifold: 2 suitable reducers to be fitted prior to arrival on port side and to be connected to the Oil Company's hose connections (12 in. series 150 flanges). The following tools to be available: 2 spanners 0.375 in., 2 spanners 0.875 in., 2 hammers 7 lbs., 1 axe 2.5 lbs.

Hose hang-off bitts are required at about 10 ft. from the ship's rail at the loading manifold to secure submarine hoses on the port side.

Safety of Mooring: On completion of mooring operation vessel must have not less than 7.5 shackles of anchor chain in the water.

Ballast: No dirty ballast.

(a) The Port Authority is most strict and will impose heavy fines for any oil pollution of the sea. In addition they may order vessel out of the berth to sea to clean any such contaminated ballast, and keep it on board vessel in a separate or slop tank. N.O.R. will not be accepted until ballast becomes clean.

(b) Ensure ballast quantity on board is kept to a minimum to safe manoeuvre in the prevailing weather conditions.

(c) Excess ballast causes delay, Tartous is an open roadstead consequently sudden changes in weather can be experienced especially during the Winter months.

(d) Leakage or spillage of oil on board ship must be collected and not be swept or washed overboard.

Ship's Assistance: Ship's crew with an Officer in Charge to assist in all operations as advised by the Mooring Master. This includes lifting, connecting, disconnecting, lowering of hoses and tending anchor cables and moorings.

Deck Watch: A complete watch on deck must be maintained throughout the operation, especially towards the shore Signal Station to ensure safe loading and to avoid delays.

Deck Scuppers Plugs: Ensure scuppers are effectively plugged. On no account should plugs be removed.

Loading Operations: (a) Ship's personnel are solely responsible for the loading operations, ie. starting, loading rate, tank switching, topping off, stopping, etc. The Mooring Master will pass requirements to Shore Control. It is in vessel's interest *to advise loading rate required, also to give 30 minutes' notice of expected time of commencing loading.*

(b) Should vessel require adjustments in the loading rate, please advise the Mooring Master, sufficient notice must be given to enable shore operators to comply. Failure to give proper warning may cause delay or a tank overflow on board.

(c) The Mooring Master will not transmit any loading instructions to the shore until the responsible Ship's Officer has admitted that:

Ship is safely moored.
Hoses are correctly connected.
All valves have been set for receiving cargo.

Order to start will be taken as final.

Vessels in berth: Ships are not allowed to remain in berth for any reason when loading operation is stopped, or disconnect hoses and drop them into the sea unless authorised by Terminal Superintendent.

Lighting: During hours of darkness the manifold, poop, mooring area of sea in vicinity of ship should be adequately lit.

Main Engines: Must be kept on short notice. Repairs which will immobilise them must not be carried out in berth.

Deck Machinery: Must be ready for immediate use at all times.

Whistle or Siren: To be available at all times.

Signalling: An "Aldis" type lamp to be readily available.

Stores, Provisions, etc.: It is strictly forbidden for provisions, stores or other items to be received or discharged whilst loading is in progress, launches or other craft other than Company launches must not lie alongside during the same period.

Tanker Safety Regulations: Must be strictly adhered to at all times. The Mooring Master is authorised to *stop all operations* should he consider that Safety Regulations are not being complied with.

Boarding: The boarding of vessel whilst in mooring should be restricted to persons holding valid passes which are issued by the Terminal Superintendent on application to ship's Agents and authorised Chandlers. This restriction is carried out in conjunction with the Syrian Harbour and Security Authorities.

Vessel not allowed to send any crew or materials outboard for any reason before asking Agents for granting the official authority.

Guests: Masters wishing to receive guests on board should make arrangements through their Agents.

Action in Case of Emergency: In the event of fire, oil spillage or other emergency on the vessel

The Emergency Signal is

3 or more blasts of not less than 10 seconds duration each on whistle or siren supplemented by a continuous ringing of the general alarm bells.

Corridor: The corridor must be followed by vessel to Tartous Terminal:

Corridor Leading to Tartous Terminal

(a)	Lat. 34° 59' 00" N.,	Long. 35° 50' 00" E.
(b)	Lat. 34° 59' 00" N.,	Long. 35° 52' 36" E.
(c)	Lat. 34° 56' 24" N.,	Long. 35° 38' 36" E.
(d)	Lat. 34° 56' 24" N.,	Long. 35° 38' 00" E.
(e)	Lat. 34° 54' 24" N.,	Long. 35° 37' 48" E.
(f)	Lat. 34° 54' 24" N.,	Long. 35° 51' 12" E.

FRESH WATER: Unlimited supplies available to vessels berthed alongside the main pier.

FUEL: Only available in very limited quantities by tanker truck.

SHORE LEAVE: No amenities for the crew exist in the town of Tartous but crew may, if required, proceed ashore with a landing permit issued by the local security services.

WEATHER: See "Banias".

DEVELOPMENTS: A new quay for phosphate is now under construction 300 m. long and 4 m. depth and will be prolonged by a quay of 250 m. length and 11 m. depth for vessels loading phosphate up to 35,000 tons capacity. One shiploader, rate 1,000 t.p.h.

A dry dock will soon be under construction for repairing vessels and tankers with a capacity varying between 40,000 tons and 60,000 tons. Also 2 slip-ways for general overhaul for small vessels of 1,000 tons and less.

SHIPMASTER'S REPORT: September 1979

Time Zone: GMT plus 2 hours.

Papers Required:

1 Health Declaration.
8 Crew Lists.
General Information Sheet (Ship's details)
Provisions List.
1 Bonded Stores List.
1 Crew Effects List.
1 Firearm & Ammunition Declaration (Letter even if none).

Radio: Certain regulations are in force when approaching Tartous. When 50 miles off the coast, the following should be sent through Lattakia Radio to Tartous Harbour Master.

1. Name of ship.
2. Nationality.
3. Type of Vessel.
4. Position and time.
5. Maritime Passage to port of call.
6. Speed.

From experience it was found that Lattakia Radio did not answer until 0630 hrs. Local Time.

Approaches: Approach to Tartous should be made along the Maritime Passage between the parallels of 34° 54' 24" N. and 34° 56' 24" N. on a course of 090° from 12 miles off.

Pilotage: Pilots commence work between 0530 hrs. and 0600 hrs. and can be called on VHF Channel 16. The Pilot Station will require draft, length, and type and tonnage of the cargo. The latter being important as vessels with less than 300 tons have priority, as do container vessels and Ro/Ro ferries.

It is most probable that it will be necessary to anchor off because of congestion. Vessel was anchored in a position with the end of the main breakwater bearing 110° True, distance 1.35 miles in a depth of 15 fathoms. Holding ground is reputed to be good.

Clearance: Vessels will normally be cleared on arrival at the anchorage if arriving in the morning or before 1400 hrs. If not, then Notice of Readiness can be sent via Tartous Radio.

Registration: It is possible to proceed to Tartous, register a turn for berthing and then proceed to another port.

When waiting for a berth, provision should be made for a delay of about two weeks.

Fresh Water: Requests for fresh water should be made in good time. At time of writing, there is only one meter in the port, though all the berths have water laid on, so vessels have to take it in turn. Applications should be made through the Agent for water. Vessels at anchor are brought in and tie up stern to the N.W. corner of the Southern pier, the water hose then being passed over the stern, ship's hoses will be required. Pressure is good, water being supplied at about 15 to 20 tonnes/p.h. As supply of water cannot be guaranteed when a request is made, water stocks should be conserved.

Berthing: Berths are available on both sides of the Southern pier and at the end, though this area is reserved for the Ro/Ro ferries and small craft. Further berths are at the breakwater with the vessels tying up in a "Mediterranean Moor", i.e., stern to.

General: The Government Agency, Shipping Agencies Co., can be reached on Channel 16 or through Tartous Radio, their telephone numbers being 21541 & 20940.

Information regarding berthing is given by the Pilot Station on Channel 16, possibly in the evening before berthing, or in the morning an hour before berthing. Standard procedure is to weigh anchor and proceed slowly towards the four buoys marking the entrance channel. The Pilot may request that you enter the port slowly and he will board inside the breakwater. There is no difficulty in this, but it should be noted that there is a noticeable current flowing Northwards even though there is no wind.

In the Summer months, there is a seasonal low over the mainland of Syria which gives rise to a prevailing Southwesterly air stream, more noticeable in the afternoons with the advent of the sea breezes. Periods of calm are also experienced and winds from other directions but not of any great force. In the Winter months gales are experienced.

A launch service is available for vessels at anchor and at the breakwater berths, this can be arranged through the Agents. Four tugs are available, two large and two small, one of the latter doubling as the pilot launch, identifiable by the pilot flag.

Cranes are available on both sides of the pier except where the silo is under construction. A phosphate berth is situated at the South side of the harbour, there being silos for this berth, at present it is fed by road transport from the mines inland. However, it is understood that a railway is being constructed for this. Another pier (mole) is being constructed between the existing Southern Pier and the Naval Pier in the North of the harbour. Fresh vegetables are available in season.

AUTHORITY: Harbour Master, Tartous, Tartous Port Administration, *Telex:* 20562.

Oil Terminal: Syrian Crude Oil Transportation Company, P.O.Box 52, Tartous, Syrian Arab Republic. *Tel:* 315841, 316843. *Telex:* 470002 SY. *Cables:* Petsyria - Tartous. *FAX:* 222840. *Contact:* Taher Khalil, Terminal Superintendent.

NOTES

Please also advise Shipping Guides Ltd.

Taiwan

GENERAL:

RESTRICTIONS: The Taiwan Authorities have the following countries on their blacklist: Cambodia, The People's Republic of China, Albania, Romania, Cuba, Vietnam and Russia. They have decided that ships are not allowed to call at a port in Taiwan immediately before or after a call in these countries, and that ships belonging to, managed by, or operated by companies in breach of these rules are not allowed to call at ports in Taiwan.

ENTRY PERMIT: Vessels flying the flags of nations not having diplomatic relations with the Republic of China (Taiwan) must obtain an Entry Permit before arrival. To enable Agents to apply for an Entry Permit, the following documents must be supplied prior to vessel's arrival:

1 photograph, 6 in. × 8 in., shipside view, clearly showing the vessel's name, 1 copy of the vessel's Certificate of Registry. (In the case of a Danish, Norwegian or Swedish vessel, a copy of the International Tonnage Certificate will serve this purpose).

The following ships do not require an entry permit:

(a) those flying the flag of Japan, Liberia, the Philippines or the U.S.A.
(b) those flying the flag of any country having diplomatic relations with the Republic of China (Taiwan).

Vessels arriving at Taiwan ports to carry out cargo discharging and/or loading operations must be registered with the Harbour Authorities, and the following documents are required.

Discharging: A letter of appointment from the vessel's Registered Owners (not Managers, Operators, Agents, or Disponent Owners) to the vessel's Taiwan Agents. If the agency appointment is made by a Charterer, then a copy of the Charter Party (and Time Charter Party if relevant) will be required. If the Charter Party is signed on behalf of Owners, then a copy of the authority from the Owners to the signatory will be needed. In all events, documents clearly showing the line of authority from Registered Owner to Agency Appointed must be produced.

Loading: As for discharging, together with a copy of the Export Permit issued by the Board of Foreign Trade.

When a vessel is loading export cargo where freight is paid in Taiwan, a detailed Freight List and a deposit or a bank guarantee covering the total freight must be lodged with the Harbour Bureau. The deposit, or guarantee, is returnable after the cargo reaches its destination.

HUALIEN: 23.59 N. 121.38 E. (See Plan)

PORT LIMITS:

(A) Lat. 23° 56' 28" N., Long. 121° 36' 13" E.
(B) Lat. 23° 56' 29" N., Long. 121° 36' 48" E.
(C) Lat. 24° 00' 20" N., Long. 121° 38' 45" E.
(D) Lat. 24° 00' 47" N., Long. 121° 38' 18.1" E.

DOCUMENTS:

Ship's Register.
Derat Certificate.
Last Port Clearance.
Aids to Navigation Charges Memo.
Pratique.
8 copies Crew List.
1 copy Crew List visaed by office of China Mission (applicable to American vessels).
8 copies Passenger List – landing and transit.
1 List showing dates of vaccination of all crew and any landing passengers from infected areas.
1 Chinese Maritime Customs Stores List.
1 copy Crews Personel Effects List.
1 List Foreign Currency in Safe.
1 List Narcotics in Safe.
2 Lists Arms and Ammunition.
1 Set of copy Bills of Lading.
3 Manifests of Inward Cargo.
3 Manifests of Through Cargo.
3 Lists of Unmanifested Inward Parcels.
3 Lists of Mail for Landing.
Vessel's Log Book.

APPROACHES: Vessels should approach on a course of not less than 280°(T). There is extensive construction work taking place on both the Eastern and Western breakwaters with caissons anchored in the channel.

The inner channel is very narrow (80 m.) and care should be taken when adjusting course, when approaching and passing Berth No. 1.

PILOTAGE: Compulsory. Pilot boards at quarantine anchorage. At anchorage hoist 'G' flag.

ANCHORAGE: *Quarantine Anchorage:*

Positions:

	Lat.	Long.
(A)	Lat. 23° 57' 25.5" N.,	Long. 121° 36' 15.5" E.
(B)	Lat. 23° 57' 18" N.	Long. 121° 36' 33.5" E.
(C)	Lat. 23° 57' 53.3" N.	Long. 121° 36' 52.5" E.
(D)	Lat. 23° 58' 01" N.	Long. 121° 36' 34.1" E.

RESTRICTIONS: Hualien Harbour closed to all ships at 0000 hrs. until 0500 hrs. Large ships not allowed to enter after sunset.

MAX. SIZE: Draft not exceeding 14.0 m. may enter Hualien Harbour at present time.

HEALTH: At anchorage hoist 'Q' flag. If the vessel receiving a notice of Radio Pratique can take up a berth; it need not hoist "Q" flag.

RADIO: Hualien Radio XSY; ETA reported at least 24 hours before arrival.

TUGS: Normally used in harbour. Ship's lines should be used. 4 tugs, 1×2,400 h.p., 1×1,600 h.p. and 2×3,200 h.p.

BERTHING: *Deep Water Wharf:* 2,887 m. (25 berths) capable of berthing 2 – 3×6,000, 3 – 4×7,000, 4 – 5×1,000 and 3 – 4×15,000, 2×30,000 and 7×60,000 ton vessels at the same time.

Berth No.	*Length* (m.)	*Max. Draft* (m.)	*Remarks*
1	123	7.5	General Cargo
2	153	7.5	General Cargo
3	134	7.5	General Cargo
4	160	9.5	Sugar
5	160	9.5	Gravel
6	160	8.5	General Cargo
7	120	6.5	Gravel
8	220	10.0	Gravel
9	103	9.5	—
10	183	9.5	Cement Clinker
11	185	9.5	Minerals
12	150	7.5	Construction Ship use
13	185	9.5	Logs and Woodchips
14	185	9.5	Logs and Woodchips
15	100	9.5	Logs and Woodchips
16	144	7.5	Not in use at present
17	200	10.5	Open yard
18	200	10.5	Open yard
19	300	14.0	Cement
20	300	14.0	General Cargo
21	200	14.0	General Cargo
22	210	14.0	General Cargo
23	270	14.0	General Cargo
24	270	14.0	General Cargo
25	330	14.0	General Cargo

CRANES: Mobile cranes: 1×45 tons, 2×25 tons and 1×2 tons. There are 25 forklift trucks (with 2 tons – 20 tons lifting capacity) and 10 mini-tractors.

BULK CARGO FACILITIES: At Berths No. 5, 7 and 8 there is a conveyor system for loading gravel. At Berth No. 10 two cement silos (12,000 tons) with a conveyor system owned by Asia Cement Co., for loading bulk cement and Kiln Fresh Cement Clinker. At Berth No. 11 there is a conveyor system owned by China Steel Corp. for loading dolomite and crystalline limestone.

There are 21 single rope hook-on type grabs; 4 grabs at Berth No. 15 owned by Chung Hwa Pulp and Paper Corp. for discharging woodchips into trucks, 7 grabs at Berth No. 18 owned by Asia Cement Co., for discharging coal and 22 grabs belonging to Hualien Harbour Bureau for discharging gypsum, coal, metal and ores, etc. into trucks.

SPECIAL CARGO FACILITIES: There are 6 godowns on the Western wharves with a total capacity of over 40,000 tons.

There are 4 hoppers at Berths No. 13 and 14, owned by Chang Hwa Pulp and Paper Corp., for discharging woodchips into rail wagons or trucks.

STEVEDORES: Stevedores will be assessed against ships except when otherwise agreed between ships and consignees or shippers.

Advise ETA before 0800 hrs. in order to arrange gangs for 1800 hrs. same day.

Port Performance:

Daytime Work: 0800 – 1700 hrs. (0800 – 1730 hrs. in Summer).
Night Work: After completion of 8 hours daytime work till 24 hours.
Morning Work: 0600 – 0800 hrs.
General Cargo: 200-250 tons per day with only 1 gang.

Bulk: Cement loader at Berth No. 10 can load 600 t.p.h. Dolomite elevator at Berth No. 11 can load 1,200 – 1,500 t.p.h. Gravel elevators at Berth Nos. 5, 7 and 8 can load 500 t.p.h. each. Coal, ores, gypsum etc. grab buckets can unload 80 t.p.h. with only 1 gang.

MEDICAL: Hospitalisation can be arranged through Agent.

FRESH WATER: Fresh water available at all berths. Water supply will be assessed against ships and ordered through Agent. Rate 30 t.p.h.

FUEL: 6 grades obtainable from Chinese Petroleum Corporation:

1. Marine Gas Oil: SUS at 100°F, max. 38.
2. Marine Diesel Oil: SUS at 100°F, 35 – 45.
3. MF-80 (MD-600) C.S. at 122°F, max. 80 (RD No. 1, 100°F, max. 600).
4. MF-280 (MD-2700) C.S. at 122°F, max. 280 (RD No. 1, 100°F, max. 2700).
5. MF-380 (MD-4000) C.S. at 122°F, max. 380 (RD No. 1, 100°F, max. 4000).
6. Bunker C: SFS at 122°F, max. 200, C.S. at 122°F, max. 400.

Fuel line 6 in. connection, no barge available, notify in advance.

REPAIRS: Only minor repairs can be attended to in Hualien. For other repairs the nearest facilities are at Keelung or Kaohsiung.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CERTIFICATES:

Ship's Nationality Certificate.
Passenger ship Safety Certificates.
Cargo ship Safety Construction Certificates.
Cargo ship Safety Equipment Certificates.
Cargo ship Safety Radiotelegraphy (Radiotelephony) Certificates.
International Load Line Certificate.
International Oil Pollution Prevention Certificate.
International Sewage Pollution Prevention Certificate (1973).

CARGO GEAR: Loading/unloading normally effected by ship's gear.

AIRPORT: Domestic airport (10 km.) with connection to Taipei and Kaohsiung Airport.

TIME: GMT plus 8 hours.

POLICE/AMBULANCE/FIRE: Police, Tel: 223419. Ambulance, Tel: 223419. Fire, Tel: 223419. Emergency, Tel: 119 or 223419.

SHORE LEAVE: Crew members are allowed ashore only in the city of Hualien, from 0600 hrs. till 2400 hrs. Before going ashore each crew member must apply for shore pass at the Immigration Office.

IDENTIFICATION CARDS: Passport or Seaman's Book required.

Tanker Safety Regulations: Must be strictly adhered to at all times. The Mooring Master is authorised to *stop all operations* should he consider that Safety Regulations are not being complied with.

Boarding: The boarding of vessel whilst in mooring should be restricted to persons holding valid passes which are issued by the Terminal Superintendent on application to ship's Agents and authorised Chandlers. This restriction is carried out in conjunction with the Syrian Harbour and Security Authorities.

Vessel not allowed to send any crew or materials outboard for any reason before asking Agents for granting the official authority.

Guests: Masters wishing to receive guests on board should make arrangements through their Agents.

Action in Case of Emergency: In the event of fire, oil spillage or other emergency on the vessel

The Emergency Signal is

3 or more blasts of not less than 10 seconds duration each on whistle or siren supplemented by a continuous ringing of the general alarm bells.

Corridor: The corridor must be followed by vessel to Tartous Terminal:

Corridor Leading to Tartous Terminal

(a) Lat. 34° 59' 00" N., Long. 35° 50' 00" E.
(b) Lat. 34° 59' 00" N., Long. 35° 52' 36" E.
(c) Lat. 34° 56' 24" N., Long. 35° 38' 36" E.
(d) Lat. 34° 56' 24" N., Long. 35° 38' 00" E.
(e) Lat. 34° 54' 24" N., Long. 35° 37' 48" E.
(f) Lat. 34° 54' 24" N., Long. 35° 51' 12" E.

FRESH WATER: Unlimited supplies available to vessels berthed alongside the main pier.

FUEL: Only available in very limited quantities by tanker truck.

SHORE LEAVE: No amenities for the crew exist in the town of Tartous but crew may, if required, proceed ashore with a landing permit issued by the local security services.

WEATHER: See "Banias".

DEVELOPMENTS: A new quay for phosphate is now under construction 300 m. long and 4 m. depth and will be prolonged by a quay of 250 m. length and 11 m. depth for vessels loading phosphate up to 35,000 tons capacity. One shiploader, rate 1,000 t.p.h.

A dry dock will soon be under construction for repairing vessels and tankers with a capacity varying between 40,000 tons and 60,000 tons. Also 2 slip-ways for general overhaul for small vessels of 1,000 tons and less.

SHIPMASTER'S REPORT: September 1979

Time Zone: GMT plus 2 hours.

Papers Required:

1 Health Declaration.
8 Crew Lists.
1 General Information Sheet (Ship's details)
1 Provisions List.
1 Bonded Stores List.
1 Crew Effects List.
1 Firearm & Ammunition Declaration (Letter even if none).

Radio: Certain regulations are in force when approaching Tartous. When 50 miles off the coast, the following should be sent through Lattakia Radio to Tartous Harbour Master.

1. Name of ship.
2. Nationality.
3. Type of Vessel.
4. Position and time.
5. Maritime Passage to port of call.
6. Speed.

From experience it was found that Lattakia Radio did not answer until 0630 hrs. Local Time.

Approaches: Approach to Tartous should be made along the Maritime Passage between the parallels of 34° 54' 24" N. and 34° 56' 24" N. on a course of 090° from 12 miles off.

Pilotage: Pilots commence work between 0530 hrs. and 0600 hrs. and can be called on VHF Channel 16. The Pilot Station will require draft, length, and type and tonnage of the cargo. The latter being important as vessels with less than 300 tons have priority, as do container vessels and Ro/Ro ferries.

It is most probable that it will be necessary to anchor off because of congestion. Vessel was anchored in a position with the end of the main breakwater bearing 110° True, distance 1.35 miles in a depth of 15 fathoms. Holding ground is reputed to be good.

Clearance: Vessels will normally be cleared on arrival at the anchorage if arriving in the morning or before 1400 hrs. If not, then Notice of Readiness can be sent via Tartous Radio.

Registration: It is possible to proceed to Tartous, register a turn for berthing and then proceed to another port.

When waiting for a berth, provision should be made for a delay of about two weeks.

Fresh Water: Requests for fresh water should be made in good time. At time of writing, there is only one meter in the port, though all the berths have water laid on, so vessels have to take it in turn. Applications should be made through the Agent for water. Vessels at anchor are brought in and tie up stern to the N.W. corner of the Southern pier, the water hose then being passed over the stern, ship's hoses will be required. Pressure is good, water being supplied at about 15 to 20 tonnes/p.h. As supply of water cannot be guaranteed when a request is made, water stocks should be conserved.

Berthing: Berths are available on both sides of the Southern pier and at the end, though this area is reserved for the Ro/Ro ferries and small craft. Further berths are at the breakwater with the vessels tying up in a "Mediterranean Moor", i.e., stern to.

General: The Government Agency, Shipping Agencies Co., can be reached on Channel 16 or through Tartous Radio, their telephone numbers being 21541 & 20940.

Information regarding berthing is given by the Pilot Station on Channel 16, possibly in the evening before berthing, or in the morning an hour before berthing. Standard procedure is to weigh anchor and proceed slowly towards the four buoys marking the entrance channel. The Pilot may request that you enter the port slowly and he will board inside the breakwater. There is no difficulty in this, but it should be noted that there is a noticeable current flowing Northwards even though there is no wind.

In the Summer months, there is a seasonal low over the mainland of Syria which gives rise to a prevailing Southwesterly air stream, more noticeable in the afternoons with the advent of the sea breezes. Periods of calm are also experienced and winds from other directions but not of any great force. In the Winter months gales are experienced.

A launch service is available for vessels at anchor and at the breakwater berths, this can be arranged through the Agents. Four tugs are available, two large and two small, one of the latter doubling as the pilot launch, identifiable by the pilot flag.

Cranes are available on both sides of the pier except where the silo is under construction. A phosphate berth is situated at the South side of the harbour, there being silos for this berth, at present it is fed by road transport from the mines inland. However, it is understood that a railway is being constructed for this. Another pier (mole) is being constructed between the existing Southern Pier and the Naval Pier in the North of the harbour. Fresh vegetables are available in season.

AUTHORITY: Harbour Master, Tartous, Tartous Port Administration.
Telex: 20562.
Oil Terminal: Syrian Crude Oil Transportation Company, P.O.Box 52, Tartous, Syrian Arab Republic. *Tel:* 315841, 316843. *Telex:* 470002 SY. *Cables:* Petsyria - Tartous. *FAX:* 222840. *Contact:* Taher Khalil, Terminal Superintendent.

NOTES

Please also advise Shipping Guides Ltd.

Taiwan

GENERAL:

RESTRICTIONS: The Taiwan Authorities have the following countries on their blacklist: Cambodia, The People's Republic of China, Albania, Romania, Cuba, Vietnam and Russia. They have decided that ships are not allowed to call at a port in Taiwan immediately before or after a call in these countries, and that ships belonging to, managed by, or operated by companies in breach of these rules are not allowed to call at ports in Taiwan.

ENTRY PERMIT: Vessels flying the flags of nations not having diplomatic relations with the Republic of China (Taiwan) must obtain an Entry Permit before arrival. To enable Agents to apply for an Entry Permit, the following documents must be supplied prior to vessel's arrival:

1 photograph, 6 in. × 8 in., shipside view, clearly showing the vessel's name, 1 copy of the vessel's Certificate of Registry. (In the case of a Danish, Norwegian or Swedish vessel, a copy of the International Tonnage Certificate will serve this purpose).

The following ships do not require an entry permit:

(a) those flying the flag of Japan, Liberia, the Philippines or the U.S.A.
(b) those flying the flag of any country having diplomatic relations with the Republic of China (Taiwan).

Vessels arriving at Taiwan ports to carry out cargo discharging and/or loading operations must be registered with the Harbour Authorities, and the following documents are required.

Discharging: A letter of appointment from the vessel's Registered Owners (not Managers, Operators, Agents, or Disponent Owners) to the vessel's Taiwan Agents. If the agency appointment is made by a Charterer, then a copy of the Charter Party (and Time Charter Party if relevant) will be required. If the Charter Party is signed on behalf of Owners, then a copy of the authority from the Owners to the signatory will be needed. In all events, documents clearly showing the line of authority from Registered Owner to Agency Appointed must be produced.

Loading: As for discharging, together with a copy of the Export Permit issued by the Board of Foreign Trade.

When a vessel is loading export cargo where freight is paid in Taiwan, a detailed Freight List and a deposit or a bank guarantee covering the total freight must be lodged with the Harbour Bureau. The deposit, or guarantee, is returnable after the cargo reaches its destination.

HUALIEN: 23.59 N. 121.38 E. (See Plan)

PORT LIMITS:

(A) Lat. 23° 56' 28" N., Long. 121° 36' 13" E.
(B) Lat. 23° 56' 29" N., Long. 121° 36' 48" E.
(C) Lat. 24° 00' 20" N., Long. 121° 38' 45" E.
(D) Lat. 24° 00' 47" N., Long. 121° 38' 18.1" E.

DOCUMENTS:

Ship's Register.
Derat Certificate.
Last Port Clearance.
Aids to Navigation Charges Memo.
Pratique.
8 copies Crew List.
1 copy Crew List visaed by office of China Mission (applicable to American vessels).
8 copies Passenger List – landing and transit.
1 List showing dates of vaccination of all crew and any landing passengers from infected areas.
1 Chinese Maritime Customs Stores List.
1 copy Crews Personel Effects List.
1 List Foreign Currency in Safe.
1 List Narcotics in Safe.
2 Lists Arms and Ammunition.
1 Set of copy Bills of Lading.
3 Manifests of Inward Cargo.
3 Manifests of Through Cargo.
3 Lists of Unmanifested Inward Parcels.
3 Lists of Mail for Landing.
Vessel's Log Book.

APPROACHES: Vessels should approach on a course of not less than 280°(T). There is extensive construction work taking place on both the Eastern and Western breakwaters with caissons anchored in the channel.

The inner channel is very narrow (80 m.) and care should be taken when adjusting course, when approaching and passing Berth No. 1.

PILOTAGE: Compulsory. Pilot boards at quarantine anchorage. At anchorage hoist 'G' flag.

ANCHORAGE: *Quarantine Anchorage:*

Positions:		
	(A) Lat. 23° 57' 25.5" N.,	Long. 121° 36' 15.5" E.
	(B) Lat. 23° 57' 18" N.	Long. 121° 36' 33.5" E.
	(C) Lat. 23° 57' 53.3" N.	Long. 121° 36' 52.5" E.
	(D) Lat. 23° 58' 01" N.	Long. 121° 36' 34.1" E.

RESTRICTIONS: Hualien Harbour closed to all ships at 0000 hrs. until 0500 hrs. Large ships not allowed to enter after sunset.

MAX. SIZE: Draft not exceeding 14.0 m. may enter Hualien Harbour at present time.

HEALTH: At anchorage hoist 'Q' flag. If the vessel receiving a notice of Radio Pratique can take up a berth; it need not hoist "Q" flag.

RADIO: Hualien Radio XSY; ETA reported at least 24 hours before arrival.

TUGS: Normally used in harbour. Ship's lines should be used. 4 tugs, 1×2,400 h.p., 1×1,600 h.p. and 2×3,200 h.p.

BERTHING: *Deep Water Wharf:* 2,887 m. (25 berths) capable of berthing 2 – 3×6,000, 3 – 4×7,000, 4 – 5×1,000 and 3 – 4×15,000, 2×30,000 and 7×60,000 ton vessels at the same time.

Berth No.	*Length* (m.)	*Max. Draft* (m.)	*Remarks*
1	123	7.5	General Cargo
2	153	7.5	General Cargo
3	134	7.5	General Cargo
4	160	9.5	Sugar
5	160	9.5	Gravel
6	160	8.5	General Cargo
7	120	6.5	Gravel
8	220	10.0	Gravel
9	103	9.5	—
10	183	9.5	Cement Clinker
11	185	9.5	Minerals
12	150	7.5	Construction Ship use
13	185	9.5	Logs and Woodchips
14	185	9.5	Logs and Woodchips
15	100	9.5	Logs and Woodchips
16	144	7.5	Not in use at present
17	200	10.5	Open yard
18	200	10.5	Open yard
19	300	14.0	Cement
20	300	14.0	General Cargo
21	200	14.0	General Cargo
22	210	14.0	General Cargo
23	270	14.0	General Cargo
24	270	14.0	General Cargo
25	330	14.0	General Cargo

CRANES: Mobile cranes: 1×45 tons, 2×25 tons and 1×2 tons. There are 25 forklift trucks (with 2 tons – 20 tons lifting capacity) and 10 mini-tractors.

BULK CARGO FACILITIES: At Berths No. 5, 7 and 8 there is a conveyor system for loading gravel. At Berth No. 10 two cement silos (12,000 tons) with a conveyor system owned by Asia Cement Co., for loading bulk cement and Kiln Fresh Cement Clinker. At Berth No. 11 there is a conveyor system owned by China Steel Corp. for loading dolomite and crystalline limestone.

There are 21 single rope hook-on type grabs; 4 grabs at Berth No. 15 owned by Chung Hwa Pulp and Paper Corp. for discharging woodchips into trucks, 7 grabs at Berth No. 18 owned by Asia Cement Co., for discharging coal and 22 grabs belonging to Hualien Harbour Bureau for discharging gypsum, coal, metal and ores, etc. into trucks.

SPECIAL CARGO FACILITIES: There are 6 godowns on the Western wharves with a total capacity of over 40,000 tons.

There are 4 hoppers at Berths No. 13 and 14, owned by Chang Hwa Pulp and Paper Corp., for discharging woodchips into rail wagons or trucks.

STEVEDORES: Stevedores will be assessed against ships except when otherwise agreed between ships and consignees or shippers.

Advise ETA before 0800 hrs. in order to arrange gangs for 1800 hrs. same day.

Port Performance:

Daytime Work: 0800 – 1700 hrs. (0800 – 1730 hrs. in Summer).
Night Work: After completion of 8 hours daytime work till 24 hours.
Morning Work: 0600 – 0800 hrs.
General Cargo: 200-250 tons per day with only 1 gang.

Bulk: Cement loader at Berth No. 10 can load 600 t.p.h. Dolomite elevator at Berth No. 11 can load 1,200 – 1,500 t.p.h. Gravel elevators at Berth Nos. 5, 7 and 8 can load 500 t.p.h. each. Coal, ores, gypsum etc. grab buckets can unload 80 t.p.h. with only 1 gang.

MEDICAL: Hospitalisation can be arranged through Agent.

FRESH WATER: Fresh water available at all berths. Water supply will be assessed against ships and ordered through Agent. Rate 30 t.p.h.

FUEL: 6 grades obtainable from Chinese Petroleum Corporation:

1. Marine Gas Oil: SUS at 100°F, max. 38.
2. Marine Diesel Oil: SUS at 100°F, 35 – 45.
3. MF-80 (MD-600) C.S. at 122°F, max. 80 (RD No. 1, 100°F, max. 600).
4. MF-280 (MD-2700) C.S. at 122°F, max. 280 (RD No. 1, 100°F, max. 2700).
5. MF-380 (MD-4000) C.S. at 122°F, max. 380 (RD No. 1, 100°F, max. 4000).
6. Bunker C: SFS at 122°F, max. 200, C.S. at 122°F, max. 400.

Fuel line 6 in. connection, no barge available, notify in advance.

REPAIRS: Only minor repairs can be attended to in Hualien. For other repairs the nearest facilities are at Keelung or Kaohsiung.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CERTIFICATES:

Ship's Nationality Certificate.
Passenger ship Safety Certificates.
Cargo ship Safety Construction Certificates.
Cargo ship Safety Equipment Certificates.
Cargo ship Safety Radiotelegraphy (Radiotelephony) Certificates.
International Load Line Certificate.
International Oil Pollution Prevention Certificate.
International Sewage Pollution Prevention Certificate (1973).

CARGO GEAR: Loading/unloading normally effected by ship's gear.

AIRPORT: Domestic airport (10 km.) with connection to Taipei and Kaohsiung Airport.

TIME: GMT plus 8 hours.

POLICE/AMBULANCE/FIRE: Police, Tel: 223419. Ambulance, Tel: 223419. Fire, Tel: 223419. Emergency, Tel: 119 or 223419.

SHORE LEAVE: Crew members are allowed ashore only in the city of Hualien, from 0600 hrs. till 2400 hrs. Before going ashore each crew member must apply for shore pass at the Immigration Office.

IDENTIFICATION CARDS: Passport or Seaman's Book required.

GARBAGE DISPOSAL: Garbage collection service is available. This service is provided by the Port Authority. The garbage truck goes around the wharves at 0900 hrs. to collect garbage. Charges per day as follows:

Classification	*Daily Rates (NT$)*
Ships less than 5,000 G/T	197
Ships of 5,000 G/T or more but less than 15,000 G/T	375
Ships of 15,000 G/T or more	552

50% discount for ships below 500 G/T. 100% surcharge for international passenger or tourist ships. 90% discount for yachts. 30% additional charge on national or legal holidays and Sundays. Carriers shall self-dispose of waste from their holds.

WASTE OIL DISPOSAL: Not available at present.

SEAMAN'S CLUBS: Hualien Harbour Seamen's Club, Tel: 224633/223171. Facilities include postage and telephone service, food and beverages, foreign exchange, tourist information and recreation room. Open Monday to Saturday 0900 – 1200 hrs. and 1300 – 1800 hrs.

CURRENCY: New Taiwan Dollars (NT$).

AUTHORITY: Hualien Harbour Bureau, No. 66 Hai Ann Road, Hualien, Taiwan, Republic of China. *Tel:* 038-325131. *Telex:* 3609. *FAX:* 038-333757. *Contact:* Te-An Han, Director.

AGENT: Sub-Agent controlled by: Jardine, Matheson & Co. Ltd., 13/14th Floor, 50 Hsin Shen South Road, Section 1, (P.O.Box 81), Taipei. Tel: 886-2-3931177. Telex: 11391 Jardines. Cable: Jardines. Fax: 886–2-3413168, 3920435.

Associated with Jardine Shipping Agencies.

KAOHSIUNG: 22.37 N. 120.16 E. (See Plan)

PORT LIMITS: Ship considered to be an "arrived vessel" when anchored at either of following locations:

1. Northern Anchorage: Within 2 miles radius off Kaohsiung Lighthouse (Lat. 22° 37' 01" N., Long. 120° 15' 25" E.) forming a sector between Southern side of outer harbour channel toward shore line Southward.
2. Southern Anchorage: Within a radius of 2.5 miles from the signal station of the second harbour entrance (Lat. 22° 33' 21" N., Long. 120° 18' 28" E.) forming a sector between Northern side of outer harbour channel toward shore line Northward.
3. For VLCC to discharge at 2 Monobuoys: SBM No. 1 position Lat. 22° 30' 29" N., Long. 120° 17' 49" E. SBM No. 2 position Lat. 22° 29' 45" N., Long. 120° 16' 41" E. Tankers are to anchor 1.5 miles West of the No. 2 SBM as directed by Agents.

DOCUMENTS:

10 copies Crew List.
1 copy Crew Effects Declaration (include cameras, radio, etc.).
1 copy Passenger List.
1 copy Stores List (including provisions, engine, deck and bonded stores).
1 copy *Arms and Ammunition List.
1 copy *Foreign Currency List (Ship's Money List and Private Currency List).
1 copy *Narcotics List.
2 copies Import Cargo Manifest.
1 copy Through Cargo Manifest.
1 copy List of Ports of Call.
1 copy Mail List.
1 copy †Parcels List (parcels to be landed).
1 copy †Parcels List (through parcels).
1 copy Specimen signature of Master, Chief Engineer and Chief Officer.

* These items are to be sealed upon arrival.

† Articles on these 2 lists may be sealed upon arrival as warranted by conditions.

Also see "Certificates".

Advise agent by telex prior to arrival full crew list, giving name, nationality, date of birth, Discharge Book number and Passport number.

APPROACHES: The First Harbour Entrance is dredged to 11 m. MLWS. The Second Harbour Entrance, dredged to 16 m., can accommodate vessels up to 100,000 d.w.t.

PILOTAGE: Compulsory. Agents will arrange for Pilot to board vessel at anchorage outside breakwater. Pilot boat flies code flag "H".

Container ships over 15,000 g.r.t. and other freighters or tankers over 15,000 g.r.t and 200 m. LOA must take 2 Pilots at double pilotage.

ANCHORAGES: To avoid being charged double pilotage fees, arriving vessels should anchor within a 2 miles radius of Chihoushan Lighthouse (Lat. 22° 38' N., Long. 120° 15.4' E.) unless instructed to wait off the Second Harbour Entrance, in which case they should anchor within a 2.5 mile radius of the Second Harbour Entrance Signal Station (Lat. 22° 33.4' N., Long. 120° 18.4' E.). The holding ground at both anchorages is good, and they are sheltered from the worst of the N.E. monsoon winds in Winter. Vessels may have to vacate the anchorages and proceed to sea should a typhoon approach.

Tankers arriving at the SBM terminals should anchor 1.5 miles West of the Buoy No. 2 to await arrival clearance, quarantine, Immigration, Agent and Cargo Supervisor who will board by Agent's launch. CPC Pilot, Loading Master and Watchmen will board by CPC tug. After discharge, the vessel should proceed to the Northern Anchorage to await clearance for sailing.

Also see "Port Limits".

RESTRICTIONS: Container ships can enter and sail 24 hours a day. Other vessels up to midnight only. Vessels with max. draft 34 ft. if not through the Second Harbour Entrance, must await high water to enter via the First Harbour Entrance.

MAX. SIZE: Length and breadth no restriction (largest container shi entered: 950 ft. LOA and 106 ft. beam). Max. draft inner harbour 52 f during high tide. Tankers with draft over 50 ft. (2 ft. keel clearanc discharge at Monobuoy outside.

HEALTH: Free Pratique granted at anchorage after Master completes Quarantine Declaration Form furnished by quarantine doctors. Radio Pratique available (See "Keelung"). No quarantine necessary if second port in Taiwan.

Shipmaster's Report: Master visited the port in 1976 and Cholera Certificates were not requested for inspection.

RADIO/VHF: Kaohsiung Radio (XSW). Normally used by Agents whe cabling vessels. Contact with the Agent and Port Authorities may be made via Kaohsiung Port Radio on VHF Channel 16. Call Port Radio on Channels 16/14, 1 hour before arrival to report ETA at Kaohsiung Roads.

Also see "Documents".

TUGS: Harbour tugs usually join vessel after entry and while berthing Ship's lines always used. 28 tugs, 300 h.p. – 3,300 h.p. available.

BERTHING: No specific requirement except bulk-carriers and tankers with max. draft of 34 ft. via the First Harbour Entrance, must berth during high tide.

*Length of each berth.
+ Total length.

There are at present 108 wharves with a total length of 23,593 m. 26 mooring buoys capable of accommodating 25 ships.

Container Terminal No. 5 has 8 berths (No. 74, 75, 76, 77, 78, 79 and 81).

Berth No. 75 completed in March 1996. Berths No. 74, 78, 79 and 81 under construction. Berths No. 76 and 77 will open in May 1

Also see "Container Handling Facilities".

CRANES: 20 mobile cranes, 6 stationary derricks, 94 trac 248 forklifts, 5 container gantries, 57 container cranes, 50 stra carriers, 2 container tractors, 1 railtainer, 34 transtainers, 95 buckets.

3 floating cranes, other floating equipment includes 5 dredgers, 5 barges, 1 barge and 105 small craft of various descriptions.

BULK HANDLING FACILITIES: *Coal:* China Steel Berth: Max. 130,000 d.w.t. Max. LOA 320 m. Max. Draft 14 m. 2 cranes, 2 and conveyors. Daily rate 10,000 tonnes.

Berths No. 52 – 57: Max. LOA 200m. Max. Draft 10.5 m. Disch by grabs and ship's gear. Rate 3,500 tonnes per day.

Grain: There are 3 silos, 2×40,000 tons capacity and 1×80,000 tons capacity, unloading rate 300 – 500 t.p.h. 105 grabs also used to discharge grain by ship's gear at hourly rate of 40 – 50 tons per gang/hour.

CONTAINER HANDLING FACILITIES: No. 1 – total length 848 m. consists of 4 berths, Nos. 40 – 43. Berths No. 42 – 43 served by 5 gantry cranes with capacity 30-40 tonnes. 3 straddle carriers available for 20 ft. – 40 ft. containers. Storage yard of 10 hectares for 2,500 containers (TEU).

No. 2 – Includes 4 berths total length 1,204 m., Nos. 63 – 66. Berths No. 63, 65, 66 are leased to lines for exclusive use. Berth No. 64 is the only common user berth. Container handling equipment includes 13 gantry cranes with capacity 30-40 tonnes and 25 straddle-carriers for handling 20 ft. – 40 ft. containers. Storage yard of 45 hectares for 12,000 containers (TEU).

No. 3 – Includes 3 berths, Nos. 68 – 70, with total length of 1,072 m. and a depth of 14 m. The terminal has 10 container cranes with capacity 40 tonnes, 5 transtainers and a 60 hectares container yard for 17,000 containers (TEU).

No. 4 – Container Terminal No. 4 is located at Chung-Hsing Commercial Harbour Area, has a total waterfront of about 2,533 m. and width of 450 m. Designed as 8 container berths, 7 of them numbered from 116 to 122 (No. 122 still under construction), each 320 m. in length and 14.0 m. deep, are installed with 19 gantry cranes so far. Together with the extending Berth No. 115 of 276 m. length and the same depth of 14.0 m., the total back-up areas of about 100 hectares are available for storing 34,000 TEU containers. Its container handling equipment includes 20×40 tonnes container cranes and 25 transtainers for handling 20 ft. – 40 ft. containers, and 18 straddle carriers.

STEVEDORES: All Government stevedores ordered by Agents as required.

Cargo Working Hours:

General Cargo:

(1) First shift:	0800 – 1600 hrs.	No additional charge.
(2) Second shift:	1600 – 2400 hrs.	100% additional charge, daytime rates.
(3) Third shift:	0000 – 0700 hrs.	150% additional charge, daytime rates.
(4) Morning work:	0600 – 0800 hrs.	100% additional charge, daytime rates.

Containers:

0800 – 1200
1230 – 1800
1830 – 2400
0300 – 0700

N.B.: For quick despatch, relief gangs can be hired to work through meal breaks.

Port Performance:

Containers: 25 crane moves per hour.
General: 35 CBM/gang/hour or 420 tons/gang/day.
Bulk (except at special berths): 50 tons/gang/hour.

MEDICAL: No advance notice required unless emergency case. Vaccination Certificates against cholera inoculation (6 months) required. See "Health" – Shipmaster's Report.

TANKERS: Discharge lines at oil terminal inside harbour 8 in. (2 berths), and 12 in. at Monobuoy outside with necessary reducers supplied from ashore. In latter case, Master must inform Agents size of ship's manifold.

There are 3 Monobuoys situated about 7 miles S.S.E. of the Northern Anchorage. Their positions are:

SBM No. 1 – Lat. 22° 30' 29" N., Long. 120° 17' 49" E. A white flashing signal light is mounted at the centre of the buoy with a range over 5 miles. The light appears for 1 second and goes off for 2, it then appears for 1 second and goes off for 11 seconds. This cycle is repeated. The area around the mooring buoy has a depth of 66 ft. and can accommodate tankers up to 250,000 d.w.t. The current runs at a maximum of 2.5 knots.

SBM No. 2 – Lat. 22° 29' 45" N. Long. 120° 16' 41" E. depth around the area about 98 ft. capable of discharging tankers up to 250,000 d.w.t. Characters of signal light mounted at the centre of the buoy: White flash 1 second on and 1 off for 3 times then 1 second on and 8 seconds off in that cycle.

The 2 buoy moorings have facilities for 2×12 in. hose connections. Bunkers and fresh water not obtainable. Stores can be arranged for delivery by boat. Other services available to tankers at the buoys are confined to those of urgent nature.

VLCCs programmed to use the SBM Terminal are required to anchor 1.5 miles West of the No. 2 SBM for arrival clearance. Pilot/Quarantine/Immigration, Cargo Supervisor and his hose-handling party board in this area from a tug. After the discharge of cargo, the vessel is required to proceed to the Northern Anchorage to receive sailing clearance.

SBM No. 3: Max. size 300,000 d.w.t., depth 105 ft. Also see "Shipmaster's Report" dated August 1992.

Petrochemical Storage Centre – Berth No. 61: Max. LOA 232 m. (225 m. preferred) Max. Draft 10.0 m. The berth is being extended and is soon to be equipped with 4 new Chicksans.

LPG: At Talinpu at Southern entrance to Kaohsiung Harbour.

LOA – Maximum 250 m., minimum 130 m. Chicksan flange 23.0 m. above LWL. Liquid line 16 in. Vapour line 8 in. Max. Depth 14.0 m. Discharge rate up to 2,000 kl.p.h. Tank capacity: (C3) 30,000 kl, (C4) 30,000 kl.

Berth	*Shore Lines* (in.)	*Hoses* (in.)	*Grades Handled*	*Max. Pressure* p.s.i.	*Rate* t.p.h.
18 – 20	4 – 16	4 – 8	Asphalt, FO, DO, Avgas, JP4, JP5	100	700
60 – 62	4 – 10	4 – 8	Petrochemicals, LPG, liquid NH_3	100	680
Talin E, W	10 – 24	8 – 12	Crude, FO, DO, Naphtha, JP4, JP5	100	3,000
SBM No. 1	1×34	2×12	Crude	100	5,000
SBM No. 2	1×42	2×12	Crude	100	7,000

N.B.: At SBM derricks/cranes of 10 tons SWL required. There are no tank cleaning or ballast disposal facilities.

Also see "Shipmaster's Report" dated April 1990.

DENSITY: Average 1015 in Summer, 1023 in Winter.

FRESH WATER: Most berths supplied from shore line, otherwise from barge (500 tonnes – 100 tonnes capacity) paying additional lighterage. Advise agent 24 hours in advance by telex of vessel's requirements.

FUEL: All types of fuel are available. CPC, the sole supplier, owns 2 barges (500 tonnes), 1 barge (900 tonnes) and 1 barge (400 tonnes) for fuel oil and 2 barges of (200 tonnes) for diesel oil which are in constant use, so prior notice of requirements is necessary to avoid delays. Bunkers can also be obtained at the oil terminal.

Bunkers cannot be supplied at the anchorage, as the barges will not go outside the harbour.

Agent can arrange emergency offshore supply by local supply boat owner, but the price is quite high.

FIRE PRECAUTIONS: No specific regulations, but routine precautions should be enforced.

CONSULS: All in capital city Taipei, 230 miles North of Kaohsiung.

REPAIRS: China Shipbuilding Corp. provide 1,800 m. of quaywall and can handle any kind of repairs.

DRY DOCK: China Shipbuilding Corp. have a dry dock of 950 m. long with breadth 92 m. and average depth of 14 m. This dry dock is separated into 3 stages by 2 intermediate gates in between, of 380/390/180 m. respectively. Each stage can be independently operated to facilitate fabrication of ship sections, as well as to dock and repair ships.

A floating dock "Viva Island" LOA 174 m. with distance between side walls of 30 m. Draft over keel blocks 7.3 m. with lifting capacity of 11,500 tons.

SURVEYORS: S.G.S., Tel: (07) 561-1281. BV in Taipei, Tel: (02) 731-4218.

GANGWAY/DECK WATCHMEN: Recommended, to meet local security requirement.

OPENING/CLOSING HATCHES: Mostly handled by stevedores except steel hinged covers, which are to be done by crew.

CERTIFICATES: Ship's Registry, Load-line, Safety Construction, Safety Equipment, Safety Radio-telegraphy, I.O.P.P. and Derat Exemption Certificates must be inspected by Customs/Harbour Authorities.

CUSTOMS ALLOWANCES: 200 cigarettes or 1 box cigars and 1 bottle of wine or spirit allowed each. Application can be made to break seal for next issue once every 4 days.

CARGO GEAR: Cargo Gear Certificate must be valid.

REPATRIATION: Crew changes can be arranged.

AIRPORT: Kaohsiung Airport has frequent scheduled flights to major cities in Taiwan as well as regular international flights to Hong Kong, Singapore and Japan. For other international destinations, travellers must use C.K.S. International Airport which can be reached by motorway (3.5 – 4 hours) or via Taipei by domestic flight (40 minutes) and motorway (40 minutes).

TIME: Local: GMT plus 8 hours. No alteration during the year.

HOLIDAYS: National or legal holidays:

(1) New Year's Day (January 1st and 2nd).
(2) Youth Day (March 29th).
(3) Women and Children Day (The day before Tomb Sweeping Day).
(4) Tomb Sweeping Day (Late President Chiang Kai-Shek's Death Memorial Day).
(5) Labour Day (May 1st).
(6) Dragon-Boat Festival (May 5th of Chinese Lunar Calendar).
(7) Mid-Autumn Festival (August 15th of Chinese Lunar Calendar).
(8) Confucius' Birthday Anniversary (September 28th).
(9) Double Tenth Day (October 10th).
(10) Taiwan Restoration Day (October 25th).
(11) Late President Chiang Kai-Shek's Birthday Anniversary (October 31st).
(12) Dr. Sun Yat-Shes's Birthday Anniversary (November 12th).
(13) Constitution Day (December 25th).
(14) Chinese Lunar New Year's Eve (December 29th or 30th of Chinese Lunar Calendar).
(15) Chinese Lunar New Year's Day (1st, 2nd and 3rd Day of Chinese Lunar Year).
(16) All the other temporary holidays designated by Government.

POLICE/AMBULANCE/FIRE: Police and Ambulance: call 5612311 Ext. 441 or 2613000 Ext. 2717; Fire: 5612311 Ext. 443 or 2613000 Ext. 2731.

TELEPHONE: Telephone available for ships alongside wharf.

SERVICES: Laundry, ship-chandler and competent technicians available for repair of radar, radio, compass adjusting and other navigational aids. Tank cleaning equipment and facilities not available.

SHIP SUPPLY SERVICE: Off-limits deliveries can be arranged, although they are the exception rather than the norm.

SHORE LEAVE: Normally can be arranged.

IDENTIFICATION CARDS: Shore passes are issued and must be returned prior to departure.

GARBAGE DISPOSAL: A collection service is available. PVC garbage bags are provided on board. Ordinary collecting time is from 0800 – 1200 hrs. on weekdays (Monday through Saturday). Any ship in port requiring immediate collection service should either call the following telephone numbers: 5519620, 5622104 and hoist the "CD8" flag, or communicate through her agent with the harbour section of the Kaohsiung Harbour Bureau.

Charges: Every vessel whether moored at wharfs, buoys or in the anchorage, shall be charged as hereunder stipulated for harbour cleaning maintenance during its stay, commencing at anchorage until departure from harbour.

Classification	*Daily Rates (NT$)*
Ships less than 5,000 G/T	197
Ships of 5,000 G/T or more but less than 15,000 G/T	375
Ships of 15,000 G/T or more	552

50% discount for ships below 500 G/T. 100% surcharge for international passenger or tourist ships. 90% discount for yachts. 30% additional charge on national or legal holidays and Sundays. Carriers shall self-dispose of waste from their holds.

WASTE OIL DISPOSAL: A collection service is not yet available.
SEAMAN'S CLUBS: Seamen's Club Kaohsiung, 30 Peng Lai Road, Kaohsiung, Taiwan, R.O.C. Tel: 07-521-5400. Services available include general information service, postage stamps, foreign exchange, rooms for reading and recreation including bridge games, billiards and MTV, and field tours can be arranged. The Club also offers beer, cigarettes, beverages in the music room, as well as all kinds of local souvenirs.
CURRENCY: New Taiwan Dollar (NT$). NT$ 8,000 may be brought in or taken out of the ROC. Unlimited foreign currency may be brought in and if declared on arrival, may be taken out. Without a declaration, not more than U.S.$ 5,000 in cash or the equivalent in any other foreign currency may be taken out.
REGULATIONS: No curfew exists. Port opened for container ships 24 hours day and night; for other vessels between 0600 – 2300 hrs. only. For vessels, having dangerous cargo on board, and super ore carrier (beyond Panama Max.) desiring of docking at China Steel Corporation's Berth No. 97, between sunrise and sunset only. Vessels flying flag of nations without diplomatic relations with the Republic of China must send 1 copy each of ship's photo (4 in.×6 in. broadside) and photocopy of Registry or Tonnage Cert. and 10 crew lists for application of entry permit. The application must be made 1 week before their arrival.
DELAYS: With rapid extension of the harbour and more new wharves and container terminals built, delay has been considerably reduced and very rarely occurs.
DEVELOPMENTS: Construction of Container Terminal No. 5 (Berths No. 74-81) due for completion in 1997. Terminal will have a length of 2,320 m., providing 3 berths with 15.0 m. depth and 4 berths with 14.0 m. depth (Also see "Berthing").

SHIPMASTER'S REPORT: June 1983 (updated 1986).
Pilotage: Normal pilotage fees are charged from sunrise to sunset; a 50% surcharge is levied from sunset to 2400 hrs., and from 0500 hrs. to sunrise, and 100% surcharge from 2400 hrs. to 0500 hrs. If the Pilot(s) is/are embarked 2 miles or more from the breakwater at the First Harbour Entrance the above charges are doubled.
Immigration: Immigration Officials board with the Pilot/s off the First Harbour Entrance, and will join at any time between 0800 hrs. and 1800 hrs. Between 1800 hrs. and 2400 hrs. they only leave their office on the odd hour, and between 2400 hrs. and 0800 hrs. they only leave on the even hour. Time from leaving office to boarding is approximately 30 minutes.

SHIPMASTER'S REPORT: April 1990.
Berth No. 61:
Operator: CPC.
Max. draft 10.36 m.
Berth either side alongside.
LPG and petrochemicals handled.
LPG arms are 21 m. above water.
Maximum manifold pressure 7 bar.
Maximum ship's tank pressure 0.04 bar.
Cargo temperature required: Propane −42° C. Butane −4° C.
Butane liquid 10 in. Propane liquid 12 in. Vapour for both products 8 in.
Arrangement of arms: Vapour, Liquid, Liquid, Vapour.
VCM liquid 6 in. VCM vapour 4 in.
Berthing and unberthing from sunrise to sunset only.
Berth No. 104:
Operator: CPC.
Max. draft 14.50 m.
Berth port side to.
LPG and oil handled.
1×16 in. arm for liquid, 1×8 in. arm for vapour. Liquid arm is aft of vapour arm.
Cargo temperatures required: Propane −41° C. Butane −3° C.
All communication with the shore is by boat. No ship's personnel allowed through terminal.
Stores, etc., taken from boat during discharge.
Berthing and unberthing from sunrise to sunset only.
Berth No. 25:
Anhydrous ammonia discharged at this berth.
1×8 in. arm for liquid and 1×4 in. arm for vapour.

SHIPMASTER'S REPORT: August 1992.
SBM No. 3: Operator: China Petroleum Company.

Anchorage is West to W.N.W. of SBM No. 2. Upon anchoring, report time of arrival to Kaohsiung Port Control on VHF Channel 16, the time being required by the Agent for Inward Clearance. Pilots are arranged by the Agent, and vessel is informed of boarding time by Agent. No amount of calling on the VHF will get any response.

Pilot boards from a tug together with Surveyors, Mooring Master and hose handling gang, who also assist with mooring to the SBM.

Mooring is only undertaken in daylight hours. The latest time for a Pilot to board and be underway is 1700 hrs.

Unmooring is carried out at any time day or night.

Agent will board at the SBM with Customs, and requires a Crew List to be faxed to them at least a week before arrival for preparation of passes.

Shore leave is dependent on the frequency of the Ferry boat, about two a day.

A tug is normally moored aft whilst at the SBM, but is only done if a tug is available, and weather conditions merit it.

The area is fairly sheltered, but a heavy swell can affect the area, when there is bad weather in the China Sea.

Upon departure, report time to Kaohsiung Port Control.

SHIPMASTER'S REPORT: August 1995.
LPG Transhipment/Lightening Anchorage: Numerous LPG cargo transfers underway and at anchor outside port limits (with approval o Taiwanese Authorities).

Off limits services available: Stores, spares, airfreight and crew transfers, but very expensive.
Approximate Transhipment Area Limits: See B.A. Chart No. 3230.
Lat. 22° 26.3' N., Long. 120° 18.3' E. thence straight line to
Lat. 22° 27.2' N., Long. 120° 20.0' E. thence straight line to
Lat. 22° 27.2' N., Long. 120° 22.0' E. thence straight line to
Lat. 22° 25.6' N., Long. 120° 22.0' E. thence straight line to
Lat. 22° 25.6' N., Long. 120° 18.3' E. thence straight line to
original position.

The area is exposed and there is little shelter, except from Easterly winds.
AUTHORITY: Kaohsiung Harbour Bureau, 62 Lin Hai 2nd Road Kaohsiung, Taiwan. *Tel:* (07) 561-2311, Ext. 200, 551-3445. *Telex:* 71219 KHB. *FAX:* 07-561-1694. *Contact:* Oliver F.L. Yu, Harbour Director. C.C. Hsieh, Deputy Harbour Director. H.T. Sun, Harbour Master.

Associated with Jardines Shipping Agencies.

KEELUNG: 25.09 N. 121.44 E. (See Plan)

PORT LIMITS: Any ship is considered to be an "arrived ship" once she has reported to Keelung Port Radio Station whether or not actually entering the outer harbour. However, Quarantine and Customs Inspectors do not attend ships outside the breakwaters due to lack o adequate transportation also they do not consider any ship an "arrived ship" unless she actually enters the outer harbour.
LOCATION: Exact position of Port – Lat. 25° 09' 26.5" N., Long 121° 44' 22.5" E.
DOCUMENTS:
Ship's Registry.
International Load Line Certificate.
International Tonnage Certificate (1969).
International Safety Certificates.
Cargo Ships: Safety Equipment, Safety Construction, Safety Radi Telegraphy.
Passenger Ships: Passenger Safety.
Last Port Clearance.
Crew List.
Fumigation Certificate.
Import Manifests.
Through Cargo List.
Stores List.
Arms and Ammunition List.
Narcotics List.
Foreign Currency List.
Parcel List.
Passenger List.
Yellowbook for every person on board (Vaccination Certificate).
Shipmaster's Report: November 1988.
Customs:
1 Arms and Ammunition List.
1 Foreign Currency List.
1 Narcotics List (will be sealed).
1 Parcels List.
1 Crew List.
1 Mail List.
1 Passenger List.
2 Import Cargo Manifests.
1 Through Cargo Manifest.
1 Crew Personal Effects List.
1 List of Signatures.
Agent:
All Certificates (originals).
Last Port Clearance.
Quarantine:
1 Maritime Declaration of Health.
1 Crew List.
Immigration:
2 Crew Lists.
Shore Passes (obligatory).
HARBOUR APPROACHES: Vessels shall pay close attention to strong currents in the port entrance as well as East Breakw Extension.
PILOTAGE: Compulsory from anchorage to dock and any o movements in port. Pilot may also meet ships within 1 or 2 nautical m North of breakwaters, upon Agent's request. While waiting ou breakwaters for a Pilot, vessels shall keep adequate space and care of both ship's and Pilot's safety. Before arrival, vessels contact Keelung Port Radio Station (Lat. 25° 09' 42.5 Long. 121° 44' 57.5" E.) via VHF on Channel 12 to ascertain Pilot's boarding time.
ANCHORAGES: Area in outer harbour is 13.0 m. to 13.5 m. in and can only contain 4 ocean-going vessels at a time. Vessels may anchor outside breakwaters for Pilots or entry instructions.

RESTRICTIONS: Keelung Harbour Bureau Vessel Traffic Control Centre (VTCC) consists of Keelung Port Radio Station. Any ship shall apply in advance of her actual entry/exit by light signal or via VHF to Keelung Port Radio Station, and shall not leave dock nor weigh anchor nor sail, and remain close to harbour entrance before obtaining from Harbour Bureau VTCC the signal permit to enter or leave.

Pilots berth vessels 0700 hrs. – 2300 hrs. Unberthing at any time.

MAX. SIZE: Max. possible overall length less than 900 ft. Vessels or Agents shall declare ETA to Harbour Bureau 24 hours prior to their arrival.

HEALTH: Radio Pratique possible, vessel should advise Number of Certificate of Sanitary Inspection. Pratique will be granted when vessel is in anchorage. Two measures will have to be conducted by ship, these are: disinfection of ship, sampling of food and water, tetracycline drug for person, if the vessel arrives from an affected area within 5 days.

1. To obtain Free Pratique by radio, the Master is required to cable the following information to Agent within 4 to 36 hours prior to the vessel's arrival at the port.
   - (1) Ship's name.
   - (2) First port of the voyage and date/time of sailing.
   - (3) Name(s) of port(s) and respective departure time, where the vessel called within the last 10 days prior to arrival at Republic of China ports.
   - (4) ETA.
   - (5) Kind of Derat Certificate, place and date of issue.
   - (6) Number of crew and passengers on board.
   - (7) If any illness or death occurred within 10 days prior to the vessel's arrival, and if so, give a detailed report.
   - (8) If any rat or abnormal death of rats is found on board within 10 days before the vessel's arrival.
   - (9) If there is any shipment of foodstuff on board from an infected area.
   - (10) Any other information (if any doctor on board, etc.)

     (Example:)

     mv "......................" (ship's name)/New York 1st Mar 1300/Honolulu 16th Mar/25th Mar 1000/Yokohama 1st Nov 1977 Exemption/Crew 35 Passenger Nil/7 to 10 None
2. Vessels under the following conditions are not allowed to apply for the Radio Pratique:
   - (1) The interim time from the date when the vessel left the infected area and/or the place where infection is suspected to the date of the vessel's ETA at the Republic of China port, is not over the legal incubative period of infectious disease, i.e. 5 days for cholera, 6 days for plague and yellow fever.
   - (2) Infectious disease and/or suspected infectious disease and death occurred within 10 days prior to the vessel's arrival in the Republic of China.
   - (3) When any inactive rat is found or abnormal death of rats is found on board within 10 days prior to the vessel's arrival in the Republic of China.
   - (4) When the vessel possesses no valid Derat/Exemption Certificate.
3. The Quarantine Officer may still go on board the vessel after her berthing for re-inspection even if the Radio Free Pratique is granted.

   If any discrepancy is found twice or more, then the vessel will be deprived of the right to apply for the Radio Pratique for one to three voyages.
4. Fumigation by hydrocyanic acid gas (discoids) and methyl bromide is carried out by quarantine station. Derat Certificate or Derat Exemption Certificate issued also by quarantine station.
5. *(i) Procedures of Ship's Sanitary Inspection:*
   - (1) The ship company or the agency shall deliver the ship's Pre-arrival Report to the local Quarantine Station of the National Quarantine Service of the Department of Health.
   - (2) All items of Sanitary Inspection Record will be checked and credits will be given by the Quarantine Officer from the Quarantine Authority during the Harbour Joint Inspection.
   - (3) Certificate of Sanitary Inspection will be issued to the ship which has passed the Sanitary Inspection.
   - (4) Before the arrival of a ship with valid Certificate of Sanitary Inspection, the agency shall submit the ship's Pre-arrival Report with the number of Certificate of Sanitary Inspection listed. Then the ship may be exempt from inspection on board if it meets the quarantine requirements.
   - (5) As soon as arriving at the port, the ship exempted from Sanitary Inspection shall submit Maritime Declaration of Health, Lists of Passengers and Crew, the Import Manifest as well as Derat Certificate or Derat Exemption Certificate to the Quarantine Authority. If the ship fulfils the quarantine requirements, a Certificate of Pratique will be issued according to Section 14 of the Quarantine Regulations.

   (ii) Duties of Ship:
   - (1) Shipmasters with a valid Certificate of Sanitary Inspection shall report to the Quarantine Authority any incidence of sickness or death among the crew or passengers or the abnormal mortality of rats or mice on board directly or thorugh the agency before the ship arrives at the port.
   - (2) It is unnecessary to hoist the "Q" flag for the ship receiving the Notification of Entry Allowance. But the Shipmaster shall submit all the documents prescribed in 1-(5) directly or through his agency to the Quarantine Authority for examination within 6 hours of arrival (or the next working day if the ship arrives after office hours on that day).

   (iii) Duties of the Agency:
   - (1) Hours before the arrival of a ship with Certificate of Sanitary Inspection, the agency shall submit two duplicates of Ship's Pre-arrival Report with the Certificate of Sanitary Inspection number to the Quarantine Authority. After the copies are reviewed and approved, the Quarantine Authority shall mark them with an "Entry Allowance" stamp and send one copy to the agency to inform the Harbour Joint Inspection Coordination Center and the Shipmaster as well as other related authorities.
   - (2) The agency shall submit all documents prescribed in 1-(5) and go through the entry procedures as soon as the ship arrives at the port.
   - (3) The agency shall report any cases of sickness or death of the crew or the passengers or any abnormal mortality of rats or mice to the Quarantine Authority as soon as the reports are received from the Shipmaster.
   - (4) The agency shall be fully responsible for the prompt delivery of any messages between the Quarantine Authority and the Shipmaster.

RADIO:

1. Call Name: Keelung Port Radio Station is called Keelung Port Radio (or K.P.R.).
2. Channel:
   - (1) Channel 14 (156.7 MHz.) is used for Keelung Port Radio Station.
   - (2) Channel 12 (156.6 MHz.) is a spare Channel, used for Keelung Pilot Station.
   - (3) Channel 16 (156.8 MHz.) is used for distress, safety and emergency calls.
3. Communication Contents:
   - (1) Messages for vessels to enter or leave.
   - (2) Matters concerning navigation and anchorage.
   - (3) Other Emergencies.
4. Communication Distance: Any waters within diameter of 10 nautical miles from this station.
5. Priority:
   - (1) Emergency salvage at sea.
   - (2) Messages for vessels departing.
   - (3) Messages for vessels waiting outside breakwaters for entry instructions.
   - (4) Messages for vessels at anchor in outer harbour.
6. Languages to be used:
   - (1) Mandarin.
   - (2) English.
7. Remarks: Communications always in plain language. Any codes or private conversations are not allowed unless approved by officers in charge.
8. Vessels shall contact Keelung Port Radio Station via VHF as soon as they are 10 nautical miles from the harbour and shall not be considered as "reported" unless answered by the station. The reporting time is to be counted for the basis for allocating berths. The report includes:
   - (1) Nationality.
   - (2) Vessel's Name.
   - (3) Call Letters.
   - (4) ETA Outside Harbour.
9. Communication Procedures: In accordance with international radio communication procedures.
10. Vessels without VHF or with VHF out of operation and thus unable to report earlier to Keelung Port Radio Station (25° 09' 42.5" N., 121° 44' 57.5" E.) shall contact the station by light signal until answered, as they report when vessel arrives within the visual scope of Ton Pan Yu Signal Station (domiciled with Keelung Port Radio Station) in the waters outside the harbour. The report includes:
    - (1) Nationality.
    - (2) Vessel's Name.
    - (3) Call Letters.
    - (4) Actual arrival time or anchoring time outside the harbour.
11. Vessels unable to report by light signal through lack of power shall use other means to report same information as indicated in item 10 above or hoist vessel's call letters enabling registration at the station.

Keelung Radio (XSW) 500 kHz and 460 kHz. Also on 8 MHz.

RADAR/VHF: No radar service to aid navigation in port. VHF and flashing lamp only used on ship's arrival. However, Pilots carry pocket walkie-talkie's to communicate with tugs and line-men on dock.

TUGS: The Harbour Bureau operates 12 tugs viz., 5×3,200 h.p., 2×2,400 h.p., 2×1,600 h.p. 1×1,200 h.p. and 2×700 h.p. China Petroleum Corporation (CPC) operate 2×3,760 h.p. at their Shen Ao Terminal.

BERTHING: Docking during daytime, and also during night-time if weather permits.

Berths	*Length* (m.)	*Depth* (m.)	*Remarks*
Eastern Berths:			
E2	200	9	Passenger Terminal, Quick Dispatch Berth (QDB) for cargo vessels.
E3	170	9	Quick Dispatch Berth.
E4	306.3	9	General Cargo/Bulk (128 m. private use).
E5	169.2	9	Private use.
E6	180	9	Quick Dispatch Berth.
E7	178	9	General Cargo/Bulk.
E8	240	9	General Cargo/Bulk.

W15	148.3	9	General Cargo.
W16	156.5	12	W16-W18: No. 3 Container Terminal, 2×40 ton container cranes.
W17	207	12	1×40 ton container crane.
W18	215.4	12	2×40 ton container cranes.
W18B	113.8	8	Bulk Wharf/Cement Silo 9,000 tons capacity.
W19	324.2	12	W19-W26: No. 1 Container Terminal, 3×40 ton container cranes.
W20	325.6	10.5	3×35 ton container cranes.
W21	236.6	10	1×35 ton container crane.
W22-W23	400	11	3×35 ton container cranes.
W24	240	13	1×35 ton container crane.
W25-W26	510	11-13	3×35 ton container cranes.
W27	150	7	Coastal Shipping.
W29	178	4.5-6.5	Coastal Shipping.
W30	180	10.5	Grain Silo 50,500 tons capacity.
W31-W32	330	10.5/11	Wharves for Bulk Cargo but with strengthening to allow discharge of heavy lifts.
W33	210	11.5	Oil Tanker Berth.
W33B	95.8	6.5	Oil Tanker Berth.

In total, there are 40 Operation Berths and 17 private use berths.

3 mooring buoys (No. 5 to No. 7) can accommodate 2 vessels of up to 10,000 tons and 15,000 tons and length overall 200 m.

CRANES: 14 mobile cranes, capacity 15 tons – 100 tons, 182 forklifts 1.5 tons – 25 tons, 8 log carriers, capacity 5 tons – 10 tons, 31 excavators, 5 shovels, 48 mini-tractors, 87 grab buckets, and 3 floating cranes, capacity 30 tons, 50 tons and 60 tons.

Other equipment: 194 forklifts, capacity 1 ton – 25 tons; 5 portable pneumatic unloaders (for grain unloading), and 75 grab buckets and 15 excavators.

SPECIALISED CARGO HANDLING FACILITIES: Wharves No. 16 to No. 26 and East No. 9 to No. 11, for container ships, Ro-Ro ships, and "LASH" vessels. Equipment includes 24 container gantry cranes, capacity 35 tons – 40 tons, 18 straddle carriers, 2 transtainer cranes, 9 stackers, 15 tractors and 22 trailers. Therein, Wharf No. 19 provides 3 super gantry cranes, max. load 40 tons, outreach 47 m., height (from top of rail to under spreader) 33 m., rail gauge 30 m., handling capacity 33 per crane hour.

Wharf No. 30, 3 grain suckers (for grain unloading), capacity 200 t.p.h. – 300 t.p.h. Silo capacity 50,500 tons.

STEVEDORES: According to the stowage plan and cargo details, stevedores are assigned by Harbour Bureau. Work time is divided into dayshift and nightshift.

Cargo Working Hours:

General Cargo and Bulk Wharves.	Container Terminal.	
0800 – 1200 hrs.	0800 – 1220 hrs.	
1300 – 1800 hrs.	1300 – 1820 hrs.	
1900 – 2300 hrs.	1900 – 2320 hrs.	– 100% Extra Charge.
0001 – 0300 hrs.	0001 – 0620 hrs.	– 150% Extra Charge.

Port Performance:

General cargo up to 40 tons/gang/hr.

Average rate per day 480 tons.

Coal up to 60 tons/gang/hr. Rate per day 1,000-2,000 tons depending on availability of trucks.

Containers – 25 per crane/hr. excluding waiting time.

MEDICAL: All clinics and hospitals in Keelung area with English-speaking doctors. Modern hospitals available in Taipei, 30 km. away.

TANKERS: Bulk oil is discharged at Berth No. 33 and No. 33B which are fitted with 8 in., 10 in., 12 in., 16 in. and 18 in. pipelines. Length: 210 m. and 100 m., maximum draft: 11.5 m. at No. 33 and 6.5 m. at No. 33B.

Average discharge rate 550 t.p.h.

Monobuoys are also situated at Sha Lun, (W. Taiwan), connected to Taoyuan Refinery, at positions:

No. 1 Lat. 25° 09' 00" N., Long. 121° 11' 27" E.

No. 2 Lat. 25° 08' 32.4" N., Long. 121° 10' 06.3" E.

Discharge is possible at Sha Lun only under good weather conditions. Pilot boards 1 mile off the S.B.M.

Also see "Shipmaster's Reports" dated April 1990 and November 1993.

DENSITY: 1002 to 1023.

FRESH WATER:

1. Water supply facilities: Every wharf equipped with 2 hydrants of 2.5 in. in diameter, each tap delivering at rate of above 20 t.p.h.
2. Water barges, each barge delivering at rate of over 60 t.p.h.
3. Price:
   (1) Water supplied alongside priced at NT$45.00 (current exchange rate NT$27.00 to U.S.$1.00) per ton.
   (2) Water supplied by barges at NT$80.00 per ton.
4. Application: Ships/Agents shall notify Harbour Bureau as early as possible if they need fresh water.

FUEL: Bunkers available subject to ship's/Agent's advance notice t C.P.C. who operate the bunker facilities. 3 bunker barges available.

FIRE PRECAUTIONS: Special wharves for tankers, Wharves No. 3 and 33B having automatic fire equipment; fire brigade and fire boat available.

CONSULS: None. Mostly stationed at Taipei.

REPAIRS: Any ship which needs repairs must itemise repairs and declare them to Harbour Bureau via shipping company or Agent and then the repairs will be carried out in accordance with the relating articles under The Commercial Harbours Act and Administration Regulations o International Commercial Harbours. As to docking, ships may deal with China Shipbuilding Corp., Keelung Dockyard or Keelung Harbour Burea repair plant via shipping companies or Agents.

There are over 400 m. of repair wharves, cranes up to 60 tons, plat and machine shops and foundry and a full staff of skilled tradesmen.

Repairs to radio, navigational and electronic equipment can be effected.

DRY DOCK: China Shipbuilding Corp. Keelung Dockyard has 3 dr docks, 2 for vessels under 100,000 tons and another for 25,000 tons Keelung Harbour Bureau Repair Plant has 1 dock for vessels unde 5,000 tons.

SURVEYORS: Surveys of all types can be arranged. Major classificatio societies are represented.

GANGWAY/DECK WATCHMEN: Harbour policeman always assigne by authorities at gangway free of charge. Other gangway/deck watchme are recommended.

OPENING/CLOSING HATCHES: Normally carried out by stevedores excepting new designs on modern vessels.

CUSTOMS ALLOWANCES: (1) Each crew member allowed 20 cigarettes in bulk or half a pound of tobacco. (2) Each crew membe allowed 1 opened bottle of wine and 12 cans of beer.

REPATRIATION: Crew repatriation usually carried out throug International Airport in Taoyung, and Immigration prefer either individua or group visa for landing crew from ship.

AIRPORT: Taiwan's international airport C.K.S. is 65 km. from Keelun via the Freeway No. 1. Travelling time approx. 1 hour. Flights ar available direct to U.S.A., South Africa and most Asian destinations, and for Europe/Australia via Hong Kong, Bangkok or Singapore. Taipe domestic airport (30-40 minutes travelling time) has frequent schedule flights to most major cities in Taiwan.

TIME: GMT plus 8 hours. No alterations.

HOLIDAYS: New Year's Day (1st–2nd Jan.); Chinese Lunar New Year Eve and Day (3 days in Jan. and Feb.); Youth Day (29th Mar.); Ancesto Memorial Day (1 day in April); Labour Day (not a national holiday bu only for labourers) (1st May); Dragon Boat Day (1 day in June); Mi Autumn Day (1 day in September); Confucius' Birthday or Teachers' Da (28th Sept.); National Day (10th Oct.); Taiwan Restoration Day (25t Oct.); late President Chiang's Birthday (31st Oct.); Dr. Sun's Birthda (12th Nov.); Constitution Day (25th Dec.).

POLICE/AMBULANCE/FIRE: The gangway guard assigned by Harbou Police or ship's Agent will act in emergencies.

TELEPHONE: Local telephones available to be placed on board.

SHORE LEAVE: Crew allowed ashore except for crew members fro People's Republic of China.

IDENTIFICATION CARDS: Passport or other identification papers ar needed.

GARBAGE DISPOSAL: Garbage (except cargo waste) should be p in bags properly. Ship's Agent to notify Environmental Protectio Department of Keelung Harbour Bureau. Tel: (886) 4208356 for transf operations. Contact Operations Division of Harbour Bureau Tel: (88 4208287 for charges. Garbage collection and treatment will be charge depending on the tonnage as below:

1. NT$197/per day for tonnage under 5,000 tons. There is a 50 discount for tonnage under 500 tons.
2. NT$375/per day for tonnage 5,000-15,000 tons.
3. NT$552/per day for tonnage over 15,000 tons.
4. Double charge for passenger vessels.
5. At weekends and holidays, there is an additional charge of 30%.

REGULATIONS: Searching for stowaways is strictly carried out arrival and departure.

Discharge of smoke, tank washings, garbage, etc., not allowed.

DELAYS: Keelung has rainfall on about 200 days in a year, port sometimes congested after continuous rain.

GENERAL: Shore pass issued by Immigration for each crew memb on ship's arrival and will be collected on ship's departure. Anyone w loses a shore pass is subject to fine.

DEVELOPMENTS: Pneumatic unloader equipment for coal, capac 800 tons per hour, with 40,000 tons transit space to be built.

SHIPMASTER'S REPORT: April 1990 (Updated 1994).

Berth: Shen Ao.

Operator: CPC.

Maximum draft 10.80 m. (Winter) and 11.80 m. (Summer).

Max. LOA 225 m.

Max. Displacement 50,000 tonnes.

Berth starboard side alongside.

Port anchor used for berthing.

The berth is exposed to the N.E. monsoon (October to March) delays due to winds (up to Force 9), and heavy swell can be expe in this period.

Sunrise to sunset movements only. The area is subject to fog in mornings which can cause delays.

Arrangement of discharge arms for LPG said to be, from forw Propane vapour, Propane liquid, Butane liquid, Butane vapour, b practice the products are interchangeable.

Storing at this berth is not recommended as the long, narrow wal makes transport difficult.

SHIP'S OFFICER'S REPORT: November 1993.
Berth: Shen-ao.
Operator: CPC.
Maximum Draft: 10.80 m. (Winter) and 11.80 m. (Summer).
Maximum Displacement: 50,000 tonnes.
Maximum LOA: 225 m.

Between buoys and berth all dredged to 13.0 m.

When entering, leading green light bears 229°(T) from position Lat. 25° 07.58' N., Long. 121° 40.72' E.

Starboard side alongside using port anchor.

When leaving the berth, anchor chain should be brought up to 2 – 3 shackles on deck after which the Pilot will disembark.

Ling Hsing Mole can be passed safely at 30 m. off.

Delete soundings "8.1", "10", "8.4" meters 0.5 cables N.W. of Ling Hsing Mole.

Two tugs of 3,400 b.p.h. (Voith-Schneider type) can be ordered on VHF Channel 10.

During docking, tugs will be made fast on starboard side fore and aft.

Deck watch should attend to moorings all the time, due to sea swell, specifically during N.E. Monsoon.

AUTHORITY: Keelung Harbour Bureau, Harbour Building, No. 1 Chung Cheng Road, Keelung, Taiwan, Republic of China. *Tel:* 886-2-4236911. *Cables:* Kehbroc Keelung. *FAX:* 886-2-4284811, 4284812. *Contact:* Cheng-Ming You, Harbour Master.

AGENT: Jardine, Matheson & Co. Ltd, 2nd Floor, No. 4 Chung Cheng Road, Keelung. Tel: 886-2-4230161/4. Telex: 32187 Jardines. Fax: 886-2-4266371. Cables: Jarocean.

Associated with Jardine Shipping Agencies.

SUAO: 24.36 N. 121.52 E. (See Plan)

PORT LIMITS: Radius of 1 mile from North Point Lighthouse.

DOCUMENTS: Ship's Register, Derat Certificate, Last Port Clearance, Taiwan Tonnage Dues Certificate (valid 1 year), Crew List (8 copies), Stores List, Vaccination List and Yellow Book, Foreign Currency in Safe, Narcotics List, Bills of Lading, Manifest of Inward Cargo, Manifest of Through Cargo, Mail and Parcels List. Also see "General".

Distribution:

Quarantine Station: One copy each of Health Declaration, Crew List, Ports of Call, Manifest of Inward Cargo, Manifest of Through Cargo.

Customs Office: One copy each of Arms and Ammunition List, Narcotics List, Foreign Currency List, Parcels List (including Landing Parcels and Through Parcels), Stores List, Crew List, Specimen Signatures of Master and Chief Officer, Taiwan Customs Tonnage Dues (can be purchased from the Customs Office), and 3 copies each of Manifest of Inward Cargo and Manifest of Through Cargo.

Immigration Office: One copy each of Crew List, Arms and Ammunition List, Manifest of Inward Cargo, Ports of Call List.

Port Authority: One copy each of Crew List, Manifest of Inward Cargo, Manifest of Through Cargo.

Local Shipping Agent: One copy each of Ship's Particulars, Crew List, Manifest of Inward Cargo, Manifest of Through Cargo, Ports of Call.

APPROACHES: If approaching from the North or East, Kui Shan (Turtle Shaped) Island, 15 miles N.N.E. of the harbour entrance, provides a good landmark, with its 408 m. elevation.

San-Shien-Tai Island (30 m.), 1 mile E.N.E. of the entrance, is a good leading mark, and vessels should make their approach from the S.E., clearing the island by half a mile, before turning to enter. A 4.7 m. shoal exists about 450 m. S.W. of the island and another lies to the N.W. A red light sector marks danger areas near the entrance. The channel depth at the entrance is 22 m. The inner channels have depths of 15 m. to the North and 10 m. to the South.

PILOTAGE: Compulsory. Pilot boards at outside anchorage position (Lat. 24° 35' 20" N., Long. 121° 52' 30" E.). Hoist "G" flag. Daytime service only available.

ANCHORAGES: Water area from North shore to South shore, depth 14 m. to 31 m. and outer depth over 30 m. Ship may anchor and remain outside breakwater when waiting for Pilot or entry instructions.

RESTRICTIONS: Permission to enter must be granted by the Port Authority, ship's Agent should give ship's ETA to Port Authority of Suao 24 hours before arrival. Port closes from 2301 hrs. to 0200 hrs. daily.

MAX. SIZE: Max. draft 14 m. and LOA less than 290 m.

HEALTH: Radio Pratique possible (See "Keelung"). Quarantine will clear vessel in anchorage area. Stool test will be conducted if vessel arrives from an affected area within 5 days.

RADIO: Radio Suao, send cables to Harbour Master Suao, or Agent. Report ETA, draft, etc.

VHF: Channel 14 – 156.7 MHz for calling. Call sign "Suao Harbour Radio".

TUGS: Port Authority tugs assist with mooring and unmooring. Ship's lines used. 5 tugs, 2×2,400 h.p., 1×1,600 h.p., 1×1,200 h.p. and 1×1,000 h.p.

BERTHING: Docking during daytime, departure also during daytime, but sometimes at night time if permission granted from Authorities. Pilot compulsory. Vessel usually anchors in outer harbour for Pratique and inspection.

Deep water wharf 2,610 m. (13 berths) capable of accommodating vessels up to 298,000 d.w.t.

Wharf No.	*Length (m.)*	*Depth (m.)*	*Designed Depth (m.)*	*Uses*
1W	210	7.0	7.5	Service Craft
2W	170	10.5	11.0	Breakbulk
3W	215	10.5	11.0	Breakbulk

10W	175	8.5	9.0	General Cargo
11W	175	8.5	9.0	General Cargo
12W	200	8.5	9.0	Breakbulk
13W	180	8.5	9.0	Breakbulk

CARGO HANDLING FACILITIES:

Grabs:	6×3.5 cu.m. (3.5 tonnes each). 9×2.2 cu.m. (1.8 tonnes each). 9×4.5 cu.m.
Fork Lifts:	7×3 tonnes. 2×2 tonnes. 3×5 tonnes. 4×7.5 tonnes. 1×15 tonnes.
Mobile Cranes:	1×25 tons 1×30 tons 1×8 tons 2×10 tons
Shovels:	2×3 tons (Bulldozer) 2×1.7 tons.

STEVEDORES: Arranged by local Agent. Working hours: 0800 – 1200, 1300 – 1700, 1800 – 2300 and 2330 – 0300.

MEDICAL: Clinics with English speaking doctors available, modern hospitals available in Lotung, (St. Mary's Hospital, sponsored by Catholic Society) Ilan and Taipei by train or by car, 20 minutes, 30 minutes and 2 hours away respectively.

DENSITY: 1025.

FRESH WATER: Available by barge or alongside, subject 24 hours' advance notice.

FUEL: Supplied by one self-propelled barge.

CONSULS: None.

REPAIRS: Minor repairs can be carried out in port.

DRY DOCKS: Length 165 m., width 23.7 m., depth 7.7 m. Vessels under 10,000 g.r.t. can be accommodated.

GANGWAY/DECK WATCHMEN: Harbour policeman always assigned by Authority for gangway, free of charge.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CERTIFICATES: International certificates, Register, Safety Equipment, Safety Construction, Safety Radio, Load Line, Cargo Gear, etc.

CUSTOMS ALLOWANCES: Each Crew member allowed 200 cigarettes for own use and 1 bottle of wine for entertaining and for own use, Master enjoys some privileges and can keep additional cigarettes for entertaining.

REPATRIATION: Crew repatriation usually carried out through international airport in Taoyuan, near Taipei. Application to be made to Keelung Harbour Bureau.

AIRPORT: International airport in Taoyuan, 3.5 hours by car from port.

TIME: GMT plus 8 hours. For local time check in Chinese, dial telephone 117 (free of charge).

HOLIDAYS: New Year's Day (January 1st), Youth's Day (March 29th), Late President Chiang Kai-Shek's Death – Memorial Day (April 5th), Labour Day (May 1st), Dragon-Boat Day (May 5th of Lunar Calendar), Mid-Autumn Festival (August 15th of Lunar Calendar), Birthday of Confucius (September 28th), Double Tenth Day (October 10th), Recovery Day of Taiwan (October 25th), Late President Chiang Kai-Shek's Birthday (October 31st), Birthday of Dr. Sun Yet-Shen (November 12th), Constitution Day (December 25th), Eve of Chinese New Year's Day (December 29th or 30th of Lunar Calendar), Chinese New Year's Day (first day of Lunar Calendar).

POLICE/AMBULANCE/FIRE: The gangway guard assigned by Harbour Police or ship's Agent will act in emergencies; in case of fire dial 119. Police and ambulance dial 110.

TELEPHONE: Local telephones available to be placed on board.

SHORE LEAVE: Crew allowed ashore, except for crew members from Communist countries.

IDENTIFICATION CARDS: Shore pass for foreigners issued by Immigration Office according to the passport or other identification papers.

REGULATIONS: Crew cannot shelter any unlawful person on board. Searching for stowaways is strictly carried out on arrival and departure.

DELAYS: Port is sometimes congested after continued rain and delays of a few days may be caused.

GENERAL: 3 Crew Lists sent by airmail from last port to Agent. Shore pass issued by Immigration Office for each crew member on ship's arrival and will be collected on ship's departure.

AUTHORITY: Suao Harbour Bureau, 3rd Floor, Suao Port Building, Suao, Ilan, Taiwan, Republic of China. *Tel:* 039-972001, 965121. *FAX:* 039-952739. *Contact:* K.C. Wang, Port Director.

AGENT: Sub-Agent controlled by: Jardine, Matheson & Co. Ltd., 13/14th Floor, 50 Hsin Shen South Road, Section 1, (P.O.Box 81), Taipei. Tel: 886-2-3931177. Telex: 11391 Jardines. Cables: Jardines. Fax: 886-2-3413168, 3920435.

Associated with Jardine Shipping Agencies.

TAICHUNG: 24.18 N. 120.29 E. (See Plan)

PORT LIMITS: In radius of 3 miles from South Breakwater light.

LOCATION: Exact position of Port – Lat. 24° 17' 40.3" N., Long. 120° 29' 27.3" E.

DOCUMENTS: *Required by Quarantine Station:*
1 copy Health Declaration.
1 copy Crew List.
1 copy Passenger List.
1 copy Ports of Call List.
1 copy Manifest of Inward Cargo.
1 copy Manifest of Through Cargo.
1 copy Derat Certificate.
1 copy Certificate of Sanitary Inspection.
Required by Customs Office:
1 copy Foreign Currency List.
2 copies Parcels List (1 for landing parcel, 1 for through parcels).
1 copy Crew List.
1 copy Mail List.
1 copy Passenger List.
1 copy Voyage Memo.
Required by Immigration Office:
2 copies Crew List.
2 copies Passenger List.
1 copy Arms and Ammunition List.
1 copy Narcotics List.
1 copy Manifest of Inward Cargo.
Required by Port Authority:
1 copy Crew List.
1 copy Passenger List.

Besides above documents, ship's Master should present Certificates of Ship's Registry, Safety Equipment, Safety Construction, Safety Radio and Load Line to the Port Authority for inspection.

Required by Local Shipping Agent: One each of Ship's Particulars, Crew List. Last Port's Name and Leaving (Last Port) time should be forwarded by airmail to the local Agent.

APPROACHES: 24 hours available, exception vessels LOA over 190 m. and chemical vessels.

Every vessel should have up-to-date Taichung Harbour Chart on board (Chart No. 0357 in Chinese Edition), on which separation scheme and inbound/outbound routes are printed very clearly. All year round, no matter where the inbound vessels come from, North or South, those ships should comply with the separation rule and proceed on the inbound lane by course 060°(T), heading to the centre of entrance and maintaining her speed, about 6 knots. In order to steer effectively, the vessel should not stop her engine. Always keep a pilot ladder ready on the lee side (usually on starboard side). Pilot will board at about 0.5 – 1.0 nautical miles off South breakwater.

PILOTAGE: Compulsory. Pilot service is arranged by local Agent at least 24 hours in advance (Pilot office Tel: 04-6563654. Fax: 04-6566344). Pilot will board inbound vessel at 0.5 – 1.0 miles off, W.S.W. of South breakwater. Inbound vessel, receiving Pilot outside of entrance, should have ample manoeuvring space for the vessel and pilot boat. Confirm Pilot's exact boarding time by VHF on Channel 14. When a Pilot is unable to board a ship at outer breakwater in night-time or under bad weather, pilot boat will wait inside the entrance, and boarding will take place as soon as the vessel enters the breakwater.

The Pilot will bring a departing vessel to the Fairway near the inner breakwater, steady her course on 294°(T), then the Pilot will leave the ship. If the Master desires the Pilot to leave his vessel at outer breakwater, such request should be submitted to Pilot Office in advance, the Pilot shall not refuse to render this service unless it is in night-time, during adverse weather, or under other special circumstances.

ANCHORAGE: The outer harbour anchorage is located 1 – 4 miles S.W. of South breakwater. It covers an area within the following points:
(A) Lat. 24° 17' 17" N., Long. 120° 29' 21" E.
(B) Lat. 24° 17' 17" N., Long. 120° 29' 00" E.
(C) Lat. 24° 16' 24" N., Long. 120° 27' 21" E.
(D) Lat. 24° 16' 24" N., Long. 120° 25' 50" E.
(E) Lat. 24° 14' 06" N., Long. 120° 25' 21" E.
(F) Lat. 24° 14' 06" N., Long. 120° 27' 30" E.

All vessels from infected areas, or not granted Radio Free Pratique, should anchor at the turning basin directed by Pilot for Quarantine purposes.

RESTRICTIONS: Permission to enter must be granted by signal station. Ship's Agent to report ETA to Port Authority 24 hours before arrival.

MAX. SIZE: Max. draft 13 m., LOA no limit.

HEALTH: Radio Pratique acceptable. If Radio Pratique is accepted, vessel can berth directly. If vessel arrives from a cholera affected area within 5 days, Quarantine will be conducted in the Turning Basin.

Also see "Keelung".

RADIO: Via Radio Taichung (XSW2) or Radio Keelung and Radio Kaohsiung. Send cables to Agent or Harbour Master Taichung for reporting ETA, draft, etc.

RADAR: No radar service to assist navigation in port.

VHF: Call sign "Taichung Port Radio", Channel 16 (156.8 MHz) for calling purpose, Channel 14 (156.7 MHz) for message exchange, Channel 12 (156.6 MHz) for harbour craft and pilot on duty. Pilots use walkie-talkies to communicate with tugs and mooring men.

TUGS: Authority tugs assist mooring and unmooring, ship's line used. 9 tugs, 800 h.p. – 3,400 h.p.

BERTHING: Wharves 1 and 3, depth 13 m., each length 250 m., total 500 m. for grain cargo, discharged by shore grain unloaders.

Wharf 2, depth 13 m., 250 m., for bulk cargo.

Wharf 4, depth 11 m., length 200 m., for liquid cargo (molasses and chemicals).

Wharf 4A, depth 9 m., length 185 m., for logs and cement.

Wharf 5A, depth 11 m., length 220 m., for general cargo.

Wharves 5, 6, 7 and 8, depth 11 m., length 800 m., for general cargo.

Wharf 8A, depth 11 m., length 260 m., for general cargo.

Wharf 9, depth 14 m., length 260 m., for containers.

Wharves 10 and 11, depth 13 m., length 640 m., for containers (Se "Shipmaster's Report" – 1982).

Wharves 12 and 13, depth 11 m., length 400 m., for general cargo.

Wharves 14 and 15, depth 10 m., length 360 m., for general cargo.

Wharves 23 and 24, depth 10 m., length 360 m., for general cargo.

Wharf 25, depth 11 m., length 200 m., for general cargo.

Wharves 26 and 27, depth 11 m., length 400 m., for general carg (Cement – Wharf 27).

Wharf 28, depth 11 m., length 145 m., for cement.

Wharf 29, depth 14 m., length 250 m., for coal (coal unloader i planned) (See "Shipmasters' Reports" – 1982 and 1987).

Wharf 30, depth 14 m., length 320 m., for bulk or general cargo.

Wharves 31 and 32, depth 14 m., length 600 m., for containers.

Wharves W1 and W2, depth 13 m. and 14 m. respectively, lengt 250 m. each, for petroleum and chemical products.

Wharves No. W 101 and W 102, depth 18 m., length 340 m. eac for coal handling.

(For their locations see "Plan").

CRANES: 1 mobile crane up to 8 tons capacity, 1 mobile crane o 40 tons capacity, 1 mobile crane of 35 tons capacity, 1 mobile crane o 140 tons capacity. Large supply of forklifts, hoppers, grabs, electr magnets, conveyors, etc.

SPECIALISED CARGO HANDLING FACILITIES:

Container Terminal: Wharves 9, 10 and 11. Each has 1×35 ton qua side container crane. Wharf 32 has 2×35 ton quay side container cranes

Grain: Grain Elevators installed at Wharves 1 and 3.

Wharf 1: Silo capacity 90,000 tons. Wharf 3: Silo capacity 60,000 tons 2 unloaders 400 t.p.h. and 1 unloader 800 t.p.h. each at Wharf 1, an 2 unloaders 650 t.p.h. each at Wharf 3.

Discharge Rate: Agent's Report:
Grain: Silo – Wharf 1: 5,000 – 5,500 tonnes per day, 0800 hrs. - 2300 hrs. (normal rate). 8,000 – 8,500 tonnes per day, 24 hours (specia arrangement).
Silo – Wharf 3: 7,000 tonnes per day, 0800 hrs. – 2300 hrs. (norma rate). 10,000 tonnes per day, 24 hours (special arrangement).
Shipside: 700 – 800 tonnes per gang/day, 0800 hrs. – 2200 hrs. 1,00 – 1,200 tonnes per gang per day, 24 hours.
Coal: Shipside: 700 – 800 tonnes per gang/day, 0800 hrs. – 2200 hrs 1,000 – 1,200 tonnes per gang/day, 24 hours.
TPC Terminal: 20,000 tonnes per day.
Steel Products: Shipside: 750 – 800 tonnes per gang/day, 0800 hrs. 2200 hrs.
General Cargo: Shipside: 500 – 600 tonnes per gang/day, 0800 hrs. 2200 hrs.

STEVEDORES: Stevedores and equipment can be hired from th Taichung Harbour Warehousing & Stevedoring Co., Teh-Lon Warehousing & Stevedoring Co. and Taichung Harbour Bureau Marin Terminal Operations.

Cargo Working Hours:
0600 – 0800 (plus 100%)
0800 – 1200
1300 – 1700
1800 – 2200 (plus 100%)
2300 – 0500 (plus 150%)

Port Performance: General cargo 200 tons/gang/day. Bulk (other tha grain silo) 300 tons/gang/day.

MEDICAL: Clinics and hospital with English speaking doctors availab at town of Wuchi near the port.

DENSITY/TIDE: 1025/High tide and low tide average difference 3.74 m when alongside pier keep watch on moorings.

FRESH WATER: Available alongside and by water tender with capac 300 tons. No limitation on quantity.

FUEL: Ordinary bunkers available but 24 hours' advance notice require Fuel barges (450 – 600 tons) operated by C.P.C.

CONSULS: None.

REPAIRS: Docking repairs, annual repairs, periodical overhaul a routine servicing in dock for ships under 10,000 d.w.t.

GANGWAY/DECK WATCHMEN: Harbour policeman always assign by authority at gangway free of charge.

OPENING/CLOSING HATCHES: Normally carried out by stevedor except new designs on modern vessels.

CUSTOMS ALLOWANCES: Each crew member allowed 200 cigarett

REPATRIATION: Crew repatriation usually carried out through Chia Kai-Shek International Airport (180 km.) near Taipei, or Kaohsiung, abo 200 km. from this port.

TIME: GMT plus 8 hours. For correct local time dial Tel: 117, time rep in Chinese, free of charge.

HOLIDAYS: Commemoration Day of the Republic of China and N Year's Day (1st and 2nd January), Lunar New Year's Eve and Sp Festival (3 days late in January or early February), Youth Day a Chinese Martyrs' Day (29th March), National Tombs' Sweeping Day Death of President Chiang Kai-shek (5th April), Labour Day (1st M for labourers only), Dragon Boat Festival (one day in June), Mid-Au Festival (one day in September), Confucius' Birthday and Teacher (28th September), National Day (10th October), Taiwan Restoration (25th October), Chiang Kai-shek's Birthday (31st October), Dr. Sun Sen's Birthday (12th November), Constitution Day (25th Decembe

Cargo work can be arranged on holidays except Lunar New Ye Day, Labour Day, Dragon Boat Festival (only afternoon) and Mid-Au Festival (only afternoon).

POLLUTION: Discharge of tank washings, etc., in port is prohibited see "Regulations – Harbour Bureau Notice").

POLICE/AMBULANCE/FIRE: Call Taichung Harbour Po Tel: 6562174-5 or Liaison Centre of Taichung Harbour Bu Tel: 6562164.

TELEPHONE: Local telephone available to be placed onboard.

SHORE LEAVE: Crew allowed ashore, except those from Mya Cuba, mainland China and North Korea.

IDENTIFICATION CARDS: Not required, however passports or other identification papers must be submitted for request of a shore pass.

GARBAGE DISPOSAL:

(1) This port owns a garbage truck for garbage and waste disposal. The service starts from dawn.

(2) The garbage truck will collect the garbage from the galley or trash from crew's quarters only. The waste from the ship's holds or repair work shall be cleaned and transported out by truck at ship's own expense.

(3) Ship applying for garbage collection must put garbage into sealed bags and piled up for the convenience of handling.

(4) For service Tel: (04) 656-2611, Extension 352 or 367.

WASTE OIL DISPOSAL: See "above".

Ships are strictly prohibited to dump waste or bilge oil into the sea while in the port. The violator will be prosecuted according to the regulations for ship's waste disposal control.

SEAMAN'S CLUBS: Seaman's Service Centre may be consulted about seaman's affairs. Tel: (04) 656-6119.

CURRENCY: New Taiwan Dollar.

REGULATIONS: Searching for stowaways is strictly carried out on arrival and departure.

Harbour Bureau Notice:

1. Please show your shore pass together with your hand-carried articles to the gangway guard when going ashore and to the gate police when coming aboard.

2. Photographing of the harbour, storing of explosive articles and displaying of fire crackers in the harbour area are prohibited.

3. Before obtaining a boarding pass which can be applied for you by your ship's agency, you are not allowed to board another ship with your shore pass.

4. Before going ashore, read over carefully the notice on your crew shore pass and comply with it.

5. Be sure not to lose your shore pass, nor should it be used by others, since it is an important official document. If shore pass is lost, the ship's Master must write an official note.

6. To avoid getting lost, keep in your mind the number and location of the wharf at which your ship is alongside, and in case the location of the ship is shifted contact your ship's Agent.

7. Always maintain aboard your ship a sufficient number of crew in case of emergency.

8. For the prevention of stowaways, thefts and accidents, crew quarters and passenger cabins should be kept locked before their shore leave.

9. Pumping wasted oil and throwing rubbish into the water, or exhausting thick smoke in the port area shall be subjected to a heavy fine.

10. For the protection of foreign copyrights, pirated editions of foreign books and records are not exportable.

11. Unless an application is approved by the Customs, any taxable article should not be taken off the ship, while each crew member is allowed to carry ashore 2 opened packs of duty free cigarettes, 10 cigars or 2 ounces of tobacco.

12. Whenever you need assistance, please feel free to call 6562394, 6564334 or 6565849, ext. 275 upon which the Foreign Affairs Division of the Harbour Police is obliged to serve you.

13. For further information, please consult directly with your Agency or Authorities concerned, as the rules contained in this notice may be revised at any time.

Thank you very much for your co-operation.

GENERAL: Recommended chart: Chinese Navy Chart No. 0357, Tai-Chung Kang.

DEVELOPMENTS: The 2nd phase project with 9 wharves and a passenger service centre will be ready in 1998.

SHIPMASTER'S REPORT: November 1982 (Updated 1996).

Stevedores: Cargo work: Around the clock. 0800 – 1200 hrs., 1300 – 1700 hrs., 1800 – 2300 hrs. and 0000 – 0600 hrs.

Health: Cholera still declared in Radio Pratique. If certificates are out of date, Radio Pratique is not acceptable.

Customs: Issues can be made after 5 days.

VHF: Pilots and Port Radio also officially work Channel 16 but we only make contact on Channel 14.

Berthing: No. 11 (Container Berth) is completed (Extension of No. 9 and 10)

Consuls: No British Consul.

Airport: Nearest airport at Taoyuan.

Report: This is a new port midway up the West coast of Taiwan. Plans for very extensive developments are at present in hand, Phase 1 has been completed.

The Western coast is low lying and exposed. During N.E. monsoon season, when cold front comes from mainland China, the wind can be very strong, ships are advised to go South or North so that the Pilot may be taken off at Kaohsiung and Keelung. The water shelves fairly slowly and I am given to understand that in bad weather Panamax vessels anchor 2 miles West of port entrance, holding conditions not known. We were fortunate with calm conditions and anchored 5 cables S.W. of Breakwater South Light for a short period with no difficulties.

Pilot boards from launch outside and 1 tug is normally taken outside. VHF Channel 14 is used. They also use walkie-talkies to contact Harbour Control and tugs. Panamax vessels normally berth during daylight hours but may sail at any time. Pilot seemed competent and had an Assistant/Trainee Pilot with him. (September 1987: Pilot disembarks inside breakwater. Vessel must attain good speed and allow for set and N'ly wind when passing between Inner Breakwater and Outer Breakwater.)

Depth of Water: Vessel berthed at half tide with 12 m. draft. Grain silo 13 m. Berth No. 10 depth 13 m. Berth No. 9 depth 14 m. Dredging being carried out. Rise and fall of tide 3.5 m. depth 4.0 m. Dock water density Berth No. 10 found to be 1023.

Tugs: 7 tugs 1,600 h.p. – 3,400 h.p. Ship's ropes used. Normal conditions for Panamax, 1 tug each end.

Berths: Berth No. 10 (Berth No. 9 is similar) is a brand new container berth with 2 gantries for containers. Berth used for bulk coal discharge into lorries until new coal berth constructed. (Berth still not constructed in September 1987). Large flat area. Mooring bollards set at jetty edge every 23 m. A further set of unequally spaced large bollards are set along line 34 m. in from jetty. When mooring 4 head/stern lines, 2 springs and 2 long breasts each end are recommended. We experienced winds of over 30 knots off berth for short period, nobody seemed at all surprised, so would suggest this is reasonable tie-up.

Discharge: As stated this is a container berth. Panamax vessel with side opening hatches, port side to. Hatch centre stops and minor hatch fittings burnt off. Centre piece of hatch rail track tack welded on. Both hatch lids moved to starboard side. Section of ship's side rail in line with hatch burnt off. (This method not used on Berth No. 29). Wood sleepers placed on deck and mobile cranes lifted on board, 1 per hatch. These use small 4 – 5 ton grabs and discharge into lorries. Small bulldozer type vehicle put in each hold to move cargo to port side. Preparation about 1 day, discharge 9 days, replacing of pieces, etc., 1 day.

Bunkers: Heavy oil and diesel available by barge.

Lub. Oils: Most available, plenty of advance notice required.

Fresh Water: Available, from jetty or barge.

Repairs: Ship repairs undertaken with a 10,000 ton dry dock.

Money: Only New Taiwan Dollars available. U.S. Dollars can NOT be obtained. Obtain any other requirements at previous port.

Immigration: For non-Taiwanese crew this is a problem, including Hong Kong, British and Indian. If any crew changes expected give plenty of notice. Visiting Hong Kong shore staff such as Superintendents, etc., required to renew dock pass every 2 days. Crew issued with shore pass (with photo for Chinese ratings) this has to be shown at dock gate outward and inward. Passes collected in on sailing, loss of pass results in fine on holder.

Stores: Victualling, fresh fruit and vegetables, reasonable price and good quality. Milk, meat, European style tinned goods all up to Chinese National Standard (CNS). Chinese dried foods, etc. appear good.

Beer can be obtained but not spirits or foreign cigarettes.

Customs: One person at least, around all the time. Bond and beer locker sealed. Issue will be given after 5 days in port, but give plenty of notice.

Certificates Required: Register, Loadline, Safety Equipment, Safety Construction, Radio Safety, Derat, Liferaft.

Documents: Crew List, 10 copies. Crew Manifest, watches, etc. and including foreign money. List of Stores. Deck, Engine, Victualling, Bond, Arms & Ammunition List, Narcotics List, Arrival Report, Declaration of Health, Departure Report (these three their forms). Specimen signature Master and Mate, General paperwork, large amount for any purpose. If landing spares or items for overhaul (motors rewound, etc.) give plenty of notice.

Medical Facilities: All available.

Drugs: Do not appear to be a problem in this port.

Grain Silo: I was informed that usual discharge rate is 5,500 – 6,000 tonnes per day.

Radio Station: Taichung Local. 24 hour watch M/F, W/T no difficulties encountered.

Cameras: Not to be taken ashore.

Walport: Possible to change video tapes. NOT films.

Telephone: Placed on board.

SHIPMASTER'S REPORT: September 1987 (Updated 1990).

Vessel berthed at Berth No. 29.

There are still no bulk discharge facilities at the port.

The method used in the Shipmaster's Report (November 1982) for Berth No. 11 is still used, but the ship's rails were not cut away. Rigging and cutting took about 12 hours, and all 7 mobile cranes in operation from the deck after 24 hours.

On completion of discharge, hatches were completed at irregular intervals, due to machine downtime, etc. Rewelding and rigging carried out as discharge continued and the interval between completion of discharge and completion of hatch repairs was about 2 hours.

Arrangements were made for Class Surveyor to inspect and issue certificate at end of work but this was not done efficiently.

The rate of discharge varied between 5,500 t.p.h. – 6,000 t.p.h., variation being due to very heavy rain and typhoon. The average rate per hatch per day was approximately 800-900 tons.

SHIPMASTER'S REPORT: January 1990.

There are no gantry cranes for discharging of coal cargoes at the port. For a Panamax size vessel both the hatch covers, port and starboard, are shifted to one side. As we were starboard side alongside both our hatch covers were shifted towards extreme portside. In this case only half hatch was open throughout cargo operations.

Mobile cranes were placed on the main deck with dunnage underneath. Each crane had a 2 tonne lifting capacity and discharge is in to lorries on the quay. The discharge rate is about 1,000 tonnes/day per crane. This method of discharging will be used until the new berth, which will be equipped with cranes and conveyors, is ready in 1992.

The outgoing pilot disembarks inside the inner breakwater. Ships must pick up sufficient speed to counteract the wind/current between the inner and outer breakwaters.

AUTHORITY: Taichung Harbour Bureau, No. 2 – Section 3, Chung-Chi Road, Wuchi, Taichung County, Taiwan, Republic of China. *Tel:* (04) 656-2611. *Cables:* Taiwan Wuchi 7686. *FAX:* (04) 6571375, 6572300. *Contact:* Mr. Ding-Hsun Hsiaou, Harbour Master. C.T. Huang, Director.

AGENT: Sub-Agent controlled by Jardine, Matheson & Co. Ltd., 13/14th Floor, 50 Hsin Shen South Road, Section 1, (P.O. Box 81), Taipei. Tel: 886-2-3931177. Telex: 21851/11391 Jardines. Cables: Jardines. Fax: 886-2-3413168, 3920435.

Associated with Jardine Shipping Agencies.

Tanzania

CHAKE CHAKE: 05.14 S. 39.46 E.

DOCUMENTS, HEALTH: Refer to "Zanzibar", where vessel required to call for clearance by Port Officals.
PILOTAGE: Not compulsory, but restricted to daylight only.
RESTRICTIONS: Entrance approached through Owen Channel or through passage between Mesale Island South and Ras Kingojelin. Depths from 10 to 22 fathoms but there are patches of 2.5 fathoms. Narrowest part of channel is 1.5 cables wide.

Vessels may enter and leave at any state of the tide, but in daylight hours only.

ANCHORAGES: No mooring buoys. Vessel's work cargo to lighters. Depth decreases to 3 fathoms for coastal anchorage off Ras Banani.
MAX. SIZE: 170 ft. length, 15 ft. draft.
TUGS: Not available and not required.
FRESH WATER: Not available.
FUEL: Not available.
STORING: Very limited facilities and it is recommended that where necessary all storing be done in Zanzibar.
AUTHORITY: See "Zanzibar".

DAR-ES-SALAAM: 06.50 S. 39.17 E. (See Plan)

PORT LIMITS: The Port of Dar-es-Salaam includes all tidal waters enclosed by a boundary which, commencing at high water mark at a point S.E. of Ras Koronja (approximately 9.66 km. East of the City of Dar-es-Salaam), follows a straight line due North to the West tip of the Outer Sinda Island. Thence a straight line to Makatumbe Lighthouse, thence a straight line drawn to South tip of Mbudya Island, thence a straight line drawn 254° to the high water mark at a point on the mainland South of the entrance to Mto Peremji. Thence following the high water mark around Msasani Bay, Dar-es-Salaam Inner Harbours to the first point due South of Outer Sinda Island.

DOCUMENTS:

Health Certificates (forms supplied by Pilot).
6 Crew Lists.
10 Passenger Lists.
Ship's Manifest.
Heavy Lift List.
Dangerous Cargo List.
Ship's Register.
Declaration and Advice of Consumable Stores (Form C-7 supplied by Customs).
Crew Declaration (Form C-8 supplied by Customs).

Shipmaster's Report: March 1981.

Declaration of Health.
1 Set of Vaccination Lists.
7 Crew Lists.
6 Passenger Lists.
Clearance from Last Port.
Ship's Register (Copy).
Dangerous Cargo Manifest.
Stores List (Form C-7).
Crew Declarations (Form C-8).
Parcel List (Form C-3).
Ship's Record & Master's Report (Form EAH-6007) (To Pilot).
Entry Report (Nasaco Form).
Departure Report (Nasaco Form).
Shore Pass (Form TIF 10).

PILOTAGE: Compulsory South of Makatumbe Lighthouse for all vessels over 200 n.r.t. The pilot launch shows the conventional day and night signals. Vessels wishing to enter must await the arrival of the pilot launch at the Outer Anchorage, and, if necessary, must anchor clear of the leading marks.

ANCHORAGES: Anchorage outside in 7 – 8 fathoms, sheltered by Makatumbe Island during S.W. monsoon but exposed to swell in N.E. monsoon.

Shipmaster's Report: In good weather tankers waiting can anchor in a depth of 18 m., 12 cables from Makatumbe Light on bearing 250° True.

Also see "Gangway/Deck Watchmen".

RESTRICTIONS: Movements in and out of the basin are subject to restrictions depending on drafts and state of the tide at Spring tides. Tankers, vessels over 135 m. LOA and vessels carrying explosives are not allowed to leave or enter during hours of darkness.

There is a signal station (with tower, flagstaff and red roof) on East Ferry Point (Lat. 6° 50' S., Long. 39° 18' E.). Entry prohibited signals are: day signal – black flag on masthead; night signal – 3 red lights disposed vertically, and distant signals – black square on white background.

The entrance channel at North end of the basin is about 1.25 miles in length from its outer entrance between the edges of the banks fronting North and South Reefs to the Inner Harbour, South of West Ferry Point.

There is a sharp bend in the channel at West Ferry Point. Minimum depth of 6.7 m. LWOST, and minimum width of 128.02 m. between the 4 fathoms contour lines. A very strong ebb and flood runs through the channel at periods of Spring tides. Maximum current at Spring tides – 3.5 knots. During period of S.E. monsoon strong winds and heavy seas may make entry difficult, but in Inner Harbour port working is normally unaffected by weather.

MAX. SIZE: Twin-screw vessels not exceeding 182.9 m. Draft 10.1 m at HWOST, 7.0 m. at LWOST, and 9.1 m. at HWNT, and single-scre vessels not exceeding 175 m. Tankers LOA 182.87 m., 36,000 d.w.t. and draft 9.8 m. Also refer to "Mjimwema".
HEALTH: Radio Port Health Officer giving ETA, name last port an health condition of passengers and crew. "Q" flag to be displayed un Free Pratique given. Radio Pratique not available.
TUGS: 4 tugs available.
BERTHING: In the Inner Harbour there are mooring and anchorag berths for up to 9 deep-sea ships ranging from 350 ft. to 600 f (106.48 m. – 182.88 m.) in length and from 23 ft. to 30 ft. (7.01 m. - 9.14 m.) in draft.

Deep water quays total length 2,016 m., comprising Berths No. 1-1 with 10.06 m. in depth at LWOST.

The port has completed major developments which should significan affect its capacity and efficency. No new berths are being constructe but all existing berths (excluding the SPM Oil Terminal) have bee modified, modernised or rehabitated.

Berths No. 9, 10 and 11 have been converted into a dedicate container terminal (2 berths × 280 m.) with a capacity of about 100,00 TEU per annum. The terminal has 2 × 35 ton gantry guay cranes 5 × 35 ton rubber tyred gantry yard cranes and a rail container termina (for both Tazara and TRC Railways) with 1 × 35 ton rail mounted gantr crane.

Backing up the port terminal are 2 inland container depots in the Da es-Salaam area (Kurasini IDC, adjacent to the port and Ubungo IDC about 15 km. along the port access road).

Also see "Developments".

Accommodation:

Harbour sheltered and roomy, water area 95.9 ha; consists of tida basin and Southern Creek, the latter having 11 deep-water berths Anchorage in basin and creek.

		Depth	*Max. length*
"A"	Stern mooring	9.1 m.	183 m.
"B"	Moored mooring	7.6 m.	153 m.
"C"	Moored mooring	7.6 m.	183 m.
"D"	Single anchor	7.3 m.	183 m. waiting berth only.
"F"	Moored, buoys and anchor	8.0 m.	175 m.
"G"	Buoys	9.2 m.	175 m.
"H"	Buoys	9.2 m.	175 m.

In addition there are 2 coaster anchorages. The Southern Creek, a the S.E. corner of the basin has a navigable distance of 1.5 miles f ships drawing up to 30 ft. of water.

CARGO HANDLING FACILITIES: *Grain:* A new bulk grain silo o 30,000 tonnes capacity has been constructed in the port to facilita grain imports.

Ro-Ro: Ro-Ro vessels berth stern to at Berth No. 6/7.

Equipment and Other Facilities:

Deep water vessels berthed in stream are loaded and discharged b lighters. At the lighter quay there are 8 electric portal cranes for workin lighters (1 × 5 ton and 7 × 3 ton), on the main quay, the port ha 6 × 7 ton and 21 × 5 ton. There are 8 other portal cranes on the stackin yards as per details below:

(a) Belbase (AMI) — 2 × 10 ton cranes.
(b) Tanzania — 3 × 5 ton cranes.

Main Quay Cranes: Berths No. 1 – 8 have between them 24 portal cran of 7 tons capacity each.

Mobile Cranes: 2 × 30 ton, 13 × 11 – 7 ton, 14 × 6 ton, 2 × 4 ton an 1 × 120 ton floating crane – "Ndovu". These are moved between dee water quays, lighterage quays and any other points of work on t stacking yards as and when required.

Also see "Developments".

STEVEDORES: Week days (except Saturday) 0700 – 1500 h (45 minutes' break), 1500 – 2200 hrs. (no break), 2200 – 0600 h (no break). Saturdays 0700 – 1345 hrs. (no break), 1400 – 2100 h (no break). Sundays and public holidays 0700 – 1500 h (45 minutes' break), 1500 – 2200 hrs. (no break).
MEDICAL: Facilities available.
TANKERS: Kurasini Oil Jetty at which tankers up to 182.87 m. LO 9.8 m. draft and 36,000 d.w.t. can discharge refined products to tan ashore. There is a refinery on the opposite side of the creek to t Kurasini Oil Jetty; the tankers serving the refinery are not to exce 35,000 s.d.w.t. capacity. Also refer to "Mjimwema" where crude imports for Tanzania and Zambia are received and "Shipmaste Report" and "Ship's Officer's Report".
DENSITY: 1025.
FRESH WATER: Available at deep-water berths, and a water ba supplies water to ships at anchorage. All water is chlorinated but sho be boiled and filtered. Water for boiler requires feed treatment (for solutions adequate).
FUEL: Fuel oil, diesel oil and gas oil available.
REPAIRS: Several light engineering workshops. There is a Tanza Harbour Authority Dockyard for construction and maintenance Tanzania Harbour Authorities' lighters and other small craft. This ha slipway for vessels up to 100 ft., lifting power 100 tons. The P Administration employs scuba divers.
GANGWAY/DECK WATCHMEN:

Piracy: Shipmaster's Report: December 1993.

In early December whilst anchored 1.4 nautical miles North Eas Outer Nyakatombe Lighthouse the vessel was boarded by "locals" f a wooden boat.

Of the 15 "locals" in the boat only two managed to board the ve and they escaped when discovered.

This first attempt to board at 0115 hrs. was followed by a sec attempt at 0405 hrs. and this time nobody managed to board. Du the first attempt, the lashings on the mooring lines on the forecastle w cut.

We informed the lighthouse and asked them to advise other ves at the outer anchorage.

CUSTOMS ALLOWANCES: Each crew member is allowed 1 carton of cigarettes, 1 opened bottle of spirits and 8 small beers.

All cabins are inspected by Customs.

REPATRIATION: Can be arranged.

AIRPORT: International airport with daily connections to all parts of the world.

TIME: GMT plus 3 hours. No alterations.

HOLIDAYS: Christmas Day and International Workers' Day are the only holidays on which no work is performed. Other holidays on which restricted working may be carried out are: Zanzibar Revolutionary Day (January 12th); Id-el-Fitr (2 days); Id-el-Haj; Good Friday; Easter Monday; Union Day (April 26th); Maulidi Day; Saba Saba Day (July 7th); Tanganyika Independence and Republic Day (December 9th).

SHORE LEAVE: Allowed.

GARBAGE DISPOSAL: Drums are provided on the quays.

WASTE OIL DISPOSAL: No service available.

SEAMAN'S CLUBS: Missions to Seamen, Dock Gate 3, Kurasini. Tel: 20887. Hours: 0800 – 2200. Facilities: International telephone, postal service, bar, restaurant, shop, library, video, swimming pool, football, table tennis, darts, badminton, tennis and dances.

CURRENCY: Tanzania Shilling.

DEVELOPMENTS: The rehabitation of Berths No. 1 – 8 is well underway and will provide a better lay-out, refurbished buildings and new heavy duty paving throughout for handling all general cargo traffic in the port.

The second phase of the repaving of the Container Terminal Berths 9 – 11 is expected to commence in 1991.

The Lighter Wharf modernisation, which was interrupted, is due for completion with the provision of new paving and services but no completion date is known.

New navigation lights and buoys to be installed (Daphne Reef, Hammond Rock and N.W. of Buoy No. 2).

Among future developments which are under consideration are:

1. Improvements to the dockyard.
2. Improvements to the entrance channel.
3. New crude oil import facility.
4. Improvements to fendering at Berths 9 – 11.

SHIPMASTER'S REPORT: January 1995.

Anchorage: Both Inner and Outer Anchorages can be used, but because of the prevalence of piracy, most ships prefer to anchorage outside Makatumbe Island. Even this is not secure and, during our 36 hours at anchor, 2 vessels were attacked, both losing mooring ropes.

We used the Inner Anchorage during the day, and drifted some 10 miles off the coast at night.

Length: Maximum length for port shown as 175 m. Tankers over that length must obtain an indemnity valid for one voyage only. If exceeding 175 m., the maximum draft allowed is 9.0 m. We arrived with draft of 8.7 m.

Entrance: This was made with 2 hours of ebb tide running, and in the two shallow patches in the Channel we had barely 1.0 m. of clearance. Two Senior Pilots boarded and were extremely competent.

Radio Station: Dar es Salaam Radio has been off the air for some considerable time and will be off for the foreseeable future. The ship's Agent contacts the vessel via the Port Control on VHF Channels 16 and 12.

Documents:

Port Health:
- Crew List.
- Vaccination List.
- Ports of Call List.
- Health Declaration.

Immigration:
- 2 copies Crew List.
- Passenger List.

Customs:
- Crew List.
- Manifest.
- Personal Declaration.
- Parcels List.
- Bonded Stores List.
- Ship's Stores List.

Radio Inspector:
- Radio Room Equipment List (Supplied by Agent). He inspects all radio aids.

Plant Inspector:
- Ship's Declaration.
- Crew List.
- Stores List.
- Ports of Call List.

Agent:
- 4 copies Crew List.
- Original of Register.

Berth: Kurasini Oil Jetty: Length 200 ft. (approx.).

4 head lines and 4 stern lines to dolphins, 2 springs each end to quay.

Storage space ashore appears limited, and oil is pumped to available space rather than to the addressee on the Bills of Lading.

Turning Basin adjacent to quay is extremely restrictive with possibly 210 m. available, hence the length restriction.

Sailing from Tanker Berth: Any time, depending on draft at Neaps. Only close to slack water at Springs.

Water: Available by hose, but as in Mombasa, there is a chronic water shortage and pumping rates are very low. We received 50 tons in 36 hours. Do not rely on obtaining water here.

Security: Both theft and stowaways are a major problem here, although the tanker berth is probably more secure than the cargo berths from the landward side. We engaged 3 watchmen from the Agent (3 shifts of 3 men each). One patrols forward, one aft and the other remains in the vicinity of the gangway. Rates for watchmen are U.S.$10.00 per shift for normal time and U.S.$15.00 per shift for Saturdays, Sundays and the night shift. The watchmen were backed up by 3 seamen on each watch.

Two hours prior to sailing, a full search was made for stowaways. Special attention should be paid to the chain locker which is a favourite hiding place. This was followed by a second search after leaving the quay and before the Pilot left.

Tanzania will only readmit stowaways who can prove that they are Tanzanian citizens. The stowaways know this and hide their identity documents, so once the Pilot has left, it is all but impossible to get rid of them.

Agency: Only one Agency in this port, divided into various sections to handle differing trades:

NASACO, Box 9082, Dar es Salaam. Tel: 46602, 44914. Telex: 41235, 41323, 41145. Fax: 051-46070, 051-46049, 051-44504.

SHIP'S OFFICER'S REPORT: January 1996.

Berth: Kurasini Oil Jetty.

Mooring: 3 head (breast) lines and 2 springs each end and port anchor.

Let go port anchor to 2 shackles off the berth and slack out as vessel moves in. Two head lines from the starboard bow first by mooring boat, then it goes down for the stern lines. All springs by heaving line.

Tugs: One each end for berthing and for unberthing. Ships' lines, forward one does not make fast for berthing.

Ladder: Accommodation ladder used for access.

Cargo Operations: Shore has 6 in. lines for all grades (2 strings of rubber hoses). One is used for Mogas and the other for Jet and then gas oil. Shore do all connecting and disconnecting, but they have a lack of personnel, so crew assist. Sample tests are done onboard, and it appears to be just a check of density with a hydrometer.

Shore provide security teams of 3 men during the day and 3 men at night. On last visit, they reported 2 men climbing mooring lines, and some people were noticed in the water at 0500 hrs.

Radio communications are on Channel 72 and were very good, although in the past they have been reported as poor.

Discharge Rates: Maximum for Mogas is 8 Bar and 10 Bar for gas oil and Jet. Average rates: Mogas – 450 cu.m./hr.; Gas oil – 800 cu.m./hr.; Jet A-1 – 500 cu.m./hr.

Usually lots of parcels for this port. Shore give a discharge sequence at the beginning, giving all the quantities and approximate timings. "Ship stop" on the parcels, and it usually takes the shore about 30 minutes to change the shore line. Surveyor onboard, but he never checks the "stop" figures.

AUTHORITY: Tanzania Harbours Authority, P.O.Box 1130, Dar-es-Salaam, Tanzania. *Tel:* 44437. *Telex:* 41346 Portreeve. *Cables:* Bandari, Dar es Salaam. *Contact:* F.K. Luoga, Port Manager.

Tanzania Harbours Authority, P.O.Box 9184, Dar-es-Salaam, Tanzania. *Tel:* 21212, 46041. *Telex:* 41346 Portreeve. *Cables:* Bandari. *FAX:* 255-51-46925, 46039, 46043, 44793, 44813. *Contact:* Captain J.K. Kwayu, Chief Marine Officer.

MJIMWEMA TERMINAL: 06.49 S. 39.22 E.

DOCUMENTS and all General Information; refer to "Dar-es-Salaam".

LOCATION: The position of the Monobuoy is Lat. 6° 48.8' S., Long. 39° 22.1' E. lying approximately 1.5 miles offshore in Mjimwema Bay. The buoy lies in 24 m. depth of water. The currents are up to about 1 knot and the direction varies.

PILOTAGE: Mooring Master/Pilot boards at position Lat. 6° 46.5' N., Long. 39° 22.1' E., subject to advice from Signal Station. Should the Pilot not be available on arrival, vessels are advised to anchor 1.5 miles N.E. of Outer Makatumbe Lighthouse to await the pilot.

After mooring operations a Mooring Master/Pilot will remain on board.

Vessels must provide adequate means of boarding for Pilot, Customs and other officials. A pilot ladder with spreaders 4 ft. from the water and manropes are required.

The Mooring Master shall be provided with meals and accommodation comparable to a senior officer on board. The crew of the mooring launch will be provided with food comparable with ratings on board. No special foods need be provided. Accommodation also required for 2 divers.

RESTRICTIONS: Berthing during daylight hours only. Unberthing at anytime.

MAX. SIZE: Monobuoy accommodates tankers up to 120,000 d.w.t. Minimum length allowed 220 m. Max. draft allowed 16.75 m. Designed bow-to-manifold distance is 137 m.

HEALTH: Customs, Port Health and Immigration will board vessels on arrival.

RADIO: Within 6 hours of clearing the loading port, each tanker shall provide the Agent with the following information:

- *(a)* Name of Ship.
- *(b)* Name of last port from which the vessel cleared and the loading port if different from above.
- *(c)* Estimated date and time of arrival at Dar-es-Salaam (Mjimwema).
- *(d)* Cargo loaded.
- *(e)* API gravity.
- *(f)* Arrival draft, fore and aft.
- *(g)* Lifting capacity of derricks.
- *(h)* Size of manifolds.
- *(i)* Personnel requirements.

72 hours from the Pilot Station, a second cable should be sent to Agent with following information:

- *(a)* Name of ship.
- *(b)* Amended time of arrival.
- *(c)* Names of crew leaving the vessel (if any).
- *(d)* Requirements of doctor and dentist.
- *(e)* Any other requirements.

A final cable should be sent about 36 hours from the Pilot Station giving finally amended ETA.

When within 20 miles of the terminal vessel should call Dar-es-Salaam Signal Station on Channel 12 VHF. Channel 16 is available but is not continuously monitored.

VHF Channels 16 calling, 12 berthing. VHF Channel whilst discharging to be decided.

The Mooring Master will be in direct control of all radio communications on the vessel while in the terminal area. Any unauthorised communications may result in the immediate cessation of all operations and removal from the berth.

READINESS: Notice of Readiness will be accepted by the Receivers Representative when the ship is berthed and connected.

Any vessel which is not, in the opinion of the Berth Controller, ready in all aspects to discharge, may be rejected until corrections are made. The Harbour Master's decisions are final.

MOORING: The following equipment is supplied by Tanzania Harbours Authority. 2×10 in. circumference nylon ropes, 100 ft. long with 2 joining shackles. These will be hoisted aboard from the launch using the Starboard boom.

The vessel approaches the buoy head to wind and tide or the resultant of these forces, and should have one ship's mooring rope lowered through the centre Panama Lead down to the water level with 15 ft. of 3 in. rope lashed to the eye. As the vessel approaches the buoy the launch will connect the ship's rope to the floating pick-up rope, which is hauled aboard until the mooring chain is through the Panama Lead. The 2 shore ropes are then shackled to the chain and made fast aboard.

BERTH: The Monobuoy is a single point mooring buoy. The body of the buoy being secured in a fixed position with 6 moorings and the top of the buoy is in the form of a turntable allowing the ship, moorings and hoses to take up the position the vessel lies naturally due to tide, wind and current conditions.

HOSES: Raising and lowering of, connecting and disconnecting of hoses as well as other shipboard duties will be performed by the ship's crew under the advice of the Mooring Master. The ship should be capable of lifting 10 tons on her derrick, with a minimum of 7.5 tons.

When the vessel is securely moored, the launch will bring the hoses alongside on the starboard side. The vessel will lower the cargo hook to the boatman who will hook it on to the lifting ring on the forward hose. The hose will then be lifted to full height on the boom and secured on the "Hang-off Chains" supplied. The hose is then lowered to the deck and the operation repeated with the after hose.

After completion of discharge the hoses will be filled with sea water by the ship. The hoses can then be disconnected from the manifold and lifted over the side of the ship and hung there on the slip ropes to be slipped off simultaneously with the moorings. This last operation will be carried out on the advice of the Mooring Master.

UNMOORING: On sailing, hoses will already have been disconnected and towed clear by the attendant launch. The weight of the moorings is taken off the pick-up rope, the shackles disconnected, and the chain and pick-up rope lowered into the water. The shore ropes and shackles are then lowered into the launch, usually from the port bow.

The Pilot will then disembark, using a combination gangway/pilot ladder on the port side.

BALLAST: Ballasting will be allowed during discharge but only with the express permission of the Discharging Master. In the case of ballasting into dirty tanks a Dry Tank Certificate must be first obtained. Vessels will be allowed to carry out Crude Oil Washing, but no other form of tank cleaning. There are no sludge tanks ashore.

FUEL: Agip Tanzania have a bunker barge but can only supply fuel oil.

FRESH WATER: Up to 300 tonnes of fresh water is available by water barge. A pumping rate of approximately 10 tonnes per hour may be expected. Approximate cost is U.S.$7.00 per ton.

STORES: Stores are available in Dar-es-Salaam, but the Tanzania Harbours Authority cannot undertake to transport stores to the Monobuoy. Transport of stores to the buoy will be the responsibility of the Agent.

REPAIRS: During periods of calm and the fact that there is little current, it is foreseen that the problem of riding up on the buoy may occur. The vessel's engines shall therefore be available at all times and the telegraph shall be on stand-by while the vessel is in the berth. Engine repairs are not permitted. Should a vessel not be able to use her engines the cargo will be stopped and the vessel towed to a safe anchorage at the vessel's cost, until she can safely return to the berth.

SHORE LEAVE: Shore leave can be arranged through Agents. Should any of the crew require to be landed for medical or relief reasons, the Agent will be reponsible for providing transport to the Inner Harbour. Tanzania Harbours Authority craft will on no account be available to ferry crew members to and from the passenger pontoon. The Monobuoy lies 4.5 miles from the passenger landing pontoon, which is situated in the Inner Harbour.

POLLUTION: It is the Master's responsibility to see that no oil of any kind is pumped or spilled overboard from his vessel. This includes oily water from bilges, crude residues from the previous voyages or any other matter that may result in the pollution of the area. Owners and Masters should comply with any international regulations and recommendations concerning the prevention of pollution of the sea.

Serious consequences will arise if the above rule is broken. All costs and expenses involved will be for the account of the vessel concerned and the Master may be prosecuted under the Tanzania Merchant Shipping Act.

REGULATIONS: While in the berth the vessel should provide a pil ladder on the opposite side of the vessel to the gangway, secured a the rail and ready for use.

No boats of any kind shall be lowered without permission from th Customs, Immigration and Harbour Master, except in an emergency.

Tanzania Harbours Authority maintains vessels to assist in berthin These vessels are under the direct supervision of the Mooring Maste Pilot. Any service or faciility provided by the Tanzania Harbours Authorit including the services of the Mooring Master/Pilot and boats are th vessel's risk. The furnishing of Mooring Master/Pilot and launches o other services and facilities shall not be construed to be or give rise t a personal contract.

STOWAWAYS: Vessels are warned that stowaways remain a seriou problem at the Terminal. All exterior doors should be kept locke especially in the forecastle, and, if possible, the chain lockers should b sealed on deck. A thorough search prior to departure is essentia Stowaways found aboard will be escorted ashore by the Port Police o the Pilot when he disembarks (contact Signal Station on VHF Channe 12).

AGENCY: The sole ship's Agency in Tanzania is National Shippin Agencies Co. Ltd (NASACO). The Department dealing with tankers a the Terminal is Ruvuma Department. Tel: Dar-es-Salaam 2942 Telex: 41235. P.O.Box 9082, Dar-es-Salaam.

AUTHORITY: Tanzania Harbours Authority, P.O.Box 918 Dar-es-Salaam, Tanzania. *Tel:* 21212. *Telex:* 41346 Portreeve *Cables:* Bandari Dar-es-Salaam. *FAX:* 255-51-46925, 4479 *Contact:* Port Manager/Senior Harbour Master.

MKOANI (Kohani): 05.21 S. 39.38 E. (See Pla

DOCUMENTS, HEALTH: Refer to "Zanzibar".

PILOTAGE: Pilot available on request from Zanzibar.

RESTRICTIONS: Vessels passing through channel between Zanzib and Pemba should inform Port Authorities 24 hours in advance.

Entrance through Mkoani leading marks, buoyed and well-lit channe depth of 11 fathoms. Vessels may enter and sail any time night and da

ANCHORAGES: No mooring buoys. Minimum depth 6 fathoms. Vesse work cargo to lighters. Sandy bottom with mud close inshore.

MAX. SIZE: Length 250 ft.

TUGS: 2 tugs available.

FRESH WATER: Not available.

FUEL: Not available.

STORING: Very limited facilities and it is recommended that whe necessary all storing be done in Zanzibar.

DEVELOPMENTS: A jetty, 130.4 m. long, is to be constructed offsho and joined to the shore by a causeway 466 m. long and 4.0 m. wid Depth alongside 9.0 m. The jetty will be able to accept a vess 4,000 d.w.t. on the outer side and small domestic steamers and dho on the inner side.

AUTHORITY: Ministry of Ports and Shipping, Port and Mari Department, P.O.Box 263, Zanzibar. *Tel:* 32858, 32847 (hom *Telex:* 57267 Shipco TZ. *Contact:* Port Officer.

MTWARA: 10.16 S. 40.12 E. (See Pla

DOCUMENTS, HEALTH: Refer to "Dar-es-Salaam".

APPROACHES: The entrance is approached by a channel marked buoys and leading beacons. At its narrowest point abreast of Mse Spit the channel is 1.5 cables wide. In spite of the sharp turn in t vicinity, vessels of up to 175.26 m. in length can enter the harbour a stages of the tide. Once around the Msemo Spit there is a very g natural harbour with room for two 500 ft. vessels and 1 coaster alongs There are 2 unmarked anchorages to accommodate vessels of u 9.5 m. draft.

PILOTAGE: Compulsory. Pilot based at Dar-es-Salaam and flies Mtwara when required. Scheduled flights 3 times a week. E information concerning ETA to Harbour Master, Dar-es-Salaam. (So bound vessels requested to divert to Dar-es-Salaam to embark Pil

Pilot boards 0.5 mile North of Shangani Reef Buoy from availa craft.

Signal Station can be contacted on VHF, Channels 12 and 16, betw 0600 hrs. and 2200 hrs.

ANCHORAGES: No safe anchorage outside port.

RESTRICTIONS: Port closed from 1800 hrs. to 0600 hrs. No restrictions.

MAX. SIZE: Length 175 m., draft 9.76 m.

RADIO: Dar-es-Salaam or Mombasa Radio.

TUGS: Join vessel off Signal Station, when available.

BERTHING: Deep-water Quay: 1,248 ft. length; 9.75 m. depth along at low water. 2 berths available at quay.

Sheds and Stacking Yards:

The port has 4 sheds for reception and storage of cargo with a area of about 16,272 sq.m.

Transit shed No. 1 floor area is 3,121.4 sq.m.
Transit shed No. 2 floor area is 3,121 sq.m.
Transit shed No. 3 floor area is 728 sq.m.
B.P. shed floor area is 9,302 sq.m.
Stacking yard area is 9,000 sq.m.

Cargo Handling Appliances:
2 Jones mobile cranes (11 tons).
7 Fork lift trucks (2.5 tons and 5 tons).
5 Tractor trailers.
2 Tractors.

Marine Craft:
The port owns 2 launches and 1 pilot boat.

CARGO GEAR: Vessels load/discharge using ship's gear.

STEVEDORES: Stowage plan required, preferably 2 weeks prior to arrival. Gang arrangements to be made 24 hours before arrival.

Normal Working Hours:

Weekdays:	1st shift:	0700-1500
	2nd shift:	1445-2215
Saturdays:	1st shift:	0700-1230
	2nd shift:	1230-2030

A maximum of 3 hours overtime is permitted after 2nd shift in order to finish the ship.

MEDICAL: Doctor and dentist available. All crew require valid cholera and yellow fever inoculation certificates.

DENSITY: 1025.

FRESH WATER: Not normally available during daytime but available at night in limited quantities.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Arranged by Agents.

HATCHES: Opening/closing carried out by stevedores.

REPATRIATION: Possible.

AIRPORT: 7 miles from the port. 3 scheduled flights a week to Dar-es-Salaam International Airport.

TIME: GMT plus 3 hours.

HOLIDAYS: All holidays worked as Sunday except following days when no work done: Christmas Day and 1st May.

POLICE/AMBULANCE/FIRE: Port Police Tel. 059-3152. Port Fire Brigade Tel. 059-3043.

TELEPHONES: Direct connection on board not possible.

BANKS: The National Bank of Commerce (NBC), P.O.Box 142, Mtwara. Tel. 059-3267, 3304. Fax: 059-3329. This bank is within 2 km. of the port.

STORING: Trucks can proceed alongside the quay.

SHORE LEAVE: Crew allowed ashore.

IDENTIFICATION CARDS: Required.

GARBAGE DISPOSAL: Drums are provided alongside the quay. When the ship has sailed, final bills are immediately dispatched to the ship's agent for payment.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Tanzanian Shilling.

SHIPMASTER'S REPORT: December 1981 (Updated 1990).

Vessel called at Mtwara on 1st December, 1981. The following facts were obtained from Port Manager and Pilot:

Documents/Health: Refer to Dar-es-Salaam.

Pilotage: Pilot is based at Dar-es-Salaam and flies to Mtwara when required. Early information concerning ETA to "Harbour Master – Dar-es-Salaam". Pilot arrives by Air Tanzania regular flight. He may stay at the Pilot's Rest House or aboard the vessel. Pilot boards 0.5 miles N.W. of Shangani Reef Buoy from tug. Pilot ladder to be 3 ft. above water. Pilotage during daylight hours only. Signal station can be contacted on Channel 12 between 0600 hrs. and 1800 hrs. Channel 16 also available if required.

Approaches: Ras Msamgankuu lighthouse unlit. The entrance is approached by a channel marked by buoys and leading beacons, all unlit. Buoys only weighted and liable to drift. There are 2 unmarked anchorages to accommodate vessels of up to 9.5 m. All buoys and leads unlit.

Radio: "Mombasa Radio".

Tugs: Available from Dar es Salaam.

Cargo Gear: Ship's cranes or derricks used. Shore facilities (not used for discharging) consist of: 12 Hyster fork lift trucks (max. 3 tons); 2 tractors and 10 trailers SWL 15 tons; 2 Jones mobile cranes × 15 tons each and 5 Coles mobile cranes × 7 tons each.

Stevedores: Stowage Plan required, preferably before ship's arrival.

Medical: Doctor available. Medicine and/or injections in short supply and may not be available. All crew require valid Yellow Fever Certificates and anti-Malaria tablets should be taken on arrival.

Density: 1025.

Fresh Water: Sometimes available from quay in small quantities. No water barge.

Provisions: Fresh fruit and vegetables available in market.

Fuel: Not available.

Repairs: No facilities.

Gangway/Deck Watchmen: Arranged by Agent.

Agent: Only one Agent – National Shipping Agencies. Cable address: "Navigation Mtwara".

Identification Passes: Made out by Immigration Officials on board. Collected by Agent prior to departure.

Repatriation: Daily internal flights to Dar-es-Salaam.

Airport: 7 miles distant by road.

Time: GMT plus 3 hours (permanent).

Holidays: All holidays normally worked except Christmas Day and 1st May when no work possible.

Working Hours: Seven days weekly 0700–1500; 1500–2200 with requested extension from 2200–0100 if to finish vessel (except Heavy Lifts).

Telephones: Direct connection on board not possible.

Telex: One machine in Post Office for general use. Otherwise Agent telephones Dar-es-Salaam Agent who forwards telexes.

Shore Leave: Crew allowed ashore.

Mail: Very slow.

Main Exports: Cashew nuts, sisal, timber, pigcon peas, Casava in bags (not palletised) or bulk (bags slit).

Fenders: Tyre fenders alongside cemented quay. Additional fenders required by ship.

Cargo Security: Though adequate guards, security of cargo on quay is a problem as frequent blackouts due to power failures.

Aero (RC): Strong signal operational 0800–1530 LMT.

Restrictions: Cameras must not be used. Taking of any photographs whatever is strictly prohibited.

Customs Allowances: Officers: 8 cans beer, 1 part bottle spirits. Ratings: 8 cans beer.

Heavy Lifts: Not worked after 1800 hrs. due to darkness.

Notes: (a) All navigation lights in Tanzania (except Zanzibar Island and Pemba Island) are unreliable.

(b) If next port is Dar-es-Salaam, Pilot will remain on board and take vessel into Dar-es-Salaam.

SHIPMASTER'S REPORT: December 1983 (Updated 1990).

Documents/Customs Regulations:
Crew Declaration Form (Form C.8)
Declaration and Advice of Consumable Stores (Form C.7)
Passenger List or Nil List (Form C.6)
Parcels List or Nil List (Form C.3)

One copy of each of the above being required and 1 copy of the Manifest. (Company Manifest not acceptable, Form supplied locally.)

Dutiable goods allowance:

Each member of the crew including the Master is allowed 1 ounce of tobacco or 25 cigarettes per day. The Master and officers are also allowed a quarter pint of potable spirits and 1 quart of wine or beer. The other members of crew are allowed either a third of a pint of spirits or one sixth gallon of beer or one sixth gallon of wines. Dutiable stores are issued to a limit of 8 days (cigarettes) and 4 days (beer and spirits).

Quarantine Regulations:
1 copy of Maritime Declaration of Health.
1 Crew List with valid dates for Cholera and Yellow Fever.
Pratique not granted by radio.

Pilotage: Compulsory. Pilot is available between 0600 – 1800 hrs. and boards in an approximate position 1 to 2 miles North of Shangani Shoal.

Pilot boat (VHF Channels 12 and 16) – Pilots have hand set.

Anchorages: No recommended sea anchorage. If arriving off Mikindani Bay at night, it is prudent to cruise WELL OFF until daylight, currents are strong and set onshore.

A sheltered anchorage exists in the inner bay with reported good holding ground in about 12 fathoms.

Approaches to Berth(s): From the Pilot Station passing S.W. of Shoal Buoy into channel marked by an unlit buoy. The sharp bend around Msemo Spit requires very careful navigation and steering.

Radio: Standard instructions/communications.

VHF: Channels 12 and 16 available between 0800 – 1200 hrs. and 1400 – 1600 hrs. local time Mtwara Signal Station.

Tugs: Possibly available (on prior notice) from Dar-es-Salaam.

Description of Berth(s): Berth No. 3 situated on the main wharf which is of stone construction with rubber tyre fendering. Owned by Tanzania Harbours Authority.

Berthing: Night berthing/unberthing is not permitted.

Vessels normally berth starboard side to, 1 tug meets vessel off the signal station.

Mooring wires are permitted: shore gangway is available.

Density: 1025.

Tankers: Shore Lines: 10 in. Connections: 8 in. flexible hose. 65 m. from Eastern end of quay approximately. Grades: M.S., G.O., and K. Maximum Pressure: 75 p.s.i.

Ships' lifting gear required for 1.5 ton lift.

Fuel: Bunkers not available.

Fresh Water: Water supply has been improved but shortages may be felt in the dry season. It is reported to be of poor quality and should not be used for domestic purposes, unless boiled and filtered (See "Laundry and Stores").

Ballast: No ballast disposal or tank cleaning facilities available.

Port Regulations: Immobilisation of engines not permitted alongside.

Laundry and Stores Facilities: Reports indicate that fresh water and/or provisions obtained at Mtwara are of very poor quality and may have been the source of a severe infection which affected several ships' crews. Masters are, therefore, warned accordingly.

Repair Facilities: None available.

Crew Identification Cards: Crew require identity cards when proceeding ashore.

Medical: Medical facilities with government hospital available.

Precautions: Be careful of stowaways.

AUTHORITY: Tanzania Harbours Authority, P.O.Box 530, Mtwara. *Tel:* 3125, 2121, 2183. *Telex:* 56076. *Cables:* Bandari. *FAX:* 255-59-3153. *Contact:* M.J. Mungure, Port Manager.

Tanzania Harbours Authority, P.O. Box 9184, Dar-es-Salaam, Tanzania. *Tel:* 21212, 46041. *Telex:* 41346 Portreeve. *Cables:* Bandari. *FAX:* 46043. *Contact:* Director General/Chief Marine Officer.

TANGA: 05.04 S. 39.08 E. (See Plan)

PORT LIMITS: From high water mark at Ras Kwawa 090° to the meridian of 39° 15' E., thence 180° to the parallel of Lat. 5° 05' S., thence 270° to the mainland at high water mark. Time of anchorage within port limits to constitute an "arrived vessel".
DOCUMENTS, HEALTH: Refer to Dar-es-Salaam.
Shipmaster's Report: March 1981.

Same as Dar-es-Salaam "Shipmaster's Report" except: 7 Passenger Lists, 2 sets Vaccination Lists, Heavy Lift List.
APPROACHES: Tanga is approached from the S.E. through channel in line with Ulenge leading marks bearing 319° (T). A 3 fathom bank to starboard is marked by ship channel buoy. Care should be taken in this vicinity as there is frequently a strong set to the N.E. On the port hand, Niule Reef is marked on Northern tip by a beacon. After passing Niule Reef Beacon it is necessary to turn to port on to Ras Kazone leading marks bearing 266° (T) until Ulenge Beacon is sighted.

A signal station is situated immediately below Ras Kazone High Light. Signals are exhibited to indicate if inner channel to harbour is clear.

Late afternoon arrivals to Tanga may encounter poor visibility of land marks due to haze from setting sun.
PILOTAGE: ETA required via Mombasa Radio, if not given by Agents at previous port of call. Pilot embarks from white launch in vicinity of Ulenge Beacon on Ras Kazone leading line. Pilot ladder required on port side in N.E. monsoon, and on starboard side in S.W monsoon.

Vessels wishing to enter must await the arrival of the Pilot at the outer anchorage and, if anchored, must anchor well clear of the leading lines.

Pilotage is daylight only, but during the N.E. Monsoon, when vessels lie at anchor facing out to sea, Masters with previous experience of Tanga will be granted permission to sail at night without a pilot.

Masters of deep-draft vessels, or Masters who are in any doubt about their approach, may request a pilot in a position approximately one mile S.E. of Buoy No. 1.
ANCHORAGES: Tanga has no deep water berths. It is a lighterage port where ships are worked at anchor in the stream. Eleven safe anchorages have been marked by means of beacons. The inner harbour provides 7 anchorages for use by deep sea vessels with length of up to 213 m., and drafts of between 6.4 m. and 9.5 m.

The outer harbour has 3 anchorages with drafts well over 9.45 m.

Incoming vessels without Pilot should not anchor within 1 mile of Ras Kazone.
RADIO: Mombasa Radio. Ras Kazone Signal Station keeps 24 hour VHF watch on Channel 12.
TUGS: Available on request from Dar-es-Salaam.
BERTHING: All except bulk cargo work is carried out at anchor. Vessels are not berthed in Inner Harbour during hours of darkness except by special request in cases of urgency.
Fertiliser Jetty: A Fertiliser Jetty with a single berth of 16 m. maximum draft is available in the harbour. The jetty has 2 cranes connected to a sophisticated hopper system for handling materials for the fertiliser factory only.

Also see "Cargo Handling Facilities".
Quays: The new Lighter Wharf, 240 m. long, is situated at the Eastern end of the port. It has a depth of 2.44 m. at low tide. The old wharf now under modernisation has a length of 140 m., and has similar depth of 2.44 m. at low tide.

Facilities for harbour dhows and schooners engaged in coastal wise cargo transportation are provided at the end of the old wharf where only 1 schooner or dhow can work at a time. The water alongside has a depth of 2.44 m. at low tide.
CARGO HANDLING FACILITIES: One 20 ton fixed crane and one 40 ton mobile container handling crane are available on lighterage wharf for heavy lifts. 12 cranes of 5 tons capacity also available. A jetty on the Eastern side of Ras Kazone provides 1 berth for vessels of 20,000 d.w.t. equipped for the discharge of bulk cargoes and liquid ammonia. Two portal cranes of 7 tons capacity fitted with grabs. Jetty currently handling bulk products for fertiliser factory.

The port is able to handle 20 ft. containers on 5×20 ton trailers.

The port has 33 fork lifts, 3 tractor, 1 shunter and 2 Coles cranes, 3×16 ton Scamel trailers, 6×8 ton Scamel trailers, 4 Hyster cranes, 1×35 ton front loader for container handling and 4 Scamel hoses. The above equipment is maintained by the Authority's mechanical and electrical workshops at the port.
Sheds and Stacking Yard: There are 3 sheds for reception and storage of cargo.

The main stacking yard which is rail and road served covers a total area of 20,000 sq.m. There is also a new yard which covers an area of about 861 sq.m. Shed Nos. 6 and 8 are mainly for handling exports while Shed No. 7 is for imports. Total floor space of the shed is 10,000 sq.m.
Marine Craft: The transfer of cargo from vessels working at anchor to the wharves and vice-versa is done by means of lighters. There are 30 lighters in use. In addition there are 4 lighter towing tugs, 3 runboats, 4 labour launches and 2 landing pontoons.
PASSENGER FACILITIES: All passengers and visitors to ships pass through the Customs Passenger Terminal at the Eastern end of the new lighter wharf, and embark or disembark from the pontoon landing stage. Private hire launches available.
TANKERS: Two buoys are situated in a restricted area at the Western end of the Port for the use of local tankers transhipping oil products from Dar es Salaam.
FRESH WATER: There is no water available, even on the Lighter Wharf, due to very low water pressure.
FUEL: Only available to coasters at the lighter quay.
SURVEYORS: A Lloyd's appointed surveyor is available for cargo, container, on/off hire and draft surveys. Contact Mr.G.R.Blackway, P.O.Box 794, Tanga. Tel: Tanga 43327. Telex: 45033 NOTCO.
REPATRIATION: Repatriation is possible through Tanga, but would be far easier through Mombasa or Dar es Salaam.
GARBAGE DISPOSAL: No facilities available.
WASTE OIL DISPOSAL: No facilities available.
SEAMAN'S CLUBS: None.
CURRENCY: Tanzania Shilling (TS.).
All foreign exchange must be declared on arrival and may be checke before departure. A maximum of TS.200 may be tanken out of th country.
GENERAL: Refer to "Dar-es-Salaam" for all general information.
AUTHORITY: Tanzania Harbours Authority, P.O.Box 443, Tanga Tanzania. *Tel:* Tanga 43078. *Telex:* 45000 Harbor TZ. *FAX:* 42360 *Contact:* Harbour Master/Port Manager.

Tanzania Harbours Authority, P.O. Box 9184, Dar-es-Salaam Tanzania. *Tel:* 21212, 46041. *Telex:* 41346 Portreeve. *Cables:* Bandari *FAX:* 25551, 46043. *Contact:* Captain J.K. Kwayu, Chief Marine Officer

WETE (Pemba): 05.14 S. 39.43 E.

DOCUMENTS, HEALTH: Refer to Zanzibar.
PILOTAGE: Not compulsory, but restricted to daylight only. Vessels passing through channel between Zanzibar and Pemba should infom Port Authorities 24 hours in advance.
RESTRICTIONS: Entrance through Uvinje Cap, channel dept decreasing to 11 fathoms, with shallow patches to be avoided. Narrowes part of channel is 1.5 cables wide. Vessels may enter and leave at an state of tide but in daylight only.
ANCHORAGES: No mooring buoys. Vessels work cargo to lighters Depth decreases to 2.5 fathoms. Mud bottom.
MAX. SIZE: 240 ft. length; 25 ft. draft.
TUGS: 2 tugs and 1 labour boat.
LIGHTERS: 3 lighters of 200 tons each.
6 lighters of 100 tons each.
FRESH WATER: Not available.
FUEL: Not available.
STORING: Very limited facilities and it is recommended that when necessary all storing be done in Zanzibar.
AUTHORITY: See "Zanzibar".

ZANZIBAR: 06.09 S. 39.11 E. (See Plan

DOCUMENTS:
Bill of Health.
3 Crew Lists.
6 Passenger Lists.
3 Cargo Manifests.
3 Customs Manifests.

Also Required: Bills of Lading, Ship's Papers, Ship's Certificate Health Certificates (Yellow Fever and Cholera).
PILOTAGE: Compulsory. Pilot requires ETA 24 hours before arriva Contact can be made through Pilot Station (VHF Channel 16 – 24 hou a day). Pilot boat may be contacted on VHF when in operation – pil boat is painted orange.

Vessels approaching from English Pass embark Pilot at Seagull Buo and vessels approaching from South Pass meet Pilot at Penford Buoy Pilot takes vessel in an out, day and night. Vessels awaiting Pilot anch at the boarding position.

Recommended time for entry and departure is between 0600 hrs. a 1800 hrs.
ANCHORAGES: 6 anchorages to accommodate vessels drawing up 32 ft. Additional anchorage provided for vessels carrying explosives
RESTRICTIONS: 2 entrances, English Pass and South Pass. The form is approximately 1 mile wide and has minimum depth of 6 fathoms 4 and a very narrow angular turning corner of 1.7 cables width. South Pa wider and deeper than English Pass. Passes are well buoyed and lit English Pass, tidal stream runs North and is stronger on ebb than rising tide. South Pass, tidal stream runs N.N.W. and stronger on flo than on ebb-tide. Vessel may enter or leave at any state of tide.
MAX. SIZE: (Anchorage) Length 1,100 ft., beam 110 ft., draft 32 ft.

Also see "Developments".
HEALTH: Pratique given by Quarantine Officer who boards on arri All crew required to be in possession of valid yellow fever and chol inoculation certificates.
RADIO: No official call sign for the control station, but there is a r radio installation at the Agency on VHF Channel 16 with a call s ZANSAC (Zanzibar National Shipping and Agency Corporation).

There is also a long-range radio on frequency 8297.3 kHz.
RADAR: No installation.
TUGS: No tugs are required as all vessels work in stream. Tugs only used for towing barges to and from vessels, transporting labour other stevedoring activities.
BERTHING: Concrete pile wharf 800 ft. long to North of Ras Shan used mainly for lighterage purposes and for berthing Govern coasters. Under special circumstances, upon prior request to Officer, vessels of less than 375 ft. length and drawing less than 2 may be permitted to berth alongside, but due prevailing onshore w this practice not encouraged.

Also see "Developments".

CRANES: Four old cranes and 1 mobile crane of 7 tons at the Wharf. No heavy lift cranes, however if heavy lift crane required, arrangements are easily made to put the load in a landing craft to be discharged at a point near the port, using lowloader to tow it to its destination. No objection to vessel using its own gear.

BULK CARGO FACILITIES: No berth for foreign vessels, all work carried out in stream.

Discharging Rate: 350 – 400 tons per gang per day in case of bagged stuff or pallets. No facilities for bulk cargo handling or containers, but one or two containers can be handled.

STEVEDORES: Normal working hours Monday to Thursday, 0700 to 1500 hrs. Friday 0700 to 1200 hrs.

Work can be extended on overtime for a second shift up till 2300 hrs.

Average rates: bagged cargoes 15 tons per gang hour, general cargo 8 tons per gang hour.

LIGHTERS:

2 lighters, open at the top for heavy equipment 280 tons each.
2 lighters for bag and general cargo, each with a capacity of 300 tons.
5 lighters for bag and general cargo, each with a capacity of 200 tons.
5 lighters for bag and general cargo, each with a capacity of 150 tons.
6 lighters for bag and general cargo, each with a capacity of 100 tons.

FRESH WATER: There is one water barge of 250 tons capacity. Water can be supplied at the wharf by hydrant or at the anchorage in the stream by water barge.

FUEL: Not available.

SURVEYORS: Department of Marine Transport, P.O.Box 263. Tel: 32857.

STORING: See "Prelims".

1. Storage done by barges.
2. There is no restriction in doing so, provided the Master can allow both operations to be done simultaneously.
3. Yes.
4. Yes.
5. Stores have to be checked by the Customs Authority.

GENERAL: Members of the crew who wish to fish around the harbour limits have to notify the Signal Station and the harbour police of direction they are going. If the crew wish to visit the offshore island, they have to contact the Agent who will obtain permission for them and advice.

DEVELOPMENTS: *The West Wharf:* Facing West with a total length of 260 m. This is a combined length of 170 m. on the Northern end with 9.0 m. water depth for longer vessels of up to 30,000 d.w.t. The Southern portion of 90 m. length with 5.5 m. water depth is for smaller vessels berthing.

The North Wharf: Facing North with 130 m. length and 5.5 m. water depth. This will also be used for smaller vessels' berthing.

The new jetty will extend some 10.0 m. further seaward of the existing one, and will have a container storage area located on the Southern end of the West Wharf.

AUTHORITY: Department of Marine Transport, P.O.Box 263, Zanzibar, Tanzania. *Tel:* 32858. *Telex:* 57267 Shipco TZ. *Cables:* Shipping. *Contact:* Captain Ramadham Saleh, Port Officer. Major H. Kh. U. Mlinde, Director, Department of Marine Transport.

NOTES

Please also advise Shipping Guides Ltd.

Thailand

GENERAL:

IMMIGRATION: The Thai Immigration Department has issued a Notification, dated March 15th, 1976 to the following effect:

"Chinese or Hong Kong crew members not in possession of Seamen's Discharge Books, but holding Certificates of Identity only are not recognised as bona fide crew members, and are liable to Immigration Guarantees at 50,000 Baht per person, to be filed upon arrival."

All concerned are kindly requested to check and ensure that all Chinese crew members are in possession of either Passports or valid Seamen's Discharge Books, and not Certificates of Identity, to avoid complicated Immigration procedures involving deposits, etc.

REGULATIONS: Thai Government Regulations: Thai laws relating to the production, possession, distribution and use of narcotic drugs are extremely severe. Penalties for infringement range from prison sentences and fines to life imprisonment and even execution.

The Thai Navigation Act requires Masters of all vessels calling at Thai ports to observe the following:

On preparing to depart Thai waters, vessels shall fly the International Code flag indicating that the vessel is about to proceed to sea (code flag P).

If the vessel is to depart in the morning this flag is to be flown in the afternoon of the previous day, if departure is in the afternoon, code flag 'P' is to be flown in the morning.

Departure shall be notified to the Harbour Master at least 6 hours before expected time of departure.

Documents required by Port Authorities (other than those required for specific ports) include:

Ship's Licence and Safety Equipment Certificate.
Certificate of Registration.
Certificates of Competency (including Radio Officers).
Radio Certificate.
Ship's Articles.
Last Port of Call Clearance.
Log Book.
Load Line Certificate.
Derat or Exemption Certificate.

BANGKOK: 13.26 N. 100.35 E. (See Plan)

LOCATION: Bangkok Port is located on the left side of the Chao Phraya River between Km. +26 and Km. +29, in the Klongtoey District of Bangkok.

PORT LIMITS: The jurisdiction waters under the Authority's responsibility begin from the Memorial Bridge of the Chao Phraya River downstream to the Km. −18 in the Gulf of Thailand, about 57 km. long.

DOCUMENTS: Ship's forms: Crew List; Passenger List; Stores List; List of Arms and Ammunition for ship's use; List of Arms and Ammunition in possession of passengers; List of opium and harmful habit-forming drugs; List of crew private belongings (cigarettes, radio, gramophone, camera, etc., including foreign currencies and liquors); Dangerous Cargo List; List of heavy lifts; Stowage Plan; Inward Cargo Manifest; Transit Cargo Manifest; Through Cargo Manifest; List of Containers.

Documents to obtain from officials and Agents: Immigration forms No. 3, 4 and 35, obtainable from Agents. International Maritime Declaration, obtainable from Quarantine Officer.

For safety reasons, all dangerous goods such as calcium hypochlorite, butanox (methyl ethyl ketone peroxide), sodium hydrosulphide, nitrocellulose and potassium chlorate, are not allowed to be kept in a godown or dangerous goods warehouse. Such dangerous goods have to be discharged overside into a barge or cargo boat or truck.

APPROACHES: The entrance of the Chao Phraya River is marked by the Bangkok Bar light beacon situated at the Lat. 13° 26' N., Long. 100° 35' E. The approach to the port is made through the bar channel, which is 18 km. in length, 100 m. wide in the reaches, and 250 m. wide in the bend. The channel is dredged and maintained to a depth of 8.5 m. below Mean Sea Level (MSL) or 6.3 m. or 20.7 ft. below Lowest Low Water (LLW).

PILOTAGE: Pilotage is under the supervision of the Harbour Department, a separate Department attached to the Ministry of Transport and Communications. The Pilot Station is situated at Lat. 13° 22' 38.008" N., Long. 100° 35' 57.672 " E., 22 km. from the Phra Chullachomklao Fort along the channel.

ANCHORAGES: See "Shipmaster's Report" dated March 1984.

RESTRICTIONS: No restrictions, able enter day and night, dependent tide at Bar Channel.

MAX. SIZE: Vessels of 10,000 – 12,000 d.w.t., 172 m. LOA and 8.2 m. draft are allowed to navigate through the channel for berthing.

HEALTH: *Radio Pratique:* According to the Thai Ministry of Health's Regulations and International Health's Regulations Article 36:

Under the responsibility of ship's Master and shipping Agents, vessels from infected areas may apply for exemption of Quarantine through Radio Pratique by telegram sent to Quarantine Bangkok, stating name of ship, last port, number of passengers and health of crew and passengers.

(a) Vessels with passengers from infected areas proceeding to the berthing places in Bangkok must slow down at Paknam enabling Port Health Officer to board the ship for inspection.

(b) Vessels without passengers from infected areas go directly to berthing places in Bangkok where they will receive Port Health Officer for inspection.

Remarks: In case of suspected infectious disease on board any ship o anything suspect about health or ship sanitation, the ship's Master i requested, as early as possible, to inform the Port Health Officer a International Quarantine Office (Medical) Section, Immigration Division North Sathorn Road, Bangkok, Tel. 39588.

Documents Required: 1 copy of Maritime Declaration of Health; 1 cop of Crew List; 1 copy of Passenger List; Derat or Derat Exemptio Certificate.

Vaccination: Vaccination Certificates required: Cholera (only whe leaving from infected areas); Yellow fever (only when leaving fro infected areas).

However, vaccination may be done as deemed necessary by Po Health Officer even if the crew or passengers are from non-infecte areas.

Vaccination certificates will be shown collectively for trans passengers/crew members and individually for disembarkin passengers/crew members only.

Exemption from Vaccination: If the Port Health Officer is of the opinio that vaccination is contra-indicated on medical grounds, he shall provid the persons with reasons, written in English, underlying that opinion which Health Authorities should take into account.

Death on Board: In the case of death on board after the ship arrived a the anchorage or at the port, permission to land the corpse must b obtained after the inspection of the Port Health Officer, if the cause o death was not quarantinable diseases.

Ship's Master or shipping Agent must inform the Port Health Office if there are cadavers and/or remains on board of persons who died i a foreign port, in order to pass through the quarantine. The dead shou be accompanied by a death certificate (or a true copy), signed by th medical officer and placed in a coffin hermetically sealed in a caske which is air-tight and waterproof.

According to Immigration Law B.E. 2493 (1950): The traveller to Thailan must be free from diseases forbidden under section 14 (4) of th Immigration law such as: trachoma, leprosy, tuberculosis, venere diseases, including persons having physical or mental defects wh cannot earn their living.

RADIO/VHF: The Port Radio Station located at Lat. 13° 42' 38" N Long. 100° 35' 58" E., is operated by the Port Authority of Thailand (PAT for the use of port business only.

Port Radio "Bangkok Thailand", call sign HSC 61 Station.

The incoming vessels are to communicate with port officers at th distance of between 1,500 – 2,000 miles by radio telegraphy.

There are 3 radio telegraphy systems as follows:

1. HF – Power 1,000 watts.
   – Port transmits on 8,466 kHz.
   – Port receives on 8,363.2 – 8,367.2 kHz.
   – Open 7 times a day at 0700, 1000, 1200, 1500, 1800, 210 and 2300 hrs. GMT (About 30 minutes each time).

Information required from the vessel includes:

(1) Vessel's name and nationality.
(2) Last port of departure.
(3) Estimated time of arrival at Pilot Station.
(4) Draft (fresh water) in feet or metres.
(5) General cargo tonnage to be discharged.
(6) Dangerous cargo.
(7) Heavy lift required.
(8) Fresh water required.
(9) Number of passengers (landing and transit).
(10) Time of dropping anchor at Pilot Station.

So as to check the time to reach the Pilot Station, when entering t Gulf of Thailand, or at the distance between 400 – 1,000 miles, t vessel has to communicate with port officers again by radio telegrap

2. MF – Power 1,000 watts.
   – Working frequency 443 kHz.
   – Calling frequency 500 kHz.
   – Traffic lists broadcast daily at 0450 hrs. GMT, and t beginning of every hour (2300 – 1700 hrs. GMT).

Upon reaching the Bar Channel, or at the distance of 6 – 10 mi from the Pilot Station, communication by radio telegraphy is to changed to radio telephony, call sign "Port of Bangkok",

3. VHF – Power 60 watts,
   – Calling Channel 16,
   – Working Channel 14,

so that the vessel shall be informed of its mooring place.

Communication with the radio station of the Communications Autho of Thailand is required for any other business.

BERTHING: Upon the arrival of a vessel at the mouth of the Chao Phra River, PAT officers will communicate with the Pilot onboard by ra telephony to receive requisite information, so as to make arrangeme for berthing facilities such as berths, tugs, mooring boats, etc.

Final berth allocations are made each day at 1000 hrs. by a commi of the Bangkok Port and shipping agents. Exclusive berthing rights provided to certain groups of shipping lines who guarantee throughputs according to PAT's demand.

Ships with breakbulk import cargoes are berthed at the West Termi The dolphins and buoys are used to moor vessels' loading expor undergoing minor repairs. Vessels on completion of discharge and cargo to load are moved to the dolphins. Container ships, which inc combo and feeder ships, are berthed at the East Terminal.

Berthing facilities:

Berth/Dolphin/Buoy	*Length* (ft.)	*Number of Berths*	*Max. LOA/ Draft* (ft.)
East Quay	5,012	8	565/27
			300/15
West Quay	5,445	10	565/27
Klongtoey Dolphin	4,183	36	565/27
Bang Hua Sua Dolphin	4,592	25	565/27
Mooring Buoy at Sathupradit	5,182	5	450/25
			300/23

CRANES/EQUIPMENT:

Equipment	*Capacity* (tons)	*Quantity*
Rail-mounted Shoreside Container Cranes	32.5	12
Yard Gantry Cranes	30	10
	35	14
Top Loaders	30	8
	40	31
Empty Container Stackers	6-7	25
Semi-portal Cranes	3-5	12
Mobile Cranes	10	7
	50	9
Forklift Trucks	5,000 lbs.	48
	7,000 lbs.	316
	10,000 lbs.	77
Tractor for Trailers	30	68
Container Chassis	30	78
Towing Tractors	8,000-12,000 lbs.	34
Trailers	5-30	61
Motor Trucks	5-7	149

TUGS: 12 tugs available, 1,000 h.p. – 1,800 h.p., all tugs equipped with firefighting equipment.

BRIDGES: Bangkok Port has one bridge only. However, as bridge up river, vessel permitted to pass bridge with LOA not exceeding 280 ft.

STEVEDORES: Vessel to advise Agents 48 hours prior arrival, text required in this cable to be ETA, Drafts, Tonnage of cargo aboard for Bangkok, Number of crew/passengers, Dangerous cargo/Heavy lifts, Gangs required. Undertaken by private companies.

Working Hours: 0800-1200 hrs. – day shift, 1300-1630 hrs. – day shift, 1630-1800 – overtime (working through), 1900-2400 hrs. – first half-night shift, 0100-0500 hrs. – second half-night shift, 0500-0700 – overtime (working through, but should apply for P.A.T. approval).

On Saturdays, Sundays and public holidays, the day shift finishes at 1600 hrs.

MEDICAL: Hospital facilities available, advance notice of ETA required.

TANKERS: No facilities.

DENSITY: Bangkok: Minimum 1000, maximum 1011; Kohsichang: 1021.

FRESH WATER: Available, supply can be made through barges and shoreline. Capacity of barges from 120 to 250 tons, rate of supply approx. 30 t.p.h. Advance notice 24 hours.

FUEL: Available. Supply can be made by barges, no delay on bunkering, advance notice 48 hours.

FIRE PRECAUTIONS:

1. Smoking is strictly prohibited in transit sheds and warehouses and in the vicinity of explosives and dangerous cargoes.
2. There is a Fire Brigade unit in the port area with fire fighting equipment, such as fire fighting vehicle, portable chemical fire extinguishers and tug equipped with fire fighting system.
3. It is prohibited to discharge and load dangerous cargoes, such as explosive cargoes and radio active substances.

REPAIRS/DRY DOCKS: No major facilities at the port. Mobile repair companies available. No berth dedicated for repair work.

SURVEYORS: Lloyd's, ABS, Veritas, Nippon Kaiji Kentei Kyokai Surveyors available.

GANGWAY/DECK WATCHMEN: Necessary. Theft of wire, paint and tools has occurred.

OPENING/CLOSING HATCHES: Normally by ship's crew.

CUSTOMS ALLOWANCES: *Customs Regulations:* It is prohibited by law to bring the following articles into Thailand: narcotics: hemp, morphine, cocaine, opium, heroin, marijuana etc.; obscene literature or pictures, firearms or ammunition (except those obtained by permit from the Police Department or the local registration officer).

Following items are permitted to bring into Thailand free of duty: personal effects: accompanied with the owner for his own or professional use in reasonable quantity, except motor vehicle, fireams and ammunition, provisions. As for spirituous liquor, cigarettes, cigars or smoking tobacco, being personal effects and accompanied with the owner, the Director General of Customs may impose any restriction with respect to the exemption from payment of duty at any port as he considers suitable but the quantity must not exceed: (a) cigarettes; two hundred grammes, (b) cigars, smoking tobacco; two hundred and fifty grammes, each or altogether, (c) spirituous liquor; one litre. Photographic/cinematographic apparatus and sound recording machines imported by persons who temporarily visit Thailand for the purpose of taking photographs or recording; but films, plates or articles for recording, imported for such purpose must be in accordance with the condition and quantity specified by the Ministry of Finance: (a) photographic films (roll); not exceed 5 rolls, (b) photographic films (plates); not exceed 40 plates, (c) cinematographic films (8 or 16 mm. in width); not exceed 5 rolls, (to be re-exported within six months from the date of importation).

Permanent residents of Thailand must register their cameras on the outgoing trip to gain duty free status.

The export of Buddha images and antiquities are prohibited except for qualified educational, cultural and archaeological purposes.

CARGO GEAR: Supplied by stevedores, except cargo tent and forklift truck.

REPATRIATION: Possible.

AIRPORT: About 30 km. from port, regular services by airlines.

TIME: GMT plus 7 hours. No change during the year.

HOLIDAYS: New Year's Day, Buddhist's Day, Song-Kran Festival Day (Thai New Year), Royal Plouging Ceremony Day, Coronation Day, Chulalongkorn Day, Constitution Day, PAT's Anniversary Day, H.M. the King's and the Queen's Birthday, and Chakri Day. When any one of these holidays falls on a Saturday or a Sunday, the following Monday is observed as a holiday.

POLICE/AMBULANCE/FIRE:

Police Tel: 2498888-91.
Marine Police Tel: 2496399, Ext. 2790.
Fire Department Tel: 2490399, Ext. 2993, 2999, 2444.
Ambulance Tel: 2494106, 2490399, Ext. 2223, 2224, 2258.
Hospital Tel: 2494106, 2490399, Ext. 2223, 2224, 2258.

EMERGENCY CO-ORDINATION CENTRE: Not available.

BANKS: Bangkok Bank (Klongtoey Branch). Tel: 2499312-4.
Thai Farmer Bank (Klongtoey Branch). Tel: 2490463-4.
Ayuddhaya Bank (Klongtoey Branch). Tel: 2498012-4.

STORING: See "Prelims".

1. Vessel can be stored by barges or trucks.
2. Vessel can store from barges during loading or discharging.
3. Trucks cannot proceed alongside the berth, but Port Authority provides the parking area for trucks inside the Port Authority's area.
4. —
5. Regulations of Customs Department are in force regarding storing.
6. —

TELEPHONE: Available when alongside PAT berths.

SERVICES: No tank cleaning equipment. No facilities for discharge of tank washings. Compass adjusting, but spare parts unavailable. Radar/VHF/radio repairs.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Required for all crew and officers.

GARBAGE DISPOSAL: Service provided. Ship's Agent to make arrangements with private licensed contractor and Harbour Department.

WASTE OIL DISPOSAL: Service provided. Ship's Agent to make arrangements with private licensed contractor and Harbour Department.

SEAMAN'S CLUBS: Mariner's Club, 227 Tarua Road, Klongtoey, Bangkok, 10110 Thailand. Tel: 2493801.

CURRENCY: Local currency is Baht.

Exchange Rate: 25 Baht = U.S.$ 1.00.
38 Baht = £ 1.00.
24 Baht = 100 Yen.
17 Baht = 1 Mark. (March 1996).

DELAYS: Occasionally congestion, delay 1 to 2 days.

DEVELOPMENTS: Bangkok Port has modernised and standardised its facilities. The action plans include the construction of the CFS/Terminal gates and fences, procurement of additional handling equipment, computerisation of the container operations and restructuring of the port organisation.

SHIPMASTER'S REPORT: September 1980.

During S.W. monsoon Pilots appear to always require pilot ladder on starboard side and for vessel to leave Pilot Station platform to starboard when entering. Custom Officials board at Paknam on way up river to check documents. For repatriations, Immigration require 2 clear working days. After 30 days in Thailand must apply for extension from Immigration at a cost of U.S. $15.00 per man. Vessel must fly 'Blue Peter' 12 hours before sailing from Bangkok or liable to a fine of U.S. $5,000. Require 2 copies of Immigration Form 4 (Crew List) for departure.

Telephone calls can be made via Bangkok Radio on Channels 25, 26, 27, after calling on Channel 26.

SHIPMASTER'S REPORT: September 1982.
Loading of tapioca products in bulk quantities of 25,000 tons and more at Kohsichang:

There are three ways of loading:

1. Vessel anchors off the N.E. coast of the main island. A number of mobile cranes, 12 to 15, are placed on deck by means of a floating crane. The cargo is brought alongside in barges, shovelled by stevedore-labour in canvas slings and dumped into the cargo holds. An average of approximately 3,500 tons per day can be reached, however, delays are experienced by rain and by too much swell for some of the barges alongside.

Stevedore Labour: An average of 300 persons (men, women, children) are onboard during the whole of the cargo operation. The cooking is done on deck. The daily fresh water consumption will increase by 20 tons to 25 tons. Fresh water is available by barge from the mainland.

This way of loading involves most ships; 7 to 9 ships can be handled simultaneously.

2. At the same anchorage as No. 1 above, the vessel will have alongside two floating elevators. A daily average of 13,000 tons can be reached, also depending on rain/swell. Many less people are involved. One ship at a time can be loaded.

3. Loading alongside a silo based on the mainland. The daily average here will be about 14,000 tons, however at a draft of about 40 ft. – 42 ft. the vessel will have to shift to the anchorage to complete loading as under 1 or 2 above, most probably No. 1. The silo belongs to 2 shippers of cargo only.

Trimming of cargo is done mainly by means of bulldozers but trimming by hand/shovel is often required additionally.

Holding ground at anchorage is good. Ships swing round on a rather strong tide. Wind/rain squalls are experienced.

SHIPMASTER'S REPORT: March 1984.
Pilotage: There is no longer a pilot vessel at the Bar. Instead, a peculiarly shaped red-painted lighthouse type beacon has been erected. This beacon has accommodation for the Pilots, who board vessels using a small grey pilot boat. Position of beacon: Lat. 13° 22.8' N., Long. 100° 35.9' E. (BA Chart 1046).
Anchorages: Bangkok Bar Anchorage: Any ship with draft able to enter Bangkok Harbour, can anchor at this anchorage to wait its turn to enter. Limits of this anchorage are shown on BA Chart No. 1046. Ships proceed close to the beacon mentioned under "Pilotage", to pick up the Pilot. Kohsichang Anchorage: There are no longer any N.E. or S.W. monsoon anchorages. Throughout the year Kohsichang Harbour limits are from the Island, East to Long. 101° 51.5' E. and between Lat. 13° 08.9' N. and Lat. 13° 11.3' N. (Thai Chart No. 114).

AUTHORITY: Bangkok Port, Port Authority of Thailand, 444 Tarua Road, Klongtoey, Bangkok 10111, Thailand. *Tel:* 662-2490362. *Telex:* 72331 Patth. *FAX:* 662-2490885. *Contact:* Anuparb Sunananta, Director General, Port Authority of Thailand. Thavorn Chunnanond, Deputy Director General (Operations). Lt. Manit Apogul, R.T.N., Deputy Director General (Administration). Wari Punpoka, Deputy Director General (Technical and Planning). Payoongkich Chivamit, Managing Director of Bangkok Port.

AGENT: Jardine Pacific (Thailand) Ltd., 24th Floor, Times Square Building, 246 Sukhumvit Road, Bangkok 10110, Thailand. Tel: 66-2-2678520. Telex: 21441 Jarthai. Cables: Jarthai. Fax: 66-2-2678401/2.
Associated with Jardine Shipping Agencies.

BANGSAPHAN (Prachuap): 11.11 N. 99.35 E.

PILOTAGE: Private Pilot available throughout 24 hours.
APPROACHES:
Anchorage for Pilot Station: Lat. 11° 15.5' N., Long. 99° 36.0' E.
Fairway Buoy: Lat. 11° 11.1' N., Long. 99° 35.8' E.
Boarding Ground Position: Lat. 11° 11' N., Long. 99° 36.3' E.
Quarantine Anchorage Position: Lat. 11° 11.5' N., Long. 99° 37' E.
Navigation Channel and Turning Basin: Length 1,400 m., width 250 m. and depth 14.0 m. at mean sea level.
MAX. SIZE: 100,000 d.w.t.
TUGS: 2 tugs of 2,800 h.p. and 1 lineboat.
BERTHING: *Main Berth:* Initially 240 m. length, to be extended to 450 m. Depth 15.0 m. at mean sea level. The berth will handle vessels of 60,000 d.w.t. – 100,000 d.w.t., when construction is completed.
Second Berth: Initially 245 m. length, to be extended to 330 m. Depth 8.0 m. – 11.0 m. at mean sea level. The berth will handle vessels up to 12,000 d.w.t., when construction is completed.
CRANES:
2 × semi-portal cranes of 45 tons capacity.
2 × mobile cranes of 60 tons capacity.
3 × mobile cranes of 80 tons capacity.

SHIPMASTER'S REPORT: June 1995.
Vessel: Bulk carrier of 43,300 d.w.t., LOA 177 m. and beam 33 m.
Cargo: 41,000 tonnes of steel slabs (full cargo).
Pilotage: Pilot available.
Max. Size: Vessel's arrival draft: 11.75 m. (even keel).
Tugs: Two tugs in attendance.
Berthing: Vessel berthed at main berth, which is aligned North-South.

During the Summer months, there is always a strong flow of Northerly set in Gulf of Thailand, and because of the exposed nature of the port entrance to the South, due caution has to be exercised while manoeuvring in the Turning Basin.
Bulk Cargo Facilities: The cargo was discharged efficiently at the rate of about 9,000 tonnes per day, using ship's cranes, operated by stevedores. Forklifts were not readily available.
Medical: Basic medical attention available locally.
Fresh Water: Available by truck.
Fuel: Fuel oil available, advance notice required.
Repairs: No facilities available.
Repatriation: Possible via Bangkok (400 km.).
Services: Small quantities of fresh provisions available locally.

For repairs to navaids, technicians have to come from Bangkok.

OPERATOR: Prachuap Port Co.Ltd., 62 Moo 3, Mae Rumphueng, Bangsaphan, Prachuap Kirikhan 77140, Thailand. *Tel:* (032) 691536, (032) 691454. *FAX:* (032) 691264.

ERAWAN (FSU): 09.06 N. 101.21 E. (See Plan)

LOCATION: Erawan Terminal is situated in the Central Gulf of Thailand, approximately 300 miles South of Bangkok.

The Terminal co-ordinates are: Lat. 9° 05.35' N., Long. 101° 20.47' E.
Charts: British and American Charts and Publications referencing the Terminal location are as follows:
British Admiralty Charts No. 3963 and 3983: Hlaem Kho Kwang to Hlang Suan, and Hlaem Talum Phuk to Hlaem Mae Ramphung.
China Sea Pilot Volume 1.
U.S.Government Chart No. 93010: Gulf of Thailand.
Floating Storage Unit (F.S.U.): The F.S.U. "Erawan" is a modified 87,000 tons tanker, yoke-moored on a custom built buoy secured to the sea bed.

The Terminal's operation and control centre, communications network and accommodation facilities are housed onboard.

The unit is capable of simultaneously receiving produced stabilised condensate and of loading vessels secured alongside at a maximum of 20,000 b.p.h.

Condensate is stored and off-loaded in a controlled, pressurised, inert gas environment and metered to vessels.
Note: SPM No. 1 is now the reserve mooring.
DOCUMENTS: *Vessel Documents required by Port Authorities from Vessel's Master, Inwards, On Arrival:*
5 copies General Manifest Inwards.
5 copies Ship's Register.
5 copies Inward Cargo Manifest.
5 copies Through Cargo Manifest.
Safety Equipment Certificate (for inspection).
Safety Construction Certificate (for inspection).
Safety Radio Certificate (for inspection).
Current Freeboard Survey Certificate (for inspection).
5 copies Derat Certificate.
Clearance Outward for Last Port (Original).
5 copies Inward Cargo Manifest.
5 copies Crew List.
5 copies Passenger List.
5 copies Through Passenger List.
5 copies Crew and Passenger Declaration.
5 copies List of Deck Stores.
5 copies List of Engine Stores.
5 copies List of Ship's Equipment and Stores.
5 copies List of Provisions and Bonded Stores.
5 copies List of Arms, Ammunition and Restricted Drugs.
Cargo Lifting Gear and Equipment Certificate (for inspection).
5 copies List of Foreign Currency.
PILOTAGE:
1. Pilotage within the Terminal area is compulsory, except when proceeding to anchor.
2. A Company Mooring Master will board all vessels scheduled to occupy the loading berth. Masters of the vessels must ensure that they are familiar with, and strictly observe all regulations, paying particular regard to those covering safe operations and pollution of the sea (by oil, dirty ballast, garbage, or any other material).

Mooring Masters:
1. All Mooring Masters carry their own radios, but this does not exempt the vessel from having operational Marine VHF sets.
2. Masters are reminded that Mooring Masters must be afforded boarding facilities complying with accepted international standards with regard to the vessel's freeboard.
3. The assigned Mooring Master (or his relief) will remain onboard the vessel from the time of boarding until the vessel clears the berth.
4. Should a loaded vessel be returning to the anchorage, the Mooring Master will not necessarily anchor the vessel, (however, he may do so in certain circumstances). He will, however, remain aboard until the vessel clears the Terminal area, or completes any documentation requirements.

Term of Acceptance – Conditions of Entry: After boarding, the Mooring Master will hand to the Master of the vessel a letter entitled "Conditions of Entry into and Use of Erawan Terminal", in duplicate and the Master must sign and return to the Mooring Master one copy before the Vessel moves from the boarding point.

This letter details the terms under which the Company accepts that vessel.

APPROACHES: *Approaches to the Terminal:*

SPM No. 1 (Reserve):

1. The Terminal approach is through the Company's gas field restricted zone via 2 approach channels, one from the South and the other from the East.
2. The Southern Approach Channel is 2 miles wide at its narrowest point, and based on a line between Lat. 8° 45' N., Long. 101° 30' E., and Lat. 9° 04' N., Long. 101° 25' E.
3. The Eastern Channel is 2 miles wide at its narrowest point, and based on a line joining Lat. 9° 14.5' N., Long. 101° 35' E, and Lat. 9° 09' N., Long. 101° 32' E., and Lat. 9° 04' N., Long. 101° 25' E.
4. Currents in the area are predominantly S.E.'ly and seldom exceed 1 knot.

SPM No.2: Vessels must remain West of Long. 101° 10.0' E. between Lat. 09° 55' N. and Lat. 08° 45' N., and proceed to SPM No. 2 Anchorage Area, which is centred on Lat. 09° 05.0' N., Long. 101° 10.0' E.

Restricted Area: This covers the Company gas fields in the area. Within this area, all activities, which could endanger the platforms or pipelines, are forbidden. For example, anchoring of vessels (outside designated areas), dredging, mechanical fishing (trolling and trawling), disposal of refuse, etc.

The area is bounded by lines joining the following reference points:

Latitude	Longitude
9° 55' N.	101° 10' E.
9° 55' N.	101° 35' E.
8° 45' N.	101° 10' E.
8° 45' N.	101° 45' E.
9° 05' N.	101° 45' E.
9° 05' N.	101° 35' E.

ARRIVAL: *Arrival of Vessels:* The Terminal operates 24 hours but will only berth vessels during daylight hours (0600 – 1800), throughout the year, subject to prevailing weather.

Berthing on Arrival: Vessels berthing on arrival will be boarded by the Mooring Master in the anchorage area, or at a point advised by the Terminal Manager or Mooring Master.

Thai Officials may board with Mooring Master.

Anchoring on Arrival: Vessels obliged or instructed to anchor should do so in the recommended anchorage. Anchoring time should be reported to Terminal Control as soon as is practicable thereafter.

Notice of Readiness: Vessels should tender Notice of Readiness:

1. At the time of entering the anchorage area, if berthing on arrival.
2. At the time of anchoring (if instructed to do so by the Terminal Control), or entering the anchorage area if intending to drift.

Notice of Readiness will be accepted subject to the following conditions:

1. The Terminal is open.
2. The vessel arrived within loading range dates, and is nominated. The Terminal may under certain circumstances berth a vessel arriving earlier than it's nominated loading slot, subject to the non-prejudice of another ship, and available cargo or berth.
3. That the vessel has advised the Terminal of the Estimated Time of Arrival (ETA), 72 hours, 48 hours and 24 hours prior to arrival, and thereafter, of any subsequent changes in her ETA of more than 2 hours.
4. That the vessel fulfills all the obligations of the Terminal Regulations and Safety Check List, and is ready in all respects to berth and load the nominated cargo.
5. That it is during the hours of daylight, considered to be from 0600 hrs. to 1800 hrs. local time.
6. That it is not a public holiday or Sunday unless the vessel is berthed on that day.

Deductible Laytime:

1. Manoeuvring time into the loading berth.
2. Time required for deballasting, if not concurrent with undelayed loading operations.
3. Time lost due to fault or failure of the vessel, including suspension of loading for vessel's purpose and or delays incurred due to failure to observe Terminal Regulations.

ANCHORAGE: SPM No. 1: The anchorage is an area of 1 mile radius centered on Lat. 9° 04' N., Long. 101° 25' E.

Should a Master decide to anchor in this area, his attention is drawn to the depth of water.

For the purpose of being "arrived", a vessel should proceed to within the anchorage area.

SPM No. 2: 1 mile radius centred on Lat. 09° 05' N., Long. 101° 10' E.

Anchored Vessels:

1. Vessels should maintain a continuous 24 hour VHF radio listening watch on Channel 16 and Channel 17 for further advice or berthing instructions from Terminal Control.
2. Shifting Anchorage: Vessels requiring to vacate or re-anchor in the recommended anchorage should inform Terminal Control.
3. Lifeboats: Except in an emergency, where ship's personnel may be required to abandon ship, vessels are not permitted to turn out lifeboats, or lower them to the water.
4. Refuse and Garbage: The dumping of refuse and garbage in the sea within the restricted area is expressly forbidden.
   Galley waste, and all other general garbage, should be contained onboard in a sanitary condition until the vessel clears the Restricted Area. Masters are cautioned that fines will be incurred for non-compliance.
5. Craft Alongside: No small craft, other than those on official business, will be allowed alongside, either in the anchorage, or in the loading berth.
6. Loss of Anchor(s) and/or Anchor Cables: In the event that a vessel should lose anchor(s) and/or anchor cable, Terminal Operations will, under no obligation, give assistance in attempts to recover them, subject to support vessel availability and Terminal operational requirements. The Terminal reserves the right to recover expenses so incurred.
   The use of anchor marking buoys is recommended.

RESTRICTIONS/MAX. SIZE: *Vessel Size Restrictions:* Vessels of a max. LOA of 800 ft., and a minimum length such that two of the Terminal fenders will lay alongside the parallel body, may berth at the Terminal.

All vessels must maintain their deadweight below 70,000 tons while at the Terminal.

The minimum acceptable lifting amount will be 10,000 barrels.

Vessel's Age: Vessels over 15 years of age will not be accepted. Exceptions may be made in the following circumstances:

1. Vessels that have previously loaded at the Terminal without incident, provided that they are still with same Owner/Manager and can, in the sole opinion of the Terminal, continue to undertake loading operations in a safe manner.
2. Vessels that have been inspected by a Terminal Representative, or nominated substitute and in the Terminal sole opinion are suitable to load at the terminal.
   Vessels should be nominated and inspected well before the intended date of lifting.
3. In all cases the vessel must comply with all other acceptance criteria.
4. Acceptance will be withdrawn, at the sole discretion of the Terminal, if the vessel fails to maintain the required standards of the initial acceptance.

Inert Gas System: All vessels over 20,000 metric tons deadweight must be fitted with a fully operational inert gas system serving all cargo tanks.

Pumping Rates:

Maximum for the Terminal will be 20,000 bbls./hr.

Minimum for the Terminal will be 5,000 bbls./hr.

Also see "Berthing" – "Operational Requirements".

RADIO: *Standard message required from vessels:*

(aa) Name and call sign of vessel.
(bb) Flag, Classification Society and year built.
(cc) ETA in Local Time (GMT + 7 hours).
(dd) Owner/Manager and years with.
(ee) Summer Deadweight and Length Overall.
(ff) Segregated or clean ballast. If clean, deballast time required.
(gg) Double sides, double bottom or double hull.
(hh) Nationality of Master, Officers and crew.
(ii) If any pollution incidents or port prohibitions in last 2 years.
(jj) Cargo requirements in barrels (GSV).
(kk) Draft on arrival.
(ll Last Port.
(mm) Confirmation that all cargo tanks are inert with an oxygen content below 8%.

Note: Any vessel whose last port was in Thailand, and is unable to give full Notice of Arrival, should ask their Agent to contact Unocal's Production Operations Department or the Terminal, and give the above information prior to the vessel sailing.

TUGS: One service vessel with tug capability and equipped with pollution/detergent spraying and foam fire fighting systems available. There are also 2 inflatable dinghies for use by the Mooring Master, for boarding, in suitable weather conditions.

BERTHING: *Operational Requirements:*

1. The operations, including berthing, unberthing, deballasting, loading and emergency operations shall be conducted in accordance with the following:
   (i) Oil Companies International Marine Forum/International Chamber of Shipping (OCIMF/ICS), International Safety Guide for Oil Tankers and Terminals (ISGOTT) – lastest edition.
   (ii) OCIMF/ICS – Ship to Ship Transfer Guide (Petroleum) latest edition.
   (iii) OCIMF – Standards for Oil Tanker manifolds and associated equipment.
   (iv) Company's Terminal Regulations.
2. Arrival Draft: Vessels must arrive at the Company's facilities on a suitable draft and trim, compatible with safe manoeuvring.
   A guideline for suitable draft is provided by applying the following criteria:
   (i) Moulded draft amidships (dm.) in metres to be not less than dm. = 2.0 + 0.02 L (length).
   (ii) Trim by the stern not greater than 0.015 L (length).
   (iii) Propeller(s) fully immersed.
   This guideline is in accordance with the requirements of the "International Conference on Marine Pollution, 1973", Regulation 13.
   Typically an approximate 25% Summer deadweight ballast condition should normally achieve these criteria.
   (iv) The Terminal reserves the right to request Master to amend their arrival draft, if such draft is deemed to interfere with safe operations.
   (v) Mooring and Hose Handling: Use of ship's anchors in the loading berths is not permitted. Vessels scheduled to load, should have both anchors cleared away ready for emergency use. To prevent accidental release, the cable stoppers should be utilised until advised to the contrary by the Mooring Master.
   (vi) Equipment supplied by the Terminal shall be taken on board using the Terminal lifting gear. Vessel's personnel must be available to take the equipment on board and carry out mooring and hose handling duties as advised by the Mooring Master.
3. State of Readiness:
   (i) Main engines and essential machinery must be maintained in a state of readiness, which will permit immediate unberthing in an emergency situation.
   No main engine repairs are allowed whilst vessels are secured in the loading berth. Steam turbine engine vessels should engage the main turbine turning gear.
   (ii) A vessel may be required to vacate a berth, should the Mooring Master consider that conditions so warrant.
   (iii) Adequate vessel personnel are to be available for all loading/deballasting operations and any emergency situation. An Officer must be on duty and available at all times.

(iv) Masters are advised that the vessel's personnel are also required for all mooring and loading hose connection duties.
(v) Terminal personnel will normally board the vessel after berthing to advise on loading hose connection.

Mooring at the Terminal:
(i) The use of tug(s) is the Mooring Master's or Terminal Manager's decision. Their movement and use is co-ordinated by the Mooring Master, in agreement with the vessel's Master.
(ii) Vessels scheduled to berth at the Terminal will normally berth in tandem to the F.S.U. – bow-to-bow, using an OCIMF 76 mm. (Type B) chain and a 17 in. single hawser. Transfer will be by a single 16 in. hose string.
Alongside berthing will remain an option, but will not normally be used. All mooring and unmooring operations at the Terminal will be accomplished using tug(s).
(iii) Should starboard side alongside berthing be required, the vessel's Master will be afforded adequate advance notice to prepare.
(iv) Mooring alongside the Terminal:
(a) Initial mooring lines will be passed to the Terminal by messengers passed to the vessel using a line throwing gun.
Mooring will be as the plan agreed between Mooring Master and the vessel's Master.
(b) All mooring wires used must have synthetic rope tails with a breaking strength at least 20% greater than the breaking load of wires to which they are attached.
(c) Standard mooring consists of 5 head lines, 2 springs and 4 stern lines and 2 springs.
(d) Adjustment of mooring lines must only be undertaken in the presence of the Mooring Master.
Indiscriminate working of moorings may cause damage to both the vessel and the Terminal.
(e) Vessels fitted with tension winches must have them on "Manual Brake", when secured alongside.
(v) The close-alongside derrick should be topped, rigged and secured inboard during berthing/unberthing operations.
(vi) Loading Hoses:
(a) 2×8 in. hose strings, with 150 ANSI flanges, are available for loading condensate.
(b) Advice on connecting loading hoses is given by Terminal personnel.
(vii) Special Requirements for Vessel's Loading at the Terminal:
(a) The deck fire water main should be kept pressurised to normal operating pressure at all times.
(b) Two foam-making branches on hoses should be laid out forward and aft, adjacent to the loading manifolds, and be maintained ready for immediate use.

LOADING:
(i) Masters are required to maintain their vessel in a safe operating condition. The vessel's arrival freeboard must not be exceeded, and deballasting controlled accordingly.
(ii) Vessels arriving with clean ballast in their cargo tanks may first be required to load an amount of cargo equal to the amount of ballast to be discharged. They will then deballast and on completion of deballasting will resume loading.
Segregation of ballast water and oil cargo is the responsibility of the vessel's Master. The Company accepts no responsibility for any co-mingling of oil and water.
(iii) Masters of vessels are cautioned that no facilities exist which allow excess loaded cargo to be pumped back to the Terminal.
The Company is not responsible for overloading any vessel under any circumstances.
It is the loading vessel Master's responsiblity to stop cargo on completion of loading, in accordance with procedure given in (vi).
Adequate provision should be made to receive a minimal "overrun" of condensate after the "stop" has been requested, whilst loading pumps stop and valves close.
(iv) Loading hoses are regularly pressure tested to ensure their integrity.
The vessel's manifold valves should remain closed until the Mooring Master requests the vessel's personnel to open them.
(v) Good communications between the vessel and Terminal Control are essential. The Mooring Master will carry a hand-held radio to facilitate communication between all parties concerned (i.e. Terminal – Mooring Master and vessel's personnel).
If the vessel is fitted with a VHF radio in the cargo control room, it must be maintained on Channel 17.
Clear and concise operational advice from the vessel is requested, especially when changing over tanks and when stopping cargo.
The Terminal requests a minimum of 15 minutes notice prior to either a change of pumping rate or cessation of loading.
Under no circumstances should the loading vessel valves be closed against the Terminal loading pumps.
(vi) Completing Cargo Loading – Stop Procedure: Vessel to Terminal notification required as follows:

15 minutes notice	– "Standby to stop loading".
	– "Slow down to (state thousands of barrels/hour)".
5 minutes	– "Standby" to stop – second advice.
Volume aboard	– "Stop loading".

(vii) Masters are advised that a prolonged slow loading rate (5,000 b.p.h. or less) is unacceptable, due to the operational constraints of the Terminal condensate metering system.

FUEL: Not available.

REPAIRS: No facilities.

TIME: GMT plus 7 hours.

SHORE LEAVE: Shore leave for visiting vessel's personnel is not permitted. Vessel's personnel may pass through the Terminal in an emergency, when special arrangements can be made through the vessel's Agent, in conjunction with the Terminal Manager.

BALLAST: *Ballast Discharge and Pollution Control:*
(i) The discharge of bilges or dirty ballast water from crude oil vesse into the Gulf of Thailand is strictly prohibited. Acceptance an treatment of dirty ballast is not available. Vessels must arrive wit clean ballast only for discharge to the sea. By clean ballast, it i meant that ballast in a tank which, since oil was last carried therei has been so cleaned that effluent therefrom, if it were discharge into clean calm water on a clear day, would not produce traces o oil on the surface of the water or on adjoining shorelines, or caus a sludge or emulsion to be deposited beneath the surface of th water or upon adjoining shorelines.
(ii) Vessels presented for loading, which cannot comply with th requirements of (i) above and have to retain ballast on board, ar advised that any deadfreight so incurred will be for the vessel' account.
(iii) Ship's Bilges: Ships should arrive at the Terminal with bilges pumpe empty. Any residues accumulating whilst the vessel is in port shoul be retained on board.
Heavy fines will be incurred by vessels discharging oil or oil pollute water whilst at the Terminal.

GENERAL: *Vessel's Agent:* All the vessel's business, including Carg and Customs Documentation and the Shipping Documents, will b conducted by the vessel's Agent.

SHIPMASTER'S REPORT: March 1993 (Updated 1996).

Location: Erawan Terminal (Floating Storage Unit), operated by Unoca Thailand, is situated in the Central Gulf of Thailand, approximatel 300 miles South of Bangkok in position Lat. 09° 05.35' N., Long 101° 20.47' E.

Documents: When coming from a port in Thailand, no document required, only Port Clearance from last port. Otherwise all document to be dealt with as under Sriracha, Thailand.

Pilotage: Compulsory. Berthing Master will board vessel in or near Expor Tanker Anchorage.

Anchorage: The anchorage is an area of 1 mile radius, centered o Lat. 09° 04' N., Long. 101° 25' E. Water depth is approximately 200 ft.

Approaches: The Terminal approach is through the Unocal's gasfields restricted zone via 2 approach channels, one from the South, and the other from the East.
(a) The Southern Approach Channel is 2 miles wide at its narrowes point, and based on a line between Lat. 08° 45' N., Long 101° 30.0' E. and Lat. 09° 04' N., Long. 101° 25' E.
(b) The Eastern Approach Channel is 2 miles wide at its narrowes point and based on a line joining Lat. 09° 14.5' N., Long. 101° 35' E and Lat. 09° 09' N., Long. 101° 32' E. and Lat. 09° 04' N. Long. 101° 25' E.

Currents: Currents in the area are predominately Southeasterly and seldom exceed 1 knot.

Restrictions: Berthing daylight only. Max. wind speed 25 knots. Unberthing day and night.

Max. Size: LOA 250 m. Export tanker fullest displacement when alongside "FSU Erawan", not to exceed 70,000 tonnes.

Radio: 72 hours prior to arrival at the Unocal Field, vessels should advise Unocal Thailand of their ETA. Advice should be sent by cable via Bangkok Radio, Telex: 82632 UNOCAL TH, Fax: 02-541-1436 or Tel: 02-541-1970.

Notice of Arrival should state:
1. Name of vessel and call sign.
2. ETA in GMT and date.
3. Cargo requirements.
4. Deballasting time required.
5. Maximum loading rate.
6. Vessel's draft on arrival.
7. If there is any sickness aboard or clean Bill of Health.
8. Last port of call.
9. Any hull, bulkhead, valve or pipeline leaks on vessel, which could affect loading or cause pollution.
10. Distance in feet from bow to the cargo manifold.
11. Flange dimensions of vessel's manifold, if not ANSI B 76.5, B 1560, ASA 150 or equivalent.
12. Confirmation that all cargo tanks are inert with oxygen below 8% and inert gas systems are fully operational.
13. Is there a derrick/crane at the port manifold, with a minimum saf working load of 10 tons.

All communications should be addressed to Section Head Gas an Condensate Sales, with copy to Manager FSU and Marine Control SLC An updated ETA should be sent 48 hours and again 24 hours prior t arrival at the Unocal field.

Vessels whose last port was in Thailand, and unable to give full Notic of Arrival, should have their Agent contact the Unocal Company o Terminal and give their ETA prior to sailing.

VHF: First contact to be made on Channel 16, working on Channel 1 with "FSU Erawan".

Radar: On approach, when 1 mile off "FSU Erawan", radars have to b switched off.

Tugs: One supply vessel "Smit Belait" available. It will bring Pilot an Loading Master on board, and assist in mooring. It will make fast wi 1 tugline on starboard bow.

During unberthing, tug will pull the head of "FSU Erawan" away fro the tanker.

Tankers: 2×8 in. hoses to be connected on port manifold. Loading ra approximately 3,000 cu.m./hr.

On arrival, oxygen % content of all tanks will be measured. API o Erawan Condensate is 57.0.

Repairs: Not allowed, engines to be kept on short notice.

Time: GMT plus 7 hours throughout the year.

AUTHORITY: Unocal Thailand Ltd, Central Plaza Office Buildi 1693 Phaholyothin Road, 10900 Bangkok, Thailand. *Tel:* 02-541-19 (Ext. 2379 or 425). *Telex:* 82632. *FAX:* 02-541-1436. *Contact:* Capta Michael E. Harris, F.S.U. Manager.

AGENT: See "Bangkok".

KANTANG: 07.25 N. 99.31 E.

SHIPMASTER'S REPORT: April 1982.

PORT LIMITS: Vessels anchored in the bay between Ko Talibing and Ko Liang Hnua are considered to be "arrived ships".

DOCUMENTS:
- 6 Crew Lists.
- 4 Passenger Lists.
- 2 Stores Lists (including dangerous drugs, explosives, bonded items, ship's wireless sets, TV, radio, etc.).
- 2 Personal Property Declaration.
- 2 Cargo Manifests.

PILOTAGE: Not compulsory.

Due to shallow waters and absence of chart it is recommended to take the services of the local Pilot, though he speaks only local language. Pilotage distance is about 15 miles up the river.

Pilot boards at the anchorage and takes the vessel up to Kantang. Berthing is also done by him, but it is recommended that the Master does this himself.

ENTRANCE: No large scale chart is available. The only chart available is B.A. Chart No. 3942.

Keep well clear of Light Ko Liang and after passing Ko Liang Hnua on the starboard side keep equidistant from Ko Talibing and Ko Liang Hnua. Depth of water is about 10 m. up to Ko Liang Hnua Point (bearing 190°×4 miles approx.). This place is good for anchoring.

While going up and down river, there is a Customs check post at the mouth of the river and the vessel has to stop for Customs check and sign the register.

The maximum depth in the river at high water is about 5.5 m. at Springs and as low as 3.5 m. at Neaps.

The loading should be restricted as per the tidal conditions.

HEALTH: No Port Health Officer available. Hence Free Pratique not required.

RADIO: No way of communicating with the port from vessel. ETAs, etc. should be sent from the previous port by cable. On receipt of the ETA the local Agents will arrange berthing, etc.

VHF: Not available.

BERTHING: Berth is approximately 140 m. length. Hand leadline sounding at berth indicated depths minimum 10 ft. and maximum 16.5 ft. at low water and minimum 16 ft. and maximum 22.5 ft. at high water.

While the vessel is being loaded it sits on the bottom at low tide and again floats at high tide. The ground is soft sand. Since the vessel is not afloat at all times the cargo calculations and distribution should be accurate.

The main exports are cement in bags, fish meal and rubber in pellets which is mainly exported in LASH barges. The barges are loaded once a month. Generally half the wharf is occupied by LASH barges.

One oil berth also available. Small tankers with about 4 m. draft can go alongside.

CRANE: One mobile crane of 5 ton capacity is available. Priority given to loading LASH barges.

FRESH WATER: Available. Supplied by a small boat of 4 tons capacity.

FUEL: High speed diesel is available. Price is very high.

CONSULS: No consulates or embassies.

REPAIRS: Small repairs can be effected.

WATCHMAN: Recommended.

OPENING/CLOSING HATCHES: MacGregor hatches opened and closed by crew.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits.

CARGO GEAR: Supplied by the Stevedores.

REPATRIATION: No crew changes possible.

TELEPHONES: Trunk calls can be made from the main Telephone Exchange. Sometimes delays up to 1 hour is normal.

STORES: No ship chandler. Market is very close to the berth where fresh vegetables, pork, fish, beef and chicken available. No mutton available but live goats can be purchased.

KHANOM: 09.12 N. 99.54 E. (See Plan)

SHIPMASTER'S REPORT: October 1988.

LOCATION: Khanom, Nakorn Si Thammarat (Sumpun Mining Wharf).

DOCUMENTS: Same documents as Bangkok.

PILOTAGE: Not available. Wharf Foreman will board at anchorage and will give berthing advice.

ANCHORAGE: Lat. 09° 12' N., Long. 99° 54' E.

MAX. SIZE: *New jetty:* 25,000 d.w.t. Draft 9.0 m. – 9.5 m.
Old jetty: 15,000 d.w.t. Draft 8.5 m.

TUGS: None available. Small boat assists with running lines.

BERTHING: *New Jetty:* Vessel is moored to 6 buoys (3 forward and 3 aft) and is kept 3.0 m. off the jetty. Vessel is to be equipped with 6 lines of at least 240 m. length each.

LOADING: *Loading:* One belt conveyor for loading gypsum in bulk, rate 500 – 550 tonnes per hour.
Shifting: Good co-operation required with Foreman as vessel had to shift 3 or 4 times for each hatch.
Trimming: By small bulldozer, weight 2,000 kg.

SHIPMASTER'S REPORT: March 1993.

Vessel anchored 1.0 nautical miles off the berth in 9.0 m. (C.D.). Pilot available.

Vessel boarded at anchorage by Agent, Pilot and his assistant. Agent takes all paperwork, no authorities boarded. Pilot gives advice/information on berthing and suggested loading sequence. However, we decided on actual sequence.

On berthing, Pilot boards with assistant and Port Supervisor. Pilot on bridge, assistant aft and Supervisor forward, to assist with advice on ropes. Six mooring lines to be 280 m. long, and 2 to be 220 m. long. Anchor is also used on approach (up to 5 shackles paid out during shifting and 3 shackles on berthing).

To obtain required length of lines, either join two lines together or cut up older lines to obtain length. We joined section of old line plus 22 mm. × 35 m. wires, which had eyes each end (footwires used for log lashing). This was successful. This enabled lines to be kept on tension winches, it would be difficult if drum ends had to be used for shifting, i.e. 2 mooring lines joined together would not fit onto drums of tension winches.

When shifting ship, the Supervisor attends on bridge to assist/advise. He was very experienced and proved invaluable.

Loading by single loader, which can swing enough to load one hatch of this vessel's beam. It can also stretch or retract. Loading rate up to 800 tonnes/hr. Max. allowable air draft is 11.5 m.

Depth of water: There is a depth marker on quay. However, sounding round is advisable. Said to be vessel always afloat at 9.0 m. draft – load to max. draft 9.5 m.

Ships soundings approximately 15 cm. higher than scale, which is closer inshore. Lowest low water 8.7 m., heights vary from 0.6 m. to 1.7 m. above LLW. Using tables for heights at Pak Phun, supplied by Pilot. Depths can be difficult to ascertain, due to 1.0 m. to 2.0 m. sea running at times. Check shore scale every hour and sound round each H.W. and L.W. Bottom soft mud and sand. Caution recommended with regard to water depths, no degree of certainty.

Fresh water is available from shore, using ship's hoses, but very slow.

There are 2 boats available to run lines and a small tug stands-by for mooring and unmooring, though not very powerful. We used tug's line for unberthing.

Loading operations ran very smoothly. Loaded last 2,000 tonnes on rising tide.

Ship's particulars: 15,832 g.t.; LOA 167 m.; beam 26 m.; Summer draft 9.50 m.

We loaded, on this occasion, to even keel draft of 9.40 m. (approx. 24,800 tonnes gypsum). Shore scale read 10.25 m. depth alongside quay (vessel 10.4 m., i.e. 1.0 m. UKC).

Vessel can lie alongside in good to fair conditions, but should be held off quay 2.0 m. – 3.0 m. in moderate to rough conditions.

SHIPMASTER'S REPORT: September 1993.

VESSEL:

D.W.T.:	29,432 tonnes.
LOA:	180 m.
Beam:	23.1 m.
Cargo Loaded:	24,844 tonnes.
Final Draft:	Forward 9.75 m. Aft 9.76 m.

BERTH: Gypsum Berth No. 2: Position Lat. 09° 12.3' N., Long. 99° 53.2' E.

CHART: Largest scale chart available is B.A. 3963 (Laem Kho Kwang to Lang Suan) to a scale of 1:240,000. All positions refer to this chart.

GENERAL: Gypsum berth is situated at South end of Laem Na Than, about 2.0 miles S.S.E. of the town of Khanom. There are two jetties, No. 1 is the Southernmost and older. The following remarks refer to Jetty No. 2. A third jetty is planned to the N.W. of Jetty No. 2.

Gypsum is quarried about 200 km. away and brought by road in 25 ton lorries to be stockpiled near the berth. It is moved from the stockpile to the conveyor in 16 ton lorries. Counting lorries seems to be the only means of measurement.

Ships are moored to buoys off the jetty and are loaded via a fixed conveyor. The ship has to be shifted to load each hold. The final load is done on the rising tide, and the ship must sail immediately.

APPROACHES: From S.E., make for position Lat. 09° 12.0' N., Long. 100° 00.0' E., reducing speed after crossing the 20 m. contour. The headland of Laem Kho Kwang, at about Lat. 09° 00' N., Long. 99° 56' E., is conspicuous on radar and helps to check position.

Laem Na Than consists of a series of very steep wooded hills, dropping sheer into the sea. The hill at the South end is conspicuous as the coast South from there is low and fringed with a beach, where the town of Ban Na Dan is shown on the chart.

The berth is very hard to see as the gypsum stockpiles are hidden behind a wooded hill, and the two jetties are very small. The first thing we saw was a ship at anchor off the berth.

Contact the Pilot on VHF Channel 16.

When about 7 miles from Laem Na Than, bring the South end of the headland onto a bearing of 273°T and steer to make good a course of 273°T.

This course passes 7 cables South of the wreck charted in position about Lat. 09° 12.8' N., Long. 99° 56.1' E. This wreck was not visible. It is supposed to be the remains of a wooden fishing boat and the fishermen say it has now vanished.

The rising tide sets to the North, and the ebb runs to the South.

Watch the bearing of the South hill of Laem Na Than carefully as the tidal streams set the ship quite strongly North or South of her course. The sea bed shelves gradually and evenly. After passing the position of the wreck, come more to the North and anchor about 1.5 miles East of Jetty No. 2 (North).

FORMALITIES: Agent, Pilot, Loading Master, Foreman and Draft Surveyor board at anchor.

The Agent deals with formalities and requires the following documents:
Crew List.
Crew Effects Declaration.
Stores and Bond List.
Passenger List.
Arms List.
List of Arrival and Departure dates at the last few ports.

One copy of each list was sufficient. Bonded Stores were not sealed or examined.

BERTHING: As the tide was flooding, we berthed heading South. The ship will require 3, preferably 4, ropes each end, of at least 380 m. Two normal 200 m. mooring ropes should be lashed together eye to eye. Shackles are not suitable as the connection has to pass round winch drums. A total of 16, minimum 14, good mooring ropes are therefore required.

The Pilot was very good. An assistant is stationed at bow and stern to advise on moorings. One tug of 1,500 h.p. is available. This is an old sea-going tug and not very manoeuvrable, but pushes as required. Three lineboats of about 250 h.p. are in attendance.

The offshore anchor is let go after clearing the buoys astern. When in position, up to 7 shackles will have been paid out.

Four long lines are run to buoys at each end, 2 to seaward and 2 more or less ahead and astern, but slightly to seaward, two as breast ropes inshore of the jetty. After warping into position, 2 additional breast ropes are run out parallel. These can be single 200 m. lengths, but it is advisable to prepare longer lines if possible (See "Plan").

The ship is positioned about 3.0 m. off the jetty, ready to load.

BERTH: Berth No. 1 is the older, at the South end of the area. It is used by smaller ships that frequently shift to Berth No. 2 to top-off.

Berth No. 2 is about 30 m. long, aligned about 357° – 177°, and connected to the shore by a trestle about 200 m. long on an alignment of about 087° – 267°. The position of the head of the jetty is about Lat. 09° 12.4' N., Long. 99° 53.2' E. by GPS after applying corrections.

The jetty is of steel pile construction, its seaward face festooned with a random assortment of truck and tractor tyres. The ship must not lie against it. Occasionally during shifting, light contact was made. The berth is totally exposed to seaward, and during the N.E. Monsoon, ships are apparently thrown against it. Every Winter, the jetty has to be repaired. Judging by its appearance, repairs are in arrears.

DEPTHS: There are no tide tables for the port. The Pilot uses Thai tide tables for Ko Prap to the North, and Pak Phun to the South, and interpolates between them. The final loading is planned using readings taken from the tide gauge on the jetty.

We were told that zero on the tide gauge is about 0.8 m. above the sea bed. Soundings from the ship indicated that the water was a little shallower, about 0.4 m. deeper than the tide gauge. The depths increase immediately to seaward of the berth.

The policy is to stop loading when draft reaches 9.0 m., then on the flood tide top-off to about 0.2 m. less than the tide gauge reading, with a maximum sailing draft of 9.8 m.

LOADING: Gypsum is tipped into a hopper at the landward end of the jetty, and conveyed to the ship. The final stage of the belt is a telescopic and swivelling arm, that has a limited amount of range over the hatch. Max. airdraft is 12.5 m., or 11.5 m. during the N.E. Monsoon. Max. loading rate is about 800 t.p.h. Stowage factor is around 30 cu.ft./ton. No attempt is made to trim level with the loading arm. Instead, when each hatch is finished, a small bulldozer is hoisted in to trim level. The ship's cranes or derricks must be used for this. The bulldozer weighs about 3 tons.

The loading plan must be made out to reduce shifting to the minimum, but the shallow water and limited airdraft make deballasting difficult. When the draft reaches 9.0 m., loading will be stopped and the ship shifted to bring the midship hatch under the loader. As the tide rises, cargo will be loaded into this hatch until the final draft is reached. There is no opportunity to adjust fore and aft trim, so unless the cargo can be loaded exactly on the Centre of Flotation, the trimming effect must be allowed for at the earlier stop. The ship must sail before high water, and time must be allowed for the bulldozer to finish the last hold.

Cargo figures are calculated by draft survey.

SHORE LEAVE: No restrictions, and no passes needed. However, the ship must be shifted every few hours, so sufficient crew must be kept aboard to handle 8 ropes and the cable. If the ship's brow is used, it must be constantly attended as the vessel is not alongside. The Agent said that the plant would provide a launch to the seaward accommodation ladder, but we landed personnel using ship's cranes. Shore officials board and leave by scrambling along the (moving) conveyor belt.

FACILITIES: No stores are available, and we were told there were no medical facilities, though there is presumably something at Surat Thani, about 1.5 hours drive away.

The Agent and Pilots were all provided by the Charterer.

DEPARTURE: Tugs and lineboats ease the ship away from the jetty, helped by the anchor and No. 1 stern line. After this is let go, the ship is very hard to turn as she is so near the bottom. To seek the deepest water, steer to make good course 093°T, keeping the old jetty at the South end of Laem Na Than bearing 273°T, as described for approach. Maintain dead slow until soundings indicate adequate under-keel clearance. After passing position Lat. 90° 12.0' N., Long. 100° 00.0' E., the depth is great enough to ring full away and proceed on passage.

GENERAL: The Pilots and Loading Masters seemed very competent and apart from the shifting, all went well. There was no unauthorised boarding and pilfering. A Supervisor stays aboard during the load, and the 2 Pilots/Loading Masters stay for the last 24 hours.

The weather was calm. However during one squall, the ship sheered badly and the cable had to be hove in to keep ship off the jetty. During the N.E. Monsoon, I do not think this could be described as a safe berth. There are additional buoys to seaward near the No. 1 buoys fore and aft, which can be used to double up on moorings in the Monsoon.

SHIPMASTER'S REPORT: December 1993.

BERTH: Gypsum berth (Lat. 09° 12' N., Long. 99° 53' E.).

DOCUMENTS: Clearance is carried out by the Agent who takes all th required papers to the officials ashore.

NAVIGATION: The wreck in position Lat. 09° 12.8' N., Long. 99° 56.1' E has been reported by local fishermen to the Pilot as non-existent However, the Pilot advises that it is best to keep clear.

A gas pipeline is reported to have been laid from Khanom Powe Station (Approx. position Lat. 09° 14.3' N., Long. 99° 52.1' E.) in ar Easterly direction to the gas fields. It is therefore not recommended t anchor North of Lat. 09° 12.5' N.

The Power Station is of recent construction and is reported to supply a large area.

ANCHORAGE: Vessels are advised to anchor in position 1.5 miles Eas of the jetty and South of Lat. 09° 12.5' N. This was found to be a good anchorage with 6 shackles in about 12.0 m.

RADIO: Communications should be through the Agents, and after anchoring, a continuous watch should be kept on VHF Channel 16. The Pilot and local representative are equipped with VHF walkie-talkies which they use to contact vessels at anchor.

No continuous watch is kept ashore.

BERTHING: The gypsum loading facility (See "Plan") is privately owned and consists of 2 jetties on steel piles and a small quay built out from Laem Na Than for the loading of natural crude rock gypsum in bulk.

Jetty No. 1: Jetty No. 1 extends about 40 m. from the South side of the Point, providing a berth 70 m. long. It is concrete topped on steel piles with 2 fendered dolphins, one close East and one close West of the berth for protection. It can handle vessels up to about 8,000 d.w.t. with a max. draft of 7.8 m. forward and 8.6 m. aft.

Larger vessels may start loading on this berth and then move to Berth No. 2 to complete.

The loader on this berth is able to move through the 70 m. length of the berth, so shifting vessels between hold runs is not required.

Airdraft on this berth is estimated to be about 8.0 m.

Jetty No. 2: Jetty No. 2 is a 'T' jetty extending about 200 m. East of the Point, on steel piles of rather fragile construction. The original square end (35 m. wide) is well fendered with used tyres and now slightly rounded at the ends due to contact with vessels.

It was noted on berthing that a steel bracket on the Southern end of the jetty had previously been fractured.

This berth can handle vessels up to 190 m. LOA and 31 m. beam, loading to a max. draft of 9.2 m. at low water and 9.8 m. at high water.

The jetty supports a fixed loader which can swing through an arc of about 20 m. over the vessel with an outreach of about 18 m.

Max. airdraft is 11.0 m.

It is necessary to shift the vessel between runs for access to each hold.

Mooring: Mooring at both berths is to buoys with the offshore anchor used and starboard side to at Jetty No. 1 and portside to at Jetty No. 2. Mooring at Jetty No. 2: Two Pilots and the Supervisor board with the Agent at the anchorage.

One Pilot and the Supervisor take stations fore and aft to advise the Officers and ratings of the mooring arrangements and also take charge of the mooring operations.

It is necessary to have a minimum of 6 mooring lines at each end, 2 of which are joined end to end with 2 other ropes with shackles, if available, or lashings.

Approach is made either from the South on light draft, about 200 m. East of the jetty, or from the East passing North of the outer Southern buoys and the starboard anchor is let go when the outer buoys are in line with the bow.

Mooring lines are passed to the mooring buoys by 3 mooring boats and the vessel is moved into position by heaving on the moorings and the anchor is slacked away to about 7 or 8 shackles.

A tug of 1,500 h.p. assists as required.

The vessel is finally moored about 1.0 m. – 3.0 m. off the end of the jetty, heading North.

The Pilots have a set procedure for running the lines, and if this is followed, it is an efficient operation.

Shifting Ship: Shifting ship between holds is supervised by a Pilot and Supervisor who remain on board throughout loading and oversee al aspects of the operation.

If the set procedure is followed, the shifting is efficiently carried ou without the assistance of main engines.

Weather: During the N.E. Monsoon, there is a continuous low swel causing the vessel to roll alongside.

The wind speed is watched carefully and the Pilot will not take vessel alongside in winds above 15 – 20 knots, and if wind speeds are expecte to exceed 20 knots for a period, vessels will leave the berth and wait a anchor.

During this season, it is not unusual for a number of vessels to b anchored waiting to load.

It is reported that during the S.W. Monsoon all is peace and tranquili

Tide: The tide is reported to be about 1.0 m. rise and fall.

There is a tide gauge on the South side of Jetty No. 2, and the shi officers are requested to record the level hourly whilst alongside. Th previous day's readings are used to predict the final day's high tide i order to complete loading on a rising tide to load the maximum carg

Depth: The Pilot reported that an allowance of 0.8 m. is made for th maximum drafts allowed.

This vessel sailed at 9.83 m. and a minimum depth under-keel o 0.7 m. was recorded, giving a total depth of 10.53 m. The tide gau was reading 10.6 m., but with swell, this was not an acurate readin

It is reported that the tide gauge depth covers the whole area off th Eastern Jetty. However, on the first approach to the berth from the Sou a patch 0.4 m. less water was noted during the approach.

Cargo: Natural crude rock gypsum is mined some 180 km. inland and is brought to Khanom by lorry convoys and is stockpiled ashore in the open, so it is usually wet from rain.

The rock varies in size from about 15 cm. to dust and is brought from the stockpile to the loading hopper ashore by lorry and then to the vessel by conveyor belt.

A loading rate of 732 tonnes per hour was achieved for 35,000 tonnes loaded.

Stowage factor is quoted as about 30 cu.ft./tonne.

All stages of loading are supervised by the Pilot, who remains on board throughout and will modify the vessel's loading and ballast programme according to the tide conditions and to minimise shifting of the vessel and maximise cargo lifted.

FRESH WATER: Not available, so it is advisable to arrive with plenty, especially in the N.E. Monsoon, when long delays are possible.

MEDICAL: Medical attention is available for minor ailments locally and for more major problems at Surat Thani.

REPATRIATION: Vessel was advised before arrival that repatriation was not very practical and any crew changes should be arranged at ports before or after Khanom.

TIME: GMT plus 7 hours.

GENERAL: Provisions and bonded stores are available, but prices are high. Bonded stores in particular are more than double average prices elsewhere.

Immobilisation of the main engine is not to be recommended, especially during the N.E. Monsoon.

Sheltered anchorage can be obtained in position Lat. 09° 24' N., Long. 99° 53.5' E., in the lee of Ko Samui, and the Pilot advises that on occasions vessels have left the berth with the trimming bulldozer and shore moorings on board and completed trimming in this position, the shore equipment being landed to the tug for return ashore.

The anchorage off the berth is exposed to the N.E. Monsoon and swell.

Shore mooring lines, 3 in total, are available for an extra line aft and also for additional lines if required for bad weather.

In calm weather, a large number of small fishing boats work off the berth, inside the 10 m. line, inspite of this, no attempts to board the vessel were made, and it is reported that thefts from vessels in this area are unknown.

All staff employed were found to be pleasant to deal with, efficient and helpful.

SHIPMASTER'S REPORT: March 1994.

VESSEL: Gross: 4,576 tonnes. Net: 3,072 tonnes. D.w.t.: 8,875 tonnes. Summer draft: 7.62 m. LOA: 114.23 m. Beam: 18.6 m.

CARGO: Loading gypsum in bulk (7,600 tonnes).

CHART: We could not find any large scale chart or detailed illustration.

ANCHORAGE: About 1.6 nautical miles off shore. Depth about 15.0 m. Our anchor position was Lat. 09° 12.6' N., Long. 99° 54.6' E. Depth 14.5 m., mud and sand, holding is good.

DOCUMENTS: Same as other Thailand ports. Only the Agent boarded ship with documents/forms. No other officers come on board.

PILOTAGE: There are two Pilots, they act on behalf of the Port Authority, and communicate with the ship on VHF Channel 16.

The Pilot boarded the ship with two wharfmen. When the ship goes alongside, one will assist Chief Officer and the other will assist the 2nd Officer.

TUGS: One tug and two mooring boats available.

BERTHING: 2 private berths.

Jetty No. 1: Length about 60 m. (Position 09° 12.38' N., 99° 52.875' E. by GPS – Direction 254°). Depth said to be 7.5 m. forward and 7.8 m. aft, but we sounded on board 7.90 m. forward, 8.90 m. middle, and 9.40 m. aft.

There are no shore bollards for mooring. 3 mooring buoys forward and 3 mooring buoys aft are available. The mooring lines' lengths vary (150 m., 270 m., 350 m.). If ship's lines are short, it is possible to rent lines from shore.

Jetty No. 1 has a conveyor with capacity 600 tonnes/hr. and loading is throughout 24 hours.

Jetty No. 2: About the same conditions, but for larger ships (over 10,000 g.r.t.). Jetty length about 30 m. The ship shifts fore and aft many times for loading her cargo.

FRESH WATER: Available from shore.

KRABI: 08.04 N. 98.44 E. **(See Plan)**

DEVELOPMENTS: A deep sea port is to be constructed at Krabi. Construction to be completed between 1991 and 1997. Depth alongside 8.0 m. – 9.0 m.

SHIPMASTER'S REPORT: June 1987.

DOCUMENTS:

6 copies Crew List.
4 copies Crew Personal Effects Lists, including Currency Declaration.
4 copies Bonded Stores List.
4 copies Deck, Engine and Provisions Stores List.
2 copies All electrical items belonging to vessel (T.V., radios, tape recorders, video recorders, refrigerators, etc.).
Certificate of Registry.
Last Port Clearance.
All valid Safety Certificates.

Immigration: On arrival and departure all Crew Members have to sign a Thailand Immigration form in duplicate. All crew members must be in possession of Seaman's Discharge books.

APPROACHES: We used BA. Chart 3941. Berth can be approached from South West between islands of Ko Dok Mai and Ko Kai. Care must be taken of rock 6 ft. high (Him Hmusang), and the dangerous rock (P.D.) 1 mile N.N.W. of Him Hmusang. Coast and islands well defined on radar. It is best to approach in daytime due to the absence of any lights or navigational aids. The only light is East of Phuket (Ko Taphao Noi). The port can also be approached from South, keeping 2 miles to 3 miles East of Ko Kai and setting course 2.5 miles from Ko Ngang. The stockpile of gypsum is clearly visible from a distance of 6 miles. Approach is very picturesque.

PILOTAGE: No pilot available. A Loading Master boards with the Agent at anchorage and advises Master regarding manoeuvring and berthing. At berth vessel uses port anchor with 3 shackles and must have 14 good mooring ropes, minimum length 200 m. each and 70 mm. diameter.

ANCHORAGE: Anchorage when awaiting berthing is about 1.5 miles West of the trestle berth.

MAX. SIZE: Depth alongside at low water is 13.0 m. – 14.0 m.

HEALTH: Pratique granted by boarding party at anchorage. All ship's personnel to have valid Health Certificates.

RADIO/VHF: Bangkok Radio (HSA 4) used for contacting Agents and Charterers. VHF via Phuket Radio. Overseas calls can be made via Phuket Radio. Vessel allowed to use ship's radio station while loading.

TUGS: None available.

BERTHING: Vessel berthed at Leamphong Jetty at Krabi (South Thailand) to load Thailand natural gypsum in bulk.

Vessel manoeuvres to within 25 m. – 30 m. of the finger conveyor loading spout, and first drops port anchor. Then 2 lines each are given to bow and stern buoys, also 2 each to port bow and starboard bow and stern buoys. The vessel then breasts on the starboard lines to bring the starboard side to about 5 m. from the dolphin and spout. An extension conveyor is hung from the ship's crane to convey the gypsum into the hold. The vessel then shifts on mooring lines to bring the other holds under the spout. It is advisable to pre-plan loading so as to avoid unnecessary shiftings.

All mooring lines are to have equal strain and are to be kept tight. The bow and stern lines prevent the vessel from getting too close to the loading spout and dolphin.

Vessel must arrive with full ballast as the height from the waterline to the loading conveyor 12.0 m.

Loading rate is approximately 300-400 tonnes per hour.

The vessel's cranes/derricks must be capable of lifting the extension conveyor (approximately 3 tonnes) and bulldozer (approximately 2 tonnes).

MEDICAL: Medical attention only available in the most severe cases. The medical facilities are in Krabi town.

DENSITY: 1022.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: None available locally.

REPAIRS: No facilities available.

SURVEYORS: None locally, but may be arranged from Bangkok.

CUSTOMS ALLOWANCES: Normal allowances.

REPATRIATION: Possible through Bangkok.

SHORE LEAVE: Allowed. Nearest town is Krabi, distance 30 km., half the journey is on an uneven dirt road. Crew have to climb a vertical steel ladder fixed to one of the trestle supports of the conveyor.

An excellent beach, safe for swimming, lies very close to the moorings.

GENERAL: There is no need for special watchmen as only personnel required for loading board the vessel. There are about 10 persons on board at any time. Other normal precautions to be taken.

Agent: Thaising Shipping Services Co. Ltd., No. 2/17-19, TSS Building, Soi Sukhumvit 24, Phrakanong, Bangkok 10110, Thailand. Tel: 259-0247 (6 lines). Telex: 84436, 20012 (THAISIN TH). Cables: TSSSCO. Fax: (662)-258-5163.

SHIPMASTER'S REPORT: December 1988.

DOCUMENTS: See "Bangkok".

A large party of Customs and Immigration Officials, etc. will board by launch when moored at the berth. Formalities quite straightforward.

PILOTAGE: No licensed Pilot as such, but a local "Berthing Master" may assist in berthing. This is recommended because the vessel has to pass between the mooring buoys, a number of which are below the sea surface. The ship's Master will have to manoeuvre himself. Depths are in excess of 14.0 m. during the approach manoeuvres.

ANCHORAGE: About 1 mile from the berth in position Lat. 08° 04.4' N., Long. 98° 43.7' E. Depth of water 11 fathoms – 15 fathoms. The holding ground is good.

BERTHING: *Berth Position:* Lat. 08° 04.5' N., Long. 98° 44.6' E., about 1.55 nautical miles from Ko Kwang. Name of berth: Leamplong Jetty. Depth at berth: 12 m. minimum at LLWS. The berth consists of 7 mooring buoys.

Mooring Arrangment: Port anchor to be used. The vessel will have to prepare 5 light floating hawsers of 220 m. forward and 6 similar lines aft.

Two launches are used to assist with the mooring operation, which may be quite lengthy, because of the poor condition of some mooring buoys. On our visit 3 of the buoys were half submerged, necessitating the assistance of good swimmers/divers. Therefore, no attempt should be made to moor during a squall or when a strong tidal stream is running, it may reach 2 knots at times. No mooring during night time.

LOADING: *Air Draft:* Strict maximum of 11.0 m., to the top of the hatch coamings.

Loading Facility: The only commodity handled at this port is natural gypsum in bulk. A long flight of conveyor belts terminates on a wooden platform on steel piles. These piles are quite dilapidated and on no account may the ship's side rest against them. The final piece of conveyor belt, about 15 m. long is held aloft by the ship's cranes. Therefore only geared bulk carriers are suitable to load here. Minimum SWL of ship's gear to be 12 tons.

The vessel will have to shift with her mooring lines in order to present each hold in front of the conveyor system. Trimming is done with a small bulldozer.

Loading rate: 350 tonnes per hour (conveyor capacity). The daily loading rate is about 7,000 tonnes, depending on stoppages for shifting the vessel. Regular and careful check of the draft is necessary as there are no weighing facilities ashore.

Working hours: 24 hours per day, Saturday and Sunday included.

Cargo: This natural gypsum has a stowage factor of about 0.82 cu.m./ton and has a water content as it is stowed in the open. Within 24 hours to 48 hours of completion of a hold, the bilges will already be full.

GENERAL:

Facilities/Shore Leave: Small quantities of fresh fish may be purchased locally, but very little else.

All access to and from the vessel is by launch and the starboard gangway.

The small town of Krabi is said to be 35 km. from the Leamplong Jetty, all by dirt road. Access is reportedly difficult during monsoonal rain.

Shore leave is permitted but should be restricted in view of road conditions.

The local agent, charterer's representative and one draft surveyor have to be accommodated on board during the whole stay.

Airport: The nearest airport is on the island resort of Phuket, which is connected by a regular boat service to the small town of Krabi. Phuket has several daily flights to and from Bangkok and several International flights.

Charts: BA. 3941. No large scale chart available.

SHIPMASTER'S REPORT: August 1993.

1. The two submerged dolphins, one on either side of the conveyor, shown on "Plan No. 1", are no longer existing and do not represent any danger to vessel (This information given by Pilot).
2. There are now 2 mooring berths for loading gypsum. The configuration of mooring buoys is same in both cases (See "Plan No. 2").
3. A competent Pilot is stationed at Krabi. He boards all vessels and takes them to the moorings.
4. A total of 10 mooring ropes (not 14) were required (4 forward and 6 aft).
5. All mooring buoys are floating on surface. None were submerged. Two mooring boats assist in mooring.
6. Hawsers are available for hire at U.S.$ 100.00 per hawser throughout the full stay.
7. The breast ropes on port quarter are crucial and should be strong, especially in the months of July, August, September and October, when the Westerly wind tends to blow the stern towards the conveyor. Ships always go starboard side alongside.
8. There are no tugs. Fresh water is not available. Fresh vegetables can be bought at Krabi. Road is now good.
9. Authorities required photocopies of all statutory certificates, including copies of the Certificates of Competency of all deck and engineer officers on board.

SHIPMASTER'S REPORT: January 1996.

LOCATION: The Port of Krabi is located on the Western seaboard of Thailand, in the Andaman Sea in position Lat. 08° 04' N., Long. 98° 44' E.

DOCUMENTS: It is usual to fax or telex Crew List to loading port Agent before arrival.

On arrival, the following documents are required:

6 copies Crew List.
4 copies Crew Personal Effects List, including currency.
4 copies Bonded Stores List.
4 copies Deck, Engine, Provision Stores List.
4 copies Cargo Manifest.
2 copies List of all electrical Items belonging to Vessel.
2 copies Arms and Ammunition List.
2 copies Drugs List.
Last Port Clearance.
Certificate of Registry.
Load Line Certificate.
Cargo Ship Safety Radio Certificate.
Cargo Ship Safety Equipment Certificate.
Cargo Ship Safety Construction Certificate.
Derat Certificate.
Officer's Certificates (Master, Chief Officer, 2nd Officer, 3rd Officer, Radio Officer, Chief/2nd/3rd Engineer).

On arrival at anchorage, the Agent boarded ship first and brings many blank forms for Master to sign and stamp, after which Agent will fill in (Arrival Declaration).

Immigration: On arrival, Agent boarded and issued one blank form to put crew's names on, he then asked all crew to sign in both arrival and departure columns in duplicate.

APPROACHES: As we received orders for Krabi at sea, there were n charts onboard, except B.A. Chart No. 830 (1:1,500,000). We made a chart ourselves according to the Pilot Book. We also referred to B.A Chart No. 830 and every island, islet and rock (latitude and longitude). We entered from South, 3 miles East of Kokai Island (Lat. 07° 40' N. Long. 98° 40' E.) on course 007° – 010° to clear rock (Lat. 08° 00' N. Long. 98° 43' E.). The tide/current set 340° during Springs and 170 during ebb. On the way to the port, many fishing boats with strong lights are encountered, but they give way when whistle was sounded. We proceeded to port during night-time with radar. The target was obvious especially the 3 jetties.

PILOTAGE: There is one Pilot who lives on the jetty. After Customs have boarded and completed paper work, Pilot boarded with Agent and some stevedores to check the mooring ropes and connect the ropes, i not long enough and advise how to moor in future.

ANCHORAGES: Anchorage for awaiting berthing is about 1.0 miles – 1.5 miles West or S.W. of the trestle berth. The depth is more than 20.0 m. and the holding is good, also sheltered from wind (except South).

MAX. SIZE: Reported depth alongside at L.W. is 13.0 m. – 14.0 m., but depth on shore side changes rapidly.

RADIO: Kaosichang (Bangkok) (HSA) used for contacting Agent and Charterers. The Agent's head office at Phuket usually advises the person to board ship after ship arrives.

The Agent's office at Krabi only has 2 persons to represent the Charterer and Shipper. VHF calls via Phuket Radio. Overseas calls can be made via Phuket Radio, but due to distance from Phuket, often disturbed by other ships nearby. Vessel is allowed to use ship's radio station while loading.

TUGS: None available for berthing. There are 2 launches for handling mooring ropes, checking draft, traffic from shore to ship and towing barges loaded with extension conveyor and bulldozer.

BERTHING: Vessel berthed at Chean Vanich Jetty at Krabi to load Thailand Natural Gypsum in bulk. Vessel usually berthed after high water. Stopped ship far off the jetty and approached at a narrow angle at dead slow ahead. First mooring line to port quarter buoy (See "Plan"). When bow is in the line with buoys fore and after, let go port anchor. Next moorings are 2 headlines on port and starboard bow, followed by 2 lines to stern and 2 lines on both port and starboard quarter. All mooring lines are to have equal strain and are to be kept tight.

Loading: Vessel must arrive with full ballast as the height from waterline to loading conveyor is 12.0 m.

The spout is fixed, so vessel shifts with mooring lines to bring the other holds under the spout. It is advisable to pre-plan loading, so as to avoid unnecessary shiftings.

A conveyor extension is hung from the ship's crane to convey the gypsum into the hold. The conveyor extension is about 15.0 m. long and is held aloft by the ship's cranes. Therefore only geared bulk carriers are suitable to load here. Minimum SWL of ship's crane to be 12 tons.

STEVEDORES: 24 hours working per day, Saturdays and Sundays included. The loading rate is approximately 500 tons – 800 tons a day, depending on the funnel and the condition of the belt. This natural gypsum has a stowage factor of about 0.82 cu.m./ton and has a water content as it is stowed in the open.

Trimming is done properly by a small bulldozer.

MEDICAL: There is a small clinic in Krabi. Medical attention only available in the most severe cases.

DENSITY: 1021 – 1022.

FRESH WATER: Not available.

FUEL: Not available.

SURVEYORS: Draft Surveyors arranged by Agent who also undertook the "On/Off Hire" survey.

CUSTOMS: Officers boarded after anchoring to check some cabins and provision stores. They sealed the bonded store. Normal allowances.

REPATRIATION: Possible through Bangkok.

SHORE LEAVE: Allowed. All access to and from the vessel is by launch and starboard gangway. Crew have to climb a vertical steel ladder fixed to one of the trestle supports of the conveyor. The nearest town is Krabi, 35 km. from the jetty. One mini-bus, owned by the Pilot, is available for renting. A single trip costs U.D.$30.0. 5 km. – 6 km. of journey is on an uneven dirt road, the rest is on a good highway.

LAEM CHABANG: 13.05 N. 100.53 E. (See Plan

LOCATION: The Port is located on the Northeastern shore of the Gu of Thailand, approximately 100 km. S.E. of Bangkok.

PORT LIMITS: Sea Buoy at channel entrance.

DOCUMENTS: See "Bangkok".

PILOTAGE: Pilotage is compulsory and will be provided by offic Harbour Department pilots. Procedure for obtaining pilots is the sam as for Bangkok.

Pilots can also be contacted by VHF Channel 13, 14 and 16.

ANCHORAGES: Anchorage can be obtained off Laem Chabang position Lat. 13° 04' 30" N., Long. 100° 50' 30" E., at a distance approximately 2.2 – 3.8 nautical miles from the port in depths of 14.0

If necessary, sheltered anchorage can be found off Si Chang Isla (Koh Si Chang, about 5 – 6 miles N.W. of Laem Chabang Port).

APPROACHES: The available depth in the Approach Channel is 14.0 m. at M.S.L. (approx. 12 m. at L.L.W.).

Directions: All vessels must obtain berth allocation from Laem Chabang Port prior to entering port. Procedure will generally be arranged through ship's Agent. No vessel should enter without berth having been allocated.

Vessels carrying hazardous cargo should obtain special permission from Laem Chabang Port, either through their Agent or directly.

To facilitate landfall, a light (flash 10 secs.) and racon are exhibited from Laem Chabang Hill (Khao Laem Chabang) VTS Station.

Port should be entered from a position off Buoy F. The direction of approach from sea into port entrance is 131°. Vessels pass between Entrance Buoys No. 1 and 2, and then between port and breakwater. The angle between the centre line of entrance and the port basin is 108°.

RESTRICTIONS: Vessels may enter day and night.

MAX. SIZE: 70,000 d.w.t. at the Bulk Terminal. 33,000 d.w.t. at the Container Terminal and 25,000 d.w.t. at the Multi-Purpose Terminal.

HEALTH: See "Bangkok".

RADIO/VHF: Port Radio Laem Chabang Port, Sriracha, Chonburi, Thailand. Call sign "HSC 69" station.

The incoming vessel is to communicate with Port Officers at the distance between 1,000 – 3,000 miles by radio telegraphy.

HF – Power 1,000 Watts.
Port transmits 8,466 kHz.
Port receives 8,363.2 – 8,367.2 kHz.
Open 5 times a day at 0200, 0500, 0800, 1100 and 1400 hrs. UTC (about 30 minutes each time).

Information required from the vessel includes:

(1) Vessel's name and nationality.
(2) Last port of departure.
(3) Next port of destination.
(4) Estimated time of arrival at entrance buoy (Lat. 13° 04.92' N., Long. 100° 51.48' E.).
(5) Draft (Sea water) in feet or metres.
(6) Containers, general cargo to be loaded or discharged.
(7) Dangerous cargo.
(8) Heavy lift requirements.
(9) Fresh water required.
(10) Number of passengers (landing and transit).
(11) Time of dropping anchor at anchorage area (Lat. 13° 04' 18" N., Long. 100° 50' 28" E.).

So as to check the exact time of arrival at Laem Chabang Port, when entering the Gulf of Thailand at the distance between 50 – 1,000 miles, the vessel has to communicate with Port Officers again by radio telegraphy.

MF – Power 1,000 Watts.
Working frequency 480, 454, 443 and 425 kHz.
Calling frequency 500 kHz.
Traffic lists broadcast daily at 0400 hrs. UTC and at the beginning of every hour.

Upon reaching a distance of 10 – 15 miles from Laem Chabang, communication by radio telegraphy is to be changed to radio telegraphy call sign "Laem Chabang Port Control".

VHF – Power 50 Watts.
Calling Channel 16 (156.800 MHz).
Working Channel 12 (156.600 MHz).
Working Channel 13 (156.650 MHz).
Working Channel 17 (156.850 MHz).
Working Channel 67 (156.375 MHz).

The vessel shall then be informed of its mooring place. The system is capable of the following communication operations:

(a) Port operational services.
(b) Continuous watch of distress frequency (Channel 16) and emergency correspondence.
(c) Navigational information service in the combination with radar surveillance facilities.

Berthing: PAT Officers will communicate with the Pilot on board by radio telephony to receive information, so as to make arrangements for berthing facilities such as berths, tugs, mooring boats, etc.

RADAR: A VTS Station, equipped with 'X' and 'S' band radar, is situated on top of Laem Chabang Hill.

TUGS: Tugs of 800 h.p. – 3,200 h.p. are available. Tugs can be contacted on VHF Channel 13.

Tugs will make fast upon Master's request, either inside or outside the breakwater.

BERTHING: There are 4 berths for container vessels (Length 1,200 m. and depth 14.0 m. at MSL); 2 berths for agri-bulk vessels (Length 650 m. and depth 14.0 m. at MSL), and one coastal berth (Length 300 m. and depth 6.5 m. at MSL).

Basin 1: *South Quay:* There are 5 terminals available along the South Quay, and they are numbered from landward to seaward.

Terminal B 1: Multi-purpose Terminal: Length 300 m. Depth alongside MSL 15.0 m. (approx. LLW 13.0 m.). Operated by LCB Container Terminal Co.Ltd. Tel: (+66-38) 491200-1.

Terminal B 2: Container Terminal: Length 300 m. Depth alongside MSL 15.0 m. (approx. LLW 13.0 m.). Operated by: Evergreen Container Terminal (Thailand) Co.Ltd. Tel: (+66-38) 490052, 490060. Fax: (+66-38) 490068-70.

Terminal B 3: Identical to Terminal B 2. Operated by Eastern Sea Laem Chabang Terminal Co.Ltd. (ESCO). Tel: (+66-38) 490084-6. Fax: (+66-38) 490081-2.

Terminal B 4: Identical to Terminal B 2. Operated by TIPS Co.Ltd. Tel: (+66-38) 490111. Fax: (+66-38) 490121-2.

All Terminals have a height of 3 m. above MSL.

Also see "Developments".

North Quay: Along the North Quay, 5 terminals are available:

Terminal A 1: Coastal Terminal: Length 300 m. Height above MSL 3.0 m. Depth alongside MSL 6.5 m. (approx. LLW 4.5 m.). Operated by Laem Chabang Port (See "Terminal B 1"). Length to be increased to 400 m.

Terminal A 4: Bulk Terminal: Jetty structure, water depth MSL 14.0 m. Operated for export of bulk and bagged sugar and for molasses by: Aawthai Warehouse Co.Ltd. Tel: (+66-1) 3532514. Fax: (+66-1) 3532514.

Terminal A 5: Bulk Terminal: Jetty structure to the West of the North Quay (along the Approach Channel), will probably be leased for bulk cargoes. Water depth MSL 14.0 m.

Also see "Developments".

CARGO HANDLING FACILITIES: Each container terminal is equipped with 2 rail mounted quayside container gantry cranes of 40 tons capacity under the spreader, outreach 32 m.

They are also equipped with rubber tyred gantry cranes on the container yard and miscellaneous handling equipment.

The Multi-purpose and Coastal Terminals are equipped with mobile cranes.

Terminal A 4 is equipped with ship loader for bulk sugar.

CRANES: 6 quayside container gantry cranes with capacity 40 tons under spreader.

Mobile Equipment:
1×50.0 ton mobile crane.
1×40.0 ton mobile crane.
2×40.0 ton reach stackers.
15 Forklift trucks from 2 tons – 5 tons.
1×30.5 ton top loader.
1×30.5 ton container shifter.
3×30.5 ton 1 over 3 rubber tyred gantry cranes.
8×41.0 ton 1 over 4 rubber tyred gantry cranes.
Yard tractors, chassis and flat-bed semi-trailers and motor trucks.

MEDICAL: Full public hospital facilities available without prior notice are situated in Sriracha, about 10 km. to the North of the port.

Another modern hospital, which is private, is situated about 10 km. to the South of the port near the famous international seaside resort of Pattaya. Most doctors understand and speak English and other foreign languages.

The nearest is Laem Chabang Polyclinic and Ao Udom Hospital.

TANKERS: No facilities.

FRESH WATER: Fresh water delivered to vessels at wharves by pipeline by a rate of 30 t.p.h. Fitting on pipeline is 2.4 in. Minimum charge of 50 cu.m. Water 25 Baht/cu.m.

FUEL: Fuel can only be supplied by truck. Major oil suppliers can be contacted:

P.T.T. : Petroleum Thai Authority,
5th Floor, Industry Sale Section,
State Enterprise Sale Division,
Lardprao, Bangkok 10900.
Tel: (+66-2) 537-2321-25.
Fax: (+66-2) 537-2323.

Esso : 118/1 Sukhapiban 7,
Sukhapiban Road,
T. Tungsukla,
A. Sriracha,
Chonburi 20230.
Tel: (+66-38) 351-581, 351-195.
Fax: (+66-38) 351-583, Ext. 4736.

Shell : Shell Sriracha Tank Farm,
A. Sriracha,
Chonburi 20230.
Tel: (+66-38) 351-577, 351-302.
Fax: (+66-38) 351-578.

Caltex : 180/8 Moo 7,
T. Tungsukla,
A. Sriracha,
Chonburi 20230.
Tel: (+66-38) 352-333-35.
Fax: (+66-38) 352-335.

B.P. : B.P. Oil Co., Ltd.,
Lubricate Products Department,
Sitthivorakich Building,
11th Floor, 5 Soi Pirat,
Silom Road, Bangluk,
Bangkok 10500.
Tel: (+66-2) 235-5855-8.
Fax: (+66-2) 238-5313.

CONSULS: Embassies and Consuls are situated in Bangkok, about 120 km. (approx. 2 hours by road) from Laem Chabang Port.

REPAIRS: Only minor repairs can presently be executed.

DRY DOCKS: Port Authority of Thailand leased out an area of about 180 acres for the construction of the shipyard project. The floating dock (capacity 40,000 tons, length 283 m. and width 47 m.) became operational in December 1992. A second dry dock with capacity 35,000 d.w.t. is to be installed.

SURVEYORS: Contact Port Authority.

GANGWAY/DECK WATCHMEN: Necessary, theft of wire, paint and tools has occurred.

OPENING/CLOSING HATCHES: Normally by ship's crew.

CUSTOMS ALLOWANCES: See "Bangkok".

AIRPORT: An international airport is situated at U-Tapao, about 50 km. South of Laem Chabang.

Don Muang International Airport (Bangkok) is situated about 150 km. to the North.

TIME: See "Bangkok".

HOLIDAYS: See "Bangkok".

POLICE/AMBULANCE/FIRE: Police Tel: (+66-38) 490555-6; Fire Tel: 210 or 211 (internal call); Ambulance: Call direct to the hospital or use the port ambulance.

TELEPHONES: Telephone on board are available on request. The charge is 300 Baht per day per line.

BANKS: There are many banks in this area, such as:

Thai Commercial Bank: Laem Chabang Branch. Tel: (+66-38) 331219-20.
Thai Farmer Bank: Laem Chabang Branch. Tel: (+66-38) 330920-1.
Bangkok Bank: Ao Udom Branch. Tel: (+66-38) 351148.
Krungthai Bank: Sriracha Branch. Tel: (+66-38) 312001-2.

GARBAGE DISPOSAL: Garbage is collected from vessels by truck or garbage boat at vessel's request. Charges are included in Port Dues. No drums or skips are made available (vessel's plastic garbage bags are generally used).

WASTE OIL DISPOSAL: No waste oil disposal service is presently available, but is expected by Mid-1996.

SEAMAN'S CLUBS: No Seaman's Club available. Shops, postage facilities, telephone services, etc., available at Pattaya, which can be reached by pick-up taxi.

CURRENCY: Thai Baht. U.S.$ 1.00 = 25.00 THB (April 1996).

GENERAL: *Rescue and Distress:* The port tugs are available for rescue and distress missions. The Royal Thai Navy has a radio system, helicopters and ships available at Sattahip Naval Base for rescue and distress.

Rail Links: A railway links the Port (Container, Multi-purpose and Bulk Terminals) via a marshalling yard at Ao Udom and the Sri Racha Railway Station to the network of the State Railway of Thailand (SRT).

Small Craft Facilities: Small craft visiting the Port can generally berth at the Coastal Terminal. Alternatively, they can anchor in Laem Chabang Fishing Port, situated to the North of the Port, just South of Khao Laem Chabang.

No special yacht moorings are available.

Deratting: Deratting services are available. Contact Rentokil at 47/35-36 Moo 9, Sukhumvit Road, Banglamung, Chonburi. Tel: (+66-38) 422686-7. Fax: (+66-38) 426016.

Services: Ship chandlery is available. Contact ship's Agent or Terminal Operator.

Compass adjusting is available. Contact ship's Agent or Terminal Operator.

Tank cleaning services and hull painting services will be available by 1993.

Communication: Laem Chabang Port is connected by road to Bangkok and beyond, to Pattaya, Sattahip, Map Ta Phut and beyond, and to the whole N.E. part of Thailand.

The port is connected by road and will be connected by rail to Laos Pass through the bridge over the Mekong River in Nongkai.

DEVELOPMENTS: Basin 1: *South Quay:* Terminal B 5: New container terminal to be constructed by 1998. It will be operated by STC Capital Holding Co.Ltd.

Ro-Ro Domestic Terminal (A 0): LCP has planned to dig out the end of Basin 1 above, width 250 m., length 55 m., and construct the Ro-Ro Domestic Terminal which is named "A 0" at the end of Basin. To meet this project, it is now tender preparing. The Terminal will be ready in 1998.

Terminal A 2: Length 400 m. of quay wall. Terminal was planned to be the multi-purpose Terminal, and will be operated by a private company.

The concession has the right to construct, manage and operate the Terminal the same as the Terminal in South Quay. The bidding will be announced to give concession to the winner this year.

Terminal A 3: Length 350 m. quay wall. Terminal was planned to be a liquid bulk terminal, and to be the same as Terminal A 2.

Terminal A 4; Under negotiation between LCP and private company to handle coal (import), cement and other break bulk cargo (export). This project will start this year and will be operating in 1998.

Basin 2: LCP has planned to construct the new basin alongside Basin 1 by 1997. The bidding of the engineering consultancy company for study and engineering design is underway.

AUTHORITY: Laem Chabang Port, T. Tungsukla, A. Sriracha, Chonburi, Thailand. *Tel:* (+66-38) 490000/39. *Telex:* 75814 Lcp Th. *FAX:* (+66-38) 490141. *Contact:* Commander Karn Tantivejakul, R.T.N., Port Director.

AGENT: See "Bangkok".

MAP TA PHUT: 12.39 N. 101.09 E. (See Plan)

(A) THAI TANK TERMINAL LTD.
(B) RAYONG REFINERY CO. LTD.
(C) STAR PETROLEUM REFINING CO. LTD. – MARINE TERMINAL
(D) STAR PETROLEUM REFINING CO. LTD. – SPM

(A) THAI TANK TERMINAL LTD.

LOCATION: The Terminal is situated on the Eastern shore of the Gulf of Thailand between Sattahip and Rayong, approximately 180 km. East of Bangkok, in position Lat. 12° 39' N., Long. 101° 09' E.

ANCHORAGE: Lat. 12° 36' N., Long. 101° 10' E.

Depth: 15.0 m. (approx.). Bottom: Sand and mud.

RESTRICTIONS: Berthing and unberthing throughout 24 hours, weather permitting.

MAX. SIZE: 45,000 d.w.t., LOA 200 m. and max. draft 11.9 m.

TUGS: No tugs stationed at the port.

These services have to be arranged by ship's Agent. The number and capacity of tugs depends on vessel's size, draft and weather conditions and requirements of the Pilot(s), Ship's Master or the harbour authorities.

BERTHING FACILITIES: The marine terminal consists of 2 identical liquid cargo berths for import and export of mineral oils, chemicals and liquified gases.

Liquid Cargo Berth No. 1:
Length of Berth: 280 m.
Max. LOA: 160 m.
Water Depth: 12.5 m. (C.D.).
Max. Draft of Ship: 11.9 m.
Platform: Fixed fendering.
Mooring: 4 mooring dolphins and 6 breasting dolphins (See "Plan").
Cargo: Propylene oxide (PO). Butadiene (BD).

Liquid Cargo Berth No. 2:
Length of Berth: 280 m.
Max. LOA: 200 m.
Water Depth: 12.5 m. (C.D.).
Max. Draft of Ship: 11.9 m.
Platform: Fixed fendering.
Mooring: 4 mooring dolphins and 6 breasting dolphins (See "Plan").
Cargo: VCM, Naphtha.

Tidal and Weather Information:
Prevailing Wind: S.W.'ly.
Tidal Variation: H.A.T. +3.50 m.
M.H.H.W. +3.00 m.
M.H.W. +2.80 m.
M.S.L. +2.20 m.
M.L.L.W. +1.40 m.

MOORING: *Safe Mooring and Working Guide:* Thai Tank Terminals Ltd. (TTT) is not responsible for towage operations of vessels. It is compulsory that the services of a Pilot, who is authorised by IEAT to be used each time the vessel has to be moved in the terminal area.

The following precautions are to be taken:

1. The Master is responsible for ensuring that mooring lines are in good condition, and that winches on securing devices are in efficient operational order.
2. Any known defects in the vessel's mooring system or limitations of mooring winch brakes should be reported to the Terminal Manager by the Master, in order that, if necessary, additional precautions may be agreed.
3. The Master shall ensure that the vessel's mooring ropes or wires are secured only to the proper fixtures provided for this purpose.
4. In order to avoid damage to loading arms/hoses, the vessel shall be kept close alongside at all times.
5. Under no circumstances will a mixture of wires and synthetic ropes in the same direction of service and to the same mooring point be acceptable.
6. Where wires are used, they should be of similar breaking strain to that of the rope.
7. Vessel must provide full power or steam on deck to all mooring winches throughout the period alongside the jetty.
8. Once moored, vessel's winches must be secured with the brakes hardened up. Winches must not be left on automatic tension.
9. Back springs should be as long as possible, and it is recommended that wires are used and secured to the mooring points on the jetty head/breasting dolphin.
10. Mooring lines must be adjusted under the supervision of a responsible officer.
11. A strict watch must be maintained on the vessel's moorings at all states of tide to ensure that all lines are properly tensioned and tended, to prevent undue movement of the vessel.
12. The Master should endeavour to ensure compliance with the mooring layout.
13. The Terminal will require cargo operations to be stopped and/or tugs summoned if the vessel's movement will endanger loading arms hoses or in the absence of an alert efficient deck watch. *All delays charges* caused by the ship's failure to observe the above precautions will be for the ship's account.
14. In normal conditions, berthing/unberthing is permitted throughout 24 hours.

CARGO OPERATIONS:

Inspection of Vessels prior to Commencement of Loading/Unloading
Prior to commencement of loading or unloading operations, it shall be the duty of the Master or Chief Officer with the appropriate TTT Representative to carry out inspections to ensure that all safety regulations are being observed.

Closing of Sea Valve connected with Cargo System: Prior t commencement of loading or unloading operations, all sea suctions an discharge valves connected to the cargo system shall be securely sh and lashed, and stern discharge and other lines not in use, shall b blanked-off.

Immediately after loading or unloading has commenced, a responsib ship's officer shall make an overside inspection in the vicinity of all se valves, to ensure that there are no leaks.

A similar periodical inspection throughout the loading or unloadin operations is required.

Closing of Doors, Portholes and Ventilators during Operations: Wh any cargo is being handled or during the ballasting, gas-freeing or ta cleaning, after the unloading of such cargo, all doors and portholes the afterhouse facing on to the cargo tank deck, and the doors leadi to the centrecastle from the accommodation shall be kept secur closed. All afterhouse ventilators shall be turned to face aft during the operations.

Loading and Unloading: Supervision and control throughout the pe of loading or unloading operations shall be exercised as follows:

1. A responsible ship's officer, who is thoroughly familiar with t arrangements of the cargo lines, valves, pumps and cargo ven system of the vessel, shall be on duty, and an adequate numbe crew shall remain on board to deal with any emergencies.

2. A responsible member of the ship's personnel shall be stationed near the vessel's main cargo control valve.
3. Prior to commencement of operations, the responsible ship's officer shall confirm with the appropriate TTT Representative, that the stand-by, cease loading and other necessary signals, are properly understood and agreed.
4. During loading or unloading of cargo and when ballasting, all tank lids must remain closed. Ullage pipes and sighting ports may be opened for sampling and ullaging, but must be closed when sampling or ullaging is not being carried out.

Agreement of Loading or Unloading Rates and Pressures: Prior to commencement of operations, the maximum loading or unloading rate and pressure shall be agreed between the Master and the appropriate TTT Representative in charge of operations, bearing in mind the grade of the products to be loaded or unloaded and the size and capacity of the vessel's cargo lines, gas venting system and vessel's pumps and the appropriate loading or unloading plan agreed in writing.

Reduction of Loading or Unloading Rates:

1. Topping-off: When cargo tanks are being topped-off, loading rates should be reduced by means of the shore pumps or control valves on shore on request by the ship's officer to the appropriate TTT Representative. Under no circumstances shall any vessel attempt to reduce the rate of loading from shore by closing any vessel's valves. In particular, care should be taken to ensure that during changeover from tank to tank, the valves to the empty tank are opened well before those on the tank being finished are shut down.
2. Line Clearing: Should any air or water be present in the line, pumping speed should be regulated to eliminate the danger from static electricity until the air or water has been displaced.

Pressure Surge Precautions: Non-routine closing of the loading system's automatic intervention or "fail safe" closure of shipboard Emergency Shut Down (E.S.D.) valves can generate dangerous surge pressure. The Master may be asked to operate the system to enable timing of the valves to be checked, and may be requested to have valves adjusted according to the provisions of the IMO codes for vessels carrying Liquified Gases in Bulk.

TTT reserves the right to adjust loading rate if valve closing times are not compatible with the rates otherwise agreed.

Liquid Manifold: 2×8 in. hoses ANSI 150.

Please prepare manifold on the vessel's starboard side and reducer required from vessel in case of different manifold sizing.

Initial Discharge Rate: 700 cu.m./hr.

Max. Discharge Rate: 2,000 cu.m./hr.

BALLAST: *Ballasting:* As long as the vessel is moored at the berth, only segregated ballast tanks may be used. If it is necessary to ballast into the cargo tanks to maintain agreed manifold air drafts, permission will be granted by the Terminal Manager provided that:

(1) Cargo operations are suspended.
(2) Integrity between cargo and ballast is guaranteed by using a minimum 2 valves isolation.
(3) On commencement to ballast, pumps are to be started, and a vacuum shown on the pressure gauge before opening the sea valve.

Deballasting: Deballasting is not allowed in the harbour.

GENERAL:

Prohibition of Pollution:

(1) Pollution of the Terminal area by vessel effluent, condenser and waste water is prohibited.
(2) Soot emissions and any excessive exhaust emissions from the funnel or exhaust lines are to be avoided.
(3) Suitable measures are to be taken to avoid polluting the Terminal and personnel in the vicinity when water, vessel effluent and vapours are discharged.

Tank Cleaning:

(1) No tank cleaning or gas-freeing is permitted alongside, unless written permission has been obtained from the Terminal Manager.
(2) No vessel which has windsails in her tanks is permitted at berth alongside, unless such tanks are gas-free.
(3) No vessel is permitted to berth alongside when tanks are not gas-free, unless all tank openings are closed.

Product Spillage and Leakage:

(1) Prior to any handling of cargo or bunkers, all scupper holes shall be plugged and cemented in such manner as will make them leak-proof.
(2) All pipes, valves, connections and fittings, etc., used for handling cargo, shall be kept free from leakage.
(3) When loading or unloading has been completed, the flexible hose or hoses shall be drained and disconnected. Drip trays must always be used when pipeline connections are broken.
(4) If a product spillage occurs, the product shall be disposed of by a method agreed by the TTT Representative. Under no circumstances shall product be washed or swept overboard.
(5) All product spillage, whether on to the deck of the vessel or into the sea, must be reported immediately to the Jetty Operator, who will contact the necessary department concerned. Every possible action must be taken by the vessel and the Terminal to stop spillage, reduce spreading and recover the product.

Bunkering and Storing: No bunkering facilities are provided on the Terminal. Bunkering, storing and victualling of vessels may be permitted during operations, but only with permission of both the Terminal Manager and the Master of the vessel, provided that:

(1) Access to the Terminal is not obstructed.
(2) Cargo operations remain adequately supervised.
(3) Cargo operations which may allow vapours to escape on deck, e.g. sampling, ullaging, deflexing, etc., are suspended.
(4) Drums of oil, paint, steel plates, gas cylinders or any other heavy metal parts, which may cause a spark, should be landed on rubber or other suitable matting and not directly onto vessel's deck. These items must not be dragged or rolled along the deck.
(5) If an oil spillage occurs, the oil shall be disposed of either by mopping-up or by a method agreed by TTT Representative. Drip trays must always be used when pipeline connections are broken. Under no circumstances shall oil be washed overboard.
(6) The appropriate document indemnifying TTT against all accidents has been signed.
(7) The designated point for setting down of vessel's stores is at the discretion of the terminal personnel.
(8) If the above criteria are not met, TTT reserves the right to refuse permission.

Supply Vessel's Alongside: No supply vessels are allowed alongside.

Bathing: Bathing will not be permitted from the platform and approaches, or from the vessel whilst alongside.

Communications: Once a vessel has berthed, Terminal Supervisor will place a portable radio aboard the vessel to be used by the vessel for contacting the Terminal during operations. The radio will be set for direct contact with the Jetty Operator and Terminal Supervisor.

Safety Check List: The Master must complete and return to the Terminal Supervisor a Safety Check List certifying that all statutory conditions have been complied with, all necessary loading valves onboard are properly set, and the agreed Loading/Unloading Signals are understood. A copy of the Safety Check List, signed by both vessel and Terminal Representative, is to be retained on the vessel.

Thunderstorms/Suspension of Operations: During severe thunderstorms, or other climatic conditions, which may be hazardous to the safety of the operations, the loading or unloading of any cargo may be suspended by the responsible ship's officer and/or the appropriate TTT Representative.

All valves and tank openings should be closed, and where required, hoses or arms disconnected.

Repair Work and Maintenance: No boiler cleaning, chipping, scaling and scraping of steelwork, or work likely to cause sparks, shall be undertaken on any vessel (and no iron or steel hammers or other instruments, capable of causing sparks, shall be used for the purpose of opening or closing hatches), unless prior written permission of the Terminal Manager has been obtained.

Clearance of the Vessel: Owing to the highly flammable nature of the products handled at the Terminal, and in order to comply with the Petroleum Regulations, it is necessary to exercise strict control of access to the area.

Unauthorised persons are not allowed to enter a vessel berthed alongside the Terminal until it has been cleared by Agents and the Authorities.

TTT personnel and Representatives shall have access to the vessel for the performance of their duties. The Master will give them all the necessary information with regard to operations and shall allow them to inspect all safety equipment and handling facilities. Back-up support by the vessel's crew is to be assured.

Controlled Access to the Terminal: Persons with valid works passes are allowed to enter the Terminal to proceed to the jetty. Persons having lawful business with vessels, tradesmen and suppliers will be issued with a day pass by the Security Officer.

Crew members of a vessel are not allowed to enter the Terminal without permission, as mentioned in "Marine Terminal Pass Form".

The entry of women to the Terminal is restricted to female members of a vessel's crew or the wives of crew members.

The co-operation of the Masters and Shipping Agents is requested in the interest of safety.

There shall be prepared a gangway of approved pattern as means of access to a vessel. It shall be properly secured and tended. A notice board shall be displayed in a prominent area near the access to the vessel indicating "No admittance except on business" and "No smoking allowed".

Immobilisation of Engines:

(1) The main engine shall always be kept ready for immediate use. Urgent repairs may only be undertaken with written approval from the Terminal Manager.
(2) Repairs which restrict the manoeuvrability of the vessel may only be carried out and on the condition that the Master hires sufficient stand-by tugs to move the vessel, if so required. All consequential costs resulting from repair work carried out on the vessel while it is moored at the Terminal shall be borne by the vessel.
(3) Should the repair works represent a risk for the Terminal, or should the conditions of the approval be contravened, the Terminal Manager may require that the vessel be removed at the Owner's costs.

Anchors: Every vessel shall have anchors ready for immediate use.

Emergency Towing Wires: Any vessel, whilst alongside the Terminal, shall provide emergency towing wires of sufficient length to reach the water's edge with about 20 m. flaked on deck with an eye on the outboard end and inboard end made fast to the vessel's bitts on the offshore bow and quarter.

Number of Crew: The Master shall at all times retain sufficient crew on board to operate the vessel.

Gangway: Vessel's gangway required (Jetty platform: +7.5 m. (C.D.)).

SHIPMASTER'S REPORT: July 1994.

Vessel: 38,600 d.w.t. LOA 182 m. Max. draft 10.97 m. Arrival draft 10.0 m.

Cargo: 29,700 tonnes of Naphtha.

Port of Map Ta Phut (Rayong), Thailand.

The commercial port of Map Ta Phut was opened in 1992 and is developing strongly. Vessel berthed at Thai Tank Terminal Ltd. (TTT) Berth No. 2, and was the first ship to discharge naphtha at the pier, therefore the discharging was slow, 1,500 cu.m./hr. (maximum) through 2×8 in. hoses. The storage tank for naphtha is 56,000 cu.m. The berth has been completed, but the Chicksan arms have not been installed yet, also the shore gangway was missing. This is also the case on Berth (TTT) No. 1. Maximum draft at Berth No. 1 and No. 2 is 11.90 m.

Thai Tank Terminal only stores chemicals and petroleum products, and distribution of the products to the chemical industry in the area is by means of a 16 in. pipeline (about 5 km. long).

Pier No. 2 is to be fully equipped before the end of the year. Thai Tank Terminal facilities are inside the port, sheltered by manmade breakwater and fairly well protected from swell.

Berthing is possible throughout 24 hours, but the weather might delay Pilot to working during daylight hours only. Also the buoys and leading lights are unreliable, according to the Berthing Pilot.

The Terminal Manager of the Thai Tanker Terminal Ltd. said that this matter is underway and Thai Tanker Terminal has good co-operation with the Port Authorities. The buoys and leading lights are to be upgraded.

On the West side of the port, there is a long pier and at its end is a chemical berth. This is specially venerable to the weather. Frequent delays will occur at this pier, due to difficulties of berthing during bad weather.

The port is developing fast, also towards the East of Thai Tank Terminal. Building of new berths is underway for Shell and Caltex. These berths are mainly to serve the refinery, being built by Shell/Caltex. These piers are for loading petroleum products. The refinery is going to be supplied by a SPM Buoy 23 nautical miles offshore and is going to be able to receive VLCC's. The Thai Tank Terminal Ltd. is hoping to get the management of the SPM operations. The Manager said that if the demand for tank storage is fulfilled, they are going to need 3 times the land they have. TTT has the first option on the area between their facilities and the West pier for chemicals. This mentioned land is now sea and has to be filled-in.

The roads from Map Ta Phut to Bangkok are good, but towards the East, improvement of the roads is still going on. Pattaya is about 45 minutes drive from Map Ta Phut.

OPERATOR: Thai Tank Terminal Ltd., Liquid Cargo Terminal, Map Ta Phut Industrial Port, P.O.Box 21, Map Ta Phut, Rayong 21150, Thailand. *Tel:* (038) 683172. *FAX:* (038) 683173. *Contact:* Mr. Jirachai Naiwattanakul, Operations Manager. Captain Piet v.d. Staal, Terminal Manager.

(B) RAYONG REFINERY CO. LTD.

LOCATION: Map Ta Phut port is an industrial harbour owned and managed by the Industrial Estate Authority of Thailand (IEAT). The harbour is located between the cities of Sattahip and Rayong at Thailand's Eastern seaboard, some 170 km. South of the capital Bangkok.

The 3 jetties of Rayong Refinery Co.Ltd. (RRC) are located on the S.E. side of Map Ta Phut port in close vicinity of the port entrance.

The port area is shown on Royal Thai Navy (RTN) Chart No. 157, the approaches on RTN Chart No. 141 and on British Admiralty Chart No. 3966 respectively.

The distance from the Fairway Buoy to the harbour's Western breakwater is 2 nautical miles. The minimum width of the approach channel is 250 m. and the water depth is 12.5 m. reduced to Lowest Low Water (LLW).

DOCUMENTS: The following documents are required:
10 copies Crew List.
6 copies Stores and Provision List (Steward/deck/engine department).
6 copies Arms and Ammunition List.
6 copies Narcotics List.
6 copies Ports of Call List.
6 copies Foreign Currency List.
6 copies Passenger List.
6 copies Crew's Personal Effects List.
6 copies Ship's Domestic Movable Properties List.
(The last 2 lists to declare brands and serial numbers of watches, cameras, radios, TV's, calculators, refrigerators, all electrical and sound equipment).

PILOTAGE: Government Pilotage is compulsory for all vessels. Pilot exemption for regular local traders has been introduced. The Pilots also serve as Docking Masters, berthing the vessel with the assistance of tugs.

The Pilot embarks approximately 1 nautical mile South of the Fairway Buoy in position Lat. 12° 36.0' N., Long. 101° 10.0' E.

RESTRICTIONS: The water depth of the approach channel is 12.5 m. reduced to Lowest Low Water (LLT).

The water depth in the harbour approach is 12.5 m., 11.5 m. and 8.0 m. for Jetties No 1, 2, and 3 respectively.

The minimum under-keel clearance required by the Pilot Office is 0.5 m.

RRC's requirements for under-keel clearances vary between 1.0 m. for vessels up to 6,000 tonnes d.w.t. and 1.5 m. for vessels above that size.

MAX. SIZE: The Harbour Department stipulates the following maximum sizes for vessels entering the port: LOA 260 m. and beam 46 m.

Also see "Berthing".

HEALTH: No advanced Radio Pratique is permitted.

RADIO/VHF: *ETA:* The estimated time of arrival (ETA) of ships has to be given 72 hours, 48 hours and 24 hours prior to arrival to the ship's Agent via cable, fax or telex.

Two hours before the Pilot embarks or when in VHF range, the ETA has to be confirmed verbally to the pilot station together with the maximum draft.

Communication/Pilot Boarding Area: The Map Ta Phut Pilot Office can be contacted on VHF Channel 16. Once contact is established, the vessel is requested to stand-by on VHF Channel 14.

Channel 13 is used for communication between vessels, tugs, Harbour Master and mooring boats for berthing and unberthing.

Channel 12 is used for vessels, tugs, loading personnel and mooring boats.

TUGS: Tug usage is compulsory in the port for both berthing and unberthing as follows:
(a) Vessels below LOA 290 ft. are exempted.
(b) Vessels with LOA over 290 ft. require one tug.
(c) Vessels over 492 ft. require 2 tugs.
(d) Vessels over 700 ft. require 3 tugs.
Tug lines are used for towing.

The tug and its crew are regarded as employed by the ship being towed. All damage and costs to the tug arising during the assistance, and for which the tug could be made responsible, must be compensated for by the ship in question.

Mooring: Mooring gangs and mooring boats are provided by RRC. All vessels berth with portside alongside, i.e. heading South towards the port entrance.

The costs are charged back to the ship at a fixed rate, which is periodically adjusted to reflect the actual costs involved.

Mooring Requirements:
Up to 6,000 d.w.t.: 4 breast lines and 2 springs, fore and aft.
Over 6,000 d.w.t.: 6 breast lines and 2 springs, fore and aft.

BERTHING: Mooring, unmooring and cargo operations are carried out on a 24 hour basis.

Jetty No. 1:
Water Depth in Berth : 13.0 m. reduced to LLW.
Water Depth in Approach : 12.5 m.
Maximum Draft : 11.5 m.
Maximum LOA : 260.0 m.
Minimum LOA : 75.0 m.
Maximum Berthing Displacement : 87,000 tonnes.
Maximum Approach Velocity : 0.16 m./sec. (0.31 knots).
Maximum Approach Angle : 10°.
Shore Gangway
Shore Crane (1.5 tonnes at 15 m.).

Jetty No. 2:
Water Depth in Berth : 13.0 m. reduced to LLW.
Water Depth in Approach : 11.5 m.
Maximum Draft : 10.5 m.
Maximum LOA : 170.0 m.
Minimum LOA : 75.0 m.
Maximum Berthing Displacement : 49,520 tonnes.
Maximum Approach Velocity : 0.18 m./sec. (0.35 knots).
Maximum Approach Angle : 10°.
Shore Gangway
Shore Crane (1.5 tonnes at 15 m.).

Jetty No. 3:
Water Depth in Berth : 8.0 m. reduced to LLW.
Water Depth in Approach : 8.0 m. reduced to LLW.
Maximum Draft : 7.5 m.
Maximum LOA : 110.0 m.
Minimum LOA : 60.0 m.
Maximum Berthing Displacement : 7,968 tonnes.
Maximum Approach Velocity : 0.25 m./sec. (0.49 knots).
Maximum Approach Angle : 10°.
Shore Gangway (Stair Type)
Shore Crane (1.5 tonnes at 15 m.).

LOADING/UNLOADING: *Loading and Discharging:* Prior to operations a Ship/Shore Safety Check List, and a written Cargo Plan in accordance or similar with Annex VI of the Jetty Safety Regulations (Not reproduced) are to be completed.

Maximum Shore Receiving (Import) Capacities (cu.m./hr.):

Grade	*Berth No. 1*	*Berth No. 2*	*Berth No. 3*
Crude	2×3,000 (16 in. dia.)	2×2,000 (12 in. dia.)	Nil
F.O.	2×3,000 (16 in. dia.)	2×2,000 (12 in. dia.)	Nil
MTBE	1×2,000 (8 in. dia.)	1×200 (8 in. dia.)	1×200 (8 in. dia.)
Condensate	Nil	2×2,000 (12 in. dia.)	Nil

Maximum Shore Loading (Export) Capacities (cu.m./hr.):

Product	*Berth No. 1*	*Berth No. 2*	*Berth No. 3*
ADO	3×700 (8 in. dia.)	3×700 (8 in. dia.)	3×700 (8 in. dia.)
Chem. Feedstock (Tops/Naphtha)	Nil	Nil	3×700 (8 in. dia. (Back-up)
F.O C&D	2×3,000 (16 in. dia.)	2×2,000 (12 in. dia.)	1×700 (8 in. dia.)
Jet A-1	1×700 (8 in. dia.)	1×700 (8 in. dia.)	
LPG *	Nil	Nil	1×150 (6 in. dia.)
ULG-92	3×700 (8 in. dia.)	3×700 (8 in. dia.)	3×700 (8 in. dia.)
ULG-97	3×700 (8 in. dia.)	3×700 (8 in. dia.)	3×700 (8 in. dia.)

* LPG Safety Area around Jetty No. 3 is 135 m. (No vessel allowed a Jetty No. 2 during loading of LPG at Jetty No. 3).

Flanges/Loading Arms/Couplings: All 3 jetties are fitted with 5 rig loading arms for the handling of crude oil and products as follows:
Jetty No. 1: 2×16 in. for crude oil plus 3×8 in. for products.
Jetty No. 2: 2×12 in. back-up crude plus 3×8 in. for products.
Jetty No. 3: 4×8 in. for products plus 1×6 in. for LPG.

All loading arm flanges, with the exception of the LPG loading ar are of ANSI 150 LB standard and the couplings to be bolted manual The LPG loading arm is fitted with hydraulic quick connect/disconne coupling and an Emergency Shut Down System (ESDS).

Deballasting, Slops and Sludge Reception: Ballast reception is genera restricted to 300 cu.m. per vessel, one vessel at a time, due to the syste layout. Quantity variations may be possible, but each case will be grante individually.

Slops are only acceptable provided they are chemica uncontaminated. This has to be confirmed in writing by the vesse Master. Acceptable volumes will be decided on a case by case bas Samples will be required if slop reception is agreed.

MEDICAL: Hospitalisation, doctors and dentists are available on reque via the Agent.

FRESH WATER: Ordered via the Agent in advance and will be delive by barge.

No barges or boats are allowed alongside vessels moored at RR jetties, consequently larger quantities have to be loaded at anchorage.

FUEL: Bunkers have to be ordered through the Agent, delivery by bun barge.

REPAIRS: In general, repair work is not permitted while alongside any jetty. For exclusions see Jetty Safety Regulations.

Under no circumstances will an immobilisation of the main engine be permitted.

REPATRIATION: Available via Bangkok International Airport, some 170 km. by road.

SHORE LEAVE: Shore leave is permitted. Foreigners need a passport while ashore. Due to the unavailability of public transport and the distance to the next city (i.e. Rayong 20 km.), transport to be arranged via the Agent.

GENERAL: *Wind/Tide:* The non-harmonic maximum tidal range in the area is between 0.3 m. and 3.5 m. above Chart Datum. The specific gravity of the sea water in port is 1.025. There is no current in the port apart from the normal flood and ebb current caused by the water flowing into and out of the port respectively.

Outside the port, the main direction of the current runs more or less parallel to the shore line in Westerly directions during floor tide, and in Easterly direction during ebb tide. The average current is 0.2 knots – 0.3 knots, the maximum never exceeds 0.7 knots.

Winds are influenced by North East and South West Monsoon periods respectively, but quite often vary from their predominant directions. Velocities are typically less than 10 knots, but seldom greater than 20 knots, though brief peak gusts of up to 60 knots associated with thunderstorm and torrential rain are occasionally experienced around the month of November.

Wave heights are mainly below 1 m. and hardly ever exceed 2.5 m.

Port State Control: Map Ta Phut port is open to ships in national and foreign going trade. Thailand is a signatory to the memorandum for Port State Control, so governmental inspections can be carried out.

Inspections: Alongside RRC installations, inspections of vessels are carried out before and during cargo operations by the RRC Loading Master and/or the Marine Department in accordance with RRC Jetty Safety Regulations, which are handed out to every vessel calling at their facilities, and the Ship/Shore Safety Check List.

BRC's Jetty Safety Regulations are in accordance with the "International Safety Guide for Oil Tankers and Terminals" (ISGOTT).

Safety rules in case of chemicals and liquified gas are based on "Tanker Safety Guide (Chemicals)" and "Tanker Safety Guide (Liquified Gases)" respectively, published by the "International Chamber of Shipping" (ICS).

Provisions and Stores: Provisions and stores of good quality available on 48 hours notice via the Agent. Deck/engine room spares are usually available in reasonable quantities, but selection is very limited.

Transport: No public transport is available.

OPERATOR: Rayong Refinery Co.Ltd., No. 8, 1-8 Road, Map Ta Phut Industrial Estate, (P.O.Box 34) Map Ta Phut, Rayong 21150, Thailand. *Tel:* (038) 684290. *FAX:* (038) 684294. *Contact:* Captain Jochen Austel, Head of Marine (Tel: (038) 683759. Fax: (038) 683746).

(C) STAR PETROLEUM REFINING CO. LTD. – MARINE TERMINAL

LOCATION: The Star Petroleum Refining Co. Ltd. Marine Terminal is situated in the Map Ta Phut Industrial Port, in position Lat. 12° 40' N., Long. 101° 09' E., and consists of 2 concrete piers. Product vessels are handled at all berths on the Southern pier, the Northern pier is however dedicated to LPG.

A vessel will only be accepted at a berth providing it is compatible with all aspects of the berth design. Special attention is paid to a vessel's manifold arrangements which must be of a fixed and permanent design (including pipelines, valves and supports, etc.), and form part of the vessel's structure. All vessels shall have manifold arrangements which comply with the standards recommended by the OCIMF – Standards for Tanker Manifolds and Associated Equipment.

PILOTAGE: Compulsory for non-exempt vessels. Pilots normally board at the approach channel entrance.

RESTRICTIONS: Berthing and unberthing possible day and night.

MAX. SIZE: *Overall Length Restrictions:* The design basis for the Products Pier is to accommodate vessels up to 12,000 d.w.t. The exceptions to this rule are as follows:

Berth No. 1 can only safely accommodate tankers up to 70 m. in length (1,000 d.w.t. approx.) due to the disposition of the mooring equipment.

Berth No. 3 has been designed to accommodate larger vessels up to 90,000 d.w.t., and when oocupied may overhang Berths No. 1 and 4, and so prevent their use.

The LPG Berth has a dredged operating basin which limits vessel's maximum overall length to LPG South 80.0 m. and LPG North 95.0 m., assuming that the loading manifold is positioned amidships.

Max. Draft: Generally, the maximum drafts for vessels arriving or departing from Map Ta Phut Marine Terminal are as follows:

Berth No. 1	12.0 m.
Berth No. 2	8.5 m.
Berth No. 3	12.0 m.
Berth No. 4	12.0 m.
Berth No. 5	8.5 m.
LPG South	5.5 m.
LPG North	7.5 m.

An under-keel clearance safety margin of 1.0 m. has been allowed. Deeper drafts may be accepted on occasions, depending on the predicted height of tide and must always be agreed with the Area Operating Manager.

TUGS: 3×3,600 h.p. and 2×3,200 h.p.

VHF: Port on Channels 16, 13 and 14. Terminal on Channels 19 and 67.

BERTHING:

Berth No. 1:

Grades available for Export:	Export, Premium and Regular Mogas, Reformate High Speed Diesel, Fuel Oil No. 1 and No. 4.
Import:	Sweet Naphtha. Heavy Gas Oil.
Ballast Facilities:	Available.
Vessel Size:	Governed by the Loading Arm Operating Envelope as well as LOA and draft.
All Loading Arm Operating Envelopes:	Maximum height 17.8 m. above MHHW. Minimum height 0.96 m. above MLLW.
Loading Arm Size:	8 in. with QCDC.
Maximum LOA:	85.0 m.
Maximum Draft:	12.0 m.

Berth No. 2:

Grades available for Export:	Export, Premium and Regular Mogas, Reformate High Speed Diesel, Fuel Oil No. 1 and No. 4.
Import:	Sweet Naphtha. Heavy Gas Oil. Condensate.
Ballast Facilities:	Available.
Vessel Size:	Governed by the Loading Arm Operating Envelope as well as LOA and draft.
All Loading Arm Operating Envelopes:	Maximum height 17.8 m. above MHHW. Minimum height 0.96 m. above MLLW.
Loading Arm Size:	8 in. with QCDC.
Maximum LOA:	180.0 m.
Maximum Draft:	8.5 m.

Berth No. 3:

Grades available for Export:	Export, Premium and Regular Mogas, High Speed Diesel, Fuel Oil No. 1 and No. 4.
Import:	Sweet Naphtha, Crude Oil, Heavy Gas Oil.
Ballast Facilities:	Available.
Vessel Size:	Governed by the Loading Arm Operating Envelope as well as LOA, beam and draft.
Mogas, Naphtha Loading Arm Operating Envelopes:	Maximum height 17.8 m. above MHHW. Minimum height 0.96 m. above MLLW.
Loading Arm Size:	8 in. with QCDC.
Crude Oil, Heavy Gas Oil Loading Arm Operating Envelopes:	Maximum height 19.8 m. above MHHW. Minimum height 6.77 m. above MLLW.
Loading Arm Size:	12 in. with QCDC.
Fuel Oil Loading Arm Operating Envelopes:	Maximum height 19.8 m. above MHHW. Minimum height 0.96 m. above MLLW.
Loading Arm Size:	8 in. with QCDC.
Maximum LOA:	260.0 m.
Maximum Beam:	45.0 m.
Maximum Draft:	12.0 m.

Berth No. 4:

Grades available for Export:	Export, Premium and Regular Mogas, Reformate High Speed Diesel.
Import:	Sweet Naphtha, MTBE.
Ballast Facilities:	Available through 6 in. flexible hose only.
Vessel Size:	Governed by the Loading Arm Operating Envelope as well as LOA and draft.
All Loading Arm Operating Envelopes:	Maximum height 17.8 m. above MHHW. Minimum height 0.96 m. above MLLW.
Loading Arm Size:	8 in. with QCDC.
Maximum LOA:	150.0 m.
Maximum Draft:	12.0 m.

No fuel oil bunkers available at this berth.

Berth No. 5:

Grades available for Export:	Export, Premium and Regular Mogas, Reformate High Speed Diesel.
Import:	Sweet Naphtha. MTBE.
Ballast Facilities:	Available through 6 in. flexible hose only.
Vessel Size:	Governed by the Loading Arm Operating Envelope as well as LOA and draft.
All Loading Arm Operating Envelopes:	Maximum height 17.8 m. above MHHW. Minimum height 0.96 m. above MLLW.
Loading Arm Size:	8 in. with QCDC.
Maximum LOA:	135.0 m.
Maximum Draft:	8.50 m.

No fuel oil bunkers available at this berth.

Tug Berth: Loading of High Speed Diesel for tugs.

LPG – South Side:

Grades available for Export:	LPG.
Vessel Size:	Governed by the Loading Arm Operating Envelope as well as LOA and draft.
Loading Arm Operating Envelopes:	Maximum height 12.4 m. above MHHW. Minimum height 2.18 m. above MLLW.
Loading Arm Size:	6 in. with QCDC.
Maximum LOA:	110.0 m.
Minimum LOA:	50.0 m.
Draft:	5.50 m.

No bunkers available. Fully pressurised LPG vessels only.

LPG – North Side:

Grades available for Export/Import:	LPG
Vessel Size:	Governed by the Loading Arm Operating Envelope as well as LOA and draft.
Loading Arm Operating Envelopes:	Maximum height 12.4 m. above MHHW. Minimum height 2.18 m. above MLLW.
Loading Arm Size:	6 in. with QCDC.
Maximum LOA:	125.0 m.
Minimum LOA:	50.0 m.
Draft:	7.50 m.

No bunkers available. Fully pressurised LPG vessels only.

Loading Rates:

Loading Rate through 8 in. arm is 650 cu.m./hr.
Loading Rate through 12 in. arm is 2,495 cu.m./hr.
Loading Rate for LPG through 6 in. arm is 240 cu.m./hr.

MOORING:

1. No unauthorised personnel are allowed on the berth during the mooring or unmooring of any vessel.
2. It is prohibited to moor a vessel at the Terminal without the permission of the Manager.
3. Under adverse weather conditions, the Port Authority, Supervisor or Master of a vessel may order the cancellation of a scheduled berthing at any stage of the operation.
4. The Master shall ensure that the vessel is secured alongside with suitable ropes or wires which are to the satisfaction of the Supervisor. Mooring lines of the same material shall be used for all head and stern and breast lines.
5. A maximum of 2 lines to be secured to any one mooring bollard on the jetty. Self-tensioning winches must not be used in automatic mode and winch brakes must be kept hardened up except when moorings are being tended.
6. A strict watch is to be kept on moorings and they are to be tended to prevent undue movement of the vessel. Should the Supervisor consider the moorings to be inadequately tended, operations will be suspended until moorings are adjusted to his satisfaction.
7. Adequate size towing wires for the size of a vessel are to be provided, rigged and secured to the offshore bow and quarter with the towing eyes maintained just above the water level. Sufficient slack wire should be maintained on deck for an emergency pull away by tugs.

Moorings: Vessel moorings are used and a minimum of 5 suitable lines must be provided at each end.

Arrival Information Exchange: Prior to, or on arrival at the Terminal, the Master shall discuss with the Company:

1. Origin and quantity of ballast and whether it is to be retained, discharged overboard or discharged ashore.
2. Quality issues, with regard to any hazardous characteristics of the petroleum on board or previous petroleum cargo carried.
3. Quantity, nature and order in which the petroleum will be loaded or discharged.
4. Maximum ship and shore loading and discharge rates.
5. Location of manifold relative to the bow, side, height above deck and distance between connections.
6. Number, size and material of liquid and vapour manifold connections to be utilised.
7. Defects in ship or equipment affecting performance or manoeuvrability.
8. Details of crew and expected visitors while in port. Method of storing, if applicable.
9. Whether crude oil washing is to be undertaken whilst alongside.
10. Any other information concerning the vessel regarding safe operations.

BALLAST: Vessels are expected to arrive with clean ballast as there are limited shore ballast reception facilities. *Ballast water containing chemicals or waste incompatible with the shore water effluent treatment plant must not be discharged ashore.*

Clean ballast water, and water from segregated tanks, may be discharged overboard subject to the approval of the Port Authority and the Company. Ballast water from non-segregated ballast tanks shall either be retained onboard or discharged into Company tankage.

Consideration will be given to receiving the contents of a vessel's slop tanks which may be discharged to the shore reception facility after analysis and with the prior consent of the Company. If material for discharge is incompatible, arrangements for disposal of the material must be made with the vessel's Agent who maintains a list of contractors licensed to handle hazardous material.

FRESH WATER: Not available.

FUEL: Bunkers available with advance notice.

EMERGENCY CO-ORDINATION CENTRE: Contact the Berth Operator or MCB Chief Operator via Channel 6 UHF.

GARBAGE DISPOSAL: No facilities.

GENERAL: *Tidal Information:*

Highest Astronomical Tide	+3.5 m.
Mean High High Water	+3.0 m.
Mean High Water	+2.8 m.
Mean Sea Level	+2.2 m.
Mean Low Water	+1.6 m.
Mean Low Low Water	+1.4 m.
Lowest Astronomical Tide	+0.5 m.
Lowest Low Water	+0.0 m. (Chart Datum).

Personnel Access to Restricted Area:

1. The Company and Port Regulations require that only authorised persons shall be allowed access to the Terminal and they must comply with any restrictions placed upon them.
2. Persons appearing to be affected by drugs or alcohol will be refused access to the Terminal.
3. The Master shall provide the Company with a list of crew and expected visitors.
4. Officials of the Company and Port Authority shall have the right t board a vessel at any time to ensure that these Regulations are bein observed.
5. Visitors are not allowed to board any vessel except with permissio from the Master and Supervisor. Conduct of such visitors shall b the responsibility of the Master.

Movement of Tugs and other Craft: During operations, no vessel or smal craft shall be allowed alongside the vessel unless approval has bee given by the Supervisor and agreed by the Master. When tugs or othe craft are alongside a vessel, all cargo system openings must be close unless all tanks are gas free.

Repair Work: Repair work involving either hot or cold work or the us of naked lights is prohibited unless the permission of the Manager ha been requested and granted in writing. Repair work includes, but is no restricted to, boiler tube cleaning, chipping and scraping, hull paintin testing and servicing of electrical equipment (including radar, radio an domestic electrical equipment). If permission is granted to underta repairs, a list of specified repairs, method statement and a list of shor workmen employed on a vessel must be given to the Supervisor befor work commences. Where approved repair work involves th immobilisation of the vessel's main engines, the Supervisor shall b notified of the actual commencement and completion times of the wor

Ship's Gangway: The vessel is to provide a suitable gangway for saf access, properly rigged with side rails, safety net and lifebuoy, an ensure that during the hours of darkness the gangway is adequately li In the case of excessive freeboard, the means of access/egress sha include an upper platform and bulwark ladder to provide safe access t the ship's deck.

Crude Oil Washing, Tank Cleaning and Gas Freeing: Crude oil washin tank cleaning and gas freeing of cargo tanks (including inert gas purgin is not permitted without the written approval of the Superviso Permission will only be granted subject to berth availability, and provide that all safety and operational requirements, as determined by th Supervisor are met in full. Such safety and operational requirements wi be in accordance with the International Safety Guide for Oil Tankers an Terminals.

Stores Handling: The handling of any form of packed or general carg will only be permitted with the specific written approval of the Superviso and under such conditions as he may reasonably require. Small item of ship's stores capable of being carried by hand, may be handled vi the ship's gangway during operations, provided that any metallic objec or package is suitably wrapped to prevent the generation of spark During the handling of such packages, access to and from the ship sha not be obstructed.

Major items or ship's stores may be handled during operation provided that:

1. Petroleum with a flash point greater than 60°C is being handled.
2. Prior approval has been given by the Supervisor.
3. Operations are not affected.
4. Stores are delivered by water and conveyed in a craft approved b the Company.
5. Stores are handled only at the after end of the vessel, using the ship lifting equipment and in such a manner that no part of the storin activity takes place alongside, on or directly above any part of th main deck. All such store items are to be landed on an area covere with wood or canvas to prevent sparks.

OPERATOR: See Part (D).

(D) STAR PETROLEUM REFINING CO. LTD. – SPM

LOCATION: The Map Ta Phut SPM Terminal consists of a C.A.L Buoy Mooring and is located in position Lat. 12° 29' 12.6" Long. 101° 11' 57.6" E.

It is secured by 6 chains of 4.25 in. diameter, in approximately 25.0 of water (L.L.T.).

PILOTAGE: Pilotage is compulsory. No vessel should approach clos to the SPM than 2 miles without a SPRC Mooring Master on board.

On approaching the Terminal, VHF contact can be established Channel 16, the working channel is 19 or 67. The vessel will be advis of berthing prospects. In cases where VHF contact is not made, vessel should proceed to the designated anchorage position and anch

Also see "Mooring/Unmooring".

APPROACHES: When within VHF range, Masters of tankers sho ascertain berthing prospects from the Terminal.

Buoy "A": Isolated danger, black with a broad red horizontal band, mark 2 black spheres one above the other, exhibiting a white l Fl.(2) 12 sec. 6 m. located in position Lat. 12° 29' 33.9" Long. 101° 10' 18.4" E.

This buoy marks a rock pinnacle which is considered dangerous navigation.

Buoy "B": Special mark yellow with single yellow "X" top mark exhibi a yellow light Fl.(4) 20 sec. 6 m. located in position Lat. 12° 29' 43.0" Long. 101° 12' 24.7" E.

A Racon transmitting Morse Code "B" (Bravo) is also fitted to buoy.

SPM: The SPM exhibits a white light flashing 6 times per minute visible at a range of 5 miles. In addition, a fog horn will sound Mo Code "U" at 30 seconds intervals. White winker lights are also fitte the floating hose strings.

ANCHORAGE: Should it be necessary to anchor, then the vessel sh proceed to the recommended anchorage area which is in pos Lat. 12° 26' N., Long. 101° 12' E., or as otherwise indicated.

RESTRICTIONS: Berthing and unberthing day and night.

MAX. SIZE: 280,000 d.w.t., LOA 345 m. and draft 20.4 m.

RADIO: Vessels bound for the Map Ta Phut SPM Terminal are to advise SPRC/RRC of their ETA 72 hours, 48 hours and 24 hours before arrival.

The following information is required from the Master:

Name of vessel.
ETA.
Confirmation of adequate stability at all stages of cargo/ballast operations.
S.W.L. of derrick or crane and its state of readiness.
Number and size of manifolds.
Name of Master.
Summer deadweight.
Draft.
Net Registered Tonnage.
Last port of call.
Owner's name and address.
Bill of Lading figures.
Nationality of Officers and Crew.
Number and size of chain stoppers for SPM Mooring.
Confirmation that vessel is able to maintain 30% of Summer d.w.t. while in berth.
IGS operational and all cargo tank conditions as required by SOLAS.

VHF: A 24 hour watch is maintained on VHF Channel 16 at the Terminal. Channels 19 or 67 will be the working channels. Vessels are usually able to make contact on the channels at a distance of 30 miles to 40 miles.

TUGS: One tug of 4,040 h.p. (65 tonnes B.P.) and one workboat of 2,350 h.p. (29.5 tonnes B.P.).

BERTHING: Map Ta Phut SPM Terminal is owned jointly by Star Petroleum Refining Co.Ltd. (SPRC) and Rayong Refinery Co.Ltd. (RRC) and operated by SPRC.

The Terminal is designed for the importation of crude oil for both refineries.

Vessels arriving to discharge at the Terminal must comply with the latest SOLAS and MARPOL Conventions and Protocols.

Vessels which are found to be seriously deficient in any way will not be berthed or allowed to discharge at the Terminal.

The berth is designed to accommodate tankers from 60,000 to 280,000 d.w.t. with a maximum displacement of 350,000 tonnes and a maximum draft of 20.4 m. Maximum LOA 345 m. with maximum bow to manifold distance of 172.5 m.

Only vessels fitted with approved chain stoppers as per OCIMF recommendations will be berthed.

Mooring system consists of 2 nylon endless grommets; hawsers of 12 in. circumference, 50 m. in length, each with a 394 tonnes NDBS and equipped with a combination B and C chafe chain.

The floating hose configuration consists of 2 strings, the main hoses being 24 in. and the tail hoses 16 in. diameter. The strings are marked by winker lights. Double closed Gall Thomson breakaway couplings are fitted to the floating strings.

Special Restrictions: No crude oil washing is permitted during the last 6 hours of discharge.

MOORING/UNMOORING: *On Arrival:* The vessel will be given berthing or anchoring instructions on VHF Channel 19 or 67 by the SPRC Marine Terminal.

At Anchor: A good listening watch should be maintained on VHF Channels 16 and 19/67. Vessels will be called by SPRC with berthing information and other instructions.

Under Pilotage and at Berth: The Mooring Master and Assistant will carry portable intrinsically safe multi-channel radios by means of which all communications regarding approach, mooring and cargo transfer will be made. They will also carry battery chargers for these radios during the vessel's stay at the Terminal.

In addition, the vessel's VHF radio should be available on the bridge and in the cargo control room for back-up communications.

Mooring Master Boarding: The Mooring Master, his Assistant and 3 mooring crew will board the vessel by boat.

A safe means of access shall be provided in accordance with the requirements of SOLAS.

The vessel must provide an adequate lee for boarding.

During night operations, the access shall be adequately illuminated to allow the safe approach and boarding of the Mooring Master, Government Officials and Agent.

The Conditions of Entry Into and Use of the Map Ta Phut SPM Terminal form will be presented to the Master of the Tanker and shall be signed prior to the commencement of berthing operations.

The Notice of Readiness will only be accepted provided the SPRC Mooring Master is satisfied that the vessel is in all respects ready to moor and discharge.

In no event shall the Notice of Readiness, whether previously accepted or not, be valid or binding on the Terminal unless the vessel, her tanks and equipment are in fact in every respect ready to discharge cargo.

The Mooring Master and Assistant will advise the Master on all manoeuvres and operations relative to berthing, connecting/disconnecting of hoses and unberthing. They will also provide all communications between vessel and shore during transfer operations and be the SPRC representative with respect to cargo operations, documentation, safety observations and other requirements. These 2 persons will remain on board the vessel while it is in the berth and suitable officer style accommodation is to be provided for them. Accommodation is also to be provided for 3 mooring crew.

Preparation for Mooring: During the approach, while mooring, secured in the berth and whilst unberthing, the vessel's anchors *must* be secured by stoppers to prevent accidental dropping with subsequent damage to the subsea pipeline and equipment.

The port derrick/crane should be rigged ready to lift the mooring basket from the boat and for connecting the cargo hoses. Derrick/crane shall have a minimum 10 tons SWL. However, vessels should have the recommended SWL capacity for their size as recommended in the OCIMF publication "Recommendations for Oil Tanker Manifolds and Associated Equipment", fourth edition 1991.

The vessel will provide 2×16 in. 150 lbs. ASA flange connections on selected cargo manifolds made ready for hose connections, drip trays, sawdust or sand and firefighting equipment in position at the manifold area.

The following vessel's equipment should be ready on the forecastle head:

Two empty spool drums to heave onboard mooring pick-up ropes.
Two messenger lines 24 mm. diameter, 150 m. in length.
Large crow bar.
Sledge hammer.
Pail of grease.
Large flashlight for night berthing.

Mooring and Unmooring: Mooring: Line handling during mooring and unmooring are performed by the vessel's crew under instruction of the Mooring Master and Assistant.

Vessels must be fitted as recommended in the OCIMF publication "Standards for Equipment Employed in Mooring of Ship's at Single Point Moorings".

Only vessels fitted with approved chain stoppers will be berthed at the SPM. The use of Smit Brackets or any other means of securing the chafe chain is not permitted.

When the vessel is within reasonable distance from the SPM, a ship's messenger line will be carried by the mooring launch and connected to the port mooring messenger on the mooring hawser. This mooring messenger will be used to heave the 76 mm. chafe chain onboard. Care must be taken during this operation to ensure that no excessive weight comes on the mooring messenger.

The chafe chain will then be secured in the chain stopper in such a manner that the nylon hawser remains outside and clear of the ship's fairlead, allowing the chain to absorb any chafing in the mooring system. The operation will then be repeated to secure the starboard mooring hawser.

Once the vessel is securely moored, a tug will be secured on a towline astern.

Moored to Berth: A Mooring Hawser Load Monitoring Device is fitted to the SPM. At 126 tonnes, which is 70% of the preset threshold value of 180 tonnes, a red warning light flashes and the Mooring Master is to be informed, engines to be put onto stand-by and the situation continually monitored. When 180 tonnes is reached, an audible alarm sounds. The Marine Control Building is to be informed, cargo stopped, hoses disconnected and consideration given to vacate the berth.

Unmooring: When the hoses have been disconnected and lowered to the water, the unmooring operation will commence. The tug astern will be released to pull the hoses clear from the vessel's side.

The weight will then be allowed to come off the mooring hawsers, it may be necessary to use the ship's engines for this purpose. When the weight is off, the starboard mooring hawser will be released, lowered to the water and towed clear. The port hawser will then be released and the vessel moved astern clear of the berth.

Care must be taken to ensure that the mooring hawsers do no become entangled in each other or are dropped onto or across the hose strings.

Anchors not to be unsecured until the vessel is well clear of the SPM and subsea pipeline.

DISCHARGING: *Connecting Procedures:* Tanker manifold arrangements must comply with the latest OCIMF publication "Recommendations for Oil Tanker Manifolds and Associated Equipment", fourth edition 1991.

After the vessel has been securely moored, the mooring boat will bring the floating cargo hose strings alongside.

Lower derrick/crane hook to the mooring boat, which will connect it to the forward hose.
Heave up the hose until the blank flange is level with the hose rail.
Unshackle hose snubbing chain from the flange lug.
Continue heaving up the hose as directed by the Mooring Master.
Secure snubbing chain.
Lower the hose to bring the hose flange to the manifold and check the alignment of the flanges.
Lower the hose onto the drip tray and remove blank flange.
Lift the hose and connect to the manifold. *Use a new gasket and fully bolt the flanges.*
Open the hose end butterfly valve and secure.
Repeat the procedures for the second hose.

After both hoses have been connected, they must be supported in way of the tanker rail by means of broad nylon bands suspended from the derrick/crane.

Care should be taken during the hose handling operation to avoid serious damage to the hoses and associated equipment.

Discharge Procedures:

1. On completion of all Government formalities, gauging, sampling, safety checks and documentation, discharge of cargo can commence.
2. The discharge operation will be controlled by VHF/UHF radio by the Mooring Master/Assistant between the vessel and the SPRC Terminal Control Room (TCR) for both SPRC and RRC cargoes. This does not absolve the vessel from communicating directly with the TCR if the Mooring Master/Assistant do not respond to radio calls or in an emergency situation.
3. The SPM supplies crude oil to both the SPRC and RRC refineries. Therefore, it may be necessary at the commencement of the discharge to displace the oil already contained in the SPM system and submarine pipeline to the appropriate refinery, before bulk discharge can commence.
4. In line samplers will be fitted to the vessel's manifolds to monitor cargo quality during the discharge. These samplers will be operated by the Independent Surveyor appointed to the vessel. However, the Mooring Master should ensure that the samplers are started at the commencement of the line flush and/or bulk discharge and that they are operational throughout the discharge operation.

5. In the event that a line displacement is necessary, SPRC/RRC will require the vessel to pump approximately 150,000 barrels of crude (23,340 cu.m.) into the system and then suspend cargo operations, while changes are made to the line up to the crude receiving systems ashore (quantity will be dependent on which refinery is to receive the line displacement). During this operation, the Mooring Master will coordinate directly with the SPRC Terminal Control Room.
6. During the line displacement, SPRC/RRC will require the vessel to carefully monitor the quantity being discharged.
7. Once the line displacement is completed and the quantity discharged agreed, the bulk discharge of cargo can commence.
8. Throughout the discharge, a responsible deck officer must be in charge of operations, either on deck or in the Cargo control room and in continuous contact with the Mooring Master/Assistant via portable radio.
9. An efficient deck watch must be maintained with continuous observation of the manifold area and the mooring hawsers.
10. At any time during discharge operations, the Terminal may request a reduction in rates, normally the vessel will be given 10 minutes notice before any reduction is required.
11. As an anti-pollution measure, the volume of oil discharged by the vessel must be relayed to the Terminal on an hourly basis to allow for the comparison of figures (discharged against received). This is particularly important at night when it is difficult to detect oil pollution.
12. During the hours of darkness, it is required that all available approved floodlights are used to illuminate the vessel and surrounding waters to facilitate the detection of oil and generally assist in the transfer operation. Vessels are advised that failure to supply sufficient lighting could result in the transfer operation being suspended during the hours of darkness. Such delays would be for the vessel's account.
13. It is strictly against the law to pollute the waters of Thailand and the Master, his vessel and Owners may be subject to prosecution by the Thai Authorities.
14. The maximum discharge pressure allowed at the tanker rail is 10.5 Bar (approximately 9,500 cu.m./hr.).

Disconnecting Procedures: On completion of discharge operation, the rail tail hoses and ship's manifolds will be drained to prevent spillage of oil when disconnecting hoses.

Close vessel manifold valve and hose end butterfly valve on completion of draining manifolds.

Remove nylon bands and position derrick/crane hook over aftermost hose.

Attach lifting wire to derrick/crane hook, take the weight and disconnect the hose.

Replace the blank flange using a new gasket and fully bolt the flange.

Heave up the hose until the weight is off the snubbing chain, release the snubbing chain.

Lower the hose until the flange is level with the tanker's rail, shackle snubbing chain to flange lug, securing shackle with seizing wire.

Lower hose to the water as directed by the Mooring Master.

Repeat the procedures for the second hose.

Care must be taken when lowering the second hose to prevent entanglement of the hoses in the water.

SPM maintenance, particularly in bad weather, is extremely difficult and involves possible danger to personnel. For this reason, vessels are requested to give as much assistance as possible by taking seaman-like care of the mooring and hose equipment and returning it to the water ready for the next tanker and in such a condition as they would like to find it.

Hose/hawser maintenance is expensive and if SPRC judges that the vessel has misused any hose or hawser, then the vessel will be liable for the expenditure incurred in making repairs.

Ballasting Operations: Extreme caution must be taken when ballasting operations are undertaken, to ensure no oil escapes through the vessel's sea valves (Refer Terminal Safety Regulations 4.17, 4.22 and 4.3).

During all operations, the Master or a responsible Deck Officer and sufficient crew members must be in attendance to assist SPRC personnel to handle any emergency that may arise including unberthing the vessel for any reason.

FRESH WATER/FUEL: No bunkers or fresh water are available at the Terminal. However, these may be arranged through the vessel's Agent and delivered by barge at anchor.

SHORE LEAVE: Not permitted.

WEATHER: *Environmental Conditions:* Climatic conditions in the Northern area of the Gulf of Thailand are affected by the Monsoon seasons.

The winds are mainly between North and East from November to January. In Febrauary and March, the dominant wind direction is from S.E. The directions are variable in April, and then in May to September the S.W. Monsoon is dominant.

During the S.W. Monsoon, frequent squalls with wind speeds of 30 knots, accompanied with heavy rain are common.

Currents: Currents are influenced by the Monsoons. During October to May, the currents are predominantly anti-clockwise and clockwise from June through September. Mean current speed is estimated at 0.5 knots rising to 1.5 knots during the S.W. Monsoon.

GENERAL: *Charts:* The following charts cover Map Ta Phut SPM Terminal:

B.A. 3966, B.A. 3984 and B.A. 2414.

Thai Hydrographic Department Chart 141.

Vessels should also be in possession of the latest issues of the charts or their equivalent corrected to reflect all published changes. "Sailing Directions", "List of Lights" and "Tide Tables" should also be onboard.

Flag: The national flag of Thailand shall be displayed by the vessel during the hours of daylight.

OPERATOR: Star Petroleum Refining Co.Ltd., P.O.Box 35, Rayong 21150, Thailand. *Tel:* 66-38-681-880. *FAX:* 66-38-684-999. *Contact:* Captain Roy Igglesden, Marine Terminal Superintendent.

PHUKET: 07.49 N. 98.25 E. (See Plan

LOCATION: The Port of Phuket is located on the Western seaboard o Thailand, on the Andaman Sea in position 07° 49' N., 98° 24' 30" E.

DOCUMENTS:

Entry documents and advance information.

Customs and Immigration Entry forms as well as list of other documen required on *vessel's own forms* to be completed in advance fo presentation on arrival Phuket. Sent in advance to the Agent from on of the previous ports together with request for the following informatio required 4 days in advance of vessel's arrival.

Confirmation of ETA and any subsequent revised ETA.
Master's name.
Last port of call before Phuket.
Next port of call after Phuket.
Net registered tonnage (n.r.t.).
Hatch distribution and gangs workable.
Cash advance of Master.

Flags: Vessels are required to fly the Thai flag and display the code fla "Q" on arrival.

PILOTAGE: There is no official Pilot available.

ANCHORAGES: The following anchorages are regularly used by ocea carriers of deep draft calling Phuket for loading or discharging cargo.

During the N.E. Monsoon Season: Prevailing wind from Novembe through March, and periods of strong Easterly winds, vessels ar recommended to anchor in position Lat. 7° 53' N., Long. 98° 27' 15" E about 0.5 mile off Laom Mai Pai to pick up the boarding party an stevedores, before proceeding to the actual anchorage for loading a position Lat. 7° 57' N., Long. 98° 33' E., about 1 mile off Koh Yac Hya depth approx. 16 m. (50 ft.) at LWOS. However, during calm weathe periods, cargo operation will be carried out at the first mentione anchorage.

During the S.W. Monsoon season: Prevailing from April through Octobe and any periods of strong Westerly winds, vessels are recommende to anchor at position Lat. 7° 53' N., Long. 98° 27' 15" E. about 0.5 nautica miles off Laom Mai Pai, depth approx. 14 m. or 45 ft. at LWOS.

To facilitate cargo operations during swell from South, vessels ar requested to anchor as close as possible to the above anchorag positions according to the Master's judgement.

No Pilot is required on approaching the above anchorage; howeve it should be noted *three ocean-going dredgers* are operating in the are between Koh Dok Mai and Kon Khai Nok which should be passed at distance of about 1,500 ft. to keep clear of their anchor line The dredgers are lit up and clearly visible at night.

It should also be noted during the new moon period there are severa small fishing craft in the area.

RESTRICTIONS: *Channel:* The channel around Koh Tapae Kyai normally passed clockwise and is marked by a system of buoys, th position of which are shown on Thai charts. However, it is also possib to turn around by swinging on the anchor just after passing Buoy No. on a rising tide (South to North) just before high tide.

Width of Channel: Minimum 230 ft. at Buoy No. 6 measured (chart datu at LLW) at 6 m. depth curve. Maximum 900 ft. at Buoy No. 4 measur at 6 m. depth curve.

Restriction in Navigation: (1) Entering or leaving through the Nor channel involves a rather sharp turn with a radius of about 1,000 ft. an angle of about 115° between the axis of channel in a restricted are between Buoy No. 6 and Koh Tapai Noi Island. Please also note th wreck buoy between Buoy No. 6 and Koh Tapao Noi.

(2) The draft at Buoy No. 6 is about 24 ft. 6 in. at Lowest HW.

(3) At Buoy No. 5 are placed two pairs of mooring buoys paralle the channel, occasionally used by tankers discharging petroleu products to Esso and Shell installations ashore. The width between th narrowest pair is about 150 ft. and vessels are required to pass betwe these mooring buoys.

HEALTH: All crew and passengers must have valid health certifica for cholera.

RADIO: Messages to and from vessels at sea on the West coast of t Malayan Peninsula are best transmitted via Penang Radio in time t allow re-transmission to Phuket at about the following local times:

Weekdays at 0930 hrs., 1400 hrs. and 1630 hrs. Sundays at 1630 h

For vessels outside this area, messages can be sent via Bangkok Singapore as applicable. Cables via Bangkok Radio are norma transmitted every second hour from 0800 to 2100 hrs. local ti whereas cables via Singapore are sometimes re-transmitted via Bang Radio and sometimes via Penang Radio.

There are no facilities for ship-to-shore communication in Phuket, t vessels are *not* required to close down their radio station or VHF while in port.

There is long-distance telephone connection with Bangkok, Pena Singapore and Kuala Lumpur from Phuket at all hours.

Despatch Cables: Agent will in all probability need to send cables the ship's radio re-loading results, etc., subject to the Master's appro The cost of all such cables is to be borne by the vessel.

TUGS: 1×2,000 h.p.

BERTHING: New Port: *Phuket Ocean Terminal:* C.T.International Co.Ltd. entered into an agreement with the Royal Thai Governme manage and operate the port for 10 years from 21st October 1988

Access:
(1) Access for vessels entering or leaving the port is via a 12 wide channel, dredged to 9.0 m., and is 1.5 km. in length.
(2) There is a 360 m. turning circle to the North of the quay.
(3) Tidal range at Springs is 2.7 m.

Facilities:

Total Area	: 65 acres (26 hectares)
Ship Berths	: 2
Barge Berths	: 4
Total Berthing Length	: 1,180 ft. (360 m.)
Depth	: 10.0 m.

Forklifts	: 8× 2 – 3 tons 1×25 tons
Tow Tractors	: 4×40 tons 2× 5 tons 1×10 tons
Drawbar Trailers	: 4×40 tons 3×10 tons 6× 5 tons
Front Loaders	: 1
Annual Maximum Handling	: 32,000 TEU.
Stacking Capacity	: 5,200 sq.m.
Transit Shed	: 38,736 sq.ft. (3,600 sq.m.)
General Cargo Area	: 55,952 sq.ft.

Old Port: At Laen Klusi, Thailand Smelting and Refining Co. Ltd. have built a crossway connected by a short bridge to a pier which is parallel to the channel. The pier and channel are presently only suitable to accommodate vessels up to about 10,000 d.w.t. and approx. 430 ft. long, not exceeding 22 ft. draft. Vessels berthing at the pier are recommended to anchor at position Lat. 7° 48' 24" N., Long. 98° 25' 12" E. to await loading and favourable tide.

Dimensions of the Pier: Length 61 m. (200 ft.), width 12 m. (40 ft.).Depth about 24 ft. 6 in. at LLW.

Fenders: The pier is protected by a system of wooden fenders in addition to which there is 1 fender at each end of the pier with solid rubber buffers.

Mooring Buoys: There are 2 mooring buoys about 700 ft. apart, each at equal distance from the end of the pier.

MEDICAL: It is only possible to get a doctor on board in the most severe cases, but otherwise there are two hospitals in Phuket, one of which is managed by American Seventh Day Adventists Mission Doctors, and the other is a General Hospital.

FRESH WATER: Limited and difficult to obtain.

FUEL: Limited and difficult to obtain.

CONSULS: None.

SURVEYORS: No marine surveyors in Phuket; however, a surveyor can be called from Bangkok.

REPAIRS: No facilities.

POLICE/AMBULANCE/FIRE: Police Tel: 212046. Marine Police Tel: 214368, 211883. Police (Emergency) Tel: 211883. Fire Tel: 211111, 212456-7.

DEVELOPMENTS: 2 berths under construction. Depth alongside 10.0 m.

SHIPMASTER'S REPORT: January 1992.

Chart: B.A. Chart No. 3941.

Pilotage: Pilot not required for anchoring. Pilot may be contacted on VHF Channels 16 and 13 during working hours only, which are normally from 0600 hrs. to 1800 hrs.

Anchorage: Vessel anchored near the new fairway buoy off Laen Phan Wa Point (Position Lat. 07° 47.86' N., Long. 98° 27.24' E).

The anchorage is exposed to winds from the South and East and vessel dragged anchor when first anchored due to strong tide. The bottom appears to be coral. When it was noticed that the vessel was dragging, 5 shackles were lowered into the water and this held the position of the vessel in a Force 4 wind from the East which was across the tide and with a 2,500 tonne barge alongside.

Approaches: Laen Phan Wa and Ko Tai Phao Noi lights are conspicuous.

There is a dredger working in position Lat. 07° 46.6' N., Long. 98° 27.2' E. and it is not very well lit.

Strong currents were experienced when approaching the anchorage and vessel was set rapidly to the North, due to the flood tide.

There are numerous fishing boats to the South and West but the anchorage itself was clear.

The fairway buoy has been moved to position Lat. 07° 47.86' N., Long. 98° 27.24' E and it has no light.

Max. Size: Maximum permissable draft 9.0 m.

Tugs: There are two tugs available, one is owned by the port authority and the other is privately owned. Both are 2,500 h.p.

Cargo Operations: Vessel loaded latex from a 2,500 tonne barge which has 10 tanks, each with a capacity of 250 tonnes. The barge is brought to the ship by a harbour tug.

It is possible to load two ships tanks at one time through 1×6 in. hose from the barge which is split into 2×3 in. hoses through a portable manifold. Cargo is loaded over the top. Loading rate is approximately 85 tonnes/hr.

No survey papers are required. The SGS surveyor did his own tank survey.

The surveyor, agent and shipper were on board throughout the operations.

General: Three persons from the agent's office board with customs and immigration and assist with completion of documentation. There is no boarding or clearance between 2100 hrs. and 0700 hrs. Many port officials board the vessel.

Ships papers are generally accepted but an official Crew Manifest is to be completed and all crew members to sign, the ship's Manifest is then attached. A 'nil' Cargo Manifest is required if the vessel has no cargo to discharge.

The airport is 18 miles to the North of the port and has frequent flights to Bangkok. No difficulties were experienced by crew leaving or joining.

A boat service can be arranged through the agent.

SHIPMASTER'S REPORT: September 1993.

Chart: B.A. Chart No. 3941.

Approach: Laen Phan Wa and Ko Tachaonoi Lights are conspicuous. By day Komaithon Island is a good landmark for the port approach.

Pilot: Berthing daylight only. Night sailing without Pilot by arrangement.

Pilot boards from tug at Fairway Buoy and departs off berth at Buoy No. 5. Pilot spoke poor English.

VHF used when vessel expected, but not before 0800 hrs. No Pilot for anchoring.

Anchorage: About 0.4 miles East of Buoy No. 1 in 18.0 m. for loading latex from barge.

A large swell is experienced at times.

In 1991, a sister ship dragged anchor.

Channel: Leading lights discontinued. Beacons still in position. A new buoy to West of Turning Basin (Buoy No. 6) now positioned at Lat. 07° 49.3' N., Long. 98° 24.45' E.

Vessel swung in Turning Basin with aid of tug, to berth starboard side alongside.

Depth as charted (minimum 9.0 m. C.D.), in fact found slightly more.

Berth: Flat faced concrete quay with good fenders. We berthed at the South end of the quay with bow overhanging about 20 m. North Berth used by small cruise liners and tourist craft to local islands. There was 10.0 m. C.D. alongside at South end.

Moorings 2,1,2, each end. Bow moorings, except springs, all breast lines.

Accommodation ladder landed on quay.

Fresh water obtainable from quay hydrants.

Tugs: 1×2,500 h.p. tug available. Tug generally just pushes.

Loading: Latex direct from shore tanks at South end of quay, also from 25 tonne tank trucks and barges.

Loading rate about 90 t.p.h. Sometimes three tanks loaded at once.

Shippers have a tendency to short deliver their nomination which causes ullages. Can sometimes be made up using spare capacity in short tanks if grade correct. We had one tank left slack (below 100%), protest noted for product deterioration and deadfreight.

Product comes from far afield in Thailand.

Very messy loading, the least professional of the latex loading ports.

Medical: Quickly dealt with and efficient.

Stores: No Chandler. Agent will assist with shopping.

Authorities/Documentation: Agent makes out a lot of Thai forms which have to be signed. Thai Personal Effects Manifest, which has to be signed by each crew member with ship's copies attached.

Repatriation: No difficulty either way through Bangkok from local airport.

Shore Leave: A big holiday resort with all the usual attractions.

AUTHORITY: *Operator:* Chaophaya Terminal International Co.Ltd., Tambol Ao Makam, Amphoe Muang, Phuket 83000, Thailand. *Tel:* 391155-60. *Telex:* 69512 Pkport. *FAX:* (076) 391157.

AGENT: See "Bangkok".

SATTAHIP (Chuk Samet Port): 12.35 N. 100.55 E. (See Plan)

LOCATION: Sattahip Bay is located on the Eastern coast of the Gulf of Thailand about 184 km. from Bangkok in Plutaluang sub-district of Cholburi Province.

PORT LIMITS: Extend to approximately 1,500 yards from the quay wall at Chuk Samet Port, and 1,000 yards from piers at Tungprong Port.

DOCUMENTS: See "Bangkok".

APPROACHES: The entrance channel is 100 m. wide, 2.7 km. long and the harbour basin 450 m. wide in front of the West quay-wall, having available a depth of about 10 m. below Lowest Low Water (LLW).

The entrance light buoy is at Lat. 12° 35' 07" N., Long. 100° 54' 20" E.

PILOTAGE: Compulsory for vessels over 50 m. LOA. Working daily during the day time only. Advance notice required 4 hours prior to arrival on working day (on holiday notice required at 0830 – 1200 hrs.). Radio frequency used when handling the vessel is 27125 kHz

ANCHORAGES: Anchorage area for waiting berth and Pilot:

Chuk Samet Port: Capacity: Eight deep-draft ships minimum depth 8 fathoms.

Tanker Berth (Pol Pier)	Commercial Berths (DWP 1 – 4)
Lat. 12° 37' 03" N.	Lat. 12° 37' 25" N.
Long. 100° 55' 00" E.	Long. 100° 55' 00" E.

Tungprong Port: Capacity: Four deep-draft ships minimum depth 10 fathoms.

Lat. 12° 43' N.	Lat. 12° 45' N.
Long. 100° 49' E.	Long. 100° 49' 30" E.

Map Pier:

Lat. 12° 41' 47" N.	Long. 100° 50' 31" E.

RESTRICTIONS: Berthing possible throughout 24 hours.

MAX. SIZE: See "Berthing" and "Tankers".

RADIO: Radio telephone.

Name of Station	*Frequencies*	*Remarks*
MSC	2738 kHz	Day time
Portsat	2738 kHz	Day time
	4145 kHz	R/T – SSB
	6220 kHz	R/T – SSB
	8292.5 kHz	R/T – SSB

VHF: Calling Channel 16 (156.8 MHz)
Calling Channel 14 (156.7 MHz)
Interport use 157.5 MHz (Special Channel)

TUGS: 2 tugs available, 3,000 h.p. Join when vessel approaches berth, charge for use of tug's lines. 2 mooring boats available.

BERTHING:

Limitation of Draft:

Chuk Samet Port: Depth 32 ft. below LWOST or 36 ft. below MLW.

(1) For cruising in the channel
32 ft.
– 3 ft. for squat, tidal phenomena, etc.
– 2 ft. for under keel clearance
Draft = 27 ft. at LWOST

(2) For staying in port
32 ft.
– 2 ft. for under keel clearance
Draft = 30 ft. at LWOST

(3) Draft of the vessel could be increased for the day alongside by adding the figure of the height of tide at low water of that day to the figure of draft in (2) above (30 ft.+Height of tide at LW).

Sattahip Commercial Port:

Berth	*Length* (m.)	*No. Berths*	*Max. LOA* (m.)	*Max. Draft* (m.)
West Quay	540	3	180.0	9.0
North Quay	360	2	150.0	7.8

Cruise passenger ships are permitted to berth at Sattahip.

Map Pier: 1 berth, length 443 ft. Depth at MLW 38.8 ft.

CARGO HANDLING FACILITIES:

	No.	*Capacity*
Forklift trucks	7	7,000 lb.
Shortmast trucks	7	5,000 lb.
Yard hustlers	5	—
Chassis	15	—
Top loader	1	35 tons
Transtainer	1	—
Straddles – 8×40 ft.	3	—
– 8×20 ft.	3	—
Semi-portal cranes	2	23-45 tons
Pallets	1,000	—
Van carriers	10	—

Storage Area:

3 transit sheds, total area 11,470 sq.m.
Open storage area of 190,000 sq.m.
1 container freight station.
Container yard of 36,000 sq.m.

STEVEDORES: Vessel to advise Agent 7 days prior to arrival. Text required in this cable is: flag, ETA, draft, tonnage of cargo aboard for port, number of crew/passengers, dangerous cargo/heavy lifts, gangs required.

194 stevedoring contractors (both liner terms and chartered vessels under F.I.O. terms).

Working Hours: 0800-1200 hrs. – day shift, 1300-1630 hrs – day shift, 1630-1800 hrs – overtime (working through), 1900-2400 hrs. – first half-night shift, 0100-0500 – second half-night shift, 0500-0700 – overtime (working through, but should apply for P.A.T. approval).

On Saturdays, Sundays and public holidays, the day shift finishes at 1600 hrs.

MEDICAL: Hospital facilities available.

TANKERS: *POL Jetty:* Max. size 50,000 d.w.t., max. LOA 820 ft., depth alongside 36 ft., max. draft 30 ft. (plus/minus, depending on time and tide). Diameter of shore lines are 6 in., 12 in. and 20 in.

DENSITY: 1021.

FRESH WATER: Limited, 200 tons per trip, addition 100 tons for boiler. Supply can be made by water trucks, advance notice of ETA required.

FUEL: Available, supply can be made by barges, advance notice of ETA required.

REPAIRS: Only for minor repairs.

GANGWAY/DECK WATCHMEN: Necessary.

OPENING/CLOSING HATCHES: Carried out by stevedores without extra charge.

CUSTOMS ALLOWANCES: 200 cigarettes for each officer, 100 for each crew member for 3 days. One bottle each, wines and spirits, opened.

CARGO GEAR: Supplied by stevedores.

TIME: GMT plus 7 hours throughout the year.

POLICE/AMBULANCE/FIRE: Security centre 2187; Duty officer 2102 (after duty hours); Police 3180; Ambulance 116; Fire 117.

TELEPHONES: Available (U.S. military circuits).

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Required for all crew and officers.

SHIPMASTER'S REPORT: July 1981.
CHUK SAMET PORT:
For details concerning navigation, currents, clearance and documents, etc., see "B.A. Pilot No. 30" and "Guide to Port Entry".

Vessels approach on the beacon line at 017.5° (T), along the fairway marked by buoys. The beacons are installed on the pier and are easily visible. When entering and leaving, the cross current should be watched. The fairway buoys appear to be displaced somewhat Westwards.

Entry and Leaving: Only permitted between 0600 hrs. and 1800 hrs.

The Pilot comes from Bangkok. Also Authorities come from Bangkok for clearance.

A local Agent's office is not yet available, but will shortly be installed. Wireless traffic from the port with Bangkok is permitted.

There are two tugs of 3,600 h.p. available.

Max. Draft: At present 32 ft. is allowed.

The pier running approximately North – South is 500 m. long, and the cross pier 365 m. long. Both are well equipped with rubber type fenders. The free area on the pier in front of the sheds is about 45 m. wide.

Cargo Handling: Both cranes and the tapioca conveyor can run on the crane rails both on the main and cross piers. The large crane lifts up to 40 tonnes at 35 ft. The small crane lifts 23.5 tonnes but is currently out of use, but should be back in service shortly. The port has 20 forklift trucks, 10 at 3.4 tonnes, and 10 at 2.3 tonnes. Also there are 10 lorries type HINO KL 340 at 7 tonnes.

A Sea Container Shifter is already available, capacity 30 tons. For containers there are three 40 ft. and three 20 ft. spreaders in the equipment store.

Water: Any quantity available. Water must be boiled prior to use.

Bunkers: Only by road tanker.

Ship Repairs: None.

Ships' Chandler: Should be available.

Hospital: Available.

VHF: Port Authority on Channel 16.

Weather Conditions: During S.W. monsoon there is a slight swell. From May to July is the rainy season, with storms and typhoons occurring i June and July. Currents are unimportant. The tide rises about 2 m.

General: S.W. from Sattahip, in the Thailand Gulf, natural gas is obtained. A gas pipeline from there to Sattahip is under construction. The line wi then be taken overland from Sattahip to Bangkok.

A railway connection is being built. A road to Bangkok (approx. 180 km. = approx. 3 hours by car) is available.

Further Developments: Dredging and building of new piers will begin.

A large Gottwald crane (mobile at 40 tonnes) is stated to have been ordered, and will be delivered in about 6 months.

It is planned later on to install a IHI container bridge, and Sheds 1 and 2 will be demolished to make room for container handling.

AUTHORITY: Port of Thailand Authority, Sattahip Commercial Port, Plutaluang Sub-District, Sriracha District, Chonburi 20180, Thailand. *Tel:* 038-436344/436360. *Telex:* 75702. *FAX:* 038-436565.

From 1st January 1991: Royal Thai Navy.

AGENT: See "Bangkok".

SONGKHLA: 07.14 N. 100.35 E. (See Plan)

LOCATION: Lat. 07° 13.7' N., Long. 100° 34.5' E.

APPROACHES: The entrance channel is 4 km. long, and is dredged t 9.0 m. over a width of 120 m.

There is a turning circle with a diameter of 300 m. to the West of the quay.

PILOTAGE: Available. Pilot boards in the vicinity of the Fairway Buoy.

ANCHORAGE: To the West of the leading line (045° – 225°) and 090° from Ko Maeo Island in a depth of 9.3 m.

MAX. SIZE: LOA 173 m., draft 8.23 m. and beam 25 m.

TUGS: 2×1,600 t.p.h.

BERTHING: *Songkhla Port:*

Total Area : 24.71 acres (10 hectares)
Ship Berths : 3
Total Berth Length : 1,673 ft. (510 m.)
Storage:
Port Area : 94,000 sq.m.
Container Yard : 25,000 sq.m.
Warehouse : 6,720 sq.m.
Stuffing Shed : 440 sq.m.
General Working Area : 9,300 sq.m.
Port Capacity:
Total Cargo Throughput : 1,100,000 ton/year
Container Yard Stacking Capacity : 2,300 TEU's.
Warehouse Stacking Capacity : 8,000 tons at a time.
Container Stuffing Capacity : 100 TEU/day.
Warehouse Cargo Receiving : 1,600 ton/day.
Equipment:
Reefer Plugs : 136
Emergency Power Supply : 2
Weight Bridge (30-80 tons) : 2
Workshop : 200 sq.m.
Maintenance Area : 200 sq.m.
Forklifts : 2×10 tons.
2×25 tons.
3×36 tons.
22×3.0 – 3.5 tons.
Tractor and Trailers : 7×40 tons.
Tractors : 5×5 – 10 tons.
Trailers : 15×5 – 10 tons.
Mobile Cranes : 2×16 tons.

MEDICAL: Hospital in city, Tel: 311379, 313160, 311494,311017.

TANKERS: See "Report".

FRESH WATER: Available alongside.

CONSULS: Malaysia and China.

AIRPORT: Had Yai Airport close South of the city, (Tel: 244521).

POLICE/AMBULANCE/FIRE: Police, Tel: 311011, 312122, 31101 (Emergency). Fire, Tel: 311016, 311118.

GARBAGE DISPOSAL: Normal garbage collection service is availab Minimum charge is B 200 per order, B 1,000 per truck, 24 hour servic Tel: 331002.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: No Seaman's club in the port but there are ma services in town. International telephone and postage services a available in the port.

CURRENCY: Thai Bahts (B).

REPORT: November 1991.
Note: The following facilities are not part of the Port of Songkhla.
Railway Jetty: Old Jetty: Used by Shell, Caltex and Esso.

Max. Displacement	3,600 tonnes.
Max. Draft	5.2 m.
Max. LOA	81.0 m.
Max. Operating Pressure	6.5 kg./sq.cm.
Flowrate	100 – 120 cu.m./hr.
Pipeline/Manifold	
Gas Oil	6 in.
Premium/Regular (common line)	6 in.
Distance from Jetty to Depot	2,000 m.
Other Facilities	
Fresh water	Available
Fuel	Not available

PTT Jetty: New jetty located inside the port. Distance from jetty to depot is 1,200 m.

Jetty A: New jetty for LPG and Premium/Regular Mogas.

Max. Displacement	3,000 tonnes.
Max. Draft	6.0 m.
Max. LOA	75.0 m.
Operating Pressure	LPG 15 kg./sq.cm. Mogas 8.0 kg./sq.cm.
Flowrate	LPG 200 cu.m./hr. Mogas 180 cu.m./hr.
Pipeline/Manifold:	
LPG Liquid	6 in.
LPG Vapour	4 in.
Premium/Regular Mogas	6 in.

Jetty B: New jetty for bulk carriers.

Max. Displacement	500 – 30,000 tonnes.
Max. Draft	8.0 m.
Max. LOA	200.0 m.
Operating Pressure	8.0 kg./sq.cm.
Flowrate	180 – 360 cu.m./hr.
Pipeline/Manifold:	
Gas Oil	10 in.
Premium/Regular Mogas	6 in.
Jet – A1	6 in.

Shell Jetty: New jetty designed for vessels of 5,000 d.w.t.

Depth at LLW	7.0 m.
Max. LOA	103.0 m.
Max. Draft	5.5 m.
Distance from jetty to breakwater	100 m.

Jetty located at inner side of PTT Jetty.
Tug required for berthing and unberthing operations.
Pilot works in daytime only.

Maximum LOA for passing Channel	173.0 m.
Maximum beam for passing Channel	25 m.
Tugs:	Vessel LOA 250 ft. – 450 ft. One tug required. Vessel LOA over 450 ft. 2 tugs required.

Communications:
VHF Channel 16 for calling.
VHF Channel 13 for ship-to-ship.
VHF Channel 14 for pilot.

AUTHORITY: *Operator:* Chaophaya Terminal International Co. Ltd., Tambol Huakao, Ampheo Singhanakorn, Songkhla, 90280 Thailand. *Tel:* 074-331070-78. *Telex:* 60413 SKPORT TH. *FAX:* 074-331199. *Contact:* Tao Jun, Port Director. Xi Yong Hua, Operations Manager.

AGENT: Jardine Pacific (Thailand) Ltd., 52 Jootee Anusorn Road, Haadyai 90110, Songkhla, Thailand. Tel: 66-74-237362, 231538, 246711. Telex: 60242 Jarthai. Fax: 66-74-239206.

All initial correspondence to be sent to Bangkok Head Office.

(A) PORT FACILITIES *(Excluding Thai Oil SBM and CBM).*
(B) THAI OIL – SBM.
(C) THAI OIL – CBM.

(A) PORT FACILITIES (Excluding SBM and CBM).

DOCUMENTS:

Boarding of Immigration, Customs and Quarantine Officials:

The Immigration and Customs Officials will board all incoming vessels, whereas the Quarantine Official will board on arrival at berth. If however a vessel comes from an infected port the Quarantine Doctor will board. The Officials demand that the main gangway is lowered.

Order of Clearance and Documentary Requirements:

Customs Authority: (Ship's forms)

12 copies Cargo Manifest (including port and Agent's requirements).
5 copies Transit Cargo Manifest.
8 copies Crew List.
6 copies Ship's Stores List.
4 copies List of Ship's Provisions, Steward, Deck and Engine Departments.
4 copies Foreign Currency List.
4 copies List of Arms and Ammunition for Ship's Use.
4 copies List of Opium and Narcotics.
4 copies List of Ports called.
4 copies List of Passengers.
4 copies List of Mail.
4 copies List of Crew members' Personal Effects stating brands and serial numbers of watches, cameras, TV/radio sets, electronic calculators, refrigerators, typewriters, all sound and electrical equipment, etc.
4 copies List of Ship's Movable Properties, to declare brands and serial numbers as above.

When preparing the list of Crew members' Personal Effects and Ship's Stores' Lists, particular care should be paid to the exact quantities. Crew are allowed 200 cigarettes each, during the vessel's stay in port.

Failure to provide correct quantities on various forms will entail heavy fine and confiscation.

NOTE: Pornographic magazines and materials are prohibited and will be confiscated if found onboard.

Immigration Authority: For vessel having Thai Immigration Forms onboard, please prepare them ready for arrival. Otherwise Agency clerks will bring forms onboard and assist in completing them.

5 copies each of Immigration Form No. 3 (separately for *Landing* passengers and *Transit* passengers).
5 copies of Immigration Form No. 4 (Crew List).
2 copies of Immigration Form No. 35. Make out in duplicate, and 1 line for each name. Leave signature columns blank, where each crew member shall sign in presence of Immigration Officers in port.
1 copy Disembarkation/Embarkation card for each passenger, to be supplied in port.

Repatriation Crew holding valid Passports may be declared as passengers in order to facilitate Immigration Exit papers. Otherwise we need one full working day for preparation of Immigration papers (Sat/Sun/Holiday excepted).

Quarantine Authority:

1 copy of Maritime Declaration of Health (may be supplied in port).
2 copies of lists certifying the date of vaccination against Cholera for each crew member.
1 copy of Derat Certificate.

International Certificates of Vaccination against Cholera for all passengers and crew members.

Important to Master: On first arrival at Roads or berth do not allow any unauthorised people to board the vessel or allow any officers/crew members to disembark before 'Checking In' formalities by Immigration Officers and Customs Searching Party. Offence in this respect is liable to a fine not exceeding Baht. 5,000.00.

Departure: The 'Blue Peter' flag should be hoisted at the foremast of all sea-going vessels about to leave the harbour and shall be kept hoisted until the voyage has begun. In the case of vessels leaving in the afternoon, the flag shall be hoisted in the morning, in case of those leaving in the morning, the flag shall hoisted on the previous afternoon. Failure to comply with the regulations is subject to a fine not exceeding Baht. 5,000.00.

APPROACHES: The recommended courses approaching seaberth through the Southern part of Kohsichang are as follows:

from Junction point named "A"	Lat. 12° 43' 00" N. Long. 100° 44' 36" E.	True Course =360°
to Junction point named "B"	Lat. 12° 62' 14" N. Long. 100° 44' 36" E.	
from Junction point named "B"	Lat. 12° 56' 14" N. Long. 100° 44' 36" E.	True Course =022°
to Junction point named "C"	Lat. 13° 00' 00" N. Long. 100° 46' 12" E.	
from Junction point named "C"	Lat. 13° 00' 00" N. Long. 100° 462 12" E.	True Course =037°
to Junction point named "D"	Lat. 13° 06' 20" N. Long. 100° 51' 00" E.	

from Point "D" A/C to 000°(T) up to Anchorage Area or Point "E"

Point "E"	Lat. 13° 07' 00" N. Long. 100° 51' 00" E.

Refer Admiralty Chart No. 986; the "Hulk" in position Lat. 13° 07.7' N., Long. 100° 52.8' E. has been removed.

Vessels should always keep clear of the fairway channel as large bulk carriers sail on deep draft.

PILOTAGE: Compulsory in Sriracha area. Sriracha Pilot Station is established on "Laem Chabang", and can be contacted directly by VHF Channel 16 within 30 miles radius.

Boarding Area: The Government Pilot will board at about 2 miles East of "Koh Thai Ta Mun" which lies South of Kohsichang, or at the position centred on Lat. 13° 07' N., Long. 100° 51' E. with a radius of 1 mile.

On receipt of an accurate ETA vessel will be advised by VHF regarding berthing time, whether to anchor and any likely delays. Flags indicating a request for a Pilot or Pilot on board should be flown. Accommodation ladder required (or in conjunction with pilot ladder).

ANCHORAGES: Recommended anchorage for vessels awaiting berth is within 1 mile of the position: Lat. 11° 04.8' N., Long. 100° 51.0' E. Refer Admiralty Chart No. 3965 and 986.

MAX. SIZE: MBK Bulk berth: 150,000 d.w.t. Draft 14.3 m.
Also see "Tankers".

HEALTH: See "Documents".

RADIO: *Commercial Radio Telegraphy:* (Tel: 5880842-4, 5882689, 5882683).

"BANGKOK RADIO".

Medium wave: Call sign HSA (Hotel Sierra Alpha).
Operating time: 24 hour service.
Traffic: 0700, 0900, 1200, 1500, 1800, 2100 and 2300 hrs. local time.
Calling frequencies: 500 kHz and 512 kHz.
Short wave: Call sign HSA 2 and HSA 3.
Operating time: 24 hour service.
Traffic: 0700, 0900, 1200, 1500, 1800, 2100 and 2300 hrs. local time.
Calling frequencies: 8686 kHz, 8573 kHz and 12800 kHz.

Masters of all vessels proceeding to Sriracha are to notify their Agent by radio of their expected time of arrival at least 3 days prior to arrival. This notice shall be amended in the event of any change in the time of arrival.

In addition to the above, the ETA message shall be confirmed 48 and 24 hours before arrival.

Pilots should be contacted 6 hours prior to arrival and terminals 3 hours prior to arrival.

The first notice of arrival is to contain the following information:
Last Port of Call.
ETA Pilot Station.
Best trimmable arrival S.W. draft.
Number of crew including the Master and his name.
Number of passengers, landing and transit.
Cargo grade and quantities to be discharged.
Discharging rates, barrels per hour.
Bunkers and water on arrival.
Urgent stores to be delivered on arrival, if any.

Bunkers and water to be delivered, if any.
Laundry service, if any.
Nature of any extraordinary repairs to be effected.
Any other matter to be attended to on arrival such as electronic equipment repairs, medical attention or hospitalisation, crew repatriation (in this case advise name, age, nationality, Passport number).
Cash required, if any.
Crew liberty launch service, if any.

VHF: Vessels calling at PTT should call on Channel 13 and advise Supply Operations Division the following:
(a) Name and call sign of vessel.
(b) Flag.
(c) LOA, draft and beam of vessel.
(d) ETA at Terminal.
(e) Nature of cargo, technical name, UN number (if applicable) and quantity.
(f) Distribution of cargo (and that to be left on board).
(g) Is vessel fitted with an Inert Gas System?
(h) Any defects of vessel or its machinery which may affect navigation, safety or the marine environment.

The terminal will also require technical details to the ship's cargo and cargo handling characteristics.

BERTHING: Sriracha Harbour Co.Ltd.:

Location: The terminal is located some 2 mile South of the City of Sriracha, in position Lat. 13° 09.20' N., Long. 100° 53.10' E., from where all usual commercial services can be obtained.

Note: There is no main harbour at Sriracha, which is mainly a fishing port with ferry access to Kosichang.

Pilotage: Compulsory. Pilot available 24 hours. Pilot boards 2 miles East of Kosichang.

Channel: 2.8 km. long with depth 9.0 m.

Max. Size: 70,000 d.w.t. There is no beam restriction.

Depth Alongside: 11.60 m. at LLW. 14.08 m. at MSL.

Pratique: Usual entry formalities available 24 hours.

Tugs: Available through Sriracha Harbour Co. Two tugs are normally used for berthing and one tug for unberthing.

Berths: Outer berth: Length 450 m. Width 40 m.
Inner berth: Length 350 m. Width 40 m.

Cargo Handling: 2×Kone level luffing cranes of 25 tons capacity with electric/hydraulic grabs, clamshells and magnets.

Other equipment: Weighbridges, excavators, mobile cranes, hopper conveyors, road transport, barges and steel skips available.

Bulk handling rates: 4,000 tonnes per day.

Fuel: Available by barge.

Services: All usual services available.

Operator: Sriracha Harbour Co.Ltd., 11th Floor, Glas Haus Building, 1 Soi Sukhumvit 25, (Daengprasert) Klongtoey, Bangkok 10110, Thailand. Tel: (662) 2606469-73. Telex: 84293 NTSRICH TH. Fax: (662) 2606293.

Harbour Office: 31/4 Moo 4, Surasak, Sriracha, Chonburi. Tel: (038) 312262/3. Fax: (038) 312630.

Also see "Shipmaster's Report" and "Report".

TANKERS: *Thai Oil – SBM:* See Part (B).

Thai Oil Sea Berth: See Part (C).

Thaioil Co., Ltd. (Thaioil) Jetty: The following requirements apply to vessels for the use of berthing, unberthing, loading and discharging at Thaioil's Jetty (Location: Lat. 13° 7.3' N., Long. 100° 53.2' E.).

Berth No. 1 (Inner Berth):
Maximum LOA 100.5 m.
Maximum safe draft 4.8 m.
Minimum size of vessel 600 d.w.t.
Maximum size of vessel 5,000 d.w.t., consistent with LOA and draft.

Berth No. 2 (Outer Berth):
Maximum LOA 106.0 m.
Maximum safe draft 5.5 m.
Minimum size of vessel 600 d.w.t.
Maximum size of vessel 5,000 d.w.t., consistent with LOA and draft.

Vessels approaching from the South will cross the submarine crude pipeline to the CBM Berth. This line is marked by a buoy which must be passed to *seaward* to ensure adequate under-keel clearance. Engine(s) must not be used when crossing the pipeline to avoid risk of scouring seabed.

Berth No. 3:
Maximum LOA 83.0 m.
Minimum LOA 60.0 m.
Maximum safe draft 5.5 m.
Maximum size of vessel 2,500 d.w.t., consistent with LOA and draft.

Vessels in fully loaded condition *must approach the berth from the North,* in order not to cross the submarine crude oil pipeline located at the South end of jetty as marked by a buoy.

The use of anchor(s) when berthing is prohibited due to the proximity of the submarine crude oil pipeline.

Berth No. 4:
Maximum LOA 122.0 m.
Maximum safe draft 6.7 m.
Minimum size of vessel 1,000 d.w.t.
Maximum size of vessel 5,300 d.w.t., consistent with LOA and draft.

Berth No. 5:
Maximum LOA 122.0 m.
Maximum safe draft 6.4 m.
Minimum size of vessel 1,000 d.w.t.
Maximum size of vessel 5,000 d.w.t., consistent with LOA and draft.

Berth No. 6 (LPG):
Maximum LOA 122.0 m.
Maximum safe draft 4.5 m.
Minimum size of vessel 600 d.w.t.
Maximum size of vessel 5,300 d.w.t., consistent with LOA and draft.

All Berths: The following conditions apply to all berths:

A mooring boat will be in attendance to run mooring lines and provid assistance for berthing and unberthing. One additional mooring boat fo Jetty No. 3.

Approach speed to the jetty for fully loaded vessels must be th minimum consistent with safe manoeuvring. The jetty has been designe for berth impact of fully laden vessels at 0.3 m./sec., and any excessiv approach speed will endanger the jetty.

Vessels to have derrick S.W.L. 2 tons.

Mooring to consist of 3 ropes forward (head lines and breast) an 3 ropes aft (stern lines and breast), plus one forward and one aft bac spring. Rope size to be 5 in. for vessels under 2,000 d.w.t. and 6 in. fo vessels over 2,000 d.w.t.

Expected discharge rates of vessels is 400 – 600 cu.m./hr. a approximately 120 p.s.i.g.

Remarks:

Should the Thaioil Marine Manager not be satisfied that any of th above requirements have been met, he has full authority to order th vessel off the berth.

Should the Thaioil Marine Manager consider that a berthing operatio will endanger the jetty due to adverse weather conditions or an mechanical defect in the vessel, he has full authority to refuse to allo the vessel to berth.

Esso: 6 buoy conventional mooring owned and operated by Ess Standard Thailand Ltd. Vessels berth heading in either directio depending on the tide at the time of arrival. Max. size: 105,000 d.w.t LOA 274 m. Draft 15.24 m.

2 ship's moorings required to each of 2 head and 2 stern buoys an one ship's mooring to each of 2 breast buoys. These are supplemente by 1 shore "preventer" wire from the 2 head and 2 stern buoys.

1×32 in. submarine line for crude oil with 2 strings of 12 in. hoses.

Ballasting is required during discharge to maintain 30% deadweig at all times. Additional ballast may be required during the S.W. monsoo period 1st June to 31st October. Technical test data for winches/wire required on arrival.

PTT Sea Berth: The PTT Sea Berth consists of a concrete platform wi two breasting dolphins and mooring buoys for head and stern lines.

Vessels berth heading in either direction depending on curren direction, using seaward anchor.

Mooring: 3 head/stern ropes, 3 forward and aft back springs plus on buoy rope to seaward buoy aft.

Night berthing not recommended in view of unlit buoys and platfor

Vessels programmed to this sea island berth are advised that it is t be regarded as an offshore buoy berth as far as shore facilities ar concerned. Access to/from the shore should be by accommodatio ladder rigged on the offshore side of the vessel.

In common with offshore buoy berths and in the absence of any shor standby craft, the vessel's lifeboats to be used for emergency evacuatio of personnel.

PTT Sea Berth No. 4: Max. LOA 235 m. Max. draft 13.5 m. Max. si 60,000 d.w.t. Minimum size 1,000 d.w.t. Products handled: Fuel oil an diesel (2×8 in. and 1×6 in. hoses).

PTT Sea Berth No. 5: Max. LOA 181 m. Max. draft 12.5 m. Max. si 20,000 d.w.t. Minimum LOA 42 m. Only fuel oil handled (1×6 in. hose

PTT Jetties:

Jetty	*Max.LOA* (m.)	*Max.Draft* (m.)	*Max. Size* d.w.t.
1	281	15.0	120,000
2	122	7.5	6,000
6	92	6.8	6,000
7	91	4.9	2,000

Jetty 1: Minimum size LOA 100 m. or 10,000 tonnes s.d.w.t. Maximu distance waterline to manifold 19.20 m. Maximum gas car 80,000 tonnes s.d.w.t. LPG unit is 15.0 m. South of centreline Chicksans. Crude and HSD handled. Crude 2×12 in. hoses, produc 1×12 in. hose.

Jetty 2: Minimum size LOA 40 m. or 500 tonnes s.d.w.t. Absol maximum 6,000 tonnes s.d.w.t. Max. size LPG tanker 2,000 d.w HSD handled. 1×6 in. hose.

Jetty 6: Minimum size 1,000 tonnes s.d.w.t., LOA 40 m. Absol maximum 6,000 s.d.w.t. Crude and HSD handled. 2×8 in. hoses.

Jetty 7: Minimum size 1,000 tonnes s.d.w.t. HSD handled. 1×6 in. ho

General: Qatar Crude Discharge: Considerable delay can encountered in the discharge of Qatar Crude.

In this connection your attention is particularly drawn to any adv given to you on arrival by the Thai Oil Representative.

Back Loading from Coasters: Occasionally vessels are require load cargo from 2,000/4,000 ton coasters at Sriracha. Loading a cargo could take 3 to 4 days and Masters should bear this in mind bunker and fresh water calculations.

Lightening to coasters to make Bangkok Bar draft: On arrival the no VHF contact with shore, as vessel does not take a Pilot, and should proceed straight to an anchorage within about half a mil position 13° 07.6' N., 100° 50.9' E. There may be other vessels in area engaged in ship/ship transfer. Do not rig an accommodation lad as four Yokohama rubber fenders are brought straight out to the ves and 2 lashed each side amidships. Shore officials will board via the ladder to clear the vessel inwards. Accommodation is required Police Officers (one room) and 2 Supervisors with one Customs Of (a second room) throughout the vessel's stay. 8 in. hoses are bro out on the first coasters, connected by a seven man hose handling g and left connected to the ship's manifold throughout the operations gang handles all hose connecting, and mooring, with a crane o provided by the ship. This gang stays onboard most of the time need to be allocated a smoking area. The coasters are programme Bangkok – copies of the programme being put onboard on arrival – can be handled simultaneously one each side. If 2 products are invo usually one side is allocated for a particular product. The coasters moor with lightweight polypropylene lines and are well handled and efficient, capable of loading at about 1,250 tonnes/p.h. There are 4×2,000 d.w.tonnes, and 1×3,500 d.w.tonnes coasters with a round trip taking about 24 hours from departure to return alongside.

TUGS: Local company privately operates 3×2,500 h.p. tugs which are available on calling during working hours, and outside working hours when required if advance notice given.

MEDICAL: Hospital facilities available, advance notice of ETA preferred.

DENSITY: About 1021.

FRESH WATER: Can be supplied by barge at sea berths. 24 hours' notice required to Agent.

FUEL: Can be supplied by barge. 48 hours' notice required.

CUSTOMS ALLOWANCES: 200 cigarettes for each officer, 100 for each crew member for 3 days.

Each man allowed 1 opened bottle wine/spirits.

CONSULS: See "Bangkok".

AIRPORT: Situated about 25 km. from Bangkok, regular international services.

TIME: GMT plus 7 hours. No changes during the year.

SHORE LEAVE: No restriction on crews landing after immigration and health formalities have been satisfactorily completed.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: No facilities available.

WASTE OIL DISPOSAL: No facilities available.

SEAMAN'S CLUBS: None.

CURRENCY: Thai Baht.

DEVELOPMENTS: *Laem Chabang Deep-Sea Port Project:* See "Laem Chabang".

SHIPMASTER'S REPORT: March 1984.

Loading of Tapioca Pellets in bulk at MBK berth:

Vessel: LOA 243.6 m., beam 32.3 m., deck over keel 18.6 m., draft 13.51 m., 74,010 tonnes d.w.t., 8 holds.

Silo with a berth called MBK Berth (Mah Boon Krong), operated by Cargill Ltd., has been in existence for about 6 years.

The berth consists of 3 loading towers with sufficient mooring posts at both ends.

Location of berth: Lat. 13° 08.2' N., Long. 100° 53.1' E.
Distance from shore: 1.6 miles.
Distance between towers: 50 m.
Radius of loading booms: 32 m.
Total loading range: 166 m.
Depth of water alongside: 12.8 m. at LW.
Loading capacity: Loading with 1 tower 350 t.p.h.
Loading capacity with 2-3 towers 600 t.p.h.

A vessel of our size has to be shifted for loading the end holds.

The loading spouts are equipped with trimming machines. The only connection to the shore is a conveyor belt of 2.8 km. length which cannot be used for traffic. All traffic is carried out by boats. Therefore gangways on both sides to be used.

A Pilot/Berthing Master brings the vessel alongside. Berthing with 2 tugs, bow to the North and starboard side alongside using the port anchor.

REPORT: December 1993.

Berth: Siam Seaport.

Operator: Siam Seaport Terminal and Warehouses Co.Ltd., Bangkok.

Located in the Eastern seaboard, the new industrial heartland of Thailand, and about 10 km. by road from the Laem Chabang Commercial Port, is Siam Seaport, a new deep sea terminal, designed specially to handle bulk and breakbulk cargoes. When construction is completed in mid-1994, Siam Seaport will offer an ideal bulk terminal, where vessels of sizes ranging from 5,000 d.w.t. to 60,000 d.w.t. can safely berth all year round. The deep water at Siam Seaport is therefore most favourable to customers needing to transport bulk and breakbulk cargoes in the largest possible vessels.

Berth: Total length: Outer berth 400 m. Inner berth 340 m.

Draft: 12.5 m. basis MSL.

Size of Vessels: From 500 tonne barges up to 60,000 d.w.t. ocean-going vessels.

Equipment: One bulk loader, capable of loading 700 tonnes/hr. of dry bulk commodities, such as raw sugar, tapioca pellets, grain, etc.

Mobile cranes of 20 – 40 tonnes lifting capacity. Luffing shore crane (future). Forklifts, trucks, pay loaders, etc.

Services: Pilotage, waste disposal, tugs, computer processing, security, living quarters, stevedoring, lighting, packing, water, electricity, communications, sea land transport, bonded warehouse, Customs clearance.

Storage: 224,000 sq.m. (140 RAI); 10,000 sq.m. (bulk); 13,000 sq.m. (non-bulk); 10,000 sq.m. of bonded area; 36,000 tonnes of liquid bulk tankage.

AUTHORITY: *Operators:* Thai Oil Company Limited. Refinery: Km. 124.5 Sukhumvit Highway, Au Udom, Sriracha, Cholburi 20230, Thailand. (P.O.Box 2387, Bangkok 10501). *Tel:* (038) 351555. *FAX:* (038) 351554. *Telex:* 85802, 85808 THAIOIL TH. *Contact:* Captain Prasit Khumsribus, Marine Supervisor.

Mah Boon Krong Drying and Silo Co. Ltd., (MBK), Haad Padaeng Surasak, Sriracha Cholburi, Bangkok. *Telex:* 85804, 85805 Mbsilo Th.

Petroleum Authority of Thailand (P.T.T.) *Telex:* 75811 PTT SPT TH.

Sriracha Harbour Co.Ltd. (See "Berthing").

AGENT: See "Part C".

(B) THAI OIL – SBM.

LOCATION: The SBM of Thaioil Co.Ltd. Sriracha is a Catenary Anchor Leg Mooring (CALM) and located between the island of Ko Si Chang and mainland Thailand, in position Lat. 13° 07' 43" N., Long. 100° 51' 45" E.

The water depth is approximately 23 m. (Ref. B.A.Chart No. 986 "Approaches to Ao Udom").

DOCUMENTS: *Documentation/Pratique:* Custom regulations are rather extensive. Customs Clearance will take place onboard upon arrival. No advanced Radio Pratique is permitted. All documents must be prepared and ready for submission upon arrival.

Following documents are required:
For Customs Officials:
6 copies Crew List.
6 copies Personal Belongings List.
6 copies Provision/Stores List.
6 copies Foreign Currency List (ship's and personal).
6 copies Deck/Engine Stores List.
6 copies Arms List.
6 copies Ammunition List.
6 copies Opium and Drugs List.
6 copies Bonded Stores List.
6 copies Passenger List (To be typed, even when no passenger onboard).
For Immigration:
3 copies each Inward/Outward Forms No. 3 and 4.
3 copies Crew List, Immigration Form No. 35.
All Immigration Forms will be handled by Agent on arrival.
For Port Health Authority:
2 copies Vaccination List.
1 copy Maritime Declaration of Health.

PILOTAGE: The Government Pilot and Thaioil Representatives will board the incoming vessel approximately 1.5 nautical miles S.W. of the SBM in the Pilot Boarding Area as indicated on B.A. Chart No. 986.

APPROACHES: *Approach to the SBM:* At the Thaioil SBM in Sriracha, tankers are berthed with the hose strings lying on the port side of the vessel. This configuration was chosen to cater for the general tendency of vessels to swing to starboard (and away from the SBM) when using the engine for astern movements during the final stages of the approach.

Special care is to be taken to prevent collision with local fishermen and/or other vessels under way or at anchor, the area between the mainland and Ko Si Chang being congested with various marine installations and activities.

The final approach is made at the slowest possible speed, keeping the vessel manoeuvrable, and the SBM slightly open on the port side, never ahead, in order to let the tanker pass clear in case of overshooting or if an emergency occurs.

Two tugs, one at each forward shoulder, assist in keeping the tanker's bow steady.

The direction of the approach is governed by wind or current, or a combined effect of both, bearing in mind the vessel's draft and handling characteristics.

Vessels with draft restrictions when passing the Ko Si Chang Bar (i.e. draft between 14.8 m. and 18.2 m.) should generally approach the SBM from the South on an ebb tide. This will enable the vessel to always manoeuvre with sufficient water underneath her keel.

Vessels with drafts below 14.8 m. can be berthed at any stage of the tide, provided they stay in sufficiently deep water. It should be born in mind that the 14.0 m. contour of the sea bed is only 1,400 m. (7.5 cables) to the East of the SBM.

RESTRICTIONS: Berthing and unberthing is carried out at day and night. Berthing restrictions apply to vessels with a draft greater than 14.8 m., which will be berthed on ebb tide only.

All tankers stemmed to discharge at the Thaioil SBM must be equipped with bow chain stoppers and manifold equipment in accordance with OCIMF Recommendations.

Owners assurance will be sought prior to acceptance.

MAX. SIZE: The buoy is designed to accommodate tankers of sizes between 60,000 d.w.t. and 230,000 d.w.t.

Tankers of a deadweight of 320,000 tonnes (part-loaded) could also be accommodated, but may also incur additional draft penalty (See "Draft Information").

Ko Si Chang Transit and Draft Information: The Ko Si Chang Bar Channel for deep draft vessels is defined by the following positions:

From:	Lat. 13° 03' 04" N.,	Long. 100° 48' 47" E.
To:	Lat. 13° 03' 15" N.,	Long. 100° 48' 40" E.
To:	Lat. 13° 03' 40" N.,	Long. 100° 49' 43" E.
To:	Lat. 13° 03' 51" N.,	Long. 100° 49' 35" E.

The maximum loaded draft over the Ko Si Chang Bar channel at any high water is 17.6 m., and calculated as follows:

Chart Datum above LLW	16.7 m.
Accuracy of Sounding	0.4 m. (minus)
Under-keel Clearance	1.5 m.
Rise in Tide	2.8 m. (minimum rise in tide any day)
Maximum draft	17.6 m.

Consequently any vessel with a draft of up to 14.8 m. can cross the bar channel at any time every day.

Although at certain periods of time, the maximum rise in tide can reach 3.9 m., the maximum draft for vessels calling at the SBM is restricted to 18.1 m. by the height of the pipeline end manifold (PLEM) above the sea bed.

Increase in draft beyond 18.1 m. for 'pumping-over-the-tide' is not permitted.

HEALTH: See "Documents".

RADIO: *Information required prior to Arrival:* Vessel's arrival draft and ETA to be given 7 days, 3 days, 2 days and 1 day prior to arrival. Vessels should attempt to arrive on even keel or as close to even keel as possible.

VHF: Initial contact with the Pilot can be made on VHF Channel 16 (Call Sign "Sriracha Pilot"). Once the contact is established, communication will be switched to Channel 13 or 73.

Communication during discharge between ship and shore is carried out by the Thaioil representative on board.

In addition, the ship is to keep a constant radio watch on Channel 13.

TUGS: Tugs are normally not required during berthing or unberthing, but are available for emergencies. 6 tugs of 2,400 b.h.p. and 2 tugs of 1,900 b.h.p. are available.

BERTHING: *Buoy Dimensions:* Diameter 12.0 m. Skirt diameter 16.2 m. Height 5.3 m. Draft 2.6 m. (approx.).

A white navigation light flashing "S" every 6.2 seconds with a range of 5 nautical miles is mounted to the turntable some 7.0 m. above water level.

An octahedral radar reflector with a diameter of 0.5 m. is mounted on top of a steel rope guard some 5.5 m. above water level.

Mooring Arrangement: (OCIMF Standard). Tanker moorings from the buoy comprise of 2×12 in. circumference × 150 ft. (45.72 m.) long double braided circular hawsers, complete with floats and thimbles at each end.

For berthing purposes, the port pick-up rope will be connected to a 150 m. (490 ft.) long 250 mm. (8 in.) circumference messenger rope (first line to pick-up), while the starboard pick-up rope will be connected to a 70 m. (230 ft.) long 250 mm. (8 in.) circumference messenger rope (second line to pick-up).

Only vessels which are equipped to the latest OCIMF Standard, having bow chain stoppers (tongue or hinged bar type) and fairleads are accepted to moor at the SBM.

CARGO OPERATIONS: *Pipeline and Hose:* A 40 in. pipeline of 5.5 km. length connects the SBM with the storage tanks ashore.

Derrick: Refer to OCIMF Standard.

Port derrick to be rigged for hose connection.

Connecting Hoses: Hose connection (2 floating hose strings – diameter 16 in. ANSI) is carried out by shore personnel with assistance of the ship's crew.

After the tanker is safely moored, the hose equipment consisting of rope slings, shackles, gaskets, nuts and bolts, Blake Stoppers and wire strops, are taken on board.

Discharge of Cargo: Only one grade can be discharged at the time, dependent on shore requirements.

The quantity discharged is to be checked and compared with shore on the full hour at 2 hourly intervals.

Throughout the vessel's stay at the SBM, one member of the shore crew is to be stationed on the forecastle to watch the SBM and notify the Thaioil Marine Supervisor before the vessel comes into contact with the SBM. Engines have to be ready on 10 minutes notice.

In the event that the mooring lines become fouled or the SBM hoses trapped between the SBM and the vessel, the SBM mooring launch will be utilised to clear as necessary. The launch remains on stand-by throughout.

Discharge Rate/Pressure: Maximum discharge rates that can be achieved vary between 7,200 cu.m./hr. and 8,300 cu.m./hr. respectively and are dependent on the flow characteristic of the crude oil.

The maximum discharge pressure permitted at the ship's manifold is 10 bar.

Hose Disconnection: This operation is carried out by shore personnel, with the assistance of the ship's crew.

Ballast: Non-SBT tankers below 120,000 deadweight tonnes may be allowed to discharge the entire cargo before taking ballast into the cargo tanks (weather permitting). All other vessels have to maintain a minimum deadweight of 30%.

Masters are advised to commence taking permanent ballast as soon as necessary, to keep the vessel at maximum draft not exceeding 17.6 m.

Crude Oil Washing (COW): Marpol 73/78 Convention requires that crude oil washing be carried out during discharging. Full crude oil washing will be subject to Terminal agreement.

COW is to be carried out in accordance with the ship's COW Operations Manual and the International Safety Guide for Oil Tankers & Terminals (ISGOTT).

I.G. Failure: In the event of a inert gas plant failure, discharge and crude oil washing must be stopped until the I.G. system is fully operational again.

MEDICAL: Doctor, dentist and hospitals are available.

FUEL: All bunkers are available by barge at anchorage only. Quantities are limited unless advanced notice is given. It is recommended to confirm bunker requirements on arrival. Failure to do so may result in cancellation or delay.

FRESH WATER: Available by barge at anchorage only. Minimum order is 200 tonnes, delivery rate approximately 30 tonnes/hr.

REPAIRS: Only minor repairs can be carried out by local workshops or by Bangkok's facilities. Advance notice is necessary since spare parts are difficult to obtain.

Immobilisation: Immobilisation of engines or steering gear is not permitted at any time while the vessel is moored to the SBM. Engines and helm must be made available at short notice (i.e. within 10 minutes).

REPATRIATION: Available via Bangkok. Advance notice on crew member's particulars is required.

SHORE LEAVE: Shore leave is permitted. No passes required. Boat service to be arranged via Agent.

GENERAL:

Berth Security and Safety: Throughout the vessel's stay at the SBM, no other craft (i.e. bunker, water, and stores barge, etc.) is permitted to moor alongside the vessel, the sole exception being the SBM mooring launch.

Accommodation Ladder: Accommodation ladder to be rigged on both sides ready for the Pilot, and later the Government Authorities, to board the vessel.

Shore Personnel: A representative of Thaioil will stay on board throughout the vessel's stay at the SBM. Adequate accommodation and messing facilities should be provided.

Additionally a 6 man shore crew, who are employed to watch the SBM from the forecastle and stand-by for emergency hose disconnection, will remain on board. The shore crew will not need to be accommodated i cabins, but will be satisfied with a room such as the gym or a table tennis room. They will be provided with their own food, but will requir water.

At times, the ship's Agent will provide 2 Marine Police who will requir accommodation and messing facilities.

Stores and Provisions: Available at 48 hours notice. Fresh provision are available in ample quantities and of good quality. Deck/engine store are usually available in reasonable quantities, but selection is limited.

WEATHER:

Current: The main direction of the current runs more or less parallel t the shore line in a Northern direction during flood tide and in a Souther direction during ebb tide. The maximum rate of the current is aroun one knot.

Tide: Refer to British Admiralty Tide Tables – Bangkok Bar/Ko Si Chang

Waves: In stormy weather, the maximum height of waves is 2.5 m. a a wave period of approximately 6 seconds.

Wind:

(a) South West Monsoon season (May to October):
The prevailing wind during South West Monsoon season is from the S.W.
This area is affected by squalls associated with cumulonimbu clouds and thunder storms. The storms can be very severe an peak gusts of 60 knots are not uncommon. The peak gust is brie and the wind settles therafter between 20 – 30 knots. All squal are accompanied by torrential rain.

(b) North East Monsoon season (November to April):
Predominant direction:

November to January	North, East and Variable
February to March	South and East
April	Variable

The velocity of the wind during this period is about 15 knots, and onl rarely increases to 25 knots.

OPERATOR: Thai Oil Co. Ltd.

Head Office: G.P.O. Box 2194, Bangkok 10501. *Tel:* (02) 231-700 *Telex:* 20447, 82695, 84095 Thaioil Th. *FAX:* (02) 231-7111, 7222.

Refinery: Sukhumvit Road, (Km. 124.5), Au Udom, Sriracha, Cholbu 20230, Thailand. *Tel:* (038) 351555. *Telex:* 85802, 85808 Thaioil Th *FAX:* (038) 351554. *Contact:* Thongchai Trakulyingyong, Marin Manager.

AGENT: See "Part C".

(C) THAI OIL – CBM

LOCATION: The Thaioil CBM of Thaioil Co.Ltd. Sriracha, is Conventional Buoy Mooring (CBM) and located between the island Kosichang and mainland Thailand in position (PLEM Lat. 13° 07' 29.8" N., Long. 100° 52' 32.7" E. The water depth approximately 14.5 m. (Ref. B.A. Chart No. 986 "Approaches to A Udom").

DOCUMENTS: See "Part (B)".

PILOTAGE: The Government Pilot and Thaioil Representatives w board the incoming vessel approximately 2.0 nautical miles S.W. of th CBM in the pilot boarding area, as indicated on B.A. Chart No. 986.

RESTRICTIONS: Berthing is carried out in daylight only. Unberthing carried out at any time, weather permitting.

MAX. SIZE: The buoy is designed to accommodate tankers of siz between 30,000 d.w.t. and 120,000 d.w.t., with LOA not below 560 ft. exceeding 900 ft., and a maximum distance from bow to centre manifold of 450 ft.

Draft Information: The maximum safe draft at the CBM at any low wat is 14.62 m. and is calculated as follows:

Chart Datum above LLW	14.63 m.	(48 ft.)
Under-keel Clearance	0.61 m.	(2 ft. minus)
Rise in Tide	0.60 m.	(minimum rise in tide at any day)
Maximum Draft	14.62 m.	

Vessels with a draft greater than 14.62 m. up to a maximum 15.00 m. can also be accommodated, but they have to discharge agai the tide, and it has to be assured that for a minimum of 12 hou immediately prior to berthing, the water level is above 15.00 m., whi due to the non-harmonic type of tide in Sriracha will not cause und delays.

HEALTH: See "Documents" in "Part (B)".

RADIO: *Information required prior to Arrival:* Vessel's arrival draft a ETA to be given 7, 3, 2 and 1 days prior to arrival. Vessels should atte to arrive on even-keel or as close to even-keel as possible.

VHF: Initial contact with the Pilot can be made on VHF Channel Once the contact is established, communication will be switched Channel 13.

Communication during discharge between ship and shore is ca out by the Thaioil Representative on board.

In addition, the ship is to keep a constant radio watch on Channel

TUGS: Tugs are compulsory during berthing or unberthing and available for emergencies. 6 tugs of 2,400 b.h.p. and 2 of 1,900 b. are available.

For vessels with a LOA of 700 ft. and above, 2 tugs are required, of which is to have a minimum of 2,400 b.h.p. and the other 1,900 b. The tugs are made fast on the maindeck at the forward and aft offs shoulder of the vessel respectively.

For vessels with a LOA of up to 700 ft., one tug only is required, w is made fast on the maindeck at the forward offshore shoulder.

BERTHING: *Conventional Buoy Mooring:* The CBM consists of 3 h and 3 stern mooring buoys of cylindrical reclining type, which are sec with a 3.75 in. diameter studlink chain to the anchoring system.

The buoy pattern is effectively one mooring buoy at each corner of the berth, with one further buoy at each end of the central axis of the berth. The "quarter" mooring buoys are located respectively at approximately 60° from the central axis of the berth.

The central axis of the berth lies in direction 024° – 204°.

Mooring Requirements: A total of 18 ship's mooring ropes/wires are required, which makes 3 moorings to each of the 3 head and 3 stern buoys.

The first mooring to each buoy to be a soft rope.

All mooring wires to have nylon pendants/tails.

Mooring: Procedure discussed with Pilot and Mooring Master prior to mooring.

Unmooring: At first the mooring lines are singled up (last on/first off) until one mooring line remains on every buoy. Thereafter the sequence of letting-go is as follows:

(a) Inner aft buoy.
(b) Inner forward buoy.
(c) Centre aft buoy.
(d) Centre forward buoy.

When all these lines are safely inboard, the anchor is hove-in and the two last lines to the outer aft and forward buoys let go.

The tug(s) then push the vessel out of the buoy pattern until she can proceed on her way.

CARGO OPERATIONS: *Pipeline and Hoses:* One submarine crude pipeline of 4.5 km. length and 24 in. diameter connects the CBM with the storage tanks ashore. The pipeline end manifolds (PLEM's) are located directly underneath the PLEM-marker buoys and approximately 15 m. – 22 m. (50 ft. – 75 ft.) from the side of the tanker in the berth.

Two underwater hose strings with a length of 73 m. (240 ft.) and an internal diameter of 16 in./12 in. connect each of the two PLEM's with the ship's manifold. Each hose string consists of 2×30 ft. × 16 in. hoses connected to a 30 ft. × 16 in./12 in. tapered hose and followed by 5×30 in. × 12 in. hoses. The last hose is connected to a special lifting blind flange which terminates in a 30 m. × 0.875 in. diameter studlink chain with 5 equally spaced open links (for lifting), which is connected to the pick-up buoy.

Discharge Rate/Pressure: Maximum discharge rate is 3,600 cu.m./hr.

The maximum discharge pressure permitted at the ship's manifold is 10 Bar.

Derrick: Refer to OCIMF Standard.

Derrick with a minimum SWL of 10 tonnes is required to lift the submarine hoses.

Connecting Hoses: Hose connection (2×12 in. ANSI) is carried out by shore personnel with assistance of the ship's crew.

After the tanker is safely moored, the hose equipment, consisting of rope slings, shackles, gaskets, nuts and bolts, Blake stoppers and wire strops, are taken onboard.

The hoses are lifted and connected one at a time, the inner hose first, dependent on the pipeline to be used for the discharge.

The blind flange at the end of each hose string is connected to a 24 m. long lifting chain, which is made of 4 lengths of chain, each 6.0 m. long, and connected to each other with an open link. The end of the lifting chain is connected to a PVC buoy.

The launch picks-up the buoy and secures the upper open link on deck and brings the hose directly under the derrick head. The derrick runner hook is then secured to the upper open link and the chain is lifted out of the water until sufficient length is available for connecting the derrick runner hook to the second next open link. This procedure is repeated until the hose comes out of the water and sufficient length is available for direct connection to the ship's manifold.

The weight of the hose is then transferred to the snubbing chain by tightening the connecting chain which is shackled to the snubbing chain and securing it in the Blake stopper, which itself is to be secured to the ship's manifold bitts. The blank flange is removed and the hose connected to the ship's manifold. The butterfly valve at the hose end is opened and secured.

After connecting, both hoses are supported by rope slings suspended from the derrick runner hook, in order to maintain a reasonable radius of bend. If necessary, the hoses are lashed on each side of the hose bar to reduce movement caused by swell.

Ship's impressed current cathodic protection – if operational – should be kept on.

Discharge of Cargo: Only one grade can be discharged at a time, dependent on shore requirements.

The quantity discharged is to be checked and compared with shore on the full hour at 2 hourly intervals. If at night the difference between ship and shore exceeds 1,000 cu.m., then the cargo has to be stopped and the cause has to be investigated, in order to ensure that no sub-sea leaks develop undetected.

During discharge, the hoses and the surrounding area should be checked frequently for oil leaks. If any oil leak is detected, the Marine Supervisor, who remains on board throughout the vessel's stay at the CBM, is to be informed without delay.

Crude Oil Washing (COW): MARPOL 73/78 Convention requires that crude oil washing be carried out during discharging. Full crude oil washing will be subject to terminal agreement.

COW is to be carried out in accordance with the ship's COW Operations Manual and with the International Safety Guide for Oil Tankers and Terminals (ISGOTT).

Inert Gas Failure: In the event of an inert gas plant failure, discharge and crude oil washing must be stopped until the I.G. system is fully operational again.

Hose Disconnection: This operation is carried out by shore personnel with the assistance of the ship's crew.

Once cargo has been completed, the ship can close her manifolds. The butterfly valves at the end of the hoses are closed and secured, and the hoses disconnected and blanked-off. The cargo runner hook is connected to the first open link of the lifting chain of the outer hose and the hose lifted clear of the deck, transferring the weight from the snubbing chain. The Blake stopper is removed from the connecting chain and the hose lowered into the water in the same stages as during pick-up. The mooring launch will secure the last open link of the lifting chain on her deck and disconnect the cargo runner hook. The PVC buoy is reconnected and the hose towed clear of the ship's side. The same procedure is repeated for the second (inner) hose, and thereafter the hose gear is lowered into the mooring launch prior to unmooring.

BALLAST: Masters are advised to commence taking permanent ballast as soon as necessary to keep the vessel at maximum safe draft, not exceeding 14.6 m.

MEDICAL: Doctor, dentist and hospital are available.

FRESH WATER: Available by barge at anchorage only. Minimum order is 200 tonnes, delivery rate approximately 30 tonnes/hr.

FUEL: All bunkers are available by barge at anchorage only. Quantities are limited unless advanced notice is given. It is recommended to confirm bunker requirements on arrival. Failure to do so may result in cancellation or delay.

REPAIRS: Only minor repairs can be carried out by local workshops or by Bangkok's facilities. Advance notice is necessary since spare parts are difficult to obtain.

Immobilisation: Immobilisation of engines or steering gear is not permitted at any time while the vessel is moored at the CBM.

REPATRIATION: Available via Bangkok. Advance notice on crew member's particulars is required.

SHORE LEAVE: Shore leave is permitted. No passes required. Boat service to be arranged via Agent.

GENERAL: *Berth Security and Safety:* Throughout the vessel's stay at the CBM, no other craft (i.e. bunker, water, and stores barge, etc.) is permitted to moor alongside the vessel, the sole exception being the mooring launch.

Accommodation Ladder: Accommodation ladder to be rigged on both sides, ready for the Pilot and later the Government Authorities, to board the vessel.

Shore Personnel: A representative of Thaioil will stay onboard throughout the vessel's stay at the CBM. Adequate accommodation and messing facilities should be provided.

Additonally, 6 men shore crew, who stand-by for emergency hose disconnection, will remain on board. The shore crew will not need to be accommodated in cabins, but will be satisfied with a room, such as the gym or a table tennis room. They will be provided with their own food, but will require water.

At times, the ship's Agent will provide 2 Marine Police who will require accommodation and messing facilities.

In additon, 2 surveyors normally stay on board.

Stores and Provisions: Available at 48 hours notice. Fresh provisions are available in ample quantities and of good quality. Deck/engine stores are usually available in reasonable quantities, but selection is limited.

WEATHER: See "Part (B)".

OPERATOR: See "Part (B)".

AGENT: Jardine Pacific (Thailand) Ltd., 81/11 Chermcholpol Road, Sriracha, Cholburi, Thailand. Tel: 66-2-311050, 311587, 312541. Telex: 75807 Alsrajath. Fax: 66-2-321933.

All initial correspondence to be sent to Bangkok Head Office.

NOTES

Please also advise Shipping Guides Ltd.

Togo Republic

KPEME: 06.12 N. 01.30 E. (See Plan)

PORT LIMITS: In accordance with the terms of Charter Party a vessel is considered to be an "arrived ship" when she is anchored between 1 mile and 2 miles from the end of the jetty.

Shipmaster's Report: April 1986.

Notice of Readiness can be tendered when ship is 1.2 nautical miles from jetty.

DOCUMENTS:

2 Crew Lists.
2 Stores Lists.
2 Private Property Declaration Lists.
2 Lists of last 2 Ports of Call.
2 Passenger Lists (if no passengers, 2 lists stating same).
2 Cargo Manifests.

APPROACHES: By day the extremity of the jetty (3 artificial islands and 2 loading machines) forms an obvious landmark.

At night a white light (situated at the extremity of the jetty, 23 m. above the sea) all around horizon – light 3 sec., occulting 1 sec., light 1 sec., occulting 1 sec.

PILOTAGE: The limits of the port of Kpeme are fixed at 1 mile from all points of the jetty. Pilot boards out at the above limits. The Company Pilot and shore gang remain on board while ship is berthed and disembarks when vessel cleared port limits. International code pilot signal used. At night, vessel should anchor between 110° and 180° at least 1 mile from the end of jetty.

VHF: Radio station, call "Kpeme Pilot Station" on Channel 16. Pilot boat grey motor boat without special signals.

ANCHORAGE: Good holding ground (sand and mud) between 14 m. and 16 m.

RESTRICTIONS: Vessels should twice signal the date and probable time of her arrival. The first time 72 hours and the second time 24 hours prior arrival. Vessels berth in daylight only from 0600 hrs. – 1400 hrs. GMT. Unmooring can be effected day and night. Water approaches are clear. Any ship should have both fore anchor cables in perfect order and capable of being used in their entirety. Any ship should be able to leave immediately if she receives order to do so from Harbour Master. With this in mind, engines must be on standby. Ships are not authorised to cross port entrance without a Pilot on board. Winches aft to be in perfect order.

MAX. SIZE: Tankers up to 27 ft. draft on arrival. Bulk carriers up to 38 ft. draft on sailing. Max. length 225 m. Max. breadth 32 m. Height from waterline to hatch coaming 14.5 m.

HEALTH: Send message for Free Pratique within 24 hours of arrival to Port Health Officer, Kpeme.

RADIO: Until vessel within 600 miles, communicate through Portishead Radio, Senlis Radio and Dakar Radio. Within 500 to 300 miles via Abidjan Radio TUA 487 kHz. and within 300 miles via Lome Radio 5VA 472 kHz.

VHF: VHF radio station, call "Kpeme Port" on Channel 16. Also see "Pilotage".

TUGS: No tugs available. 2 mooring launches of 150 h.p. each are at vessel's disposal.

BERTHING: Loading facility comprised of 3 artificial islands carrying conveyor belts (2) for loading phosphate only. They are breasted by a row of 4 dolphins. Vessel moors using port anchor first and then the starboard anchor, and wires to 7 buoys which hold the ship parallel to the dolphins and about 5.0 m. – 10.0 m. off. Springs are run to the dolphins. Each loader delivers at a rate of 1,250 t.p.h. and 2 holds can be loaded at same time.

MEDICAL: Doctor of the Office Togolais des Phosphates at the Factory.

TANKERS: Moor at a special berth situated to the East at 0.4 miles away from the extremity of the phosphate pier. 1 submarine line 12 in. diameter, hose connection 8 in. diameter. At any time sufficient draft for securing and sailing, also fire hoses to be ready rigged on deck.

FRESH WATER: Not available. Vessel has to go to Lome.

FUEL: Not available. Gas oil available at Lome.

OPENING/CLOSING HATCHES: By ship's crew.

CONSULS: Nearest at Lome.

REPAIRS: No facilities available. Emergency repairs could be arranged in Lome.

CUSTOMS ALLOWANCES: 200 cigarettes or 2 oz. tobacco; 1 bottle of spirits. No Customs Authorities board the vessels or seal bonded stores.

REPATRIATION: Possible. Mooring boats have to be used for going ashore.

AIRPORT: Nearest Lome – 8 flights a week to Europe.

TIME: GMT.

HOLIDAYS:

Official Holidays in Togo:

1st January, New Year's Day; 13th January; 27th April (Independence Day), Victory Day; 1st May, Labour Day; * Ascension Day; 15th August, Assumption; 1st November, All Saints' Day; ** Ramadan Day; ** Tabaski (Islamic Holiday).

*Date given by Christian calendar.

**Date given by Islamic calendar.

TELEPHONES: Placed on board, charges included in stay-in-port tax.

SHORE LEAVE: Allowed, but not advisable. See "Restrictions" and "Repatriation".

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: C.F.A. Franc (CFA Fr). FFr 1.00 = 100 CFA Fr.

GENERAL: In the rainy season, high winds and swell may delay berthing operation.

Berthing only performed on an East-going current.

SHIPMASTER'S REPORT: February 1985 (Updated 1996).

Location: Kpeme is situated about 15 miles East of Lome, and abou 115 miles West of Lagos, Nigeria. The position of Kpeme Jetty is approximately Lat. 06° 12' N., Long. 01° 31' E.

B.A. Chart 1861, Cape St. Paul to Lagos Harbour, with Plan, "Rad de Kpeme".

Approaches: The coast Eastward of Cape St. Paul is practicaly featureless, but good navigational marks are Port de Lome Breakwate, and Kpeme Jetty, which show well on the radar at distances of up t 20 miles. No dangers in the immediate approach from any direction. The occulting light on Kpeme Jetty Head is difficult to identify, and shoul not be relied upon, especially in hazy weather.

Documents: The Pilot deals with all port formalities, acting for Customs and Immigration. Documents required are as follows:

2 Crew Lists.
2 Stores Lists, including Bonded Stores.
2 Crew's Effects Declarations.
2 Lists of Ports of Call.
(For the last voyage or last 4 weeks, whichever is longer.)
2 Passenger Lists.
(If Nil, list should be made out with a "Nil" declaration.)

Pilot on board acts as Loading Master and Agent. About 30 minutes after completion of loading, documents are sent to Pilot for Master's signature. At th same time, the vessel singles up to 2 wires forward and aft.

Pilotage: Pilot, sometimes with Assistant Pilot, boards at the Anchorag together with 2 mooring gangs, each under the supervision of a Foreman, who is in constant contact with the Pilot. 2 mooring boats are availabl to assist with mooring. The Pilots remain on board at all times whilst the vessel is at the Jetty and have to be accommodated and fed.

Anchorages: The anchorage area is from 1.0 – 1.2 miles S.E. of Kpeme Jetty Head. Good holding ground, sand and mud; in about 20 m. of water.

Restrictions: All berthing and unberthing operations performed on a East going current only. (Due to the configuration of the berth.) If a vesse happens to be at the berth when a West going current should start, she will remain at the berth until such time as the normal East going stream re-establishes itself. In extreme cases unberthing could be accomplished with the assistance of 2 tugs from Lome.

Max. Size: LOA 232.76 m., breadth 32.2 m., is about the largest vesse handled by Kpeme. Largest vessel normally handled is LOA 225 m., bu vessel was accepted on condition that no cargo was to be loaded int No. 1 hold or aft (extreme hold).

Also see "Loading".

Radio: The usual ETAs and requests for berthing prospects were sen to the Agents, (Office Togolais des Phosphates. Telex: 5214. Cabl Address: Phospat Lome).

VHF: Port Control calls on Channel 16, and works Channel 13. Takes all details of the ship, and any requirements on arrival.

Notice of Readiness: Notice of Readiness Time is taken as the time th vessel actually anchors, and within the confines of the Charter Party.

Berthing: From the anchorage, the vessel approaches the berth in a wide sweep, to arrive about 1 cable off the berth, heading in a Wester direction, when the port anchor is dropped. This is paid out to full scope then the starboard anchor is let go. A headrope is then led to the buo on the bow. Meanwhile, a shore after spring wire is hove up on the aft mooring winch. Using this and also the main engine, the vessel i manoeuvred into position. This also involves heaving up the port ancho and slacking on the starboard anchor cable, to end up with abou 7 shackles on the port anchor and about 4 shackles on the starboa anchor. Vessel then ends up in position for the shiploaders, which is o a heading of about 190° and about 4 m. off a set of small hydrauli fenders which front the islands on which the shiploaders are constructe The mooring gangs then complete the mooring with shore wires.

Loading: Loading is by 2 shiploaders of 1,100 tonnes/p.h. each. Ma airdraft from Datum to loaders is 14 m. Berth is dredged to 14 m. a Chart Datum. Max. draft allowed at the berth is 38 ft. (11.58 m.) Wi these various restrictions, large vessels must berth with practically f ballast, and careful deballasting whilst loading is necessary to ensu that the vessel remains within the acceptable limits of draft and airdra It has to be remembered that the berth is an open roadstead, and considerable swell can sometimes run (up to 2 m.). The berth is design to berth vessel's head directly into the prevailing direction of the swe to reduce rolling as much as possible, even so, there is still a appreciable movement of the vessel, even with little swell running. Al due to the swell, it is very difficult to read the draft with any accura However, the shore weighing facilities for the phosphate are ve accurate, and no real problems were encountered in this direction. (B is based on weight recorded by loaders during loading. No draft surveys

Liaison with the shore is carried out through the Pilot by telephon Terminal staff friendly and very co-operative.

Unberthing: As soon as, or just before the completion of loading, t shore mooring gangs start to single up the shore moorings. As soon all shore wires are let go, the vessel's stern starts to move away fr the berth with the current. The starboard anchor is weighed and th the Port anchor. Whilst swinging clear of the berth, and weighing anch an eye should be kept on the port breast line buoy aft, as it can p quite close to the stern as the ship swings. After the port ancho aweigh, the vessel is moved a little way from the berth, and drifts wa for the Agent to bring out the documents; which usually takes ab 30 minutes.

Medical: Basic medical treatment is available at Kpeme. Hospitalisa can be effected but it is necessary to go to Lome, where there adequate facilities.

Fresh Water: Not available.

Fuel: Not available.

Repairs: No repairs can be carried out. If these are required, ves would have to go to Lome, 15 miles to the Westward.

Repatriation/Airport: There is an International Airport at Lome, repatriation can be arranged if necessary.

Shore Leave: Although not actually prohibited, shore leave is not really feasible, due to the fact that there are no facilities at Kpeme. Also there are no proper arrangements for a liberty boat to be laid on.

Storing: Fresh provisions are available in limited quantities. Rather expensive and of poor to fair quality. Orders taken by Port Control on vessel's first arrival.

AUTHORITY: Office Togolais des Phosphates, B.P. 379, Lome, Togo. *Tel:* (228) 21.39.01 *Telex:* 5214 Fosfat TG, 5287 Otp TG. *FAX:* (228) 21.71.05. 21.71.52. *Contact:* Commandant K. Atefeibu, Harbour Master.

LOME: 06.08 N. 01.17 E. (See Plan)

DOCUMENTS:

13 Crew Lists.
5 Kroo-boy Lists.
5 Passenger Lists.
4 Lists Previous Ports of Call.
1 Maritime Declaration of Health.
1 List of Vaccinations.
1 Set Cargo Manifest and Bills of Lading.
2 Lists of Arms and Ammunition.
1 List of Stowaways onboard.
1 List of Animals onboard.

Togo Port is a free-port so no individual Crew Member Declaration is necessary.

APPROACHES: By night, the approach to the port is assisted by the following 4 lights:

Lome Light: Position 06° 08' N., and 01° 15' E. On top of the big water tower in the village between Lome City and the harbour. Group Fl. (2) white every 10 sec. Vis. 20 miles.

Baguida Light: Position 06° 09.5' N., and 01° 19.5' E. occ. white and red. Light 2.5 sec. occ. 0.5 sec. period 3 sec. Vis. 17 miles. The red light sector (42°) covers the breakwater as well as the old Lome Wharf in position 06° 07' N., and 01° 13.5' E.

Togo Port Entrance: On the head of the main breakwater a red tower is situated in position 06° 08' N., and 01° 17.5' E. Occ. red light 5 sec. every 6 sec. vis. 5 miles.

On the head of the counter-breakwater a green tower is situated in position 06° 08.2' N. and 01° 17.4' E. Occ. green light 5 sec. every 6 sec. vis. 5 miles.

Fairway Buoy: (Light extinguished – will be changed to solar energy in 1996). A red buoy with metallic structure, situated in position 06° 07' N., and 01° 19.94' E. Quick flash red. Vessels entering the harbour have to leave this buoy on the port side. The buoy marks the beginning of the fairway.

By day, large light coloured transit sheds and a high, grey water tower (30 m.) in position 06° 08' N., and 01° 16.5' E. are the first indications of the port from the sea side.

PILOTAGE: Pilots are available 7 days a week and throughout 24 hours. Berthing is possible at anytime on Owners/Master's request, but movements normally commence between 0530 hrs. and 0600 hrs. (sunrise).

The sailing time is not restricted, but ships sailing after midnight have to give a written notice to the Pilot Station at 2200 hrs. latest. The Pilot Station is equipped with VHF radio-telephone listening on Channel 16, 14 and 12, throughout 24 hours.

Call and safety Channel 16. Communications on 12 and 14.

Business languages: French and English.

Only simplex operation, no telephone patch.

The pilot cutter is a dark motorboat with yellow-orange superstructure on whose mast the international signal flag "H" flies. Showing pilot lights after sunset. The boat also has VHF telephone and is accessible on Channel 12.

Pilots board the vessel approximately 0.5 to 1.0 mile Southwards of the breakwater.

Pilots are compulsory for all ships of more than 300 g.r.t.

ANCHORAGES: Vessels which arrive during darkness should anchor about 0.5 to 1 mile South to S.E. of breakwater, in white sector of Baguida light in 15 m., where good holding ground (sand) obtained. Northern boundary of anchorage is red sector of Baguida Light.

RESTRICTIONS: Tankers may only berth during daylight hours but may unberth at anytime. Also see "Pilotage".

MAX. SIZE: The max. length of vessels admitted must not exceed 270 m. The max. draft for the general cargo-quay is 9.5 m. (31 ft.), for the bulk berth 11.5 m. (38 ft.) and for the tanker berth 14 m. (45 ft.)

For the West side of the container quay 11 m. (36 ft.) and the East side 12 m. (39 ft.)

HEALTH: Health Inspector will board on arrival alongside and examine for cases of infectious diseases, after which he will declare vessel Free or not. Vessels entering must fly international quarantine signal "Q".

RADIO/VHF: Lome has a radio coast station. Working frequencies are: 500 and 472 kHz. Call sign "5VA". Also on VHF Radiotelephone Channel 16 and medium wave telephone on 2182 kHz. when requested.

Lome Port has a VHF station working on Channels 16, 14 and 12 day and night. A radio homing transmitter is working on 379 kHz. Signal "LME". Position 06° 10.7' N. and 01° 16.3' E.

Notification of Ship's: Ship's agencies should be informed as soon as possible about the vessel's arrival at Lome. The ETA telegram should contain the ship's length, draft, the quantity of cargo to be loaded and discharged and the number of stevedore gangs required. In addition to that the ship's agency should be advised to inform the Pilot Station as soon as possible.

ETA notification can also be sent by telex directly to the harbour. Telex No. 5243 TGPORT TO.

TUGS: The port has 3 harbour tugs. "Akodessewa", 960 h.p., 17 tonnes bollard pull; "Lome", 1,620 h.p., 24 tonnes bollard pull and "Aneho", 3,000 h.p., 42 tonnes bollard pull.

For all vessels over 500 g.r.t. the tug service is compulsory. Over 10,000 g.r.t. 2 tugboats are compulsory.

All tugs are equipped with following equipment: Radar, fire fighting equipment and VHF radio-telephone. Working Channel 12. On Master's request, the tug can supply a towing wire.

BERTHING: Vessels berth according to their time of arrival in the roads. Priority is however given to passenger ships, Ro/Ro vessels, container ships as well as to vessels having less than 50 tons of cargo for loading/discharging.

The port is protected on the Western side by the main breakwater (1,720 m. long) and on it's East side by the counter breakwater (950 m.).

The general cargo quay is on each side (320 m. long) and has a width of 72 m. 4 berths are available. 3 berths are suitable for ships with max. draft of 9.5 m. (31 ft.) and one for ships up to 7.0 m. (23 ft.) draft and a max. length of 145 m.

The container pier has 2 berths (Berths No. 5 and 6), each 250 m. in length and 145 m. wide. There is 11 m. depth on the West side and 12 m. on the East side.

The bulk berth is situated on the inside of the counter-breakwater. There is space for a vessel of 200 m. with a max. draft of 11.5 m. (38 ft.). There is 6,400 sq.m. of free storage space. A clinker loading installation is able to load 1,000 t.p.h.

A tanker terminal is situated inside the counter-breakwater. Tankers with a max. length of 250 m. and max. draft of 13.50 m. (45 ft.) can berth here. Also see "Tankers".

The fishing port is situated in the Eastern part of the harbour. The length of the quay is 60 m. and the max. draft 2.80 m. This installation has an auction hall of 1,500 sq.m.

The height of the piers at low water is 4.50 m. The average tide difference is 1.20 m.

There is no special Ro/Ro berth available for bow/stern/ramp vessels.

Shed "A" (5,000 sq.m.) is situated on the general cargo pier. There are another 4 warehouses "C, D, E and F", each having 7,500 sq.m. of storage space in the vicinity of the piers. One shed of 1,000 sq.m. is available for dangerous cargo.

Burkina Faso have 2 warehouses of their own, each 5,000 sq.m. Mali and Niger each have one of 5,000 sq.m.

The free-storage space for containers and heavy-lift cargo is about 90,000 sq.m.

Car park for 2,500 cars.

Equipment/Gear: The port is provided with:

Mobile cranes from 10 tons – 60 tons.
Fork-lifts from 2.5 tons – 30 tons.
Toplifter of 30 tons.
Platform Trailers of 40 tons.
Tractors of 60 h.p.
Grain-elevator and Mobile-gangways.

Also container handling gear, trailers, chassis and spreaders.

There are 3 Pilot boats and 2 line-handling boats. On vessel's request, aluminium gangways are available.

Railway: The Togo-Railway (C.F.T.) which serves large parts of the country has an extension of its network into the port. Quay-sides and sheds are connected.

STEVEDORES: Agent should be informed as soon as possible of ship's ETA, length, max. draft, tonnage to load and/or discharge and number of gangs required.

Working Hours: In Lome the working time is as follow:

1. Day shift from 0700 hrs. – 1200 hrs. and 14.30 hrs. – 1730 hrs.
2. 1st shift from 0600 hrs. – 1400 hrs.
   2nd shift from 1400 hrs – 2100 hrs.
   3rd shift from 2100 hrs. – 0600 hrs.

Except Saturdays and holidays when work is possible in overtime.

Furthermore, extra labour is available if required for night work in order to complete loading and discharging operation. All work is done by port stevedores.

MEDICAL: Large hospital situated in Lome with doctors in attendance.

TANKERS:

Societe Togolaise de Stockage Lome:

Max. Size: LOA – 250 m.
Dirty Ballast: Capacity 4,000 tons. Discharge rate 800 t.p.h.
Fresh Water: Available, 30 t.p.h.
Shore Gangway: Available.
Current: None.
Tidal Range: 0.90 m. – 1.50 m.
Nature of bottom: Sand.

Restrictions: Berthing and unberthing at any stage of the tide. Berthing during daylight hours only, unberthing anytime.

Cargo facilities:

Grades handled	*Pipe-line Reference*	*Length (m.)*	*Load/ D'charge Rate t.p.h.*	*Max. Pressure*	*Hoses No.*	*Hoses Size (in.)*
Ballast		1200			1	6
Crude Oil	Brown	4200	1100	7/9 kg/ cu.m.	1	8
Fuel Oil	Black-Brown	4200	1000		1	8
Kerosene	Yellow-Ash	4200	600		1	8
Benzene	Blue-Yellow	4200	800		1	8
Diesel Oil	Yellow-Orange	4200	900		1	8

DENSITY: Density 1025. Harbour open to sea.

FRESH WATER: Available at every berth except tanker Sealine. Delivery rate 30 t.p.h. Fresh water examined monthly for purity by Sanitary Authority.

FUEL: Diesel/gasoil is available in small quantities. There are 2 bunker spots on the pier. Tank-lorries can supply bunkers at any berth.

FIRE PRECAUTIONS: No extraordinary precautions are required. Vessels with hazardous cargo should declare this on ETA telegram to Agent. During time in port these vessels should take necessary precautions themselves, and all fire hoses should be ready rigged on deck. By day international code signal "B" should be displayed and by night a red light should be shown at masthead or at an all-round visible place. Ships with dangerous cargo have to engage a watchman.

Smoking on berths and within sheds *strictly* prohibited. Infringements of fire regulations punishable by fine.

CONSULS: Ambassadors or Consuls from nearly all major maritime nations at Lome.

REPAIRS: Minor repairs only carried out by local workshops.

DRY DOCKS: Private slipway with 400 tons.

GANGWAY/DECK WATCHMEN: Gangway watchmen and hatch security watchmen available; they wear a distinctive uniform. Also see "Fire Precautions".

OPENING/CLOSING HATCHES: Either ship's crew or dock workers.

CERTIFICATES: All normal ship certificates should be available for inspection.

CUSTOMS ALLOWANCES: Because Togo-Port is a Free Port, no individual declaration by Crew members necessary.

CARGO GEAR: The port has no shore cranes. Ships have to use their own cargo gear. Only mobile cranes for cargo handling on the pier are available.

AIRPORT: Lome International Airport with flights most days to Europe.

TIME: GMT throughout year.

HOLIDAYS:

1st January	New Year's Day
13th January	National Holiday
24th January	Economic Liberation Day
24th April	Victory Day
27th April	Independence Day
1st May	International Labour Day
*	Ascension Day
21st June	Patriots of Pya
15th August	Assumption
23rd September	Agression Day
1st November	All Saints' Day
**	Ramadan Day
**	Tabaski (Islamic Holiday)
25th December	Christmas Day

*Date given by Christian calendar
**Date given by Islamic calendar

All other holidays will be worked in port with supplementary labour charges.

POLICE/AMBULANCE/FIRE: A telephone to contact Police, Fire service and Hospital is available day and night at the Pilot Station or on VHF Channel 16. The port is provided with an ambulance car as well as with a fire engine. Services have to be requested at the control tower of the Pilot Station.

TELEPHONES: 3 public telephones within the port limits. No telephones on board.

SERVICES: No tank cleaning or compass adjusting available.

IDENTIFICATION CARDS: Shore landing passes issued by port police on exchange of crew I.D. cards at the port gate.

DELAYS: Ships berth in rotation of arrival at anchorage. Priority given to passenger ships as well as to vessels having less than 50 tons of cargo for discharge.

GENERAL: *Port and Lome Town:* The Port Autonome de Lome is the only harbour of the Republic of Togo. There is a bulk phosphate jetty at Kpeme (position 06° 12' N., and 01° 31' E.).

Lome is the capital of the country and has 1,000,000 inhabitants. The port is situated about 5 km. East of the city. Taxis are available at the entrance of the port.

All shipping agencies and 2 banks maintain offices within the port premises.

On ship's request, a ship chandler comes onboard in order to provide fresh food and bonded stores.

Currency: The money in circulation is the Franc CFA. (100 CFA = 1 NF).

Seamen's Club: A modern seaman's club with swimming pool, video-room, library, hotel and bar is situated 0.6 km. away from the main gate of the port, and is at ship's crews disposal.

SHIPMASTER'S REPORT: July 1978 (Updated 1990).

Documents: A mooring boat is available to Agents for the collection of documents on the Roads given prior notice.

Max. Size: Berth No. 1, depth 7.5 m. Berth No. 2, depth 10.5 m. Berth No. 3, depth 9.5 m. Berth No. 4, depth 9.5 m. Berth No. 5, depth 11.5 m. Berth No. 6, depth 12.0 m.

Allowance is made for swell hence the max. draft at No. 6 is 39 ft.

Health: Free Pratique can be obtained from the roads if all documents are sent to Agents concerned with directions for distribution.

Radio: Lome Radio has been out of commision since May, 1978, and may continue thus until further notice unless spares are obtainable from France.

Tugs: There is an additional tug 3,000 h.p., 42 ton bollard pull, fully equipped for fire and salvage. The smaller tug of 17 tons bollard pull, is also equipped for fire-fighting.

Tankers: Berth No. 6 on Western side of East Mole with a depth of 13.5 m. and max. draft allowed of 39 ft.

Fuel: Gas Oil available ex-road tankers at all berths but full range of fuels to be provided at new tanker berth (No. 6) by August, 1978.

Cargo Gear: While no fixed cranes are available, there is a range of mobile cranes 5×10 tonnes, 1×25 tonnes, 1×45 tonnes and a container tower crane of 70 tonnes. All capacities are reduced by reach and angle while freeboard may limit use still further. A grain hopper and vacuvator gear are in use.

Airport: Flights are frequent, mainly indirect, to and from Europe, with 1 weekly direct to New York.

Consuls: At present there is no British representation in Togo but Consulate may be re-established. Accra is 3/4 hours drive from Lome

Seaman's Club: A large accommodation block offering various room and flatlets is part of the compound. Seamen have priority and at reduce rates. The Home is in the charge of a German pastor and under Germa control and has a VHF set for communication with vessels in the Road It is open to non-seafarers.

Hotels: A wide range of hotels are available including luxury type caterin for the expanding tourist traffic which takes advantage of the uniqu climate for this part of the Gulf of Benin.

Fresh Provisions: Wide choice and good quality but not cheap. It i advisable to have samples brought onboard before ordering.

Delays: While there is no registration as such, certain vessels on regula trade, plus those with cargoes qualified as important, do get priority an all are subject to the daily (except Sunday) Port Captain's Meeting a which all elements are represented. The results are not available unt 1300 hrs. after which most Agencies communicate by VHF to the vessels in the Roads. Container ships and Ro/Ro ships have a priorit

Working Hours: Gangs work 0600 – 1400 hrs.; 1400 – 2200 hrs. an 2200 – 0600 hrs. daily except, there is no 2200 – 0600 hrs. shift o Sunday nights. Each has a half hour break after 4 hours working.

Surveyors: The Port Captain and Senior Pilot, represents Germanische Lloyd. There is no Lloyd's representative.

General: Lome is the entry port for Niger and Upper Volta as well a Western Ghana so the road and rail traffic is considerable. The borde with Ghana is on the Western side of Lome City. A re-entry visa i necessary when proceeding to Accra and takes 1 or 2 days to proces The Ghana Border Police can issue 1 day Visitors' passes.

Tonga (Friendly Islands)

NUKU'ALOFA: 21.08 S. 175.12 W. (See Plan)

DOCUMENTS:
Immigration:
2 Crew Lists.
2 Passenger Lists.
Customs:
2 Crew Lists.
2 Passenger Lists.
1 Bond List.
3 Cargo Manifests.
Quarantine:
1 Crew List.
1 Crew Effects List.
Agents:
1 Crew List.
1 Passenger List.
3 Cargo Manifests.

PILOTAGE: Order through Agents at least 24 hours prior to arrival. Pilot boat may be contacted on R/T 1 hour before arrival at Pilot Station. This position is indicated on B.A. Chart (Approaches to Nuku'alofa). There are 2 approaches, namely the Ava Lahi Passage and the Piha Passage. Vessels using Piha Passage are limited to a length of 100 m.

Vessels may anchor in the vicinity of Buoy No. 1 if required to await Pilot, but this is not normally necessary as the Pilot is available as requested. Pilot boat carries usual signals.

ANCHORAGES: Vessels may anchor wherever they wish within the port, subject to the approval of the Secretary for Marine and Ports.

MAX. SIZE: Length unlimited, beam unlimited, draft 40 ft.

HEALTH: Radio Pratique may be requested from "Tongamed", Nuku'alofa. Any suspected disease or fever must be reported by radio.

TUGS: Tugs available after October 1994.

BERTHING: Queen Salote Wharf, Berths No. 1 and 2 are the only international berths in Nuku'alofa. Berth No. 1 length 93 m. and Berth No. 2 length 110 m.

STEVEDORES: There is a Master Porter employed by the Queen Salote Wharf Administration, who will supply whatever gangs are required. The number of hatches to be worked and the tonnage of cargo must be passed by the Agent to the Secretary for Marine and Ports at least 24 hours before vessel arrives.

MEDICAL: It is advisable to inform Agent in advance should medical attention be required. Hospital facilities are available. Vaccination Certificates are required for visitors who are staying. Ship's crew do not require them generally.

DENSITY: 1025 at all states of tide.

FRESH WATER: Available Queen Salote Wharf at 25 t.p.h.

FUEL: A small quantity of light diesel fuel could be supplied, sufficient to enable a vessel to make the port of Suva.

CONSULS:
Embassies and High Commissions:
Australia
China
New Zealand
United Kingdom
Consulates:
France
Germany
Korea
Nauru
Spain
Sweden

REPAIRS: Minor repairs can be carried out in the marine workshop.

GANGWAY/DECK WATCHMEN: Not necessary as entry to wharf is restricted.

OPENING/CLOSING HATCHES: This work is completely optional.

CERTIFICATES: Normal requirements. The Secretary for Marine and Ports may require to inspect cargo gear record.

CUSTOMS ALLOWANCES: A reasonable quantity is allowed by Customs according to expected stay in port. There are heavy penalties for smuggling.

CARGO GEAR: Valid certificates issued by competent authorities are recognised.

REPATRIATION: Crew changes and repatriation possible.

AIRPORT: 25 km. from town. Flights to and from Suva (Fiji) Tuesdays, Wednesdays, Thursdays and Saturdays. Flights to and from New Zealand Tuesdays and Saturdays. Flights to Apia (Western Samoa) Wednesdays and Fridays. Flights to Hawaii Mondays, Tuesdays and Thursdays.

TIME: The local time is 13 hours fast on GMT.

HOLIDAYS: *No work of any description is permitted on the Sabbath. This is strictly enforced.* Public Holidays are: New Years Day; Good Friday; Easter Monday; Anzac Day; Crown Prince's Birthday; Emancipation Day; His Majesty Birthday and Coronation; Constitution Day, His Majesty's Tupou I's Birthday; Christmas Day; Boxing Day.

POLICE/AMBULANCE/FIRE: In an emergency dial 911.

IDENTIFICATION CARDS: Not necessary.

GARBAGE DISPOSAL: The Quarantine Department is responsible for collecting garbage in plastic bags which are then incinerated at the wharf. Charge is T$ 40.00 per vessel more than 25 m. in length. Contact Tel: 24257.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Tongan Pa'anga (T$).

OTHER PORTS: Pangai, Ha'apai Group; Neiafu, Vava'u Group; both these ports are suitable for any size of vessel at anchor. Service is by lighter. Vessels of 400 ft. in length with a max. draft of 22 ft. may berth at Neiafu.

AUTHORITY: Ministry of Marine and Ports, P.O.Box 144, Nuku'alofa, Tonga. *Tel:* 23-168, 23-166, 22-555. *FAX:* 23-733. *Contact:* Captain S.T. Fotu, Secretary for Marine and Ports.

Royal Bank, 3B Chancery Lane, Port of Spain. Tel: 623-4291.
STORING: Can be done by truck or launch. Trucks can go alongside the berths. Forklifts can be used on the jetty. Call on site Customs Officer for information about regulations.
SHIP SUPPLY SERVICE: Chaguaramas Terminals Ltd. Tel: (809) 634-4279 or (809) 634-4223. Fax: (809) 625-4083. They will supply ships anchored in Chaguaramas Bay.
SHORE LEAVE: Normally no restrictions, but shore leave is always a the discretion of Immigration (Tel: (809) 623-8147).
IDENTIFICATION CARDS: Seaman's Book is sufficient.
GARBAGE DISPOSAL: Service is available as requested.
SEAMAN'S CLUBS: The Mariners' Club, Wrightson Road, Port of Spain. Tel: (809) 625-4826 or (809) 627-4873. Most services available.
CURRENCY: Trinidad and Tobago Dollar (TT$).
REGULATIONS: Chaguaramas Terminals is a private port which has limitations on the cargo it can handle.
AUTHORITY: Chaguaramas Terminals Ltd., Chag Terminals Drive, Point Gourde, Trinidad. Mailing address: Chaguaramas Terminals Ltd., P.O.Box 608, Port of Spain, Trinidad. *Tel:* (809) 634-4384/4385, 627-5680. *FAX:* (809) 625-4083. *Contact:* General Manager.

CRONSTADT ISLAND: 10.39 N. 61.38 W. (See Plan)

Terminal owned and operated by Baroid Trinidad Services Ltd. handling bulk barytes and general oilfield supplies.

Vessels from abroad calling at Cronstadt are required to proceed firs to Chaguaramas Bay for clearance formalities.
DOCUMENTS/HEALTH/CONSULS, etc.: Refer to "Port of Spain".
PILOTAGE: Compulsory.
RESTRICTIONS: Berthing/unberthing in daylight only.
MAX. SIZE: 350 ft. length. This size vessel would overhang whar approx. 80 ft. fore and aft. Depth alongside 13.7 m. Longer vessels ca be accommodated with special clearance.
RADIO: North Post Radio Station, call sign "9YL".
VHF: Channel 16.
TUGS: One tug used for berthing if required.
BERTHING: Vessel moored with 2 springs, 3 head and 3 stern lines t dock. Discharging carried out with 80 ton shore crane with 3/4 cu.yd clam shell bucket with capacity for bulk ore.
FRESH WATER: Available by barge.
FUEL: Available by barge.
GARBAGE DISPOSAL: No service available.
WASTE OIL DISPOSAL: No service available.
SEAMAN'S CLUBS: None.
CURRENCY: Trinidad and Tobago Dollar (TT$).
AUTHORITY: Baroid Trinidad Services Ltd., 59 Sackville Stree P.O.Box 765, Port-of-Spain, Trinidad. *Tel:* (809) 625-1691/2/3, 62 2584. *FAX:* (809) 627-5193. *Cables:* Baroid Trinidad. *Contact:* C. Fulle General Manager.

CROWN POINT, Tobago: 11.09 N. 60.51 W. (See Pla

SHIPMASTER'S REPORT: December 1989.

BERTH: National Petroleum Buoy.
CHART: B.A. Chart No. 505.
APPROACHES: Crown Point Lt. and the airport lights make the ar easily identifiable at night.

Crown Point Light structure is conspicuous and the hotels at Milfo Bay are identifiable.

As vessel approaches Tobago she should beware of the stro W.N.W. set. The current sets to the North West past Sandy Point a the sea mooring. The approach to Sandy Point is made from the No on a South-Easterly course. When Sandy Point is abeam to port, a distance of 0.5 miles, alter course to about 150° to close mooring bu

The buoy should be passed close on the port side on a heading 150°. When the vessel is about two thirds of the ship's length past t mooring buoy and Crown Point Lt. bears 080° (0.1 miles – 0.13 mi off the shore) drop the port anchor.

The position of the buoy is Lat. 11° 08.75' N., Long. 60° 50.95' W
ANCHORAGE: If waiting for the boatman, or weather to moderate, g anchorage can be obtained in Milford Bay or Great Courland Bay. Cr ships and a few local fishermen may be encountered in this area.
SHOALS: There is a reef to the South of Crown Point Lt. with a de of 8 m. at Low Water, which shoals rapidly to 2 cables off Crown Po Vessels should take great care when departing from the mooring.
RADIO: At the time of arrival National Petroleum's Radio Station i not manned.

MOORING: The boatman has a 'Piroghue', which is a local type boat with a cabin. He comes from the hotel at Pidgeon Point and first appears about 0600 hrs. This is the best time to arrive as it is generally calm at this time.

The vessel backs down to the buoy with the aid of the thruster and sends 2 good stern lines from either quarter with mooring shackles.

When correctly moored, Crown Point Lt. bears 105° and the ship's head is 150°. In this position the vessel is about 250 m. from the shore and will have 3-4 shackles out on the port anchor.

When moored the depth at the mooring is 14 m. at Low Water.

CARGO OPERATIONS: No hose connections are made during the night time, although pumping at night often takes place.

The ship's floating hose of about 320 m. is towed ashore by the boatman to a hut on the beach below Crown Point Lt. structure. A snap connection is used. The pumping rate is about 300 bbls./hr. The capacity of the shore tanks is 1,800 bbls. (200 tonnes in 2 tanks). Gas oil, Aviation Jet Fuel and Motor Fuel are also handled. The ship's Motorola radio was landed ashore to assist with communications during pumping. The "Drogher" Customs Book was landed with the boatman and National Petroleum had entry made at the airport. There is no shore cargo paperwork.

The shore tanks are topped up about every 3 weeks.

AIRPORT: There are local flights between Tobago and Port-of-Spain every 2 hours from 0615 hrs.

International flights are expected to commence in the near future with wide-bodied aircraft, now that the runway has been lengthened.

It is possible to fly from Crown Point Airport to Port-of-Spain at a cost of Trinidad $100, but one often has to wait during the busy periods which are Sunday afternoons and holidays.

WEATHER: There is generally an off-shore wind blowing, which rises to a fresh breeze around midday.

There is generally an off-shore swell which at times can be quite large but it decreases as the vessel gets closer to the shore.

Squalls are often experienced, especially during the rainy season. Sometimes these squalls can be quite violent and dramatic wind changes may occur. They are usually of a short duration and if about to moor or unmoor it is best to wait until they pass.

GENERAL: The boatman will run crew members ashore and collect them at an appointed time.

As large aircraft may be using the airport in the near future, National Petroleum are under pressure to move the mooring buoy 50 m. South from its present position.

GALEOTA POINT: 10.05 N. 61.01 W. (See Plan)

LOCATION: Galeota Single Buoy Mooring Terminal is located 2.6 miles on a bearing of 208° from Galeota Point Lighthouse, and is an open unsheltered roadstead. Galeota Point is a narrow headland about 210 ft. high and located in Lat. 10° 08' 00" N., Long. 60° 59' 30" W. The lighthouse, mounted on a lattice steel tower located in Lat. 10° 08' 32" N., Long. 60° 59' 40" W., exhibits a light 87 m. above sea level which flashes white every 5 secs. and is visible for 22 miles. The buoy itself exhibits a quick flashing, (1 flash per sec.), red light, 10 ft. high, and visible for 4 miles through 360°.

DOCUMENTS:
Health Declaration (International Health Form to be filled out by Master on arrival).
Derat or Exemption Certificate.
Crew List (4).
Crew Customs Declaration (2).
Register.
Stores List (2) (Signed by Master).
Passenger Manifest (2) (If any passengers are aboard).
Bonded Stores List.
Clearance from last Port.
Manifest (if no cargo, a statement that vessel is in ballast).

ESSENTIAL REQUIREMENTS: MOST ESSENTIAL REQUIREMENTS TO BE MET BY TANKERS LIFTING OIL AT GALEOTA TERMINAL.

1. *Disposal of Ballast:* No dirty ballast will be pumped overboard. A separate ballast disposal line (16 in.) is available at the Terminal to pump ballast to a pit onshore where oil and water can be separated and disposal made.
2. *Notice of Arrival:* Incoming tankers must send ETA via commercial radio at least 72 hours before arrival at Galeota. Local time is GMT minus 4 hours and daylight saving (Summer Time) is not applicable.
3. *Arrival:* Company Loading Master and a Government Pilot if requested by the Tanker's Master will contact all incoming tankers about 3 to 4 miles from Galeota Point on a bearing of 220°/230° from the lighthouse, and will advise the ship's personnel on mooring and unmooring. If the buoy is occupied, or if arriving at night, vessels should anchor at least 1 mile S.W. of the buoy.
4. *Tankers to Have Ready:* (a) 2 nylon or manila messenger lines of not less than 6 in. circumference and at least 300 ft. long, placed at the bow. (b) at ship's manifold there must be equipment capable of lifting the floating hoses. Weight of hose is about 3 tons.
5. *Crew Duties:* The tanker's crew will raise, rig, and operate vessel's derrick and winch for the hoisting of the floating hose. The Terminal crew will connect and disconnect loading hoses.
6. *Tanker's Valves:* Tanker's valves must not be closed against incoming oil stream. At least 1 minute is required to shut down pumps and stop flow of oil from the Terminal storage.
7. *Communication-Emergency:* If ship-to-shore communications fail, a line launch is always alongside and has radio contact with the Terminal Control Centre.
8. *Responsibility:* The Tanker's Master is responsible at all times for the safety of all ship's operations. Galeota Terminal rules and regulations do not contravene International Safety rules such as SOLAS (Safety of Life at Sea) or other maritime regulations such as those of appropriate classification societies. In case of any conflict, the latter shall apply.

APPROACHES:
Port Limits: Approaching vessels should never anchor to the East or N.E. of Galeota Point. A submarine pipeline from a platform in Lat. 10° 10' 24" N., Long. 60° 39' 56" W., enters the Galeota Point area about 0.5 miles Northward of the lighthouse. Vessels should approach from the South-westward and never anchor less than 1 mile from the SBM or between the buoy and the coastline.

Navigational Aids: Galeota Point Lighthouse is located in Lat. 10° 08' N., Long. 60° 59' 30" W., and exhibits a white flashing light every 5 secs. and is visible for 16 miles. The lighthouse is unattended and frequently does not operate. The SBM exhibits a quick flashing red light every second, and is located in Lat. 10° 05' 47" N., Long. 61° 00' 45" W.

Landmarks: Galeota Point appears as an island when approaching from seaward, since it is connected to the island of Trinidad by lower land. Situated on this lower land about 0.5 miles Northward of the lighthouse is the tank farm and processing area.

There are 5 oil storage tanks and they are painted a grey colour.

A small boat harbour is located 0.5 miles due West of the lighthouse in Guayaguayare Bay. The sheet piling type jetty extends seawards, on a bearing of 245°, 1,900 ft. from a point at Lat. 10° 08' 14" N., Long. 61° 00' 00" W. The seaward 300 ft. of this jetty has a controlling draft of 13 ft. at extreme LW.

Vessels approaching from a North through East direction will observe lighted drilling platforms with following locations:

1. Teak "A"	Lat. 10° 10' 24" N., Long. 60° 39' 56" W.
2. Teak "B"	Lat. 10° 11' 41" N., Long. 60° 39' 55" W.
3. Teak "C"	Lat. 10° 10' 29" N., Long. 60° 40' 36" W.
4. Teak "D"	Lat. 10° 02' 12" N., Long. 60° 38' 54" W.
5. Teak "E"	Lat. 10° 10' 26" N., Long. 60° 39' 55" W.
6. Samaan "A"	Lat. 10° 20' 30" N., Long. 60° 40' 47" W.
7. Samaan "B"	Lat. 10° 19' 46" N., Long. 60° 41' 04" W.
8. Samaan "C"	Lat. 10° 19' 47" N., Long. 60° 41' 35" W.
9. Poui "A"	Lat. 10° 06' 35" N., Long. 60° 49' 47" W.
10. Poui "B"	Lat. 10° 06' 55" N., Long. 60° 49' 02" W.
11. Tesoro "A"	Lat. 10° 11' 05" N., Long. 60° 54' 59" W.
12. Cassia	Lat. 09° 55' 00" N., Long. 60° 31' 53" W.
13. Mora	Lat. 10° 10' 49" N., Long. 60° 51' 32.8" W.
14. Immortelle	Lat. 09° 59' 08.3" N., Long. 60° 29' 10.3" W.
15. Flamboyant	Lat. 10° 02' 23.7" N., Long. 60° 24' 46.5" W.

Vessels should exercise caution and keep well clear of these platforms because of unlighted buoys, small boat operations, submarine pipelines, and anchored test barges nearby.

As a safety measure, all vessels proceeding Southbound to Galeota or Northbound from Galeota must pass Southwards of "Poui A", East of "Teak D" and "Samaan A" platforms.

The lighthouse 4 miles to the Southwestward of Manzanilla Point situated on Brigand Hill (Lat. 10° 29.4' N., Long. 60° 51' 32.8" W.) is an excellent landmark for vessels approaching from the Northward. The lighthouse is elevated 712 ft. and exhibits a group flashing (3) white light every 30 secs. and visible for 20 miles.

PILOTAGE: Vessels arriving should approach to within 3 to 4 miles of Galeota Lighthouse on a bearing of 220°/230° and will be met by the Amoco Loading Master and a Trinidad and Tobago Pilot (if requested through vessel's Agent). The Pilot will be stationed on the bridge and will advise the vessel on the approach to the buoy. The Amoco Representative will be positioned in a most advantageous position and will advise the ship's crew on picking up and making fast the floating nylon mooring lines.

Vessels are requested to make a proper lee and to have a pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach the Loading Master's launch. At night, adequate lighting must be rigged overside for the Loading Master to approach the side of the ship and climb the ladder safely.

Raising, connecting, disconnecting and lowering of floating hoses will be performed by the Terminal's crew with the assistance of the ship's crew as advised by the Amoco Loading Master, who will remain on board while the ship is secured to the buoy. The Loading Master will be in direct charge of the portable VHF ship-to-shore radiotelephone communications.

All vessels are required to provide meals and suitable accommodation for the Loading Master and his crew, who will remain onboard from berthing to unberthing at the Mono-Buoy.

If, in the opinion of the Loading Master, the vessel is not equipped with adequate mooring or hose lifting facilities, he will so inform the vessel's Master, and in such event the vessel shall not be brought into the moorings until facilities, lines, or gear are deemed satisfactory.

RESTRICTIONS: The Terminal operates 24 hours per day, 7 days a week. Ships are loaded and unmoored at any hour, weather and other circumstances permitting. Vessels are moored during daylight hours only, however an exception to this rule may be made at the discretion of the Terminal. The Terminal will never be closed due to holidays.

MAX. SIZE: 250,000 d.w.t. Depth of water 95 ft.

RADIO: *Long Range and Radio Communications:* Ships may send their cable(s) to the Amoco office through the commercial station, "North Post Radio/9YL", which is about 10 miles N.W. of Port of Spain. Upon receipt of such cable(s) North Post will immediately relay it to Amoco's office through their Telex system. Messages pertaining to oil liftings should be addressed to AMOCOTRI, Trinidad. If it is necessary to send messages through vessels' Agents or Owners via International Telex Service, then they may be sent to Amoco by using the Telex address "WG 287" (Amoco – Port of Spain).

Cable or Telex messages addressed to Galeota Terminal would undergo the same procedures, but upon receipt in Amoco's radio office in Port of Spain, they will immediately be relayed to Galeota Point by HF/SSB radio teletype channel.

Cables from Galeota Terminal to the ships would be given to Amoco, Port of Spain radio office on the SSB, which will be telephoned to North Post Radio Station.

The coast radio station transmits traffic lists at regular intervals listing the call signs of all ships for which they have traffic on hand. At the end of their traffic lists, the coast radio station starts searching for answers on the frequency bands listed below. Thus, any vessel hearing its call sign in the traffic list, will immediately start calling the coast station on its own working frequency in the same band on which the traffic list has been heard. The searching coast station radio operator would eventually pick up the signals from the calling ship and would pass her his traffic.

Listed below is information on "North Post Radio Station" – 9YL:

Station	*Call Sign*	*Frequency*	*Hours*
North	9YL	(HF) 17184 kHz	1200 hrs. – 1530 hrs. (GMT)
Post		(HF) 12885 kHz	1330 hrs. – 2050 hrs. (GMT)
Radio		(HF) 8710 kHz	0100/0600/0900/1300 1500/1730 & 2130 hrs. (GMT)
		(HF) 6470 kHz	2300 hrs.
		(MF) 476 kHz	0300 hrs. and every 4 hours thereafter.

Medium Short Distances: Ships may contact Galeota Terminal within 3 days before arrival on the marine HF frequencies. Galeota Point listens on 2182 kHz and operates with Amoco's marine units on VHF Channel 8.

Ships equipped with FM/VHF radios may call Galeota Point on Channel 16 and/or Channel 8.

Advice of Arrival: It is important that ships establish radio contact with Amoco when 3 days distant from Terminal and maintain this contact until just prior to arrival at the Terminal. All ships should send a 72 hours ETA message to Amoco giving the best estimates of ship's arrival time at the Terminal. This ETA message should also include a definite statement of the details of any equipment required from shore for connecting submarine hoses to ship's manifold. Further ETA messages should be sent to Amoco when the vessel is 24 hours and 12 hours distant from Galeota Point and at any other time any appreciable change occurs in the original ETA or those subsequent thereto. The 12 hours ETA should include a positive statement regarding ship's Readiness to Load on arrival, and the number of hours that will be required to discharge ballast after the ship is berthed in mooring (See "Ballast").

Ship-to-Shore Communication: Ship-to-shore communication, while ships are in moorings, will be by portable VHF radiotelephone units. The Loading Master will advise Masters and Officers regarding the emergency whistle signals set up for use in event VHF radiotelephone units become inoperative. The use of the ship's radio station and/or battery charging equipment is prohibited during cargo transfer operations.

Ship's Radio Stations: The use of ship's radio equipment while ship is on anchorage in Terminal waters is prohibited by law, unless transmission is made through the local commercial station.

BERTHING:

Single Buoy Mooring: Tankers are loaded by means of a 42 in. pipeline from shore to the SBM which is 2.6 miles offshore. The facility for receiving dirty ballast has been permanently terminated. The loading hoses from the buoy to the tanker consist of 2×20 in. floating hoses, 755 ft. and 790 ft. long ending in 3×12 in. hoses of 90 ft. length. Valves are fitted in the buoy connectors so that the flow in one 20 in. diameter floating hose string can be diverted to the 16 in. diameter underbuoy hose string.

The SBM is designed for maximum tanker size of 250,000 d.w.t. and is located in 95 ft. water depth. The buoy is 11 m. in diameter, 4.8 m. high, and equipped with a navigation light and radar reflector.There is a skirt at the bottom of about 15 m. in diameter.

Ship's Gear: Vessels calling at the Galeota Point must be equipped with 2 nylon messenger lines of a minimum 6 in. circumference and at least 300 ft. long. These lines should be laid out free for running at the bow of the vessel. Warping winch or windlass should be in good working order and adequate to handle 12 in. nylon floating rope under heavy strain. Efficient stoppers must be available to transfer floating nylon from winch to bitts.

Vessels must be equipped to fit flanges on floating hoses which are ASA standards.

Ships must be adequately equipped with blocks, tackle and booms to hoist the floating hoses, each weighing about 3 tons, from the sea surface over the ship's port rail to the manifold, in a safe, efficient and expeditious manner. Ships must also have an adequate supply of nuts, bolts, gaskets, and wrenches to connect cargo/deballast hoses.

Ship's Alertness: The Terminal is an open roadstead, therefore, during the time a ship is moored at the Terminal, the ship's engines and gear must be ready with full power for immediate use.

Vessel at the SBM must be able to clear and shall clear immediately upon advice of the Loading Master or as directed by Amoco's Terminal Superintendent.

Ship's personnel should be at their stations and alert at all times during mooring, unmooring and cargo transfer operations.

Mooring Launches: Amoco maintains launches to assist in mooring and unmooring vessels.

BALLAST: It is the Shipmaster's responsibility to see that no oil (crude, diesel, bunker C, or bilge) is pumped or spilled overboard from the ship. All vessels are required to arrive at Galeota with clean ballast only, which will be discharged overside.

All precautions shall be taken to prevent any loss of oil overboard; drip pans must be in place and used when disconnecting oil hoses from manifolds. The waters in and adjacent to the Galeota Terminal, and Amoco's offshore platforms must *never be polluted.*

As soon as practical after arrival, all vessel's tanks will be inspected. If during first inspection or during loading, it is revealed that ship's tanks are not oil-tight, tanker will be rejected and refused further loading. Ship will not be accepted later for loading unless satisfactory evidence, duly certified by Lloyd's, ABS Surveyors, or other authorised survey agency, of effective repair is submitted.

A vessel must have sufficient ballast for safe manoeuvring and usually one-third of its tonnage is adequate. However, by a careful watch of the weather information and berthing instructions and by a knowledge of the behaviour of his own vessel, a Master may desire to come to the Terminal with minimum ballast.

Shipmaster should be aware that at any time deballasting at sea occurs and has been reported or viewed by Amoco Trinidad Oil Company personnel, the offence will be documented, where possible, by Amoco personnel, and a report submitted to the proper Ministry of Trinidad and Tobago.

In addition to the lights usually displayed, vessels discharging ballast or loading cargo during darkness, will illuminate the area around the ship, to the satisfaction of the Loading Master, in order that any oil on the surface of the sea may be readily detected, and appropriate action taken. Vessels unable to illuminate the sea satisfactorily may not discharge ballast during darkness. Vessels should provide explosion proof flood lights for working on deck during night operations.

Loading and Deballasting Simultaneously: Vessels equipped with a separate system of ballast tanks will be allowed to discharge ballast and load oil simultaneously, providing approval is received from the Terminal Superintendent.

LOADING:

Rate of Loading: Maximum crude oil loading rate through 2×12 in. deck hoses is approximately 40,000 bbls.p.h. The flow is by pump and the line pressure will not exceed 100 p.s.i.

In order to save ship's time, it is requested that ballast water be pumped *as fast as possible* and that the tanker receives oil as fast as it can be delivered, both operations having due regard for safety. It is requested that any impediment (such as "Y's", strainers, or mud boxes) to the flow of oil be removed before arrival at the Terminal. Connections should be provided so that 12 in. ASA deck hoses may be used.

Berthing: Tenders to load crude oil cargo will normally be accepted and the berth will be assigned to vessels in order of arrival, provided vessels have nominations for cargo valid at the time and are in all respects equipped and ready to moor. In the event that the berthing is delayed on account of weather, vessels will keep their position in line. Vessels required to leave the port area on account of weather (port closed) should keep in contact with the Terminal via radio in order that they will be available when the weather moderates. Amoco reserves the right to load vessels "out of turn" following the return of good weather, to the extent that such loading "out of turn" does not materially delay the loading o other vessels in line. For example, in the event that weather makes i necessary for vessels awaiting berth to vacate the terminal and put t sea, Amoco may load another vessel which arrives first after the return of good weather, but before the return of the vessels waiting in line ahead of it. And further, Amoco reserves the right to decline to moor a specific vessel if its condition or facilities are unsafe for mooring o loading, even though the port may be open to other vessels.

Connecting Hoses: After the tanker is securely moored, the floating loading/deballasting hoses must be lifted to the rail with ship's equipmen The two 12 in. hose lifts weigh about 3 tons each. The flange connectio on each hose is for a 12 in. manifold. Hoses are lifted individually by th ship's gear and are connected on the port side. The 12 in. hoses a connected direct to the manifold and tankers should have their manifo fittings available.

The Loading Master and the hose crew will sling and connect th hoses to the vessel's manifold. The ship's personnel are expected t operate the winch and assist where necessary. A deck officer shou be present at all times.

Loading Readiness and Arrival Time: The Company will make eve effort to load vessels upon arrival or as promptly as berth is availab weather permitting.

Vessels are required to provided suitable accommodation for Loadi Master and crew while at the mooring.

Notice of Readiness will not be accepted as at time of arrival, unles the vessel is in all respects ready to load. Arrival time will be conside as the time the Loading Master boards the vessel or the time that vess anchors, whichever occurs first.

Responsibility: The vessel is responsible for the deballasting and loadi The Company Loading Master will advise the vessel in respect to loadi pressures and hazards, but will not direct the loading except as may b necessary to protect the terminal facilities. Manipulation of ship's valv is the direct responsibility of the ship's personnel.

All Masters will ensure that only clean ballast is discharged oversi Periodically, Masters may be requested to flush the floating hose st with sea water to facilitate loading hose replacement.

Oil Valve Control: Caution: The incoming oil stream is controlled onsho and it is extremely dangerous to close a ship's valve against the incom stream. Such a procedure creates excessive pressure, which m damage hose, ship's piping, or Terminal facilities. Vessels will be h responsible for damage resulting from failure to observe this precau

A reduction in loading rate before topping the final tank or tanks m be arranged through the Loading Master by the ship's officer in cha and a normal standby warning should be given about 15 minutes be the shut down of loading operations per normal tanker practice. advice from the ship a minimum of 1 minute is required to stop the f of crude oil.

Emergency Signal: A battery-operated emergency shut down signa expected to be installed in the near future.

Code Flag: During loading or deballasting the International Code F "B" shall be displayed from a topmost signal halyard during da hours. During hours of darkness, a red light shall be displayed. This l should be of a character such as to be visible at a distance of at l 1 mile, and show an unbroken light all round the horizon.

Shore Stops: Requests for the Terminal to stop the flow of cargo pre-determined tonnage will be made verbally to the Loading Ma and Amoco will not be responsible for any error, and in the cas overloading excess cargo will not be pumped back ashore.

Some delays are always incurred when such a shore stop requ made.

MEDICAL: Vessels requiring emergency medical assistance should immediately contact the Terminal, by marine VHF radio, and supply the necessary pertinent information which will be passed on to the vessel's Agent.

Neither medical or hospital facilities are available at Galeota or provided by Amoco. Limited facilities are available in Mayaro, which is about 30 minutes drive and unlimited service is available in Port of Spain which is 2 hour's drive.

FRESH WATER: Only available by barge from Port of Spain.

FUEL: Only available by barge from Port of Spain.

CONSULS: There are no consulates at Galeota; however, consular or diplomatic representatives for most nations maintain offices in Port of Spain.

REPAIRS: Masters of vessels loading or discharging at Galeota Terminal are advised that this port is considered an "Open Roadstead", and under no circumstances may engines be shut down for repairs while their ships are moored to the SBM system. There are no facilities at Galeota Terminal for making vessel repairs, but arrangements may be made through vessel's Agent, to utilise the Port of Spain facilities. It is emphasised that all vessels at the SBM must be in readiness to clear immediately on instructions to do so.

SURVEYORS: Amoco maintains an inspection laboratory at Galeota Terminal and will inspect cargo on specific request of off-tanker companies.

Classification agencies are represented in Port of Spain as follows:

American Bureau of Shipping
Grell and Company Ltd.,
60 St. Vincent Street,
Port of Spain
Lloyd's Register of Shipping
Geo. F. Huggins and Co. Ltd.,
72 – 74 South Quay
Port of Spain

CUSTOMS ALLOWANCES: Each Crew member is allowed to retain in his possession 200 cigarettes and 1 bottle of spirits. The balance must be listed and will be sealed in a locker by the Customs.

TIME: GMT minus 4 hours, and daylight saving (Summer time) is not applicable.

SHORE LEAVE: Disembarkation for personnel of vessels loading at the Terminal is arranged through the vessel's Agent. All personnel going ashore must land at the Amoco small boat harbour. Sufficient crew must be aboard at all times for letting go lines in order to clear the mooring immediately if necessary. Passenger launch services are not available.

WEATHER:

Climate: The climate around Trinidad is generally very good, and is strongly influenced by the N.E. trade winds. Visibility is usually excellent except during passing thunderstorms and the percentage of days with less than 1 mile visibility is very small.

Weather Data and Summary:

Average rainfall	60.0 in.
Mean maximum temperature	87°F
Mean minimum temperature	69°F
Extreme maximum temperature	101°F
Extreme minimum temperature	52°F
Average relative humidity (0700 hrs.)	92%
Average relative humidity (1500 hrs.)	67%

Winds: Winds are predominantly from the N.E. and East (about 90% of the time). The mean velocity is about 8 – 12 knots and infrequently 30 knot winds may be experienced.

Tides: A tidal range on the East coast of Trinidad is 4 ft. – 5 ft., and the tides occur 17 minutes later than Port of Spain.

Sea Conditions: As Trinidad is constantly under the influence of the N.E. trade winds, the seas and swells are predominantly from the Eastern quadrant throughout the year. Wave heights average about 6 ft. – 8 ft. and during a 2-year observation period waves of 11 ft. and higher occurred for as many as 20 days per year.

Currents flow to the N.W. 53%, North 24%, and N.N.W. 14% The currents are not seasonable as currents of 2 to 3 knots are experienced during all months of the year. Average current velocity is about 1.5 knots.

Sea Temperatures: The surface temperature over coastal areas average about 75°F to 80°F in the Winter months and 80°F to 85°F in Summer.

General: Trinidad is an area where buildings have been damaged by earthquakes and the S.W. tip has experienced mud volcanoes and disappearing islands. The rainy season occurs in late Summer and Autumn at which time as much as 15 in. per month may be experienced. Hurricanes are seldom felt in Trinidad and Tobago since these islands are to the South of the storm track.

SAFETY: The vessel's personnel are responsible for the safety of the vessel and must take all necessary precautions, whether or not so advised by the Loading Master, having in mind, the hazards of the operation because of the product being handled, weather conditions and any other circumstances requiring special care or caution.

It should be noted that Amoco Trinidad Oil Co. does not maintain any specialised fire-fighting vessel. However, workboats with limited fire-fighting capability may be available in event of such emergencies.

While the vessel is moored or within the vicinity of the moorings, all vessel's personnel and vessel's operations must comply or be in accord with the following safety rules:

1. The ship's engines must remain ready with full power for immediate use.
2. The Loading Master may request the Master to extend the ship's "No Smoking" areas as conditions warrant. Masters are also requested to instruct their crew not to throw lighted cigar or cigarette butts over the side or out of the portholes. All alleyway doors to passage ways leading to deck areas are to be kept closed during cargo transfer operations.
3. Not less than 1 deck officer and 3 seamen shall be available on deck at all times while vessel is in the mooring system.
4. Power must be available at all times on all deck winches and on the anchor windlass while vessel is in the mooring system.
5. Explosion proof deck lighting must be available for night mooring and loading. A good floodlight will be required to illuminate the area around the cargo hose connections during cargo transfer operations. During the discharge of ballast at night, the sea area around the vessel is to be adequately lighted.
6. All deck scuppers must be plugged tight before connecting the floating and deck hose and remain plugged until all hoses are disconnected.
7. The presence of unauthorised craft alongside is extremely hazardous. Ship's Masters are requested to require all non-Amoco craft to clear ship's side as soon as personnel have been embarked or disembarked.
8. No stores may be handled on the weather deck while ship is loading cargo, discharging dirty ballast, or while any ullage hatches, loading hose, or tank tops are open.
9. No cargo will be loaded while tank tops or ullage hatches are open.
10. During the time a vessel is moored in the Galeota Terminal, a continuous and efficient fire watch must be kept on deck and in the engine room. Fire hose (at least 2 pairs) shall be left out for immediate use at all times while in the berth.
11. In the event of fire breaking out in any part of the vessel, however minor it may be, the fire alarm must be given immediately. This will consist of a succession of long blasts on the ship's whistle, together with a rapid and continuous ringing on the ship's bell.
12. A safety check-off list and Terminal rules for safety will be delivered by the Loading Master.

GENERAL:

Government Officials: Trinidad and Tobago Customs Officials will be stationed at Galeota and in most instances the Customs Officer will also handle the duties of the Quarantine and Immigration Officers. Should Customs Guards be stationed on board vessels while in the moorings, it is expected that ships will provide food for these guards and other officials.

Quarantine Regulations: The rules governing quarantine of vessels are the same found in other ports of the world.

Visitors: Visitors must obtain a special pass from the Amoco Terminal Superintendent and it is strongly recommended they be restricted to a minimum due to the hazards involved.

Supplies: Commissary supplies, as well as steward's stores are not available at Galeota Point, but a limited amount of fresh fruits and vegetables may be purchased at the market in Mayaro, which is 30 minutes' drive from the shore terminal. Unlimited supplies may be purchased in Port of Spain and all arrangements must be made through the ship's Agent.

Bunkers, gas oil, marine lubricants or potable water are not available at Galeota.

Flag: All vessels are required to fly the Trinidad and Tobago ensign on the foremast during daylight hours. TT flags may be obtained from ship's Agent.

Contraband: Amoco prohibits unauthorised craft from coming alongside ships while in the moorings.

To avoid the possibility of undesirable items getting aboard vessels, it is recommended that Masters discourage "bumboats" or similar craft, coming alongside while vessel is in the Terminal vicinity.

Small Boat Harbour: A sheet piling type jetty is used for the harbouring of mooring launches and supply vessels. The entrance is defined, by a spar topped buoy exhibiting a quick flashing red light located 1,700 ft. Southwestward from the end of the jetty. Controlling draft is 12.5 ft. (LW) and 15.5 ft. (HW).

Company's Terminal: The Company's Terminal and marine administrative offices, storage tanks and laboratory for testing stock are located onshore at Galeota Terminal.

Agency: Amoco does not perform any vessel agency functions. Owners of vessels calling at Galeota Terminal must arrange for their own Agent.

OPERATOR: Amoco Trinidad Oil Company, P.O.Box 714, Port of Spain, Trinidad, Trinidad & Tobago. *Tel:* 622-7331. *Contact:* Captain Cyril Semple, Marine Officer.

POINT FORTIN: 10.12 N. 61.42 W. (See Plan)

DOCUMENTS/HEALTH/CONSULS, etc.: Refer to "Port of Spain".

PILOTAGE: Pilotage is compulsory. Pilots board 0.5 miles off main jetty (Lat. 10° 12' N., Long. 61° 42' W.).

ANCHORAGE: There is safe anchorage 0.5 miles off the head of the jetty.

MAX. SIZE: Jetty 2 miles long with "T" head providing two outer berths of 700 ft. length and a depth of 38 ft. 1 inner berth of 300 ft. length and a depth of 35 ft. and other inner berths of 300 ft. length with a depth of 15 ft. 6 in.

1 conventional buoy mooring (6-buoy mooring) of 850 ft. length and a depth of 53 ft. situated 4,819 ft. North off jetty head.

TUGS: Required for berthing at outer berths for vessels of 30,000 d.w.t. and over and for unberthing vessels with a draft of 36 ft. or deeper. Also required for berthing and unberthing at conventional buoy mooring. Launch assists in berthing and unberthing.

BERTHING: Bottom alongside, mud; back pressure (hose), 100 lb; Current, flood S.W., ebb N.E. 2 to 5 knots; rise and fall tide, 4 ft.

MEDICAL: All facilities available.

FRESH WATER: Not available at CBM.

FUEL: Not available at CBM.

FIRE PRECAUTIONS: Normal oil terminal safety precautions applicable.

REPAIRS AND DRY DOCKS: At Chaguaramas.

DIRTY BALLAST: No facilities available. Only small amount (approx. 200 tons) of tank drainings acceptable on jetty and only if fluid at ambient temperature.
GANGWAY/DECK WATCHMEN: Customs guards on duty at ship's side.
CUSTOMS ALLOWANCES: 200 cigarettes, and a moderate amount of spirits.
REPATRIATION: Can be arranged.
AIRPORT: See "Port of Spain".
TIME: GMT minus 4 hours.
TELEPHONES: No facilities for telephones on board.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not required.

SHIPMASTER'S REPORT: April 1977 (Updated 1990).
The Port of Point Fortin is situated in S.W. Trinidad. The light beacon on the "T" pier head is in position Lat. 10° 12' 05" N., Long. 61° 42' 06" W. The port is owned and operated by the Trinidad and Tobago Oil Company Ltd. (TRINTOC), to serve the 100,000 bbls. per day refinery at Point Fortin. A 24 hour communications service is provided, telex via international lines (TRINTOC Point Fortin) or VHF 16 (Call sign: Point Fortin Shipping) working on Channel 11.

Pilotage is compulsory with the boarding area 1 mile seaward from the jetty head. There is 1×1,000 h.p. tug normally available for berthing vessels over 30,000 Summer d.w.t.

Tides in the area of Point Fortin vary in strength throughout the year with a max. rate of 3 knots. Masters are advised to check sea water density for corrected loadline readings. Water density varies throughout the year from salt to fresh.

Engine repairs which entail immobilisation of engines are not permitted when moored at the berths.

Vessel must arrive with clean ballast consistent with safe manoeuvring of the ship. A ballast condition of 25% of the vessel's Summer d.w.t. is recommended.

Only clean ballast may be pumped overboard.

Notice of Readiness is accepted when vessels' tanks are ready to receive cargo.

Bunkers and fresh water can be supplied at all berths except No. 5 (C.B.M.) Stores and laundry facilities are available on request. A diver is available. The only way of getting ashore is by means of a liberty launch. Walking the pipeline bridge is strictly forbidden.

Inward Clearance is effected immediately on arrival by the Port Authorities; the following documents should be available for official use:

Clearance from Last Port.
Derat Certificate.
International Health Certificate.
Declaration and Crew Vaccination Certificate.
Cargo Manifest, if any.
Bill of Lading, if applicable.
List of unmanifested packages, if applicable.
3 copies Arrival Report.
7 copies Crew List.
3 copies Stores List.
3 copies Personal Effects.
Licence for Dangerous drugs, if any aboard.

In the interest of reducing tanker port time, vessels' Masters are advised to request Pratique by Radio prior to their arrival.

Berths:

No. 1 – Draft 37 ft. 6 in. (Loading over tide 39 ft.).
Max. length 700 ft. – Max. berthing displacement 45,000 tons.
Grades handled: Crude oil, Fuel oil, Gas oil, Diesel oil, Kero, LDF, JP4, Platformate. All via 10 in. hoses. Napthanic Oil Residue via 4 in. hose.

No. 2 – Draft 36 ft. (Loading over tide 38 ft.).
Max. length 700 ft. Max. berthing displacement 25,000 tons.
Grades handled: Crude oil, Fuel oil, Gas oil, Diesel oil, Platformate, Kero, LDF, JP4, Mogas. All via 10 in. hoses. (Napthanic Oil Residue via 1×4 in. hose).

No. 3 – Draft 34 ft. 6 in.
Max. length 300 ft. max. berthing displacement 5,500 tons.
Grades handled: Fuel oil, Diesel oil, Gas oil, Kero, Mogas, all of them through 6 in. hoses.

No. 4 – Draft 14 ft. 6 in.
Max. length 300 ft. Max. berthing displacement 3,000 tons.
Berth port side to. Berthing at slack water and flood tide, unberthing at slack water tide and flood tide.
Grades handled: Fuel oil, Diesel oil, Gas oil, LPG, Bitumen, Emulsion (COLAS).

No. 5 – C.B.M., 6 buoys, max. draft 51 ft. max. length 850 ft. Berth starboard side alongside. Daylight berthing only.
Grades handled: Crude oil, Fuel Oil via 2×12 in. hoses.

AUTHORITY: Trinidad & Tobago Oil Co. Ltd.

POINT LISAS (Hydro Agri): 10.22 N. 61.29 W. (Plipdeco Marine): 10.24 N. 61.29 W. **(See Plan)**

(B) POINT LISAS INDUSTRIAL PORT DEVELOPMENT CORP.LTD.

(A) HYDRO AGRI TRINIDAD LTD. (HATL)

DOCUMENTS:
1 copies Crew List.
2 copies Ship's Stores List.
2 copies Passenger List.
The following should be on Trinidad Forms:
2 copies Crew Stores List – Form C2.
2 copies Ships Stores (Bond) – Form C1.
3 copies Immigration Arrival Report – Form P&I 10.
2 copies Unmanifested Cargo – Form C3.
1 copy Declaration of Health – Form P&I 31.
2 copies Arrival Report – Form P&I 53.
1 copy Stowaway List – Form P&I 12.
Ship's Register.
Derat Certificate
Passports.

PILOTAGE: Pilots ordered through Agent; 48/24/12 hour ETA needed. Pilotage is compulsory. Pilots board at Head of Pt. Lisas Channel (Lat. 10° 22' 37" N., Long. 61° 39' 38" W.); Pilot ladder conforming to International Safety Regulations to be supplied by vessel.

Launch hire arranged by Dock Master to take out Pilot to vessels on arrival, and again take off Pilots from vessels on departure.
CLEARANCE: Point Lisas being a port of entry is equipped with resident Customs Officer and Guard. Ships arriving from abroad could proceed directly to Point Lisas as Customs Officer acts for Harbour Master/Port Health. Tel. 636-2020. Immigration Officer boards on arrival.
ANCHORAGE: Safe anchorage 0.25 miles off head of channel. On occasions, when port congested, vessels may be requested to anchor Port of Spain Roads (Lat. 10° 41' N., Long. 61° 33' W.) before proceeding Pt. Lisas.
RESTRICTIONS: No restrictions on night entry – departure.
MAX. SIZE: See "Berthing".
HEALTH: For quarantine if required, or authentication of vaccination certificate, Honorary Port Health Officer could be in attendance at short notice. Tel. 636-2311.
VHF: Pt. Lisas Dockmaster can be contacted on VHF Channels 16, 14 and 12.
TUGS: Molasses, bulk sugar and LPG carriers use a tug to assist in berthing and unberthing at HATL No. 1 Pier. Tug will be ordered by the Agent.
BERTHING: HATL No. 2 Pier (vessels handling bulk sugar, molasses caustic soda and Anhydrous Ammonia in Liquid form), Maximum LOA 550 ft. Maximum draft: 28 ft. LW. Also see "Shipmaster's Reports".

HATL No. 1 Pier (vessels loading LPG and natural gasoline) Maximum LOA 575 ft. Maximum beam 82 ft. Maximum draft 20 ft.
STEVEDORES: If necessary will be ordered by Agents. No ETA t stevedores necessary.
MEDICAL: Advance notice of attention required will assist. Modern hospital facilities available.
FRESH WATER: Only by barge.
FUEL: All grades supplied by barge.
FIRE PRECAUTIONS: When loading LPG. No smoking on pier or o ship's deck.
CONSULS: At Port of Spain.
REPAIRS AND DRY DOCKS: At Chaguaramas 20 miles North o Pt. Lisas.
GANGWAY/DECK WATCHMEN: Customs guards on 24 hours duty a ship's side.
OPENING/CLOSING HATCHES: Normally by crew.
CUSTOMS ALLOWANCES: 200 cigarettes and a moderate amount o spirits.
REPATRIATION: Crew changes and repatriation can be arranged.
AIRPORT: Piarco International Airport – 30 miles from Point Lisa Daily flights to world-wide destinations.
TIME: GMT minus 4 hours.
HOLIDAYS: New Year's Day (January 1st); Good Friday; East Monday; Whit Monday; Corpus Christi; Discovery Day (First Monday August); Independence Day (August 31st); Diwali Day (late Octob early November); Eid-ul-Fitr; Christmas Day (December 25th); Box Day (December 26th); Labour Day (June 19th); Republic D (September 19th). Work is possible, except for Labour Day, Uni Anniversary Day and Christmas Day, on these holidays.
POLICE/FIRE/AMBULANCE: Accidents – Police – Help, 999; Fir First Aid, 998.
TELEPHONES: No facilities for telephones on board.
SERVICES: Efficient maintenance gang available for normal wo tank cleaning, painting, etc.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not required.
DELAYS: Due to congestion, sometimes delays are unavoidable, usu not more than 24 hours.

SHIPMASTER'S REPORT: August 1988.
Vessel loaded ammonia at the Liquids Pier.
Max. draft 28 ft. at LW and if at this draft, vessel can only sail at
Mooring consisted of 2 head/stern lines and 2 breast lines 2 springs at each end and with very long leads.
One tug used.

Connections made by ship's crew (6 in. 300 ASA). Max. loading rate 700 t.p.h. at a temperature of −31°C. Vessel allowed to purge alongside with shore providing hot ammonia vapours.

Ship's brow gangway used.

SHIPMASTER'S REPORT: September 1990 (Updated 1996).

Chart: B.A. Chart No. 482.

Approach: Do not confuse Lisas Hydro Agri Channel with Savonetta Channel. Fedchem Channel has beacons in line 091° which show up well on radar.

Shoreline between the Point Lisas terminals is not as charted, and tends in a Southerly direction more to seaward than charted.

Anchorage: Not within 1 mile of the end of the channel. Vessels generally anchor to the West of both channels, not North or South as indicated on B.A. Chart No. 482, due to the shallower water.

Gulf of Paria is one of the safest anchorages in the Caribbean with no swell, relatively sheltered, fair holding and plenty of room. Watch out for violent wind shifts during rain squalls, especially during the Summer.

Pilot: Pilot for Fedchem only between 0630 hrs. and 1730 hrs. Definitely no night berthing, possible to sail at night if really necessary.

Generally Pilots come from Port of Spain, although recently a Pilot has been stationed at Plipdeco-Point Lisas. There used to be a Pilot stationed at Trintoc-Pointe-A-Pierre, but this has now been discontinued.

Pilot comes out on Fedchem mooring launch, and likes to board 1 mile West of channel, so as to give room for aligning up.

Expertise very good to poor.

VHF: As per ALRS. Fedchem range is very poor.

Tugs: Either from Plipdeco-Point Lisas or Trintop-Pointe-A-Pierre. Tugs from Trintoc cheaper and better, but not always available.

Generally 2 tugs used with tugs lines. They join outside channel.

Entry: Channel is 250 ft. in width. Charted depth is 12.8 m., but minimum 12.5 m., reduced to C.D., found recently between berth and Beacons No. 3 and 4. Current sets North until approximately 1 hour after H.W. at Port of Spain, and sets South until 1 hour after L.W. at Port of Spain.

Around the turn of the tide, eddies are very prevalent, and it is not the safest time to berth.

When entering channel, if course over 6° different from leading marks, abort entry either before Beacons No. 1 and 2, or between Beacons No. 1 and 2 or Beacons No. 2 and 3, where there is still sufficient depth at 13.0 m. Depth fairly consistent.

Berth: Due to channel restrictions and turning basin, maximum size of vessel at Tringen No. 2 is about 50,000 cu.m.

Always port side alongside, swinging in adjacent basin.

Moorings run by launch, only one launch, so mooring can take a while, especially with wires. Moorings good (3, 2, 2) to dolphins and trestle.

Berth is a concrete trestle with good fenders.

Berth for vessels up to about 15,000 cu.m. in lagoon. This is the original berth before Tringen No. 2 was constructed in 1988.

Cargo: Presently only handles the export of refrigerated ammonia.

One Chicksan (12 in. 150 ASA) with 6 in. VRL attached.

Two loading pumps, each 650 t.p.h., and one small circulating pump, are available.

Generally start at minimum rate for one pump at approximately 100 t.p.h. – 200 t.p.h.

Maximum rate with 2 pumps is 1,250 t.p.h. – 1,300 t.p.h.

Product generally warm at around minus 30.5° C. – always make protest.

If vessel arrives to cool down, vapour to flare at ship's expense until ship's tanks around 97%. NH3 purged, then vessel can use VRL to shore tanks. Loading of ships at Lagoon berth has no effect on ships loading at Tringen No. 2.

The S.G.S. Surveyors were good.

Control House at base of jetty, Loading Master is always in attendance during loading.

Either ship's UHF set or Hydro Agri set given.

Facilities: Fresh water available on jetty at a low rate of around 15 t.p.h. Also available by barge from Port of Spain at U.S.$ 8.0 per tonne, but only at anchorage during daylight, order well in advance through Agent.

Stores, taxis, etc. can get as far as the Control House, which is about 200 m. from ship.

Local telephone calls can be made from Control House during normal office hours. Otherwise one has to go to main building about 1 mile away. Overseas calls arranged through Agent.

Most facilities available at San Fernando.

Plant has very good machine shop with skilled mechanical and electrical fitters, who are willing to assist in an emergency.

New berth with a depth of approximately 20 ft. is under construction in the Lagoon for export of gas condensate.

Documents: All Trinidad Forms:

2 copies Crew Declaration.
2 copies Unmanifested Cargo.
3 copies Arrival Report.
1 copy Immigration Landing Report.
1 copy Health Declaration.
6 copies Crew List.
3 copies Cargo Manifest.
1 copy Stowaway List.

Curfew: Curfew in operation from 1900 hrs. to 0500 hrs. on this visit.

SHIPMASTER'S REPORT: May 1992 (Updated 1996).

Berth: Phoenix Park Gas LPG Berth – Hydro Agri.

Chart: B.A. Chart No. 482.

Location: North side of Point Lisas Hydro Agri Lagoon. Complex formerly Fedchem/Grace, now owned by Hydro Agri.

Phoenix Park is a joint U.S./Trinidad operation, using Amoco Gas condensate from the Trinidad East Coast fields, as does adjoining Hydro Agri Plant. Plant and berth situated on land rented from Norsk Hydro. Berth and Plant completed in 1991.

Approximate Plant Position: 10° 22.45' N., 61° 28.8' W.

Pilot: As per other Hydro berths.

Channel: As charted (old Fedchem Channel), well buoyed and lighted. Berthing up to about 100 m. LOA – 24 hours, over about 100 m. LOA daylight only. Vessel swung to head out in inner lagoon.

Sailing up to about 8.0 m. draft, virtually 24 hours. Over 8.0 m., 2 hours either side of H.W. and daylight only, which means one period in 24 hours.

Berth, Turning Basin and Inner Channel depth quoted as 28 ft. (L.W.). We actually found minimum of 30 ft.

Tugs: From Point Lisas Industrial Port. Tugs lines used. 6 hours notice required for tugs.

If unavailable, tugs can sometimes be obtained from Pointe-A-Pierre.

Berth: Concrete pier with breasting dolphins and loading platform. Built to basic standards in 1991. Pier extends from North Eastern shore of lagoon in 271° – 091° direction for about 200 m., just North of and in same approximate line as old leading lights. Centred on 10° 22.6' N., 61° 29.08' W.

Maximum size of vessel accommodated: About 200 m. LOA, 25.0 m. breadth and 8.5 m. draft.

Fendering: Rubber sprung type.

Moorings: For vessels of maximum length, mooring arrangement is not very good (2 head/stern, 2 breast, 2 springs each end). Mooring handled by mooring boat and gang from Hydro Agri Plant.

Loading: Butane and Propane through 8 in. (connection) Chicksan arm with 4 in. VRL flexi-hose attached to hard arm.

	Propane		*Butane*	
	(barrels)	(tonnes)	(barrels)	(tonnes)
Storage	150,000	1,200	100,000	9,200
Production (per day)	4,500	360	3,600	330
Loading (per hour)	4,200	330	4,200	380

SG Propane: 60. 0.5064 – 97% Propane, 1% Ethane, residue Butane.
SG Butane: 60. 0.5725 – 97% I/N Butane, 2% Propane, residue Pentane.

Shore UHF set given, but batteries quickly run down. Shore ended up using ship's set.

Terminal personnel are meant to be in shore office on jetty, but rarely in attendance. Nevertheless quite good cooperation.

Tel: 809-636 1522. Fax: 809-636 6810. Telex: 31351.

Phoenix Park Gas Processors Ltd., P.O.Box 225, Savonetta, Point Lisas.

Bills of Lading received about 2 hours after completion.

SGS Surveyors in attendance on arrival and departure.

General: Fresh Water: Not available alongside, only by barge from Port of Spain and taken at Point Lisas Anchorage.

Telephone: Possible to telephone overseas from Hydro Agri Dock office near berth, but only Monday to Friday from 0800 hrs. to 1600 hrs.

Stores: Friendly talk with Duty Supervisor will allow stores truck onto main pier, which is about 10 m. from ship's side. A fair range available, but watch quality and check all foodstuffs. Prices reasonable if paid in U.S.$ cash.

Gangway: Very poor situation for landing. No shore gangway. We had to use a pilot ladder (always starboard side to).

Airport: About 50 minutes to Piarco International Airport.

AUTHORITY: Hydro Agri Trinidad Limited, P.O.Box 952, Port of Spain, Trinidad. *Tel:* (809) 636-2020. *FAX:* (809) 636-2073, 636-0076.
Contact: Richard de la Bastide, Operations Manager. Ewart Quammie, Dock Master.

(B) POINT LISAS INDUSTRIAL PORT DEVELOPMENT CORP. LTD.

LOCATION: Point Lisas lies on the Western side of Trinidad in the Gulf of Paria, in position Lat. 10° 24.2' N., Long. 61° 29.6' W.

DOCUMENTS:

7 copies Crew List.
2 copies Ship's Stores List.
2 copies Crew Stores List.
4 copies Immigration Arrival Report (supplied on arrival).
1 Declaration of Health (supplied on arrival).
Ship's Register.
Derat Certificate.
Ship's Safety Certificate.
Passports.
Seaman's Identification Cards.

PILOTAGE: Pilotage compulsory. Pilots ordered through Agents. Advice at 120, 96, 72, 48, 24, 12 hours' necessary prior to ETA. Pilots board at entrance of Savonetta Channel Lat. 10° 22' 57" N., Long. 61° 31' 11.2" W. Pilot ladder must conform to International Safety Regulations. Launch hire arranged through Plipdeco Marine to take Pilot on or off vessels.

CLEARANCE: Point Lisas (Plipdeco) is a Port of Entry. On arrival ships may proceed directly alongside or to anchorage for clearance by resident officers.

ANCHORAGE: In-bound vessels may anchor in the anchorage bounded by:

Lat: 10° 23.5' N.	Long: 61° 31.2' W.
Lat: 10° 24' N.	Long: 61° 32.2' W.

Out-bound vessels may anchor in the anchorage bounded by:

Lat: 10° 22.5' N.	Long: 61° 31.2' W.
Lat: 10° 22' N.	Long: 61° 30.2' W.

APPROACHES: *Channel:* See "Berthing".

	No. 11 Northern Extremity Buoy	10° 24' 17.22" N., 61° 29' 57" W.

MAX. SIZE: See "Berthing".

HEALTH: Valid Yellow Fever certificates if last Port of call was in an infected area (or country on Cholera Alert). Quarantine on authentication of certificate available at short notice.

VHF: Plipdeco Marine Channel 16, working frequency Channel 9.

RADAR: Not installed at Plipdeco Marine.

TUGS: 4 Resident tugs available. 2×2,250 h.p. and 2×500 h.p. Towage services ordered by Agent.

BERTHING: The Channel is 1.75 nautical miles long and 152 m. wide. Turning basin 700 m. long and 500 m. wide. Both are dredged to 12.8 m. True course 052.15°. The Channel serves the following terminals:

Berth No.1:
Dock Length: 35 m. (Accommodates vessels up to 25 m.).
Depth: 5.0 m.
Facilities: General and Break Bulk Cargo.

Berth No. 1A:
Dock Length: 30 m. (Accommodates vessels up to 100 m.).
Depth: 6.6 m.
Facilities: General and Break Bulk Cargo, Ro-Ro and Lo-Lo.

Berth No. 2:
Dock Length: 165 m. (Accommodates vessels up to 70 m.).
Depth: 5.0 m.
Facilities: General and Break Bulk Cargo.

Berth No. 3:
Dock Length: 105 m. (Accommodates vessels up to 135 m.).
Depth: 7.5 m.
Facilities: General and Break Bulk Cargo, Ro-Ro and Lo-Lo.

Berth No. 4:
Dock Length: 110 m. (Accommodates vessels up to 170 m.).
Depth: 7.8 m.
Facilities: General and Break Bulk Cargo, Ro-Ro and Lo-Lo.

Savonetta Pier No. 1 (South):
Dock Length: 310 m. (Accommodates vessels up to 240 m.).
Depth: 11.6 m.
Facilities: Specialised installation for loading Anhydrous Ammonia. Maximum rate 1,000 tonnes/hr. Facilities for loading Methanol (700 t.p.h.) and Urea (500 t.p.h.) also available.

Savonetta Pier No. 1 (North):
Dock Length: 115 m.
Depth: 7.0 m.
Facilities: Specialised installation for loading Bulk Lube Oil/Additives.

Savonetta Pier No. 2:
Dock Length: 312 m. (Accommodates vessels up to 180 m.).
Depth: 11.6 m.
Facilities: Specialised installation for loading Methanol in bulk.

Ispat Dock:
Dock Length: 407 m. (Accommodates vessels up to 245 m.).
Depth: 11.6 m.
Facilities: Specialised installation for loading of Direct Reduced Iron. Maximum rate 1,200 tonnes/hr., connected to conveyor system. Also available are 2 Level Luffing Cranes with 25 tons capacity, and facility for discharge of Bulk Iron Ore.

Nucor:
Dock Length: 500 m. (Accommodates vessels up to 245 m.).
Depth: 11.6 m.
Facilities: Specialised installation for discharge of Iron Fines/Iron Carbide.

STEVEDORES: All stevedoring and longshoring labour ordered through Point Lisas Terminals Limited (PLTL).

CRANES: Mobile and track cranes available up to 250 tonnes SWL. Ordered through Agents.

MEDICAL: Advance notice required. Agent will arrange.

FRESH WATER: Available on all berths and ex-barge.

FUEL: Bunkers available ex-barge or road tanker.

FIRE PRECAUTIONS: No smoking at Savonetta Pier No. 1 and 2 or on the open decks of vessels alongside.

CONSULS: At Port of Spain (40 km. from Point Lisas).

REPAIRS/DRY DOCKS: A repair facility is available at Chaguaramas However, competent technicians are available for shipboard repairs Arrangements made through Agents.

SURVEYORS: (1) Cargo Surveyors: Inspectorate, Saybolt and Redwood available.

(2) Surveyors such as Lloyd's, ABS, Bureau Veritas and DNV. Agents will arrange.

GANGWAY/DECK WATCHMEN: 2 Customs guards on duty fo 24 hours aboard all vessels.

OPENING/CLOSING HATCHES: Normally done by ship's crew.

CUSTOMS ALLOWANCES: 200 cigarettes and a moderate amount o spirits.

HOLIDAYS: Work is possible all year.

POLICE/FIRE/AMBULANCE: Accidents, Police help 62 999. Fire and First Aid 62 998. Fire assistance and ambulances are available on the estate through the assistance of Plipdeco.

REPATRIATION: Crew changes and repatriation possible. Agent wil arrange.

AIRPORT: Piarco International Airport, 60 km. from Point Lisas. Daily international flights available.

TIME: Local time is GMT minus 4 hours.

TELEPHONES: No facilities for telephone aboard. However internationa dialling to most countries possible.

BANKS: First Citizens Bank, Point Lisas Industrial Estate, Point Lisas

STORING: Vessels can be stored by barge or truck.

No storing of vessels while loading at Savonetta Pier No. 1.

All storing must be done with Customs approval.

Local riggers and forklifts are available for storing. These may b ordered through local chandlers.

SHORE LEAVE: No restrictions except, for persons not holdin documents which grant entry to Trinidad and Tobago. Prior approval o Ministry of National Security must be arranged through Agents.

IDENTIFICATION CARDS: It is advisable to carry identification whe proceeding on shore leave.

GARBAGE DISPOSAL: At present (March 1996), this service is no available at Point Lisas.

WASTE OIL DISPOSAL: Collection service available. Three tanke trucks, capacity 50 barrels/2250 gallons each. Contact Sirju & Sons Fax: 653-2217.

SEAMAN'S CLUBS: The Mariners Club, Wrightson Road, P.O.Box 561 Port of Spain, Trinidad, W.I. Tel: 62-54826. Open until 2200 hrs. ever day, weekdays from 0900 hrs., Saturday from 1000 hrs. and Sunday from 1400 hrs. Facilities include chapel, TV and video lounge, telephone shop, postage, bar, games, swimming pool and barbeque.

CURRENCY: Trinidad and Tobago Dollar (TT$).

AUTHORITY: Point Lisas Industrial Port Development Corporatio P.O.Box 191, Goodrich Bay Road, Point Lisas, Couva. *Tel:* 809-636-2132, 636-4913. *Fax:* 809-636-4061. *Cables:* Plipdeco, Couva *Contact:* Captain Rawle Baddaloo, Port Manager.

POINTE-A-PIERRE (Oil Terminal and Refinery): 10.19 N. 61.29 W. (See Pla

DOCUMENTS:
5 copies Crew List.
4 copies Stores List.
1 copy Unmanifested Cargo List.
2 copies Crew Declaration.
1 copy Declaration of Health.
1 copy Arrival Report.
1 copy Firearms & Ammunition List.
Derat Certificate.

Officials require accommodation ladder to be rigged, usually on p side, for boarding and clearance.

PILOTAGE: Compulsory. Pilot boards from tug. Pilot ordered by Ag after receipt of ETA. Pilot ladder conforming to International Sa Regulations to be supplied by vessel.

Pilot boards 1.2 miles S.E. of SPM.

ANCHORAGE: Safe anchorage and good holding ground in t roadstead. On account of Pierre Shoal, a 21 ft. patch about 1.75 cab S.W. of the head of the main viaduct, vessels of moderate draft sho approach with the main viaduct bearing more than 075°. The m viaduct consists of pipelines supported by reinforced concrete pil located at Lat. 10° 20' N., Long. 61° 30' W. and extends in a W.S direction for 6,190 ft. from shore.

RESTRICTIONS: Controlling depth in main channel 41 ft. No e restrictions day or night. However, Free Pratique must be obtained. C Lists, Stores Lists, etc., to be presented to local Agents on arrival. Arr vessels must contact Petrotrin, Pointe-a-Pierre on VHF Channel 16 hours prior to arrival for berthing instructions, traffic information, c nominations, etc.

MAX. SIZE: See "Berthing".

Also see "Shipmaster's Reports".

HEALTH: See "Port-of-Spain".

RADIO: Vessels to send ETA messages 72, 48 and 24 hours pr arrival to "Petrotrin Marine Pointe-a-Pierre". Messages should be through one of the following: Chatham (USA), North Post (Trin Barbados or Curacao.

VHF: The Petroleum Company of Trinidad and Tobago Limited mai their own radio station (24 hours). Call "Petrotrin Marine Pointe-a-Pi on Channel 16, working Channel 13.

TUGS: Petrotrin maintains 3 tugs to assist in berthing and unber

BERTHING:

Berth No.	Max. Permissible Draft (ft.)	LOA (ft.)	D.W.T.	Remarks
1	37.5	720	50,000	
2 (North)	37.0	775	63,000	
2 (South)	22.0	350	7,000	Small vessels and barges only
5 (Sea Island)	41.5	900	100,000	
6 (Sea Island)	51.0	950	120,000	
7	30.0	700	35,000	
8 (General Cargo)	28.5	700 (pier length) 70 (pier width)	25,000	

DISCHARGING:
Maximising Cargo Discharge (Squeeze Dry Operations): Due to the current high costs of crude oil the following guidelines should be followed in order to maximise cargo outturn. Special importance should be attached to the discharge immediately preceeding shipyarding. A Representative from the Company will attend vessels periodically in order to advise and assist as required.

General Guidelines for Maximising Cargo Discharge:

1. Inerted vessels capable of Crude Oil Washing must strictly follow the routines set out in their Tank-cleaning Manuals.
2. Stripping operation to be performed twice, first during normal discharge and the second time after all cargo (except partial contents in the aftermost (slop) tank) has been discharged ashore. The Inspector must ensure that vessel is adequately trimmed by the stern during all stripping operations.
3. On completion of normal discharge (except for partial contents in aftermost (slop) tank) and second stripping of all tanks, contents of main deck and drop lines and loading arm connections must be stripped to slop tank. (NB: Air or tank atmosphere must be used to break the vacuum).
4. Line content in all main suction lines must also be dropped into aftermost tanks and all main suction valves in tanks opened to drain suction elbows. On completion of dumping line contents, stripping system to be used to drain cargo remaining in the suction system and pumps back to the slop tank, with tank suction shut.

   This is best achieved by commoning up all main cargo pipelines on the suction side of the main cargo pipelines on the suction side of the main cargo pumps, opening the suction valves to these pumps and cross connecting the suction side of the stripping system to the main cargo line.
5. Where available, open by-pass valves connecting discharge side with suction side of main cargo pumps.

   Note: When vacuum starts building up in the suction system, allow tank atmosphere to enter the pipelines by opening a suction valve in a forward tank.

   It is recommended that one hose or loading arm remains connected to the manifold to which the small diameter deck stripping line (where available) discharges into. This line discharges outboard of the vessel's manifold valve, which of course is left shut during final discharge ashore of slop tank contents using stripping system.
6. The reasons for stripping back line and final tank contents to the aftermost (slop) tank rather than direct to shore are that:
   (a) Operator has better idea when suction is lost (by seeing no increase in slop tank ullage).
   (b) Accurate measurements can be made of total quantity of cargo recovered by operation "Squeeze Dry".
7. On completion of final line and tank draining, discharge contents of aftermost (slop) tank ashore via small diameter deck stripping line, where fitted, or via main discharge line where not.

Check List for Line Draining – Operation "Squeeze Dry":

1. Are following design features available to improve line draining:
   (a) By-pass to connect discharge side with suction side of main cargo pumps?
   (b) Connections from stripping system to both suction and discharge lines of main cargo pumps?
   (c) Vent valves in deck lines near manifold?
   (d) Suction and discharge pressure gauges and stroke counters in stripping pumps?
   (e) Small diameter deck line, for final draining?
   (f) Block valves in stripping line system?
2. Is cargo discharge *completely* finished and all cargo tanks checked by dipping to be well drained?
3. Have contents of tank washing line that was used for COW been properly dropped into slop tank?
4. Are all manifold valves with shore connection (except one if no small diameter line available) shut?
5. Are all valves in deck, pumproom and drop lines open?
6. Are all valves (except tank valves during line draining) in suction lines open?
7. Are all lines dropped in aftermost (slop) tanks?
8. Has air/inert gas been allowed to enter to vessel's line system both at forward end of bottom lines and in the manifold area?
9. Are stroke counters (where fitted), suction and delivery pressure gauges of drain pumps working correctly?
10. Has dropping operation been checked by measuring oil level in aftermost holding or slop tank/tanks?
11. Have all manifold valves been shut after dropping operation?
12. Has valve in small diameter deck line been opened, or where not fitted, has "final" manifold valve been opened?
13. Have stripping pumps been set correctly to drain holding or slop tank ashore through small diameter line (or deck line)?
14. Have all lines in cargo tanks, on deck and in pumproom been set correctly for line draining to holding or slop tank?
15. Has holding or slop tank been properly drained ashore and checked to be well drained by dipping?
16. Has vacuum been allowed to build-up before air/inert gas was let in and has this been done repeatedly?
17. In addition to checking holding or slop tank ullage, are drain pumps checked to see if actual delivery from line draining/tank draining has stopped?
18. Has shore been asked to check delivery of final holding or slop tank into shore system?
19. Have all valves been shut after line draining?

Note: During draining of discharge lines to holding or slop tank, open the non-return valves in the discharge lines (if movable from the outside).

TRANSHIPPING: *Instructions to VLCC Masters from Petrotrin Marine:*

1. Anchor your vessel in designated anchorage with starboard anchor and rig gangway starboard side. Enter and clear vessel in normal manner, co-ordinating all activities via VHF with Petrotrin Marine Superintendent at Shipping Office.
2. Gauge all tanks, determine amount of cargo on board and advise Shipping Office along with A.P.I., temperature and other particulars. Re-secure all tanks. Advise Lightering Vessel A.P.I. and temperatures.
3. Barge will come alongside, port midships. Receive on board 6×30 ft. lengths of 12 in. cargo hose along with necessary reducers, blanks, bridles, straps, etc. Ship's crew must rig 2 strings of 90 ft. long hose connected to your manifolds, and supported by your vessel's boom. Hoses will be tended by your vessel's crew throughout transhipment.
4. A string of 4×11 ft.×21 ft. Yokohama fenders, each separated by 100 ft. length wire will be brought alongside (port). Your forward and after main deck wire springs will be lowered down and secured to the ends of the fender string to secure same alongside. Four of the fender positioning wires will then be lowered from your deck and one secured to each of the fenders. The fender string must then be positioned and secured alongside centred on your manifold.
5. Two additional fenders will then be brought alongside and secured approximately 150 ft. forward and aft of the main fender string to provide additional protection to your vessel in mooring and unmooring the lightering vessel.Two positioning wires will be passed up to your deck from each of these fenders to secure them in place.
6. When lightering vessel comes alongside, your crew must be stationed fore and aft on deck to handle lines. Your bridge should be manned with engines on standby in the event of emergency. During entire transhipment all fire fighting equipment must be rigged and ready. Additional fire fighting equipment and anti-pollution devices will be on harbour tugs and available if needed.
7. A lightering vessel assisted by tugs will come abeam of your vessel and send synthetic lines, one forward, one aft, by launch.

   Your crew must lower heaving lines or messenger lines to launch, then heave lines on board and secure fore and aft on your vessel. Lightering vessel will then be brought alongside and positioned with her manifold approximately 10 ft. – 40 ft. aft of yours. The lightering vessel will then pass her wires (all containing nylon straps) to your vessel and safely secure alongside.
8. After the lightering vessel is safely secured alongside, to your satisfaction, the two hose strings will be passed to her and secured to her manifolds. The lightering vessel will support the hose ends, however, the main support will remain your vessel's boom. Agreeable handling rates, procedures and signals must be agreed upon between the Masters of the vessels involved and the Petrotrin Co-ordinator of the transhipment. Portable VHF radios operating on Channels 16 and 10 will be supplied from ashore. VHF Channel 10 will be used for all ship-to-shore communication.

   Your control room must be manned at all times by a competent individual who must be monitoring Channel 10. Additionally a competent individual (Officer) and a full watch must be maintained on deck to tend hoses, fenders, etc. One man must be stationed at the manifold and in full view of the hoses and other vessel at all times.

   The Petrotrin Co-ordinator and Marine Staff will be available and will assist in all ways possible, however, the responsibility for a safe operation rests with you and your vessel.
9. Upon completion of loading the lightering vessel, your tanks must again be gauged and figures passed to Shipping Office. All tanks must then be secured prior to unmooring of lightering vessel. The Marine Office will co-ordinate handling of necessary cargo documents depending on the destination of the lightering vessel.
10. Hoses will be drained to the lightering vessel, then disconnected, blanked and taken back aboard the VLCC.

    Your crew must again be stationed fore and aft, your bridge manned and the lightering vessel unmoored.
11. The procedure will be repeated for the next lightering vessel.
12. It is anticipated ballast will be taken after the second lightering or as soon as one isolated section is stripped of cargo. Prior to ballasting the Petrotrin Co-ordinator should certify tanks to be ballasted as dry.

ALTHOUGH IT IS IMPORTANT TO MINIMISE DELAYS THIS CONSIDERATION MUST TAKE SECOND PLACE TO PROPER SAFETY PRACTICES AND TO ANY STEPS NECESSARY TO AVOID POLLUTION.

Also see "Discharging".

DENSITY: 1025, (August to November approximately 1023).

FRESH WATER: Available alongside or by barge (if available and adequate notice given prior arrival). Limited in dry season (January-June).

FUEL: Fuel oil, diesel and gas oil supplied ex-pipeline or by barge. Also see "Shipmaster's Report" dated August 1979.

MEDICAL: Advance notice of medical attention preferred. Modern hospital facilities available.

BALLAST: Vessels to arrive with clean ballast. No dirty ballast facilities.

REPAIRS: Almost all types of deck and engine repairs can be carried out.

DRY DOCK: Trinidad Foundry and Fabricating Ltd. located at Chaguaramas.
SURVEYORS: Lloyd's, A.B.S. and N.V.
SPECIAL PRECAUTIONS: *Emergency Alarm:* This safety device is conveniently placed on all docks and is under the control of the jetty personnel. This is used only in cases of emergency and has the effect of stopping all shore pumps immediately it is used. Loud-sounding horns are situated on the hose structures and are sounded by the jetty attendant when urgent attention from the ship is required.
Hose Pressure: The max. discharge pressure allowed on the jetty hose is 100 lbs. Pressure of jetty hose for loading shall not exceed 100 lbs.
GANGWAY/DECK WATCHMEN: An efficient watch must be maintained on deck and in the engine room of all ships in port, and a sufficient number of men must be on board at all times to move the vessel either for harbour operations or in emergency situations.
CUSTOMS ALLOWANCES: 200 cigarettes or 50 cigars or 0.5 lb. tobacco and 1 bottle of spirits.
REPATRIATION: Facilities exist for effecting crew changes and arranging repatriation.
AIRPORT: Piarco International Airport 28 miles (approx.) away from Pointe-a-Pierre, served by international airlines and flights are regular.
TIME: GMT minus 4 hours.
TELEPHONES: On dockside and at all sea berths.
SHORE LEAVE: Regular launch service from ship to Pointe-a-Pierre only, for all crew members.
IDENTIFICATION CARDS: Not required.
GARBAGE DISPOSAL: No facilities.
WASTE OIL DISPOSAL: Shore facilities can accommodate 2,000 barrels of dirty water ballast (slops) per vessel, or material which does not require heating (low pour point).
SEAMAN'S CLUBS: The Mariner's Club (Missions to Seamen), Wrightson Road, Port of Spain. Tel: 62-5426. The Club is approximately 32 km. from the terminal. Facilities: Chapel, T.V. lounge and video films, telephone service, shop, mail and stamps, bar, darts, pool tables, table tennis and swimming pool. Hours: 0900 hrs. – 2000 hrs. Monday – Friday; 1000 hrs. – 2200 hrs. Saturday, and 1400 hrs. – 2200 hrs. Sunday.
CURRENCY: Trinidad and Tobago Dollar (TT$.). U.S.$ 1.00 = TT$.6.00 (Floating Rate).
GENERAL:
Tidal Variation: Rise and fall is approximately 3 ft. 6 in.
Prevailing Winds: N.E. trade winds.
Flags Required: Republic of Trinidad & Tobago and International Code Flags "B", "G", "H" and "Q".
Launches: Launch service to Pointe-a-Pierre for Officers and crew.
Laundry/Provisions: Available.

SHIPMASTER'S REPORT: August 1979 (Updated 1994).
Bunkering:
Approach: (From Passage Book). Trinidad and Tobago Islands observed on radar at 48 miles, although echo masked by clouds, islands observed visually at over 40 miles. Marked by towering Cumulus clouds. Numerous tide rips and abrupt change of colour of water (green) at the 200 m. sounding line.

Good position obtained at a distance 35 miles from Galera Point and Scarborough using visual bearings of Galera Point and Little Tobago and distance off Granby Point.

North coast Trinidad current approximately 1.5 knots West going.

Chupara Point Light not conspicuous during daylight and not seen at night.

Chacachacare Light (Admiralty List of Lights No. 5846) good, seen at 35 miles.

Gulf of Paria can, with moderate sized vessel, be approached through any of the channels of Bocas Dragon. We used Boca de Huevos which was safe, no problems. Parallel Indexing very useful on Point au Diable, Point Braba and Cape Cola.

Serpents Mouth not recommended at night.

Gulf of Paria not very busy, many vessels anchored off Port of Spain.

An intense white light (Fl. ev. sec.) is located on Chimney just South of South Pier at Pointe-a-Pierre (position: Lat. 10° 18' 38" N., Long. 61° 27' 36" W.). B.A. Chart No. 482 seen at 12 miles.

No appreciable current in Gulf of Paria.

VHF: Called "Trintoc Shipping Office Pointe-a-Pierre" (now "Petrotrin" on Channel 16 about 5 miles North of Boca de Huevos Strait, contact reasonable. Working on Channel 13, very prompt.
Anchorage: General anchorage along parallel of 10° 19' North from 3 miles West of Buoy No. 1 (Lat. 10° 19' 06" N., Long. 61° 29' 18" W.) to 0.5 miles off buoy.

We anchored with Buoy No. 1 - 072°×1.0', good position in 17 m.

For bunkers, oil company like vessel as close as possible to No. 1 Buoy, but not closer than 0.5 mile.

Immigration/Customs: Came out very promptly. No difficulties, forms as per "Guide to Port Entry". Must have gangway rigged. Pratique message sent, no answer received, given on arrival.
Bunkering: Trintoc (now "Petrotrin"): Dumb barge of 1,500 tonnes capacity. Delays caused by waiting for harbour tug to bring barge alongside vessel, also delay waiting for tug on completion of bunkering. Contact 'Shipping Office' Channel 16 well before barge finishes in order that they may call tug. We waited for tug for one hour before bunkering and 2 hours on completion.

Diesel 6 in. line, 150 ASA, ship's derrick required.

Rate: Up to 200 tonnes p.h. for diesel.

Films: Walport Films and Vidpack can be changed on prior notice to Agents.

SHIPMASTER'S REPORT: September 1979 (Updated 1994).
Approaches: Deep drafted vessels use Boca Grande to enter Gulf of Paria in which is situated the Pointe-a-Pierre Terminal. An area marked by dotted lines on the chart has been surveyed and declared safe for large vessels and this route should be followed up to the anchorage of Pointe-a-Pierre.
Anchorage: Trintoc (now "Petrotrin") Shipping advise vessel where to anchor when making the approach and on this occasion we used two anchorages whilst waiting, first with the "SBM" bearing 083°T×2.4 miles and the second with La Luc Lt. bearing 334° and Radio Mast bearing 110°. At both anchorages vessel used 6 shackles on starboard anchor in about 60 m. of water. Bottom, heavy glutinous mud which gives good holding ground. The deepest draft vessel which arrived in the port was drawing 73 ft. and appeared to have no difficulty anywhere.
Navigational Restriction: VLCCs are required to advise Harbour Master, Trinidad, of their time of arrival off Boca Grande, 24 hours before arrival so that other vessels can be advised to give a clear berth. On approach to Boca Grande vessel can contact North Post Radio on VHF to confirm transit time and receive information of other movements. Our ETA was broadcast 3 hours out.
Port Officials: Customs and Immigration board with Agent and clear vessel inwards. No special requirements. Bond is sealed but Customs will board to make crew issues after each 7 days if requested through Agent. Port Health work is carried out by Agent and we renewed Derat Certificate. Shore Leave Passes are issued by Immigration and are of two types, one for Officers which allows them to use the Pointe-a-Pierre jetty to land and also the Trintoc (now "Petrotrin") Club and one for the crew which only allows them to land at Pointe-a-Pierre jetty.
Shore Leave: (Launch cost TT$11.00 per hour of stay). A fast launch calls at the ship every two hours, day and night, to take personnel to Pointe-a-Pierre. The launch can be contacted on VHF Channel 15 or 16. We found that by advising them of whether we had crew to go ashore before they arrived at the ship we received better service. Officers wishing to go to the club could get a separate launch arranged by Trintoc (now "Petrotrin") Shipping (when available) direct to Pointe-a-Pierre.
Bunkers: Bunkers are supplied by barge of 30,000 bbls. capacity. Pumping rate is very slow, we had 3 separate lifts and the average rate was about 150 t.p.h. The barge also has capacity to supply good fresh water if previously arranged through the Agent, which is more economical and better quality than in the official water barge.
Fresh Water: Normal source of supply is by barge from Port of Spain which requires about 4 days' advance notice. Cost of supply is TT$3,000 no matter what quantity you require and we found the water supplied was heavily polluted with sea water giving a reading of 500 p.p.m. sal and also tasted oily. It is better to take water when bunkering (See "Bunkers").
Ship Chandler: Stores were expensive and many items unobtainable. All stores have to come through Pointe-a-Pierre jetty and the chandler has to make arrangements with the launch supervisors for transport to the ship. If large quantities involved, a barge and tug are used. We tried to get everything at one time but this was impossible. No canned bee or minerals are available and all bottles are returnable which increases the price.
Cargo Handling: We lightened into two vessels and discharged the balance of cargo at the SBM. The discharge plan was changed frequent during the waiting time. Discharge into the ships was via a 12 in. hose and only one pump was required to achieve the required discharg pressure and gave rates of 2,075 t.p.h for the first and 2,933 t.p.h for the second.

Discharge to the SPM was via one 16 in. hose with a second hose connected in case of difficulties with the first, although not actually used and a rate of 2,224 t.p.h. was achieved. All discharging was carried o using the port side manifold and derrick.

Before lightening, three lengths of hose were placed on board to b connected together and attached to the ship's manifold, then a string four "Yokohama" type fenders were made fast alongside using the spri wires from forward of No. 1 and from between Nos. 8 and 9 holds. W were instructed to keep the wires slack at all times to prevent the joini wires breaking. All the moorings from the lightening ships have to b fed through "Panama type" fairleads and no open leads used to preve the rope/wire jumping out of the lead when the lightening ship completely deballasted. Communications between vessels is via walki talkies supplied by Trintoc (now "Petrotrin") and a co-ordinator fro Trintoc (now "Petrotrin") attends the vessel for liaising operation Bunkering cannot be carried out while lightening but is acceptable at th SPM, we managed to complete it before any cargo operations start No gangways are used between ships.

Mooring at the SPM was carried out with the assistance of one t made fast on the starboard side of No. 1. A ship's line is sent away connect with the SPM port line, as usual, this starting line should be t ropes joined together to ensure adequate length. Once the connect line is brought on board (a 16 in. nylon) in sufficient quantity it is ma fast on the bitts and the starboard connecting line picked up and secu When connecting hoses, we found that our manifold flanges were t thin to accept their patent clamps and we had to fit 12 in. reducers our manifolds and also to their pipelines to get a good fit. Ship's c carry out all operations although there are personnel placed on bo for mooring to the SPM to advise and assist.

Mooring and unmooring are usually carried out during daylight bu some reason we unmoored during the night, much to the surprise of Pilot and co-ordinators, being the first vessel to do it for 6 years.
Personnel Changes: We carried out several changes of personnel d the period and in general, the joining people arrived on time wi much difficulty but the personnel leaving, unless previously booke advance, met with delays getting flights. A vessel which arrived the after us, had eight men delayed ten days before flights were avail Non-crew personnel, such as technicians, who arrived and stated t were coming to do work on the ship were not allowed entry into country without obtaining a work permit.

SHIPMASTER'S REPORT: February, 1980 (Updated 1994).

Documents: 5 Crew Lists, 2 copies of Crew Personal Effects, 2 Arrival Reports, 1 unmanifested Cargo List, 2 Report of Ship's Stores. All these on local forms except Crew Lists.

Anchorages: Usually given an anchorage position by Trintoc (now "Petrotrin"), Trinidad, and normally use starboard anchor and require starboard accommodation ladder.

Tankers: Advise Agent time of transiting Bocas del Dragon and then North Post Radio will advise all ships. If using SPM, require forward 2 ship's lines to bring aboard 2×16 in. nylon lines which have to be heaved around drum ends. Sometimes have tug to assist.

SHIPMASTER'S REPORT: November 1983 (Updated 1994).

Documents:

Agent: P&I 48 (Arrival Report)

Immigration: P&I 10 (Arrival Report), P&I 53 (Arrival Report form in triplicate)

Quarantine: P&I 31 (Maritime Declaration of Health)

Customs: C-1 (Ship's Stores in duplicate)
C-2 (Crew Declaration)
C-3 (List of Unmanifested Cargo)
5 copies of Crew List.

Anchorages: It is necessary to anchor in position given by Trintoc Marine (now "Petrotrin Marine"),otherwise they request you to shift to correct position but also necessary to check there is not another vessel anchored there already.

Radio: We found it very difficult to communicate with North Post Radio from the bay. 'Shipping' or Trintoc Marine (now "Petrotrin Marine") are very helpful passing messages to agents, etc.

Shore Leave: Apparently the liberty boat rarely goes to San Fernando these days (apparently due to the unsafe state of the jetty).

Currency: Agents require at least 10 days' notice if vessel requires any foreign currency and, apart from this delay, Sterling and U.S. Dollars seemed readily available. 4 days' notice is required for local currency. This 4 days would probably be longer if not using Company Agents.

Mail: Mail took 4 days from arrival at airport to delivery on board.

SHIPMASTER'S REPORT: August 1996 – Bunkering.

Documents: As per "Guide to Port Entry".

Pilotage: Drop anchor without Pilot. Place for dropping anchor given by ship's Agent by VHF when 20 miles out from port. Anchorage usually 1 mile out from pipeline viaduct, but vessel must not impede traffic to and from the port.

Charts: B.A. Charts No. 482 and 483.

Radio: Keep watch on VHF Channel 16. Agent contacted through Port Station, call sign "North Post Radio".

Port Authorities: On arrival, Authorities came on board with ship's Agent. Joint inspection consists of 3 men. They took Port Clearance from last port of call.

Bunkering: Bunkering by barge. On completion, Master must report to ship's Agent by radio following information:

Time barge alongside.
Time hose connected.
Time commenced bunkering FO, DO, Lube oil.
Time completed bunkering FO, DO, Lube oil.
Time hose disconnected FO, DO, Lube oil.
Time barge away.
Time vessel sailed.
Amount loaded DO, FO, Lube oil.

AUTHORITY: The Petroleum Company Trinidad and Tobago Limited, Pointe-a-Pierre, Trinidad, W.I. *Tel:* (809) 658-4200. *Telex:* 39367 Petrotrin Marine. *FAX:* (809) 658-4636. *Cables:* Petrotrin, Pointe-a-Pierre. *Contact:* P.J. Lyons, Marine Manager. L. Chan Chow, Port Captain.

PORT-OF-SPAIN: 10.39 N. 61.32 W. (See Plan)

DOCUMENTS:

Immigration:

2 Crew Lists.
2 Passenger Lists.
1 Maritime Declaraton of Health.
*1 Stowaways List.
*4 Arrival Report Forms.

*Supplied by the Immigration Department on boarding the vessel and must be completed by the Master of the vessel.

Customs:

2 Crew Lists.
1 Passenger List.
2 Customs Ship's Stores Lists.
1 Crew Stores List.
1 copy of Cargo Manifest (if cargo vessel).
2 Lists of unmanifested cargo.

Quarantine:

1 Cargo Manifest.

PILOTAGE: It is not compulsory to apply for a Pilot into Port-of-Spain anchorage. However, if required notification must be sent to the Pilot Station (Port-of-Spain) at least 1 hour before arrival at the Station on VHF Channel 16.

The Pilot vessel has a black hull and white housing and is 35 ft. long. The word 'Pilot' is written on the housing. It is equipped with VHF radio and carries an international pilot boat light.

Vessels requiring a Pilot can call Pilot by International Code Flag "G" by day and white light and red light at night or by International Code Signal "G" on whistle.

The Pilot Boarding Station is located within 0.5 miles seaward of the Grier Channel Entrance. The vessel awaiting a pilot may anchor anywhere seaward of the Pilot Boarding Station.

International Requirements are applicable for pilots with respect to Boarding and Safety measures. Gangway or standard type pilot ladder with spreaders about 10 ft. apart is required. Ladder must be clean. It is desirable that 1 stanchion be securely fitted in the bulwark at the top of the ladder.

Pilot station is situated at the Western end of the Port-of-Spain Wharf.

ANCHORAGE: Depends entirely on draft but should not be nearer than 0.5 miles from Grier Channel Entrance, except in cases of vessels loaded with explosives; this anchorage is clearly defined on Chart.

Open roadstead in Gulf of Paria but can be considered as sheltered with choppy seas at times. Bottom shelves gradually from shoreline to 7 fathoms at Western end of harbour limits, increasing to 20 fathoms outside harbour limits Westward. Type of bottom, mud. Swinging area unlimited. No mooring buoy. Distance from anchorage to shore 2.25 miles at 5 fathoms to 5 miles at 7 fathoms, vessel will swing to the tide if loaded, and to the wind if light.

Currents 0.5 to 1.5 knots flood and ebb. Rise and fall of tides, variable. Minimum 1 ft. 5 in., maximum 4 ft. Rainy season June-December. Dry season December-June. Rain squalls occur during months of July, August and September up to 30-40 knots unpredictable hurricane most unusual. Prevailing winds are mostly Easterly, normally stronger during daylight.

RESTRICTIONS/MAX. SIZE: The Grier Channel, 350 ft. wide, leads to a dredged basin in which are the docks. No restrictions on length, but maximum draft in channel, in basin and alongside is 32 ft. MLWOST.

RADIO: Advise through North Post wireless or telephone, call sign 9YL. ETA 48 hours and 24 hours with other requirements.

TUGS: All vessels of over 1,000 n.r.t. are required to use a tug. Specifications of the 2 tugs are as follows: g.r.t. 2,961.72 tons, n.r.t. 75 tons, speed 12 knots, engines 2×1,200 b.h.p. Ship's lines are normally used.

BERTHING:

Berth No.	*Length (m.)*	*Depth (m.)*	*Use*
1	90	8.0	Break Bulk, Multi-Purpose, Ro/Ro, Cruise Vessels.
2	152	7.4	Break Bulk, Multi-Purpose, Cruise Vessels.
3	152	8.0	
4	152	8.4	
5	152	8.9	
6	152	9.5	Container vessel using ship's gear or shore crane, cruise ships.
6AE	166	9.9	Container vessel using Portainer crane.
6AW	166	10.0	
*7	182	9.5	Rice, Break Bulk, Multi-Purpose.
8	182	9.5	Rice, Break Bulk, Multi-Purpose, Ro/Ro.
8AW	61	4.0	Rice

*At present this berth is under repair.

In addition to the deep water facilities mentioned above there are shallow draft facilities which are located at the Eastern end of the Port. They provide docking facilities for coastal and regional vessels. The Caricom Berth (for regional vessels) is 45 m. long and 4.0 m. deep.

Loading/discharging can be operated by shore equipment supplied by the Port Authority or ship's gear or both.

CRANES:

Type	*No.*	*Capacity* tons
Portainer–Rail Mounted	2	40
Ferranti rubber tyred gantry	5	40
FMC Linkbelt Mobile Crane	1	200
Demag Mobile Crane	1	100
FMC Linkbelt Mobile Crane	2	75
FMC Linkbelt Mobile Crane	3	50
IMC Linkbelt Mobile Crane	4	30

CARGO HANDLING: One berth on the Eastern side is an open wharf without a seafront warehouse. This berth is strictly used for containerised and passenger (cruise) vessels. The Eastern Wharf is 3,300 ft. with five seafront warehouses. On the Western side the wharf is 1,200 ft. long with two seafront warehouses for general cargo, but at these two berths there are also facilities for receiving bulk cargo, i.e. grain, liquid oil, fats and molasses. These cargoes are usually discharged by vessel's equipment, but grain can be discharged by shore equipment at a slower rate.

In addition to the cranes mentioned above, other cargo handling equipment available is as follows:

5 top lifters × 28 tons capacity.
7 front loaders × 10 tons capacity.
40 Mercury Reliance Haul Majors.
17 Motor trucks.
117 Trailers × 20 ft.
45 Trailers × 40 ft.
79 Forklifts × 5 tons capacity.

STEVEDORES: Integrated longshore and stevedore gangs available on request by Agents. Gang sizes vary from 12 men to 18 men, dependent on the type of operation.

Hours of Work: Normal Time: 0700 – 2300, Monday to Friday.
Overtime Hours: 2300 – 0100, Monday to Friday (if necessary to complete an operation).
0700 – 1900, Saturday, Sunday and Public Holidays.

MEDICAL: Advance notice of attention required will assist. Modern hospital facilities available.
FRESH WATER: Fresh water is available at Berths No. 1 – 6 from hydrants alongside the Pier. Alternative arrangements can be made to supply truck-borne water if necessary.
FUEL: All grades supplied by barge, contact Agent in advance.
CONSULS:

Belgium	6238711	Italy	6236255
Bolivia	6254123	Japan	6232866

REPAIRS: Limited facilities available.
DRY DOCKS: See "Chaguaramas".
SURVEYORS: Lloyd's.
HATCHES: Opening/closing of hatches is normally done by the crew where the system is an automatic one. For manual systems, stevedores are used.
CUSTOMS ALLOWANCE: Crew is allowed either 25 grammes or 2 packs or 40 cigarettes or 5 cigars. No alcoholic drinks allowed.
CARGO GEAR: Vessels normally load and discharge break bulk cargo with their own gear but shore cranes and heavy lift cranes are available on dock.

Container vessels using the container berths are required to use the Port's Portainer cranes.
REPATRIATION: Crew changes and repatriation can be arranged through Agents.
AIRPORT: Piarco International Airport (17 miles from Port-of-Spain) has daily flights to worldwide destinations.
TIME: GMT minus 4 hours.
HOLIDAYS: New Year's Day (January 1st); Good Friday; Easter Monday; Labour Day (June 19th); Whit Monday; Corpus Christi; Emancipation Day (first Monday in August); Independence Day (August 31st); Diwali Day (late October/early November); Eid-ul-Fitr (December 21st/22nd, approximately); Christmas Day (December 25th); Boxing Day (December 26th). Any work performed on public holidays will be charged at overtime rates.
POLICE/FIRE/AMBULANCE: Port Security – 6251861, Port Health & Safety – 6253777, Police – 999, Fire – 990, Ambulance (Red Cross) – 6278214, Hospital – 6237715/6232951-6.

DOCUMENTS:

2 Crew Manifest/Stores List for Customs.
2 Ship's Stores List for Customs.
4 Immigration Arrival Report.
8 Crew Lists.
1 Declaration of Health.
1 Stowaway List (if stowaways on board).

PILOTAGE: Pilotage is compulsory. Pilots board 0.5 miles off installation.
ANCHORAGE: Safe anchorage 0.5 – 0.75 miles off head of jetty.
MAX. SIZE: No. 1 (Western berth) for discharging, length of berth 976 ft. Max. draft 23 ft.

No. 2 (Eastern berth) for loading. Length of berth 675 ft. Max. draft 36 ft.
RADIO: ETA should be given at least 36 hours before arrival via North Post Radio " 9YL" or Barbados Radio "8PO" to Alcoa.
TUGS: Alcoa maintain their own tug to assist in docking operations.
BERTHING: There are two wharves: No. 1 with a length of 976 ft. and No. 2 with a length of 675 ft.
STEVEDORES: Not necessary.
MEDICAL: All facilities available. Advance notice of requirements should be given.
FRESH WATER: Supplied at both piers, also by barge.
FUEL: All grades by barge and pipeline.
GANGWAY/DECK WATCHMEN: Customs guards on duty at ship's side.
OPENING/CLOSING HATCHES: Handled by crew.
CUSTOMS ALLOWANCES: 200 cigarettes and a moderate amount of spirits per man.
CARGO GEAR: Loading: Carried out with travelling tower conveyor system, rate 1,000 t.p.h. Discharging: With travelling tower grab 5 tons capacity, rate 300 t.p.h.
REPAIRS AND DRY DOCKS: At Chaguaramas.
REPATRIATIONS: Can be arranged (Advance notice must be given for citizens from Eastern Bloc countries).
AIRPORT: See "Port of Spain".
TIME: GMT minus 4 hours.
TELEPHONES: No facilities for telephones on board.
SHORE LEAVE: No restrictions (except for citizens of Eastern Bloc countries who need visas or special permission).
IDENTIFICATION CARDS: Required. Vessel must issue I.D. cards to all onboard.
GARBAGE DISPOSAL: Garbage disposal can be arranged on request.
WASTE OIL DISPOSAL: Not available at Tembladora.

Tristan da Cunha

EDINBURGH (Tristan Island): 37.03 S. 12.18 W. (See Plan)

DOCUMENTS:
Passenger List.
Crew List.
Passport No./Name/Nationality.
Cargo Manifest (No Customs/Port forms).

APPROACHES: Chart B.A. 1769 Pilot Book Africa Vol. 2 to be used, local knowledge should be sought regarding weather.

Island is good radar target and may be seen visually at 20 miles in good weather.

PILOTAGE: Local Radio Officer will indicate safe anchorage by handheld VHF (Channel 16).

ANCHORAGES: Edinburgh anchorage is on N.W. side of Island. Town is difficult to observe as houses are very low. Leading marks are white triangles in field to right of crayfish factory.

Area most likely for large vessels has depth of 18 fathoms. Vessel to be wary of large amounts of kelp blocking intakes, etc.

In rough weather vessel could shelter to South of Island. Although due to katabatic winds off the mountains it is possible that no shelter will be found around the island.

A quieter anchorage can be found 2 cables East of the 114°T and 213°T transit intersection. Weak tidal currents set East and West through the anchorage, the East going current being the stronger.

HEALTH: Any person suffering a cold will not be allowed ashore; if colds are prevalent aboard then no one will be permitted ashore.

RADIO: Radio contact made via Cape Town who will arrange schedule.

Tristan (ZOE)	Ship
3737 kHz	3737 kHz
8187 kHz	8281 kHz
12325 kHz	12423 kHz

Vessels may also make contact by the following:

	Inmarsat Main		*Inmarsat Reserve*
Sat Telex:	581 1445434 (PR6JX)	Telex:	581 1445412 (PR6SX)
Sat Fax:	871 1445435	Fax:	871 1445413
Sat Tel:	871 1445434	Tel:	871 1445412

BERTHING: Calshott Boat Landing (used for all landings) is small (40 ft. - 50 ft. long). Local knowledge required. 1 motor launch and 2 small powered lighters are used for cargo.

GARBAGE DISPOSAL: No garbage disposal facilities.

WASTE OIL DISPOSAL: No waste oil disposal facilities.

SEAMAN'S CLUBS: No seaman's Club. Anglican church. Very limited sports. No telephone. No shore leave overnight.

CURRENCY: Own currency, pounds on par with UK Sterling.

GENERAL: There is a landing fee of £3.00 for any passenger who wishes to land (No Passenger List required).

SHIPMASTER'S REPORT: February 1986 (Updated 1994).

The navigational marks are as per the Pilot Book. These are made of wooden slats. The beacons on the 203° (T) bearing are in a large field behind the new canning factory, just above the boat harbour. The lower of the beacons on the 114° (T) bearing is on the top of a little hillock and the higher is on the cliff side.

When the sun is shining on these beacons they are easily discernable but when the sun is at right angles or behind them they are not easily seen.

There are no lights on the beacons.

There are lights illuminating the entrance to the boat harbour.

All lights are extinguished at 2400 hrs., including the lights at the entrance to the boat harbour.

The soundings that we obtained were as per the chart.

Whilst we were there, with a Force 7 on the starboard beam, we lay with the bow to the shore. When the wind moderated we then lay with our bow into the wind so it would appear that strong Westerly winds cause an offshore current in the anchorage area.

Radio Communications at Tristan Island: The Station has a daily schedule with Cape Town Radio at 0830 hrs. GMT.

Cape Town Radio will arrange schedules for ships as required.

The frequencies used are as follows (all SSB R/T):

Tristan da Cunha (ZOE)	Ship
3737 kHz	3737 kHz
8187 kHz	8281 kHz
12325 kHz	12423 kHz

Whilst at anchor VHF communication on Channel 16 is provided by a hand held walkie talkie on the island.

The manifest of the cargo for Tristan da Cunha only.

Accommodation ladder not used, pilot ladder and scrambling net preferred.

SHIPMASTER'S REPORT: March 1988 (Updated 1990).

The Report above is correct; but to the East of the settlement, there are a further two small triangular leading marks, which when in transit (114° T), indicate the beam bearing for the safest anchorage. The top mark is part way up the cliff to the left of the land-slip, the lower mark is on top of a small outcrop of rock. There are no lights on these beacons.

AUTHORITY: *Contact:* Curnow Shipping Ltd., The Shipyard, Porthleven, Helston, Cornwall. *Tel:* 0326-563434. *Telex:* 45654. *FAX:* 0326-564347.

NOTES

Please also advise Shipping Guides Ltd.

Tunisia

ASHTART: 34.17 N. 11.23 E. (See Plan)

DOCUMENTS:
Customs: 1 Crew Declaration, 1 Ship's Stores List.
Immigration: 1 Crew List.
PILOTAGE: Compulsory within 3 miles of any installations. To avoid a delay, Owner must report to SEREPT SFAX 72 hours, 48 hours and 24 hours in advance of ETA.
ANCHORAGE: 3 miles South of the storage barge.
RESTRICTIONS: Mooring in daylight only.
HEALTH: Masters must declare on arrival, condition of health of all on board with details of any sickness.
VHF: Call "Ashtart Terminal" on VHF Channels 9 and 16.
TUGS: One tug required to be in attendance while loading.
BERTHING:
(a) *Tanker Berths:*

One SBM for tankers up to a max. size of 150,000 d.w.t. Water depth 66 m. Loading Rate 3,000 cu.m.p.h. Max. quantity available 105,000 tons. 1×12 in. hose.

Vessels mooring use one line, and must be able to easily heave on board an anti-chafing chain whose links are 32 cm. wide.

(b) *Storage Barge Berths:*

Starboard side alongside storage barge, tankers up to a max. size of 70,000 d.w.t. Depth 66 m., loading rate 4,500 cu.m.p.h. Max. quantity available 105,000 tons. 2×12 in. hoses.

(c) *Tanker on Storage Barge Berth – Tandem:*

Tankers up to a max. size of 100,000 d.w.t. Depth 66 m. Loading rate 3,000 cu.m.p.h. Max. quantity available 105,000 tons. 1×12 in. hose on starboard side.

MEDICAL: No facilities.
FRESH WATER: Not available.
FUEL: Not available.
CONSULS: France and Libya at Sfax.
REPAIRS: No facilities.
REPATRIATION: Not possible.
AIRPORT: At Sfax.
TIME: GMT plus 1 hour.
HOLIDAYS: None.
GENERAL: No dirty ballast facilities. No provisions available. Master supplied with booklet containing special port regulations on arrival.
AUTHORITY: Societe de Recherches et D'exploitation des Petroles en Tunisie – SEREPT, B.P. 246, 3018-SFAX, Tunisia. *Tel:* (04) 235 400. *Telex:* 40859, 40700. Sfax Telex: 13.800 Tn. Tunis Telex: 13.042 Tn. *FAX:* (218) (4) 237102 (Sfax). *Contact:* Mr. Chouchene or Mr. Guerfel.
AGENT: See "Sfax".

BIZERTE: 37.16 N. 09.53 E. (See Plan)

PORT LIMITS: Commence 0.5 mile from the Port.
DOCUMENTS:
5 Crew Lists.
5 Passenger Lists.
4 Crew Personal Effects Lists.
4 Ship's Stores List (Cigarettes, spirits, arms, narcotics, bunkers, paint, etc.).
3 copies Bill of Lading.
3 copies Manifest.
Health Declaration.
PILOTAGE: Advise Pilot of ETA 48 hours before arrival. Pilot vessel and Pilot Station may be contacted by VHF Channel 16. The Pilot boat exhibits the letters "P" & "H". The Pilot boards half a mile from the Southern fairway, vessels have to slow down to enable the Pilot to board.
ANCHORAGE: The anchorage for vessels awaiting the Pilot is half a mile from the Southern fairway.

When the wind is blowing from N.W., the best anchorage is off Cap Farina.

APPROACHES: The entrance channel is dredged to 12.0 m.
RESTRICTIONS: Entry at night is forbidden for tankers.
MAX. SIZE: See "Berthing".
Tankers: Max. draft at Quai Stir is 35 ft.
HEALTH: Free Pratique normally given at the quays after mooring. Pratique is automatic for vessels coming from another Tunisian port. In case of suspected disease on board vessel will be ordered to quarantine anchorage.
RADIO: Bizerte Radio, call sign 3VWA. Frequencies: 2182, 1743, 1637, 2321 and 2506 kHz. Range 200 km.
VHF: Channels 16 and 14.
TUGS: The tugs join the vessel at half a mile from the fairway.

Two tugs of 3,600 h.p. are available 24 hours. They are equipped with radar, 2 cables each (48 mm. diameter × 850 m. length) and 2 pumps of 420 cu.m.p.h.

BERTHING:

Berth	*Length* (m.)	*Depth* (m.)
Appontement de Servitude	90	5.50
Quai Stir

	Higher width	40.60
	Lower width	36.00
	Draft	12.00
Dry Dock No. 3	Length	84.10
	Higher width	14.78
	Lower width	13.00
	Draft	4.15

SURVEYORS: Bureau Veritas – Securas.

Many independent surveyors available.

GANGWAY/DECK WATCHMEN: It is recommended to employ sho watchmen.
OPENING/CLOSING HATCHES: Carried out by stevedores.
CUSTOMS ALLOWANCES: Each crew member is allowed 1 carton o cigarettes and 1 opened bottle of wine or spirits. In case of a prolong stay in port, Customs may renew these quantities.
REPATRIATION: Can be arranged by Agent.
AIRPORT: Tunis/Carthage Airport is situated 60 km. from Bizert Served by international airlines.
TIME: GMT plus 1 hour throughout the year.
HOLIDAYS: There are 17 days official holiday during the year. Wo can be carried out on all holidays except 1st May on payment of 100 overtime.
POLICE/FIRE/AMBULANCE: Police Tel: 431717; Fire 4310 Ambulance 431422.
TELEPHONES: No arrangements exist.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Crew Members' Identification Cards will b collected by the Immigration service and exchanged for shore pass while vessel is in port.
GARBAGE DISPOSAL: Nothing organised for garbage disposal. I ship asks the Port Authority to dispose of her garbage, it must collected on board and a tractor will go alongside each day and collec
WASTE OIL DISPOSAL: The refinery "Stir" can accept only a sm quantity of dirty ballast. The organisation "Sotulub" can also receiv small quantity of waste oil. For information contact the Harbour Mas
SEAMAN'S CLUBS: None.
CURRENCY: Dinar Tunisien (Dinar).

SHIPMASTER'S REPORT: January 1982 (Updated 1992).
Restrictions: Due to the lift bridge at the Eastern end of the Qua Commerce there is no entry during a period in the morning and ano in the evening when the main flow of traffic is expedited. Opening ho are 0600 – 0630, 1015 – 1045, 1515 – 1545 and 1930 – 0530. L authorities will open bridge out of these hours with special permiss
Health: Free Pratique will be granted on application by radio.
Berthing: The Western end of the Quai de Commerce showed de of 9.14 m. along the 600 ft. to the East.

There is 12.0 m. in the entrance channel and as far as the tur basin, but LESS in the basin hence the operation is difficult.

Fresh Water: Using ship's hoses, some 23 tonnes per hour ma attained overall, but pressure can drop at any time and care mus taken to make sure of a large quantity or if proceeding to La Gou elevator where there is no water to be shipped.

Gangway/Nightwatchmen: Most helpful and able to get results when Agents not available.

Identification Cards: These are sighted by the Immigration Officer and crew passes issued which are valid for all Tunisian ports but which must be collected before the vessel sails from the last port.

SHIPMASTER'S REPORT: August 1993.

Bulk Handling Facilities: There is a jetty off the cement plant for loading clinker. This jetty (See "Plan") was smaller than the length of the vessel and had reasonably good tyre fenders keeping the vessel away by about 1.0 m.

A fixed loader occupied a position in the middle of the jetty. When berthing, Hold No. 3 was positioned abreast of this loader to start the sequence. On berthing, vessel had an airdraft of about 10.0 m. An airdraft of 8.0 m. minimum would be required, even though the loader has a flexible spout. The spout, if left vertical, would plumb the part of the hold directly underneath it. The spout could be pulled by ropes attached to the end to direct cargo to the part of the hold required, but in any case cargo could be loaded only in peaks.

The plant did not have any loading meter. The loading rate worked out to about 450 tonnes per hour. From the time cargo was requested to be stopped, it took about 8 minutes for the conveyor to stop, meanwhile an addition of about 40 tonnes of cargo on the belt gets cleared. This has to be taken into account if loading to maximum draft.

The only cumbersome process while loading is the warping, as the bollards ashore were not suitably positioned for heaving the vessel to and fro. B1, B2, B3, B4 and B5 (See "Plan") were the only normal mooring bollards which were positioned in such a way that they could not be used for warping the vessel. There were 4 small chain lashing points (C1, C2, C3 and C4) on the jetty, on which the springs were secured to heave the vessel forward and aft.

Vessel experienced strong Easterly winds (Force 5) throughout the stay, which gave anxious moments, especially when proper springs could not be given, forward and stern lines having no proper lead to check the vessel, tending to surge down wind and also chafing the aft loader supports. There was a detached square jetty with a second loader which could be used simultaneously on longer vessels. For our vessel, only Holds No. 1 and 4 could be positioned together under the loaders.

Stevedores were co-operative and at all times about 3 or 4 men were on board to tend to the lines attached to the loading spout, in order to direct the cargo in the hold as required.

Restrictions: We understood from the Agents that the road bridge at the entrance to the harbour opens only between hours of 0615 – 0645, 1015 – 1045, 1515 – 1545 and 1930 – 0545; if at any time between 1015 – 1545 the bridge is required to be opened, it would be considered as special and may not be possible.

Fresh Water: Not available at the cement berth.

Gangway/Deck Watchmen: Compulsory. Risk of stowaways is possible.

Time: GMT plus 1 hour. No changes throughout the year.

Pilotage: No night pilotage after sunset.

Radio: VHF telephone calls can be made through Bizerte Radio.

AUTHORITY: Direction du Port de Bizerte, Quai Tarek Ibn Zied, 7000 Bizerte, Tunisia. *Tel:* (02) 433748, 431412, 436355. *Telex:* 21007 Bimpor. *FAX:* (02) 433688. *Contact:* Mohamed Adel Mokhtar (Tel: (02) 431139). Captain Souissi Noureddine (Tel: (02) 431741).

AGENT: See "Sfax".

GABES (Ghannouche): 33.55 N. 10.06 E. (See Plan)

LOCATION: The port is located in the Gulf of Gabes, 22 miles (approx.) South of the oil port of La Skhirra, 58 miles S.W. of Sfax and 32 miles to the West of Djerba.

DOCUMENTS: The Master must declare to Customs: Bunkers, paints, arms, narcotics, spirits, cigarettes, etc.

APPROACHES: Landfall by day is easy by virtue of the landmarks and oases around the port.

One can distinguish:

To the South of the port: The Oasis of Sidi Abdeslem and a 30 m. high tank.

To the North, the Oasis of Ghannouche and the red and white chimney, 44 m. high, of the power station.

To the West, the mass of buildings and industrial installations with, at the rear, the grey mushroom of the water tower, 36 m. high, and the Oasis of Bouchemma.

Landfall by night is equally easy, the port approaches being indicated, for vessels coming from the:

S.E.: The lighthouse of Ras Turguness (flash white 5 secs., range 24 miles) and then by the lighthouse of the Gabes fishing port (flash white 12 secs., range 11 miles).

N.E.: After coming round the belt of lights of the buoys of the Kerkennah Islands; by the mooring buoy N.W. of the channel of the Port of La Skhirra (flash white 10 secs., range 10 miles) and then by the lighthouse of the fishing port of Gabes.

The Roads:

The roads are indicated by the mooring buoy N.W. of the port channel (isophase white light: on 3 secs. off 3 secs., range 12 miles) and by the lighthouse of the fishing port.

Access Channel:

The port is entered via an access channel 3,220 m. long and 130 m. wide, dredged to 13.5 m.

This channel runs S.W. – N.E. and is joined to the entry passage by a curve 1,200 m. long.

On its 2 banks, there are 4 pairs of fixed light buoys, except Buoy No. 8 located in the curve of the channel.

At the breakwater entrance, there are lights placed on the heads of the North and South breakwaters.

PILOTAGE: Available 24 hours a day, 7 days a week.

ANCHORAGE: The Roads generally offer anchorage with good holding, and it is advisable to anchor to the South of the channel.

MAX. SIZE: Max. draft 35 ft. – 39 ft., according to tide.

TUGS: One tug of 1,200 h.p. and one tug of 1,600 h.p.

BERTHING:

The Basins:

The water area of the port, covering 80 hectares, is enclosed by 2 breakwaters (North breakwater 2,642 m., South breakwater 1,400 m.) leaving between them a passage 350 m. wide of which 200 m. is dredged to a depth of 13.5 m. This water area is divided into 2 basins:

An outer basin (50 ha.) dredged to 12.5 m., and having a manoeuvring circle 600 m. in diameter.

An inner basin (30 ha.) dredged to 10.5 m.

The Quays:

For berthing of vessels, the port has available:

A quay 360 m. long (Berths No. 3 and 4) running approximately E.N.E./W.S.W. and dredged to 10.5 m. This quay can take vessels up to 25,000 tons.

A quay 600 m. long (Berths No. 5, 6 and 7) running approximately N.N.W./S.S.E. and dredged to 10.5 m. This quay will take vessels up to 40,000 tons.

A quay 240 m. long (Berth No. 8) perpendicular to the first, and dredged to 12.5 m. This quay will take vessels up to 50,000 tons.

A quay (Berths No. 9 and 10) length 530 m. and depth 12.5 m. is East of Berth No. 8.

Port access is possible at all times to vessels with 33 ft. (10.06 m.) max. draft for Berths No. 5, 6 and 7, and 39 ft. (11.86 m.) max. draft for Berth No. 8.

Open storage areas:

The open areas for the storage of goods transitting through the port include in the public zone – a shed of 4,000 sq.m., open areas which are properly surfaced 70,000 sq.m., open areas of rolled earth: 100,000 sq.m.

CARGO HANDLING EQUIPMENT:

1×20 ton gantry crane.
2×20 ton Caillard cranes.
1×500 t.p.h. bulk loader.
1×300 t.p.h. grain suction unit.
Forklift trucks 2-10 tons capacity.
1×90 ton crane for heavy lifts (private).

FRESH WATER: Available.

FUEL: Available from Sfax (Mobil, Mory, Total, Esso, etc.).

REPAIRS: Possible.

SURVEYORS: Classification Society Surveyors at Sfax and Tunis.

Marine Surveyors – Supervise.

TIME: GMT plus 1 hour throughout the year.

WINDS/TIDES: The winds in the Gulf of Gabes present a seasonal variation with the character of a monsoon.

During the cold season (October – March) winds come from the land, from the West and North.

During the hot season (April – September) the winds come from the sea, from the East to S.E. The strength is then from Force 3 to Force 5, very infrequently reaching Force 7.

Tidal currents are negligible and have no influence on navigation.

The characteristics of the tides are as follows:

High Spring Tide	2.45 m.
High Neap Tide	1.60 m.
Low Spring Tide	1.10 m.
Low Neap Tide	0.15 m.

DEVELOPMENTS: The Port of Gabes has been essentially created to serve the chemical industries in the area which process the natural Tunisian phosphates coming from the S.W. of the country. There is some importation of sulphur for use in the various processes, likewise aluminium for production of aluminium fluoride. As the South of the country develops, traffic in various general cargoes, foodstuffs and capital equipment, is increasing.

SHIPMASTER'S REPORT: The following reports are from the same vessel. Vessel discharged ammonia at Gabes – Ghannouche.

May 1980:

Approaches: BA. 3327 and 372.

Approaching from the East good positions were obtained off Ile Djerba, keeping outside the 9 fathom soundings as the bottom shoals quite steeply.

The 'Fairway' Buoy "O" showed up well on the radar at 8 miles and the channel buoys themselves at 5 – 6 miles. Details of the breakwater were also visible on the radar at this range.

There is a Radio Beacon at Gabes but this is not marked on either chart. ALRS Vol. 2 refers to this.

Caution: The positions of the outer and channel buoys should not be relied upon. New positions as at 22nd/24th May, have been marked on Chart 372 and a tracing made. The current sets quite strongly across the axis of the channel and care is required when rounding the bend in the channel immediately before the entrance. The Pilot reported that channel buoys frequently break adrift.

Pilotage: Reportedly there is a 24 hour watch kept on VHF Channel 16 but we did not succeed in making contact until after we had anchored; time of arrival 0330 hrs. Even then reception was poor.

Fluency of English fair.

Pilot boards from a black hulled launch of about 10.0 m. length with white upperworks. Pilot ladder about 1 m. from the water. Pilot boards outside the fairway buoy.

Vessels with draft in excess of 10.0 m. must berth head in, port side to, owing to existence of 10.5 m. shoal in the Southern corner of the harbour. No night time pilotage for vessels of this size.

Only a tug is available and only of moderate power; on berthing she pushes according to hand signals and whistles from Pilot (no VHF). When unberthing she takes a ship's line from the stern to swing ship to port clear of berth.

Berth: The berth is a concrete quay in the Southern corner of the harbour about 250 m. long with depths alongside of 11.3 m. (forward) 13.8 m. and 14.2 m. taken by ship's leadline. Communication with shore personnel was not very good with conflicting advice as to whether vessel was in position or not.

The quay is used for the export of fertiliser products which are loaded by means of a large travelling chute. Despite fears, the gangway when swung out did not foul the gantry.

Well fendered with round rubber fendering.

Mooring arrangements were reasonable but the bow lines have to be taken to the far wall to afford a good lead when in position.

The gangway is landed on the quay without any problems.

The berth is open to swells from the East through S.E and is not very well protected from winds, except from due South. Since the bow is close up to the quay, special care should be paid to backsprings and all moorings. Ensure that watchmen are warned.

Discharge: The shore plant has storage for about 10,000 tonnes and relies on these shipments to keep the fertiliser section in production. Should tanks be empty they will be warm and high back pressures may be expected – 9 bar. The facility uses about 7,500 tonnes per month.

They claim to be able to accept cargo at a maximum rate of 350 t.p.h. but is usually in the region of 200 – 250 t.p.h. Our overall rate this call was 220 t.p.h.

The discharge line consisted of an 8 in. pipe from which there was provision for up to 4×4 in. flexible hoses to be connected. Only 2 hoses were used at this call. The shore flange has 12 holes which do not match the pitch of our manifold and, despite cabling ahead, this was not apparent until berthing and some time was lost. Shore personnel connect and disconnect. Line taken on board using ship's derricks. Shore provided the converting spool piece. Ship blew through lines on completion.

No vapour return line.

No venting to atmosphere.

Surveyor: Redwood's Surveyor in attendance and all figures based on gauging of ship's tanks.

Surveyor used a strange vapour factor which was not familiar in any way and declined to give us copies or explain its origin.

General: Fresh water available. No fuel oil available, if required proceed to oil terminal at Sfax. Repatriation and relieving of personnel possible without difficulties. Good road and rail communication with Tunis, Sousse and Sfax. Good access to Gabes by taxi. Shore passes required – take Discharge Book to Immigration office and a pass will be issued. Collect Discharge Book inward.

Papers: 3 Crew Declarations. 3 Stores Lists, including Bonded Stores. Declarations on the contents of all Bars onboard. (This is most important, Tunisia is largely Moslem).

2 Lists of ports previously visited.

Port Health Form – normal Health Declaration.

The Officials were very fair but very thorough in checking bonded stores. Fresh provisions available.

July 1980:

Discharge: The discharge rate at this call was only in the region of 177 t.p.h. (perhaps due to Ramadan) with a very high back pressure throughout in excess of 9 bar.

Total delays this call amounted to some 28 hours 20 minutes.

General: IMPORTANT: Since our last call the authorities have instituted strict currency control regulations and a number of the crew were caught on arrival during cabin searches. Personnel must therefore be warned before leaving that *ALL* Tunisian currency has to be handed back. The penalty for non-compliance being confiscation of the currency and a fine of at least twice the value of the money discovered. Before arrival personnel should be warned accordingly.

All authorities subjected the ship to a much more thorough scrutiny than at last call.

Repatriating personnel were subjected to baggage searches either on board or ashore.

Fresh stores were taken at this call and were of good quality.

Freon "R22" available in small quantities.

Fresh water taken and treated with "Stabochlor" as a precaution.

November 1980:

Approaches: BA. 3327 and 372.

When rounding Kerkennah Banks the buoys should not be relied upon.

On the flood tide the current from Kerkennah to Fairway Buoy sets in a S.S.W. direction. Fairway Buoy shows up at about 8 miles on radar and Channel Buoys at 5 to 6 miles.

A number of oil rigs are found between Kerkennah Banks and Ile Djerbe, these should not be relied on for navigation fixes. Ile Djerbe gives good positions. Approaching the Fairway Buoy a 'Minaret' marked on BA. 3327 to North of port is conspicuous and Beida Mt. (902) to N.W. of port is conspicuous.

Breakwater is visible on radar at 15 miles but difficult to make out visually until very close too on account of haze. A radio beacon not marked on BA. 3327 is listed and operating as per ALRS Vol. 2.

Fairway Buoy is number "O" and named "Ghannouche" it is a tall red pillar buoy, its permanent position as per the alterations on BA. 372.

Channel buoys have been altered and are best seen from the changes to BA. 372. Pilot reports that all have new moorings and should be considered reasonably reliable. They are lifted about every 4 months, one at a time, so the official numbers as changes to BA. 372 do not always correspond to the actual number.

Anchorage: For large vessels about 1.0 – 1.5 miles East of Fairway Buoy and for small vessels to East of No. 2 Buoy. Good holding ground.

Wind: The prevailing wind is from the East and is strongest during Winter months. Due to the harbour being open to the East a swell carries into the harbour making berthing and working of small vessels impossible at times.

V.H.F.: Call 'Gabes Port' on Channel 16, range limited (12 miles). English reasonable.

Berthing: No berthing if wind over Force 4 to 5 and no unberthing over Force 3 to 4. Largest ship to use port 'Galconda' (LPG) gross 34,893 tonnes and deepest draft ship 'Hampshire' (LPG) gross 32,060 tonnes draft 11.2 m.

Channel: Minimum depth Chart Datum found to be 11.0 m. (36 ft.) plus 0.8 m. MHWN and 2.2 m. MHWS.

Liable to silting. Official depth is 41 ft. (12.5 m.) but last dredged 1974.

Pilot reports little current in channel, but reports suggest cross current can be encountered particularly near breakwaters. Channel dredged in box shape.

Pilot: Two Pilots employed by National Port Authority. Only senior Pilot handles large vessels. Good English spoken.

No berthing/unberthing of large vessels at night. Sunrise to Sunset only. Boards from black hulled 10 m. launch with white upperworks. Pilot ladder about 1 m. above water. Prefers gangway if weather suitable. Boards outside Fairway Buoy.

Tugs: Only one Port Authority tug of 1,200 h.p. with suspect towing hook. In November 1980 this tug was under repair and a Greek Construction Co. tug was being hired for port use as necessary. This tug (800 h.p.) would not work on a Sunday. When berthing, tug pushes; when unberthing, tug takes ship's line from starboard quarter. Pilot reports second tug in design stage.

Berthing/Moorings: All berths port side to.

Fertiliser/Ammonia/Phosphoric Acid Berth – Berth head in.

Sulphur and Grain berths – berth head North.

Vessels on all berths moored close together. Three large and 1 small vessel can moor on Sulphur/Grain berths.

Good back springs essential at all berths.

Moorings: 3, 2, 2. Forward head lines go to quay ahead of Ammonia Berth, mooring boat used. On Ammonia Berth our bow was about 3 m. off stern of vessel immediately ahead and at right angles to us.

Berths: Ammonia Berth of concrete trestle construction with bollards and fenders on concrete projections proud of quay face. All other berths solid concrete construction.

Ammonia Berth about 250 m. in length and 13.2 m. C.D. minimum. Other berths reported to be 10.5 m. alongside.

Density: 1029. (3 visits) May, July and November. Good fendering on all berths.

Cargo: Anhydrous Ammonia: Intake for fertiliser plant about 10,000 tonnes per month.

Loading/Discharge: Discharge rate varies but maximum claimed to be 350 t.p.h., in practice this has been 220, 177 and 233 t.p.h. over three visits with back pressure of 8.5 to 9.5 bars. No vapour return line. 2×4 in. flexible pipes join onto common manifold union with 8 in. coupling of odd size. The plant has a spool piece to fit standard 15 ASA connection on ships. Shore labour assists with connection.

For large LPG/NH_3 carriers it is necessary to berth as far up quay face as it is safe to do so in order to be able to connect pipes. On this vessel the after end of gangway must be past travelling shiploader stowage position on quay. Generally 2 ship pumps are required. Shore tank capacity 9,800 tonnes.

Same berth is used for loading Ammonia Phosphate for export at about 30,000 tonnes per year and Phosphoric acid in liquid form a 60,000 tonnes per year.

Travelling shiploader for Ammonia Phosphate loads at 800 t.p.h.

The Sulphur Berths nearest to Ammonia Berth have 2 discharg cranes/gantry. The Grain Berth at the Northern end is worked by ship gear. Both these are import berths. Sulphur berth direct into fertilise plant. It is planned to export Nitric acid in the near future.

Gangway: Can be turned out on all berths prior to berthing even thoug it seems vessel cannot due to shiploaders.

Communications: At Ammonia Berth after connection there is lit English spoken by personnel ashore. Two watchmen always onboard

N.O.R.: Tender on arrival to SAEP GABES, accepted alongside bert

Surveyor: SGS/Redwood in attendance. Does not always appear o arrival.

General: Fresh water available from quay, but salty. If fuel required to Sfax. Personnel reliefs quite easy through Djerba. Direct flights Frankfurt 3 times per week. Baggage may go missing. Road and communication with Tunis, Sousse and Djerba. STD Internation telephones. Holiday resort at Djerba.

Authorities: Immigration board first to check International Hea Declaration and Vaccination List. If all in order 'Q' flag is pulled dow Quarantine Pratique granted and Customs and Agent can board. Health/Immigration: require all Cholera Certificates up to date, if not Health will carry out inoculation on board the ship.

Customs currency control is rigid – all currencies must be decla and all Tunisian currency drawn and not used handed back on departu Bars are particularly subject to inspection. Customs also very care check Bars stocks, if any discrepancies a fine is levied.

Customs conduct cabin searches for undeclared articles. Mas safe is checked together with dangerous drugs which must be prop declared, every single item and amount of each. Personnel going ash take their Discharge Books to main gate where a shore pass is iss and Discharge Book collected on return.

Papers required:

3 Copies Personal Effects Declaration (Make sure Jewellery is declared).
3 copies Personal Currency Lists.
2 Stores Lists.
2 Drugs Lists.
2 Bond Lists.
2 Vaccination Lists.
6 Cargo Declaration Lists.

Chandler: Fresh provisions available and seem good and reasonable. Cable ahead for chandler as normally does not wo weekends.

Agent: Agent had office just outside main gate. Good English and generally helpful and obliging. Crew transfers conducted without difficulty. Can telephone STD from office.

Developments: On North side of Harbour general cargo berths are being constructed. The retaining breakwater has been completed and the berth concrete caissons are being placed in position.

SHIPMASTER'S REPORT: February 1985.

Vessel discharged anhydrous ammonia.

Bow-thruster: It is advisable to inform the Agent well in advance whether vessel is equipped with a bow-thruster or not. When negative, a second tug is required for large vessels, as only 1 tug, small and low powered, is available at Ghannouche. The second tug has to be ordered from Sfax (distance approx. 60 miles). This might cause delay in berthing if Port Control is not aware that the vessel does not have a bow-thruster.

Hoses: The shore connection now consists of a 10 in. 150 ASA hose. Due to the height of our manifold above the water (41 ft.) at 24 ft. draft, extra lengths of hose had to be provided by shore.

Maximum allowable pressure for hoses: 8 bars.

Discharge: Maximum shore receiving capacity approx. 600 tonnes/hr. Receivers urgently requested us not to go beyond the 8 bars back pressure.

We discharged approx. 550 tonnes/h. at 7.5 bars back pressure, however, a few hours after commencement of the discharge, the plant requested us to reduce the rate to 400 tonnes/h. as they experienced problems with their compressors.

SHIPMASTER'S REPORT: March 1995.

Number of Visits: 8 times between June 1993 to February 1995 on general cargo ship to load Aluminium Flouride in jumbo bags on pallets.

Approaches: B.A. Chart No. 6.

Breakwater light and most of the approach channel buoys found unlit. Lit buoys flashed very dimly and visible only when vessel is almost on top of them in clear visibility. Buoy "O" had different light characteristic than charted.

All buoys are good radar targets and are detectable up to 10 miles range. Approach, though very simple, is made with the help of radar alone in the absence of visual aids at night.

Pilotage: VHF contact possible only within 5 miles to 10 miles from breakwater, but reception was poor.

Pilot boards inside the approach channel, even once boarded at Buoy No. 7, just at the mouth of breakwater (arrival draft 9.9 m.).

Reportedly, berthing possible day and night, but vessel never received Pilot before 0500 hrs., even when arriving at 2000 hrs. the previous night.

Tugs: Two tugs available. One of moderate power and another of low power.

Berth: General cargo berth at the North wing of harbour with many fenders missing, and vessel had to use its own fenders for safety.

All Pilots uncertain of maximum depth available at general cargo and ammonia berths.

No shore crane available at the berth. Vessel has to use own cargo gear for loading/discharging. Mobile crane of 15 tons capacity can be hired from outside the port.

Authorities: Customs are very rigid regarding currency, cigarettes and ship's narcotics. They required precise declaration of all ship's stores. On one occasion they even checked paint store to compare with declared quantity. Cabin search (including Master's) is normal for any undeclared items. Despite all these restrictions, plentiful supply of cigarettes required for various officials.

General: When strong N.W. to S.W. winds blow, basin becomes heavily air polluted with dust of whatever being discharged in bulk, and that makes it difficult for ship's staff at Northern and Southern berths to work on deck due to skin and eye irritation.

Vessel requires plentiful supply of eye wash solution and dust masks as a precaution against air pollution when calling at this port.

AUTHORITY: Direction du Port de Gabes, Zone Industrielle, Gabes, Tunisia. *Tel:* (05) 272366. *Telex:* 51907. *FAX:* (05) 274855.

Contact: Chokri Lamiri, Port Director (Tel: 270373, 270049). Mzoughi Abderrahman, Port Captain (Tel: 270722, 274051).

AGENT: See"Sfax".

LA GOULETTE (Including Rades and Tunis):

36.49 N. 10.18 E. **(See Plan)**

(A) LA GOULETTE.
(B) RADES.

(A) LA GOULETTE.

DOCUMENTS:

Required by Police:
- 2 Crew Lists.
- 2 Passenger Lists.

Required by Customs:
- 1 Crew List.
- 2 Passenger Lists.
- 2 Crew Manifests.

Required by Port Health:
- 1 Crew List.
- 1 Passenger List.

PILOTAGE: Compulsory. To call Pilot contact Goulette Radio station, call sign 3VW, 24 hour watch on 2182 kHz or VHF Channel 16. Pilot boats are in permanent direct contact with Goulette Radio. International code visual and sound pilot signals may be used on arrival at the Sea Buoy.

Pilot launches are stationed inside the port, and proceed on call to meet vessels about 0.25 miles beyond the sea buoy, i.e. the Buoy No. 1 in the entrance channel to the port.

APPROACHES: *Port Entrance to La Goulette:* Marked by 8 light buoys, the access channel is 3.5 miles long between the landfall buoy and the port fairway.

Depth of water at entrance: 12.0 m.

Depth of water in the port: 29 ft.

Difference between low and high tide: A tidal rise and fall of 0.40 m. maximum.

Port Entrance to Tunis: Through canal from La Goulette to Tunis 9,700 m. long, 45 m. wide and dredged to 7.5 m.

Depth of water at entrance: 7.5 m.

Depth of water in the port: From 7.5 m. to 5.0 m.

Difference between high and low tide: Insignificant.

ANCHORAGE: Anchorages in the port roads are safe except during strong winds and heavy seas from the North or N.E.; good holding ground.

Larger vessels anchor about 0.5 miles N.E. of the sea buoy in depths of 12 m. – 14 m. Small vessels may anchor either North or South of the approach channel in depths of 7 m. – 9 m. in the vicinity of Buoys No. 4 and 5 provided that they do not obstruct navigation in the entrance channel.

RESTRICTIONS: Tankers and ore carriers are not allowed to enter and leave port during the hours of darkness. Depth of water at LW is 32 ft.

MAX. SIZE: *La Goulette:* Up to max. draft 29 ft. Max. length 220 m. *Tunis:* Max. draft 6.0 m.

HEALTH: Master is required to complete Declaration of Health on arrival. Vessels which have previously called at another Tunisian port are given automatic Free Pratique except in time of epidemic.

RADIO: Tunis Radio 24 hour watch on 2182 kHz; radio-telephone from 0600 to 2200 hrs. on 500 kHz. Goulette Radio call sign 3VW. 24 hour watch on 2182 kHz and VHF Channel 16.

TUGS: Available to assist berthing as directed by the Pilot. Tugs join vessels in the vicinity of Buoys No. 4 and 6, that is 400 or 500 m. from the berths. Vessel's lines always used. Vessels over 1,500 g.r.t. not equipped with bow-thrusters must use 2 tugs.

BERTHING: *La Goulette:* One quay of 1,050 m. and one quay of 160 m. for Ro-Ro vessels. One ore berth, unloading rate 2,000 t.p.h. Facilities also available for handling general cargo, grain, phosphates and Ro-Ro.

Also see "Shipmaster's Report" and "Plan".

Tunis: In some places close to the Northern Quay, the water level may be less than 5.0 m., the port remedy the berthing of vessels of 5.0 m. draft and more by placing a floating crane between the vessel and the berth. Total length of quays – 1,135 m.

CRANES: *La Goulette:* 3×6 tonne electric cranes on rails; 1×18 ton mobile crane; 1 pontoon crane × 10 tonnes and 1 pontoon crane × 60 tonnes for heavy lifts.

Equipment: 6×4-10 tonne lift trucks, 20×3-28 tonne lift trucks (private), 12 tractors (private), 5 Ro-Ro trucks (private), 16×6-22 tonne trailers (private).

Tunis: Cranes: 1×60 ton floating crane, 2×10 ton cranes on rails.

Equipment: 1×4 tonne and 1×8 tonne forklifts; 9×3 tonne, 3×5 tonne and 2×10 tonne forklifts (private). 5 tractors (private).

STEVEDORES: Gangs are ordered before 0600 hrs. for morning work; before 1300 hrs. for the afternoon and before 2000 hrs. for night work.

MEDICAL: Preferable to advise Agent in advance if doctor required on board. Crew members should possess international vaccination certificates.

TANKERS: One berth is reserved for tankers with a max. draft of 27 ft. 6 in.

FRESH WATER: Hydrants are situated on the quays supplying fresh water at a rate of 12 – 15 cu.m.p.h. A water barge "El Ain" of 50 tons capacity can supply vessels berthing in "Basin Sud".

FUEL: Available by road tanker.

FIRE PRECAUTIONS: A watchman has to be permanently employed on board tankers when alongside. A tug equipped with fire-fighting equipment is required to stand by tankers discharging.

CONSULS: Following countries are represented in Tunisia:

Algeria
Australia
Denmark
France
Great Britain
Greece
Italy
Morocco
Norway
Panama
U.S.A.
Venezuela

REPAIRS: Machinery and boiler repairs can be effected on board. For large repairs it is necessary to send part to the shipyards of Soconema at Menzel Bourguiba 70 miles away.

DRY DOCKS: At Menzel Bourguiba 4 dry docks, the largest of which is 253 m. long, 41 m. wide, 10.5 m. depth.

SURVEYORS: B.V. and D.N.V.

GANGWAY/DECK WATCHMEN: The employment of gangway watchmen is necessary.

OPENING/CLOSING HATCHES: Performed by ship's crew or by stevedores on payment of special premium.

CUSTOMS ALLOWANCES: Each crewman is allowed 2 packets of cigarettes or 4 cigars or 50 gm. of tobacco and 1 opened bottle of alcohol.

REPATRIATION: Can be arranged.

AIRPORT: Tunis – Carthage Airport is 15 km. from La Goulette and 5 km. from Tunis. Regular daily flights to Europe and North Africa.

TIME: GMT plus 1 hour throughout the year.

HOLIDAYS: 20th March (Independence Day); 1st May (Labour Day); 25th July (Republic Day); 15th October (Evacuation Day). In addition there are 13 other holidays on which work is carried out on payment of overtime.

POLICE/FIRE/AMBULANCE: Police, Tel: 197. Fire, Tel: 198. Ambulance (express), Tel: 141313. Ambulance (S.O.S.) 341269.

TELEPHONES: Telephones can be connected on board vessels and are compulsory for tankers.
SHORE LEAVE: Crew members are permitted to go ashore after obtaining a pass from the Port Police.
DEVELOPMENTS: No significant changes in La Goulette, except that the "moving Berth No. 7" (pontoon) is now replaced by a fixed one for car ferries and the turning area inside breakwaters is now extended and buoyed to help turning vessels of 220 m.

SHIPMASTER'S REPORT: January 1982.
Documents: It is essential to ensure that all arms and ammunition are declared at first port of entry in Tunisia and that the proper authority has them sealed inside the bond during the entire stay in Tunisia.

When coming from another Tunisian port all cash (Dinars) remaining from sums drawn in the previous port must be declared.
Pilotage: The VHF is the only viable communication for the pilot service, the Sea Buoy being too far for either visual or sound signals.

When required to enter, the vessel will be told to proceed inwards down the approach channel which has been dredged to 12.25 m. from Sea Buoy to the moles. This was completed on 20th December, 1981 as the first part of the work for the new port being constructed on the Southern side of the canal to Tunis and some 3 kilometres inside the present port of La Goulette.
Berths: The elevator/silo berth in Basin Sud has a depth of water of over 10 m. throughout its whole length and extending some 80 m. to the seaward end as the actual wharf is short (about 135 m.) and vessels have to warp along the face to ensure all hatches are serviced. Discharge rate 1,200 tons per day.

There is *no water* at this berth either drinking or boiler nor can it be taken at the adjacent tanker berth or the iron ore pier.
Developments: The port appears to be concentrating on the Ro/Ro berths and the new passenger terminal to the exclusion of the more mundane cargoes. The traffic is such that there is reluctance to allow a vessel from the silo that is short of water to take up a berth on the Northern quay. The harbour area is to be dredged in stages so as to give access, eventually, to the new port under active construction.
Telephones: There are no telephones available at the silo berth unless access can be had to the one in the office, while the Oil Berth unit is only available if there is a tanker in the berth.

AUTHORITY: Direction du Port de Tunis-Goulette, Batiment Adminstratif, Port de la Goulette, C.P. 2060, La Goulette, Tunisia. *Tel:* 735300. *Telex:* 15386 Oporna. *Cables:* Ofpornatu. *FAX:* 736511. *Contact:* Omar Majdoub, Port Director (Tel: 736832). Hkimi Samir, Port Captain (Tel: 735676).
Tunis: Port Office at 28 Avenue de la Republique, 1000 Tunis, Tunisia. Tel/Telex/Fax/Contacts as above.
AGENT: See "Sfax".

(B) RADES.

LOCATION: Lat. 36° 48' N., Long. 10° 16' E.
DOCUMENTS: See Part (A).
PILOTAGE: See Part (A). Pilot boards beyond Buoys No. 6 and No. 7 of La Goulette entrance channel.
ANCHORAGE: Same as La Goulette. Inside the harbour, anchorage is prohibited East of Phosphate Quay, where high voltage electric cables are lying.
RESTRICTIONS: Maximum clearance above water level is 42 m.

Tankers and cereal carriers are not allowed to enter, leave, or shift during hours of darkness.
MAX. SIZE: Up to 9.0 m. draft and 190 m. LOA.
HEALTH: Sanitary officers board with Pilot outside La Goulette and deliver Free Pratique after inspection and reception of Health Declaration.
RADIO: Same as La Goulette.
TUGS: 2 tugs of 1,600 h.p. each are available to assist, as directed by Pilot.
BERTHING: 5 Ro/Ro berths and 2 berths for general cargo of 150 m. length each. Maximum draft allowed is 9.0 m. (29 ft. 06 in.).

One berth for phosphates or bitumen of 9.0 m. draft and 120 m. length.

One berth for oil and gas carriers of 8.36 m. draft (27 ft. 06 in.) and 170 m. length. Discharging rate is about 5,000 tons per day.

One berth for cereal carriers of 9.75 m. (32 ft.) draft and 190 m. length. Discharging rate is about 300 t.p.h.
Dangerous Cargoes: To be discharged on lorries immediately. One tug is compulsory for safety assistance during unloading.
CONTAINER HANDLING FACILITIES: Telescopic elevators on pneumatics for 20 ft. and 40 ft. containers and 10 forklifts of 4 tons and 10 tons capacity.

Quay stretches over 110 ha., 50 ha. store yards under Customs control, of which 22,500 sq.m. are covered.
CRANES: 2 cranes of 80 tons at 12 m. and 30 tons at 30 m.
STEVEDORES: 3 shifts from 0700 hrs. to 1300 hrs.; from 1400 hrs. to 1900 hrs. and from 2100 hrs. to 0300 hrs. It is possible to extend each shift by one hour of extra time.
MEDICAL: Same as La Goulette. Also STAM dispensary for first aid. Call Pilot on Channel 9 or 16 for ambulance OPNT, or dial 198 "Protection Civile".
TANKERS: See "Berthing".
DENSITY: 1028.
FRESH WATER: Available by hose at every berth and by barge of 20 tons capacity at oil and cereal berths.
FUEL: Available by trucks.
CONSULS: More than 38 countries are represented in Tunis.
REPAIRS: Light deck and engine repairs are permitted on request to Harbour Master. Possibility of shifting to waiting berth for repairs that may cause delay to vessel.
GENERAL: *Services:* Agents, ship chandlers, garbage collectors, etc., are available.
Ferries: Free of charge ferries between Rades (near Phosphate Quay) and Northern side of La Goulette are available every 15 minutes from 0545 hrs. to 2115 hrs.
AUTHORITY: See Part (A).

LA SKHIRRA (Terminal Platform): 34.18 N. 10.09 E.

(See Plan)

DOCUMENTS:
5 Crew Lists.
2 Lists of Crew Personal Effects.
2 Stores Lists.
5 Passenger Lists, if passengers carried.
Manifest of cargo on board.
Manifest of cargo in transit.

On arrival, Master must declare to Customs: Cigarettes, spirits, narcotics, arms, bunkers, paint, etc.
PILOTAGE: Compulsory for berthing alongside. Pilot employed by TRAPSA. ETA required 48 hours and 24 hours before arrival. Call Pilot by international code signals on arrival, or by VHF Channel 16. TRAPSA will advise if vessel required to anchor, or berth immediately. Pilot boards 2 miles off the terminal by black and white motor launch. If it is necessary (vessel without chart) Pilot will proceed outside the port limits.
ANCHORAGE: Vessels should anchor outside the prohibited zone which is limited to the South by the parallel of Buoy No. 5 and to the East by bearing 350° from the terminal platform light.
MAX. SIZE: Length 300 m. Draft 47 ft. 6 in. or up to 50 ft. at high water.
HEALTH: International Quarantine signals to be shown on arrival. Vessels normally receive Free Pratique at the quay after berthing. Suspect vessels must wait at anchor until Pratique is given.
RADIO: TRAPSA operate coastal station La Skhirra Radio (3VP). vessels to make contact 48 hours before arrival. Messages for TRAPSA passed by other stations should be addressed "Rapetrol Laskhirra".
VHF: The harbour office and loading terminal are equipped with VHF on the following channels: 156.8 MHz (calling), 156.6 MHz, 156.7 MHz 156.55 MHz Contact with tugs can be made on all 4 channels.
TUGS: 3×3,000 h.p. (32 tons bollard pull). 3 tugs required if over 70,000 d.w.t. Lines provided by tugs.
BERTHING: Two loading berths situated one each side of terminal platform connected by a gangway from the shore. For safe manoeuvring tankers are recommended to arrive with ballast up to 30% of Summer deadweight. Mooring may need to be doubled during months o December to April, when sudden violent squalls sometimes occur. A vessel alongside requiring tug assistance may sound one long blast at frequent short intervals.

Depth alongside loading berths is 15 m. – 16 m. Loading platform is served by 3×30 in. oil pipelines and 1×18 in. ballast line.
Berth No. 1: 2×12 in. flexible hoses. Max. loading rate 6,000 cu.m./hr.
Berth No. 2: 4×12 in. flexible hoses. Max. loading rate 12,000 cu.m./hr.
Paktank: A new tank installation of Paktank Mediterranee S.A. has been constructed for storing fuel oil, gas oil, naphtha and kerosene. 2×12 in. flexible hoses will give a loading/discharging rate of up to about 3,000 t.p.h. Bunker facilities can be expected in the near future.
Phosphoric Acid: New berth for carriers up to 15,000 d.w.t. an max. draft 9.0 m. at H.W. Fresh water available.
MEDICAL: Advance notice required of any medical assistance needed. Hospital facilities available. Crew members require valid vaccination certificates.
BALLAST: All ballast, except permanent, to be pumped to shore installation. Heavy fines for water pollution. Max. rate 3,000 cu.m./hr.

The terminal will not accept ballast water mixed with fuel oil.
FRESH WATER: Available from shore connection.
FUEL: Not available. See "Berthing – Paktank".
CONSULS: Following countries are represented at Sfax: France, Gr Britain, Italy, Libya, Netherlands and Sweden.
REPAIRS: There are no facilities for repairs. Nearest at Sfax.
CUSTOMS ALLOWANCES: 2 packets cigarettes allowed each Cr member.
REPATRIATION: Can be arranged by Agent.
AIRPORT: Airport at Tunis 350 km. away, or Sfax 80 km. away.
TIME: GMT plus 1 hour throughout the year.
SHORE LEAVE: Not allowed in Trapsa installation. Can be arrang through Agent.
GARBAGE DISPOSAL: Drums will be provided on board.
WASTE OIL DISPOSAL: Dirty ballast pumped ashore.
SEAMAN'S CLUBS: None.
AUTHORITY: Compagnie des Transports par Pipe-line au Sah (T.R.A.P.S.A.), 3050 La Skhirra, Tunisia. *Tel:* 04-295453, 04-295 *Telex:* 40811 TN. *Cables:* Rapetrol, La Skhirra. *FAX:* 04-295 *Contact:* Mr. Dahmouni, Port Director.

AGENT: See "Sfax".

SFAX: 34.43 N. 10.46 E.

DOCUMENTS: On arrival Masters must submit a written declaration giving the name of ship and of the Master, Owner or Charterer, vessel's tonnage, draft, cargo, port of origin and destination, number of crew on board. The Master must also declare to the Customs the following: Bunkers, paint, arms, narcotics, spirits, cigarettes.

Also required:

Customs Manifest.
Crew List for Police.
List of Dangerous Cargo.
Health Declaration.
Cargo Manifest, all cargo on board.

PILOTAGE: Compulsory for all vessels over 100 gross tons. Pilotage commences at the outer buoys of the entrance channel. Day signals for Pilot, International Code Signal "P.T" or Code flag "S" hoisted alone or below code pennant. Night signals according to International rules. For entry at night, vessels must radio Harbour Master at the latest 1 hour before sunset to confirm their intention. Before boarding, Pilot will check that vessel does not exceed the max. authorised draft. If the "Entry Prohibited" signal is not hoisted at the port signal mast, vessel may await Pilot in the channel axis about 1 mile off the outer buoys. Pilot boards from a launch 11 m. long, displaying international pilot signals. Pilot may be contacted by radio through Radio Port de Sfax. Agent must give advance notice of vessels arrival to Harbour Master 48 hours and 24 hours beforehand.

ANCHORAGE: In immediate vicinity of the port, depths up to 15 m., good holding ground.

APPROACHES: *Port Entrance:* Channel is 6.15 km. long, 60 m. wide and dredged to 11.0 m.

Depth of water at entrance: 10.5 m.
Depth of water in the port: 10.5 m.
Difference between high and low tide: Mean amplitude Spring tides (1.20 m.).

MAX. SIZE: Length 185 m. and draft 10.5 m. at Petrol Pier and Sulphur Pier and 200 m. at all other berths.

HEALTH: To request Free Pratique, hoist "Q" flag on arrival, or radio to Port Health Service. Pratique normally given at the berth after mooring. Suspect vessels are required to wait at anchor until Pratique is given.

RADIO: Sfax. Port Call – call sign 3VW2, operating 24 hours on 2182 kHz and Channel 16 VHF.

Calling frequency 2182 kHz, working frequency 1743 kHz CR3. Used only for communications with port services. Meteorological information provided on request.

TUGS: Join vessel at outer buoys or according to circumstances in the outer port. 1×1,200 h.p. and 1×1,600 h.p.

BERTHING:

Total area of the port including the exit: 55 hectares.
Maximum draft: 10.5 m.
Number of basins: 3
  Main basin, surface area 4 hectares, depth 10.5 m.
  Tanker basin, surface area 5 hectares, depth 10.5 m.
  Yacht basin, surface area 4.25 hectares, depth 8.5 m.
Length of quays: 2,744 m.
  Commercial (N-W), 520 m., ancillary 95 m.
  Commercial (South), 667 m. (incl 150 m. Ro-Ro berth).
  Phosphates, 584 m.
  M'Dhillia, 248 m.
  NPK Sulphur, 370 m.
  Cotusal (salt), 110 m.

CRANES: 1 floating crane of 60 tons capacity; 2 cranes of rails on 10 tons capacity.

Equipment: 2×4 ton, 1×8 ton and 1×10 ton forklift trucks.

STEVEDORES: Available, arranged by Agent basis vessel's ETA.

MEDICAL: Advance notice preferred if medical attention required. Hospital facilities available. Vaccination certificates required for all crew.

TANKERS: Length of berth 150 m., depth 10.5 m.

DENSITY: 1028.

FRESH WATER: Hydrants fitted on all quays. Written request for replenishing water is required by Harbour Master.

FUEL: Gas oil and lubricants available by barge.

CONSULS: Local representatives for Belgium, Denmark, France, Greece, Italy, Netherlands, Norway, Portugal, Spain, Sweden and U.K.

REPAIRS: Small engine repairs can be effected. Floating dock for vessels less than 350 tons.

GANGWAY/DECK WATCHMEN: Normally ship's crew. Available from shore if required.

OPENING/CLOSING HATCHES: Normally performed by crew.

REPATRIATION: Can be arranged.

AIRPORT: 10 km. from the port. Daily flight Sfax – Tunis and Tunis – Sfax. Twice weekly flights Paris – Sfax and Sfax – Paris.

TIME: GMT plus 1 hour throughout the year.

HOLIDAYS: 1st January; Aid El Kebir; Hegirian New Year; 20th and 21st March; 9th April; 1st May; Mouled; 25th July; 13th August; 15th October; Aid Es Seghir; Aid El Kebir.

POLICE: Tel. 223925.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Required by all crew.

SHIPMASTER'S REPORT: 1976 (Updated 1988).

Documents:

1 General Declaration.
2 Stores Lists.
3 Crew Lists.
1 List of Dangerous Cargo.
1 Health Declaration.

Pilotage: To be contacted on VHF Channel 16 throughout 24 hours. Also Harbour Master may be contacted at the same hours on Channel 16. At other times the same Authorities may be contacted by radio 2182 kHz.

My vessel had a draft of 26 ft. By the VHF the Harbour Master ordered me to enter the channel and continue up to the Outer Basin where a Pilot would embark on the Port side.

It was later confirmed both by the Pilot and Agent to be usual for ships up to 10,000 tons to enter the Outer Basin without Pilot. Also upon our departure, the Pilot disembarked at the Outer Harbour Basin (Authority state that this is rare and only if vessel visits port regularly).

The Agent told me the channel was 34 ft. deep, although no measurements have been taken for 10 years. Lately a ship with draft of 33 ft. has passed through the channel without any difficulties.

An unmarked wreck is situated in position Lat. 34° 37.5' N., Long. 10° 49.5' E. The best way to approach the outer channel from S.W. or South, would therefore be to navigate to a position 6.5 miles S.E. of Tina's Lt. Tr., then change course for the outer buoys of channel.

The only beacons illuminated around Kerkenah Banks were Beacon No. "1" and No. "8". All other buoys were in correct position, but sometimes extinguished.

Stevedores: Work in shifts from 0700 hrs. till 1300 hrs. and from 1400 hrs. till 2000 hrs. In case of sailing it is possible to arrange overtime up to 2100 hrs. It is also possible to have night gangs from 2100 hrs. till 0300 hrs.

AUTHORITY: Office des Ports Nationaux Tunisiens, Direction du Port de Sfax, Rue Okba Ibn Nafaa, 3029 Sfax, Tunisia. *Tel:* (04) 225644, 225040, 225070. *Telex:* 40847 Porsfa. *FAX:* 225107. *Contact:* Zine El Abidine Khalki, Port Director (Tel: 210250). H. Ben Hassen, Port Captain (Tel: 225040).

AGENT: Shipping Maritime Agency – Tunisia "Shimat Tunisia", P.O.Box 504, Sfax 3000, Tunisia. Tel: 216-4-210463, 298263. Fax: 216-4-298314. Telex: 40829 Shima Tn.

SOUSSE (Soussa): 35.49 N. 10.39 E.

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists.
4 Crew Personal Effects Lists.
Health Declaration.
Manifest of Provisions on Board.
2 copies Vessel's Particulars Declaration.

PILOTAGE: Contact Pilot Station on VHF Channel 16 or Tel. (03) 224402 and 225755.

RESTRICTIONS: Entrance to the port coming from the sea is East to West. Channel 820 m. long, dredged to 10.5 m. Depth in port area 9.0 m., difference in high and low water 0.25 m.

MAX. SIZE: Max. LOA. 170 m., max. draft 8.7 m.

HEALTH: Free Pratique normally given at the quays after mooring. Pratique is automatic for vessels coming from another Tunisian port. In case of suspected disease on board vessel will be ordered to quarantine anchorage.

RADIO: Sousse Control "3VW4" on 2182 kHz and VHF Channel 16.

TUGS: One tug of 1,760 h.p.

BERTHING: One basin for ocean-going ships, yacht basin and fishing vessel harbour.

Length of quays 830 m., 8 berths.

South Basin Quay, length 220 m., dredged to 8.7 m. (2 berths – one is a Ro-Ro berth with width 30 m.).

CRANES: 1×18 tons, 2×10 tons, 1×80 tonne, 1×60 tonne, 1×40 tonne and 2×25 tonnes.

STEVEDORES: Minimum of 24 hours' advance notice of ETA to Agent is required.

MEDICAL: Doctor available to board vessel. Hospital, private clinics and all facilities available.

REPAIRS: Welding and electrical repairs possible.

GANGWAY/DECK WATCHMEN: It is recommended to employ shore watchmen.

OPENING/CLOSING HATCHES: Carried out by crew or by stevedores at the request of Master, but at a charge.

CUSTOMS ALLOWANCES: Each crew member is allowed 1 carton of cigarettes and 1 opened bottle of wine or spirits. In case of a prolonged stay in port, Customs may renew these quantities.

AIRPORT: Skanes Monastir – 15 km. from the port. Tunis/Carthage is 130 km. from the port.

TIME: GMT plus 1 hour throughout the year.

HOLIDAYS: There are 13 days official holiday during the year. Work can be carried out on all holidays except 1st May on payment of 100% overtime.

IDENTIFICATION CARDS: Crew member's Identification Cards will be collected by the Immigration service and exchanged for shore passes while vessel is in port.

AUTHORITY: Office des Ports Nationaux Tunisiens, Rue Abdallah Ibn Zoubaier, Sousse 4000, Tunisia. *Tel:* (03) 225755, 224401, 226857, 288892. *Telex:* 30960. *FAX:* (03) 224923. *Contact:* Ferid Karaa, Port Director (Tel: (03) 221763). Mohamed Ben Kaliaa, Port Captain (After hours Tel: (03) 257244).

AGENT: See "Sfax".

TAZERKA: 36.36 N. 11.41 E. (See Plan)

PORT LIMITS: 5 nautical miles radius from Tazerka FPSU.
DOCUMENTS:
4 Crew Lists.
Stores List.
Crew Declaration.
Currency Declaration.
1 Health Declaration.

APPROACHES: There are clear navigation approaches to and from the Tazerka FPSU. From time to time, special work barges and rigs will operate in the vicinity of the Tazerka FPSU. Information on such rigs will be broadcast through Normal Navigation Warnings and also by Tazerka Operations when visiting tankers first make communications contact.

PILOTAGE: A Berthing Master will board the visiting tanker at a location 2 nautical miles downwind of the Tazerka FPSU. He will remain on board the visiting tanker until after departure and will disembark when the visiting tanker is clear of Tazerka FPSU.

The Berthing Pilot/Loading Master will be familiar with pilot/berthing/unberthing vessels at Tazerka and will advise the Master of the visiting tanker accordingly. Throughout the operation, he will be the liaison between the Master of the visiting tanker and the Tazerka SIS (Senior Installation Supervisor). He will advise the Master of the visiting tanker on documentation procedures and carry out any assistance.

ANCHORAGES: None.

RESTRICTIONS: Daylight mooring only.

Weather operating limits will be decided at the time of operations, but are approximately as follows:
(a) Maximum mean hourly wind speed = 20 knots.
(b) Maximum significant wave height = 2.5 m.
(c) Minimum visibility for berthing = 0.5 nautical miles.

MAX. SIZE: Minimum LOA 170 m. Maximum LOA 275 m. Under special circumstances LOA may be extended to 297 m.

No limit on beam and draft.

Minimum deadweight 20,000 tonnes (approx.). Maximum deadweight 140,000 tonnes (approx.).

Maximum displacement during berthing 150,000 tonnes.

RADIO: Vessels to send an initial ETA message to Agent via Tunis Radio on departure from the previous port and updated 72 hours, 48 hours and 24 hours prior to arrival at Tazerka. Thereafter changes greater than 3 hours should be reported. Where a ship departs from a port which is less than 72/48/24 hours' steaming distance away she shall advise her ETA as soon as possible.

ETA messages should include the following information:
(a) Location of cargo manifold in relation to the length overall of ship.
(b) Type of moorings (synthetic rope, wire, wire with synthetic tails, etc.)

VHF: Tazerka Floating Production Storage Unit is equipped with VHF Channels 16/6. Notice of Readiness may be issued when vessels are within 5 nautical miles radius of the Tazerka FPSU.

TUGS: One supply boat available to assist with mooring/unmooring.

BERTHING:
Tanker's Draft: The tanker must be on a suitable draft and trim for the approach run. No hard and fast rules will be applied but Masters of visiting tankers must bear in mind the need for accurate steering with a minimum of speed coupled with good stern power ability.

As a guideline a suitable draft is provided by applying the following criteria:
(i) Moulded draft amidships (dm) in metres to be not less than:
$dm = 2.0 + 0.02L$
(ii) Trim by the stern not greater than 0.015L;
(iii) In any case draft at the after perpendicular not less than that which is necessary to obtain full immersion of the propeller(s).

This is in accordance with the requirements of the "International Conference on Marine Pollution, 1973" Regulation 13. In practice it has been found that ballast required to achieve these criteria typically approximates to 25% of Summer Deadweight.

Vessels berth port side to the starboard side of a Floating Production Storage Unit (a converted VLCC) which is moored to a SPM consisting of a yoke and rigid single anchor leg system. The FPSU is free to rotate through 360°. Vessels will berth against up to 5 inflatable Low Pressure Floating Fenders.

Wire moorings must have synthetic rope tails with a breaking strain at least 5% greater than the minimum breaking load of the wires to which they are attached.

Two long rope messengers to be ready forward and aft. Both anchors home and secured. (If reducers and/or tails are not available on board, advise Tazerka FPSU with initial ETA. Prepare to lift this equipment on board from the pilot boat).

Immobilisation of engines not permitted under any circumstances.

HOSE CONNECTION: Port side midships – 2×12 in. 150 ASA hoses. Port side derricks should be rigged for minimum 5 tonnes SWL.

Cargo manifolds must comply with OCIMF Standards for Tanker Manifolds, 1981 Edition.

LOADING/DISCHARGING: Typical VLCC pipeline system with special manifold located 225 m. from stem on the starboard side.

2×12 in. hoses for Crude Oil discharge. Maximum loading rate – 7,000 cu.m.p.h.

1×8 in. hose for Fuel Oil receiving. Maximum receiving rate – 1,000 tonnes/hr.

1×3 in. hose for Diesel Oil receiving. Maximum receiving rate – 50 tonnes/hr.

Concurrent receipt of fuel oil and diesel oil with crude oil discharge is required.

BALLAST: No dirty ballast facilities. It is a condition of loading that vessel's ballast is clean and suitable for discharge to sea as defined in MARPOL 1973, Regulation 13. All other ballast shall be retained on board.

MEDICAL: Emergency cases can be treated.
DENSITY: 1025.
FRESH WATER: Not available.
REPAIRS: Not available.
REPATRIATION: Not possible.
TIME: GMT plus 1 hour throughout the year.
REGULATIONS: Access to FPSU not permitted.

The Authorities of all Arabic Ports subscribe to the Israeli boycott and administer checks on ships. Apart from the usual checks on Log Books, etc., store rooms, can be inspected for evidence of Israeli produce. If found, ships can be fined and/or blacklisted from all countries subscribing to the boycott.

It is recommended that stores be checked to ensure that there are no items which can be interpreted as being of Israeli origin. This includes items which bear trade marks incorporating Hebraic symbols such as the six point star, irrespective of the country of origin.

AGENT: See "Sfax".

ZARZIS: 33.33 N. 11.07 E. (See Plan)

LOCATION: The port is situated at the S.E. point of the Gulf of Gabes, almost 70 miles S.E. of the port of Gabes and 15 miles South of Djerba. Zarzis is the last coastal town in Tunisia before Libya.

APPROACHES: From offshore (West) the town appears to be surrounded by palm and olive trees, and at night the flare stack of the Ezzaouia oilfield can easily be recognised.

Coming from the North, the landmarks are:
The Ras Turgueness Tower (white light 5 sec., range 24 miles).
Ras Marmor (Lat. 33° 37' N., Long. 12° 03' E.) ends the chain of steep hills which hug the coast to the South.
The ERTT pylon is easily distinguishable at night with its red and white lights.

To the S.E. of Zarzis, the coast is low-lying, with the El Biban banks stretching out 12 miles from the coast.

Access to the port is by a channel 8.4 km. long and 130 m. wide, dredged to 13.0 m. and aligned W.S.W./W.N.W. from seaward.

Navigation Aids:
Lighthouse: Lat. 33° 28' 41" N., Long. 11° 07' 50" E. The lighthouse is a masonary structure with red and white horizontal bands. Height 9.4 m. Light: 3 white ev. 15 secs., range 10 miles.

Fairway Buoy: Lat. 33° 29' 43" N., Long. 11° 17' 44" E. Colour: Red and white vertical stripes. Top Mark: Red sphere. Light: Fl.W.Ev.4 sec.

The channel is marked by 8 buoys on the banks (Nos. 1-8) and by 4 buoys in the turning circle (Nos. 9-12).

PILOTAGE: Compulsory. Pilot available 24 hours a day.

ANCHORAGE: The anchoring ground is located in around 20 m. depth and stretches 1 mile to the East of the Fairway Buoy.

MAX. SIZE: Draft 9.0 m. (11.0 m. after dredging).

TUGS: A tug of 1,200 h.p. and a pilot boat are available. If necessary a second tug of 1,600 h.p. could be ordered 48 hours before the arrival of the vessel.

BERTHING: The port has 2 basins:
(a) An inner basin for fishing vessels.
(b) A main basin of 35 ha. and 12.00 m. depth. This basin has a turning circle of 450 m. diameter and includes:
  (i) A linear commercial quay of 610 m. dredged to 12.00 m.
  (ii) A service quay of 155 m. dredged to 5.00 m.

The onshore occupied surface area is 32 ha. and a warehouse of 5,000 sq.m. is available.

The port is protected by a breakwater 1,505 m. long, sheltering the port from the N.E. swell.

MEDICAL: There is a hospital in Zarzis.

TANKERS: The Petroleum Quay is 185 m. long and has a depth of 10.0 m. The quay is 2.5 m. above chart datum. Rise of tide at Springs is 1.0 m. Max. LOA with special permission is 193 m.

The facility has been built for the handling of "Ezzaouia" Crude. The typical cargo size is 20,000 tonnes – 25,000 tonnes, due to the LO and draft restrictions.

IGS, COW and coils are required.

Permanent or segregated ballast vessels only are allowed.

FRESH WATER: Available.
AIRPORT: Djerba (50 km.).
TIME: GMT plus 1 hour.
GENERAL: *Charts:* 3604, 4245 and 4247.
Provisions: Available.
Zarzis Free Zone: Close to the port of Zarzis, and only 2 hours fro Europe, is the Societe de Developpement et d'Exploitation de la Zo Franche de Zarzis (Company for the development and use of Zar Free Zone).

This benefits from a rich environment provided by the close proxim of markets with high purchasing power, oilfields (6,000 barrels/day o a radius of 1,000 km.), geothermal waters (production of early fruit a vegetables), aquaculture and intense tourist activity. Zarzis-Djerba Fr Zone, a future crossroads for three continents, enjoys a port and airp infrastructure on an international scale, and is served by a road netw to and from Africa which puts Tripoli at 2 hours, Algiers at 10 hours, a It also offers the usual facilities with a unique perspective, and has the tax advantages of a free zone in addition to the attraction of a loca with fully serviced land, and a qualified workforce managed exclusi by contract.

Address: Societe de Developpement et d'Exploitation de la Z
Franche de Zarzis. Registered Office: Port de Zarzis, BP 3
Zarzis 4170. Tel: 216 5 680 800/682 856. Fax: 216 5 682 8
Telex: 51909 Zfzar Tn.

WEATHER: *Winds:* Prevailing winds are from the East in Summer and from the West in Winter.

Storms are rare and are confined on average to 3 days in Winter, 5 days in Spring and 1 day in Summer.

The Sirocco blows in a South to S.W.'ly direction and can get up to 40 knots. It often stirs up clouds of dust and sand which reduces visibility.

Tides and Swell: The average tidal range is 1.10 m. at Spring tides and 0.30 m. at Neap tides. However, the wind can cause an increase of 0.20 m. at high tide and a decrease of 0.10 m. at low tide.

As for the swell, that of the South to S.E. sector does not have enough open sea to develop, owing to the existence of the El Bilan bank (previously El Biban), located 20 km. S.E. and characterised by shallows.

The prevailing swell is that of the North to East sector.

During the Summer season, waves reach a height of 1.00 m. to 1.50 m.

In addition, the annual significant wave height is 4.00 m., direction 060°, and this can be exceeded during stormy periods.

AUTHORITY: Office des Ports Nationaux Tunisiens, Direction du Port de Zarzis, B.P. 291, Zarzis 4170, Tunisia. *Tel:* (05) 681827. *FAX:* (05) 683485. *Contact:* H. Sassi, Port Director (Tel: (05) 683486).

National Ports Office, Administrative Building, Postal Code: 2060 La Goulette, Tunisia. *Tel:* 735300 (6 lines). *Telex:* 15386 Oporna. *Cables:* OFPORNATU. *FAX:* 735812.

AGENT: See "Sfax".

NOTES

Please also advise Shipping Guides Ltd.

Turkey

GENERAL: (See Plan)

NOTE: Please read the latest "Shipmaster's Reports" and "Reports" in this section first. Older "Reports" have been retained for general information only.

On arrival off Canakkale coming from the Aegean, or off Buyukdere coming from the Black Sea, ships must stop for sanitary inspection. However, tankers with a d.w.t. over 100,000 tons proceeding to the Gulf of Izmit to discharge or load petroleum products may obtain Pratique there without stopping at Canakkale, provided Agents are notified 96 hours in advance.

In the event of bad weather at Canakkale, vessels may be allowed to continue their voyage to Istanbul and undergo the sanitary inspection there. Permission to do so is notified to vessels by the Canakkale Sanitary Office with the signal "H.M." in daytime and three vertical lights (green, white, green) at night.

Pilotage through the Dardanelles and the Bosphorus is compulsory. Pilot stations, equipped with VHF operating on Channel 16, are located at Canakkale, Istanbul and Telli Tabia (Upper Bosphorus).

Turkish Flag: All foreign ships are required to fly Turkish flag during their stay in Turkish ports or when passing through the Straits (Dardanelles and Bosphorus).

Sanitary and Port Inspections: On arrival at a Turkish port, every ship is boarded by a Sanitary Officer for examination. Nobody may join or leave the ship before this inspection is completed.

The ship must produce the following documents:

Sanitary Declaration Form.
Derat Certificate.
Ship's Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Cargo Ship Safety Construction Certificate.

Police Customs Controls: After obtaining Free Sanitary Pratique, the ship must likewise produce:

(1) 3 Crew Lists together with every member's Passport, Discharge Book or Z-card.
(2) 1 List of Provisions, Stores and Bunkers.
(3) 1 Declaration of all Monies or cheques carried in the ship's safe.
(4) Manifests of all cargo on board, whether for discharge at Turkish or foreign ports.
(5) 1 List of Passengers Landing in Istanbul showing nationality, number, date and source of entrance visa (if such visa is required) together with the Passports.
(6) 1 List of Transit Passengers together with the Passports.

Documents covered by items 1, 2, 3, 4 and 6 as well as a List of Passengers Embarking at Istanbul are also required on departure.

Police and Customs Controls are effected at Istanbul when arriving from the Aegean and at Buyukdere when arriving from the Black Sea. However, vessels under 500 n.r.t. have to undergo control formalities at Canakkale, both inwards and outwards, apart from those to be effected at Istanbul. It is recommended to prepare the accommodation ladder to facilitate the boarding of officials.

Excepting the case of tourist vessels, the Customs Officers will seal stocks of provisions and tobacco, spirits, as well as any other items in bond. Sufficient quantities of the foregoing will be left unsealed for the needs of the ship during the stay in port.

If stores left unsealed are exhausted while a ship is in port, a request to the Customs Officers will ensure further withdrawal.

The seals must not be broken before the ship's exit from territorial waters or if sailing from one Turkish port to another Turkish port.

Special Rules for the Passage of the Bosphorus: During their passage through the Bosphorus, ships must regulate their speed, without exceeding the 10 knot limit over the bottom, so that piers, landing stages, etc., or other craft (sailing and rowing boats, etc.) may not be damaged by their wash. Further, they must take care not to hinder fishing and diving operations or to damage submarine telephone, telegraph or electric cables.

Sound Signals, Wireless Sets: It is forbidden to make use of sirens or steam whistles in the harbour, except for manoeuvring purposes as laid down in the regulations for the avoidance of collisions.

Radio transmitters are not sealed on arrival of a vessel but it is recommended that their use in Turkish territorial waters be restricted to cases of emergency.

Refuse: No refuse such as garbage, ashes, polluted oil and the like can be thrown or pumped overboard, nor any scraping, cleaning of tanks and/or bilges can be effected inside port limits.

RESTRICTIONS:

The Bosphorus – Height of Power Transmission Line: A transmission line with a vertical clearance of 70 m. (B.A. Chart 3930, 229 ft.) has been installed alongside the power transmission line in position 41° 10.4' N., 29° 04.7' E. (approx.)

Masters of vessels with a similar masthead height intending to pass beneath this cable must contact the Harbour Authority for permission to pass.

BOSPHORUS BRIDGES:

(1) Bosphorus Bridge (First Bridge):
Height on both shore sides: 58.5 m.
Height in the middle: 64.0 m.
(2) Fatih Sultan Mehmet Bridge (Second/New Bridge):
Height on both shore sides: 58.5 m.
Height in the middle: 64.0 m.

The height represents the distance between sea level upto line beneath the bridges.

NOTICE:

New Traffic Regulations in Conformity with International Regulations for Preventing Collisions at Sea (IMO Colreg of 1972) are being established in the Strait of Istanbul.

A. It is decided that a new traffic regulation conforming to the international rules of navigation be established in the Strait of Istanbu The new regulation which will be effective in the Strait of Istanbul as o 1st May 1982, 0900 hrs. GMT (1200 hrs. LMT) is as follows:

1. The existing left side navigation regulation in the Strait of Istanbu which is applicable between Kizkulesi-Ortakoy line in the South and Tarabyaburnu-Umuryeri feneri line in the North will be abolished on 1st May 1982, at 0900 hrs. GMT (1200 hrs. LMT) and then the new regulation in conformity with Rule 9 of International Regulations Preventing Collision at Sea of 1972 will come into force.

2. Ships in their transit from the Sea of Marmara to the Black Sea or from the Black Sea to the Sea of Marmara will, in accordance with Rule 9 of IMO Colreg 72, navigate throughout the Strait of Istanbul on the right side of the median line (traffic separation line) and under no circumstances will they pass to the left of the said line.

3. Ships during their transit in the Strait of Istanbul will not overtake other vessels unless they are forced to do so and will navigate inside the designated traffic lane.

B. Pilotage Services:

The pilotage stations are providing pilotage services on 24 hour basis for ships navigating in the Strait of Istanbul. The location of these stations are given in the international pilotage books and marked in the Strait of Istanbul chart (TR.2921).

C. Amendments to Charts:

"Caution I" on Chart TR.2921 will be cancelled with the coming into effect of the new traffic regulation.

D. Navigational Notices:

Explanatory information and navigational warnings regarding the new traffic regulation in the Strait of Istanbul are broadcast in English and Turkish by the following by Weekly Notices to Mariners and also will be mailed.

Istanbul	(TAH)	(Yesilkoy)	: 441 – 2670 kHz
Izmir	(TAN)		: 458 – 516 – 1850 kHz
Mersin	(TAM)		: 524 – 2820 kHz
Samsun	(TAF)		: 416 – 2760 kHz
Bandirma	(TAA4)	(Meteoroloji)	: 478 – 3636 – 6965 kHz

New Maritime Regulations for Bosphorus Traffic:

Masters/Owners/Agents of vessels must comply with the following rules when proceeding through the Straits and the Marmara Sea to ensure safety of life and property.

1. Masters or Owners or Charterers of vessels which are 500 gross tons or more, 24 hours before entering the mouth of the Strait of Istanbul or the Strait of Canakkale, must give Sailing Plan 1 (SP1) to Traffic Control Centre through their Agents, and Masters of vessels must give Sailing Plan 2 (SP2) by VHF Channel 16 or 71 directly to Traffic Control Centre, 2 hours before arriving at the mouth of the Strait or at a distance of 20 nautical miles from the mouth of the Strait, whichever comes first.

Sailing Plan 1:
(A) Ship's name, call sign, flag.
(B) Date and time.
(C) Position (reporting position).
(F) Sea speed, max. continuous manoeuvring speed.
(G) Port of departure.
(H) Date, time and point of entry into Traffic Separation Scheme
(I) Port of destination.
(J) Request Pilot (Yes/No).
Strait of Istanbul.
Sea of Marmara.
Strait of Canakkale.
(O) Forward and aft draft (m.).
Max. air draft (m.).
(P) Type of cargo.
(Q) Defect/damage/deficiencies/other limitations.
(R) Description of dangerous, nuclear and pollution goods.
(T) Ship's type/size.
Length overall (LOA) in metres.
Present displacement.
G.R.T.
(X) Any other information.

Sailing Plan 2:
(A) Ship's name, call sign, flag.
(D) Position (bearing – distance) (See Note).
(H) Date, time and point of entry into Traffic Separation Scheme
(J) Request Pilot (Yes/No).
Strait of Istanbul.
Sea of Marmara.
Strait of Canakkale.
(Q) Defect/damage/deficiencies/other limitations.
(X) Any other information.

Note:
Reference points for the position in (D) above:
Turkeli Light.
Ahirkapi Light.
Gelibolu Light.
Mehmetcik Light.

2. The Owner or operator of large vessels, which plan to pass throu the Straits, shall provide information on the vessel and its cargo the administration at the planning stage of the passage. T administration, taking into consideration the morphological a physical structure of the Straits, the vessel's dimensions and manoeuvring capability, the safety of life, property and environment and maritime traffic conditions, shall inform t applicants of the outcome of its review.

3. Vessels of 150 m. or more in length are strongly recommended take a Pilot for safety purposes.

SHIPMASTER'S REPORT: November 1979.
Dardanelles and Bosphorus:

Vessel bound for Odessa with a full cargo of corn. According to Charterer's orders (Sovfracht Moscow), vessel was to encounter 4 to 5 weeks at anchor at Odessa Roads and for this reason had to take sufficient fresh water at Ahirkapi Roads on the West side of the Bosphorus.

The quantity (and quality) had to be ordered 3 days prior to arrival through Charterer's Agent (Bumeran) in Istanbul. 2 days' notice and 24 hour notice were required.

The vessel also wished to make crew changes at the same time as taking water and this was arranged by Husbandry Agent (Rammoc, Istanbul).

Vessel took a Pilot all through the Dardanelles and Bosphorus and he boarded at Mehmetoik (Mehmetcik) Point.

When passing Canakkale, vessel slowed down and an Officer had to go down into the Sanitary Inspector's motorboat.

In addition to the sanitary boat another motorboat arrived, bringing the sub-Agent of the vessel's Istanbul husbandry Agent. The sub-Agent passed a message for Master with the latest information for Ahirkapi Roads to the ship's Officer after vessel having received Free Pratique from the Sanitary Officer. This sub-Agent is acting for several Istanbul Agents, the address is as following:

Denizciler Shipping Agents, Isfendiyar Anafarta & Co., Carsi Cad. 10, Canakkale. P.O.B. 5, Canakkale. Cables: 'Denizciler'. Tel: 1032-1878 after hours – 1055. Telex: 58128 dzck tr.

The information from the sub-Agent also included the kind and number of forms and lists required at Istanbul.

Immediately upon letting go anchor in Ahirkapi Roads, the motor launch with the Turkish Authorities arrived, some minutes later the Agent's boat arrived with the new crew members and some spare parts.

The Authorities required the following forms and lists:
Certificate of Registry.
Tonnage Certificate.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Transit Cargo Manifest.
3 Currency Lists of vessel's safe.
2 Personnel Effects Lists (Not officially required, but taken because at hand).
3 Stores Lists/Provisions.
3 Crew Lists.

There was no report of inspection, etc., given to the vessel by the Authorities and *no* written outgoing clearance was issued. When asking for an outgoing clearance, the Officials stated it was *not* necessary in this case.

No special lists of crew changes were required.

The Pilot left at Ahirkapi Roads because the time for taking fresh water was expected to be 5 to 6 hours (60 m.t.p.h.)

One hour after arrival the waterboat arrived and the vessel took fresh water (drinkable quality) as per order.

Half an hour before finishing pumping, Istanbul Pilots were called on VHF Channel 16. The Pilot arrived on schedule and the vessel continued the voyage to Odessa.

On approaching Ahirkapi Roads from the West, care has to be taken of numerous fishing boats and sand/gravel digging barges.

SHIPMASTER'S REPORT: October 1980 (Updated 1988).
Dardanelles and Bosphorus:

Dardanelles:

Pilotage: Compulsory. Cable: 'Canakkale Pilot Station' 48 hours if possible in advance to be sure of obtaining Pilot. At present Pilots are in short supply due to an increase in traffic.

One Pilot for Dardanelles and Bosphorus.

Pilot boards from grey hulled launch of about 8 knots speed from Sebbulbahir on Northern entrance.

VHF: Call 'Mehmetcik Pilots' on Channels 16 and 71.

Generally starboard side ladder or gangway.

Pilot gives Master form to fill in for Canakkale.

Control: Sanitary Control at Canakkale on Asian side of Strait near narrows about 1 hour after Pilot boarding.

Two launches come out. One Agent, one Immigration.

Require: 2 Crew Lists, sight Ship's Register and Derat Certificate. Officer has to go down to Immigration launch, no one boards.

Immigration Officer gives ship yellow form which is required to be shown next port.

Control only Northbound whether coming from overseas or a Turkish port. *Navigation:* Forecastle manned at Canakkale.

In fine weather, Straits present no problems, but in poor weather and visibility it can be more difficult, especially at Canakkale with other ships around where the vessel is nearly stopped. Also the narrows can be dangerous.

Pilots like maximum sea speed which is not possible.

Vessel passed through the narrows on manoeuvring speed.

Current S.W. flowing at 1 knot – 2 knots.

Transit takes about 3 hours, dependent on weather and delay at Canakkale.

Pilot hands over 'Control' at Inceburun, and takes over Southbound at the same place.

Sea of Marmara: Good positions obtainable. Ship carries out navigation, no Pilot. Very busy but most traffic, apart from ferries and small craft, on straight course from Bosphorus through to Dardanelles and vice versa.

Keeping well to starboard is advisable.

Transit about 6 hours.

Bosphorus:

Pilotage: Compulsory.

If coming from the Dardanelles, Pilot takes over at 'Yesilkoy' or joins by launch at position South of Athirkapi Point. From the North (Black Sea) Pilot boards (and disembarks) at Tellitalya Point just below Kavak (about 4 miles South of Rumeli Point, the Western entrance to the Strait).

Wait North of Rumeli Point until Pilot available.

Cable: 'Kavak' Pilot Station minimum of 6 hours' notice. Generally boards starboard side (and disembarks). Pilot gives Master form to fill in for control.

Control: At Buyukdere North and South about 20 minutes from Pilot Station.

Control requires: 2 Crew Lists, sights Ship's Register and Derat.

Yellow Immigration form given to Master. An Officer has to go down into launch. Two launches. Agent and Sanitary Inspector.

Navigation: No transit in fog. Forecastle manned for anchoring all transit. As per BA 1198.

Extreme vigilance is required on account of ferries, small boats, ships not under pilotage, strong currents, etc.

Transit time about 2 hours.

Signal Station: At Kavak on Asian bank just North of Pilot Station. Aldis lamp required.

Currents: Generally a 2 – 5 knot Southerly current, this can be pushed down by strong Southerly wind at Southern entrance at Istanbul.

Pilots advise that in these conditions transit for large bulk type ships is very hazardous on account of steering. Caution must be exercised in picking the Pilot up Southbound at Kavak due to Southerly current building up ship's speed.

SHIPMASTER'S REPORT: December 1983.

Earlier this year a Pilot Station was established at Gelibolu at the Eastern end of the Dardanelles. It is served by a 60 ft. fishing boat, painted white. The pilotage fee for Mehmetcik-Gelibolu and Harem-Kavak is 50% of the fee for Mehmetcik-Kavak.

If taking stores/spares when passing the Bosphorus, Agents should be instructed to arrange for the delivery at the Istanbul end as it is highly undesirable to have the Agent's launch alongside at Kavak before the Pilot boards.

REPORT: June 1985 (Updated 1988).

The following was received by a Master from his Agent in Istanbul.

For vessels proceeding and destined to Istanbul (not transitting vessels), the Gulf of Izmit or any other port inside Marmara Sea, pilotage is compulsory through the Dardanelles from the Southern entrance (Mehmetcik Point/Cape Hellas Lat. 40° 02' N., Long. 26° 11' E. to the Northern exit (Gelibolu Lat. 40° 24' N., Long. 26° 41' E.).

The same applies for vessels coming from a Marmara Sea port and proceeding Southwards.

From Gelibolu to the entrance of Izmit Gulf (Darica Lat. 40° 45' N., Long. 29° 21' E.) or vice versa, pilotage is not compulsory.

From Darica inside Izmit Gulf pilotage is again compulsory.

All Pilot Stations can be contacted by VHF Channel 16, working Channel 71.

For vessels passing, in-transit pilotage through Dardanelles-Marmara Sea-Bosphorus or vice versa is not compulsory. It is, however, strongly recommended to employ pilotage services through the Bosphorus.

Dardanelles Pilot can be picked-up at Mehmetcik Point (Lat. 40° 02' N., Long. 26° 11' E.) and dropped at new Pilot Station at Gelibolu (Lat. 40° 24' N. Long. 26° 41' E.) respectively picked up there and on outward voyage, thus saving the open Marmara Sea stretch. Another Pilot can then be requested at Istanbul (Harem) for Bosphorus.

Please make sure to enter into Pilot bills the exact times of services given. Please bear in mind that if part of a service falls into overtime, the whole service is charged as overtime. Service hours are as follows:

0800 – 1700 straight time.
1700 – 0800 overtime charged at 50% extra.
0800 – 1200 Saturday straight time.
After 1200 Saturday overtime till Monday morning 0800 hrs.

For vessels with inflammable, dangerous cargoes, etc. 30% extra is charged on all pilotage services, therefore whenever tankers are gas free this must be inscribed on Pilot bills. Also when tankers are loaded with harmless cargoes.

Whenever Pilots remain onboard after completing their service, as guest-passengers, Pilotage bill should be signed for the service part only.

SHIPMASTER'S REPORT: June 1987.

Pilotage through Dardanelles: Compulsory for all foreign vessels bound to and from a Turkish port. Northbound vessels take a pilot at Mehmetcik and Southbound vessels take a pilot at Gelibolu.

VHF: Pilots on Channels 16 and 71.

Notice: 48 hours notice of arrival required.

REPORTS: The following telexes were received by a tanker owner from agent in Istanbul between May 1990 and October 1990.

MAY 1990:

Re: Tankers Exceeding 200 m. LOA and 90,000 g.r.t. Transiting the Dardanelles and Bosphorus:

Kindly note that 10 day's pre-advice of the ETA Dardanelles is now required by the Canakkale and Istanbul Port Authorities so that they can obtain the approval of the Ministry of Communications and close the Straits to all traffic during the passage of such tankers, for which an escort of 2 tugs (for vessel's a/c) and one Coast Guard launch is allocated.

Daylight passage through both Straits is required, which kindly note.

JUNE 1990:

Re: Transit Passage Through the Straits of Dardanelles/Bosphorus:

Re-passage of vessel with g.r.t. in excess of 90,000 tons and LOA more than 200 m. to be reported to Harbour Master. In addition to above, we have been informed that agents for such tonnage have to provide

Harbour Master with Letters of Guarantee stating that in case of accident during passage, all damages/losses will be covered by the agent.

Please inform your Clubs accordingly. FYG local P & I Club informed accordingly.

OCTOBER 1990: Telex from owner to agent.

Re-your May telex concerning tankers exceeding 200 m. LOA and 90,000 g.r.t. transiting the Dardanelles and Bosphorus, grateful you advise whether the discrepancy between length and g.r.t. has yet been resolved.

REPLY:

Regulations now apply to tankers of 90,000 g.r.t. or over without any mention of LOA, however should a vessel's g.r.t. be close to 90,000 please advise us so that we can consult the Captain of the Port re any transit restrictions.

REPORT: November 1991.

The following telex was received from an agent in Istanbul.

Quote:

Re: Transiting Vessels Through the Straits.

This is to inform you that as per strict request of Port Harbour Master and Customs Authorities, we are compelled to give them 24 hours notice of vessels ETA Bosphorus North/Southbound passages together with the following additional information:

(1) Port of Registry/flag/g.r.t./n.r.t./d.w.t.
(2) LOA.
(3) Draft.
(4) Port of arrival.
(5) Port of destination.
(6) Quality of cargo on board.
(7) Quantity of cargo on board.

You are kindly requested therefore to instruct your agents at the relevant ports and also your Masters to keep us closely posted in due time about the above, thereby enabling us to comply with the requirements of our authorities in order to avoid any eventual unpleasant consequences or fines.

Unquote.

REPORT: The following was received from our Agent (G.A.C.) in January 1991:

General Information on Passage through the Straits:

Geographical Locations: Dardanelles (Canakkale Bogazi): Is the strait joining the Aegean Sea and the Sea of Marmara, boundaries of which are between the line joining Mehmetcik Lighthouse and Kumkale Lighthouse in the South and the line between Gelibolu Lighthouse and Zincirbozan Lighthouse in the North.

Bosphorus (Istanbul Bogazi): Is the strait joining the Sea of Marmara and the Black Sea, and is located within the boundaries of the Port of Istanbul, boundaries which are described in the relevant regulations as follows:

> The Port of Istanbul is the sea area (including the Golden Horn) between the lines that join Turkeli Feneri and Anadolu Feneri in the North, and Bababurnu and Yelkenkai Feneri in the South.

General Provision: The vessels, passing the waterway that comprise the two straits (i.e. Dardanelles and Bosphorus) as well as the Sea of Marmara, are passing under the following status:

> Transit vessels are those which are coming from a foreign port in Aegean Sea and bound to a foreign port in Black Sea or vice versa, and passing the above waterway without calling at any Turkish Port, and without having any commercial contact or transaction with any Turkish Port, such vessels are granted with Transit Sanitary Pratique.
>
> Non-transit vessels are those which either coming from any Turkish Port, or bound to any Turkish Port, whether between the straits or outside of the above waterways, or stopping for a while for any purpose such as loading and/or discharging cargo, embarkation/disembarkation/city tours of passengers, crew exchange are non-transit vessels and granted with Free Pratique during sanitary controls effected at either Southern entrance to Dardanelles or Northern entrance to Bosphorus.

All ships sailing or lying within the boundaries of Dardanelles and the Port of Istanbul are compelled to comply with international rules, with all rules taking place in the regulations and also with all kind of rules, warnings and controls by the Port Authorities or competent authorities, and comply with rules of legislation as to safety of navigation, life and property. All foreign flag vessels are required to fly the Turkish flag during their stay at Turkish Ports or when passing through the Straits.

Navigation through the Straits: In the Dardanelles, vessels should, in accordance with the Rule No. 9 of the Regulations for Prevention of Collisions at Sea, keep to that side of mid-channel which lies on their starboard side, taking care to make the sound signals in accordance with the rule when approaching the narrows of Canakkale and the bend of Nara.

Vessels should also take every precaution to avoid meeting other vessels in the critical areas between Kilitbahir and Canakkale, between Nara and Kilia, and between Gelibolu and Cardak; and, when the current or weather is in their favour, should, in these critical areas, give way to oncoming vessels by stopping or reducing speed.

In the Bosphorus, the area lying between the line connecting the Turkeli Lighthouse to Anadolu Lighthouse in the North, and the line connecting the Ahirkapi Lighthouse to the Kadikoy Inciburnu Breakwater Light in the South and made of 2 traffic lines, suitable for Northbound and Southbound traffic, and separated by a centre line separating these 2 lines.

The area reserved for crossing the Strait of Bosphorus and lying between the line connecting the Turkeli (ex Rumeli) Lighthouse to Anadolu Lighthouse in the North, and line connecting the Ahirkapi Lighthouse to the Kadikoy Inciburnu Breakwater Light in the South, and made of 2 traffic lanes suitable for Northbound and Southbound traffic, and separated by a centre line separating these 2 lanes is called the Bosphorus Strait Passage Way.

The said centre line which divides the Bosphorus passage into 2 traffic lanes conjunct the below indicated geographical points:

1.	41° 00' 10" N., 21° 09' 45" E.	2.	41° 01' 24" N., 28° 59' 48" E.
3.	41° 01' 33" N., 28° 59' 55" E.	4.	41° 03' 02" N., 29° 02' 23" E.
5.	41° 04' 03" N., 29° 03' 04" E.	6.	41° 04' 03" N., 29° 03' 03" E.
7.	41° 05' 00" N., 29° 03' 44" E.	8.	41° 06' 15" N., 29° 03' 40" E.
9.	41° 07' 13" N., 29° 05' 00" E.	10.	41° 07' 22" N., 29° 05' 00" E.
11.	41° 08' 55" N., 29° 03' 33" E.	12.	41° 09' 23" N., 29° 03' 32" E.
13.	41° 10' 52" N., 29° 05' 02" E.	14.	41° 12' 13" N., 29° 06' 50" E.
15.	41° 13' 36" N., 29° 07' 59" E.		

The area between centre line anad the line that joins the geographical points here below is the Northbound lane:

16.	41° 00' 00" N., 29° 00' 04" E.	17.	41° 01' 07" N., 29° 00' 04" E.,
18.	41° 01' 30" N., 29° 00' 12" E.	19.	41° 03' 06" N., 29° 02' 58" E.
20.	41° 04' 00" N., 29° 03' 15" E.	21.	41° 04' 29" N., 29° 03' 15" E.
22.	41° 04' 58" N., 29° 03' 55" E.	23.	41° 06' 15" N., 29° 03' 51" E.
24.	41° 07' 12" N., 29° 05' 22" E.	25.	41° 07' 22" N., 29° 05' 22" E.
26.	41° 08' 51" N., 29° 03' 53" E.	27.	41° 09' 28" N., 29° 03' 50" E.
28.	41° 10' 48" N., 29° 05' 12" E.	29.	41° 11' 40" N., 29° 06' 46" E.
30.	41° 12' 09" N., 29° 06' 59" E.	31.	41° 31' 22" N., 29° 08' 34" E.

The area between centre line and the line that joins the geographical points here below in the Southbound lane:

32.	41° 00' 18" N., 28° 59' 25" E.	33.	41° 01' 17" N., 23° 59' 27" E.
34.	41° 01' 44" N., 28° 59' 44" E.	35.	41° 02' 58" N., 29° 02' 06" E.
36.	41° 04' 08" N., 29° 02' 56" E.	37.	41° 04' 34" N., 29° 02' 56" E.
38.	41° 05' 02" N., 29° 03' 33" E.	39.	41° 06' 15" N., 29° 03' 30" E.
40.	41° 07' 23" N., 29° 04' 33" E.	41.	41° 09' 02" N., 29° 03' 16" E.
42.	41° 09' 31" N., 29° 03' 17" E.	43.	41° 10' 30" N., 29° 04' 29" E.
44.	41° 12' 00" N., 29° 06' 00" E.	45.	41° 12' 18" N., 29° 06' 38" E.
46.	41° 13' 45" N., 29° 07' 29" E.		

Speed of Vessels – General: In order to avoid damage to the coast and to small craft, all power-driven vessels must proceed at the slowest speed at which steerage can be maintained, when within the following areas:

(a) In the Dardanelles: Between a line drawn from Mehmetcik Burnu to Kum Burnu, and a line drawn from the town of Gelibolu to Cardak Burnu.

On no account is a speed of 10 knots to be exceeded in the narrows of the Dardanelles between a line joining Nara Burnu and Kilya Lighthouse, and the parallel of latitude passing through Kanlidere Burnu Lighthouse (40° 06' N., 26° 22' E.).

(b) In the Bosphorus: Between a line drawn from Ahirkapi Burnu (41° 00' N., 28° 59' E.) to Haydarpasa, and a line drawn from Buyukere to Umuryeri Liman.

Unless there are extraordinary or compulsory reasons, a speed of 10 knots is never to be exceeded in the Bosphorus.

Pilotage through Waterway: Pilotage is not compulsory for vessels passing in transit through the straits. However, Turkish Authorities are recommending to take Pilot while passing both straits for a safe passage. Masters of transit vessels have the liberty to take or not to take Pilot while passing the straits.

Pilotage for compulsory non-transit vessels which are bound to any port between the two straits: Such vessels have to take Pilot while passing both straits (i.e. Dardanelles and Bosphorus). Pilotage is also compulsory for vessels calling at any Turkish Port, berthing/unberthing, entering/exiting to/from the harbours, as well as in Gulf of Izmit. Pilotage services are carried out by 7 Pilot Stations of "Pilot and Towage Services Department", which have been distributed in the area.

Dardanelles:

(a) Mehmetcik (Dardanelles) Pilot Station.
Place: Southern Entrance of Dardanelles (Seddulbahir).
Geographical Position: 40° 02' 34" N., 26° 11' 25" E.
Telephone: 5 / Canakkale – Seddulbahir.
Cable Address: Canakkale Pilot.

Pilotage services for the ships bound to any port at the Marmara Sea or passing through the Black Sea carried out by that station.

The station continuously effects listening to VHF Channel 16.

(b) Canakkale Pilot Station.
Place: Canakkale.
Geographical Position: 40° 09' 03" N., 26° 24' 03" E.
Telex: 58187 Plen Tr.
Telephone: 1180 Canakkale.
Cable Address: Canakkale Pilot.

Pilotage at the Canakkale Port and for ships that come alongside and or depart from quays within Canakkale Port area are carried out by the station. The station continuously effects listening on VHF Channel 16.

In case services at Mehmetcik Station stops, due to bad weather conditions, those are carried out at this station. Ships requiring Pilot from Mehmetcik Station can make their requests through that station.

(c) Istanbul Pilot Station (HAREM).
Place: Southern Entrance of Bosphorus (Harem).
Geographical Position: 41° 00' 42" N., 29° 00' 38" E.
Telex: 23620 Plhr Tr.
Telephone: 3330533.
Cable Address: Istanbul Pilot.

It carries out the pilotage for ships at the Southern entrance of Bosphorus. The station effects 24 hours listening on VHF Channel 16.

(d) Kavak Pilot Station.
Place: Northern entrance of Bosphorus (Tellitabya).
Geographical Position: 41° 10' 36" N., 29° 04' 24" E.
Telex: 23711 Plkv Tr.
Telephone: 1420494, 1420374.
Cable Address: Kavak Pilot.

It carries out pilotage for ships at the Northern entrance of Bosphorus. The station continuously listens on VHF Channel 16.

Gulf of Izmit: It is obligatory for Turkish ships of 500 g.r.t. and over, and all foreign ships no matter their tonnage, which come alongside, and up to buoys, at wharves, quays, within the inner, central and outer ports, or leave those places and anchor at and depart from anchorage of the Gulf of Izmit to take Pilots.

(a) Darica Pilot Station.
Place: West entrance of Izmit Bay (Darica).
Geographical Position: 40° 45' 18" N., 29° 23' 20" E.
Telephone: 2066.
Cable Address: Darica Pilot.

(b) Izmit Pilot Station.
Place: Izmit.
Geographical Position: 40° 45' 50" N., 29° 55' 28" E.
Telex: 33169 Plkc Tr.
Telephone: 12087.
Cable Address: Izmit Pilot.

Services within the limits of the Izmit Port and demands for ships that will leave the Gulf to be fulfilled by that station. The station continuously listens to VHF Channel 16.

Anchorage of Transit Ships: Article 75, transit ships are allowed to stay 48 hours in order to provide fuel oil, water, provisions, material, to receive documents from and to submit those to agencies without obtaining Free Pratique under the supervision of the Shore Sanitary Organisation at following anchorage areas:

A. The area, lying between 28° 58' 36" E. longitude passing from Sultan Ahmet Mosque, and 28° 55' 00" E. longitude passing through Yedikule, is the free anchoring place for passenger and dry cargo ships.
B. The area, lying between 28° 55' 00" E. longitude passing from Yedikule, and 28° 51' 00" E. longitude passing through Bakirkoy, is the anchorage place allocated for tankers and ships carrying dangerous cargo such as explosives, flaring and burning substances.
C. The area, lying between 28° 51' 30" E. longitude passing from Bakirkoy, and 28° 50' 00" E. longitude passing through Yesilkoy, is the anchoring place for ships subject to quarantine.

REPORT: June 1992.
Agent's Circular to ship's Masters:
Information for Bosphorus:

Please call Bosphorus Pilot Station on VHF Channel 71, when about 6 miles off South entrance (Haydarpasa Breakwater).

Prepare pilot or combination ladder on your starboard side.
Pilot ladder – if freeboard less than 5.0 m.
Combination ladder – if freeboard more than 5.0 m.

Pollution in Turkish Straits:

According to our recent observations, Turkish Port and Environmental Authorities have begun to take stricter measures against occurances of pollution caused by vessels passing Turkish Straits. Regardless of whether pollution is actually caused by any particular vessel, the slightest indication of pollution witnessed by other vessels is immediately reported to the above authorities.

In several cases, some vessels, passing through residue pollution of previous unknown origin, have been accused mistakenly of pollution, whereby, even if vessel is found innocent, it is usually forced to anchor and becomes subject to fines, which must be paid in cash without acceptance of bank or P&I guarantees. Once a vessel has anchored, she will not be permitted to continue voyage, pending P&I procedures or court proceedings. Therefore only the payment of cash will realise the permission of the vessel to sail.

If pollution is found to have been caused due to technical problems of the vessel, a fine of U.S.$ 35,000 (minimum) is charged.

If pollution is found to have been caused by reason of negligence on the part of the vessel, or if ballast/dirty water/slops are discharged, this violation is charged from U.S.$ 40,000 to U.S.$ 160,000.

In light of the above, Owners and Masters are asked to pay special attention, and take precautionary measures when transitting Turkish Straits, as even false occurances beyond the vessel's control may lead to unnecessary delays and fines.

IMPORTANT:

Due to heavy fog, sometimes pilotage at Bosphorus suspended. Please keep close contact with Pilot on VHF Channel 71, and if Bosphorus traffic is closed due to fog, you are free to proceed to Ahirkapi Anchorage for further instructions.

If Pilot will instruct you to anchor due to fog, please listen to VHF Channel 71, and upon receiving instruction that traffic is normal, please heave up anchor and proceed to breakwater, if you order Pilot to come to anchorage, an extra pilotage charge of U.S.$ 750.00 and delays will be incurred.

Anchorage Positions: See "Plan".
Southbound Passage:

Please call Kavak Pilot Station on VHF Channel 71 when about 6 miles off the North Entrance (Rumeli or Anadolu Lighthouse).

Pilot or accommodation ladder to be rigged on starboard side.

Also please have ready following for Sanitary Boat:
Yellow Sanitary Card given to you at Dardanelles.
Tonnage/Derat Register Certificates.
2 copies Crew List.
No other formalities required.

SHIPMASTER'S REPORT: January 1994.
Dardanelles and Bosphorus Pilotage: Vessel bound for port of Eregli from South America.

The Shipmaster's Reports in the Guide to Port Entry 1993/94 for October 1980 (Updated 1988) and June 1987 mention that pilotage is compulsory for Dardanelles/Bosphorus. Also, Admiralty List of Radio Signals Vol. 6, Part I, 1992, Page 434, also says pilotage is compulsory for ships bound for Turkish ports.

As per above, I had advised my Charterers accordingly to arrange for Dardanelles/Bosphorus Pilots; as same when compulsory would be on Charterers' accounts. However, they came back with following reply, which is quoted below and is self-explanatory.
Quote:

Charterers have noted Master's comments on pilotage services for Dardanelles and Bosphorus, with thanks, and we would like to comment/clarify matter as follows:

Master partly correct in stating that 'pilotage is compulsory for ships bound for Turkish port', but with a small mistake.

Compulsory pilotage service for Dardanelles and Bosphorus only in cases where vessels entering Turkish territorial waters from Black Sea and/or Mediterranean Sea and bound to any Turkish port located within Sea of Marmara. Otherwise, in cases where vessels are entering Turkish territorial waters from Black Sea and/or Mediterranean Sea and bound to a Turkish port located at Black Sea or Mediterranean Sea, vessels are not obliged to use pilotage service when transitting both Dardanelles and Bosphorus Straits.
Unquote.

In our case, we entered Turkish territorial waters from Mediterranean Sea and bound to Eregli (Black Sea), and this means vessel will pass both Dardanelles and Bosphorus Straits "in transit", repeat "in transit" and is not obliged to use pilotage service. In other words, pilotage is not compulsory for our vessel.

Therefore, any and all pilotage service to be used by the vessel during transitting Straits of Dardanelles and Bosphorus up and down would be about U.S.$ 10,000 and on Owner's account.

REPORT: December 1994.
Bosphorus/Dardanelles Traffic Rules and Recommendations: We quote below the rules and recommendations on navigation through the Strait of Istanbul, the Strait of Canakkale and the Marmara Sea adopted by the Maritime Safety Committee of IMO at its 63rd session and applicable as from 0000 hrs. UTC on 24th November 1994:

"SN/Circular 166 – Annex.
Routeing Measures other than Traffic Separation Schemes.
Rules and Recommendations on Navigation through the Strait of Istanbul, the Strait of Canakkale and the Marmara Sea*.
* Hereinafter referred to as the Straits.

1. *Use of Ships' Routeing:*
1.1 Vessels navigating in the Straits shall exercise full diligence and regard for the requirements of the Traffic Separation Schemes (TSS).
1.2 A vessel that is not able to comply with the requirements of the TSS shall inform the traffic control stations well in advance. In such circumstances, the competent authority may temporarily suspend the particular TSS, or section(s) of it, and inform the vessels sailing in the area and advise them to comply with Rule 9 of the International Regulations for Preventing Collisions at Sea, 1972.
1.3 In order to ensure safe transit of vessels which cannot comply with the TSS, the competent authority may temporarily suspend two-way traffic and regulate one-way traffic to maintain a safe distance between vessels.
2. *Ship Reporting and Navigation Information:*
2.1 All vessels entering the Straits are strongly recommended to participate in the reporting system (TUBRAP) established by the competent authority and of which the appropriate information has been promulgated by Notices to Mariners and other means.
2.2 For the purpose of efficient and expeditious traffic management, in the interest of safety of navigation and protection of the marine environment, vessels intending to pass through the Straits are strongly advised to give prior information on the size of the vessel, whether in ballast or loaded condition and whether carrying any hazardous and noxious cargo, as defined in relevant International Conventions.
2.3 All vessels navigating in the Straits are recommended to make use of the information broadcasts made by the information services operated by the competent authority, and to keep watch on VHF as appropriate, as set out in the TUBRAP scheme.
3. *Pilotage:*
3.1 Masters of vessels passing through the Straits are strongly recommended to avail themselves of the services of a qualified pilot in connection with the requirements of safe navigation.
4. *Daylight Transit:*
4.1 Vessels having a maximum draft of 15.0 m. or more and vessels over 200 m. in overall length are advised to navigate the Straits in daylight.
5. *Towing:*
5.1 Passage of a vessel under tow may only be carried out when using tug(s) or vessel(s) suitably equipped for the operation in order to ensure safe navigation.
6. *Anchorage:*
6.1 When required, vessels may use the anchorages designated for this purpose.

ALANYA: 36.32 N. 32.03 E. (See Plan)

RADIO: Alanya Radio. Call sign TAC4.
BERTHING: Jetty length 277 m., depths alongside 5 m. – 12 m. Can accommodate 4 vessels.
CRANES: No shore cranes available; vessels use their own gear for loading/discharging.
STEVEDORES: Loading/discharging carried out by hired stevedores. Average rate per shift/gang of 150 tons for cotton, bagged and general cargoes.
Working Hours: 0800 hrs – 1630 hrs. Lunch break 1230 hrs.

FRESH WATER: Available.

AIRPORT: At Antalya (150 km.).

CHARGES: Light and sanitary dues.

AUTHORITY: Harbour Master. *Tel:* (0242) 5131097.

Turkiye Denizcilik Isletmeleri, Genel Mudurlugu, Rihtim Caddesi, 80120 Karakoy, Istanbul, Turkey. *Contact:* Head of Port Operations Department or Assistant General Manager.

Turkish Maritime Organisation, Port of Antalya, Antalya, Turkey. *Tel:* (0242) 2481469. *FAX:* (0242) 2483346. *Contact:* Husbyin Seymen, Port Director.

ALIAGA: 38.50 N. 26.57 E. (See Plan)

LOCATION: *Northern Point:* Lat. 38° 50' 10" N., Long. 26° 56' 33" E.
Southern Point: Lat. 38° 50' N., Long. 26° 57' 36" E.

DOCUMENTS:

6 copies Crew List.
4 copies Passenger List.
2 copies Manifest of Transit Cargo.
3 copies Manifest of Inward Cargo, one of which must be legalised before arrival by Turkish Consulate at loading port.
1 set Bills of Lading.
1 set Cargo Stowage Plans.
2 Stores Lists.
Health Documents.
Ship's Certificates.

Ship's Particulars Form is to be filled in by Masters upon arrival at Aliaga and remitted to the Port Authorities.

PILOTAGE: Pilotage is compulsory for all vessels. Pilot boards 2 to 3 miles West of Tasli Burnu Light.

Notice of ETA must be reported 3 days before arrival, followed by successive notices confirming or amending previous notice.

The ETA message must include the following information:

1. Name and call sign of vessel.
2. Nationality.
3. Agency.
4. Length, draft and gross tonnage.
5. Kind and quantity of dirty ballast.
6. Deballasting time.

ANCHORAGES: The port itself is situated about 40 miles N.N.W. of Izmir on the Southern arm of the Gulf of Candarli and the anchorage is considered safe for large ships.

Information on best location of anchorage, if required, will be given by Aliaga Pilot.

READINESS: Notice of Readiness will be received by the Loading Master. It should be tendered at the time of anchoring or pilot boarding. Lay time will commence 6 hours after receipt of Notice of Readiness.

RESTRICTIONS: Water depth at entrance about 14 fathoms. Water depth at crude oil wharf 17 m. – 18 m.

MAX. SIZE: Crude Oil Berth designed for up to 100,000 d.w.t. Products Berth designed for up to 22,000 d.w.t.

HEALTH: *Customs:* Customs post at refinery.
Immigration: None locally. Incoming and outgoing personnel have to be processed at Izmir and escorted under guard to and fro.
Health: No office locally. Officials have to be brought from Izmir.

RADIO: Radio messages to be routed to Agent via Izmir Radio. Call sign of Izmir Radio Station is "TAN", 2,760 kHz.

Also see "Pilotage".

VHF: Communication with Aliaga Pilot Station is possible within 20 miles – 25 miles by VHF Channel 16, manned 24 hours. Call sign: "Aliaga Pilot".

RADAR: No radar facility.

TUGS: A total of 4 tugs (2×2,460 h.p. and 2×2,760 h.p.) and 3 mooring boats are available. All tugs are equipped with fire fighting equipment.

During berthing/unberthing, it is compulsory to take at least:

1 tug –	500 g.r.t. –	4,999 g.r.t.
2 tugs –	5,000 g.r.t. –	24,999 g.r.t.
3 tugs –	25,000 g.r.t. –	49,999 g.r.t.
4 tugs –	50,000 g.r.t. and over.	

Depending on weather conditions, or for safety requirements, additional tugs may be assigned by TUPRAS, or by Aliaga Pilot or if requested by vessel.

BERTHING: There are 3 berths:
(a) Aliaga Refinery Terminal.
(b) Aliaga Refinery New Crude Oil Jetty.
(c) Aliaga Refinery Cargo Pier.

(a) Aliaga Refinery Terminal: A "T" type oil jetty having 4 berthing points:

Berth No.	*LOA* (m.)	*Draft* (m.)	*Product*
1	285	16.0	Crude and Fuel
2	180	12.0	White products
3	100	8.0	White products
4	100	6.0	Lube oils

Berthing to No. 1 is possible only during daytime.

(b) Aliaga Refinery New Crude Oil Jetty: VLCC jetty designed fo tankers up to 250,000 d.w.t., 19.25 m. even-keel draft and LOA o 260 m. – 340 m.

It has 4×16 in. FMC loading arms for crude oil discharging an 2×12 in. loading arms for bunker loading. Unberthing and berthin is possible only during daytime.

(c) Aliaga Refinery Cargo Pier: LOA 95 m., draft 6.0 m. Pier is fo loading of asphalt.

CRANES: Fixed cranes are available at all berthing points, liftin capacities up to 1,500 kg.

MEDICAL: Hospital and medical facilities are available at Izmir an Aliaga. If doctor is required on board, Master should inform Agent b radio or VHF.

TANKERS: See "Berthing".

FIRE PRECAUTIONS: Ship's watchmen to be on duty. All operation involving open fires and sparks are prohibited. Vessel should provid two fire extinguishers and sawdust or sand beside hose connections.

BALLAST: Maximum ballast discharge rate 1,500 cu.m./hr. Vessel should arrive with sufficient ballast for safe handling of vessel unde prevailing weather conditions.

Vessels shall not discharge into the waters of the port any part of the content of their cargo, slop or ballast tanks or bilges, which is liable t pollute these waters.

DENSITY: 1027 (average).

FRESH WATER: Available at all berths, delivered by hoses at a rate o 20 cu.m./hr. Must be requested by Agent, and Agent must inform th Customs Officer.

FUEL: Available at all berths, delivered by hoses. Gasoil, fuel o (1,500 sec. or 3,500 sec.). Notice of 48 hours required prior to berthing

REPAIRS: No facilities available.

DRY DOCKS: None.

SHORE LEAVE: Crew permitted ashore with shore passes. It i forbidden to wander on jetty and in refinery area. Transport vehicle i provided by TUPRAS between jetty and Aliaga.

IDENTIFICATION CARDS: Seamen's Book is needed for crew goi ashore.

GARBAGE DISPOSAL: All rubbish must be put in bags and given t gabage collection vessel daily.

Charges: At anchorage – 90×1,000 g.r.t./U.S.$ (subject to change
In port – 45×1,000 g.r.t./U.S.$ (subject to change).

WASTE OIL DISPOSAL: During berthing, waste oil disposal is take by refinery to the shore ballast tank.

Charges: At anchorage – 120×1,000 g.r.t./U.S.$ (subject to change
In port – 60×1,000 g.r.t./U.S.$ (subject to change).

SEAMAN'S CLUBS: None.

CURRENCY: Lira. Currency exchange rates are set by National Cent Bank daily, and are subject to change.

SHIPMASTER'S REPORT: October 1990.

First vessel to use the facility.

Vessel: 265,000 tonnes d.w.t. with segregated ballast. LOA 322 Summer draft 20.47 m.

Berth: New berth for VLCCs.

General: Vessel needs B.A. Chart No. 1618 (which does not yet sh new VLCC berth) and B.A. Pilot Book NP.48. The Terminal manageme advise that the position of the centre of the jetty (in between t Chicksans) is Lat. 38° 49' 56" N., Long. 26° 57' 01" E., and the berth li in a 177°/357° direction. Arrival and berthing draft 19.24 m. even ke

Approaches: The approaches to the port are hazard-free, and t entrance into the Outer Harbour (between Tavsan Adasi Is. and Ilica Lighthouse) has a navigable width of 1.1 miles for vessels up to 20.0 draft.

A slight current setting North was experienced approaching t entrance from about 5 miles out. Pilots (3) boarded from tug when ves was actually in the entrance to Outer Harbour (3 Pilots used, as t was the port's very first VLCC – normally only one Pilot will be use

Anchoring: Pilot took ship to anchor, in a position with Tasli Lighthouse bearing 145° × 1.55 miles in a depth of 50.0 m. We u port anchor with 9 shackles on deck. During next 36 hours ves experienced N.E. winds up to 35 knots, position was maintained wi undue strain on the cable. Holding ground very good.

Prior to Berthing: When the Terminal decided weather conditions w satisfactory for berthing (wind N.E. less than 10 knots), the Pilots (a 3) came out to the ship by tug and boarded in the anchorage. Four t were made fast *before* weighing anchor.

Proceeding to New Berth: Once anchor aweigh, vessel proceeded inwards at *very* slow speed, using minimal engine movements. The Echo Sounder was run continuously. During this operation, the wind suddenly backed round to N.W. and increased to 15 knots. The Pilots had already stipulated that maximum wind speed for berthing is 10 knots. They were constantly monitoring the ship's wind gauge, but decided (with my agreement) to continue berthing, as we had reached the point where, to abort, would mean towing the ship out stern first, back into Outer Harbour against the wind. The Pilots did not want to use astern engine movements, as the effect of our transverse thrust would swing the bow in towards the berth. In the event the berthing operation proceeded relatively smoothly, and although the N.W. wind increased up to 18 knots, blowing on our starboard quarter, the tugs were well able to counteract it. Vessel was stopped in the water approximately 150 m. abeam of the berth, and 2 tugs began pushing at 90° on our port side, whilst the other 2 tugs began towing at 90° towards the berth.

Berthing: Three mooring boats were available, two small ones and one miniature tug. Only the latter was really capable of carrying our mooring wires to the shore (when still about 70 m. off the berth). The two small mooring boats had great difficulty in carrying our wires, in fact if we had not had the 11.0 m. polyprop tails fitted to the wires, it is doubtful if these two small boats could have carried them at all. First lines were one polyprop stern line to miniature tug, one aft breast wire to small mooring boat, and one polyprop head line to the other small mooring boat forward. The vessel landed on the berth very smoothly and once there, the 4 tugs kept vessel alongside easily, whilst we made fast. The jetty mooring crew were only equipped with light heaving lines instead of sturdy messengers. Their heaving lines parted 3 times whilst trying to heave our mooring wires up from the boat to the quick release hooks on the dolphins (through a height of approximately 10.0 m.). The Pilots assured me this oversight would be rectified before the next VLCC visited the port. Final moorings were as per plan (See "Plan").

Berth: A very good shore gangway is installed on the jetty North of the Chicksans (brand new hydraulic variable height 'tower' type). There are 4 × 16 in. Chicksans, only three of which were connected (and this will apparently be standard procedure). VLCCs will always berth starboard side to.

Discharging: The Loading Master advised that the Terminal's maximum receiving rate is 10,500 cu.m./hr. (although they admitted they had never received at this rate before). In the event we actually pumped for a while on bulk at up to 12,000 cu.m./hr., and they were quite happy with this. Full 100% C.O.W. was carried out, and our net discharging time for two grades was 30 hours 40 minutes, totalling 238,000 tonnes. Total time spent on cargo operations (including stoppage for C.O.W. and stripping) was 37 hours 25 minutes.

Unberthing: Our departure drafts were forward 8.60 m. and aft 9.95 m., and due to wind being from the West at 15 knots, the Pilot (only 1) elected to tow the vessel out stern first into Outer Harbour (the alternative is to be towed into Inner Harbour and then turned through 180°, before heading out, but the Pilot said he would only do that in zero wind conditions). Unmooring is done by the shore releasing our lines, under tension, from the quick release hooks on the dolphins, starting from forward and aft and working towards midships. Same 4 tugs secured in same positions then tow vessel stern first using only very short astern engine movements. Once into Outer Harbour, vessel is swung to starboard onto a heading of 275°. Once steady the Pilot departs. Passage out into the Aegean Sea is trouble-free, apart from a few scattered fishing boats in Outer Harbour.

Miscellaneous Information:

(a) Inward Clearance done once alongside, about 12 shore Officials in total, have plenty of chilled soft drinks and beer ready.

(b) Actual papers required: 8 Crew Lists, 7 Vaccination Lists, 2 Crew Declarations, 3 Stores Lists. All other papers supplied by Agent/ Officials. Last Port Clearance sighted but not required. Neither Passports or Vaccination Certificates inspected. Only photocopy of Master's Passport required for Agent. (Notary Public purposes).

(c) Agent and Officials come from Izmir (about 45 miles South of Aliaga).

(d) Agent (Boutros Izmir) very helpful and speaks perfect English. Can obtain previous day's British newspapers in Izmir.

(e) Pilots only standby VHF when a vessel is due (Channels 16, 12 and 13).

(f) Pilots and Tug Masters all ex-Turkish Navy and speak excellent English. Pilots very professional and highly competent.

(g) Outward Clearance, after completion of discharge, can take up to 6 hours. Several Port Officials return to ship for this purpose. We were unfortunate that their lunch break occurred 2 hours after finishing cargo, so waited 6 hours.

(h) Had to provide accommodation and meals for 3 surveyors (1 owner's from UK, 1 Charterer's (SGS) from U.K. and 1 local SGS).

(i) Terminal operated by Tupras Aliaga. Notice of Readiness to be made out to this Company. N.O.R. will be signed by Loading Master (speaks excellent English). Acceptance time is that of "All Fast".

(j) Terminal management very friendly and co-operative. We were visited several times by various managers requesting a look at their very first VLCC.

(k) Intention is to berth VLCCs during daylight only. Departure during hours of darkness will only be possible if wind speed less than 10 knots.

AUTHORITY: TUPRAS Izmir Refinery Management, Izmir Refinery, Aliaga – Izmir, Turkey. *Tel:* (90) 232-6161250. *Telex:* 51704. *FAX:* (90) 232-6162382, 6162249. *Contact:* Tevfik Alok, Deputy Refinery Manager.

AGENT: See "Izmir".

ANTALYA: 36.50 N. 30.37 E. (See Plan)

PILOTAGE: Compulsory. 1 pilot boat and 1 service boat available.
ANCHORAGE: 925 m. S.E. of Outer breakwater.
MAX. SIZE: Max. draft 9.5 m.
RADIO: Antalya Radio. Call sign TAL.
VHF: Pilot on Channels 16, 12 and 14 throughout 24 hours.
TUGS: 3 tugs (240 h.p., 900 h.p. and 1,125 h.p.).
BERTHING: Outer breakwater is 1,440 m. long, inner breakwater is 650 m. long. Port area is 331,600 sq.m.

Vessels can enter port and anchor at any time with a Pilot aboard. Manoeuvring area has 400 m. diameter, depths 8 m. – 11 m.

11 operating quays, 2 passenger quays and a military quay available.

Quay No.	*Length* (m.)	*Depth* (m.)
1	150	10.00
2, 3	165	5.5 – 6.5
4	60	8.00
5, 6	290	10.00
7	170	10.00
8 (Passenger Quay)	170	10.00
9 (Passenger Quay)	140	5.50
10 T.M.O.	200	10.00
11 SEKA	200	8.00
12 (Military Quay)	270	5.50
4 Ro/Ro	35	5.50

Storage:

Open warehouse area is 200,000 sq.m. Closed warehouse area is 3,000 sq.m. Closed warehouse (for combustible cargo) is 400 sq.m.

Cold storage plant is 6,900 sq.m. with capacity of about 10,000 tons.

PORT EQUIPMENT:

8 cranes (1×25 tons (fixed), 2×10 tons, 5×5 tons).
5 mobile cranes (3×10 tons, 1×25 tons, 1×40 tons).
16 forklifts (10×3 tons, 3×5 tons, 2×10 tons, 1×25 tons).
4 tractors.
26 trailers (20×2 tons, 4×6 tons, 2×25 tons).

BULK CARGO FACILITIES: 4 alumina silos each of 4,000 tons capacity which can load into vessel by conveyor belt at a rate of 250 t.p.h.
STEVEDORES: Gangs of 6 – 8 men each, load/discharge cotton at rate of 100 tons per shift, general cargoes 125 tons per shift.
Working Hours: First shift: 0800 hrs. – 1600 hrs. (lunch break from 1200 hrs. – 1230 hrs.). Second shift: 1600 hrs. – 2400 hrs. (meal break from 1900 hrs. – 1930 hrs.).
TANKERS: *ANT Terminal:* United Nations Terminal in position Lat. 36° 49' 15" N., Long. 30° 36' 30" E. Depth of water 17 m. – 18 m. "L" type buoy system. Discharge line is 10 in. line to stern (Port or starboard side). Line can be adjusted to 8 in. or 12 in.

There are 2 tank farms to receive cargo. They are 450 m. – 500 m. and 1,600 m. from the Sea Buoy. Discharge rate 300 t.p.h. – 400 t.p.h. Daylight only navigation permitted.

FRESH WATER: Fresh water supplied from hydrants on quays by watermen. Rate of delivery is 32 t.p.h. – 40 t.p.h. Water also available by barge of 300 tonnes capacity.
FUEL: Available by road tanker.
CERTIFICATES: Certificate of Freeboard, Certificate of Registry, Certificate of Pratique, Light Bill, Manifest, AA(1) Certificate.
AIRPORT: Antalya Airport is 22 km. from the port, 12 km. from Antalya city centre.
TIME: GMT plus 2 hours.
HOLIDAYS: Work is possible on Turkish holidays, weekends upon request.
GARBAGE DISPOSAL: Garbage disposal service is available. Drums are provided if required. Charges are as follows:

	Cost (U.S.$)/1,000 g.r.t.			
	Flag of Ship		*Cost (U.S.$)*	
Method of Service	*Turkey*	*Others*	*Barge*	*Container*
On Quay	16	45	10	1.00
At Anchor	30	90	10	1.00

WASTE OIL DISPOSAL: Waste oil disposal service is available. Charges are as follows:

	Cost (U.S.$)/1,000 g.r.t.	
	Flag of Ship	
Method of Service	*Turkey*	*Others*
On Quay	20	60
At Anchor	40	120

Facilities include two oily water separators of 2 tons per hour capacity and a shore tank of 100 tons capacity.

Contact – Tel: 0242-2481469/2481494. Telex: 56186 ANDETR. Fax: 0242-2483346, for further details.

SEAMAN'S CLUBS: There is no seaman's club operating in the port, but the port is situated near the city, and all shopping, international telephone, some sporting activities, dances, transportation, and postage facilities are available there.
CURRENCY: Turkish Lira (TL).
DEVELOPMENTS: TMO and SEKA quays (3) are still under construction for passenger vessels, grain and lumber.
AUTHORITY: TDI is in charge of loading/ discharging.

BANDIRMA (including Bagfas): 40.22 N. 27.58 E.
(See Plan)

LOCATION: Bandirma is situated on Southern side of Marmara Sea about 63 nautical miles from Istanbul. Admiralty Chart No. 294.
PORT LIMITS: The sea area of the Port of Bandirma is an area inside a line joining Latitude 40° 23' 42" N., Longitude 27° 54' 12" E. and Latitude 40° 22' 00" N., Longitude 27° 59' 30" E.
DOCUMENTS:
7 copies Crew List.
2 copies Crew Declaration List.
2 copies Ship's Stores List.
4 copies Passenger List.
2 copies Transit Cargo Manifest.
3 copies Inward Cargo Manifest (1 copy must be legalised by Turkish Consulate at loading port. If no Consulate existing same to be certified by Local Customs Officer or the Chamber of Commerce.)

Special Regulations: Special regulations, copies of which should be obtained by vessels proceeding to Bandirma, are in force for anchoring, berthing alongside mole and for vessels carrying inflammable or explosive cargoes. Vessels required to give ETA to Harbour Authorities at least 24 hours in advance, also nationality, cargo and last port of call. Unless prevented by important reasons, Masters of all vessels must present their papers to Harbour Authorities within one hour of arrival.
PILOTAGE: Compulsory in the New Harbour and Bagfas/Iskur Wharf. It is compulsory to employ a pilot and tugs in and out of the harbour. Charges for such services are levied by TCDD (Turkish Railway Administration), as per compulsory zone pilotage, and tug tariff effective in Istanbul. One pilot boat of 2×385 h.p.
APPROACHES: Two long entrance channels lead from Bandirma Bay to the harbour.
ANCHORAGE: Good anchorage in roads about 370 m. off entrance to harbour in depths up to 12.8 m. There are also suitable anchorages within the breakwater area.
MAX. SIZE: Max. draft 12.0 m.
HEALTH: Arriving vessels are inspected at the Dardanelles and Istanbul (Bosphourus) No other inspections are required.
RADIO: Istanbul Radio – call sign TAH; Bandirma Radio – call sign TAA4; Tekirdag Radio – call sign TAA3.
VHF: Channels 16, 12, 13 and 14.
TUGS: 3 tugs available (up to 1,000 h.p.).
Vessels up to 500 g.r.t. do not require tugs. Vessels over 500 g.r.t. use one tug, and vessels over 3,000 g.r.t. use 2 tugs. Tugs are provided by the Port Administration.
BERTHING: The port is protected by 2 breakwaters, 1,000 m. and 500 m. long.

Berth No.	*Length* (m.)	*Depth* (m.)	*Remarks*
1	130	8.25	Passenger
2 – 3	284	10.00	General Cargo
4 – 5	324	10.00	General Cargo
6	130	10.00	General Cargo
7 – 8	379	10.00/12.00	Dry Bulk
9	203	10.00	Dry Bulk
10	100	10.00	Dry Bulk
11	190	10.00	Dry Bulk
12	182	10.00	Dry Bulk
13	80	10.00	Dry Bulk
14	180	8.25	Dry Bulk
15 – 16	270	4.00	
17 – 18	335	4.00	For vessels under 300 n.r.t.

Storage: Open storage area of 79,845 sq.m., and covered storage area of 7,000 sq.m. Grain silo: Capacity 20,000 tons.
Bagfas: Bagfas Fertilisers (Private Wharves):
Location: Bagfas Fertilisers Jetty is situated on Southern side of the Marmara Sea about 5 nautical miles from Bandirma. (Admiralty Chart No. 294).
Pilotage: The jetty is private but pilotage/tug boat/mooring boat services are operated by TCDD (Turkish State Railways).
Anchorage: Port of Bagfas is an open port, but good anchorage in roads a few cables off the entrance in depths up to 7 fathoms.
Accommodation: Bagfas have 2 jetties. Old jetty – length 125.6 m., depths between 12.3 m. and 9.30 m. New jetty – length 125 m., depth 16.5 m. and 13.5 m.
NOTE: From jetty to each mooring dolphin 61 m.
Port Facilities: One moving crane available on the old jetty with 10 tons lifting capacity which loads bulk cargoes into bunker which is connected to conveyor belt with discharging capacity up to 3,000 tons daily.
Receiving capacity of products is 150/400 tonnes per hour.
Working hours 24 hours per day.
Jetties are used for discharging phosphates, sulphur in bulk, sulphuric acid, phosphoric acid, ammonia, fertilisers in bulk and/or bagged and for loading sulphuric acid, phosphoric acid, bulk and/or bagged fertilisers.
Principal Imports: Bulk phosphate and sulphur, phosphoric acid, sulphuric acid, ammonia, bulk and bagged fertilisers.
Principal Exports: Sulphuric acid, bulk and bagged fertilisers.
SPECIALISED CARGO HANDLING FACILITIES:
Containers: Handled by 25 ton shore crane.
Ro-Ro: Ramp available at Passenger Pier (Berth No. 1).
CRANES: There are 15 shore cranes with capacity 3 – 25 tons, 5 mobile cranes with capacity 3 – 25 tons and 3 crawler mobile cranes.
Other equipment includes 14 forklifts with capacity 3 – 5 tons, 5 towing tractors, 3 loaders and 8 pneumatic loaders of 50 t.p.h. – 160 t.p.h.
STEVEDORES: *Working Hours:* Service is provided to vessels 24 hours a day. First shift 0800 hrs. – 1630 hrs., second shift 1630 hrs. – 0030 hrs., third shift 0030 hrs. – 0800 hrs.
Loading Rates: Ore loading capacity 800 tons/shift/gang. Bagged cargo, loading 140 tons/shift/gang. Bulk cargo, 500 tons/hatch/shift. Work can be carried out day and night.
Principal Imports and Exports: Imports: Bulk phosphate and sulphur, phosphoric acid, ammonia, fertiliser.
Exports: Various ores and acids, marble, grain, canned foods, flour, tomato paste and domestic appliances.
MEDICAL: State hospital and private hospital available.
FRESH WATER: Available at berths.
FUEL: Vessels at anchorage can be supplied with fuel. Fuel als available by truck.
With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron and B.P.). Telex: 29048 Bunk Tr. Tel: (0216) 33 25 09, 337 36 86, 337 88 31, 336 06 36. Mailing address: Petrol Ofis – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.
CONSULS: None.
REPAIRS: Minor repairs are possible.
OPENING/CLOSING HATCHES: May be opened or closed by ship's crew, or by stevedores at extra charge.
CUSTOMS ALLOWANCES: 50 cigarettes for each man going ashore. On board the vessel each man may hold 200 cigarettes and a bottle of spirits.
AIRPORT: Local airport not operational. Istanbul Airport 350 km.
TIME: GMT plus 2 hours.
HOLIDAYS: New Year's Day (commences 1200 hrs./December 31st), National Sovereignty Day (April 23rd), Sports Day (May 19th), Victor Day (August 30th), October 29th, Sheker Bayram (3 days, movable), Kurban Bayram (4 days, movable). However, the port is not working the first days of Sheker Bayram and Kurban Bayram, during all other days work carried out.
POLICE/AMBULANCE/FIRE: Police Tel: 155. Fire Tel: 110. Hospital (public) Tel: 0266-7142780. Hospital (private) Tel: 0266-7180625.
IDENTIFICATION CARDS: Seamen's Book is sufficient.
GARBAGE DISPOSAL: Garbage collection service and equipment is available. This service is given at all berths.
WASTE OIL DISPOSAL: Collection service is available. An oily water separator system of 15,000 cu.m./year is also available.
CURRENCY: Turkish Lira (TL).
GENERAL: *Security:* Port Security personnel ensure the security of the port 24 hours a day.
Weighing Facilities: There are 2 weighbridges up to 100 tons capacity (one for wagons and the other for trucks).
Weather: North winds prevail in the area and cause high seas. The breakwaters protect harbour from North and West winds.
AUTHORITY: General Directorate of Turkish State Railways (TCDD), Bandirma, Turkey. *Tel:* 0266-7187530, 7134966. *FAX:* 0266-713601 *Contact:* I. Bulent Ozen, Port Director. Mr.Hasan Karakus, Port Manager Ibrahim Yalkiri, Harbour Master (Tel: 0266-7181028).

AGENT: See "Istanbul".

BORUSAN: 40.25 N. 29.05 E.
(See Plan

LOCATION: Borusan Jetty is situated West of Gemlik in positio Lat. 40° 25' 03" N., Long. 29° 05' 21" E., on East side of Marmara Sea about 52 miles from Istanbul.
PORT LIMITS: East of 29° 04' 00" E., in Gemlik Bay.
DOCUMENTS:
Customs:
2 copies Crew List.
2 originals Crew Effects Declaration.
2 copies Stores List.
3 copies Cargo Manifest (Originals).
Immigration:
2 copies Crew List.
Seaman's Book.
Harbour Master:
2 copies Crew List.
Vessel's Certificates.
Last Port of Clearance.
Stevedoring Company:
Initial Cargo Plan.
Vessel's Particulars (Stevedores form).
Vessel's Requisition form for Garbage/Bilge Water Disposa (Stevedores form).
Cargo Gear Book.

PILOTAGE: Compulsory. Provided by Gemlik Pilots Associati (Tel: 244-5136164), who are located at Gemlik Fishing Port.
24 hours notice before arrival should be given to Pilot through Age Pilot comes on board by pilot boat.
ANCHORAGES: If required, can be advised by Pilot. Vessels must clear of white buoys lying from Long. 29° 09' 02" E. (EP) to West approximately 750 m. in Gemlik Bay when anchoring.
RESTRICTIONS: Berthing in daylight and unberthing 24 hours.
Depths vary from 4.5 m. to 8.5 m. at Mudanya side and 5.00 m 9.00 m. at Gemlik side of pier.
MAX. SIZE: Max. LOA 165 m. due to draft restrictions (2 vessels c be berthed).
HEALTH: All arriving vessels are inspected at Dardanelles or Bosphor and should have Sanitary Clearance.
RADIO: Port has no communications equipment. ETA messages t routed to addressee via Istanbul Radio (Call sign "TAH"). At anchor or when berthed on pier, telephone call is possible through Band Coastal Radio Station by VHF Channel 16.
VHF: The calling channel for all stations is Channel 16. Pilots Channels 16 and 14.
RADAR: Radar assistance is not available.
TUGS: 800 h.p. and 1×1,500 h.p.
Vessels 2,000 g.r.t. – 5,000 g.r.t. – 1 tug.
Vessels 5,000 g.r.t. – 25,000 g.r.t. – 2 tugs.
Vessels over 25,000 g.r.t. – 3 tugs.

BERTHING: The 170 m. jetty offers 2 berths alongside. Depth 7.0 m. – 7.5 m. on Mudanya side and 7.5 m. – 8.0 m. on Gemlik side of pier. Vessel may be loaded and discharged while moored stern to the open sea.
CRANES: 3 cranes with lifting capacities of 25 tons, 40 tons and 100 tons operating on the jetty. Mobile cranes available for hire.
BULK CARGO FACILITIES: Bulk cargo storage area is available for alloy type cargo, handling with bulldozers, buckets and grabs for discharging operation.
SPECIALISED CARGO HANDLING FACILITIES: General, bulk cargoes and steel products.
BRIDGES: None.
STEVEDORES: Performed by Bortrans Denizcilik Hizmetleri A.S., Gemlik, part of the Borusan Group.

Working 24 hours with 3 shifts a day.
1st Shift 0800 hrs. – 1600 hrs.
2nd Shift 1600 hrs. – 2400 hrs.
3rd Shift 0000 hrs. – 0800 hrs.

MEDICAL: Emergency hospital and dental facilities are available at Gemlik, approximately 10 km. from the Borusan plant.

Masters to inform Agent if any medical assistance is required in order to make adequate arrangements.
TANKERS: No facilities.
DENSITY: 1018 – 1019.
FRESH WATER: Available by trucks, capacity 6 or 10 tons.
FUEL: Available by trucks.
FIRE PRECAUTIONS: Factory fire brigade available.
CONSULS: None locally.
REPAIRS: Small repairs possible.
DRY DOCKS: None.
SURVEYORS: Marine surveyors representing Lloyd's, A.B.S., N.V., Turkish Lloyd's and Socotec Avrasia's representatives may be ordered from Istanbul with sufficient notice.
GANGWAY/DECK WATCHMAN: Vessel's accommodation ladder or gangway used. Watchmen are not necessary.
OPENING/CLOSING HATCHES: Opening and closing hatches is performed by ship's crew.
CUSTOMS ALLOWANCES: Each crew member is permitted 2 cartons cigarettes and 2 bottles of spirits. Excess is sealed by Customs Officers.
REPATRIATION: Can be arranged by vessel's Agent with necessary documents.
AIRPORT: Nearest airport at Bursa, approximately 32 km. from Borusan. There are daily flights to Istanbul (flight time 30 minutes).
TIME: In Summer, GMT plus 3 hours. In Winter, GMT plus 2 hours.
HOLIDAYS: 1996: New Year's Day (1st January); National Sovereignty Day (23rd April); Sports and Youth Day (19th May); Victory Day (30th August); Proclamation of the Republic (29th October); Ramadan (3 days movable); The Moslem Festival of Sacrifices (4 days movable); Weekend holiday (Sunday only).

Please note: Ramadan holiday in 1996 is 17th – 25th February, and Moslem Festival in 1996 is 28th April – 1st May.

Official weekend holiday from 1700 hrs. on Friday to 0800 hrs. on Monday.
POLICE/AMBULANCE/FIRE: Police Tel: 055. Fire Department Tel: 110. Ambulance/Emergency Health Assistance Tel: 112.
TELEPHONES: Cannot be connected on board. A call-box is available on quay near Bortrans' office building.
BANKS: Only Turkish Banks at Gemlik.
Turkiye Is Bankasi. Tel: 5132455.
T.C.Ziraat Bankasi. Tel: 5130090 or 5130079.
Turkiye Halk Bankasi. Tel: 5131574 or 5132570.
Turkiye Vakiflar Bankasi. Tel: 5131242.
STORING: See "Prelims".

Vessels are loading and discharging from/to trucks.

Trucks can proceed alongside the berth, there is no obstruction or pier construction for free working of trucks and forklifts.

Forklifts can use jetty only for handling cargoes.

Customs regulation not in force regarding storing.

Local riggers are not employed to assist cargo handling. Only Bortrans (official stevedoring company) at Borusan Pier for all cargo handling operations.
SHIP SUPPLY SERVICE: None.
SHORE LEAVE: After completing Customs and Immigration formalities, crew members are allowed ashore.
IDENTIFICATION CARDS: Shore passes issued.
GARBAGE DISPOSAL: Available from stevedoring company.
WASTE OIL DISPOSAL: Available via stevedoring company, if requested through vessel's local Agent.
SEAMAN'S CLUBS: None.
CURRENCY: Turkish Lira (TL). U.S.$ 1.00 = 65,000 TL (February 1996).
REGULATIONS: Swimming and walking around factory prohibited. Walking only permitted from vessel direct to main entrance of factory.
DELAYS: No delays at Borusan facilities, but bad weather conditions may cause delays.
GENERAL: Borusan Jetty, built in 1984, is located at the entrance of Gemlik Bay and Eastern part of Marmara Sea which is known as Cape Tuzla. Type of pier is reinforced concrete jetty and clear alongside distance is 170 m., width 15 m.

Borusan Jetty has been operating since 1984 and 450 Turkish and foreign flag vessels called in 1995. The deadweight of vessels changes from 1,000 tons up to 10,000 tons and sometimes more than 10,000 tons, depending on arrival draft and cargo quantity on vessel.
DEVELOPMENTS: New pier, length 200 m., depth 9.0 m. (average) under construction (mid-1996). Completion expected mid-1997.
AUTHORITY: Bortrans Denizcilik Hizmetleri A.S., Hisar Mahallesi, Gemsaz Mevkii, 16601 Gemlik/Bursa, Turkey. *Tel:* (224) 5248630, 5248631. *Telex:* 32498 Bsaa Tr. *FAX:* (224) 5248633. *Contact:* Captain Bugrahan Hanagasioglu, General Manager. Captain Erdogan Koseoglu, Chartering Department.

BOTAS (CEYHAN) PORT, including Delta Terminal, Aygaz Terminal, Toros Terminal, Botas Terminal and Dortyol Terminal: 36.53 N. 35.56 E. **(See Plan)**

(A) BOTAS (CEYHAN) TERMINAL.
(B) TOROS GUBRE.
(C) DELTA TERMINAL.
(D) AYGAZ TERMINAL.
(E) DORTYOL BOTAS TERMINAL.
(F) BAYRAKTAR TERMINAL.

(A) BOTAS (CEYHAN) TERMINAL

PORT LIMITS: The Botas (Ceyhan) Harbour is operated under the Authority of Botas Harbour Master's Office and the harbour area is the sea area North of a line between:
(1) 36° 36' 00" N., 35° 47' 42" E. (Yumurtalik Lighthouse).
(2) 36° 49' 06" N., 36° 10' 06" E. (mouth of brook "Deli Cay").

"Botas Terminal", "Toros Terminal", "Delta Terminal", "Dortyol Terminal", "Bayraktar Terminal" and "Aygaz Terminal" are in Botas Port Limits.

Pilotage is compulsory for mooring and unmooring by day or night according to regulations of Botas (Ceyhan) Port, which is in force within Botas Port Limit.
DOCUMENTS:
7 Crew Lists.
7 Passenger Lists.
2 Stores Lists.
2 Crew Declaration Lists.
1 Free Pratique.
Last Port Clearance.

Agent has to take the Certificates to the Port Authority at Botas.
PILOTAGE: Pilotage is compulsory for mooring and unmooring. Pilot will meet the ships 2 miles South from the end of the jetty in the anchorage zone.

It is requested that pilot ladder be of an approved pattern and securely rigged.

After the ship has berthed, the Pilot / Loading Master stays on the ship and requires a separate cabin.
ANCHORAGES: There are 2 "Tanker Anchorage Zones" near the terminals.

Tanker Anchorage Zone (I):

	Point	Position
Point	(a1)	36° 53' 02" N., 36° 00' 00" E.
"	(b1)	36° 49' 30" N., 35° 57' 04" E.
"	(c1)	36° 49' 00" N., 35° 59' 40" E.
"	(d1)	36° 52' 36" N., 36° 02' 05" E.

Tanker Anchorage Zone (II):

	Point	Position
Point	(a2)	36° 51' 50" N., 36° 04' 50" E.
"	(b2)	36° 50' 00" N., 36° 05' 05" E.
"	(c2)	36° 50' 00" N., 36° 06' 52" E.
"	(d2)	36° 51' 50" N., 36° 06' 20" E.

There are 2 "Prohibited Anchorage Zones".

Prohibited Anchorage Zone(I)

	Point	Position
Point	(A1)	36° 52' 12" N., 35° 55' 07" E.
"	(B1)	36° 50' 30" N., 35° 56' 05" E.
"	(C1)	36° 51' 30" N., 35° 58' 30" E.
"	(D1)	36° 52' 25" N., 35° 58' 52" E.
"	(E1)	36° 54' 28" N., 36° 00' 48" E.
"	(F1)	36° 55' 50" N., 36° 00' 22" E.

Prohibited Anchorage Zone (II):

	Point	Position
Point	(A2)	36° 52' 24" N., 36° 07' 48" E.
"	(B2)	36° 51' 36" N., 36° 06' 30" E.
"	(C2)	36° 49' 45" N., 36° 07' 00" E.
"	(D2)	36° 49' 48" N., 36° 10' 00" E.

NOTE: There are two shallow water buoys (Fl. 3 ev. 15 sec.) in position 36° 57' 56" N., 35° 55' 39" E. and 36° 52' 12" N., 35° 55' 52" E.
RESTRICTIONS: Berthing and unberthing possible at any time day or night, weather conditions permitting. However, vessels over 100,000 d.w.t. are not allowed to berth at Berth No. 4 after sunset.
MAX. SIZE: 300,000 tonnes d.w.t. at outer berths and 150,000 tonnes d.w.t. at inner berths. Maximum displacement is 150,000 tons.

If vessel over 300,00 d.w.t. but under 150,000 tons displacement, vessel could berth at Berth No. 1 during daylight hours, at the discretion of the District Manager of BOTAS and the Marine Department after taking into account LOA, draft, freeboard and weather conditions.

Also see "Berthing".
RADIO: It is essential that tankers bound for the Botas Terminal communicate with their Agent with at least 72 hrs., 48 hrs. and 24 hrs. before arrival and state ETA, cargo required, maximum loading rate, S.W.L. of derrick, manifold measurements and quantity of ballast on board, time required for deballasting and whether vessel is gas-free. Vessel should request Agent to forward the information to Botas.
VHF: Botas Terminal Shore Control on VHF Channels 16 and 22.

Arriving vessels should make contact at least 4 hours before arrival at the anchorage in order to avoid delays.

Channels 16 and 22 always watched.

Terminal uses Channels 10, 11 and 12 for cargo handling and manoeuvring. Channel 11 is for manoeuvring and Channels 10 and 12 are for jetty operations and not to be used for other purposes.

When the ship makes contact with Botas, the following information to be given to the Iraqi representative:

Ship's name, nationality, deadweight, cargo required, loading rate required, dirty, clean and permanent ballast quantity and deballasting time.

Iskenderun Radio on Channel 16 for connection with telephone numbers ashore.

RADAR: There is no port Control Radar. The approach from the SW or South can be made without difficulty as the coast line provides very good fixes.

TUGS: There are 6 tugs available to assist in berthing and unberthing. 1×2,600 h.p., 3×3,200 h.p., 1×1,300 h.p. and 1×1,200 h.p. The tugs are provided with fire fighting equipment.

For vessels of 2,000 g.r.t. up to 4,000 g.r.t., which are berthing/unberthing, it is compulsory to take at least 1 tug, 2 tugs for vessels from 4,001 g.r.t. up to 40,000 g.r.t., 3 tugs for vessels from 40,001 g.r.t. and over.

Depending on weather and having regard for safety conditions, additional tugs may be assigned by Botas or Port Master's Office or requested by vessel.

BERTHING: Four loading berths available. Vessels berth with bow seaward (starboard side alongside at No. 1 and No. 3, and port side alongside at No. 2 and No. 4):

Berth No.	*Max. size* d.w.t.	*Depth Alongside* (m.)	*Max. Draft* (m.)	*Max. LOA* (m.)
1 (Outer East)	300,000	23.00	21.60	355
2 (Outer West)	300,000	23.00	21.60	355
3 (Inner East)	150,000	18.00	16.70	300
4 (Inner West)	150,000	18.00	16.70	300

Freeboard:	*Maximum*	*Minimum*
Berths No. 1 and 2:	22.0 m.	2.50 m.
Berths No. 3 and 4:	20.0 m.	2.00 m.

Moorings: (All wires to have synthetic tails of 15 m. – 20 m. length).

Forward	Aft
4 Headlines	4 Sternlines
3 Breastlines	3 Breastlines
2 Springs	2 Springs
1 Towing Wire	1 Towing Wire

LOADING:

Berth No.	*Max. Loading* Rate cu.m.p.h	*Loading Arms*	*Ballast Arms*
1	15,000	4×20 in.	20 in.
2	15,000	4×20 in.	20 in.
3	8,500	4×16 in.	16 in.
4	8,500	4×16 in.	16 in.

Two grades of oil are loaded in BOTAS:

(1) Kirkuk Blend Crude Oil (API 36.95-35.98 and temperature 80°F.-105°F.).

(2) Basrah Light Crude Oil (API 34.97-33.05 and temperature 80°F.-105°F.).

Maximum loading rates are dependent upon availability of loading lines on the ship.

Pilot / Loading Master is the adviser for all mooring, unmooring, cargo operations and communications with shore, etc.

Derricks and Cranes: Derricks and cranes S.W.L. of 0.75 tonnes are recommended.

Loading Operations and Shore Communication: Ship's tanks are inspected by Loading Master and passed as suitable for loading.

Responsible ship's officer must certify to the Loading Master that all ship's valves are closed or blanked except those required for loading and water circulation purposes, and that these Rules and Regulations are being and will be observed.

The Loading Master will not transmit any loading instructions to the shore until the responsible ship's officer is satisfied that the hoses are connected correctly and that all valves have been set for receiving cargo.

Loading rates requested by the vessel or quoted by the Terminal will be the peak or maximum rate at any time during the loading period.

The Loading Master will advise the Master of the ship as to shore communication and any signal needed for local requirements.

Ship's crew with an officer in charge will assist in all operations as advised by the Loading Master. This includes lifting, connecting, disconnecting, lowering of hoses and tending moorings.

Lighting: Manifold and mooring areas should be adequately lit to enable night mooring and loading operations to be carried out with safety. Sea area around the ship to be illuminated.

Notice of Readiness: Notice of Readiness will be received by the Loading Master. It should be tendered at the time of anchoring or Pilot boarding. Lay time will commence 6 hours after receipt of Notice of Readiness. Notice of Readiness to be addressed "S.O.M.O. Representative, Botas Terminal – Ceyhan".

Deck Watch: A responsible ship's officer shall be on watch on board at a point near the ship's tanks which are receiving oil during the process of loading and NOTICE IS HEREBY GIVEN that the Loading Master has received instructions to stop loading immediately this rule is disregarded.

Capable members of the ship's crew shall be stationed by the ship's tank valves which are receiving oil during the process of loading.

All pipelines and hoses shall, while rigged for loading crude oil, be directly and continuously under supervision. No crude oil shall be allowed to escape or overflow.

DENSITY: 1027.

BALLAST: Max. ballast discharge rate 5,000 cu.m.p.h.

Shore ballast tanks capacity – 65,000 cu.m.

Vessels should arrive with sufficient ballast for safe handling of vessel under prevailing weather conditions.

Vessels shall not discharge into the waters of the port any part of the content of their cargo, slop, or ballast tanks or bilges which is liable to pollute these waters. If the vessel is sure that ballast is extremely clean, it is permissible to deballast to sea, but in case of pollution, fine is heavy. Masters of tankers will be held responsible in cases of wrong declaration of clean or dirty ballast. Deballasting during loading (simultaneous) especially in Winter season is preferable for safety.

Ballast water must be declared and signed by the Master and delivered to the Terminal to this effect. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard.

It is an offence to discharge dirty ballast or pump out bilges.

MEDICAL: Master to inform Agent by cable if urgent medical assistance is required upon arrival, also indicating, if possible, seriousness of case in order that adequate steps may be taken. Hospital and doctor are available at Ceyhan 25 km., Adana 75 km., and Iskenderun 65 km., distance from Botas (Ceyhan) Terminal.

FRESH WATER: Available at jetty. Rate 25 t.p.h. Arrangements to be made through Agent.

FUEL: Not available alongside.

With 24 hours notice Anadolu A.S. – Istanbul, can supply marine fuels in Iskenderun Bay by branch of Anadolu A.S. Tel: 1515873 (7 lines), Telex: 38018-38019. Fax: 1437072.

With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron & B.P.). Telex: 29048 Bunk Tr. Tel: (1) 3382509, 3373686, 3378831, 3360636. Mailing address: Petrol Ofisi-Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

CONSULS: At Iskenderun.

REPAIRS: Not possible.

SURVEYORS: There are no Classification Societies at the port.

GANGWAY/DECK WATCHMEN: There is no watchmen service.

CERTIFICATES: Load Line, Ship Safety Construction, Safety Radio, Safety Equipment Certificate, Certificate of Registry, Oil Pollution Insurance, Tonnage, Machinery class and minimum manning documents.

CUSTOMS ALLOWANCES: 40 cigarettes for each crew member going ashore. On board the vessel each crew member may hold 200 cigarettes and 1 open bottle wine/spirits out of bond.

AIRPORT: Adana Airport, served only by domestic lines with routes t Istanbul and Ankara. Airport is situated 75 km, from Botas (Ceyhan Terminal. Twice daily service to international airport at Istanbul.

TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.

HOLIDAYS: New Year's Day (January 1st); Sports Day, (May 19th) Victory Day, (August 30th); National Holiday from October 28th (1200 hrs.) to October 29th (2400 hrs.); Shakear Bairam (3.5 days movable); Kurban Bairam (4.5 days, movable).

The terminal works all year round.

POLICE/AMBULANCE/FIRE: All information given after berthing.

TELEPHONES: Cannot be connected on board.

SERVICES: Daily garbage service available to vessels alongside and at anchor.

SHORE LEAVE: Crew permitted to go ashore with shore passes and Seaman's Book.

It is forbidden to walk on jetty and in terminal area. A vehicle is obtained by Botas for the needs (transportation) of ship's personnel on jetty. Th vehicle goes only to the gates.

IDENTIFICATION CARDS: Seaman's Book is sufficient.

REGULATIONS: In addition to Harbour Regulations all ship Masters ar at all times responsible for the application of all safety precautions a prescribed in the International Oil Tanker and Terminal Safety Guide.

GENERAL: The main engines of all vessels while at the berth shall b kept ready for immediate use. Deck power (steam) is to be maintained at all times and water pressure shall be maintained on the fire fighting system.

Repairs which may prevent the working of the vessel's main engine may only be undertaken in the Port with the written permission of Bota Representative.

The Master shall at all times retain on board sufficient crew to wo the vessel.

No craft, other than one having on board the Pilot or Port Heal Officer, may approach any vessel entering the Port and no other perso may board until Free Pratique has been granted.

Whistle or siren to be available at all times.

Boarding of Vessel: The control of persons boarding vessel is the shi responsibility. Boarding should be restricted to Botas employees on du and to persons authorised by the Port Authorities as advised by vesse Agent.

Stores/Provisions: Vessels may store at the anchorage or while ves is at the berth with permission from Botas Authority.

Tanker Safety: Masters are at all times responsible for the applicati of all safety precautions as prescribed in the International Oil Tank and Terminal Safety Guide.

I.O.T.T.S.G. Safety Check List: The tanker safety check list must b completed after inspection of each item prior to commencement of a during loading. The Loading Master is authorised to stop all load operations should he consider that the safety of lives and propert endangered by the infringement of safety rules.

Signals: The following signals must be shown when vessel is in the Po

By day: Flag "B" of the International Code of Signals. At night: 1 cl red light visible all around.

Fire Fighting Equipment: Vessels must be adequately manned for fi fighting and vacating the berth in case of an emergency.

The following fire-fighting precautions must be taken.

(a) Fire hoses must be run out fore and aft or monitors ready for u

(b) Fire-mains must be under pressure.

(c) 1 dry chemical extinguisher must be stationed on either sid the ship's manifold.

Fire Fighting Equipment on each Loading Berth: Equipment is prov for fire fighting on the platforms or exposure protection for the platfor and the tankers being loaded as follows;

(a) 2 elevated foam/water monitors are mounted on each acc tower on the platform capable of delivering 3,550 l.p.m. (g.p.m.) of water or foam solution, and has a throw of 60 m. E monitor is remote controlled from the control room and flexibility of full horizontal rotation and vertical reflection.

(b) 2 deck level manual water spray monitors of 450 l.p.m. an foam branch pipes of a capacity of 450 l.p.m. of foam de used to extinguish fires on the manifolds.

(c) A number of portable dry chemical and CO_2 extinguishers located in various locations.

(d) There are numerous foam pourers and water spray fac located under the deck for water surface foam blanketing an smothering.

(e) Water curtain facilities are provided on the loading towers to prevent fire spread to and from the berths.

Action in Case of Emergency: In the event of a fire, oil spillage or other emergency on the vessel.

Emergency and Fire Signal: One or more blasts of the ship's whistle, each blast of not less than 10 seconds duration supplemented by a continuous sounding of general alarm system.

SHIPMASTER'S REPORT: December 1980.

Botas and Toros Gubre Piers:

Approach: Situated in the Gulf of Iskenderun on the N.W. corner of the Gulf. The oil pier, which is the outlet from the "Kirkuk" oilfield in Iraq, is about 5 miles below the head of the Gulf on the Northern shore with the fertiliser pier 2 miles from the Gulf head.

The approach from the S.W. (Mersin direction) or South (Suez Canal) can be made without difficulty as the coast line provides very good fixes.

The lights marked on the piers do not exist. The oil pier light has been broken for six months and the Pilots say it will probably never be fixed, also the fertiliser pier light is not connected to the supply. The oil pier is visible at 24 miles (radar) and is well lighted at night by arc lamps. Generally there are a few anchored tankers lying off.

BA. 2632 is at present the only British chart available. There is a Turkish chart 334 which is considerably better.

VHF: The Fertiliser Pier has no VHF.

Botas Oil Pier uses Channels 16, 10, 24 (Duplex).

Channel 24 is used for intercommunication between various installations for transfer of figures. It can also be used to plug into the general telephone system to talk to the Toros Fertiliser Pier.

Call "Botas Terminal", 24 hour watch. In the early hours of morning no English spoken.

Anchorage: Toros Fertiliser: 1.0 – 1.5 miles S.E. of pier. Good holding.

Botas Oil Terminal: 1.5 – 2 miles S.E. of pier.

Both open to S.W. winds.

Pilot: Botas Pilot serves both terminals. Priority given to Botas.

A total of 6 Pilots are on 24 hour call.

Pilots board in anchorage area from black hulled and brown superstructure launch of about 10 knots.

They will also travel by car to Toros Berth in about 15 minutes.

Berthing: Botas: 24 hours a day with wind speeds up to 25 knots.

Toros: Wind speeds up to 15 knots and then only if good forecast.

No berthing from 1 hour before sunset to sunrise. Unberthing throughout 24 hours.

Tugs: Botas fire fighting tugs on 24 hour stand-by, 4 available.

Kort nozzles: 3 of 2,600 h.p. and 1 of 1,600 h.p.

When berthing, push with bow line onboard. When unberthing, use ship's line which is doubled up.

Botas: 300,000 d.w.t. – 4 tugs
150,000 d.w.t. – 3 tugs
Toros: – 1 or 2 tugs

Pilot reports that they will operate with wind speeds up to 35 knots with large swell to take vessels off piers. Botas Terminal has priority.

Botas Berths: Nos. 1 and 2 at outer end of pier, No. 1 (East) and No. 2 (West), depths 27 m., loading rate up to 20,000 cu.m.p.h.

Nos. 3 and 4 at inner end of pier, No. 3 (East) and No. 4 (West), depths 18 – 19 m., loading rate up to 10,000 cu.m.p.h.

Weather: By observations and Pilots advice a low pressure to the North causes a large S.W. swell which coupled with a S.W. wind makes the Toros berth very dangerous.

N.W. winds up to Force 6 cause no real problems as the berth is in the shelter of the hills and the swell is not apparent. With N.W. winds on the Botas berth, the Pilot says it can cause problems due to the berth not having much shelter.

During the Summer months, often strong S.W. winds are common between 1100 hrs. to 1500 hrs. each day, which in the Pilot's opinion could make the Toros berth untenable.

Forecast: The local television gives a weather report. Rome Nato, if on time, is the only area forecast in English. Watch the barometer.

Toros Berths: Discharge only at present.

Berth head out. Bulk – Port side to on West side. Liquid – Starboard side to on East side.

Extends about 0.5 miles from shore, the berthing section lying in a 194° – 014° direction. Liquid side in position 36° 54.60' N., 35° 59.04' E.

Both berths designed for max. of 30,000 d.w.t.

Bulk berth has 5 tonne grab crane. Liquid side Chicksan.

Depths each berth minimum 12.5 m.

Mooring/Fenders: Toros: This can be a problem, and is dependent on length of vessel, particularly aft as the mooring dolphins do not go far enough astern.

As far as possible a 4, 2, 3 arrangement is required. With a swell, expect to part moorings, we parted six lines. Two good mooring boats from Botas Terminal used.

Fenders are 4 large flat plastic/steel faces on sprung rubber compresses. Unfortunately for a long vessel they are set too close together and need to be another 10 m. in each direction to give good coverage.

Jetty Dimensions/Gangways: Toros: Liquid side: Jetty face is 18 m. long and 9 m. above MLW.

Bulk side: 120 m. face and 7.5 m. above MLW.

For gangway purposes this means that on the bulk side the gangway can be used as long as the ship is not small.

On the liquid side a straight "B.O.T." type gangway will be necessary to land on the small pipe platform.

Discharge: Toros: Bulk side: 5 tonne capacity travelling grab crane which discharges into conveyor belt to the plant.

3 shifts of 8 hours worked, total 24 hours.

Liquid Ammonia: 6 in. Chicksan into 6 in. main line and 2 in. cooling line. Connection 6 in. 150 ASA – spool piece 12 in. – 6 in. provided. Shore labour connects/disconnects.

Sulphuric Acid: Connection on jetty of 10 in. 300 ASA.

Phosphoric Acid: Connection on jetty of 8 in. 150 ASA.

Lines South to North: Ammonia, Sulphuric Acid, Phosphoric Acid.

Ammonia is discharged into a refrigerated tank of 7,332 cu.m. equal to about 5,000 tonnes at a rate of 140 t.p.h.

The 6 in. loading line cascades into the top of the tank NOT bottom, therefore pressure problems can result.

Tank served by two Malcon compressors and usual condensers.

Sulphuric Acid tank is 3,420 cu.m.

Phosphoric Acid tanks (2) total 8,500 cu.m.

Air draft Ammonia – about 18 m. maximum.

Air draft Acids length of ship's hoses.

It is proposed to import about 10,000 tonnes Ammonia per month and 12,000 tonnes Phosphoric Acid per month, plus small quantities Sulphuric Acid.

Bulk commodities are Urea and Potassium Chloride.

Water: From metered pipe at about 10 t.p.h. Water hard but potable. Price $3.97 per tonne. Pipe on liquid platform. Ship's hoses.

Agent: Agent comes from Iskenderun about 30 miles away.

Communications: At the time of our visit to Toros Gubre there were no telephones. The nearest centre is the Botas Oil Terminal about 3 miles away.

Chandler: From Iskenderun, very good, low prices, obliging.

Local produce, vegetables, salads and fruit which is wide ranging in Spring. End of Summer, August and September not so good.

All in kg. Stores alongside, chandler provides labour.

December 1980: Vegetables $1 kg., fruit $2 kg., salad $1.50 kg., cheese (good) $3.00 kg. in tins of 25 kg.

To be paid for in cash drawn from Agent.

N.O.R.: Tendered in usual manner on anchoring, accepted at that time unless weather prevents berthing.

Customs: For Botas Terminal, reside in complex.

For Toros Terminal, Customs come from Iskenderun with Agent, which results in delay when clearing vessel outwards on completion.

Two Customs Officials reside on board – cabin required.

Money: If vessel coasting around Turkish ports money drawn at one Agency can not be deposited at another Agency in final port unless Customs clearance given from original port.

Personnel Changes: Nearest airport in Turkey is at Andana about 1 hour from Ceyhan Berths, but if waiting for ship have to stay in Iskenderun about 2 hours from airport.

Personnel travelling are advised to have Istanbul Agent's Office and home telephone numbers.

The Agent says it is easier to fly direct to Damascus about 3 hours taxi ride from Iskenderun but he cannot meet personnel and clearance at Syrian border has to be done on one's own.

Note: (December 1980): It is not expected that the plant will be in full production until mid-1981, the pier being used for material imports and production going to a wide area of S.E. Turkey and Iraq.

SHIPMASTER'S REPORT: April 1988.

Documents: Agent requires the following:

Load Line Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Safety Radio Certificate.
Classification Certificate.
Tonnage Certificate.

Restrictions: Unberthing any time.

Berthing at Berths No. 1, 2 and 3 at any time.

Berthing at Berth No. 4 during daylight hours only.

SHIPMASTER'S REPORT: June 1989.

Tugs: Vessels over 50,000 d.w.t. require 3 tugs. A ship's messenger is required for taking tugs lines.

On departure tugs will take ship's ropes.

Berthing: Vessels normally berth with the bow to seaward. Vessel moored with 4 head/stern lines, 3 breast lines and 2 springs fore and aft. The order for sending lines away depends on the pilot, who remains onboard and acts as Loading Master.

Loading: At Berths No. 1 and 2, which are for VLCC's, the minimum loading rate is 3,750 t.p.h.

Gangway: Shore gangways are provided at all four berths.

Shore Leave: Not normally possible from 1700 hrs. – 0900 hrs.

AUTHORITY: Botas Petroleum Pipeline Corporation, P.O.Box 73, 01944 Ceyhan-Adana-Turkey. *Tel:* 6135859. *Telex:* 63838 Btas Tr. *FAX:* 6131657. *Cables:* Botas-Ceyhan-Adana. *Contact:* M. Fatih Sen, District Manager. M. Cemal Pamir, Manager-Marine Operations.

AGENT: See "Iskenderun".

(B) TOROS GUBRE

LOCATION: Lat. 36° 55' 06" N., Long. 35° 58' 54" E..

PORT LIMITS: Toros Gubre is in the Botas (Ceyhan) port limits.

DOCUMENTS: Similar to Botas (Ceyhan) Terminal.

PILOTAGE: Similar to Botas (Ceyhan) Terminal, but there are no Loading Master's services.

ANCHORAGE: See "Botas (Ceyhan)" port plan.

RESTRICTIONS: Berthing possible by day and unberthing possible at any time.

MAX. SIZE: There are 2 jettys in the Toros Gubre. First is the old jetty and max. size is 30,000 d.w.t. The new jetty has a max. size of 100,000 d.w.t. and is completed. Also see "Berthing".

RADIO: See "Botas (Ceyhan)" Terminal.

VHF: Always standing by on Channel 16.

RADAR: There is no port control radar.

TUGS: Botas (Ceyhan) Terminal's tugs are used.

BERTHING: There are 3 loading berths available on the old jetty.

Berth	*Max. d.w.t.* tonnes	*Max. LOA* (m.)	*Depth Alongside* (m.)	*Max. Draft* (m.)
East Side (Cargo ships and tankers)	30,000	175	12-14	10-12
West Side (For tankers only)	30,000	214	12-14	10.50
No. 3 (Coastal/ General cargo)	3,000			5.5

Six loading berths will be available on the new jetty. See "Plan".

BALLAST: There is one ballast tank with a capacity of 5,000 cu.m., but not always in use.

MEDICAL: See "Botas (Ceyhan)" Terminal.

DENSITY: Salinity 39 p.p.m.

FRESH WATER: Available at jetty.

FUEL: Not available.

SURVEYORS: There are no classification societies at the Terminal.

GANGWAY/DECK WATCHMAN: There are no watchman services.

CUSTOMS ALLOWANCES: Same as Botas (Ceyhan) Terminal.

AIRPORT: Adana Airport is 82 km. from Toros Gubre.

TIME: GMT plus 2 hours. (Summertime is GMT plus 3 hours.)

HOLIDAYS: Similar to Botas (Ceyhan) Terminal.

POLICE/AMBULANCE/FIRE: All information given after berthing.

TELEPHONES: It is possible to make calls via Iskenderun Radio Station.

SHORE LEAVE: See "Botas (Ceyhan)" Terminal.

IDENTIFICATION CARDS: Seaman's Book is sufficient.

REGULATIONS: All information given after berthing.

DEVELOPMENTS: See "Berthing".

GENERAL: See "Section A" – Shipmaster's Report – dated December 1980.

OPERATOR: Toros Gubre ve Kimya Endustrisi A.S., P.K. 83 01921, Ceyhan-Adana, Turkey. *Tel:* 7321-5001 (4 lines). *Telex:* 63840 Tors Tr.

AGENT: See "Iskenderun".

(C) DELTA TERMINAL: (Dortyol/Yesil).

LOCATION: Lat. 36° 51.05' N., Long. 36° 09.18' E.

PORT LIMITS: The Delta Terminal is operated under the authority of Botas Harbour Master's Office, where the mooring/unmooring operations are under the monopoly of Botas (Ceyhan) Terminal.

DOCUMENTS:

7 copies Crew List.
2 copies Stores List.
2 copies Crew Declaration.
1 copy Free Pratique.
Last Port Clearance.
Load Line, Safety Construction, Safety Radio, Safety Equipment and Class Certificates.

Agent has to take the last five certificates to the Harbour Master.

Clearance: For clearance on arrival, the vessel has to call at Iskenderun first. However, depending on the weather conditions and availability of clearance team, the Agent may arrange berthing at Delta Terminal and then arrange clearance. This is why Masters are advised to contact the agent 3 – 4 hours prior to arrival in order to get the final instructions for mooring.

Free Pratique is not granted by radio as it might be in some countries, but after boarding of the Sanitary Officer.

PILOTAGE: Pilotage is compulsory for mooring and unmooring. Pilot will be taken from Botas Terminal. It is requested that the pilot ladder be of an approved pattern and securely rigged.

ANCHORAGE: In the event of berth not being available on arrival, and after the clearance, the vessel is to anchor in the anchorage zone of Botas Terminal (1 mile off Botas Terminal).

RESTRICTIONS: Mooring is carried out during daylight only. Unmooring is carried out around the clock.

Terminal does not accept any vessel not consigned for agency to

Ets. A. Boutros and Fils,
Ataturk Blvd., Unsal Bldg., 1st Floor,
31200 Iskenderun.
Telex: 68123 sail tr/68131 sail tr/68214 imoc tr/68202 eeb tr/ 68203 bson tr.
Telephone: (90) (881) 15170.
Telefax: (90) (881) 12036.
Cables: Boutros – Iskenderun.

MAX. SIZE: The Terminal accepts vessels up to 40,000 d.w.t. or 220 m. LOA. For vessels over these sizes, special acceptance can be granted depending on the cargo, season, etc.

Depth is 12.6 m. at low tide.

RADIO: It is essential that tankers bound for Delta Terminal communicate with the agent at least 72 hours, 48 hours and 24 hours before arrival and state:

ETA.
Quantity of cargo required.
Max. loading rate.
Number and diameter of manifolds.
S.W.L. of derricks.
Quantity of ballast on board and time required for deballasting.
Whether the vessel is gas free or not.
Max. draft after loading.

VHF: Delta Terminal and the agent monitor Channel 16. Masters should contact the agent 3 – 4 hours prior to arrival in order to get final instructions for mooring. Once the vessel is moored, operations channel is agreed between the vessel and terminal.

RADAR: There is a Gulf Control Radar at the entrance of the Gulf of Iskenderun, however it is not always on watch. From time to time Control may call a vessel entering or leaving the Gulf, on Channel 16, to ask some questions. The approach to or leaving the Gulf can be made without difficulty as the coast line provides very good fixes.

TUGS: Tugs are supplied by Botas Terminal at the discretion of th Master and Pilot. Generally one tug is used for mooring and unmooring Botas Terminal has 3 tugs of 2,600 h.p. and 1 tug of 1,200 h.p.

BERTHING: There are 4 berths. Each berth consists of 3 buoys (on portside ahead and 2 aft):

Outer Berth: For clean products only.

Inner Berth: For dirty and clean products. (See "Operator's Report dated April 1988).

Bunker Berth: For vessels up to 5,000 d.w.t., for dirty products and LPG.

LOADING:

Clean products: 2×8 in. hoses, 1,200 t.p.h.
Dirty products: 2×10 in. hoses, 2,000 t.p.h.

All ship's valves should be closed or blanked, except those required for loading and water circulation purposes.

Ship's crew with an officer in charge will assist in all operations, as advised by the terminal representative. This includes lifting, connecting disconnecting, lowering of hoses and tending moorings.

Max. loading rate is requested by Master.

Cranes: No cranes available, vessels are required to use their own equipment.

Lighting: Manifolds should be lit to enable night loading operations to be carried out with safety. Sea area around the ship is to be illuminated.

Notice of Readiness: Notice of Readiness should be tendered at the time of arrival, it will be received by the terminal representative after mooring.

Deck Watch: A responsible ship's officer shall be on watch at the poin near the ship's tanks which are receiving cargo during the process o loading, with a Loading Master from the terminal.

Capable members of the ship's crew shall be stationed by the ship' tank valves which are receiving oil, during process of loading.

BALLAST: There are no dirty ballast facilities. The vessel must arrive with clean ballast.

MEDICAL: Master to inform agent by cable or telex if urgent medica assistance is required upon arrival, indicating if possible, seriousness o case in order that adequate steps may be taken.

Hospital and doctor are available at Dortyol 10 km., Iskenderu 40 km. and Adana 100 km. distance from the terminal.

DENSITY: Salinity about 39 p.p.m.

FRESH WATER: Fresh water is not available. Tankers to be supplie with fresh water are to call at Iskenderun before or after loading. Fres water is supplied by the state-owned port company at Iskenderun, b means of a 200 ton capacity barge. The price is U.S.$4.00 per 1,000 kg including 'petties'. Fresh water is supplied on a round the clock basis There is an additional charge of U.S.$50.00/100.00 for fresh wate supplied between midnight and daybreak. A minimum charge is mad for 20 tons.

Arrangements to be made through Agent.

CONSULS: Consuls for Norway, Spain, Germany, U.K., Franc Netherlands, Greece and Italy are located in Iskenderun.

REPAIRS: Most radar/radio and engine repairs can be carried out.

SURVEYORS:

SGS. Tel: (90) (881) 11072.
Marine Survey Bureau. Tel: (90) (881) 18729 – 19751.
Atlantic. Tel: (90) (881) 21479.

GANGWAY/DECK WATCHMEN: There is no watchmen service.

CUSTOMS ALLOWANCES: 40 cigarettes for each crew member goi ashore. On board the vessel each crew member may hold 200 cigarett and 1 open bottle wine/spirits out of bond.

AIRPORT: Adana Airport, served only by domestic lines, with routes Istanbul and Ankara. Airport is situated 100 km. from Delta Termina Twice daily services to Istanbul and Ankara for international connection

TIME: LMT is GMT plus 2 hours in Winter time and GMT plus 3 hou in Summer time.

HOLIDAYS: New Year's Day, 31st December (noon) and 1st Januar Commemoration of Ataturk & Children's Holiday, 23rd April; Youth a Sports Day, 19th May; Seker Bayrami (3.5 days), changeable – aft Ramadan feast; Kurban Bayrami (4.5 days), changeable – Festival Sacrifice; Victory Day, 30th August; Independence Day, 28th Octob (noon) and 29th October.

POLICE/AMBULANCE: Can be contacted through the local ag (Boutros).

TELEPHONES: Cannot be connected on board.

SHORE LEAVE: Crew permitted to go ashore with shore passes wh can be arranged through the local agent.

IDENTIFICATION CARDS: Seaman's Book is sufficient for shore lea Embarking or disembarking crew members must hold a valid Passp (and depending on citizenship, a visa).

SAFETY: *Tanker Safety:* Masters are at all times responsible for application of all safety precautions. One boat of the terminal is a times alongside the vessel for safety.

Safety Check List: The tanker Safety Check List must be completed a inspection of each item, prior to commencement of loading. The b operator is authorised to stop all loading operations should he cons safety and property to be endangered.

Signals: The following signals must be shown when vessel is in po

By day: Flag "B" of the International Code of Signals. At night: 1 red light visible all around.

Fire Fighting Equipment: Vessels must be adequately manned fo fighting and vacating the berth in case of emergency.

The following fire-fighting precautions must be taken.

(a) Fire hoses must be run out fore and aft or monitors be read
(b) Fire mains must be under pressure.
(c) 1 dry chemical extinguisher must be stationed on either side o ship's manifold.

Fire Fighting Equipment at Buoys: One boat available alongsid vessel for fire-fighting when vessel is loading.

Action in Case of Emergency: In the event of a fire, oil spillage or other emergency on the vessel.

The emergency and fire signal is: 1 or more blasts of the ship's whistle, each blast of not less than 10 seconds duration, supplemented by a continuous sounding of the general alarm system.

GENERAL: The main engines of all vessels while tied up to the buoys shall be ready for immediate use. Deck power (steam) is to be maintained on deck at all times and water pressure shall be maintained on the fire fighting system.

The Master shall at all times retain on board sufficient crew to work the vessel.

No craft, other than one having on board the pilot or Port Health Officer, may approach any vessel entering the port and no other person until Free Pratique has been granted.

Whistle or siren to be available at all times.

Stores/Provisions: Vessels may store at the anchorage or while they are at berth with permission of the terminal and the Customs authorities.

OPERATOR'S REPORT: April 1988.

Location: Lat. 36° 50.65' N., Long. 36° 08.71' E.

Documents: Vessels are to call at Iskenderun for Customs Clearance, after which they will sail to the Terminal.

Pilotage: Compulsory. Pilot boards off Botas Oil Terminal.

Restrictions: Normally mooring is not undertaken after sunset. However, without any commitment from the owners of the Terminal, mooring after sunset is left entirely at the discretion of the pilot who might decide to moor the tanker after sunset, weather permitting.

Unmooring is carried out day and night.

Max. Size: Maximum draft 12.6 m.

Radio: Masters to advise agent of vessel's ETA 72 hours, 48 hours and 24 hours prior to arrival.

Cable to include the following information:
ETA Iskenderun.
Quantity of cargo required.
Max. loading rate.
Number and diameter of manifolds.
Quantity of ballast on board and time required for deballasting.
Whether vessel is gas-free or not.

Berthing: Vessel will moor at sea buoys. One buoy is located on the port bow and two buoys are located aft.

Loading: 2×10 in. hoses are available for dirty products and 2×8 in. hoses are available for clean products. Hose connection is amidships.

Loading is carried out at an average rate of 1,700 t.p.h. – 1,800 t.p.h. for dirty products and 1,200 t.p.h. – 1,500 t.p.h. for clean products.

Ballast: There are no facilities for receiving ballast. Vessels must arrive with clean ballast.

Fines for pollution are approximately U.S.$50,000.

Fresh Water: Not available locally.

Tankers requiring fresh water should call at Iskenderun before or after loading. Fresh water is supplied by the state owned port company at Iskenderun by a 200 ton capacity barge. Cost of fresh water is U.S.$4.0 per 1,000 kg. A charge of U.S.$50 – U.S.$100 is to be paid for supply between midnight and daybreak. Minimum supply 20 tons.

Fuel: Available.

General: Stores: A ship chandler is available for supply stores.

Agent: ETS. A. Boutros and Fils, Ataturk Bulvari, Unsal Han Kat 1, 31200 Iskenderun, Turkey; P.O.Box 11, 32101 Iskenderun. Telephone: (90) (881) 15170/74 (5 lines), (90) (881) 13684/85. Telex: 68123 Sail Tr/ 68131 Sail Tr. Fax: (90) (881) 12036. Cables: Boutros – Iskenderun. After Hours Contacts: Mr. Ferit Uyar, telephone (90) (881) 12893.Mr. Taner Carpar, telephone (90) (881) 13846.

Office hours during which Master can contact Agent on VHF Channel 16: 0830 – 1230 and 1430 – 1830 every day (including Saturday/Sunday/holidays during which one person on duty).

Telephone contact possible through Iskenderun Radio, VHF Channel 16.

(D) AYGAZ TERMINAL

PORT LIMITS: Aygaz Terminal is operated under the Authority of Botas Harbour Master's Office, where the mooring/unmooring operations are under the monopoly of Botas Terminal.
LOCATION: Lat. 36° 45' 05" N., Long. 36° 10' 10" E.
DOCUMENTS:
7 copies Crew List.
2 copies Stores List.
2 copies Crew Declaration.
1 copy Free Pratique.
Last Port Clearance.
Load Line, Safety Construction, Safety Radio, Safety Equipment and Class Certificates.
PILOTAGE: See "Delta Terminal".
ANCHORAGE: See "Delta Terminal".
RESTRICTIONS: See "Delta Terminal".
MAX. SIZE: 80,000 d.w.t. Depth at LW 16.0 m.
RADIO: See "Delta Terminal".
VHF: See "Delta Terminal".
RADAR: See "Delta Terminal".
TUGS: Tugs are supplied by Botas Terminal at the discretion of the Master and Pilot. Tugs are used for berthing, but are not necessary for sailing.
BERTHING: There are 2 berths. Each berth consists of 2 buoys aft. Ships use both anchors from their bow.
Outer Berth: Max. size 80,000 d.w.t. for LPG.
Inner Berth: Max. size 8,000 d.w.t. for LPG.
MEDICAL: See "Delta Terminal".
DENSITY: 1027.
FRESH WATER: Not available. See "Delta Terminal".

(E) DORTYOL BOTAS TERMINAL

LOCATION: Lat. 36° 51' 42" N., Long. 36° 08' 28" E.
PORT LIMITS: In the Botas (Ceyhan) Port limits.
DOCUMENTS: Same as Botas Terminal.
PILOTAGE: Similar to Botas Terminal.
ANCHORAGE: See "Botas (Ceyhan)" Port plan.
RESTRICTIONS: None.
MAX. SIZE: Max. size 60,000 d.w.t. tons tanker.
RADIO: See "Botas (Ceyhan) Terminal".
VHF: Terminal stands by on Channels 16 and 22.
RADAR: There is no radar control.
TUGS: Botas (Ceyhan) Terminal's tugs are used.
BERTHING: There is one berth for tankers. Vessels moor with anchors forward and lines aft.
BALLAST: Capacity 15,000 tonnes maximum.
FRESH WATER: Available at jetty.
FUEL: Not available. For more details see "Botas (Ceyhan) Terminal".

(F) BAYRAKTAR TERMINAL

The Terminal is under construction and is located at Lat. 36° 54' 24" N., Long. 35° 58' 18" E., in the Botas (Ceyhan) Port limits.

CANAKKALE: 40.08 N. 26.24 E.

DOCUMENTS: Vessels in transit through the Dardanelles must stop at Canakkale and produce following documents to Boarding Officer.
Certificate of Registry.
Derat Certificate.
Crew List.
Name of Agent in Istanbul.
Vessels proceeding to a Turkish port will require in addition:
4 Crew Lists.
2 Personal Effects Lists.
2 Currency Lists.
2 Stores Lists.
PILOTAGE: Not compulsory for vessels proceeding to Istanbul. Compulsory for vessels over 1,500 g.r.t. proceeding to Canakkale. Vessels requiring a Pilot use International Code signals, or signal "G" by light or whistle. No advance notice required. Telegraphic address of Pilot Station, Kilavuzluk Canakkale, via radio station TAT. Pilot boards off Khepez lighthouse, where vessel should slow down but no need to anchor. In bad weather pilot boat will anchor in Gulf of Kilya.
Also see "Shipmaster's Report".
ANCHORAGES: Vessels may anchor in depths of 12 to 16 fathoms.
MAX. SIZE: Vessels of any size may navigate Canakkale Strait.
HEALTH: All vessels bound for a Turkish port must stop for Sanitary Clearance at Canakkale. Any suspected disease on board must be declared. Sick crew members may be landed for hospitalisation.
Also see "Shipmaster's Report".
RADIO: Radio station TAT situated at local Post Office.
TUGS: One tug available, belonging to Pilot Station. Ship's tow lines always used.
BERTHING: Agents require at least 24 hours' notice to arrange berthing at Canakkale Pier. Vessel may be required to shift anchorage to give place to Turkish passenger vessels which have priority.
STEVEDORES: Arranged by Agent on basis of Master's ETA.
MEDICAL: 12 hours' notice required to arrange medical assistance. Hospital facilities available.
DENSITY: Salt water. No tide.
FRESH WATER: Only available from the pier, rate approx. 10 t.p.h.
FUEL: Marine grades not available.
CONSULS: Italy, tel. 1008.
REPAIRS: Minor repairs can be effected.
GANGWAY/DECK WATCHMEN: Customs guard compulsory for vessels at the pier.
OPENING/CLOSING HATCHES: May be operated by crew or stevedores according to Charter Party.
CUSTOMS ALLOWANCES: Crew allowed to retain only quantities for personal consumption.
REPATRIATION: Can be arranged if visa requirements are satisfactory.
AIRPORT: Situated 2 km. from Canakkale, internal services only.
TIME: GMT plus 3 hours.
HOLIDAYS: Cargo work can be arranged on all holidays by agreement.
POLICE/FIRE/AMBULANCE: Police Tel. 1181; Fire 00; Ambulance 1098.
SHORE LEAVE: Allowed at all times.
IDENTIFICATION CARDS: Required for crew members going ashore.
GARBAGE DISPOSAL: Not available.
WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None. Local facilities include international telephone, football, dances, shops and postage facilities.
CURRENCY: Turkish Lira (TL).
DEVELOPMENTS: New installations and berths under construction.

SHIPMASTER'S REPORT: *Dardanelles and Bosphorus:* A Pilot Station has been established at Mehmetcik Point (Cape Hellas); if the weather is too bad to embark the Pilot here, vessels should proceed to Canakkale. If a Pilot is required for both Dardanelles and Bosphorus, give 24 hours' notice through Istanbul Agent. Same Pilot remains on board for full transit, Sea of Marmara included, and this applies for both North and Southbound traffic. Pilots at Dardanelles and Bosphorus work VHF Channel 16.
Sanitary Control: White launch. Officers do not board but require Chief or 2nd Officer to go down into boat. Canakkale required Ship's Register, Derat, Crew List and Quarantine Declaration of Health. It is also required to fill in a form giving details of ship, cargo, last port, number of crew and passengers, etc. also name of ship's Agent in Turkey.

AUTHORITY: Canakkale Liman Baskanligi. *Tel:* 196-11123/21171. *Telex:* 58209.

AGENT: See "Istanbul".

DERINCE: 40.45 N. 29.50 E. (See Plan)

PORT LIMITS: A vessel that has arrived in Izmit Anchorage is considered an "arrived ship".
DOCUMENTS:
Quarantine:
Declaration of Health.
Valid Derat Certificate.
International Vaccination Certificates.
Free Pratique Received from Canakkale or Buyukdere.
Customs:
Crew Declaration.
Ship's Stores List.
Cargo Manifest.
Customs Clearance from last port.
Immigration:
Crew List.
Passenger List.
Shore leave passes arranged by Agent. Passenger embarkation/disembarkation not possible.
PILOTAGE: Compulsory. Pilot service carried out in harbour by stevedore administration, which is under the monopoly of Turkish State Railways. One pilot boat of 2×385 h.p. is available.
ANCHORAGES: Forbidden near the port. Waiting anchorage is at Izmit, 4 miles East of Derince. It is compulsory for vessels with explosives to anchor in Yarimca Anchorage.
MAX. SIZE: Max. draft 12.0 m.
VHF: Pilot on Channel 16.
TUGS: Compulsory for vessels over 500 g.r.t.

500 g.r.t. – 5,000 g.r.t.	One tug.
5,000 g.r.t. – 25,000 g.r.t.	Two tugs.
25,000 g.r.t. – 50,000 g.r.t.	Three tugs.
Over 50,000 g.r.t.	Four tugs.

4 tugs (up to 2,500 h.p.) are available. Mooring boat arranged by Pilot.
BERTHING:

Berth No.	*Length* (m.)	*Depth at LW* (m.)	*Remarks*
2	82	7.0	
3 & 4 *	400	15.0	All
6	220	12.0	General Cargo
7	160	10.0	Berths
8	120	6.0	

* The construction of the berth, which will enable the berthing of Panamax type vessels, is being continued. The construction is nearing completion, and 90% of the construction has already been completed.
Storage: The quay is rail connected, and provided with 10,500 sq.m. of closed storage, and 122,120 sq.m. of open storage. Also, 90% of the new silo construction of 95,000 tons capacity has been completed.
Equipment: For handling of grain, one 1,200 ton/hour pneumatic loader for loading, and 2×600 ton/hour capacity pneumatic unloaders for unloading, together with 2×1,200 ton/hour capacity conveyors will be in place, and they will have connection with the quay.
Also available are 32 forklifts, 2 trailers of 40 tons capacity, 2 tugmasters, 1 loader and 5 towing tractors.
Ro/Ro Facilities: Available (Berth No. 6).
Ore and Bulk Cargo Facilities: Bulk cargoes loaded and discharged by grabs.
Principal Imports and Exports: Imports: Aluminium, logs, rubber, scrap paper, steel and iron products, timber and woodpulp.
Exports: Magnesite, steel and iron products and general cargo.
CRANES: 12 shore cranes of 3 tons to 35 tons capacity, one special mobile container crane of 40 tons capacity, 12 mobile cranes of 5 tons to 25 tons capacity and 3 crawler mobile cranes of 6 tons to 30 tons capacity.
STEVEDORES: *Working Hours:* Service is provided to vessels 24 hours a day. First shift 0800 hrs. – 1630 hrs., second shift 1630 hrs. – 0030 hrs. and third shift 0030 hrs. – 0800 hrs.
Working Rates: General cargo discharging rate 100 to 125 tons/gang/shift and iron products, 200 to 250 tons/gang/shift.
MEDICAL: Facilities available.
FRESH WATER: Available at all berths.
FUEL: Available from private suppliers by road tanker, arranged throug ship's Agent.
REPAIRS: Most deck and engine repairs can be carried out.
SURVEYORS: Available from Istanbul through Agent.
OPENING/CLOSING HATCHES: Stevedores or ship's crew, whicheve is to the vessel's advantage.
CERTIFICATES:
Safety Construction.
Safety Equipment.
Safety Radio.
Load Line.
Tonnage.
CUSTOMS ALLOWANCES: 200 cigarettes and one bottle of spirits pe week per crew member.
REPATRIATION: Crew changes and repatriation can be carried out.
AIRPORT: 130 km. to Istanbul International Airport.
TIME: GMT plus 3 hours.
POLICE/AMBULANCE/FIRE: Emergency services available in the por
SERVICES: Arranged by Agent, from Istanbul.
SHORE LEAVE: No restrictions. Also see "Documents".
HOLIDAYS: New Year's Day (commencing 1200 hrs. December 31st National Sovereignty Day (April 23rd); Sports Day (May 19th); Victor Day (August 30th); October 29th; Sheker Bayram (3 days, movable Kurban Bayram (4 days, movable). However, the port is not working the first days of Sheker Bayram and Kurban Bayram, during all other days work carried out.
GENERAL: *Security:* Port Security personnel ensure the security of the port 24 hours a day.
Weighing Facilities: There are 2 weighbridges up to 100 tons capacit (one for wagons and the other for trucks).
Reception Facilities: An oily water separator system is available at th capacity of 4,500 cu.m./year.
Prevailing Winds: South-West and South.
DEVELOPMENTS: There are plans for container facilities (980 m. 15.0 m. depth), a new Ro/Ro ramp and a slipway.
AUTHORITY: General Directorate of Turkish State Railways (TCDD Derince, Turkey. *Tel:* (90-262) 2231540. *FAX:* (90-262) 223427 *Contact:* Gurol Toykan, Port Manager. Haydar Dogan, Harbour Maste (Tel: 183754).

BERTHING: Length of pier is 39 m. and depth 8.5 m. Capacity of installation is approximately 200 t.p.h. – 250 t.p.h.
FRESH WATER: Not available.
FUEL: Not available.
CUSTOMS: The port is under control of Derince and Izmit Customs Authorities.
AUTHORITY: Solvent A.S., Gebze.

EDINCIK: 40.21 N. 27.51 E.

LOCATION: In the South of Erdek and on the West coast of Kapidag Peninsula. See B.A. Chart No. 884.
PILOTAGE: Pilotage compulsory. Pilot comes from Bandirma.
MAX. SIZE: 5,000 d.w.t.
BERTHING: This is a colemanite loading berth of Etibank, where loading is effected by conveyor.

Five dolphins exist in front of the conveyor house and in enough deep water for mooring and shifting of vessels. As there is little movement of the conveyor, vessels have to shift in order to load bulk cargo in all hatches.
DENSITY: 1025.
FRESH WATER: Available.
TIME: GMT plus 3 hours.
GENERAL: Formalities with the Harbour Master are carried out in Erdek but all others in Bandirma. All services to be supplied from Bandirma.
AUTHORITY: Erdek Liman Baskanligi, Erdek, Turkey. *Tel:* 90-1989-1044. *Telex:* 58-214. *Contact:* Nezih Onal.

EREGLI (Karadeniz Eregli), including Usunkum: 41.18 N. 31.27 E. **(See Plan)**

PORT LIMITS: Line joining Lat. 41° 17' 23" N., Long. 31° 23' 43" E. and Lat. 41° 14' 46" N., Long. 31° 23' 43" E.
DOCUMENTS:
5 copies Crew List.
5 copies Passenger List.
3 copies Provisions List.
3 copies Bonded Stores List.
5 copies Crew Effects List.
3 copies Cargo Manifest.
3 copies Bills of Lading.
1 copy Health Declaration.
PILOTAGE: Pilotage is compulsory and available day and night. Vessels bound for the old port of Eregli should send their ETA to their local Agent. Vessels bound for Usunkum should send their ETA to the factory in accordance with the Charter Party terms.

Pilot will board vessels at a reasonable distance off the North Breakwater (red light). The pilot boat has a steel hull and is painted grey. Pilot may be contacted on VHF Channel 16.
ANCHORAGE: Anchorage for the deep draft vessels is about 0.5 miles – 1 mile West of the North Breakwater (red light). However, smaller vessels may anchor 0.5 miles West of the South Breakwater (green light). The bottom is muddy and sandy.
RESTRICTIONS: Vessels over 500 g.r.t. have to take a pilot and vessels over 1,000 g.r.t. have to use tugs. Number of tugs required increases in accordance with the vessel's gross registered tonnage.

Vessels of large deadweight are not permitted to berth at night.
MAX. SIZE: *Eregli:* Port maximum draft is 28 ft.
Usunkum: Oil and Coal Discharge Berth: Maximum LOA 240 m., maximum beam 36 m., maximum draft 36 ft.

Cargo Berth: Maximum LOA 240 m., maximum beam 32 m., maximum draft 35 ft.
HEALTH: Pratique is granted after the Quarantine Officer has visited the vessel on arrival.
RADIO: Eregli Radio (TAD 5). The Marine Operator is on VHF Channel 16 throughout 24 hours.
VHF: The calling channel for all stations is Channel 16.
RADAR: Not available.
TUGS: 2×2,650 h.p. and 2×800 h.p. Tugs normally join the vessel outside the harbour and tug's lines are always used.
BERTHING: *Eregli Old Harbour:* Length of quay 400 m. Depth alongside 28 ft. There is also a small wharf of 80 m. in length and 14 ft. depth.
Usunkum: Ore and Coaling Unloading Dock: Length of berth 408 m. Depth alongside 36 ft.

Cargo Dock: Length of wharf 280 m. Depth alongside 35 ft.
CRANES: *Eregli Old Harbour:* Heavy lift derrick with a capacity of 147 tonnes and a fixed coal loading conveyor with a rate of 220 tonnes per hour.
Usunkum Cargo Dock: 1×25 tonnes and 3×15 tonnes capacity shore cranes.
BULK CARGO FACILITIES: In Usunkum Harbour there are 3 grabs (1×10 tonnes, 2×15 tonnes) for unloading ore and coal. Maximum air draft 14 m.
STEVEDORES: *Eregli Old Harbour:* Working hours are from 0800 hrs. – 1600 hrs. for coal loading and from 0800 hrs. – 2200 hrs. for loading and discharging of general cargo.
Usunkum: Work is carried out continuously throughout 24 hours.
MEDICAL: All types of medical assistance are available.
TANKERS: No facilities available.
DENSITY: Average density 1012 – 1014.
FRESH WATER: Fresh water is available at Usunkum at a rate of approximately 15 t.p.h.
FUEL: Diesel oil can be supplied by tank trucks.
CONSULS: None locally.
REPAIRS: Minor repairs can be carried out.
DRY DOCKS: None available.
SURVEYORS: Available locally.
GANGWAY/DECK WATCHMEN: Usually ship's crew, ship's gangway used.
OPENING/CLOSING HATCHES: Normally carried out by ship's crew.
CERTIFICATES: Cargo Gear Certificates required.
CUSTOMS ALLOWANCES: Each crew member is permitted 200 cigarettes and 1 bottle of spirit.
REPATRIATION: Crew changes and repatriation are possible.
AIRPORT: The nearest airports are at Istanbul and Ankara, about 300 km. by road.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
HOLIDAYS: Work is carried out on all holidays at Usunkum Harbour.
TELEPHONES: There are no facilities for placing telephones on board vessels.
SERVICES: None available locally.
BANKS: There are no foreign banks in the city.
SHORE LEAVE: No restrictions.
DEVELOPMENTS: The following are planned:
1×150,000 d.w.t. bulk berth.
Bulk storage area.
AUTHORITY: Karadeniz Eregli Liman Baskanligi. *Tel:* (0372) 3161007. *Telex:* 48541 KRDL. *FAX:* (0372) 3231169. *Contact:* Turgut Ege, Harbour Master.

FERCOM TERMINAL: 40.46 N. 29.33 E.

LOCATION: The terminal is located in the Gulf of Izmit in position Lat. 40° 46' 24"N., Long. 29° 33' 03" E.

The terminal is called Fercom or Upet and is for the import of gasoline.
PILOTAGE: Compulsory for berthing and through the Dardanelles.
MAX. SIZE:
Outer Berth: Max. LOA 210 m. Max. draft 16.0 m.
Inner Berth: Max. LOA 100 m. Max. draft 10.0 m.
BERTHING: The jetty is parallel to the shore and has 3 dolphins.

FINIKE: 36.16 N. 30.13 E.

RADIO: Finike Radio. Call sign TAC3.
BERTHING: Jetty 80 m. long, depths alongside 4.5 m. – 5.5 m. Vessels of more than 3,000 g.r.t. cannot berth alongside, but anchor outside the port.
CARGO HANDLING: Vessels at anchor are worked by 4 lighters towed by a motor boat. Only 200 tonnes of cargo worked per day by lighters.

At the jetty, 300 – 500 tonnes of cargo are handled per day.
AIRPORT: At Antalya (280 km.).
GENERAL: Port is dangerous in Winter.
AUTHORITY: Halil Tarhan, Port Master.

GEMLIK: 40.25 N. 29.07 E. **(See Plan)**

LOCATION: The port (Gemport) is located on the Southern shore of the Gulf of Gemlik, between the "Tugsas" and "BP Petroleum" establishments.

The new and main general cargo port in the gulf is connected to the hinterland by high standard roads.
PORT LIMITS: East of Long. 29° 05.8', at entrance of the bay (See "Plan").
DOCUMENTS: Basic Customs documents required. Master of the vessel should sign an Oil Pollution Prevention Declaration which is issued by local Government Office.

PILOTAGE: Compulsory. Provided by "Turkish Maritime Organisation, Gemlik Pilot Association".

24 hours and 4 hours notice should be given to the Pilot through ship's Agent and VHF Channels 16 and 14.

ANCHORAGE: If required, anchorage can be advised by Pilot.

MAX. SIZE: Vessels up to 180 m. in length with draft of 12.0 m. have used the facilities.

RESTRICTIONS: Variable strong winds and currents can effect berthing operation for a short period.

HEALTH: All vessels are inspected at the Dardanelles or Bosphorus and should have the Sanitary Clearance.

RADIO: Port has no radio equipment. ETA messages are to be routed via Istanbul Radio (call sign "TAH"). When at anchorage or berthed on pier, telephone calls are possible through Bandirma Coastal Radio Station by VHF Channel 16.

TUGS: Available to assist berthing.

2 tugs of 800 h.p. and 1,500 h.p. and a pilot boat are available throughout 24 hours. Tel: (224) 5136164.

BERTHING:

Berth	*Length* (m.)	*Depth* (m.)	*Remarks*
No. 1	185.5	12.0	General cargo/Containers.
No. 2	140	12.0 – 9.0	General cargo/Containers.
No. 3	110	7.0	General cargo/Ro-Ro.

CRANES: One mobile harbour crane of 40 tons capacity for container handling.

One mobile harbour crane of 10 tons capacity for general cargo handling.

Mobile cranes up to 300 tons capacity available for hire.

BULK CARGO FACILITIES: 3 mechanical rehandling grabs of 4 cu.m. capacity each and one motor clamshell grap of 5 cu.m. are available. Handling rate up to 250 t.p.h.

SPECIALISED CARGO HANDLING FACILITIES: The port specialises in container and banana handling.

1×40 ton capacity mobile harbour crane, 1×40 ton superstacker toplifter for 4 high full container stacking. 1×30 ton capacity forklift with 2 high stacking capacity.

2 banana conveyors with 6,000 boxes/hr. discharging capacity.

64×380 V. reefer plugs for reefer containers.

1 ramp for Ro-Ro cargoes (width 20 m., height 1.40 m.).

BRIDGES: None.

STEVEDORES: The recognised working hours of port are 24 hours.

1st shift: 0800 hrs. – 1600 hrs.
2nd shift: 1600 hrs. – 2400 hrs.
3rd shift: 0000 hrs. – 0800 hrs.

MEDICAL: One state hospital, private doctor and dental facilities are available for medical treatment and minor surgical operations in Gemlik.

TANKERS: No tanker facilities.

DENSITY: 1018 – 1019.

FRESH WATER: Fresh water delivered to vessel at wharves by pipeline. Hoses should be supplied by vessel.

FUEL: Supplied by private firms with trucks by prior arrangement through vessel's Agent.

FIRE PRECAUTIONS: Smoking is strictly prohibited in warehouse or on apron of wharves and on vessels during handling of dangerous, hazardous, or inflammable cargoes and around port's refining establishment.

DRY DOCKS/REPAIRS: No major facilities at the port. Minor ship repairs and container repairs can be effected.

SURVEYORS: Marine surveyors representing Lloyd's, A.B.S. N.V., Turkish Lloyd and Avrasia can be arranged.

DECK WATCHMEN: No requirement for watchmen.

HATCHES: Opening/closing is normally carried out by crew.

CUSTOMS ALLOWANCES: Usual allowances.

REPATRIATION: Can be arranged by vessel's Agent with necessary documents.

AIRPORT: Bursa Airport is 36 km. from Gemport. International flights could be organised via Istanbul or Ankara.

TIME: In Summer, GMT plus 3 hours. In Winter, GMT plus 2 hours.

POLICE/AMBULANCE/FIRE: Police Tel: 055. Fire Tel: 110. Ambulance Tel: 112.

TELEPHONES: Port can arrange placing of telephones on board per tariff charges. International telephone boxes are available in Gemport.

SERVICES: Arranged by ship's Agent.

BANKS: Local Turkish Banks in Gemlik.

Turkiye Is Bank. Tel: 224-5132455.
T.C.Ziraat Bank. Tel: 224-5130090, 5130079.
Turkiye Vakif Bank. Tel: 224-5131242.

STORING: Vessels load and discharge from/to trucks. Trucks can proceed alongside the berth (there is no obstruction on pier). Forklifts can be used on jetty only for handling cargoes.

SHIP SUPPLY SERVICE: Arranged through Agent.

SHORE LEAVE: Possible after completing Customs and Immigration formalities.

IDENTIFICATION CARDS: Seamen's Book is sufficient.

GARBAGE DISPOSAL: Garbage bags should be provided on board by ship's Agent. Full and secured bags are collected when required by the Port Organisation.

WASTE OIL DISPOSAL: Gemport has a 4,500 cu.m./year capacity for oily water, and household waste separator. Oily waters are collectd by Port Organisation per tariff charges.

CURRENCY: Turkish Lira (TL).

REGULATIONS: No unusual regulations.

DELAYS: No delays for berthing.

DEVELOPMENTS: The port administration is planning to increase cargo handling facilities by purchasing new shore cranes and a toplifter. A sophisticated computer programme will be operational for controlling all sequences of container movements and ports operation.

SHIPMASTER'S REPORT: July 1980.

Vessel: L.P.G. Carrier – 32,000 g.r.t. Vessel discharged ammonia.

Formalities: Formalities were dealt with quickly. Bonded stores a sealed and remain sealed until clearing outward from last Turkish po Application may be made to open under Customs control and thes applications were granted.

Travelling manifests of cargo and ship's stores are made up an accompany the vessel from port to port.

Papers required:

2 Stores Lists.
6 Cargo Manifests.
6 Crew Lists.
2 Vaccination Lists.
1 List of Monies in ship's safe.
2 Lists of Ports of Call.
2 Health Declarations
(including clearance from Canakkale).
2 Crew Declarations.
3 Crew Currency Declarations.
2 Ships Particulars.

Approaches: Chart BA. 1005.

The inset on Chart BA. 844 does not quite cover the area in whic the berth is situated. (Position of Ammonia section of qua Lat. 40° 25' N., Long. 29° 06.5' E.).

The approach itself presents no difficulty since good fixes are availab both by radar and visually. Similarly, although care is needed, a approach may be made in poor visibility with complete confidence.

Fishing vessels, inter-island ferries and local trading craft must b expected through the island passages and fishing vessels will be ma within Gemlik Liman. Some of these craft are very small although se conditions are invariably smooth and they should show up well on th radar. Not all carry lights.

An anchorage position as near as 4 cables from the berth may b used although this should be chosen to Eastwards of the berth to kee the departure path clear for any vessels leaving.

The Pilot obtained for the Dardanelles passage, who will leave her however short a stay, will be able to give advice on choosing a suitab anchorage, should this be necessary.

Pilotage: The Pilot may be summoned by whistle and will board from small, open fishing craft. Gangway or pilot ladder must be lowered t the water's edge.

No night time berthing. Unberthing may be carried out at night at th Master's discretion and presents no difficulty. The starboard anchor ma be used for berthing (not on this call) and is used to heave the vess off when leaving.

Unberthing is a long manoeuvre; 2 forward back-springs are lead a far astern as possible, the vessel hove astern about 30 m. (to ensu that the bow does not fall inside the line of the quay and foul the 'bridg to the forward mooring dolphin), everything let go aft, hard to port a dead slow ahead on the engine until the vessel is at an angle of 45 The vessel is then backed out, after which the Pilot leaves.

VHF: Not available.

Tugs: None available.

Berthing: Vessel always berths port side alongside.

Repairs: No facilities.

Surveyors: With sufficient notice, Lloyd's Surveyor may be ordered fro Istanbul.

SHIPMASTER'S REPORT: September 1980.

Formalities: Customs Officer stays on board whilst vessel is in port.

Travelling manifests of cargo and ship's stores to be made up a accompany the vessel from port to port. For Cargo Manifests I used t U.S. Customs Declaration of Cargo Form with the U.S. Seal blank out, Authorities had no objection.

Pilotage: If vessel requires an outward Pilot through the Dardanel remember to order in good time, 12 hours minimum order time required, especially when the vessel's stay in port is short.

There is 1 Pilot who is also the 'Lloyds' sub-Agent in Gemlik and generally a useful person to know.

When unberthing make sure the Port anchor is home otherwise it foul the quay.

Berthing: Gangway may be turned out prior to berthing.

The quay consists of 2 berths, the Eastern Berth for loading bul bagged fertiliser has 2 loading booms. This berth, if it has another ves on it, may well cause some problems on leaving the Western Berth wh is the liquid ammonia facility. When the vessel is in position with liquid Chicksan, the bow overshoots the jetty and provision is made the forward mooring ropes to be taken to a large dolphin, connecte the main quay by a catwalk with a *wooden* walkway.

Berths are very good being of large, substantial concrete struc with good fendering.

Minimum depth alongside 12.6 m.

There is an 8 m. patch at the Eastern end of the Fertiliser Berth w causes the Pilot problems.

Density varies: 1020 – December 1979, 1016 – July 1980, 10 September 1980.

Discharging: 2 Chicksans, liquid line 10 in., vapour line 10 in., both ASA, both can be used for either liquid or vapour so be careful w connecting.

Discharge rates vary: December 1979 – 640 t.p.h.; July 198 502 t.p.h.; September 1980 – 800 t.p.h., they can take it at 1,000 t.p.h. depending on shore tank ullages.

Fertiliser plant usage of raw ammonia presently 400 tonnes per increasing in January 1981 to 600 tonnes per day. The actual produ of ammonia is expected to commence in about five years' time.

Shore surveyor attended and his figures taken as quantity discha Attends the vessel at subsequent Turkish ports by flying between p not allowed to stay with vessel. Very helpful. No gauging of shore t

General: No fuel. Available at great expense if brought from Istanbul or Izmit by barge or tank lorry.

All communications are dealt with by head office in Istanbul and then passed to Izmit thence by car to Gemlik which has no Telex.

Telephone to U.K. about 2 hour wait for connection, line clear.

Cables: Watship Izmit or sub-Agent: 'Kinay' Gemlik. For urgent messages cable address should be prefixed by the Turkish word 'Yildirim' – all ports.

Personnel repatriation is a problem due to the distance from Istanbul and the fact that the Immigration post is not in Gemlik.

Chandler: Agent does the chandlering, good vegetables available September 1980, payment in cash only.

Doctor: Available at Bursa about 30 km. (30 minutes).

Dentist: In Gemlik, near Agent's office.

Shopping: Best in Bursa about 30 minutes South of Gemlik along new dual carriageway. Agent will arrange transport. An hourly bus service runs from the plant into Gemlik.

SHIPMASTER'S REPORT: November 1980.

Berthing: If weather suitable berthing now undertaken at night. We eventually berthed at night in calm conditions with small coaster on fertiliser berth without any difficulties, proceed slowly. Unberthing at night.

Discharge: Very keen on correct discharge temperature. Use forward liquid line, aft vapour line. Shore tanks hold 40,000 tonnes total (20,000 tonnes each).

Fresh Water: Available but not potable. At L.400 per tonne (1.90 pounds). A fire tender is used as a pump at Chicksan. I believe its well water.

Fuel: With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron & B.P.). Telex: 29048 Bunk Tr. Tel: (1) 338 25 09/337 36 86/337 88 31/336 06 36. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

AUTHORITY: Gemlik Directorate, Port of Gemlik, Liman Baskanligi, Gemlik, Turkey. *Tel:* 1133. Gemlik Customs House: *Tel:* 1411; Gemlik Police Station: *Tel:* 1628; Gemlik Hospital: *Tel:* 2329.

Operator: Gemport, Gemlik Port and Warehousing Administration Co.Inc., Kocacukur Mevkii P.K.101, Gemlik/Bursa, Turkey. *Tel:* (224) 5248831 (6 lines). *Fax:* (224) 5248830. *Contact:* Captain Y. Ziya Alkan, General Manager.

GIRESUN (Kerasunda): 40.56 N. 38.24 E. (See Plan)

PORT LIMITS: The Port of Giresun is the sea area contained in the inner part of the imaginary lines which joins Lat. 40° 56' 40" N., Long. 38° 19' 40" E. and Lat. 40° 54' 51" N., Long. 38° 26' 10" E., Aksu River mouth and the point 2,778 m. (1.5 miles) away from this mouth in an 019° true direction with Lat. 40° 56' 15" N., Long. 38° 27' 00" E. and Lat. 40° 55' 10" N., Long. 38° 19' 40" E. Gure River mouth and the point 2,778 m. (1.5 miles) away in true North direction.

PILOTAGE: Pilot ordered by Agent who requires 24 hours' notice in advance of vessel's arrival. Compulsory for all foreign flag vessels.

Pilot service operates 24 hours a day and vessels may enter and leave at any hour on request.

ANCHORAGES: Good anchorage in Outer Harbour. Vessels should keep the entrance channel clear.

MAX. SIZE: Max. draft 10.0 m.

RADIO: Giresun Radio. Call sign TAB4.

TUGS: 1×750 h.p. Compulsory for all foreign flag vessels.

BERTHING: The Port of Giresun is composed of 2 parts. These are the inner harbour and the outer harbour.

(a) The inner harbour is the sea area contained in the inner side of the line which joins the light at the end of the main breakwater with the light at the end of the auxiliary breakwater.

(b) The outer harbour is that part of the sea which remains between the port boundary and the inner harbour boundary.

The Inner Harbour

The berthing, tying-up and stern to shore anchoring places for the ships are given below:

A – The passenger berth has been converted to a general cargo berth and is equipped with a shore crane of 3 tons capacity. This quay is 150 m. long and the water depth is 9.0 m. – 10.0 m.

B – The cargo wharf: This is reserved for cargo ships. It is 275 m. long and the water depth is 8.0 m. – 9.0 m. The cargo wharf is equipped with shore cranes of 3 tons capacity.

C – The small craft quay is 135 m. long and the water depth is 3 m. Small tonnage ships are berthed here.

D – Service wharf: This is 88 m. long and the depth of the water is 4 m. The service craft of the Harbour Authority berth here.

E – Providing that they obtain the Harbour Authority's permission, ships waiting their turn to berth may tie-up stern to shore, at the bollards on the main breakwater in such a way as not to impede the traffic.

F – The outer harbour is an unrestricted anchoring area but it is strictly forbidden to anchor or wait at the mouth of the breakwater. Anchoring is unrestricted 315° true North of and 2.5 cables away from the centre of the main breakwater, North of the normal anchoring area.

STEVEDORES: Working hours normally 0800 to 1200 and from 1300 to 1630. Four gangs available.

CRANES: 4 cranes available, 3 – 10 tonnes. 5 mobile cranes, 5 – 25 tonnes.

FRESH WATER: Available.

FUEL: Available by road tanker.

REPAIRS: No repair facilities.

GARBAGE DISPOSAL: Garbage disposal service is available. Drums are provided if required. Charges are as follows:

	Cost (U.S.$)/1,000 g.r.t.			
	Flag of Ship		*Cost (U.S.$)*	
Method of Service	*Turkey*	*Others*	*Barge*	*Container*
On Quay	16	45	6	0.70
At Anchor	30	90	6	0.70

WASTE OIL DISPOSAL: Waste oil disposal service is available. Charges are as follows:

	Cost (U.S.$)/1,000 g.r.t.	
	Flag of Ship	
Method of Service	*Turkey*	*Others*
On Quay	20	60
At Anchor	40	12

Facilities include two oily water separators of 2 tons per hour capacity and a shore tank of 100 tons capacity.

Contact: Tel: 051-11490. Telex: 82468 TRDZ. Fax: 051-21734.

SEAMAN'S CLUBS: There is no seaman's club operating in the port, but the port is situated near the city, and all shopping, international telephone, some sporting activities, dances, transportation, and postage facilities are available there.

CURRENCY: Turkish Lira (TL).

AUTHORITY: Giresun Port Authority, Giresun Liman Isletmesi Mudurlugu, Giresun. *Tel:* (90) (051) 12447. *Telex:* 82468 Giresun. *Contact:* Port Manager.

GOCEK: 36.45 N. 28.55 E. (See Plan)

SHIPMASTER'S REPORT: February 1990.

LOCATION: Port of Gocek is located in the N.W. part of Fethiye Korfezi (Fethiye Bay). Position of the Berth 36° 45.2' N., 29° 55.5' E.

DOCUMENTS:

6 Crew Lists.
2 Lists of Crew's Personal Effects.
2 Lists of Ship's Stores.
2 Lists of Medical Narcotics.
2 Lists of Arms and Ammunition (if any).

All Passports/Seaman's Books taken ashore by Immigration and numbered landing cards issued. Passports returned on departure in exchange for landing cards.

PILOTAGE: Pilotage is optional. Request for the Pilot should be made through local Agents at least 48 hours in advance (on this particular vessel the Pilot had been hired from Izmir). However, pilot service is recommended, so as to assure good communications and cooperation with mooring boat. Pilot boards about 1 mile S.E. of Gocek Island (in good weather conditions) from the same boat, which is later used as a mooring boat.

Before proceeding, sufficient time should be allowed for the boat to return to port (distance about 3 miles).

APPROACHES: Approach to Gocek Port leads through a deep channel between Gocek Island and the mainland, about 3 cables wide and 1 mile long. Rounding the protruding point on Akmaden Peninsula (Southern part of Gocek Bay), the speed should be at the minimum, because vessel is already approaching the berth. There are 2 flat unlit buoys, painted white and red, about 80 m. from shore, N.W. and N.E. from Akmaden Lighthouse. Both buoys marked "MY HALAS" on sides. In addition there are 2 small white buoys close to S.W. part of the berth, apparently marking entrance to yacht harbour.

In berthing port side alongside (which is recommended because of departure), during the manoeuvre vessel's stern will at times be quite close to mentioned buoys (this vessel is 135 m. LOA, 12,000 d.w.t.). Starboard anchor should be used well in advance in order to swing the vessel to starboard and to facilitate the departure (at least 4 shackles). Swinging area is quite restricted and manouvre should be done without any haste and carefully.

VHF: Communications through Fethiye Radio.

TUGS: Tugs not available. Mooring boat is usually hired from local fishermen.

BERTHING: The port is perfectly sheltered from all winds and swell. There are numerous berths for pleasure and fishing craft in whole bay area, which is considered a tourist resort. Some of those berths have piers, protruding 20 m. – 30 m. from the shore, but none obstruct navigation or manouvres. Maximum tide range is only 10 cm. – 15 cm. throughout the year, with the exception of persistent Southerly wind periods, when slightly higher. At present the port is handling export of chrome ore and import of waste paper for nearby paper factory. Ships with cargo for the paper factory have priority to berth.

Port of Gocek consists of a main berth, total length 157 m. At a slight angle to the main berth is the berth (92.5 m. length) for small tankers of up to 1,000 d.w.t.

Depths alongside the main berth are as follows: At the extreme S.W. part 10.4 m., in the middle 11.5 m., and at the extreme N.E. part 10.0 m.

CARGO: Cargo is delivered to the quay by trucks. Chrome ore is already loaded in square iron boxes, each truck 5 – 6 boxes, each box about 2.5 tons of ore. The boxes are hooked directly from trucks and emptied into holds. Daily rate with 3 gangs during consecutive 24 hours might reach over 1,500 tons. Weighing of cargo done on shore under Customs' control, and draft survey not required. The cargo declared as lumpy chrome ore, stowage factor 16 cu.ft./ton, actually consists of about 50% medium size rocks and the rest is crushed/rubble.

Cargo Handling: No shore or mobile cranes available, all cargo handling by ship's gear.

MEDICAL: Fethiye Hospital.
FRESH WATER: Not available from quay.
FUEL: Not available.
CUSTOMS ALLOWANCES: 200 cigarettes per crew member.
REPATRIATION: Possible.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summertime from late March.
SERVICES: Ship chandler and laundry available in Fethiye, 35 km. by road.

GOLLUK: 37.14 N. 27.38 E.

DOCUMENTS: The following documents have to be prepared by Masters before arrival:
4 copies of Crew Lists.
2 copies of Stores Lists.
1 copy Health Document.
4 copies of Passenger Lists.
3 copies of Customs Documents.
3 copies of Manifests for cargo destined to port.
1 copy of Manifest for all transit cargo aboard.
N.B. Ship's particulars form is to be filled by Masters upon arrival and remitted to the Port Authorities.
PILOTAGE: Pilot not available.
RESTRICTIONS: Golluk is a well-protected natural harbour, not affected by winds from any direction. Deep water approaches to pier.
HEALTH: Vessels to show their Sanitary Certificate if available aboard and also their Registry. Presentation also of Vaccination Certificate of all the crew, if required by Sanitary Officials. Pratique is necessary on arrival even if vessel has called at another port in the same country. Sanitary Certificate is required for live animals aboard.
RADIO: Izmir Radio Station, call letters TAN2. Istanbul Radio Station, call letters TAH.
TUGS: Not available.
BERTHING: One pier 170 m. long used for handling emery ore in bulk. Depths alongside 39 ft. shelving to 20 ft. at 90 m. from seaward end.
CUSTOMS ALLOWANCES: 50 cigarettes for each member of crew going ashore. Aboard the vessel each member of the crew is permitted to have one carton out of Bond. One litre wine/spirits for each member of the crew in opened bottle is permitted out of Bond. However, this allowance is to be kept aboard the vessel.
TIME: GMT plus 3 hours.
HOLIDAYS: New Year's Day (from December 31st 1200 hrs. to January 1st 2400 hrs.); National Sovereignty Day (from April 22nd 1200 hrs. to April 23rd 2400 hrs.); Spring Day (1st May), Constitution Day (27th May); Sports Day (19th May); Victory Day (30th August); National Holiday (28th October 1200 hrs. to 30th October 2400 hrs.); Sheker Bayram (3 days movable); Kurban Bayram (4 days, movable).

HEREKE: 40.42 N. 29.37 E. (See Plan)

DOCUMENTS: 5 Crew Lists, 2 Stores Lists, 2 Crew Declarations, 4 Cargo Manifests, 2 copies Bills of Lading, 2 Stowage Plans, Clearance from Last Turkish Port, Bill of Health, 2 Lists of Money in Ship's Safe, Tonnage Certificate, Safety Equipment Certificate, Safety Radio Certificate, Safety Construction Certificate, Load Line Certificate, Derat Certificate.
PILOTAGE: Compulsory pilotage from Darica to Hereke and vice-versa; also for berthing and unberthing. (For all movements in Izmit Gulf Pilot is compulsory).

Vessels proceeding to Hereke port have to take Pilot when entering Izmit Gulf at Darica Pilot Station, located:

Approx. Lat. 40° 45' 18" N., Long. 29° 23' 18" E.
ANCHORAGES: Anchoring places at Izmit Gulf are as follows:
For Dry Cargo Vessels:
Darica/Eskihisar Anchorage: Approx. Lat. 40° 46' 05" N., Long. 29° 32' 10" E.
Izmit Anchorage: Approx. Lat. 40° 44' 00" N., Long. 29° 52' 48" E.
For Tankers:
Yarimca Anchorage: Approx. Lat. 40° 44' 50" N., Long. 29' 44' 30" E.
RESTRICTIONS: Berthing at jetties at night time is at Pilot's discretion.
MAX. SIZE: No restrictions if vessel suitable to load/unload at Hereke berth where jetty length 249.5 m. and depth varying between 12.3 m. and 17.00 m.
HEALTH: For vessels proceeding to Hereke Free Pratique obtained at Canakkale-Dardanelles or at Buyukdere/Bosphorus. Crew List and Derat Certificate required.
RADIO: Istanbul Radio Station. Call sign TAH.
VHF: Available only at Darica and Yarimca Pilot Stations, Channel 16.
TUGS: Compulsory towage for berthing and unberthing. The following number of tugs must be used during operations in Izmit Gulf:
500 to 5,000 g.r.t. – 1 tug
5,000 to 25,000 g.r.t. – 2 tugs
25,000 to 50,000 g.r.t. – 3 tugs
over 50,000 g.r.t. – 4 tugs
BERTHING: Only one jetty available at Hereke which belongs to NUH Cement Factory where more than one vessel can berth at a time. Length 250 m., depth 12.3 m. – 17.0 m.
CRANES: No shore cranes available on jetty.
BULK CARGO FACILITIES: As pier belongs to cement factory on cement cargo loaded. For bulk cement loading rate is 3,000/4,000 tonne per day. 24 hours continuous work.
SPECIALISED CARGO HANDLING FACILITIES: None.
BRIDGES: None.
STEVEDORES: Private.
MEDICAL: Hospital and dental facilities are available at Izmit appro 30 km. from Hereke.
TANKERS: No tanker facilities.
DENSITY: 1020-1022.
FRESH WATER: Available by barge and small quantities available fro the jetty.
FUEL: Not available at Hereke, can be supplied by barge or coast from Istanbul.
FIRE PRECAUTIONS: None.
CONSULS: None.
REPAIRS: No repair facilities.
DRY DOCKS: None.
SURVEYORS: (1) Cargo Inspectors available at Istanbul.
(2) Surveyors available at Istanbul.

Cargo Inspectors and Surveyors can be ordered from Istanbul attend vessels at Hereke.
GANGWAY/DECK WATCHMEN: Not necessary. Ship's gangway use
HATCHES: Opening/Closing hatches carried out by the crew.
CUSTOMS ALLOWANCES: Tobacco: 1 carton of cigarettes per wee each man. Spirits: 1 bottle of spirits per week, each man.
CARGO GEAR: Load/discharge effected by ship's gear as no cran available on the jetty.
REPATRIATION: Main embarkation/disembarkation Customs a Immigration formalities done at Istanbul but permission/formalities al required from Izmit Immigration and Izmit/Derince Customs to ass repatriations.
AIRPORT: Nearest airport at Istanbul, approx. 100 km. from Hereke
TIME: Local time GMT plus 3 hours in Summertime.
HOLIDAYS: New Year's Day, Sugar Bayram for 3 days, Kurban Bayra for 4 days (both religious holidays and dates are changeable every yea 23rd April, 19th May, 30th August, 29th October are National Holiday Saturdays and Sundays official holidays.
POLICE/AMBULANCE/FIRE: Police: 055 or Local Police Station: 51 4070. Ambulance: 112. Fire: 110.
EMERGENCY CO-ORDINATION CENTRE: Police Headquarters: 26 511-4070.
TELEPHONES: No arrangements exist.
SERVICES: None.
BANKS: Only local banks.
STORING: See "Prelims".
1. Vessel can be stored by barge and truck.
2. Vessels can be stored by barges during loading or discharg
3. Trucks can proceed alongside at berth.
4. Fork lift trucks not available.
5. Customs formalities required for storing, Agent assists.

SHORE LEAVE: Crew members allowed ashore, no shore pa required.
IDENTIFICATION CARDS: Seaman's Book is sufficient.
REGULATIONS: Nil. No visitors allowed aboard without permission
DELAYS: No delays expected.

BANKS: Ziraat Bankasi, Is Bankasi, Ak Bank, Halk Bank.

SHORE LEAVE: Crew members allowed ashore.

GARBAGE: Trucks will remove garbage from vessel at berth on request.

IDENTIFICATION CARDS: Required.

GARBAGE DISPOSAL: Garbage disposal service is available. Drums are provided if required. Charges are as follows:

	Cost (U.S.$)/1,000 g.r.t.			
	Flag of Ship		*Cost (U.S.$)*	
Method of Service	*Turkey*	*Others*	*Barge*	*Container*
On Quay	16	45	6	0.70
At Anchor	30	90	6	0.70

WASTE OIL DISPOSAL: Waste oil disposal service is available. Charges are as follows:

	Cost (U.S.$)/1,000 g.r.t.	
	Flag of Ship	
Method of Service	*Turkey*	*Others*
On Quay	20	60
At Anchor	40	12

Facilities include two oily water separators of 2 tons per hour and two of 10 tons per hour capacity and shore tanks of 100 tons and 600 tons capacity.

Contact: Tel: 0571-2259. Telex: 83338 TRDZ. Fax: 0571-1791.

SEAMAN'S CLUBS: There is no seaman's club operating in the port, but the port is situated near the city, and all shopping, international telephone, some sporting activities, dances, transportation, and postage facilities are available there.

CURRENCY: Turkish Lira (TL).

SHIPMASTER'S REPORT: February 1996.

Since Summer 1995, the Port Administration has commenced reconstruction of the main breakwater by way of elongation of about 250 m. – 300 m. No buoy has been established at the end of the "non-visible" breakwater. The depths are much less than shown on the chart.

One vessel went aground while entering the port even with a Pilot onboard. There is only one Pilot at the port and he is not experienced.

Only one tug (900 h.p.) is available for berthing operations. This tug is not very manoeuvrable.

AUTHORITY: Port Management, Hopa, Liman Isletmesi Mudurlugu, Hopa, Turkey. *Tel:* (90) (0571) 3638. *Telex:* 83338. *Contact:* Emin Ali Yilmaz, Director of Port. Dursun Seheri, Assistant to Director.

Nedim Kurum, Harbour Master. Tel: 1067. Telex: 83359.

ISDEMIR: 36.43 N. 36.11 E. **(See Plan)**

LOCATION: The port is located inside the Western Breakwater within Lat. 36° 43' 30" N., Long. 36° 11' 06" E. and the South Breakwater within Lat. 36° 43' 35" N., Long. 36° 11' 15" E.

DOCUMENTS: Same as other Turkish ports.

PILOTAGE: Compulsory for all foreign vessels. Working hours are 0800 hrs. – 2400 hrs. (Also see "Restrictions"). Pilot boards 0.5 miles to 1.5 miles from the main breakwater. Call on Channel 16, working on Channel 12.

ANCHORAGES: Safe anchorage South of a line due West of the South breakwater light (green light) and at least one mile from the breakwater.

RESTRICTION: Large vessels (over 100,000 d.w.t.) and tankers are not allowed to enter during hours of darkness.

MAX. SIZE: No limitation at the anchorage.

	Max. Length (m.)	*Max. Draft (m.)*
AI (1)	300	16.0
AB (2)	200	11.0
CD (3)	150	7.8
DE (4)	200	9.2
EF (5)	185	9.5
FG (6)	90	5.5
Service Berth	140	5.5
Fuel Wharf	No limit	13.0

HEALTH: See "Iskenderun".

RADIO: See "Iskenderun".

VHF: Channel 16, working Channel 12.

RADAR: There is a Radar Control Station on the South side of Iskenderun Gulf Entrance, near Akinci Point. Operator asks vessels on entering and departure for their name and call sign by VHF Channel 16. The station is on duty 24 hours.

TUGS: 3 tugs available, 2×2,480 h.p. and 1×1,200 h.p. Tug compulsory for vessels over 500 g.r.t.

1 Tug for over 500 to 4,000 g.r.t. vessels.
2 Tugs for over 4,001 to 15,000 g.r.t. vessels.
3 Tugs for over 15,001 g.r.t. vessels.

If a vessel arrives with over 100,000 tonnes cargo or 16.0 m. draft, a fourth tug is provided from Botas/Ceyhan or Iskenderun Port.

BERTHING:

Berth No.	*Length (m.)*	*Depth (m.)*	*Cranes Capacity tons*	*Remarks*
1	500	16.0 - 18.5	2 × 25	2,000 t.p.h. (ore), 1,250 t.p.h (coal), outreach 28.0 m., air draft 19.0 m.
2	240	11.5 - 12.0	5 × 15	400 t.p.h. (ore), 300 t.p.h. (coal). Berth can also be used for general cargo.
3	220	8.0 - 8.5	2 × 10	General cargo
4	200	9.5 - 10.0	1 ×140	Heavy lifts
5	185	9.5 - 10.0	2 × 10	General cargo
6	90	6.0 - 7.5	–	The cranes on Pier 5 are used.
Service Berth	140	6.0	–	Load-discharge only for the Turkish vessels.
Fuel Wharf	–	14.0	–	Vessels are moored by stern and drop both anchors.

CRANES: 2 Portal cranes on Pier 1 for ore and coal discharging operations. 5×15 ton cranes on Pier 2 for bulk and other purposes. On Piers 3, 5 and 6, 10 ton capacity cranes can be used with hydraulic grabs for bulk and general cargoes. Fixed heavy lift crane on Pier 4 for special purposes which can be used for heavy cargoes up to 140 tons. *Mobile Cranes:* Capacity 6 tons – 90 tons.

SPECIALISED CARGO HANDLING FACILITIES: Tar and benzol are produced by the factory. The tar loading can be carried out by 30 ton trucks. A 4 in. hose is available on the Fuel Wharf, and benzol can be loaded by pipeline at a rate of 1,000 tonnes per day.

Fuel oil, gas oil and diesel oil can be loaded by 8 in. hoses from the existing 8 storage tanks (total capacity 30,000 tonnes). Vessels have to have clean ballast on their arrival. There are no storage facilities for dirty ballast.

STEVEDORES Available 24 hours. Written ETA advices to the Port Management required 8 hours before berthing.

Handling Rates:	*Tons per 24 hours*
Pig Iron	1,500
Iron Ore	20,000
Pipes	800 – 1,000
Timber	4,000
Coal	16,000
General Cargo	800 – 1,000
Wheat	1,500
Sugar	100
Rice	600
Cement	1,500
Fertiliser	1,500
Fuel-oil	3,500 – 5,000

TANKERS: Facilities owned by the Port. Depth alongside 14.0 m. Discharge rate for fuel and oil (1×10 in.) 350 t.p.h. – 400 t.p.h. Benzol (1×6 in.). Handling rate 70 t.p.h. – 80 t.p.h. Distance between dolphins 106 m. Also see "Specialised Cargo Handling Facilities".

FRESH WATER: Good quality water available from shore connection, rate 15 t.p.h. maximum.

REPAIRS: No facilities.

CONSULS: See "Iskenderun".

DRY DOCKS: None.

GARBAGE DISPOSAL: The port is integrated with Iskenderun Steel Works and garbage facilities are provided by the Social and Internal Services Department, who provide garbage collection trucks and teams. Contact Tel: 9-8895-6270-1101/1501.

WASTE OIL DISPOSAL: A waste oil refining station has been installed near the fuel tanks of the Steel Works and trucks are used to transport waste oil from ships to the oil cleaning station.

SEAMAN'S CLUBS: None.

CURRENCY: Turkish Lira (TL).

SHIPMASTER'S REPORT: June 1981.

Location: 8 miles North of Iskenderun.

Pilotage: Pilotage is compulsory, but we arrived and sailed without Pilot. Permission must first be obtained via VHF Channel 16 through Iskenderun, usually the Agents. On no account must vessels enter and leave without permission.

Anchorages: Good holding ground inside breakwaters, protected from all directions except Southwesterly swell. Permission must first be obtained before anchoring inside.
Navigation: Good navigational entrance marks. No difficulties encountered on entering or leaving, plenty of water.
Tugs: Not available.
Berthing: Longest wharf appears to be "D", which at present is being extended (See "Plan"), the smallest being "C". All wharves appear to have plenty of water, (See "Plan"). All wharves have good access, wharves B, C and D being serviced with rail. Berth "A" has a heavy lift crane of 100 tonnes, no rail. Berth "D" has a conveyor for bulk cargoes. Most cargo being discharged into road transport.
Cargo Handling: Wharf "D" Bulk, "B" and "C" general cargo, Wharf "A" heavy lifts.
Cranes:

Wharf A – 1 × 100 tonnes for heavy lifts
B – 2 × 10 tonnes
C – 2 × 10 tonnes
D – 4 × 10 tonnes

Small mobile cranes also available.
Stevedores: Working hours – 24 hours continuous. Shifts change at 1600 hrs. Meal breaks at 1200 hrs. – 1300 hrs., 1700 – 1800 hrs. and 2000 – 2100 hrs.

Rate of discharge good, labour force good. Majority of port handling equipment is new, cranes, rail, etc. No warehousing available.
Fresh Water: Fresh water obtained by road tanker only, in quantities of 40 tonnes. Usually supplied at night as they supply the steel town during the day.
Fuel: No facilities observed.
Medical: Facilities at Iskenderun.
Consuls: At Iskenderun.
Repairs: No facilities observed.
General: Communications: Rail and road to Iskenderun, no local airfield. All instructions and information available through Iskenderun on VHF Channel 16, calling "Demicargo" which is local control, usually operating 0900 hrs. to 1700 hrs. and available only during working hours (Not meal hours).

Tonnage Handled: By observation only, it appears that relatively large vessels can be handled at the iron ore berth, up to 30,000 tonnes. A new berth is under construction (See "Plan") which will be able to handle vessels up to 100,000 tonnes. Other berths are for smaller vessels (A, B and C), the largest being "B".

Principal activities, steel, iron ores, general cargo.
Services: Tank cleaning services and ship chandlers available from Iskenderun.

SHIPMASTER'S REPORT: October 1986.
Clearance Inward: Vessel ordered to Iskenderun, anchored on arrival, cleared inward. All certificates and Seaman's I.D. Cards landed. Shore passes issued. 7 copies of Crew List required.

Radio: Istanbul for long distance messages. Iskenderun for messages when close by, port has VHF but uncertain if international connections possible.

Iskenderun Pilot has VHF Channel 16, opening watch at 0630 hrs.

Most Agents appear to be on VHF in office hours.

Fuel: Available with appropriate arrangements.
Isdemir: Vessels shifted up to wait for Pilot off Harbour Entrance on instructions of Agency. Pilotage available from 0830 hrs., VHF Channel 12. Tug channel monitored, 2 tugs on station, a third can be ordered.

The port imports coal and iron ore for the steel mill, using the newly completed portal grab cranes on Berth A-I. Berths A-B, C-D, E-F appear to be mainly used for exports of steel bars, coils, steel rods, pig iron, some coal and other minerals. Berth D-E mostly used for import of grain for direct delivery into lorries, and yard cargo for import or transhipment overland.

Working Hours: (3×8 hours) 0800, 1600, 2400 hrs. Though tally clerks may work (2×12 hours) 0800, 2000 hrs.

Vessel loaded 27,000 tonnes steel bars in 21 days after waiting 13 days for berth, with one shift to a deeper berth across harbour with tugs.

Facilities: Industrial grade or non-potable water piped to a few points in the harbour. Drinking water supplied in road tankers (ship's hose used). Agencies, communications, medical, ship chandlers, etc., all in Iskenderun. Agency charged by tariff for all services, rather than by the amount of work done.

International telephone system appears limited, and congestion occured soon after 0900 hrs. Agency telex machines only domestic models, head office relayed international messages.

Provisions, especially vegetables, limited choice in hot weather. No bonded stores, only duty paid beer, etc. available. Ship chandlers required Owners approve the cost of the order before arranging supply, also that only one delivery be made owing to the high costs involved. Bill made out in U.S. dollars.

The public highway is a walk of 1.5 hours in very hot weather, before taxis or mini buses can be obtained. The bus system at shift change time, with a transfer at the factory bus terminal was useful and economical. There are some small general stores in the 'Fabrik Town' about 1 hour's walk. Hourly bus service to Iskenderun until early evening.
Clearance Outward: Vessel returned to Iskenderun on a Sunday for outward clearance, where the certificates and Seaman's I.D. Cards were returned. It is possible to sometimes arrange clearance at Isdemir on weekdays.

AUTHORITY: Iskenderun Demir Ve Celik Fabrikalari, Directorate of Iskenderun Iron and Steel Plants, Isdemir 31319, Turkey. *Tel:* 8895-6260. *Telex:* 68696, 68697 Isde Tr. *FAX:* 9-881-13895. *Cables:* Isdemir-Iskenderun. *Contact:* Mehmet Arican, Port Manager Tel: 8895-6260 (Ext. 3080), Fax: 9-8895-3759.

CONSULS: Vice-consulates of France, Germany, Greece, Italy, Nor Spain and U.K.
REPAIRS: Welding and other minor types of repairs are possible

GANGWAY/DECK WATCHMEN: Services of watchmen recommended. 3 shifts of 8 hours each. Extra tariff for Sundays and holidays.
OPENING/CLOSING HATCHES: May be opened/closed by ship's crew. May be performed by stevedores at tariff rates.
CUSTOMS ALLOWANCES: 50 cigarettes for each man going ashore. On board the vessel each man may hold 200 cigarettes and 1 open bottle wine/spirits out of bond.
REPATRIATION: Can be arranged but Passport compulsory.
AIRPORT: Adana Airport, situated 147 km. from Iskenderun.
POLICE/AMBULANCE/FIRE: Police 11007; Ambulance 11057; Fire 11000.
TIME: GMT plus 2 hours in Winter. GMT plus 3 hours in Summer.
HOLIDAYS: New Year's Day (commencing 1200 hrs. Dec. 31st); National Sovereignty Day (April 23rd); Sports Day (May 19th); Victory Day (August 30th); October 29th; Sheker Bayram (3 days, movable); Kurban Bayram (4 days, movable).

Iskenderun Port is not working only on first days during Sheker Bayram and 2 days during Kurban Bayram, during all other days work carried out.

IDENTIFICATION CARDS: Seamen's Book is sufficient. For repatriation and joining vessels, passport compulsory.
GARBAGE DISPOSAL: Garbage collection service and equipment is available. This service is given at all berths.
WASTE OIL DISPOSAL: Collection service is available. The waste oil is collected by 10 cu.m. mobile tanks. There is another tank of 80 cu.m. capacity inside the port. An oily water separator system of 7,500 cu.m./ year is also available.
SEAMAN'S CLUBS: There is no seaman's club. However some facilities are available both within the port and in the city.
CURRENCY: Turkish Lira (TL).
GENERAL: *Weighing Facilities:* There are 4 weighbridges up to 100 tons capacity.
Weather: Sudden and very strong winds called "Yarikkaya" blow from North and East during Winter season.
Security: Port Security personnel ensure the security of the port 24 hours a day.
Provisions: Available.
DEVELOPMENTS: There are plans for container facilities in order to meet the container handling requirements, which will arise from Southeast Anatolia Project (GAP). The feasiblity study for a container terminal has already been completed.

SHIPMASTER'S REPORT: Customs and Health Clearance are performed both at anchor and at the berth. Vessels should anchor about 0.5 miles North of the landing stage in the main part of the town. All Officials and Agents arrive by boat and when clearance is given the Pilot comes out. For vessels with cargo for the chemical works at Sariseki (3.5 miles North of the main port), the procedure is the same except that a Pilot is not required.

Customs, Immigration, and Health Officials require 4 Crew Lists on arrival. The Agent will require 2 more Crew Lists prior to the vessel's departure for clearance with the Harbour Master.

(A) ISTANBUL (EUROPE)
(B) HAYDARPASA (ASIA)

(A) ISTANBUL (EUROPE)

DOCUMENTS: *Vessels bound for Istanbul:*
5 Crew Lists.
6 Passenger Lists.
3 Stores Lists.
1 Transit Cargo Manifest.
2 Inward Manifests of all cargo onboard.
Copies of relevant Bills of Lading for Inward Manifests.
3 Lists of Money in the Ship's Safes (if there is no money on board, please issue 3 "Nil" lists).
Harbour Master's Sailing Permit (which must be exchanged at each Turkish Port and kept on board).
Ship's Certificates (Derat, Ship Safety, Safety Radio, Class or Freeboard).
Transit Vessels: Master to present only Tonnage and Derat Certificates during Sanitary Control at both Straits (Canakkale and Buyukdere).
PILOTAGE: For both vessels bound for Istanbul and transit vessels, Pilot secured by the Agent through the Port Monopoly Administration. Master to wire ETA notices 48 and 24 hours prior to arrival. ETAs must be confirmed or corrected not less than 2 hours prior to ETA. Pilot boarding vessel, using service boat hoisting red and white flag, off Haydarpasa and Sarayburnu (entrance from Marmara Sea) or off Kavak (entrance from Black Sea). Pilotage for entering and berthing in harbour areas is compulsory. Pilotage through Bosphorus is optional. All Pilots can be contacted by VHF Channel 16.

Also see "Shipmaster's Report".

ANCHORAGES: Free and safe anchorage in roads off Marmara coast approach to Istanbul. It is however recommended to anchor as near as possible to the harbour. Anchoring at other anchorage areas is subject to special permission via Harbour Master. Good anchorage off Haydarpasa and off Yenikapi, Ahirkapi for large vessels. For smaller vessels there is a good anchorage between Dolmabahce and Kurucesme.
RESTRICTIONS: Ships carrying hazardous cargoes (flammable, explosives, corrosives, etc.) are not allowed to enter the harbours. Ships can anchor in roads outside the harbour at any time without Pilot. Ships to operate upon arrival at night can enter the harbours with Pilot and with special permission through the Port Monopoly Administration. 48 hours' notice has to be given to the Harbour Master of Istanbul for vessels calling at Istanbul and/or passing in transit through Bosphorus.
MAX. SIZE: No limitation of draft in open roadstead at anchor. Max. draft in port alongside quay: 10 m. for dry cargo ships. Tankers up to 48 ft. draft can berth at Haramidere Oil Port.
HEALTH: Sanitary control of both transiting and operating vessels performed at the Straits entrance (Canakkale and Buyukdere). Ships entering from South must slow down at Canakkale and ships arriving from North must slow down at Buyukdere for Sanitary Control. In case of non-performance of such control due to bad weather, Master has to inform Agent in time and have to stop and wait at South Entrance of the Bosphorus until Sanitary Control is performed otherwise heavy fine would be levied.

Also see "Shipmaster's Report".

RADIO: Wireless messages to be routed to Agent via Istanbul Radio. Call sign of Istanbul Radio Station is TAH. Frequency MW 500 kHz. Ships can also communicate with Agent by radio telephone on frequency 2182 KHz. It is recommended that ships keep watch for any radio telephone call by Agent detailing any berthing and operation arrangement.
TUGS: Arranged by Agent. Vessels of 1,500 g.r.t. and over berthing at the quays or mooring to the buoys are compelled to take the services of at least one tug and vessels of 5,000 g.r.t. and over require at least two tugs. Charged per hour or fraction of each operation.

21 tugs ranging from 110 hp to 2,500 hp are available.

BERTHING: Priority to food and passenger ships. If no berth available then ships to wait for turn in roads at anchor.

Turkish Maritime Corporation Facilities:

Wharves:	Length (m.)	Depth of Water (m.)
Karakoy (ex Galata) exclusively for passenger vessels	520	7 – 10
Salipazari for cargo handling	600	10
Sarayburnu for passenger handling	240	6
Camialti and Haskoy (Golden Horn)	68	3 – 4
Kurucesme for coal handling	370	10

Equipment:
Electric Cranes along the quays:
2 of 5 tons
7 of 3 tons
3 of 4 tons (coal transporter)
Rubber wheeled mobile cranes:
1 of 25 tons
7 of 10 tons
8 of 5 tons
5 of 3.5 tons
Floating Cranes: 5 tons – 60 tons.

BULK HANDLING: See "Section B" – Haydarpasa.
BRIDGES: There are 2 bridges: Galata Bridge is between Eminonu and Karakoy: Ataturk Bridge is between Unkapani and Azapkapi. Both bridges are opened in the morning for vessels entering the Inner Harbour (Golden Horn). Vessels wanting to pass through the bridges have to give notice in due time to the Harbour Master of Istanbul.
STEVEDORES: Gangs of stevedores secured by the Agent through the Port Monopoly, 24 hours prior arrival. Average loading and discharging rates of about 150 – 200 tons per gang per shift depending also on the kind of goods. Discharging operations are generally performed alongside the wharves and loading operations at buoys; however, as stated above, can also be effected alongside simultaneously with discharging. Working hours: Monday to Friday 0800/1200 and 1300/1700 hrs; Saturday 0800/ 1200 hrs.
MEDICAL: Master to inform Agent by cable if urgent medical assistance is required upon arrival, also indicating, if possible, seriousness of case in order to take adequate steps.
TANKERS: The oil port called Haramidere is a small bay open to Southern winds and 60 km. distant from Istanbul in the Sea of Marmara. There are buoys and an oil pumping platform in this bay. Tankers can berth by dropping 2 anchors and mooring by stern at these buoys or at platform. Average sea depth is 48 ft.
Ambarli: Position Lat. 40° 58' N., Long. 28° 42' E. Max. size 250,000 d.w.t. Vessels moor by the stern to a dolphin platform (offshore).
DENSITY: Always variable due to strong currents, however, can be reckoned as 1015.
FRESH WATER: Supplied by barge and shore installation at the rate of 30 t.p.h. – 60 t.p.h.
FUEL: Diesel oil, gas oil and bunker fuel can be supplied by barge at transit cost, subject 48 hours' pre-advice. Fuel supplied only against advance payment in foreign exchange (dollars, sterling or Swiss francs).

With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron & B.P.). Telex: 29048 Bunk Tr. Tel: (1) 3382509, 3373686, 3378831, 3360636. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

REPAIRS/DRY DOCKS: At the Golden Horn are 3 graving-docks:
(1) 388 ft. length, 72 ft. width at entrance
(2) 279 ft. length, 62 ft. width at entrance
(3) 600 ft. length, 63 ft. width at entrance

At Istinye (in the Bosphorus):

1 floating dock 137.50 m. length, 21.25 m. width with 8,500 tons lifting capacity. 1 floating dock 67.82 m. length, 30.40 m. width with 5,000 tons lifting capacity. 1 floating dock 126.14 m. length, 34.0 m. width with 10,000 tons lifting capacity. In cases of necessity floating docks of 5,000 and 10,000 tons capacity can be united and be put in operation as single floating dock with 15,000 tons lifting capacity. Every kind of repair can be effected at Istinye docks.

At Fener (Golden Horn) is a dry dock for vessels up to 600 tons, and at Haskoy (Golden Horn) is a dry dock for vessels up to 176 tons. There are also some privately owned. All kinds of repairs can be effected.

SURVEYORS: American Bureau of Shipping, Bureau Veritas, Germanischer Lloyd, Lloyd's, Norske Veritas, Turkish Lloyd.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Owners or Master to decide whether this work should be undertaken by the stevedores or by the crew.

CERTIFICATES: Safety, Safety Equipment, Safety Radio, Class and Freeboard documents.

CUSTOMS ALLOWANCES: 40 cigarettes and 1 bottle wine/spirits per crew member.

CARGO GEAR: Generally shore cranes operating. However, ship using own means when such cranes are not available. Full lights to be supplied by ship.

REPATRIATION: Crew exchange and repatriation is possible for citizens of Italy, Great Britain, Benelux Countries, Sweden, Norway, Germany, Austria, Switzerland, France, Ireland, U.S.A., Iceland, Pakistan, Monaco, Australia, Canada, Japan, New Zealand, Spain, Cyprus, Portugal, Tunisia, Kenya, Iran, Yugoslavia, Romania, Morocco. Citizens of other states not specified above are subject to a Turkish visa.

AIRPORT: Yesilkoy Airport is an international airport with daily connection throughout world. Airport 15 km. from Istanbul.

TIME: GMT plus 3 hours.

HOLIDAYS: New Year's Day (Dec. 31st p.m. and January 1st); National Sovereignty (April 22nd p.m. and April 23rd); Sports and Youth Day (May 19th); Sheker Bayram (3 days) (movable); Courban Bayram (4 days) (movable); Victory Day (August 30th); Proclamation of the Republic (Oct. 28th p.m. to Oct. 30th). In the event of a holiday ending on a Friday, the Saturday that follows is considered also as a holiday in full, and normal working starts as of Monday morning 0800 hrs.

POLICE/AMBULANCE/FIRE: Fire Istanbul 521 42 22, Uskudar 333 20 30; Police 527 45 00; Ambulance Istanbul 521 15 95, Beyoglu 144 49 98, Uskudar 333 04 01.

TELEPHONES: No installation for connection facility on board.

SERVICES: Tank cleaning (gas-free service), derat, compass adjusting carried out by experts of shipyards or Turkish Maritime Lines.

SHORE LEAVE: Crew members are allowed ashore at all times.

IDENTIFICATION CARDS: Seaman's Book is sufficient.

GARBAGE DISPOSAL: Garbage disposal service is available. Drums are provided if required. Charges are as follows:

Cost (U.S.$)/1,000 g.r.t.

Method of Service	*Flag of Ship* *Turkey*	*Others*	*Cost (U.S.$)* *Barge*	*Container*
On Quay	16	45	6	0.70
At Anchor	30	90	6	0.70

WASTE OIL DISPOSAL: Waste oil disposal service is available. Charges are as follows:

Cost (U.S.$)/1,000 g.r.t.

Method of Service	*Flag of Ship* *Turkey*	*Others*
On Quay	20	60
At Anchor	40	12

Facilities include two oily water separators of 10 tons per hour capacity and shore tanks of 800 tons and barge of 350 tons capacity.

Contact: Tel: 1-1522100/5. Telex: 24410 TRDZ. Fax: 1497415.

SEAMAN'S CLUBS: There is no seaman's club operating in the port, but the port is situated near the city, and all shopping, international telephone, some sporting activities, dances, transportation, and postage facilities are available there.

CURRENCY: Turkish Lira (TL).

SHIPMASTER'S REPORT: *Dardanelles and Bosphorus:* If a Pilot is required for both Dardanelles and Bosphorus, give 24 hours' notice through Istanbul Agent. Same Pilot remains on board for full transit, Sea of Marmara included, and this applies for both North and South-bound traffic. Pilots at Dardanelles and Bosphorus work VHF Channel 16.

Sanitary Control: Required at Buyukdere: Ship's Register, Derat, Crew List and certificate issued at Canakkale North-bound.

AUTHORITY: Turkiye Denizcilik Kurumu (Turkish Maritime Corporation), Genel Mudurluk, Karakoy, Istanbul, Turkey. *Tel:* 1433500. *Telex:* 22221 Dzb Tr, 22339 Dzy Tr. *Cables:* Denizbank Istanbul. *Contact:* Y. Izzettin Sen, Director of Ports. Ozden Dumanli, Assistant to General Manager.

(B) HAYDARPASA (ASIA)

DOCUMENTS:
7 copies Crew Lists.
4 copies Passenger Lists.
2 Lists of Passengers Landing in Istanbul.
2 Lists of Passengers in Transit).
2 copies Transit Cargo Manifest.
3 copies Inward Cargo Manifest. The original Manifest of Goods discharge at, or transhipment to, Turkish ports must be visaed the Turkish Consul at port of loading. In the absence of Turkis Consulate, the manifest must contain an endorsement made by local Authorities (Chamber of Commerce, etc.) to the effect that Turkish Consul is available.
1 set Bills of Lading.
2 copies Cargo Stowage Plan.
Health Documents
2 copies Stores Lists.
Ship's Certificates:
  Sanitary Declaration Form.
  Derat Certificate.
  Ship's Register.
  Load Line Certificate.
  Safety Radio Certificate.
  Safety Equipment Certificate.
  Cargo Ship Safety Construction Certificate.

PILOTAGE: Compulsory. Ordered by Agent on basis of Master's ET

Pilots meet vessels West of a line (Longitude 28° 57' 56" E.) passi through the light on the breakwater of Kumpapi Fishing Boat Harbou

Pilots are supplied by the Istanbul Harbour Directorate of the Turkis Maritime Organisations – TDI.

ANCHORAGES: The area to the South of Yenikapi lying betwe Longitude 28° 58' 36" E., passing through the Mosques of Sultanahme and Longitude 28° 55' 00" E. passing through Yedikule is reserved as free anchoring area for passenger and dry cargo ships.

MAX. SIZE: No limitations at the anchorage.

HEALTH: Master's are required to show vessel's Health Declaration a Certificate of Registry at Dardanelles. Ships which cannot be inspect at Dardanelles due to unfavourable weather conditions or oth compulsory reasons are reported by the Health Authority at Dardanell to the Health Authority in Istanbul by cable.

RADIO: Istanbul Radio, call sign TAH.
Izmir Radio, TAN.

VHF: Ship to shore communications on Channel 12.

TUGS: 5 tugs up to 2,500 h.p.
Vessels over 1,500 g.r.t. require one tug.
Vessels 1,500 g.r.t. – 5,000 g.r.t. require 2 tugs.

BERTHING:

Berth No.	*Length* (m.)	*Depth* (m.)	*Remarks*
2	220	6.0	General cargo
3	190	10.0	Dry bulk

20	50	6.0	General cargo
21	50	6.0	General cargo

There is also a silo of 70,580 tons capacity at the harbour.

CRANES/EQUIPMENT: 1 floating crane of 250 tons capac 2 container quayside gantry cranes of 40 tons capacity; 21 shore a yard cranes of 3 to 35 tons capacity; 4 reach stackers of 40 tons capac 9 transtainers of 40 tons capacity; 18 mobile cranes 5 to 25 t capacity; 6 container forklifts of 10 to 42 tons capacity; 54 general ca forklifts of 2 to 5 tons capacity; 19 tugmasters; 1 loader; 6 tract 25 trailers of 40 tons capacity; 10 trailers of 20 tons capacity.

CONTAINER FACILITIES: The space of the container terminal is ne 100,000 sq.m. The holding capacity of the container termina 6,000 TEU (both full and empty). The annual capacity, on the other ha is 144,000 TEU/year. In addition, there are 2 areas hired outside the for stacking the empty containers. A container freight statio 3,600 sq.m. is available behind the container quay. Another fa available at the port is the provision of reefer facilities for refriger containers.

RO-RO FACILITIES: A newly built Ro-Ro terminal is now in ser The Ro-Ro berth, which has 160 m. length with an alongside dept 8.0 m., can accommodate 360 ships per year, and can ha 410,000 tons of Ro-Ro cargo, 65,000 trucks (incoming and outgo and 60,000 cars a year.

BULK HANDLING FACILITIES: Berth No. 3 serves the dry bulk tr The length of the berth is 190 m. with an alongside depth of 8.2 grain silo of 34,000 tons capacity is available and has a com connection with the quay.

STEVEDORES: Working hours: 3 shifts, 7 days a week.
1st shift: 0800 hrs. – 1630 hrs.
2nd shift: 1630 hrs. – 0030 hrs.
3rd shift: 0030 hrs. – 0800 hrs.

Gangs ordered by Agent through the Port Monopoly 24 hours p arrival.

MEDICAL: Master to inform Agent by cable if urgent medical assis required on arrival, also indicating, if possible, seriousness of ca order to take adequate steps.

FRESH WATER: Supplied from hydrants on the berths.
FUEL: Available.
With 48 hours notice Petrol Ofisi can supply marine fuels, see "Section A".
CONSULS: 42 countries have Consulates in Istanbul.
REPAIRS: Welding and other minor types of repairs are possible under the Haydarpasa Port Directorate's control.
GANGWAY/DECK WATCHMEN: Watchmen services recommended. 3 shifts of 8 hours each.
OPENING/CLOSING HATCHES: May be opened/closed by ship's crew or by stevedores at tariff rates.
CUSTOMS ALLOWANCES: 50 cigarettes for each man going ashore. On board the vessel each man may hold 200 cigarettes and 1 open bottle wine/spirits out of bond.
REPATRIATION: Can be arranged.
AIRPORT: Istanbul Ataturk Airport served by international and domestic lines. Airport situated 20 km. from Haydarpasa Port.
HOLIDAYS:
Official Holidays: New Year's Day (from December 31st at 1200 hrs. and January 1st); National Sovereignty Day (April 23rd); Youth and Sports Day (May 19th); Seker Bayram (3.5 days), movable; Kurban Bayram (4.5 days), movable; Victory Day (August 30th); Proclamation of the Republic (from October 28th at 1200 hrs. to October 29th).
POLICE/AMBULANCE/FIRE: Police Control Office: 144 94 03; Ambulance: 354-383 (internal phone numbers of Haydarpasa Port), 338 10 10; Fire Brigades: Haydarpasa Port: 393-354-583 (internal phone numbers of Haydarpasa Port), 163 60 20.
IDENTIFICATION CARDS: Seamen's Book is sufficient.
WASTE OIL DISPOSAL: An oily water separator system is available with a capacity of 10,500 cu.m./year to clean bilge water in conformity with the IMO regulations.

SHIPMASTER'S REPORT: Customs and Health Clearance is performed at anchoring areas Kumkapi (if coming from Marmara Sea) and Buyukdere (if coming from Black Sea). All officials and agents arrive by boat and when clearance is given, the Pilot comes out. For vessels with cargo for the chemical works at Meda (2 miles S.S.E. of the main port) the procedure is the same except that a pilot is not required.

AUTHORITY: Turkiye Cumhuriyeti Devlet Demiryollari Isletmesi Genel Mudurlugu – Talatpasa Bulvari, Ankara, Turkey. *Telex:* 42571.

AGENT: Gulf Agency Denizcilik A.S., P.O.Box Karakoy 1230, Istanbul 80008, Turkey. Tel: (90-212) 2430708. After hours 2572898. Telex: 25517 ("GACU"). Fax: 2450107. Cables: "Gacshipping" – Istanbul.

IZMIR: 38.25 N. 27.09 E. (See Plan)

DOCUMENTS:
6 Crew Lists.
4 Passenger Lists.
2 Manifests of Transit Cargo.
3 Manifests of Inward Cargo, 1 of which must be legalised before arrival by Turkish Consulate at loading port.
1 set Bills of Lading.
1 set Cargo Stowage Plans.
2 Stores Lists.
Health Documents.
Ship's Certificates.
N.B. Ship's particulars form is to be filled in by Masters upon arrival at Izmir, and remitted to the Port Authorities.
PILOTAGE: Pilotage is compulsory and is provided by the Turkish Maritime Organisation (TDI). Masters must notify their Agents at least 12 hours in advance giving their ETA at Pelican Spit and ask for a Pilot.
Pilot can be contacted on VHF Channel 16.
ANCHORAGE: In the Outer Harbour, 300 m. outside Old Port breakwater, ample space for vessels to anchor. Cargo operations cannot be performed at anchor unless vessels have red label cargoes aboard for Izmir or in transit.
RESTRICTIONS: Docking of ships at the old port is not permitted during night, but ships can sail any time during night. At the new port, docking is permitted during night (weather permitting) also ships can sail any time during night. There are no tides at Izmir.
MAX. SIZE: Vessels of any size with a max. of 38 ft. draft can operate at Izmir. There is a pipeline for oil-carriers in the Gulf of Izmir where tankers with a max. draft of 33 ft. can operate.
In Old Port, length restricted to 165 m., max. draft 8 m.
HEALTH: Vessels to show their Sanitary Certificate – if available aboard – also their Registry. Presentation also of Vaccination Certificate of all the crew, if required by sanitary officials. Pratique is necessary on arrival even if the vessel has called at another port in the same country. Sanitary Certificate is required for live animals aboard. If quarantine (fumigation) of the vessel is necessary, very considerable time is lost, and expense incurred because vessel must proceed to Fumigation Station at Klazomene, located at about 20 miles from Izmir (in the Gulf of Izmir) where fumigation can be effected and bad cases hospitalised.
RADIO: Izmir Radio Station, call sign TAN. Istanbul Radio Station: call letters TAH.
VHF: Ship-to-shore communication is by Channels 16 and 12.

TUGS: Tugs are compulsory for vessels of more than 2,000 g.r.t. At Harbour Master's estimation, 2 tugs will be used for vessels over 4,000 g.r.t. in case of bad weather. Dues will be collected for each tug.
3×2,500 h.p. tugs available.
BERTHING:

Berth No.	*Length* (m.)	*Depth* (m.)	*Cargo Handled*
1	140	8.0	Passenger Vessels
2	190	10.5	Passenger Vessels
3 *	150	10.5	Dry Bulk/Ro-Ro

17 * -18-19	450	13.0	Containers/Ro-Ro
20-21-22	364	13.0	General Cargo

* Ro-Ro facilities available.
CRANES/EQUIPMENT: 1 floating crane with 100 tons capacity, 2 container quayside gantry cranes of 40 tons capacity (2 additional gantry cranes are under construction and scheduled for completion by mid-1994), 9 shore cranes of 3 – 15 tons capacity, 14 mobile cranes of 6 – 30 tons capacity,7 rubber tyred transtainers of 40 tons capacity, 4 reach stackers of 40 tons capacity, 12 container forklifts of 10 – 42 tons capacity, 25 general cargo forklifts of 2 – 8 tons capacity, 17 tugmasters, 15 tractors, 1 loader, 22 trailers of 40 tons capacity, 5 trailers of 20 tons capacity, 1 towing tractor.
CONTAINER HANDLING FACILITIES: The container terminal has 7 berths which have an alongside depth of 13.0 m. The total length of the berths is 1,050 m. The terminal covers an area of 152,000 sq.m. and the holding capacity is 7,047 TEU. Container operations at the quays are carried out by 2 gantry cranes of 40 tons capacity. The operations at the container yard are carried out by 6 rubber tyred transtainers and 4 reach stackers of 40 tons capacity, together with 12 container forklifts of up to 42 tons capacity. Reefer facilities for refrigerated containers are also available.
BULK HANDLING FACILITIES: Grain silo has capacity 76,000 tons. The conveyor can deliver between 2,500 and 3,000 tons in 24 hours.
Bulk ore loaded by grabs. Daily loading capacity per shift of 8 hours is between 750 to 1,000 tons.
STEVEDORES: *Working Hours:* 24 hours, 7 days a week.
1st shift: 0800 hrs. – 1630 hrs.
2nd shift: 1630 hrs. – 0030 hrs.
3rd shift: 0030 hrs. – 0800 hrs.
MEDICAL: Advance notice optional. There is a local English-speaking doctor for service on board vessels.
Hospitals: U.S. Military Hospital, French Hospital, Government Hospital (Memleket). Doctors available to board ships or patient to proceed to their clinics.
U.S. Military Hospital for emergency cases only.
TANKERS: Izmir is a discharge port for tankers. Socony Mobil Oil receives petroleum products in bulk through a pipeline at a distance of about 1 mile from their shore installations. Depth at the end of the pipeline is 33 ft. The pipeline is of 12 in. and the pumping is effected through a flexible hose of 10 in. at an average of about 450/500 t.p.h.
British Petroleum receives petroleum products at jetty where the tankers berth stern to with a max. draft of 23 ft. Pumping is effected by the vessel from her stern with a 6 in. flexible hose.
Petrol Ofisi receives petroleum products at their jetty. Vessels berthed stern to with a draft of 17 ft. Same procedure for pumping as for British Petroleum. The above three installations are located in the Gulf of Izmir opposite the new port of Alsancak.
FRESH WATER: Fresh water is available for drinking. The water is given both from dock or by barges (2×150 tons). Water is supplied by Port Monopoly. Delivery at the dock about 20 t.p.h. By barge about 40 t.p.h.
Two barges each of 200 tons capacity available.
FUEL: All kinds of fuel available subject to 24 hours' advance notice. Fuel supplied only against advance payment in free foreign exchange direct to Agent of the vessel.
With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron & B.P.). Telex: 29048 Bunk Tr. Tel: (1) 3382509, 3373686, 3378831, 3360636. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.
CONSULS:

REPAIRS: Ship's repair shops available: Denizcilik Bankasi (Turkish State-owned). Deck and engine repairs are possible.
DRY DOCKS: Floating dock, capacity 7,000 d.w.t.
GANGWAY/DECK WATCHMEN: Services of watchmen recommended. Three shifts of 8 hours per day.
OPENING/CLOSING HATCHES: This work can be carried out by crew. If carried out by stevedores the cost is charged to vessel.
CERTIFICATES:
Derat Certificate.
Registry.
Vaccination Certificates (if required).
Health Certificate.

CUSTOMS ALLOWANCES: 50 cigarettes for each member of the crew going ashore. Aboard the vessel each member of the crew is permitted to have one carton out of Bond. Wine and/or spirits: 1 litre for each member of the crew in an open bottle is permitted out of Bond. However, this allowance is to be kept aboard the vessel.
REPATRIATION: All facilities available for crew changes and arranging necessary repatriation.
AIRPORT: Izmir Adnan Menderes International Airport is 27 km. from the port. Airport is served by Turkish Airlines with 5 flights per day (local flights in connection with Istanbul International flights). Also 2 direct flights per week to Europe.
TIME: GMT plus 3 hours.
HOLIDAYS: New Year's Day (from December 31st 1200 hrs. to January 1st, 2400 hrs.); National Sovereignty Day (from 22nd April, 1200 hrs. to April 23rd, 2400 hrs.); Spring Day (May 1st); Constitution Day (May 27th); Sports Day (May 19th); Victory Day (August 30th); National Holiday (October 28th, 1200 hrs. to October 30th, 2400 hrs.); Sheker Bayram (3 days) movable; Kurban Bayram (4 days) movable.

On these days offices are closed. Work in port is allowed by paying 75% overtime to the S.T. wages. The overtime for the National Holiday (Oct. 29th) is paid 100% on the total regular overtime, which makes 300%. On the first days of Sheker and Kurban Bayram work aboard is not carried out.
POLICE/AMBULANCE/FIRE: Police, tel. 255460; Ambulance, tel. 252405; Fire, tel. 00.
TELEPHONES: It is possible to place telephones aboard vessels at the new port of Alsancak.
SHORE LEAVE: Crew members are allowed to go ashore with landing card.
IDENTIFICATION CARDS: Seamen's Book is sufficient.
REGULATIONS: Berths at the new port of Alsancak are obtained on basis of the time and date of arrival of each vessel. If the port is congested, vessels wait for their turn at anchor.
SERVICES: *Shipchandler:* General Ship Chandler Ltd. Co., Yahya-Erhan Varlikli, 1475 Sok 1/202, Alsancak, Izmir, Turkey. Tel: (51) 219756, 216088, 220948. Telex: 53195, 53761. Fax: (51) 630468. Branches at Aliaga and Gemlik. Services available: Deck, engine and cabin stores; fresh water; laundry and provisions.
DELAYS: During the active export season, some delays occur varying 1 or 2 days.
DEVELOPMENTS: New port of Alsancak to be extended during the next 2 years by the construction of a breakwater, docks, warehouses totalling a berthing capacity of additional 2 to 3 vessels, especially container vessels. 2 container cranes ordered.
AUTHORITY: General Directorate of Turkish State Railways (TCDD), TCDD Liman Isletmesi Mudurlugu, Izmir, Turkey. *Tel:* 90-232-4632252. *FAX:* 90-232-4632248.
AGENT: Gulf Agency Denizcilik A.S., P.O.Box 857, Izmir. Tel. (90-232) 4217270, 4217287. After hours 4224119. Telex 52371. Fax: 4220375. Cables: "Gacship" Izmir.

IZMIT: 40.46 N. 30.00 E.

DOCUMENTS: 5 Crew Lists, 2 Stores Lists, 2 Crew Declarations, 4 Cargo Manifests, 2 copies Bills of Lading, 2 Stowage Plans, Clearance from Last Turkish Port, Bill of Health, 2 Lists of Money in Ship's Safe, Tonnage Certificate, Safety Equipment Certificate, Safety Radio Certificate, Safety Construction Certificate, Load Line Certificate, Derat Certificate.
PILOTAGE: Compulsory pilotage from Darica to Izmit and vice-versa, also for berthing and unberthing. (For all movements in Izmit Gulf Pilot is compulsory).

Vessels proceeding to Izmit Port have to take Pilot when entering Izmit Gulf at Darica Pilot Station, located:
Approx. Lat. 40° 45' 18" N., Long. 29° 23' 18" E.
ANCHORAGES: Approx. position: Lat. 40° 44' 00" N., Long. 29° 52' 48" E.
RESTRICTIONS: Berthing at jetties at night time is at Pilot's discretion.
MAX. SIZE: No restrictions for vessels loading on roads, and no special restriction if vessel suitable to load/unload at the jetty of Seka Paper Mills where jetty length 70 m., depth varying between 24 ft. and 27 ft.
HEALTH: For vessels proceeding to Izmit Free Pratique obtained at Canakkale-Dardanelles or at Buyukdere-Bosphorus. Crew List and Derat Certificate required.
RADIO: Istanbul Radio Station.
VHF: Available only at Darica and Yarimca Pilot Stations, Channel 16.
TUGS: Compulsory towage for berthing and unberthing. The following number of tugs must be used during operations at Izmit Gulf:

500 to 5,000 g.r.t. – 1 tug
5,000 to 25,000 g.r.t. – 2 tugs
25,000 to 50,000 g.r.t. – 3 tugs
over 50,000 g.r.t. – 4 tugs

BERTHING: Only 1 jetty available at Izmit which belongs to Seka Paper Mills where 2 ships can berth at a time to each side of the jetty.
CRANES: No shore cranes available at the jetty.
BULK CARGO FACILITIES: No bulk cargo facilities. Vessels load minerals on roads, by ship's gear, brought alongside by barges with rate of 800/1,000 tonnes per day, working hours generally from 0800 to 2000.

At the jetty of Seka Paper Mills, working hours from 0800 to 1700 and 1700 to 2400. Generally paper and wood-pulp in bales discharged at a rate of 125/150 tonnes per shift per gang by ship's gear.
SPECIALISED CARGO HANDLING FACILITIES: None.
BRIDGES: None.
STEVEDORES: Private. See also "Bulk Cargo Facilities".

MEDICAL: Hospital and dental facilities are available.
TANKERS: No tanker facilities.
DENSITY: 1020-1022.
FRESH WATER: Available by barge, and small quantities available fro the jetty.
FUEL: Not available at Izmit, can be supplied by barge or coaster fro Istanbul.
FIRE PRECAUTIONS: None.
CONSULS: None.
REPAIRS: No repair facilities.
DRY DOCKS: None.
SURVEYORS: Cargo Inspectors and Surveyors available from Istanb and can be ordered to attend vessel at Izmit.
GANGWAY/DECK WATCHMEN: Not necessary. Ship's gangway use hatches...
HATCHES: Opening/closing hatches to be carried out by the crew.
CUSTOMS ALLOWANCES: Tobacco: 1 carton of cigarettes per wee each man. Spirits: 1 bottle of spirits per week, each man.
CARGO GEAR: Load/discharge effected by ship's gear.
REPATRIATION: Main embarkation/disembarkation Customs an Immigration formalities done at Istanbul but permission/formalities als required from Izmit Customs and Immigration.
AIRPORT: Nearest airport at Istanbul, approx. 130 km. from Izmit.
TIME: Local time GMT plus 3 hours.
HOLIDAYS: New Year's Day, Sugar Bayram for 3 days, Kurban Bayra for 4 days (both religious holidays and dates are changeable every yea 23rd April, 19th May, 30th August, 29th October are National Holiday Saturdays and Sundays official holidays.
POLICE/AMBULANCE/FIRE: Police: 211-10945, Ambulance: 21 11030, Fire: 211-00.
EMERGENCY CO-ORDINATION CENTRE: Police Headquarters: 21 10945.
TELEPHONES: No arrangements exist.
SERVICES: None.
BANKS: Only local banks.
STORING: See "Prelims".
1. Vessels can be stored by barge and truck.
2. Vessels can be stored by barges during loading or dischargin
3. Trucks can proceed alongside at berth.
4. Fork lift trucks not available.
5. Customs facilities required for storing. Agents assist.

SHORE LEAVE: Crew members allowed ashore, no shore pas required.
IDENTIFICATION CARDS: Seaman's Book is sufficient.
REGULATIONS: Nil. No visitors allowed aboard without permission.
DELAYS: No delays expected.
AUTHORITY: Izmit Seka Paper Mills. *Tel:* 211-31630. *Telex:* 3312 *FAX:* 23235, 20074.

MERSIN: 36.47 N. 34.38 E. (See Pla

PORT LIMITS: Inside the lines drawn from 36° 48' 00" N., 34° 37' 00" first 2 miles S.E., then N.E. to the land.
DOCUMENTS:
5 Crew Lists.
4 Passenger Lists.
2 Stores Lists.
2 Transit Cargo Manifests.
3 Inward Cargo Manifests, one of which must be legalised prior arri by Turkish Consulate at loading port; if no Turkish Consulate, sa to be certified by local Chamber of Commerce.
3 Outward Cargo Manifest.
1 each of the Bills of Lading accompanying Manifests.
2 Cargo Stowage Plans.

Ship's Certificates:
(a) Load Line Certificate.
(b) Passenger Ship Safety Certificate (g.r.t. over 150).
Cargo Ship Safety Construction Certificate (g.r.t. over 500).
Cargo Ship Safety Equipment Certificate (g.r.t. over 500).
Cargo Ship Safety Radio-Telegraphy Certificate (g.r.t. over 1,60
Cargo Ship Safety Radio-Telephony Certificate (g.r.t. over 300
Exemption Certificate.
(c) Tonnage Certificate.

(e) Derat Certificate.
(f) (According to MARPOL 73/78):
Oil Record Book I (g.r.t. over 150 for tankers, g.r.t. over 400 others).
Oil Record Book II (g.r.t. over 150 for tankers).
Certificate of Complience.

PILOTAGE: Compulsory for all vessels and available 24 hours. Ag orders Pilot through Port Monopoly Administration. Master to cable E notices 48 and 24 hours prior to arrival. Pilot boards vessel with ser boat hoisting red and white flag. Pilot boards vessel outside m breakwater. Shipmaster can use VHF station according to exis international frequencies. Usual international signals for requesting P
ANCHORAGES: Safe anchorage in open roads outside m breakwater.

Prohibited Anchorage:
1. Within the entrance canal of 14 m. depth marked by buoys.
2. Inside the circle of radius 2.5 cables length, with centre lighthouse at 36° 40' 45" N., 34° 38' 45" E.
3. North East open roads outside the line at 80° from green lightho towards the outside line of East breakwater.

RESTRICTIONS: Ships can anchor in open roads outside main breakwater at any time without Pilot. No night time restrictions for entry. Ships carrying more than 50 tons of explosives are not permitted to berth alongside.

The following are not permitted to enter Port:

Vessels over 9.0 m. draft between 16th December and 15th March.

Vessels over 9.5 m. draft between 16th March and 15th December.

Tankers over 12.0 m. draft between 16th December and 15th March.

Tankers over 12.5 m. draft between 16th March and 15th December.

Within main breakwater, ships exceeding 7.0 m. draft, and within the entrance channel, ships exceeding 9.0 m. draft, are not to operate engines. Ships below above mentioned drafts can only sail at low speed, unless force majeure. Ships over 1,000 g.r.t. cannot operate propeller within 50 m. of berths.

HEALTH: Clearance is effected on arrival. Vaccination Certificates to be presented if required. If suspected disease on board, radio Agents full details before arrival. Upon arrival, yellow flag on foremast during daytime, and one red light at top/one white light at bottom during night-time.

RADIO/VHF: Istanbul Radio, call sign TAH, Izmir Radio, call sign TAN, Mersin Radio TAM.

VHF Radio Telephone Channels 24 and 28, call Channel 16. Position of station: 36° 49' 00" N., 34° 36' 00" E.

M/F-R/T frequency: 2,820 kHz, call 2,182 kHz.

M/F-W/T frequency: 516 kHz, call 500 kHz.

Telephone: 9 741 13456, 9 741 23654, 9 741 26765 and 9 741 26766.

Radio messages to be routed to Agent, preferably via Istanbul Radio.

Telex communication always possible with Agent.

VHF communication possible with Agent through Channels 16, 68, 71, 74.

TUGS: 7 tugs available up to 3,200 h.p.

Tug Requirements:

Vessels 500 – 3,999 g.r.t.: One tug.

Vessels 4,000 – 14,999 g.r.t.: Two tugs.

Vessels over 15,000 g.r.t.: Three tugs.

Ship's lines are used.

BERTHING: Priority to Army, food relief and passenger ships. Second priority to Ro-Ro and Container vessels. If no berth available then ships to wait for turn in roads at anchor.

Quay	*Length* (m.)	*Depth* (m.)

No. 22 (Free Zone)	65	4.0
No. 23 (Free Zone – Oil Terminals)	270 (with dolphins)	9.2
No. 24 (Free Zone)	200	7.5

CRANES/EQUIPMENT: The equipment at the port includes 1 floating crane of 60 tons capacity; 5 quayside container gantry cranes of 40 tons capacity; 17 shore cranes of 3 to 35 tons capacity; 3 reach stackers of 40 tons capacity; 13 rubber tyred transtainers of 40 tons capacity; 18 mobile cranes of 5 to 25 tons capacity; 5 container forklifts of 10 to 42 tons capacity; 46 general cargo forklifts of 2 to 5 tons capacity; 32 tugmasters; 1 loader; 10 tractors; 43 trailers of 40 tons capacity; 9 trailers of 15 tons capacity; 10 trailers of 20 tons capacity and 2 pneumatics of 50 tons/hour capacity.

CONTAINER FACILITIES: The container terminal has 3 berths which have an alongside depth of 12.0 m. The total length of the berths is 710 m. The container terminal covers an area of 251,350 sq.m. The holding capacity at the container yard is 8,474 TEU (full and empty).

Container handling operations at the terminal are carried out by 5 quayside container gantry cranes of 40 tons capacity; 13 transtainers of 40 tons capacity; 3 reach stackers of 40 tons capacity and 5 container forklifts of 10 to 42 tons capacity. There are 2 container freight stations of 9,000 and 1,309 sq.m. Another facility available at the terminal is the provision of reefer facilities for refrigerated containers.

Also see "Developments".

BULK CARGO FACILITIES: Conveyor system available.

Loading rate: 1,200×2 = 2,400 t.p.h.

Discharging rate: 600×2 = 1,200 t.p.h.

Silo capacity: 100,000 tons.

STEVEDORES: Gangs of stevedores secured by the Agent through the Port Monopoly, to be ordered 24 hours prior to arrival, 7 days a week, 24 hours a day service.

Average discharging/loading rates:

100 tons per shift general cargo.

200 tons per shift bagged cargo.

150 tons per shift baled cargo

175 tons per shift bulk ore

Max. rate for ore 400 tons per shift if grab loading.

3 shifts per day (0800 hrs. – 1630 hrs., 1630 hrs. – 0030 hrs. and 0030 hrs. – 0800 hrs.).

Above are ideal rates, and may vary according to kind and stowage of cargo.

MEDICAL: Agent to receive advance notice if urgent medical aid is required on arrival. Hospitals, dental facilities and all other medical facilities are available.

TANKERS: *ATAS Refinery Terminal:* Depth in harbour channel and pier is 14.0 m. Max. LOA 299 m.

Tankers in ballast up to 15,000 d.w.t. may berth/unberth at any time, day or night. Other vessels manoeuvre in daylight hours only.

One finger pier, berths for 2 tankers at one time, 10 in. hose connections to 26 in. shore line. Loading rate 1,000 cu.m.p.h., discharge rate 1,500 cu.m.p.h.

DENSITY: Salt water 1025.

FRESH WATER: Fresh water supplied by barge (100 tons capacity), but otherwise by shore installation at the rate of 15 t.p.h.

FUEL: Most types of marine fuel and lubricants available for delivery to ships.

With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron & B.P.). Telex: 29048 Bunk Tr. Tel: (1) 3382509, 3373686, 3378831, 3360636. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

CONSULS: Belgium, Denmark, Italy, Sweden, United Kingdom.

REPAIRS: Small craft repairs possible.

SURVEYORS: Cargo Inspectors such as Lloyd's, SGS, etc., available.

GANGWAY/DECK WATCHMEN: Available and recommended.

OPENING/CLOSING HATCHES: Owners or Masters to decide whether this work should be undertaken by the stevedores or by the crew.

CUSTOMS ALLOWANCES: 600 cigarettes and 7 bottles wine/spirits per crew member.

CARGO GEAR: Generally shore cranes operated. However, ship uses her own means when such cranes are not available. Full lights to be supplied by ship.

REPATRIATION: Repatriation arranged by Agent.

AIRPORT: Adana Airport, 60 km. from the port, served only by domestic line THY-Turkish Airlines, with routes to Northern Cyprus (Ercan), Ankara and Istanbul, twice a day.

TIME: GMT plus 3 hours.

HOLIDAYS: Republic Day (October 28th afternoon, October 29th); New Year's Day (January 1st); Independence Day (April 23rd); Youth and Sports Day (May 19th); Victory Day (August 30th); Ramazan Bayram (Religious Holiday – 3 days); Kurban Bayram (Religious Holiday – 4 days).

Discharging/loading effected on all holidays except the first two days of Religious Holidays.

Piers in the Free Zone work on holidays.

POLICE/AMBULANCE/FIRE: Telephone numbers: Police 055; Ambulance 13555, 26770, 077; Fire 000.

TELEPHONES: No installation for connection on board.

SERVICES: Special services available through Agents and/or ship chandlers.

STORING: Vessels can be stored by trucks. Trucks can proceed alongside at the berths. Forklifts can be used on the jetty if needed.

SHORE LEAVE: Crew allowed shore leave. Shore passes are issued.

IDENTIFICATION CARDS: Seamen's Book is sufficient.

GARBAGE DISPOSAL: Collection service is available and drums or skips are provided on board. Contact Mesbas Mersin Free Zone Corp. Tel: 90-741-39575.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Turkish Lira (TL).

BANKS: Local/National/International Banks are available.

DEVELOPMENTS: In order to develop the port into a container distribution and collection centre, Berths No. 9 and 10 will be extended by about 270 m. with an alongside depth of 14.0 m. The construction works have already commenced. Berths No. 3 and 6 will be extended by about 175 m. in their own direction with an alongside depth of 12.0 m., and Berths No. 17, 18 and 19 will be expanded with an alongside depth of 12.0 m.

SHIPMASTER'S REPORT: February 1992.

Documentation: The vessel was cleared very quickly whilst at anchor by the Agent and one Customs Officer.

The Ship's Register and all certificates have to be presented to the Harbour Master.

Documents required were: IMO Crew List, Stores Declaration, Personal Effects Declaration, Inward Manifest and Transit Manifest.

Pilotage: The Pilot boards to seawards of the channel buoys, depending on weather, and on departure he leaves at the breakwaters. The pilot cutter has a black hull with white superstructure. There is one pilot on duty at all times and the shifts are from 0000 hrs. – 0800 hrs., 0800 hrs. – 1600 hrs. and 1600 hrs. – 2400 hrs. There are likely to be delays at change-over times.

The pilot is available on VHF Channel 12 throughout 24 hours.

Anchorages: Anchorage is to the S.W. of the breakwaters in position Lat. 36° 46' N., Long. 34° 39' E. This location is clear of the entrance channel. The anchorage is exposed to most winds and the holding ground is poor.

Vessel should be aware of the SPM gantry and storage tanker in position Lat. 36° 45.97' N., Long. 34° 41.35' E. At night, it looks like a normal vessel at anchor with normal decklights and no special navigation lights.

Depth: There is a table indicating drafts in the sailing direction, but this is a guide only and is not rigidly enforced.

The entrance channel inside the breakwaters, the turning area and the channel to the ATAS Oil Jetty is being dredged to 15.0 m. and the channel to the container berths and the Grain Silo Jetty is being dredged to 11.0 m.

When we were alongside Commercial Quay (Berths No.6 and 7), the sounding ranged from 8.4 m. – 10.6 m. (See "Plan").

Tugs: There are 3 modern tugs available, 2×3,500 h.p. and 1×2,000 h.p. Ship's lines are used with the long drift.

When berthing we used 1 tug, and when departing we used 2 tugs. In each case, the centre fairleads were used.

Restrictions: Vessels of less than 15,000 g.r.t. not carrying dangerous IMO rated cargoes can berth and unberth throughout 24 hours. Vessels over 15,000 g.r.t. and all vessels carrying dangerous goods can berth and unberth in daylight hours only (0700 hrs. – 1700 hrs.).

Berths: The container berths are now completed and are dredged to 11.0 m. There are 5 container cranes, 3 on the West Quay and 2 on the East Quay.

The Commercial Quay was very busy. Discharge of vegetable oils from parcel tankers is undertaken at this quay.

On Berth No.4, at the South end of the Commercial Quay, a depth of 10.0 m. is quoted. Vegetable oil tankers can berth at any berth on the Commercial Quay as portable gantries are used, depending on draft.

Cargo: The discharge of vegetable oil is slow.

On our visit, the discharge rate averaged 20 t.p.h. due to the vegetable oil in the road tankers freezing up on the journey to the plant in Andana which is 70 km. away.

Discharge is through 1×4 in. diameter rubber shore hose and ship's reducers, to portable gantry which covers 2 trucks. Each loading hose is 2.5 in. diameter.

If no other ship is discharging vegetable oil, 2 gantries can be provided with individual hoses, joined at the ship's side into 1×4 in. hose.

There are generally long stoppages waiting for trucks.

The maximum discharge rate with 2 gantries and no stops is about 100 t.p.h.

It was difficult to obtain information from the shore as to when trucks would be available.

Medical: Good medical facilities available.

Fresh Water: Fresh water is available at the quay at a rate of 10 t.p.h. Loading is through ship's hoses and no meter is available. The cost is U.S.$ 4.00/tonne.

The cost of water by barge is U.S.$ 5.00/tonne and supply is subject to a 3 mile limit outside the breakwaters. The service by barge is unreliable.

Surveyors: Lloyd's exclusive surveyor available.

Repatriation: Outward visas are required and must be obtained during normal office hours (not Saturday afternoon, Sunday or public holiday). Airport tax is to be paid in the currency of the passport holder (U.K.£ 5.00 or U.S.$ 10.00, German DM, etc.). Most third world countries pay in U.S.$.

Airport: The nearest airport is at Andana, which is the regional capital, and is 70 km. to the N.E. There are many flights to Istanbul and Ankara.

Weather: During Winter, the weather can be poor and there are often high winds from the North and East. Also temperature can drop below freezing at night. During the Summer, the weather is very hot and there are a lot of flies and insects about.

General: The standard of English spoken was fairly good.

The Commercial Quay is within easy walking distance of the city. Leather goods and gold jewelry of good quality are available.

Ship Chandler: Fresh produce is good and cheap when in season.

Waste Oil Disposal/Slops: The Harbour Authority has available a 5 ton road tanker for collection of slops. The charge for the use of this service is U.S.$ 480 for 1 tonne or 20 tonnes. Engine room bilge water only accepted.

AGENT: Gulf Agency Denizcilik A.S., P.O.Box 328, Mersin. Turkey. Cable Address: "Gacship" Mersin. Telex: 67141. Tel: (90-324) 2314961. After hours 2315059. Fax: 2320144.

NEMRUT BAY (including Foca): 38.46 N. 26.55 E.

(See Plan)

PORT LIMITS: Nemrut Bay is situated on the South side of the port of Aliaga (See "Aliaga"). It is the area between the mainland and a straight line drawn True North from Kizilburun which is situated in position: Lat. 38° 45' 00" N., Long. 26° 53' 50" E.

The Bay is divided into two areas, the inner port and outer port.

Inner Port: Is the area remaining between the imaginary line connecting the South end of the Petkim Petrochemical Complex's breakwater with Karacadogan Penisula situated in position: Lat. 38° 46' 10" N., Long. 26° 54' 22" E.

Outer Port: Is the area between interior port and Nemrut Bay boundaries.

DOCUMENTS: See "Izmir".

PILOTAGE: Pilotage is compulsory for all vessels arriving at Nemrut Harbour. There are 2 Pilot Stations at Nemrut Harbour.

(A) Petkim Pilot for Petkim Quays and Petrol Ofisi Quay.

Notice of ETA must be reported 72 hours, 48 hours and 24 hours before arrival to the Harbour Master's office at Petkim – Aliaga (Telex No. 51706, 51707, 51709. Fax. No. 0232-6161248, 6162490, 6161439. VHF Channel 16). Time must be in GMT.

VHF Channel 16 is continuously watched at Nemrut Pilot Station and ETA may be confirmed on this frequency.

The address of Pilot Station is as follows:

Petkim Petrokimya Holding A.S.
Aliaga Kompleksi,
Dis Alim Mudurlugu,
Aliaga – Izmir – Turkey
Tel: 0232-6163240 (8 lines), 6161240 (8 lines)
Telex: 51706, 51707, 51709
Cables: Petkim – Aliaga – Izmir.

In the ETA message, the following information must be indicated:

1. Name/call sign of vessel.
2. Nationality.
3. Agency.
4. Length overall, max. draft, gross tonnage, sailing draft and aft loading draft.
5. Nature of Cargo (In IMO).

Rendezvous point with Pilot is: Lat. 38° 47' N., Long. 26° 54' E., outer port. In the event of bad weather Pilot joins the vessel in inne port. Two pilot boats of 210 h.p. are available. Call sign of the boat "TCZJ".

(B) Nemrut Pilot for berths in Nemrut Bay (See "Berthing").

The address of the Pilot Station is as follows:

Uzmanlar Denizcilik Tic. Ltd., STI.
Ali Getinkaya Bulvari No. 2/2,
Alsancak,
Izmir.
Tel: 0232-6251274, 6251275.
Fax: 0232-4637644.

ANCHORAGES: Anchorage in the inner and outer ports is possib However, anchorage within the area of 5 cables diameter of middle interior port boundary is prohibited for safety of sea traffic (See "Plan"

RESTRICTIONS: Mooring to or sailing from the Petkim's Tanker Qua and Ege Gubre's Pier from sunset to sunrise time needs the permissio of Port Administration.

MAX. SIZE: See "Berthing".

HEALTH: See "Izmir".

RADIO: Complete MF/SSB type radio, 1.6 – 4.2 MHz Internation Navigation Code with 31 Channels capacity, radio transmitter 150-35 300-535, 700-1650, 1650-4250 kHz, and a 4 band SSB/AM receiver.

VHF: Communication within 20-25 miles with VHF radio operating 156 – 162 MHz band is possible. International navigational bands a used. Station listens on Channel 16. Call sign: "TAB".

RADAR: No radar facility.

TUGS: 2 tugs of 1,225 h.p. and 2,500 h.p. are available. Tugs normal join the vessel in the outer port. 2 additional tugs of 1,200 h.p. a 2,500 h.p. available in near future.

BERTHING: Quays at port of Petkim Petrochemical Complex situat on the Northern side of Nemrut Bay (See "Plan").

Berth No.	*Name*	*Length (m.)*	*Depth (m.)*	*Remarks*
1	Tanker Quay	163	7	Load/discharge lines:
2	Tanker Quay	175	10	6 in., 8 in., 10 in., 12 in. Constructed for loading/discharg various chemicals such as ammonia, benzene, fuel oil, ethylene oxide, ethylene glycols, chloric hydrocarbons, wash oil.
3	Caustic Quay	60	6	Loading lines: 8 in. for caustic, 4 for hypochloride.
4	Naphtha Quay	90	14	Out of service.
	Salt Quay	190	6	Constructed for discharge of salt be used at Chlorine Alkali Plant.
5	Tanker Quay	285	13	Load/discharge of naphtha, benzene, ammonia, caustic, fuel oil.
6	General Cargo Quay	338 (175+163)	10 – 7	Constructed for loading/discharg various petrochemical raw materials, products and equipme
	Petrol Ofisi Quay			Loading petroleum products.

Quays on the Eastern and Southern side of Nemrut Bay (See "Plan"

Ege Gubre Pier	122.90	12 – 14	Private jetty constructed for discharging/loading raw materia and products of fertiliser facility Rate 1,000 tons/day.
Limas Pier	154	12	Private jetty constructed for discharging/loading iron scrap iron products of Ironworks in Izmir.
Cukurova Pier	167	15	Private jetty constructed for discharging/loading iron scrap products of Ironworks in the si Also see "Shipmaster's Repor dated October 1992.
Nemtas Pier	210	7-21	Private jetty constructed for loading/discharging iron and s products of Ironworks at site.
Habas Pier	220	10-20	Private jetty for loading/ discharging iron and steel products.

CRANES: Fixed/mobile cranes are available at Petkim Petrochem Complex.

Lifting capacity of 2 cranes at Salt Quay is 3 tonnes each. Sa transferred by conveyor belt to the plant. One mobile crane of 270 to lifting capacity, 2 mobile cranes of 150 tonnes, 2 mobile crane 110 tonnes and 55 mobile cranes of 12 – 30 tonnes lifting capacit available.

Nemtas and Cukurova have mobile crane facilities. Limas has 2 cranes each with 10 tonnes lifting capacity. Ege Gubre has 1 × 1 crane.

BULK CARGO FACILITIES: See "Berthing" – Salt Quay and Ge Cargo Quay.

SPECIALISED CARGO HANDLING FACILITIES: Loading discharging lines of liquid chemicals available at Port of Petroche Complex (See "Berthing").

MEDICAL: Hospital near Petrochemical Complex.

TANKERS: See "Berthing".
FRESH WATER: Available at Petkim's Quays, Ege Gubre and Limas.
FUEL: Available at Petrol Ofisi Quay.
CARGO GEAR: Load/discharge can be effected by mobile cranes at General Cargo Quay (See "Cranes").
AIRPORT: Izmir Adnan Menderes Airport is approximately 75 km. from Petkim Petrochemical Complex.
TIME: GMT plus 2 hours in Winter. GMT plus 3 hours in Summer.
HOLIDAYS: *Official:* January 1st, April 23rd, May 19th, August 30th, October 29th.
Religious: "Bayram" days (Id-al-Fitr: 3 day, Id-al-Adha: 4 days) of Muslims (These dates are subject to visibility of new moon at Mecca).
POLICE/AMBULANCE/FIRE: Petkim has its own protection and medical units.
TELEPHONES: Available for national and international calls at Petkim.
BANKS: T. C. Ziraat Bankasi, Turkiye Is Bankasi, Akbank, Emlak Kredi Bankasi and Vakifar Bankasi in Petkim site.
SHORE LEAVE: Petkim's permission is needed at Petkim Quays.
IDENTIFICATION CARDS: The list of personnel leaving/joining the vessel should be announced to Petkim.
GARBAGE DISPOSAL: *Petkim:* Service can be ordered through Port Authority. Call "Nemrut Pilot" on VHF Channel 16. Service is free of charge provided vessel has Garbage Disposal Certificate, otherwise U.S.$ 45 per 1,000 g.r.t..
WASTE OIL DISPOSAL: *Petkim:* Ballast line available to waste treatment plant for ballast and slop disposal. Service is free of charge provided vessel has Disposal Certificate, otherwise U.S.$ 60 per 1,000 g.r.t..
SEAMAN'S CLUBS: None. Usual local facilities.
GENERAL: Piers and facilities at Nemrut Bay are owned by industrial companies located in this area.

SHIPMASTER'S REPORT: July 1980 (Updated 1992).
Port of Foca: Vessel discharged ammonia.
Approach: Charts: BA 1087, 1618.

The approach presents no real difficulties since good positions may be obtained from the coast either by radar or visual bearings. There was some haze on our approach but it did not pose a serious problem.
Berth: Consists of an "L" shape with the jetty being 125 m. in length. Distance to the foot of the jetty being about 300 m. The jetty is of concrete construction, standing on pilings and is fendered throughout with large tractor tyres. Ample mooring posts, although arrangements are not good for a vessel of this size.

There is a conveyor belt running the length of the jetty and to the shore plant. Two loading hoppers on the jetty. The Chicksan consists of a tall crane-like structure which is swung into position.

Connection: 6 in. 300 ASA. Shore provides 10 in./6 in. 150/300 reducer. The gangway may be swung out prior to arrival.
Density: 1028.
Discharge: Co-operation with the shore personnel very good, especially with the senior operators and managers. At a lower level language is the only problem. Shore personnel connect lines.
General: Fresh Water: Not available. (A vessel that visited at a later date reported that fresh water of good quality was available (metered) from a line amidships).

Fuel: Not available.

Officials: Officials are located in Nemrut Bay.

The same cargo surveyor attends the vessel at Gemlik, Foca and Mersin.

Since this was the second port of call in Turkey the vessel is issued with a travelling manifest to cover cargo and a carrier for ship's stores. The procedure differs from port to port but ship's bonded stores are sealed from arrival Turkey to departure, although visiting Customs enter on arrival at a port. We did not have any trouble requesting the bond to be opened prior to departure.

Doctor: Available at 20 minutes notice.
Repairs: Not possible.
Surveyor: Available.
Chandler: Available.

SHIPMASTER'S REPORT: September 1980.
Port of Foca:

To be read in conjunction with the previous report.
Approach: From the North (Dardanelles). 10 miles can be saved by going down 'Muslim Kanali' and 'Stenon Mitilimis' to the East of Nicos Lesvos (BA 1665) instead of going to the West of Lesvos.

There is one narrow spot but in two transits during September 1980 presented no problems at full speed. There is little traffic.

Southbound: Keep to North side of Muslim Kanali about 0.5 miles off Turkish coast to avoid Muslim Kaya shoals (beware of Southerly set).

Northbound: Once past Muslim Kaya shoals, turn W.S.W. to avoid any Eastbound traffic round Baba Burnu then 3 miles off Baba Burnu as required.

A further 8 miles can be saved from Dardanelles to Foca by using the channel to the East of Boscadda Island (BA 1608). The problem here is the shallow bank which may require a speed reduction. Not yet tried but the Pilots say quite safe. Approaching Nemrut Liman plenty of fixes can be obtained. With a Northerly or North Easterly wind the bay acts as a funnel and a considerable indraught occurs so care should be exercised so that the vessel does not get set in.

B.A. Chart No. 1618 should be held.

Approaching Nemrut Liman the construction work and breakwater at 'Petkim' refinery on the North side of the bay is soon apparent although at present the earthworks and tanks tend to blend in with the rather barren landscape.

The whole peninsula between Nemrut Liman and Aliaga Liman is in the course of development for a very large Petrochemical complex.

On the South side of the bay is a general cargo berth to seawards and the fertiliser/ammonia facility at the head of the bay. This facility is marked by a silver-pressure vessel. The Ammonia facility remains hidden by high ground until near the berth.

The vessel can be turned round inside the bay with ease in winds up to N.E. Force 4.
Pilots: Available on 24 hour basis from Aliaga Refinery. Boards either from tug or mooring boat. Gangway/pilot ladder should be 2 m. above water. Side depends on wind.

Pilot boards 1 mile N.W. of Karacadogan Burnu. He either drives across the peninsula to the new chemical berth and boards his boat there or comes by tug around the peninsula from Aliaga Refinery. On VHF Channel 16 when vessel expected. Reasonable English spoken. Pilotage one hour.
Tugs: Three tugs available. Two of 2,400 h.p. from Aliaga Refinery and one of 1,200 h.p. at the new chemical berth.

If there is any wind at all in the bay, two tugs are required both for berthing and unberthing. These should be ordered well beforehand through the Agent.

In my opinion two tugs are required at all times. Ship's lines used.
Berthing: Although on a 24 hour basis, I would not be keen to berth at night especially in Winter months due to the strong Northerly wind pushing vessel onto the berth.

Can berth port or starboard side alongside. For this size vessel (32,000 g.r.t.) port side to is the most suitable as leaving the berth is not hazardous as possibly starboard side to would be.

Vessel headed into berth at 90° with bow onto the N.W. corner. When about 2 cables off starboard anchor let go and the stern pulled round by tug.

Make sure stern tug (when vessel parallel with quay) pulls on starboard side otherwise stern will strike quay (September 1980).
Moorings: (See "Plan"). Back spring first forward, starboard buoy line first aft. Mooring boat available.
Berth: The fendering arrangements are poor. Consisting of large tractor tyres. The main problem is at the corners or knuckles where the tyres are strung too low to stop the bow or counter flare hitting the concrete (September 1980).

Protest noted in September 1980 about fenders. Operators say they will raise fenders and offer protection at corners.

Maximum air draft 14 m. in September 1980 call, we used the low loader, which was very beneficial.
Discharge: A discharge rate of 150 t.p.h quoted. Around the 200 t.p.h. is normal. July and September 1980.

On completion the shore personnel drain their line direct into the sea. All personnel engaged in uncoupling must wear full breathing sets. Cargo Engineer and Officer of the Watch went through three bottles each. (September 1980).

The facility has a storage capacity of 2,800 tonnes and a monthly consumption of about 1,500 tonnes.

Phosphoric and Sulphuric acids are also handled.
General: If second or third port, vessel issued with travelling manifest from previous port to cover cargo and ship's stores.

Be careful to retain Turkish Light Dues Certificate, if last port, for next Turkish call.

In addition to travelling manifests other papers required:
2 Crew Currency Lists.
2 Crew Declarations.
6 Crew Lists.
1 Vaccination List.
1 List of Cash in Ship's Safe.
1 Health Declaration.
2 Lists of Ship's Particulars (Turkish Form).
2 Lists of Previous Ports.
6 Copies of Cargo Manifests (to be stamped at previous port if Foca second or subsequent port).

SHIPMASTER'S REPORT: October 1987.
Chart: B.A. Chart No. 1618.
Documents:
8 copies Crew List.
2 copies Crew Declaration.
2 copies Manifest.
1 copy Health Declaration.
8 copies Cargo Manifest.
Approaches: Good positions are obtained on approach. Crude carriers generally berth in Aliaga Bay, product and gas vessels in Nemrut Bay.
Pilotage: Pilot is based at the Dock Office of the Petkim Refinery in Nemrut Bay. Pilots also undertake berthing at other Nemrut Bay berths.

Pilotage is available 24 hours but in general pilotage not available between the hours of midnight and 0600 hrs. for berthing.

Pilot boards from a small black hulled cutter. Excessive use of the tug and anchor was made.

The Pilot boards 0.5 miles west of FL.R. light on Petkim Breakwater.

Prior to arrival Pilot may be contacted by Telex No. 607 53950 PETE TR and on approaching may be contacted on VHF Channel 16.
Anchorage: There is a prohibited anchor circle on BA. Chart No. 1618 but this does not seem to be observed. We found a good anchoragecables west of the FL.R. light of Petkim Breakwater. In October 1987 there were many ships at anchor.
Tugs: There are two tugs on standby (1 x 1500 h.p. and 1 x 2,500 h.p.) at Petkim Dock and they require 15 minutes notice. Ship's lines used.
Berthing: At Petkim Refinery in Nemrut Bay there are 6 berths. There are 3 berths for product and gas ships. 1 berth for Naphtha (vessels berth stern to), 1 berth for caustic soda and 1 general cargo berth. The two product berths are on the N.W. side of Petkim Dock and the general cargo berth is on the S.E. side.

The water depth in the dock is about 30 ft. although there is more water at the outer end.

The product berth which is on the outer side of the N.W. breakwater was damaged by Winter storms and was out of use.

We berthed head in port side to at the product/gas berth and used the offshore anchor. Moorings consisted of 2 head/stern lines, 1 breast line and 2 springs at each end. The berth was well fendered. Ship's gangway used.

Cargo: A full range of gases are handled for import and export, including ethylene. Also many chemicals and products are handled.

We discharged propylene with back pressure of 12 Bar (Maximum back pressure allowed 20 Bar) at 50 t.p.h., heater discharge to +5°C. We used a 6 in. Chicksan arm for liquid and a 4 in. hose for vapour return line.

We believe 4 x 4,000 cu.m. spheres used for storage of pressure gases. The Terminal and Surveyor were very helpful. Hot vapour pumped ashore on completion. The English spoken was fair.

Fresh Water: Fresh water is available from Petkim Dock and at a good rate. Shore hoses used.

General: Nearest airport is at Izmir with flights to Istanbul and Ankara.

Ship chandler available locally.

There are 4 berths on the West side of Nemrut Bay. One berth being for ammonia (Foca) and 3 for steel, scrap and finished exports.

SHIPMASTER'S REPORT: October 1992.

Berth: Cukurova Jetty.

Cargo: 46,000 tons of scrap steel.

Documents: Copies of all the ship's main classification certificates, including the IOPP Certificate. All certificates must be valid.

6 Crew Lists.	1 Cargo Plan.
2 Crew Declarations.	1 List of Medical Drugs and Narcotics.
2 Bonded Stores Lists.	Photostat of the Master's Passport.
2 General Declarations.	

General: On arrival, no berth was available for our 60,000 ton displacement vessel, which was the largest to enter here. In order to offset harbour dues, which for our ship was $ 17,000, we dropped anchor in position outside of port limits in 38° 45.8' N., 27° 53.2' E. (B.A. Chart No. 1618). Northwest winds were strong at times, up to Beaufort Force 7, but even with 8 shackles of chain out the ship held well. The sea bed was found to be light grey ooze/mud.

Density of the water was found to be 1028.

Berthing at Berth No. 4 was done with the assistance of 2 tugs of 1,200 h.p. and 2,200 h.p. All vessels drop the outboard anchor prior to coming alongside.

The jetty is well fendered, and as our vessel was 213 m. LOA, and the berth being 185 m. in length, quite a considerable overhang had to be made to allow vessel alongside. Mooring is assisted with the aid of a lineboat.

The depth of water was sounded after berthing and found to be 30.0 m., forward and aft.

Cargo operations were very fast. Shore labour drove the vessel's 6 cranes, and daily discharge was rated at 5,000 tonnes per day. The cargo is dropped into adjacent hold hoppers on the jetty and into awaiting trucks. Damage to the ship was minimal, but whatever was noted, was repaired by Cukurova's own welders prior to departure.

The grabs for the crane of approximately 4.0 cu.m. are also supplied by Cukurova, and these are electro-hydraulic type, the power source being derived from the ship's power supply of 440 V., to junction boxes at each hold. Care must be taken with the run of electric cables being subject to rupturing by falling scrap metal.

NOTE: The vessel must sail within 2 hours of the completion of the final draft survey, otherwise the ship will be charged with a further day's port dues.

Fuel is available by barge from either the Petkim Jetty or from Istanbul, but plenty of notice is to be given.

Fresh water is available at the anchorage, at $ 20.00 per ton. At the berth, it is available by truck at prices ranging from $ 3.00 – $ 10.00 per ton, depending upon the chandler.

Provisions are plentiful, especially local fruits, vegetables, etc., but imports are expensive.

In our case, we had to have hydraulic hoses made up for the cranes at 300 Bar pressure, and these were very expensive.

There are no medical facilities at Nemrut Bay, the nearest being in Aliaga, 20 minutes drive from the berth.

Nemrut Bay is strictly a steel work jetty/works. There is nothing else here, nor is there any connected telephone lines, but Agents are equipped with mobile telephones for communications. Other than that, there is always Aliaga Radio on VHF, which is quite good.

FINAL NOTE: There is no limitation as to how much liquor or tobacco the crew have. Customs Officers will seal the bond on arrival, and will not open the same until the vessel is about to sail, when they will ascertain that the declared contents have remained in tact.

AUTHORITY: Petkim Petrokimya Holding A.S., Genel Mudurlugu, Aliaga, Izmir, Turkey. *Tel:* 0232-6163653 (Port Director's personal telephone). *Telex:* 51706, 51707, 51709. *Cables:* Petkim, Aliaga, Izmir, Turkey. *FAX:* 0232-6161248, 6162490. *Contact:* Mr. Semih Timocin, Port Director/Harbour Master.

SAMSUN: 41.21 N. 36.34 E. (See Plan)

DOCUMENTS:
6 copies Crew List.
6 copies Passenger List (if any onboard).
Customs:
2 copies Crew List.
2 copies Stores List.
2 copies Personal Effects List.
Health:
Valid Derat Certificate.
Maritime Declaration of Health.
1 copy Crew List.
Immigration:
2 copies Crew List.

PILOTAGE: Harbour Pilot compulsory for all foreign vessels. Orde by Agent subject to vessel's advance notice of ETA.

ANCHORAGE: Good anchorage in the Outer Harbour.

VHF: Samsun Radio (TAF) on Channel 16.

TUGS: 4 tugs abvailable. 1×970 h.p., 1×450 h.p., 1×1,500 h.p. an 1×2,480 h.p.

Vessels over 500 g.r.t. are required to use 1 tug.

Vessels over 4,000 g.r.t. are required to use 2 tugs.

BERTHING: Harbour protected by two breakwaters, entrance wid 200 m., depth 11.9 m.

Berth No.	*Length* (m.)	*Depth* (m.)	*Remarks*
1, 2	326	10.5	Dry Bulk
3	150	10.5	General Cargo
4, 5	300	10.5	General Cargo, Passenger, Ro-Ro
6, 7	400	12.0	General Cargo
9	400	6.5	General Cargo
10	180	6.0	General Cargo

CRANES/EQUIPMENT: 17 shore cranes of 3 – 35 tons capacity; 2 yar cranes of 10 tons capacity; 8 mobile cranes of 5 – 25 tons capaci 20 general cargo forklifts of 2 – 5 tons capacity; 2 tugmasters; 1 loade 4 crawler cranes of 8 – 10 tons capacity; 5 tractors; 3 trailers of 40 to capacity; 6 trailers of 20 tons capacity and 1 pneumatic of 50 tons/ capacity.

CONTAINER FACILITIES: The port has ample storage areas containerised cargo. Containers are loaded and discharged by a gener purpose shore crane of 35 tons capacity.

BULK HANDLING FACILITIES: There are berths serving dry bu cargoes with a length of 326 m. and with alongside depths of 10.5 An ore conveyor system at the port operating at a rate of 700 t.p.h. available for vessel loading.

STEVEDORES: Available 24 hours, 7 days a week in 3 shifts:
1st shift: 0800 hrs. – 1630 hrs.
2nd shift: 1630 hrs. – 0030 hrs.
3rd shift: 0030 hrs. – 0800 hrs.

DENSITY: 1013, but changes according to season.

FRESH WATER: Available from the quay.

FUEL: Available.

With 48 hours notice Petrol Ofisi can supply marine fuels and lubrica (Mobil, Shell, Chevron & B.P.). Telex: 29048 Bunk Tr. Tel: (1) 33825 3373686, 3378831, 3360636. Mailing address: Petrol Ofis Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

REPAIRS: Minor repairs possible.

SURVEYORS: Available.

GANGWAY/DECK WATCHMEN: Usually ship's crew and shi gangway.

OPENING/CLOSING HATCHES: Usually by ship. Can be carried by shore personnel is required by Master.

CERTIFICATES: Safety Construction, Safety Equipment, Load Li Safety Radio, Hull Class, I.O.P.P. and International Tonnage Certifica are required. Garbage Pollution Prevention Certificate, if vessel has o

CUSTOMS ALLOWANCES: 10 packets of cigarettes per man, per we and 1 bottle per man per week.

POLICE/AMBULANCE/FIRE: Available in the port.

AIRPORT: Distance 5 km.

IDENTIFICATION CARDS: All Passports (except Master's) are collect by Immigration in exchange for shore pass during vessel's stay in Port.

WASTE OIL DISPOSAL: An oily water separator system is availa with a capacity of 6,700 cu.m./year.

DEVELOPMENTS: New bulk cargo quay under construction. Len 500 m., depth 12 m.

SHIPMASTER'S REPORT: October 1993.

Agents: The Agents (located in Istanbul) were found to be helpful a make all arrangements for Pilots for Dardanelles, Bosphorus and p entry.

A representative from Istanbul remains in the port for the duratio the vessel's stay.

Agents maintain VHF watch on Channel 16 throughout the vess stay during working hours and at other times when vessels are expec or by arrangement.

Communications: Arrival Notices were sent through the Agents, made arrangements for Pilots and berthing.

VHF contact was attempted about 2 hours before arrival at anchorage, but no reply was received until about 6 miles (30 minu off, when contact was made with the Agents.

Pilots for transit of the Dardanelles and Bosphorus were reques through the Agents and Pilot Stations.

Approaches: B.A. Chart No. 1274.

Found to be as charted, the breakwaters are a good radar targe

Anchorage: The bottom on approaching is steep to, and anchorage and North of the inner harbour entrance would be on a steep rising b

This vessel anchored about 7 cables from Kuzey Menderik (bearing 310°(T) and lay comfortably overnight in calm weather. The recommended that large vessels anchor about 6 cables S.E. o harbour entrance.

Small local vessels anchor within 1 cable of the Dogu Menire close in fact that it was considered from their radar echoes at nigh they were wrecks.

Pilotage: The Pilot boards at the anchorage and will check the dr deep draft vessels before boarding.

For large vessels, tugs are made fast forward and aft using s lines, immediately after weighing anchor.

Large vessels are handled carefully and it is likely that both or anchors will be used to stop the bow swinging at some time durin approach to the berth.

On departure, 2 tugs are also used with ship's lines, the ste being let go after turning round in the harbour and the forward tug let go between the breakwaters.

This vessel berthed port side to the Industrial Quay (See "Pla

Depths: Maximum draft for the port is 10.5 m., checked by the Pilot before boarding.

The echo sounder showed 0.7 m. under the keel at a draft of 10.42 m. at a point between the breakwaters, off Dogu Mendirek Head.

Depths in the harbour were not recorded due to very poor echo sounder trace, but would appear to be not much more than 11.0 m. at any point.

The depths alongside the Industrial Quay were checked by hand sounding line and showed 10.0 m. at a point about 300 m. from the North end of the quay (See "Plan").

The density of water at draft survey alongside was 1011, but the surveyor gave his opinion that outside it was closer to 1025.

Clearance: Mainly carried out by the Agent. Only Customs and Immigration officials boarded and clearance given with the minimum of fuss.

Shore passes are issued for each crew member and passports are taken by Immigration, and are returned before departure when the shore passes are handed in.

Bonded stores are sealed.

The Agent requests photocopies of certificates after arrival, to complete the clearance ashore:

1 copy Tonnage Certificate.
1 copy Safety Equipment Certificate.
1 copy Safety Construction Certificate.
1 copy Load Line Certificate.
1 copy Safety Radio Certificate.
Minimum Safe Manning and Class.
4 copies of I.O.P.P.

Clearance Outward is similarly civilised, the bond stores remain sealed until the vessel clears the Dardanelles, unless calling at other countries in the Black Sea.

Berth: Industrial Quay: The quay is equipped with one crane of 35 tonnes SWL, one crane of 5 tonnes SWL and 3 cranes of 10 tonnes SWL. The 10 tonne cranes are fitted for grab discharge and single lift and the others are single lift.

Cargoes handled on this quay are bulk, containers and scrap.

Containers are stored on the North end of the quay and are removed either by road or rail and are loaded using the 35 tonne crane.

Grabs are available for handling bulk and scrap with the shore cranes, and grabs are available for use on ship's gear provided they are not in use elsewhere.

The face of the quay is protected by tyre fenders around a wooden core at about 50 m. intervals, some of which are missing, the spaces between by single tyres.

Height of the quay above the water is 1.8 m.

The cranes are close to the dock side and all overside projections should be brought inboard before berthing.

A rail-ferry ramp has been constructed at the North end of the Industrial Quay with an associated berth on steel piles, extending about 200 m. Northwards (See "Plan"). The ramp can be raised and lowered over approximately 5.0 m. range to a height of about 5.0 m. above water level with hyraulic rams, and is connected to the railway system by a single track. It can also be used for road transport. Depths alongside this berth were not checked.

Works in progress (1990), marked on the chart at the Southern end of the Inner Harbour, have not progressed and the Agent reported that nothing was proposed for the area in the near future.

Ship Chandler: There is no official chandler in the port, but fresh provisions can be arranged locally through the Agent. Istanbul chandlers will supply at Samsun, generally through local suppliers for available produce, but prefer to supply when passing through the Bosphorus, which avoids transport charges. Local supplies are limited and if possible it is better to take stores passing Istanbul.

Fresh Water: Available from the berths, the reported price being U.S.$ 7.50/tonne.

Ship's Spares and Mail: Shipped in by airfreight to Istanbul and took a week to clear Customs and arrive on the vessel. It was expected that the vessel was to load at another Black Sea port, otherwise this consignment would have been left at Istanbul for delivery on passing through the Bosphorus. Mail could have been sent to Samsun, but in this case it was covered by the same manifest as the spares.

Surveyors: Lloyd's and other class surveyors are available from Istanbul. Draft surveyor for cargo also comes from Istanbul.

Cargo Work: Discharge of 38,600 tonnes of coal in bulk was carried out using grabs on shore cranes, initially landing direct to trucks, but later landing on the quay to be loaded into trucks by payloader.

A daily rate of about 4,000 tonnes was achieved using all 3 bulk cranes for most of the time, except for about 2 days when another vessel was discharging.

Best day's work with 3 cranes was 5,618 tonnes and worst day was 3,221 tonnes. There were numerous delays for grab and crane breakdowns and a short delay for fog.

Cargo working is 24 hours in three shifts.

Payloaders for use on board and on the quay were provided by the receivers.

It was reported that this was an exceptionally good out-turn rate, the receivers spending a good deal of time and effort in persuading the stevedores to work as hard as possible.

Discharging rates are quoted by the Agent as U.S.$ 6.00 per tonne for bulk cargo and U.S.$ 8.00 per tonne for general cargo, with no difference for overtime or weekend working.

Discharge was delayed due to Customs problems as the cargo was to be removed from the Industrial Quay bonded area for storage in another bonded area and documentation had to be arranged.

All trucks were passed over a weighbridge before leaving the Industrial Quay area, the shore figure arrived at from this weighing was about 100 tonnes short of the draft survey figure. However, at a rough estimate, about this amount remained on the dock side on the vessel's departure.

Departure: Vessels are allowed 3 hours alongside after completion of cargo before penalty charges are imposed. This will be extended if the Pilots will not take the vessel out in darkness.

Generally arrival and departure is in daylight only, but it is at the Pilot's discretion if vessel movements are undertaken during darkness.

Time: GMT plus 2 hours. GMT plus 3 hours from last Sunday in March until Saturday before last Sunday in September.

TUTUNCIFILIK: 40.45 N. 29.47 E. (See Plan

SHIPMASTER'S REPORT: July 1981.

LOCATION: TUPRAS berths are situated just South of the 'Petkim chemical complex at Yarimca (See "Yarimca"), as before the railwa seems to be the dividing line between TUPRAS and PETKIM.
PILOTAGE/APPROACHES: See "Yarimca".
TUGS: Three tugs generally used. 1 Government and 2 TUPRAS. A large and powerful but rarely use their full power.
As a rule tug's lines used for berthing and ship's lines departing.
BERTHING: For LPG carriers, 2 berths are used. Also refined produ carriers use same berths. Crude is imported to a sea island for VLCC and on the original old jetty for smaller tankers.
The original jetty for all tankers is at the Southern corner of the refiner at Kilier Bar. This is not now used for LPG.
A new berth constructed in 1979/80 is now open 0.5 miles North the old jetty. At present only the North side of the new jetty is use (No. 2) but soon the Southern side will be in use for all larger vesse for all grades.
The new berth is of modern concrete pile construction with a roadwa out from the shore taking the pipes, with the berths leading off at 4 with 4 mooring/fender dolphins to seaward, connected by catwalks.
Draft alongside both berths is 18 m. with 3 m. clearance. Fenders an mooring arrangements are good.
Vessels generally berth head in, so can go either side alongside.
A small tug jetty is at the root of the main jetty.
See "Plans" for dimensions and general layout of all berths.
Mooring: Mooring boat used. 3, 2, 2, each end with line up very precis Bow comes near the end of the jetty where it bends at 45° to a roadwa
CARGO HANDLING: *Discharge:* Valves shut against ship witho warning, high back pressure – 7.5 to 8 bar., and line draining completion non-existent. 8 in. rubber discharge hose 150 ASA.
No vapour return line as yet, and cannot see one on jetty, but one old jetty suddenly appeared with TUPRAS wanting to return benzene the ship.
5×10 in. Chicksans for refined products on North side.
5×12 in. Chicksans plus 2×16 in. Chicksans on South side.
Control hut at seaward end of roadway with telephone and a coup of operators.
Rate 250 – 300 t.p.h. when all shore valves open.
FRESH WATER: Available.
DENSITY: 1017.
SURVEYORS: Employed by Turkish Survey Bureau.
GENERAL:
Gangway: Can be a problem due to dolphins. We used accommodat ladder with half BOT gangway section between bottom platform a dolphin.
Customs/Immigration: Customs Officer on board requires ro continuously.
Facilities: Agent very helpful. Personnel change through Istanbul Air without too much difficulty.
Curfew in force from 2400 hrs. to 0500 hrs. for ship's crew, 0200 h to 0500 hrs. for local population.
Overseas telephone calls delayed about 2 hours during weekdays a 30 minutes at weekends.
Lloyd's Surveyor from Istanbul – to be arranged 24 hours in advan Medical facilities from TUPRAS or local doctor through Ag Izmit about 30 minutes by taxi/car.
General stores, apart from some fresh provisions, are difficult to obt

SHIPMASTER'S REPORT: January 1986.

DOCUMENTS:
6 Crew Lists together with passports for all persons onboard.
2 Lists of Provisions, Stores and Bunkers.
2 Manifests of all cargo onboard.
2 Crew Effects Declarations.
2 Declaration of all Money and Cheques carried in ship's safe.
2 Maritime Declarations of Health, one form supplied on arrival, form supplied at Canakkale or Buyukdere when passing inwards.
PILOTAGE: Compulsory Pilot inwards at Darica Burnu. VHF co possible. Call Darica Pilots on VHF Channel 16 normally wo Channel 14.
Pilot boards from small tug, ladder should be about 1 m. above water. Tug equipped with VHF but personnel only Turkish-speakin
The Pilot berths all vessels at all Gulf of Izmit ports.
Pilots depart either off Darica or off berth depending on employments and vessel's size.
Pilotage operates 24 hours.

APPROACHES: See B.A. Chart 497.
ANCHORAGE: The anchorage is situated to the Northwest of the berths, off Yarimca. Pilots consider it safe for any size of vessel.
MAX. SIZE: Max. draft 18 m. (59 ft. 00 in.) permitted at the new berth according to the Pilots.
TUGS: Up to 5 tugs used when berthing at Sea Island. 3 government and 2 TUPRAS. (TUPRAS tugs 2,500 h.p. each).

All tugs are large and powerful but rarely use their full power.

At the other berths three tugs generally used.
BERTHING: For LPG carriers 2 berths are used, also refined products carriers use the same berths.

Crude is imported to a Sea Island for VLCCs and to the original old jetty for the smaller tankers.

The original jetty is at the Southern corner of the refinery at Kilier Bar. A new berth has been constructed some 0.5 mile North of the old jetty. The new berth is a modern concrete pile construction with a roadway out from the shore taking the pipes, with the berths leading of at 45° with 4 mooring/fender dolphins to seaward, connected with a catwalk.

Vessels berth on both sides of this jetty, generally head in. Fender and mooring arrangement is good. This jetty is used for LPG and refined products.

The Sea Island consists of a platform with three dolphins on each side. There are no connections between the platform and the dolphins. Fendering and mooring arrangements acceptable for tankers of 150,000 d.w.t.

Vessels normally berth port side to at the Sea Island.

2 mooring boats are used for rope handling.
CARGO HANDLING: *Discharge at New Berth:*

Valves shut against ship without warning, high back pressure – 7.5 to 8 Bars. Line draining at completion non-existent.

8 in. rubber discharge hose, (150 ASA).

No vapour return line.

5×10 in. Chicksans for refined products on North side.

5×12 in. Chicksans and 2×16 in. Chicksans on the South side.

Control hut at seaward end of roadway with telephones and operators.

Rate 250-300 t.p.h. when all shore valves opened.

Discharge at Sea Island:

4×16 in. Chicksans for crude. 3 normally connected. Generally low back pressure, but at times, when topping up of shore tanks, discharging rates reduced considerably.

Loading Masters have Control Room at platform. Communication with them by VHF. Communications sometimes difficult due to language problems. One representative of TUPRAS stays onboard throughout discharge.
DENSITY: 1017.
FRESH WATER: Available at all berths.
FUEL: With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron & B.P.). Telex: 29048 Bunk Tr. Tel: (1) 3382509, 3373686, 3378831, 3360636. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.
SURVEYORS: Employed by Turkish Survey Bureau, Katoni Persa or other local Turkish companies.
GENERAL:
Gangways: Can be a problem at the new berth, due to dolphins. At Sea Island, gangway from the platform.
Telephone: Overseas calls delayed about 2 hours during weekdays and about 30 minutes at weekends.
Lloyd's Surveyor: Comes from Istanbul. Has to be arranged 24 hours in advance.
General Stores: Apart from fresh provisions, difficult to obtain locally. Can be arranged from Istanbul but transportation costs are high.
Fuel: Available by barge only. It is more economical to anchor off Istanbul for fuel. All fuel supplied from Istanbul.
Airfreighted Stores: No difficulty with getting items onboard. If spare parts are to be taken onboard, items that cannot be carried will be put on a barge. Transportation costs are high.
Pollution: Strict anti-pollution laws in operation.
Facilities: Curfew has been in force earlier for ship's crew. In January 1986 no restrictions in force.

AUTHORITY: TUPRAS-Izmit Rafinerisi Bolge Mudurlugu, P.O.Box 43, Izmit, Turkey. *Tel:* 31660-31665, 20330-20333. *Telex:* 22285, 33152, 33153, 33154. *Cables:* Umipras, Izmit.

Izmit Liman Baskanligi, Yarimca, Turkey. *Tel:* 90-211-73754. *Telex:* 33292. *Contact:* Atilla Gorgunler.

YARIMCA: 40.45 N. 29.45 E. **(See Plan)**

SHIPMASTER'S REPORT: November 1980 (Updated 1994).

Petkim is an Industrial complex at the entrance to the Gulf of Izmit, near Yarimca. It includes the factories of Petkim to the North and TUPRAS to the South (See "Tutuncifilik"). As far as can be gathered the railway line is the dividing line.

A wide range of oils, chemicals, gases, bulk fertilisers and chemicals are handled. The Products Pier which handles ammonia is in position Lat. 40° 45.4' N., Long. 29° 45.1' E., close by is a bulk handling berth with a solid quay face.

The area in general is one of the main trading areas for overseas shipping in Turkey.

To the North West of the Refinery at Yarimca is Hereke, another important shipping complex.

PILOTAGE: Compulsory Pilot inwards at Darica Point. VHF contact may be possible. Izmit Pilot Office which is the control centre works on Channels 14 and 12.

Proceed to position off Darica Point and sound 'G'. Pilot boards from small tug and the ladder should be about 1 m. from the water.

The Pilot berths all vessels at all Gulf of Izmit ports.

Pilot departs either off berth or at Darica, depending on other pilotage requirements and curfew. Pilotage operates 24 hours.
APPROACHES: See B.A. Chart 467.
TUGS: Two Government tugs available, 1×2,000 h.p. and 1×2,500 h.p. If additional tugs are required they come from Istanbul. For IPRAS refinery only, there are 2 tugs of 2,500 h.p. Tugs generally use ship's line. Tugs rarely use all their power.
BERTHING: Berthing and unberthing throughout 24 hours. The berth is the usual type of tanker berth consisting of a 'T' shaped jetty at the end of a pipeline roadway. There are dolphins connected by catwalk to main pier, plus further isolated mooring dolphins about 50 m. off inner dolphins.

Mooring Arrangements: Hydraulic hook release system in use.

Dolphins have good fenders and ship's centre section stands off jetty face. After dolphin (if port side to) comes on counter. Generally port side to due to anchored vessels, making starboard approach difficult. But possible for starboard side alongside.

It is safe to swing gangway out before berthing. It should be on the end of a derrick as it has to be swung clear of lamp post on quay and landed at an angle of 45°.
DISCHARGE: There are lines for naphtha, benzene, butadiene vapour and liquid, ethylene vapour and liquid and ammonia vapour and liquid. Butadiene 8 in., ammonia 10 in., both sets Chicksans, others use hoses. The ammonia connections are the Southerly set, ammonia coupling 10 in. 300 ASA to spool piece 12 in. 150 ASA. The ethylene connections are Connex set with 8 in. and 300 lb. coupling made with cold materials. The Shore personnel effect the connection. In total there are 15 lines for loading and unloading of various chemicals such as Naphtha, Benzene, Butadiene vapour and liquid, Ammonia vapour and liquid, Aromatic oil, Naphtenic oil, Heavy Extract Oil, Styrene, DDB, Propylene Tetramer, EDC, Propylene Liquid and Gas, VCM Liquid and gas, Ethylene Liquid and Gas.

Vapour return line can be used if required.

Samples taken before discharge.

Petkim's surveyor speaks English. Hut on quay with telephone.

Line capacities are given to the ship's Master by the surveyor before discharge. The back pressure varies from 2.5 to 5 Bar.

Surveyors as normal, travel around Turkey following ships, so can be late in boarding if ship early, then Petkim's Representative notes temperatures and ullages.
GENERAL: Fresh water available from quay at 40 t.p.h. metered at U.S.$ 3.64 per tonne.

Fuel by barge. Istanbul is fairly close so may be cheaper to go to anchorage there for fuel as available locally by barge but costly.

Over many voyages to this port and Gemlik, air freight items from North Europe always get through.

Lloyd's/Agent: Lloyd's Surveyor from Istanbul also covers all Turkey but travel is expensive.
AUTHORITY: Petkim Petrokimya Holding A.S., Yarimca Petrokimya Kompleksi, P.O. Box 46-47, Kocaeli, Turkey. *Tel:* 0262-5281450 (20 lines). *Telex:* 33113 Ypet TR, 33109 Ptkm TR. *Cables:* Petkim Izmit. *FAX:* 0262-5281738, 0262-5281400.

ZONGULDAK: 41.28 N. 31.49 E.

PILOTAGE: Refer to "Canakkale" and "Istanbul".

Harbour Pilots obtainable from Coaling Company, Pilot boards off port entrance by launch. Ordered by Agent subject to vessel's ETA given at least 24 hours before arrival.
ANCHORAGES: Good anchorage off the harbour in a depth of 13 fathoms, sand and mud bottom.

Anchorage prohibited South of a line drawn in direction 292.5° distance 7.5 cables from head of the Northern breakwater. The Southern limit of this area is a line drawn in direction 262° from the head of the Northern breakwater to the shore.
RESTRICTIONS: Harbour entrance between breakwaters. Entrance width 600 ft.

Traffic signals displayed from signal mast on Northern Breakwater, as follows:

2 black balls or 2 red lights, meaning "Harbour closed".

2 black cones or 2 green lights, meaning "Harbour open".

A black ball over black cone or red light over green light, meaning "Do not attempt to enter".

A black cone over a black ball or green light over a red light, meaning "No tug available".

A black ball between 2 black cones or red light between 2 green lights, meaning "Wait. You will be piloted into the harbour".

3 black balls, or 3 red lights, meaning "Because of unfavourable weather you cannot be piloted into the harbour".
RADIO: Zonguldak Radio. Call sign TAR.
TUGS: 5 tugs available.
BERTHING: Coal quays length 1,650 ft. depth alongside 10 m.

Cargo quay length 500 ft. depth alongside 10 m. Loading rate 350 – 450 t.p.h.

Northern Breakwater, 2 berths, at inner end with depth of 7 m. alongside.
CRANES: Shore cranes up to 15 tons capacity and floating crane 60 tons capacity.
FRESH WATER: Available from the quays.
FUEL: Only coal bunkers available.

Turks and Caicos Islands

GRAND TURK: 21.28 N. 71.08 W. (See Plan)

DOCUMENTS: *Customs:* Clearance from last port, Inward Report, Crew List and Declaration, Ship's Stores List, Manifest of all goods to be discharged at each Port.
Immigration: Passengers Manifest, Immigration control cards.
PILOTAGE: Compulsory. The Owner, Master, or Agent of a ship bound for any Port in the Turks and Caicos Islands must report via Harbour Master on VHF Channel 16, 4 hours in advance of the ETA of the ship.
The following information is required.
1. Name/Call Sign of Vessel.
2. Nationality.
3. Length, Draft, and Gross and Net Registered Tonnage.
Pilot Office on VHF Channel 16. Berth arranged by Harbour Master through Local agent making request 24 hours in advance for use of dock and facilities.
ANCHORAGE: Available.

Ukraine

BELGOROD-DNESTROVSKY:
46.12 N. 30.21 E. **(See Plan)**

GENERAL: The commercial sea port of Belgorod-Dnestrovsky is situated on the North-Western part of the Black Sea coast, on the right side of the Dnestrovsky Estuary (the Southern Basin), at a distance of 80-90 km. to the S.W. of the port of Odessa. Navigational season lasts all the year round, with powerful (600 h.p. – 1,200 h.p.) tug assistance during severe Winters. The Tsaregradsky Lighthouse and the Tsaregradsky Leading Line should be used as guiding points when approaching the port.

Vessels should approach the port along the channel of the Dnestrovsky Estuary which is provided with a good navigational marks system.

DOCUMENTS:
7 General Declarations, IMO FAL Form 1
7 Crew Lists, IMO FAL Form 5
2 Crew's Effects Declarations IMO Form 4
2 Money Lists.
2 Cargo Declarations IMO Form 2
Safety Certificates.

PILOTAGE: Pilotage compulsory for all vessels. A Pilot usually boards vessel at Reception Buoy No. 1 (Lat. 46° 04' N. Long. 30° 30' E.) situated 1.2 miles to the S.E. of the Tsaregradsky Lighthouse.

ANCHORAGE: The port outer roads with depths of up to 14 m. are situated 0.5 mile to the S.E. of the Reception Buoy. The holding ground is good. There is an inner roadstead situated within the port area where usually two vessels can be anchored pending berthing.

RESTRICTIONS: Vessels are allowed to navigate along the channel during daytime only. The port can be entered by vessels with draft of up to 4.5 m. and the maximum height (from the water level) of 28.0 m. Vessels should follow the channel at a speed not more than 5 knots.
